The U.S. Circuit Court of Appeals for the Sixth Circuit upheld the order of the Commission in that case on April 13, 1944 (142 F. 2d 511), and in doing so made it clear that it agreed with the findings of the Commission that Muller and Co. had undertaken the practice of selling at prices below cost to eliminate a competitor by the name of Schanzer. The court in its opinion referred to much of the evidence on which the Commission's findings were based and the showing in the evidence that it was E. B. Muller and Co.'s intent to eliminate its competitor. In that connection, the court stated: "These statements must be read in light of the controlling fact that Schanzer is the petitioners' only competitor, and so read they evince an evident determination to destroy Schanzer's business." Thus, it is clear that where the Commission has utilized section 5 of the Federal Trade Commission Act to attack sales at prices below cost, it has done so successfully under existing law only where it has alleged, proven and found that the sales were for the purpose or intent of destroying competition.

Although the Muller case was decided by the Commission almost 20 years ago, the Commission is continuing to adhere to the concept of that case. For example, on Wednesday, June 8, 1960, the Commission made public in a release that it had issued complaints against the Celotex Corp., FTC docket 7907, the Logan-Long Co., FTC docket 7906, and Lloyd A. Fry Roofing Co., FTC docket 7908, in which it had been alleged that those companies had been selling roofing materials at prices below cost or at unreasonably low prices in the Southeast and Southwest "with the intent and effect of restraining competition in these areas." Thus, only 1 week ago, the Commission failed to utilize the Federal Trade Commission Act in proceedings against prices at sales below cost, except where the sales are shown to be for the purpose or with the intent of destroying competition, and yet the Commission in its agency's report on H.R. 10235, indicates that under section 5 of the Federal Trade Commission Act, the Commission considers that it can proceed against such pricing practices where it is shown that they are coupled "with the effect or the purpose stated in the proposed legislation."

It is sufficient to say that it appears that the Commission, in opposing this proposed legislation, is trying to say it is unnecessary because the Commission already has more authority and power than the legislation would provide the Commission to halt sales at prices below cost. On the other hand, as stated earlier, the Commission refuses to act on the complaints of small businessmen against sales at prices below cost unless it is shown that the sales are made for the purpose or with the intent of destroying competition.

The second objection by the Commission to the proposed legislation would authorize and direct it to evaluate factors under two different statutes having different, and in some instances, conflicting terms, standards, and defenses. In that connection, the Commission alleges this would result in confusion and uncertainty as to the applicable law and its administration.

Obviously, the Commission is limiting its observations in that respect to the agency's report it is making on H.R. 10235. In the actions it undertakes, it frequently utilizes both section 2a of the Clayton Act, as amended by the Robinson-Patman Act, and section 5 of the Federal Trade Commission Act in proceeding against price discrimination practices, and where the gravity of the offense is found sufficient to bring it within the purview of the higher standards of proof required in proceedings under section 5 of the Federal Trade Commission Act. For example, the E. B. Muller & Co. case referred to earlier, was founded upon two counts. Count I of that case alleged a violation of section 5 of the Federal Trade Commission Act, and count II alleged a violation of section 2a of the Clayton Act, as amended by the Robinson-Patman Act. There the Commission clearly utilized its authority, but it was not directed to proceed against a particular practice under two different statutes having different terms, standards and defenses. Likewise, as announced to the public on June 8, 1960, the Commission, in proceeding against the Celotex Corp., the Logon-Long Co. and the Lloyd A. Fry Roofing Co., elected to proceed on the basis of two counts in each of those cases. In one count the charge is made that section 2a of the Clayton Act, as amended by the Robinson-Patman Act, is violated, and in the second count it is alleged that section 5 of the Federal Trade Commission Act is violated. In each case, both counts are directed against the practice of discriminating in price involving alleged sales at prices below cost.

In these cases, as was true in the earlier cases, including the E. B. Muller case, the Commission will find it necessary to deal with "cost" factors. Perhaps the Commission, in conclusion, will do as it did in the E. B. Muller case, state—"As used, the term 'cost' means the total cost to respondents of any such transactions of sale, including the costs of acquisition, porcessing, preparation and marketing, sale and delivery of such products," although in its agency's report on H.R. 10235, the Commission indicates that it will be well-nigh impossible, if not entirely so, to determine "cost" in cases that would arise under the proposed legislation.

The Department of Commerce has filed an adverse report on H.R. 10235. In that connection, it has stated that "The most serious problem posed by the bill is its unrealistic approach to pricing practices and the probable effect of raising many prices with an attendant reduction in volume of goods purchased and sold."

This objection to H.R. 10235 is more baffling and startling than the objections made by the Federal Trade Commission. Nowhere in the bill is there a provision which requires the use of any particular pricing practice. The only pricing practices prohibited are those which could have the effect of substantially lessening competition or tend to create monopolies, or those which would have a dangerous tendency to unduly hinder competition and tend to create monopolies.

It is too well established and so far beyond dispute, that the best assurance the public has for low and fair prices is the preservation of competition. Also, it is too clear to argue at this time that the elimination of competition and the creation of monopolies make for higher prices. What more need be said to brush off the objection made by the Department of Commerce to H.R. 10235 than to say that its objection, as above recounted, is the argument made by apologists for monopolists and constantly made against our antitrust policy and the various provisions of our antitrust laws.

The Executive Office of the President, Bureau of the Budget, has filed an adverse report on H.R. 10235. Its objection is predicated upon the fact that the Departments of Justice and Commerce and the Federal Trade Commission have raised important objections to the bill, and then observes that the Bureau of the Budget is in general agreement with the views of these agencies. The difficulty about that observation is that we are unable to determine whether those agencies found it necessary to agree with the Bureau of the Budget or the Bureau of the Budget just simply found it easier in agreement with the agencies. For example, in the report made by the Federal Trade Commission, it was stated that pursuant to regulations, its adverse report on H.R. 10235 "was submitted to the Bureau of the Budget on April 26, 1960, and on May 17, 1960, the Commission was advised that there would be no objection to the submission of the report to the committee."

In other words, these agencies, in reporting to the Congress of the United States on important proposed legislation, have found it necessary to determine that the Executive Office of the President did not object to the reports the agencies were making to the Congress. That is an important point because the Federal Trade Commission, in reporting upon matters of this kind, was conceived to be an arm of the Congress and not a puppet of the Chief Executive. As matters stand, even the Oversight Legislative Committee, having jurisdiction over the Federal Trade Commission, is unable to get views from the Federal Trade Commission on proposed legislation except as approved by the Executive Office of the President.

The House Small Business Committee in House Report No. 2967 (84th Cong.), at page 80, in its recommendation No. 4, recommended that the Legislative Oversight Committee consider legislation which would exempt the Federal regulatory agencies and commissions, such as the Federal Trade Commission, from the requirement that it submit to the Bureau of the Budget reports to be made to the Congress of the United States on proposed legislation.

In addition to these Government agencies' reports on H.R. 10235, we have noted other comments, raising questions about the bill. For the most part, these comments have been made by representatives of business groups. Some of these representatives have expressed the thought that perhaps the bill will present a number of problems to businessmen for which they will have no solution. In that connection, the following points have been raised:

1. "Would the bill force small and independent retailers to sell their goods, wares, and merchandise in their stores at a level which includes their individual overall cost of doing business and, thereby, prevent such small retailers from meeting the competitive prices of their larger competitors who perhaps would be able to buy merchandise at lower prices?"

Answer: "The bill would not force all retailers to sell every product in their stores at a level which includes their individual overall cost of doing business. That is true because the bill does not prohibit sales at levels below cost except where the effect on competition and the tendency to create a monopoly would appear as specified in the bill. It is inconceivable that the small independent retailers, in making a special sale or moving in an effort to meet the prices of larger competitors, would ever be charged with so acting, with the effect of substantially lessening competition or tend to create a monopoly. On the other hand, it would be far more likely that the large, multiple market retailers doing a nationwide business, would be found to substantially and adversely affect competition through sales at prices and at levels below cost. In this respect, the provisions of this bill are not different from the provisions of the laws we have prohibiting price discrimination, where the effect of the price discriminations substantially lessen competition or tend to create a monopoly. It is only those with considerable economic power who are likely to have the effect of substantially lessening competition through the use of price discriminatory practices. I know of no instance, for example, of any retail grocery store, located on a line separating two States and, thereby, doing business in more than one State, ever being charged with a violation of our Federal laws against price discriminations. I do not believe either private parties or representatives of the Goverment could ever be so foolish as to make such charges. Likewise, I do not believe anyone could be so foolish as to undertake a proceeding against a small, independent retailer for selling at prices below cost, allegedly in violation of the provisions of this bill. What I have said about the bill and its application to retailers in this respect applies equally to wholesalers and manufacturers."

2. "Would the bill adversely affect the loss-leader laws of the various States?"

Answer: "Absolutely not. The bill was drafted so as to give recognition and full faith and credit to these various State laws. Therefore, it provides that where a transaction in a given State is challenged as having taken place in violation of the provisions of this bill at a price below cost, the term 'cost' in such instance would be determined as the term 'cost' is determined under the laws of that State."

3. "Would the bill require a large, nationwide concern doing business in many States to determine its 'cost' in different ways, depending upon the States in which it does business?"

Answer: "The bill would not add to the difficulties of any business firm in that regard. Whatever difficulties the business firm has in that respect, it now faces. For ex-

ample, the Great Atlantic & Pacific Tea Co. is doing business in 37 States. Many of those States have laws which prohibit sales at prices below cost. Some of the States have standards for determining cost different from the standards applying in other States. Therefore, the Great Atlantic & Pacific Tea Co., in order to conform to the laws of the States in which it is operating, is required by virtue of State laws to determine its costs in different ways. Its 'cost' under the law of the State of Michigan would be different and determined by different methods from what its 'cost' and method of determining cost would be in a number of other States."

4. "Why does not the bill provide that it shall be an absolute defense to a charge of its violation for one to say he was meeting competition in good faith?"

Answer: "Near the conclusion of my prepared statement, I pointed out that the question had been asked whether the good-faith meeting of competition would be absolute as a defense to any charge brought under H.R. 10235. I pointed out that the bill does not dispose of any issue regarding good-faith meeting of competition. Indeed, it does not deal with that issue. To the extent good-faith meeting of competition would become relative and material to any issue in a case arising under the Federal Trade Commission Act as it exists today, then it would remain as relevant and material to an issue arising under this bill. We certainly do not want the bill to provide for a wrecking of our laws against price discrimination by providing that one may discriminate in price through the good-faith meeting of competition, even where the effect would be to substantially lessen competition or tend to create a monopoly in any line of commerce. The controversy over that matter is too long and involved to explain as a part of this answer. However, it is noted that efforts to write into statutory law a provision which would weaken our antitrust laws so as to permit price discrimination made in good faith to meet competition and where the effect would be to substantially lessen competition or tend to create monopolies have been successfully resisted."

5. "Some persons have stated that there is no possibility this bill can be enacted into law this year because we are getting a hearing at such a late date in the session."

Answer: "We should not accept the proposition that it is too late to help small business. Those who do not want to help small business should have a better excuse. Also, they should be prepared to give to small business an accounting of why they have not acted in the interests of small business before this late date."

In conclusion, I wish to reiterate that Government officials or others who have in mind improvements for strengthening the legislative proposals in H.R. 10235, to make more effective our laws against the monopolistic practices of price discriminations, including those at levels below cost, should bring their proposals forward. It is not in keeping with the American tradition and the American way to oppose for opposition's sake. We should be constructive. Therefore, unless the Federal Trade Commission and the Department of Justice wish to stand convicted of the charge that they are not opposed to monopolistic practices which destroy small business, they should advise Congress how to strengthen the provisions of H.R. 10235 to make it effective against those practices, and not simply present to the Congress their objections to legislation of this kind.

HEARINGS ON BILLS TO HELP SMALL BUSINESS

Mr. PATMAN. Mr. Speaker, yesterday, Thursday, June 16, 1960, on the 24th anniversary of the approval of the Robinson-Patman Act by the Congress, a subcommittee of the House Interstate and Foreign Commerce Committee held hearings on bills to help small business by preventing certain discriminatory prices and sales at prices below cost. These bills have been introduced by myself and more than 25 other Members of the House.

During the course of the hearings, I and other sponsors of this proposed legislation testified and presented information about the need for this proposed legislation. Among those who have sponsored this legislation is our distinguished colleague, the gentleman from California [Mr. McFALL]. In his testimony he made particular reference to the need for this proposed legislation for the protection of dairy farmers and other small businessmen in California. I wish to revise and extend my remarks by including at this point a copy of the statement made by Representative McFALL on this matter.

(The statement is as follows:)

STATEMENT OF CONGRESSMAN JOHN J. McFALL BEFORE THE HOUSE INTERSTATE AND FOREIGN COMMERCE SUBCOMMITTEE ON COMMERCE AND FINANCE, JUNE 16, 1960, ON H.R. 11703 AND RELATED LEGISLATION TO HELP SMALL BUSINESS, INCLUDING CALIFORNIA DAIRYMEN, BY PREVENTING SALES AT PRICES BELOW COSTS IF SUCH SALES TEND TO CREATE MONOPOLY

Mr. Chairman, thank you for the opportunity of testifying today before your committee on legislation that is of particular concern to the small dairymen of California and of real interest to small businessmen everywhere.

I am the author of H.R. 11703, which is identical to a number of other measures on this subject.

Briefly, this legislation would forbid sales below costs if such sales would tend to create a monopoly in any line of commerce or would injure, destroy, or prevent competition.

The legislation was drawn as a direct result of investigations during the past 12 months by the House Small Business Committee which found a consistent pattern of business practices harmful to the small businessman, practices that are leading to elimination of these independent businessmen by the thousands.

Only through preservation of competition can the public be assured of low prices provided through competition. Prices representing sales made temporarily at levels below cost provide the public with only temporary advantages, and such advantage is paid for dearly at a later date after the competition is eliminated.

A committee investigator testified in detail how a consistent pattern of operation has worked to eliminate small dairymen throughout central California. He testified:

"It is alleged that an actual feudal system is in effect in California and that the major distributors who purchase the raw product from the producers are arrogant and unfair to the producers in their arbitrary handling of the contracts and their determination of the usage and subsequent payments."

The special investigator then testified in considerable detail how the small independent dairyman is at the complete mercy of the large distributors and, as a result, hundreds have been driven out of business.

A similar pattern was developed in hearings in other sections of the country, as you were told by Congressman TOM STEED, chairman of the special committee which investigated the dairy situation.

Effect of the legislation in prohibiting use of so-called loss leaders when used to eliminate grocery store competition was described by Congressman JAMES ROOSEVELT, who headed the special committee which investigated the grocery business throughout the country.

May I urge your favorable action on this legislation which is so important to protect the right of the small and independent business enterprise to operate under free and fair competitive practices without which such enterprise cannot exist.

NATIONAL CONSTITUTIONAL CRISIS: A PLAN FOR ACTION—SEQUEL NO. 2

Mr. ALFORD. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. ALFORD. Mr. Speaker, in a statement to the House on March 14, 1960, I quoted a legal analysis of what has since become widely known as the Virginia plan for enforcing the Constitution. This is strictly a plan for action. It embodies a proposal that is crystallized and made clearly definite in two legislative measures introduced in the 1960 session of the General Assembly of Virginia: House Joint Resolution No. 44 and House bill No. 407.

These measures were introduced by Delegate Lucas D. Phillips, of Leesburg, Va., and sponsored by 35 percent of the total membership of the house of delegates. Such sponsorship was a forecast for success had the addresses of these supporters not been prevented by procedural difficulties due to the time limit for the legislative session.

The measures are notable in several respects. They represent the first legally and technically correct effort by any State, as a party to the compact known as the Constitution of the United States, to enforce the Constitution through action directed to unlawful proceeding of the judiciary whose power to act is derived solely from grants of authority within that compact.

Another significance is that no one arose to question the validity of the legal position as outlined in the measures. Moreover, they are the first constitutionally founded actions designed to curb proceedings that follow from unauthorized acts of members of the Supreme Court in cases where authority has not been given them to act as a court. As such, these proceedings of the Virginia Legislature have attracted wide interest and comment throughout the Nation.

The immediate purpose of the two measures is to clarify existing law. Such clarification by the States, acting in their highest sovereign capacities as signatories to the Federal compact, is absolutely essential to make definite what is the law in those cases wherein members of the Supreme Court have attempted to usurp authority. The assumption of usurped authority, unless denied by the State affected, bears the legal implication that the State has consented and

approved the otherwise invalid action of the Federal agency concerned.

At this point, Mr. Speaker, I wish to stress that this movement in Virginia resembles other great landmarks in the establishment and preservation of our liberties in that it does not purport to enact new law but to define and reaffirm existing law.

These milestones in the preservation of human liberty include the Magna Carta, 1215; the Confirmatio Cartarum, 1297; the Petition of Right, 1628; the action of the Virginia House of Burgesses in approving the resolutions of Patrick Henry declaring the Stamp Act in excess of the authority of Parliament, 1765; and the Declaration of Independence declaring invalid acts of the British Ministry, 1776; also the Constitution of the United States and the Bill of Rights.

The people of our country are now confronted with a crisis comparable to that of 1776. The great task facing the signatory parties to the Federal compact today is clarification and reaffirmation of existing law.

It is apparent to all that the attempted usurpation of power by Federal agents will destroy our constitutional liberties unless curbed. It should be a matter of the greatest possible interest to all people throughout the United States that the State of Virginia has under consideration an effective remedy to meet this grave situation.

The full text of House Joint Resolution 44 above mentioned will be found in my statement to the House in the CONGRESSIONAL RECORD of March 15, 1960. I shall now quote the other measure of the Virginia plan for enforcing the Constitution:

HOUSE BILL NO. 407

(Offered February 8, 1960)

A bill to state the policy of the Commonwealth of Virginia with reference to the autocratic assumption of authority on the part of members of the Supreme Court and their attempted application of usurped power to the law of this State

Be it enacted by the General Assembly of Virginia:

That on April 15, 1783, under the terms of the Treaty of Peace at the end of the Revolutionary War it was acknowledged and confirmed that the Commonwealth of Virginia was a "free sovereign and independent" State. Thereafter, on June 26, 1788, the State of Virginia confirmed and ratified, together with other "free sovereign and independent" States, that certain compact and agreement known as the Constitution of the United States, under which there were constituted three separate and distinct agencies of Government, each with clearly defined and strictly limited powers.

Each of the parties signatory to this agreement had its established form of government with executive and legislative branches, a full judicial system, as well as military and police power organizations together with the unlimited right of each to make and enforce its own laws.

Under article I of this agreement there were constituted the legislative, under article II the executive, and under article III the judicial, Departments of Government in which the limits of their authority were clearly defined.

All "legislative powers" therein "granted" were conferred upon the Congress. The power conferred upon the judicial department was limited to "judicial power" and all powers not delegated were expressly reserved to the States or to the people.

This limit to "judicial power" denied the U.S. Supreme Court any and all legislative power. It was given no power to alter any law, or to amend or enlarge any of the constitutional provisions, either by direct decree or indirectly by any other order or decision or device.

Therefore, the action taken by the Justices of the Supreme Court of the United States, in the case of Davis against the County School Board of Prince Edward County, is beyond any authority conferred upon the Court by the Constitution, in that the members of the Court acted beyond the prescribed limit of judicial authority. Accordingly, their proceedings are not an authorized act of the Supreme Court but merely the act of members of the Court, and are hereby declared to be unauthorized, and unconstitutional, invalid, and not the law within the jurisdiction of this State.

The General Assembly of Virginia further declares that what is purported to be a ruling of the U.S. Supreme Court in *Brown* v. *Board of Education et al.* is not a constitutionally authorized ruling of the court, and hence is unconstitutional, invalid and not law within the jurisdiction of this State. The ruling is beyond the authority granted, in that the members of the Court have attempted to exceed their constitutional power which is limited under the provisions of article III to "judicial power." The ruling, if validated by this State, would be in denial of the established rule of law, that the intent of those who framed and adopted the Constitution or the amendments thereto must govern in its construction. Furthermore, such approval by the parties signatory would be an attempt to give a legal effect to the ruling as if it were in effect an amendment to the Constitution of the United States, which to be valid must have the approval of three-fourths of the States.

The General Assembly of Virginia declares that in issuing unauthorized decrees which interfere with the administration of the laws and the constitution of this Commonwealth, in relation to its public schools, and in seeking to enforce such decrees with court orders and injunctive writs, the Court's proceedings are in violation of section 1 of article I and section 1 of article II of the Constitution of the United States, are unconstitutional, invalid, and not law within the jurisdiction of this State.

The General Assembly of Virginia further declares that the Justices of the Supreme Court, in concert with members of the Federal district courts of the United States have proceeded in violating section 2 of article III of the Constitution of the United States, in abdicating their constitutional responsibility and duty under said section, to try all cases in which a State shall be a party, and in procuring the usurpation of that power by members of the Federal district courts; and that therefore those acts are unconstitutional and are invalid and not law in this State.

It has heretofore been considered that due restraint would voluntarily be exercised by the agencies of the government so created, and especially by the members of the Supreme Court, to the end that they would confine their areas of activity and procedure and their rulings, strictly within the limits fixed under the Constitution and within the authority defined therein so as to be in accord with its fixed requirement that they and each of them, "shall be bound by an oath to support this Constitution."

The necessity for this action now being taken by this State, is occasioned by such flagrant disregard of the fixed constitutional limitations binding upon the Supreme Court, that their lack of restraint has been made the subject of criticism, not only by outstanding jurists, but by a resolution of the association of the heads of the supreme courts of all the States of this Nation, by leading bar associations, and by outstanding members thereof.

These criticisms are not only leveled at the failure of the Court to exercise proper restraint in recognition of the limits of its authority but they also are directed at decisions which question the power of the Government of the United States to defend itself from enemies within the country, acting in alliance with enemies outside the country, which action thwarts the agencies concerned with the defense of the country from these enemies.

The government of this State has exhausted all possible means of arriving at a solution to this problem without the exercise by this State of the reserved powers to defend the State from the unlawful actions of the Supreme Court and we must now proceed in accordance with the actions herein taken, to the effect that the unlawful unauthorized procedures of the members of the Court, which represent an usurpation of power which clearly is not accorded to them under the compact, binding and limiting their conduct, will not be recognized as law within the jurisdiction of this State.

This action of the State, is notice (1) to the other governments which are signatory parties, along with the government of this State, to the compact known as the Constitution of the United States; (2) to the agencies and the departments thereof generally known as departments of the Federal Government, and which have been constituted under this agreement; and (3) to those persons who have been selected to occupy and who now occupy the positions, and who have accepted the obligations to perform the duties, as defined and limited in said compact.

STUDY OF STATE USE TAXES ON INTERSTATE SALES

Mr. MEADER. Mr. Speaker, I ask unanimous consent to revise and extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. MEADER. Mr. Speaker, in the closing days of the last session, Congress enacted public Law 86–272 which provides for a study by the Judiciary Committee of the House and the Finance Committee of the Senate of taxation by States of income derived exclusively from interstate commerce to determine what legislation, if any, in this field may be required.

Congress was prompted to consider this problem as a result of the Supreme Court decisions on February 24, 1959, in *Northwestern States Portland Cement Co.* v. *Minnesota* and *Williams* v. *Stockham Valves & Fittings, Inc.* (358 U.S. 450).

Since then on March 1, 1960, the Supreme Court in *Scripto, Inc.* v. *Dale Carson* (362 U.S. 207) determined an issue involving the imposition of a Florida State use tax on a commodity sold and shipped from Georgia, although as in the Northwestern and Stockham cases orders were solicited within the State which imposed the tax.

Since the Scripto decision, several measures have been introduced to establish a minimum standard with respect

to State sales and use taxes. I believe Congress would be premature and hasty in considering such a measure at this time, especially since the study authorized by Public Law 86–272 has not been completed. I do believe, however, that the State imposition of income taxes is sufficiently related to the State imposition of sales and use taxes in transactions exclusively in interstate commerce to warrant the inclusion of the latter in the study to be conducted by the House Judiciary Committee and the Senate Finance Committee. In this regard, on Tuesday, June 14, 1960, the Senate Finance Committee reported S. 3549 with amendments to permit such a study.

In order to facilitate the enactment of a study measure before the adjournment of Congress, I am introducing a bill which will amend Public Law 86–272 to authorize a study of State sales and use taxes in transactions exclusively in interstate commerce. It is contemplated that this study will be conducted in conjunction with the study of State income taxes which has already been authorized by Public Law 86–272.

Mr. Speaker, the problems of State taxation of interstate income and State use and sales taxation of interstate transactions are sufficiently similar that they should be studied together. On the one hand we know that the States and local governments are hard pressed for revenue and certainly would not wish to shut off sources of revenue. On the other hand, free and unrestricted flow of interstate commerce is vital to the strength and vigor of our national economy, and there should be uniformity and clarity in the manner and extent to which States may look to interstate commerce as a source of revenue.

This problem is a very delicate and difficult one, and it should be apparent that the confusion and ambiguity pointed up by the Scripto and Northwestern and Stockham decisions should be cleared up as promptly as possible.

SERVICE PENSIONS

Mr. LANE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. LANE. Mr. Speaker, our contention is that the veterans of World War I are entitled to service pensions consistent with the precedent established by the award of such pensions to the veterans of previous wars. The average age of the veterans of World War I is close to 66 years and we submit that the enactment of a pension law for them is long overdue.

Congress first adopted a "pure service pension" schedule for the survivors of the Revolutionary War, on June 7, 1832. This Act granted full pay for life to veterans who had served a minimum of 2 years.

The Mexican War Pension Act of 1887 granted a pension, if the veteran was suffering from disabilities to a pensionable degree. Veterans 62 years of age and older were entitled to a pension regardless of any disability.

In the debate on the Mexican War Pension Act, Senator Hoar, of Massachusetts, pleaded for uniformity, for consistency of action on the part of Congress. He explained that if the Government were bound, as a matter of principle, to pension soldiers or sailors who do not need the pension, and who are under no disability, then it is a universal principle, and as such, the veterans of all wars are entitled to the pension. Enactment of the bill, said the Senator, would very shortly compel the Congress to take the next step, a pure service pension for the Civil War veterans.

Widespread agitation led to the act of May 11, 1912, setting up a formula whereby the Civil War veteran must have served at least 90 days in that conflict, and that he must be 62 years of age and older. The amounts provided for on a graduated scale according to length of service, have been increased from time to time since 1912.

The act of June 5, 1920, was entitled: "An act to pension soldiers and sailors of the War with Spain, the Philippine Insurrection, and the China Relief Expedition." It provided that any such person who has reached the age of 62 years, shall, upon making proof of such fact, be placed upon the pension roll. As for pure service pensions, the Spanish-American War still remains the most recent conflict for which pensions have been authorized by the Congress.

Obviously, the veterans of World War I are next in order. When Congress passed a bill to provide adjusted compensation for the veterans of 1917–18, it was vetoed by President Harding on September 19, 1922. In the message explaining his action, the President was looking to the future when he said that it was inevitable, as the years pass, that pension provision for World War I veterans will be made, as it has been made for those who served in previous wars. The fullfillment of that prophecy and that obligation is approaching.

When we average out the length of time that the veterans of the five previous wars in American history had to wait before service pensions were authorized, we find that it takes a fraction more than 42 years. We, of World War I, with almost 41½ years behind us, are close to the time of our entitlement. When we consider that our good friends of the Spanish-American War had to wait only 22 years for their pensions, it would appear that favorable action on our claim cannot be delayed much longer.

The program we advocate is one whose cost begins to diminish from the moment it becomes effective. Three hundred and sixty World War I veterans are dying every day. Here is what is happening, as described by William F. Salin, legislative officer, in a letter that was published in the January 21, 1960, issue of the National Tribune-Stars and Stripes:

> In 1959 this barracks (Brazil Barracks No. 1178) had a membership of 119. During said year we lost seven members by death. It is reasonable to assume that this death rate will increase each year as the years go by; but even with the same annual death rate, within 17 years our membership will be entirely used up; and the same ratio is bound to apply to the entire national membership. By 1976, any World War I man living will be living on borrowed time. It naturally follows that the cost of this proposed pension will be reduced 6 percent the first year in effect; 12 percent the second year and therefore by 1976 only 6 percent of these men will be still living and the cost of said pension will have been reduced 94 percent. These facts and figures are arrived at by very simple arithmetic.

There is nothing sudden or revolutionary in our proposal, almost 41½ years after World War I, and following a precedent that has been endorsed by Congress in favor of the veterans of every war since the first "pure service pension" was enacted for the veterans of the Revolutionary War. We believe that the veteran of World War I who has served at least 90 days; who received an honorable discharge; and is now 62 years of age or older is entitled to a pension of $100 per month.

We also believe that this pension must be paid without regard to the veterans annual income, whether derived from payments of social security benefits, railroad retirement benefits, pensions, annuities, or otherwise.

We are certain that this is the simplest and fairest method by which the Nation's obligation to the aging veterans of World War I will be honored.

The time has come for decision.

The Congress cannot default on the established precedents which direct us to provide a service pension for all qualified veterans of World War I.

PANAMA CANAL CONTRACTS

Mr. LEVERING. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. LEVERING. Mr. Speaker, on June 7 I requested the Secretary of the Army, the Honorable Wilber M. Brucker, to reconsider the recent award of the towing locomotive contract for the Panama Canal to the Mitsubishi Co. of Japan. Today I received a letter from Mr. Brucker in response to my request which contains the following statement:

> As you know, I was advised by the Director of the Office of Civil and Defense Mobilization that award of the contract to the American bidder could not be justified on the basis that it was necessary to protect essential national security interests. This finding was conclusive on the company.

Mr. Speaker, I must say in all deference to the distinguished Director of OCDM, how can such a decision be sustained in the face of the fact that the very existence of the Government of Japan is seriously threatened by the same anti-American forces which have precluded a peace mission to that country by the President of the United States?

SMEAR ATTACK BY LIFE MAGAZINE

The SPEAKER. Under the previous order of the House, the gentleman from Pennsylvania [Mr. RHODES], is recognized for 10 minutes.

Mr. RHODES of Pennsylvania. Mr. Speaker, today I have introduced a bill to eliminate the stationery allowance for House Members.

It may not be a popular proposal, particularly to those Members who spend more than the present allowance. But it would help in protecting Members against smear attacks. The allowance should be eliminated entirely, if necessary, to protect Members from unscrupulous individuals whose objective is to smear and discredit.

Last week I was the target of such an attack in Life magazine for a $33.75 purchase I made through my stationery account back in 1958. This was for Christmas gifts for members of my staff. Whether such expenditures are for pens, dictionaries, purses, wallets, or umbrellas, makes no difference. If this is improper, there would be few Members who have not sinned. This expenditure was from funds which were my own.

Some Members withdraw their full allowance at the beginning of the session. If a Member dies, the balance in his stationery account is sent to his widow. If the full amount is unspent, Internal Revenue rules that it is taxable as income. No matter what course you take and no matter how you spend this allowance, you are not free from those who seek to smear and destroy your good reputation.

If such purchases are improper, surely the publishers of Life could find something more sensational than my $33.75 purchase. They would not have had to go back to 1958. Why have they singled me out for smear and ridicule? I will tell you why.

Yes, I have sinned in the eyes of this news monopoly. But my sin is something entirely different than they try to make it appear. It is because I am the author of legislation to limit their unjust postal subsidies.

Subsidies to the Luce publications which include Life, Time, Fortune, House and Home, Sports Illustrated, and Architectural Forum, amount to a million dollars a month. American taxpayers must pay for this big Federal handout and giveaway. Yes, I offended these publishers when I focused public attention on their big subsidy, and particularly when I introduced legislation to limit it. Yet Life has not dared to attack me on this issue. On this question, the Luce magazines keep their readers in the dark.

In 1957 the House passed my bill to limit subsidies to $100,000 annually for any one publication. The bill was approved by the House as an amendment to the postal rate bill. This was an unpardonable sin which has marked me for punishment and liquidation by the officials of the Luce empire. This amendment was defeated in the Senate, where it got 33 votes despite the intense and unethical lobbying campaign by big magazine publishers. The issue was given the silent treatment by the magazine publishers. But behind the scenes this powerful and influential pressure group went to work and succeeded in killing my bill and in holding on to their big subsidies.

Last year on July 28, 1959, I again introduced a subsidy limitation bill. On the morning of that day, even before I put the bill in the hopper, I had a phone call from Mr. Francis R. Cawley, lobbyist of the Magazine Publishers' Association. He asked me to meet with him and a representative of Time, Inc., to which I consented. The next day the three of us got together to discuss my subsidy limitation bill. When I would not agree with them or yield to their pressure, I knew what to expect.

You do not have to offer a subsidy-limitation bill to offend these irresponsible publishers. You can get on their blacklist by actively supporting progressive and humanitarian legislation, particularly when it is in conflict with their philosophy and selfish interest.

Not a Member of Congress is immune from unscrupulous smear attacks in connection with his stationery account. If there be such a thing as a perfect man, even he could be held up to ridicule and be smeared in an effort to discredit him and destroy his good reputation.

There is more at stake than the honor and reputation of House Members. Monopoly power over the vital sources of news and information used irresponsibly and unscrupulously adds to growing immorality, causes disrespect for government, confusion and distrust.

Rigged quiz shows and rigged prize fights have shocked the American people. Immoral as they are, they are no more immoral and certainly less dangerous to our democracy than the rigging of news and information by irresponsible publishers who behind a smoke screen are now campaigning to elect the next Congress—a Congress that will bend to their might and will.

If the publishers of Life have an ulterior motive for smearing one Member of Congress, how can they be trusted on anything they publish?

I have no desire to defend wrongdoing by any Member. But there should be some assurance for honorable and respected Members of the House that information obtained on stationery accounts or on travel expenditures will not be distorted, peddled and sold for smear purposes in the congressional elections this year.

This is a lucrative racket which offers big monetary rewards for unscrupulous individuals. It also provides an opportunity to special interest groups, of which Life publishers are a part, to distract public attention from real and vital issues. For this reason, I believe the House should act on my proposal.

AMERICAN DETRACTORS

The SPEAKER. Under previous order of the House, the gentleman from Indiana [Mr. BRAY] is recognized for 5 minutes.

Mr. BRAY. Mr. Speaker, all of us were distressed to receive the word yesterday that the Japanese Government had requested an indefinite postponement of President Eisenhower's visit. It is also distressing that comments have been made by some of our country's less responsible critics. Last night, I am told, one of these critics on a television news program blamed the riots in Japan on the fancied military weakness of the United States.

Mr. Speaker, many of us have been saddened by those Americans who take delight in belittling their own country as to military, scientific and economic strength. They seem to take sadistic pleasure in attempting to prove that America is a second-class country. It is also sad that some of these would-be detractors of America's greatness hold positions of responsibility in our country. However, I am certain that those who would prove America is second-rate are far in the minority in our country.

The very fact that Russia would choose this time to beat the anti-American drums throughout the world demonstrates clearly that America is not kowtowing to communism; it is apparent that America is increasing her military strength over that of the Soviet Union. Russia always stirs up trouble and belittles her adversary when her imperialistic aggression is thwarted. The riots in Japan are clearly Communist-inspired. They fear the ratification of the Japanese-American treaty. America, for the last seven years, has been standing firm against Soviet aggression. We are still in Berlin regardless of continued Russian threats. Developments in the last 4 months prove conclusively that America is far ahead of Russia in real military strength. Our long-distance missile program, which was canceled in 1947, shows phenomenal achievement to the world today. We are definitely ahead of Russia in the quality of our military missiles. The last four types of satellites that we have launched show to the scientific world that America is far ahead of Russia in this field and is not second-class, but the real McCoy. But greater than all the other manifestations of strength is the fact that today Russia, and the rest of the world, know that American planes fly over Russia with immunity, something that no country can do to us.

The realization of the world that those same planes that fly over Russia at will could carry a nuclear bomb, places Russia in a second-class position to America. I am not going to discuss American military strength further, for that matter is going to be discussed on the floor of the House in some detail on Monday.

I do, however, want to remind this body that the greatest contribution to the Soviet propaganda campaign of nuclear and military blackmail that has been made unwittingly has come from a handful of noisy detractors of American strength, detractors who have adopted the role of permanent critics of our military policies. The "American second-class powerists," the "missile-gap yappers," and the "crawl on our bellies to Moscowites."

A greater share of the blame for these riots in Japan and indecision displayed

by some of the uncommitted nations must be borne by the detractors of America. Yet we are now subjected to the abuse of these detractors of America. We are treated to the sickeningly ludicrous sound of a chorus of condemnation, bleated out by a choir of drunken drivers, solemnly cursing the evils of drink, as they survey the very wreckage they themselves wrought as they sat bleary-eyed behind the wheel of the vehicle marked "political expediency."

Mr. Speaker, the irresponsible criticism which I have mentioned, I am happy to say, is not joined in by any great percentage of Americans. I am happy to say that the great majority of Americans of both political parties are not attempting to prove that America is second class. On the contrary, the overwhelming majority of the people in America know that America is still the real McCoy.

On Monday, June 20, the members of a Republican task force group which has devoted over 4 months to an intensive study of American strategy and strength will present to this body a report which amply covers that and many other subjects. I have studied this report and I can assure you, Mr. Speaker, that it represents an articulation of the administration's strategy in the cold war, based on the solid foundation of provable facts. It provides a basis for continuing the policies which have made the United States the most powerful nation on the face of the earth, and which will perpetuate and broaden that power until we achieve ultimate victory in the struggle which we call the cold war.

I urge all of my colleagues from both sides of the aisle to be present in this Chamber on Monday, when the report is to be made to Congress. And I challenge those who criticize the strategy outlined in this report to produce a detailed and workable alternative. Until they do, Mr. Speaker, their criticism can only be adjudged to be invalid, and damaging to the Nation which they claim to serve.

WHAT'S HAPPENING TO THE STUDENTS?

Mr. CURTIN. Mr. Speaker, I ask unanimous consent that the gentleman from California [Mr. JACKSON] may extend his remarks at this point in the RECORD and may include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. JACKSON. Mr. Speaker, under leave to extend my remarks I include an article from Freedom's Facts Against Communism, a publication of the All-American Conference To Combat Communism, June 1960 issue.

The article follows:

WHAT'S HAPPENING TO THE STUDENTS?

Within the past 8 weeks small bands of students have caused riots and have shaken governments in countries all over the world.

They toppled President Syngman Rhee from power in South Korea, brought a change of government in Turkey, caused a $250,000 riot in San Francisco, and created serious difficulties for President Eisenhower's visit to Japan.

In all cases, a relatively small number of students have been in the forefront of the riots and demonstrations. But behind them have been numbers of adults inflaming their passions and guiding the direction of their violent excesses.

Not much detail is known here about the student activities in South Korea or in Turkey, but some is known of what happened in San Francisco, and this throws light upon what is happening to students—at least to the small minority of students who get involved in headline grabbing riots.

To keep student activities in perspective, it is necessary to recognize that young people have certain characteristics which make them ideal material for spearheading mass demonstrations and even violent outbreaks. Young people like to be part of a crusade, a movement larger than themselves, with which they can identify themselves, and through which they can gain some degree of self-expression. Young people think more of the need to express themselves and dwell less upon the consequences of their actions than do adults.

HOW TO START A RIOT

If you want to start a riot, one way is to inflame the minds of a few students, throw in a couple of agitators to keep things going, and let nature take its course. Outbreaks of more or less violence have broken out on school campuses from time to time. We have all been through them and their intent was usually innocent enough.

Communists, who are master manipulators of people, know these characteristics of youth, and have consistently sought to exploit them to further Communist schemes. On February 2, Herbert Philbrick, a former FBI undercover agent in the Communist Party, testified to the House Un-American Activities Committee that "by propagandizing among young people, by telling them and by implying to them that this committee and other Government committees are a threat to their free speech, they know that immediately the young person is going to respond.

"Of course, not all young people are duped by such appeal," said Philbrick, "but always they are able to confuse a certain small number of young people and, therefore, building upon these appeals, they will exploit them still further."

All this is background for what happened in San Francisco on May 12, 13, and 14. On these dates the House Un-American Activities Committee met in San Francisco to hold hearings on current operations of the Communist Party in northern California. A small number of persons were subpenaed to appear before the committee.

WAVE OF PROTEST

Prior to the arrival of the committee, a wave of protest sparked by such groups as th American Civil Liberties Union, the Lawyers Guild, and west coast longshoremen was rolled up. Those subpenaed formed themselves into the bay area defense committee. Another group, calling itself the San Francisco Citizens' Committee To Preserve American Freedoms, got into the fray.

According to National Guardian (May 23), faculty members at the University of California at Berkeley and at San Francisco State College signed petitions against the hearings. Faculty members at San Jose State College and at Stanford University published protests.

The Daily Californian, a student paper, reportedly urged students to picket the committee and to attend the hearings "to observe the tenor of what we feel to be in the truest sense 'un-American activities.' "

Then, the real action began. As the hearing opened on May 12, a rally of some 1,000 people was held in Union Square called by the Berkeley Student Committee for Civil Liberties. There students were agitated by adult speakers, and thence marched to the city hall where student picketing was already going on.

ENTER THE AGITATORS

About 200 people, mostly students, crowded outside the hearing chamber. They were denied entrance to the hearing. Later they began chanting "Open the doors." According to National Guardian, Archie Brown, a longshoreman, demanded that the group be allowed into the hearing room. He and a few others were removed from the premises.

Tension grew the following day when 200 to 250 demonstrators tried to push into the hearing room shouting, "Let us in." Fire hoses were turned on them and they retreated down the stairs where they sat and sang, "We will not be moved," until they were ejected from city hall.

On May 14 San Francisco Police Chief Thomas Cahill reported that the riot, as he called it, was caused by professional agitators. Police Inspector Michael McGuire identified two agitators as Archie Brown, a longshoreman, and Merrill Brodsky, an unemployed tile setter. On May 17 San Francisco Mayor George Christopher estimated that the riot cost taxpayers an estimated $250,000.

Significantly, very few students were involved in the violent stage of the demonstrations, and these evidently were egged on by professional agitators. The real intent of the demonstration was disclosed by National Guardian as an attempt to "drive a spike in the committee's coffin" by curtailing the investigations of the House Committee on Un-American Activities, or even to close it down altogether.

ONLY THE REDS CAN BENEFIT

Without assigning motives either to anyone involved in the demonstrations or to those reporting the riots in a favorable light, it can be deduced that the only people directly benefiting from any curtailment of the work of the House Committee on Un-American Activities would be the Communists who are being investigated.

A question this student riot in San Francisco might well raise is how well are American students equipped to comprehend appeals to join in actions which will benefit the plans of the Communist Party. Herbert Philbrick testified that "the Communists know that our young people lack training and lack education concerning communism. * * * Hence, they know that young people are vulnerable to their attacks.

"In other words, the Communists know that, if they can weaken or if they can destroy the loyalty of our young people in our country and all that it stands for, they will be a long way toward eventual victory over the United States and the free world."

Student outbreaks in the United States and around the world pose a challenge to educators and to parents who want to preserve and strengthen a world in which men and women can enjoy individual political, economic, and religious freedom.

MUTUAL SECURITY APPROPRIATIONS BILL FOR 1961

Mr. CURTIN. Mr. Speaker, I ask unanimous consent that the gentleman from New York [Mr. BARRY] may extend his remarks at this point in the RECORD and may include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. BARRY. Mr. Speaker, we have before us a seriously curtailed Mutual

Security Appropriations bill for 1961. Once again we are witnessing a sort of numbers game, a blind playing with figures which is indeed shocking. At this moment when the Soviet Union has once again stepped up a hard overt anti-Western campaign across the world from Cuba to Japan where they have been able to effectively prevent the U.S. President from paying a visit, even against the wishes of the Japanese Government, once again we find people suggesting that our enormously important mutual security program should be reduced.

I want to commend those members of the Appropriations Committee who realistically faced up to our international needs and signed the minority report on this bill. This minority report sets forth quite clearly the serious consequences of the drastic cuts in the military assistance and defense support programs. When the President's advisors, the men most intimately connected with and knowledgeable about these programs, decided that $2 billion was needed for military assistance, then a cut of $400 million is a very serious matter. In this hour of the cold war, it is difficult to comprehend just what penny wisdom and pound foolishness can prompt such reasoning.

The same thing can be said of reducing the Development Loan Fund appropriation to $550 million. With complete disregard of reality, I am amazed to read in the committee report that some $298 million of already committed, but still unspent DLF funds are available for 1961 expenditure. Can the Members who assess the value of our foreign-aid program be unaware of the administrative procedures of committing funds prior to their final obligation? I find difficulty in believing so, but what other explanation can there be for such reasoning as one reads in the committee report on H.R. 12619? Sound and careful management necessitate long leadtimes making absolutely necessary sizable already committed but not yet finally obligated funds. These facts are apparently overlooked or ignored by those who may unwittingly support a watered-down mutual security bill that carries with it a substantial reduction in Development Loan funds.

The Development Loan Fund is one of the soundest of our programs. I made a study of it around the Mediterranean last year. I came back impressed with the encouraging fact that gradually our aid program is more and more taking the form of loans. Each year less is required to be just given away with no expectation of repayment.

In Israel, a country of 2 million, a strong point in the turbulent Middle East, our first outright gifts of funds are being supplanted by loans, all repayments of which have to date been made promptly when due. Furthermore, the Israelis are now sending technical aid to other underdeveloped countries. Our moneys have helped in research which may lead to important findings in the prevention of cancer among other things.

In Spain, our loans to establish irrigation projects are increasing agricultural production by 10 percent.

In Turkey, with 26 million people and an army of 500,000 ready to die if need be to prevent the spread of Communist rule to the Mediterranean, a proposed $150 million steel mill has been financed in part by the Development Loan Fund. A new $80 million railroad binding Turkey to Iran, another ally, will do much to increase their balance of payments of foreign exchange through steel exports and to develop the lumber industry of the hinterland and increase trade.

In barren Greece, I saw the proposed fertilizer plant to make them an exporter of foodstuffs and the proposed hydroelectric powerplant to develop the bauxite deposits into an aluminum industry. We have given economic hope to these valiant fighters for freedom in their struggle to survive in the competitive free world.

Our total nonmilitary foreign aid program is less than three-fourths of 1 percent of our total gross national product. The aid is only a fraction of what it would cost to buy the kind of security we were getting. This aid program represents the cheapest form of freedom insurance our tax dollar could buy.

We cannot abdicate our leadership of the world to the U.S.S.R. There is no question but that as new nations are born in Africa, as revolutionary new regimes seize power in Latin America, as the struggle goes on to balance a vast population increase with increased economic productivity in Asia, the United States is witnessing an intensification of the struggle with Communist dictatorship around the world. Curtailing of foreign aid programs at this time will only aid the Soviet Union. As colonial powers withdraw, Russia is advancing her so-called preclusive development program, moving in rapidly to fill the void and take over these weak new nations who must have help to survive. "If we do not, the Russians will," is a phrase scoffed at by some, repeated so often that it has almost become a cliche. I say it should be rephrased "Where we have not the Russians have." It is not idle speculation. It has and is happening. Witness Egypt. We wouldn't build the Aswan high dam and so Nasser has turned to Russia. Today, at this moment, the Russians are building the greatest project for Egypt since the Pyramids.

When all the colonial areas in Africa gain their independence, we will have at least 25 new nations, all with equal votes in the U.N. Their combined vote will outweigh the United States and its present allies. Private investment abroad is inadequate to the capital needs of these newly emerging nations. The United States would be risking her international leadership by reducing her unilateral foreign aid at a time when Russia is expanding hers in these areas.

Mr. Speaker, unless the United States is to abdicate leadership in many areas of the world, we must support the carefully thought out requests of the President. Politically inspired foreign aid cuts are not economy, they are a dangerous withdrawal in a battle being fought across the world for the survival of our way of life.

TECHNICAL AMENDMENTS TO THE INTERNAL REVENUE CODE

Mr. CURTIN. Mr. Speaker, I ask unanimous consent that the gentleman from Wisconsin [Mr. BYRNES] may extend his remarks at this point in the RECORD and may include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. BYRNES of Wisconsin. Mr. Speaker, I have today introduced legislation making certain technical amendments to the Internal Revenue Code. In explanation of the bill and the amendments I include as part of my remarks a letter from Jay W. Glasmann, assistant to the Secretary of the Treasury.

The letter follows:

OFFICE OF THE SECRETARY OF THE TREASURY,
Washington, June 16, 1960.

Hon. JOHN W. BYRNES,
House of Representatives,
Old House Office Building,
Washington, D.C.

DEAR MR. BYRNES: In a recent conversation you inquired as to the status of the Technical Amendments Act of 1960, H.R. 9625 and H.R. 9626. As you know, these two bills which were introduced on January 14, 1960, would amend certain of the income and administrative provisions of the Internal Revenue Code of 1954.

This legislation was introduced at the request of the Treasury Department in order that it might be made available to the general public for their study and comment. Since that time we have received numerous comments and suggestions which have been most helpful to us in evaluating the merits of the original proposals.

In brief, certain of the proposals received widespread approval as being either necessary or desirable additions to our tax laws. Other proposals proved more controversial in that there was some difference of opinion as to their merits.

It was your hope that the provisions which had found general acceptance might be considered this year by the Congress. Moreover, you indicated your desire to sponsor a bill containing these provisions. Accordingly, I am submitting a list of seven provisions which have found general acceptance. In my opinion, these proposals will correct certain income tax inequities and hardships as well as remove certain impediments in the orderly and efficient operation and administration of the internal revenue system.

A brief discussion of each of these provisions follows:

1. Definition of a dependent: This provision would correct an unintended defect in the Internal Revenue Code of 1954 by restoring dependency exemptions for nationals of American Samoa and Swains Island (primarily children of U.S. naval personnel, numbering around 100).

2. Obligation of the United States owned by a foreign central bank of issue: This amendment provides, in the case of foreign central banks of issue (quasi-governmental institutions), for tax exemption of interest on U.S. bonds, as with interest on bank deposits and banker's acceptances. Such interest is now exempt if the bank is an integral part of the foreign government. The exemption will not apply to interest on bonds used in connection with any commercial functions.

3. Election of certain partnerships and proprietors as to taxable status: This provision (1) permits a partnership which has

elected to be taxed as a corporation to apply the tax-free reorganization provisions if it actually becomes a corporation; and (2) requires that the election to be taxed as a corporation be made in the last month of the preceding year or the first month of the current year for which it is to be so taxed.

4. Declaration of estimated income tax by individuals: This provision is intended to eliminate the filing of 1.7 million nontaxable declarations of estimated tax by (1) increasing the "other income" limit from $100 to $200; and (2) providing that no declaration need be filed where the estimated tax is less than $40. Also, to simplify filing requirements, the gross income test of $400 plus $600 times the number of exemptions is eliminated.

5. Place for filing tax returns: This provision would require individuals living abroad and other taxpayers (including corporations) claiming the benefits of foreign income provisions to file their returns at the office designated by the Secretary rather than in the district where they claim legal residence or place of business.

6. Disclosure of information as to persons filing income tax returns: This provision eliminates the requirement that district directors make available to the public lists of all persons filing income tax returns, and substitutes the requirement that the district directors merely state whether or not a specific person has filed a return.

7. Criminal penalty for claiming a false or fraudulent deduction for exemption: This amendment provides that claiming a false or fraudulent deduction for a dependent shall be treated as a misdemeanor rather than a felony. It also repeals section 7207 which the Justice Department has found to be an impediment rather than an aid in criminal prosecutions.

Sincerely yours,

JAY W. GLASMANN,
Assistant to the Secretary.

WHOSE SURPLUS IS THIS? NOT THE TAXPAYERS

Mr. CURTIN. Mr. Speaker, I ask unanimous consent that the gentleman from New York [Mr. RIEHLMAN] may extend his remarks at this point in the RECORD, and may include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. RIEHLMAN. Mr. Speaker, the Congress by this time should be very much aware of the growing public dislike for the obsolete and costly farm programs under which we have operated for more than a generation.

Farmers are frequently blamed for the wasteful programs now applied to a minority group in American agriculture. But the fact remains that four-fifths of agriculture is free of Government controls and the programs that apply to the remaining one-fith were enacted right here in the Congress years ago.

Taxpayers, including farmers, are getting tired of price fixing which has resulted in depressed prices for some commodities and production controls that never have worked.

This view is reflected by a recent editorial in the Syracuse (N.Y.) Herald-Journal which I now submit for the RECORD.

WHOSE SURPLUS IS THIS? NOT THE TAXPAYERS

There's gravy in wheat but not the kind you spread over pork chops.

Last year, 96 factory-style farms collected more than $50,000 each in cash loans on their wheat.

A corporation in Montana was paid $123,000. A firm in Idaho collected $145,000. Another in Oregon received $146,000.

Secretary of Agriculture Benson has recently taken steps to put the 1961 program into operation.

He is required, by law, to do this by May 15.

This means, in turn, a guarantee that the 1959 abuses will be repeated.

No wonder such wide public distrust of farm support programs has developed.

The administration has appealed to Congress for a new approach because present programs, designed to control surpluses, don't.

So far the answer has been in the negative. Thus, the application of present marketing quotas and establishment of support prices under the old laws.

Congressional inaction is laid to election year fear of the farm bloc.

What isn't considered is election year reaction by the taxpaying bloc.

POLITICAL EXPRESSION BY VIOLENCE

Mr. CURTIN. Mr. Speaker, I ask unanimous consent that the gentleman from California [Mr. HIESTAND] may extend his remarks at this point in the RECORD and may include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. HIESTAND. Mr. Speaker, I am aghast that some of our most respected editorial writers in the Washington press this morning are sounding notes reminiscent of the wailing first practice of a schoolboy band. They cry "defeat." Why?

Seizing upon Japan's tragic crisis, there emanates from our local press a most discordant dirge—dolefully bemoaning our defeat—implying that we have been drummed-out from our seat of prestige and power in the councils of the world.

Come, come gentlemen—have ye so little faith and such small courage to peer more carefully through the smoke and mist being blown up by our enemies? Are not the trumpets in Tokyo the same trumpets which have sounded at Montevideo, Ankara, and Havana? The baton twirlers prance to the same tune. The paid students obviously chant the same fanatic anthem. But I am surprised that such experienced critics are now listening with only one ear. Under such circumstances, it is most difficult to determine the direction from which the sound comes—and the direction it is going.

The pitch pipe was sounded at the summit. The prelude was conducted from Peiping. We are hearing only the second stanza—its crescendo is aimed at drowning out the voice of democracy in Japan. The President's visit is but a part of our side of the picture. Japan is an important part of our peace perimeter. This is the significant issue today. Decisions affecting the world for a decade or more are being made in Japan—deciding Japan's position in the world of free nations. These decisions should be made in Japan's own way.

Political expression by violence has been the practice in the Orient since the days of Genghis Kahn. Why should we expect radical changes overnight? The course of these events have shown that it would be vastly imprudent for us to inject ourselves into this aspect of their affairs—this was not the purpose of the President's visit. Thus, while Kishi's decision to cancel the President's visit to Japan might be called a personal disappointment—it is far from being a defeat.

The Kremlin and Peiping just as vigorously are seeking to affect our own political scene. But, the world has long respected the U.S. position abhorring blackmail and violence as political tools.

Are you now suggesting, honored gentlemen of Washington's press, that we renounce this respected position in the interest of partisanship in domestic politics? Shall we fight insults with invectives? Is not "discretion the better part of valor"? It has been said with great justification that "fools rush in where angels fear to tread."

RESOLUTIONS OF CALUMET COUNTY BOARD OF SUPERVISORS

Mr. CURTIN. Mr. Speaker, I ask unanimous consent that the gentleman from Wisconsin [Mr. VAN PELT] may extend his remarks at this point in the RECORD and may include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. VAN PELT. Mr. Speaker, I extend my remarks at this point in the body of the RECORD and include two resolutions adopted by the Calumet County Board of Supervisors.

I commend these county officers for the sound position they adopted in each resolution.

RESOLUTION 3

Resolution petitioning the Congress of the United States to give favorable consideration to legislation providing benefits for veterans of World War I and for other purposes

Whereas many hundreds of thousands of our Nation's finest citizens served the cause of democracy during the period of World War I; and

Whereas a large number of these veterans have now reached the age and circumstances in which they are no longer self-supporting, as well as suffering illnesses and infirmities aggravated by this honorable service to their country; and

Whereas through no fault of their own, they have largely become a class of forgotten men, many of whom are close to the grave: Now, therefore, be it

Resolved by the Board of Supervisors of Calumet County, Wis., That this body recognizes the predicament of these veterans of World War I, and petitions the Congress of the United States to give favorable consideration to legislation providing benefits to the aged, ill, and disabled veterans of this Great War in the form of pensions or any other means which will provide relief so vitally needed; be it further

Resolved, That a copy of this resolution be forwarded to the President of the United States, to the Director of the Veterans' Administration, to the Director of the U.S. Bureau of the Budget, to the chairman of

the House Committee on Veterans' Affairs, and to each member of the Wisconsin delegation in the Congress.

Dated this 14th day of June 1960.

Passed and adopted by the Calumet County Board of Supervisors on June 14, 1960.

ROLAND E. MILLER,
County Clerk.

Resolution pertaining to Federal aid to aged persons

Whereas the Congress of the U.S. Government is now considering the adoption of a program subsidizing medical care for the aged; and

Whereas such various plans as now formulated do not carry proper economical methods of financing and will only lead to additional tax burden to all taxpayers; and

Whereas Calumet County has always provided sufficient medical care to its aged persons and feels that it is the responsibility of each community to provide such care to its aged people; and

Whereas any Federal program providing such care to aged people would entail much greater administrative costs and only lead to the building of another Federal bureaucracy at great expense to the taxpayers: Now, therefore, be it

Resolved by the Calumet County Board of Supervisors in meeting duly assembled this 14th day of June, A.D., 1960, That it goes on record against any form of Federal subsidy for medical care for aged people and openly announces that it is the intent of Calumet County to provide such medical needs to its aged people; be it further

Resolved, That copies of this resolution be sent to the Wisconsin Senators, ALEXANDER WILEY and WILLIAM PROXMIRE, and to the Congressman of the Sixth District, WILLIAM K. VAN PELT.

Passed and adopted by the Calumet County Board of Supervisors on June 14, 1960.

ROLAND E. MILLER,
County Clerk, Calumet County.

EIGHTEEN-DAY BOYCOTT ON JAPANESE IMPORTS

Mr. CURTIN. Mr. Speaker, I ask unanimous consent that the gentleman from California [Mr. HOSMER] may extend his remarks at this point in the RECORD and may include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. HOSMER. Mr. Speaker, the hostile, anti-American attitude expressed by Communist-agitated Japanese mobs is an affront not only to President Eisenhower, but to all Americans.

Despite the atrocities in the Pacific during World War II, despite the killed and wounded-in-action lists issued daily from the infamy at Pearl Harbor to the war's very end, in victory we extended the hand of brotherhood. Americans forgave and contributed much of our wealth and effort to rebuilding Japan.

The American people and the U.S. Government expressed to Japan and its people a compassion unparalleled in history. The reward of hate and violence we have received during the past few days is a bitter thing.

Similar affronts have occurred from elsewhere, such as Cuba under Castro, under circumstances where individual Americans were powerless to express effectively their disapproval. But today's situation is one in which individual Americans have a unique opportunity personally to protest in a compelling manner.

That is by temporarily refusing to purchase any Japanese imports.

I emphasize the word "temporarily" because as a people and as a nation we are not anti-Japanese, nor have we cause to be. We recognize it is a manipulated minority in Japan responsible for the disorder. We recognize the vast majority of Japanese are friendly to the United States and regret the course of events as much as we do. Yet, that majority has been unable to compel the minority of extremists to cease disturbing the relationships between our nations and affronting our leaders, our Government and our people.

We Americans, on the other hand, have it within our power to express our rightful indignation. We have an opportunity to advise all nations that as a people we do not receive insults and indignities without affront. In so doing we have the opportunity to dramatize our strong basic moral fiber and our determination and ability to resist lawlessness and disorder.

For myself, I have determined that from today until midnight on the 4th of July I shall make no purchase of any article made in Japan or fabricated from an item imported from Japan.

I hope my countrymen see fit to join me in this 18-day boycott.

I take this course regretting its necessity and with the emphatic expression that it is not to be construed in derogation of the vast majority of the Japanese people who are as dedicated as we are to good relationships between us.

However, as between the alternatives of submitting to these indignities without protest or protesting them by the means available to us as individuals, I believe our honorable choice is clear.

PAUL BROWN—GENTLEMAN

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the gentleman from New York [Mr. MULTER] may extend his remarks at this point in the RECORD and may include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. MULTER. Mr. Speaker, earlier this week the members and staff of the House Banking and Currency Committee gathered together to pay tribute to our very distinguished colleague and able legislator, the gentleman from Georgia, Mr. PAUL BROWN. Those who know him, heard with regret the announcement that he would retire at the end of this session.

All in attendance, as well as the few who were unavoidably absent, eloquently expressed their respect, their admiration, yes, their affection, for PAUL.

While all of us want him to do the things he wants to do, and wish him and his family long life, good health, and the utmost of happiness, it saddens us to know that he will not be with us in the next session of Congress.

For 14 terms his integrity, his knowledge, his competence, all coupled with his genial personality, have been a leveling influence in bringing about the enactment of legislation in the best interests of our country. He served his people and his Nation long and well. He was always willing to compromise on form to advance principle but he never compromised on principle.

It is unfortunate that we did not take a stenographic report of the nice things that were said about PAUL, led by the remarks of our distinguished chairman, the gentleman from Kentucky, Mr. BRENT SPENCE. I am sure that before this session ends he and our other colleagues will have an opportunity to express themselves to the same effect on the floor of the House.

In the meantime, however, I take this time to call attention to a part of the beautiful remarks made about PAUL BROWN by our distinguished colleague from Alabama, Mr. ALBERT RAINS. During the course of his remarks he read a poem which he had written. With his permission, I give it to you as follows:

SONG OF THE SAVANNAH

(With apologies to the great Georgia poet, Sidney Lanier, and his famous verse "Song of the Chattahoochee.")

Near the hills of Habersham
Close to the valleys of Hall
For one score years and seven
He's been our colleague PAUL.
And he is one among us
Who's answered every roll,
Who knows by intuition
When the bells will toll.
In his first race for Congress
Back in 33
PAUL beat nine opponents
And then he was free—
Until 2 years ago
Down on the Georgia plain
A lady ran for Congress
And PAUL had a campaign.

To the BROWN record Georgians pointed with pride
And the voters got the message distinct
For when the polls had all closed down
The lady didn't have one precinct!

Now one would suppose, in speculation,
That Southeast Power Administration
Would be located in Atlanta
But headquarters are at Elberton
Close to the Savannah
And Elberton happens to be hometown
Of the gentleman from Georgia, Mr. BROWN.

There is one thing in his career
For which all Crackers hold him dear
And sing a loud and long hosanna
To PAUL—Father of the Savannah
Since Clark's Hill Dam is finished
And Hartwell has a spill
Because our colleague here
Always kept his shoulder to the wheel.

A friend of the farmers
Whom the veterans renown
The Independent Bankers call him
Sweet Georgia BROWN.

Now a great romance is ending
We knew it would one day
Mrs. Brown is taking PAUL
Away from Fannie Mae.

Away from Commodity Credit
Away from Soil Conservation
Away from FDIC
And from Rural Electrification.

Back to the Georgia Bull Dogs and back to Augusta
Where PAUL can while his time away
Watching Eisenhower at play.

As we part with sorrow
I doubt there will be a morrow
When we can view with real contentment
A committee bill without a Brown amendment.

Our dear friend will be far, far from the maddening cry
Rocking on his lawn as the Savannah rolls by
Close to the hills of Habersham
Near to the valleys of Hall.

SIGHTSEEING SERVICE AND MASS TRANSPORTATION IN THE DISTRICT OF COLUMBIA

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the gentleman from New York [Mr. MULTER] may extend his remarks at this point in the RECORD and may include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. MULTER. Mr. Speaker, on Wednesday afternoon the House, in the Committee of the Whole, started the consideration of H.R. 4815, a bill entitled, I should say misentitled: "To insure effective regulation of D.C. Transit System, Inc., and fair and equal competition between D.C. Transit System, Inc., and its competitors."

Further consideration and action on the bill will no doubt come before the House very shortly.

I earnestly urge all those Members who did not have an opportunity to hear the debate to read the same as it appears in the RECORD of June 15, 1960, which begins at page 12731 and ends at page 12737.

My own remarks appear on page 12734.

I can recall no other bill of an allegedly general nature which ever came before the Congress that sought to pick out a single company by name and regulate that company, ignoring all other companies in a similar position. The purpose of the bill as expressed at the opening of the hearings before the Interstate and Foreign Commerce Committee is to prevent the D.C. Transit System, Inc., from engaging in the sightseeing business.

Its right to engage in that business was granted to it as a part of the franchise the Congress gave to that company as a part of its operation of a mass transportation system for the District of Columbia.

During the course of the debate it was urged, in opposition to the bill, that all companies engaged in mass transportation, including the predecessor of D.C. Transit, engaged in sightseeing service as an incident to their business. That statement of fact was disputed by the sponsors of the bill, one of whom said that D.C. Transit System's predecessor had only engaged in the sightseeing business to the extent of about $40,000 a year—page 12732—and another said that that business was "a matter of sufferance" and that now under the specific grant in the present franchise D.C. Transit System had become a strong competitor, particularly of Gray Line which is the principal advocate of this bill.

I have researched the matter and I desire to call to the attention of the House some interesting facts.

At page 255 of the hearings before the Interstate and Foreign Commerce Committee it is specifically stated that prior to D.C. Transit System's obtaining its franchise its predecessor had done "about $250,000 worth of business, which was about 1 percent of the total business done by the transit business." The records of the Public Utilities Commission show that in the 3 years prior to D.C. Transit System's obtaining its franchise, its predecessor company had done sightseeing business of from $240,000 to $274,000 a year.

In support of the bill the charge was also made that no other mass transportation companies engage in the sightseeing business. This is directly contrary to the fact.

Before reporting this bill the Interstate and Foreign Commerce Committee asked the Public Utilities Commission to examine into the entire question and report its findings to the committee. The Public Utilities Commission did that and its report is dated January 15, 1960. It is a part of the records of the committee and is open to the examination and inspection of every Member of Congress.

In that report the Commission found that D.C. Transit enjoyed no advantage over its competitors, it received no subsidy, and that its predecessor had engaged in the sightseeing business over a long period of years.

More important, it found that the sightseeing service was traditionally related to mass transit service throughout the country and that in the Washington metropolitan area, four mass transit companies engaged in sightseeing operations and that they could not remain in the transit business if they were subjected to legislation similar to H.R. 4815.

On page 10 of its report, the Commission said:

> A careful review of the practices in other comparable cities indicates that most of the local transportation companies conduct both mass transit operations and charter and sightseeing operations.

A Senate subcommittee of its Committee on the District of Columbia sent out questionnaires to regulatory agencies in metropolitan areas asking whether or not they limited the sightseeing operations of mass transportation companies. Nine of twelve answers were "No." Two of them said they were limited to the originating territory.

Another question was whether the sightseeing operations were carried on independently of the mass transportation operations. Eleven of the twelve answered "No" and the 12th said it had no jurisdiction in the matter.

The Public Utilities Commission found that the employment of assets and personnel in sightseeing services by D.C. Transit was in the public interest—page 11.

The Commission concluded that this bill "is not an appropriate method to insure fair and equal competition between D.C. Transit and its charter and sightseeing competitors"—page 13.

In his opening remarks, the distinguished chairman of the Interstate and Foreign Commerce Committee said—page 12732:

> This is a fight primarily and principally between the D.C. Transit Co. sightseeing and charter operation and the Gray Lines sightseeing and charter operation.

That is the fact.

As I pointed out in my remarks the other day, the Gray Line is the real big operator and monopolist in the sightseeing business in the District of Columbia.

Its sightseeing business is about $1,300,000 a year as against that of its nearest competitor, the D.C. Transit System, with less than $500,000 a year. A necessary incident of the sightseeing business is the ability to supply hotel accommodations. Gray Line controls, under exclusive contracts, more than 12,000 hotel rooms in the District of Columbia. Its nearest competitor controls about 1,500 rooms.

But let us see how badly Gray Line has been hurt, if at all, by D.C. Transit competition. The records on file in the office of the Public Utilities Commission show that in 1955, before D.C. Transit came into Washington, Gray Line had a passenger revenue of $914,640 and showed a net loss of $34,182 for that year. In 1959, after 3 years of competition with D.C. Transit, Gray Line showed passenger revenues of $994,819 with a net profit of $42,952. The difference from loss to earnings during the 3-year period, to the benefit and advantage of Gray Line, is approximately $77,000.

In anticipation of the debate on this bill a survey was made of the sightseeing buses in the Capitol Hill area during the off hours—that is, the hours outside peak mass transit hours—during the week of June 8 to June 15, 1960. There were found, by actual physical count in that area, 267 charter and sightseeing buses; 46 belonged to the Gray Line, 23 to D.C. Transit, and the balance of 198 to other companies in lesser numbers.

This is indeed bad legislation—unfair, discriminatory, and unconstitutional.

I hope our colleagues will reject it.

ADJOURNMENT OVER UNTIL MONDAY

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet on Monday next.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

POSTPONEMENT OF ROLLCALL VOTES ON MONDAY AND TUESDAY OF NEXT WEEK

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that on Monday and Tuesday next any record votes, rollcalls on bills or on motions to recommit, may be put over until Wednesday next.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

Mr. GROSS. Mr. Speaker, reserving the right to object, as I understand, there are 20 bills to come up under suspension on Monday, or approximately that many, is that correct?

Mr. ALBERT. The gentleman is correct. Some of those will probably be passed on the Consent Calendar.

Mr. GROSS. I do not have the slightest idea about any of these bills that are on the suspension calendar for Monday. Having no knowledge of what the bills contain, I am constrained to object to putting the votes over from Monday until Wednesday. I am constrained to object, Mr. Speaker, and I do object.

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that any rollcall votes on motions to recommit or on the passage of bills or amendments thereto on Tuesday next may be put over until Wednesday next.

Mr. GROSS. Reserving the right to object, Mr. Speaker, do I correctly understand that there are two bills coming up on Tuesday, and only two bills? One is the farm bill and one is the so-called zinc bill?

Mr. ALBERT. That will be taken up after the disposition of the farm bill.

Mr. GROSS. There will be just those two bills?

Mr. ALBERT. That is right.

Mr. GROSS. I withdraw my reservation of objection, Mr. Speaker.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. RHODES of Pennsylvania, for 10 minutes, today.

Mr. BRAY, for 5 minutes, today.

Mr. NELSEN (at the request of Mr. CURTIN), for 1 hour, on Monday, June 27.

Mr. MICHEL (at the request of Mr. CURTIN), for 30 minutes, on Tuesday, June 21.

Mr. LINDSAY (at the request of Mr. CURTIN), for 1 hour, on Thursday, June 23.

Mr. STRATTON (at the request of Mr. ALBERT), for 1 hour, on Thursday next.

Mr. HEMPHILL (at the request of Mr. ALBERT), for 1 hour, on Monday, June 27.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. DULSKI.

Mr. HECHLER and include extraneous matter.

Mr. MEADER, to revise and extend the remarks he made in the Committee of the Whole on the mutual security bill and include an article by Mr. Vance Bland in the General Electric Defense Quarterly, and also an exchange of correspondence between himself and a member of the staff of the White House.

(At the request of Mr. CURTIN, and to include extraneous matter, the following:)

Mr. VAN ZANDT.

Mr. OSMERS and to include a chart.

(At the request of Mr. ALBERT, and to include extraneous matter, the following:)

Mr. FLOOD.

Mr. HARRISON and to include tables.

Mr. TOLL.

Mr. ROUSH.

Mr. EDMONDSON.

Mr. THORNBERRY.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 2929. An act to amend the National Defense Education Act of 1958 in order to repeal certain provisions requiring affidavits of belief; to the Committee on Education and Labor.

ENROLLED BILL SIGNED

Mr. BURLESON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 9883. An act to adjust the rate of basic compensation of certain officers and employees of the Federal Government, and for other purposes.

SENATE ENROLLED JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled joint resolution of the Senate of the following title:

S.J. Res. 39. Joint resolution proposing an amendment to the Constitution of the United States granting representation in the electoral college to the District of Columbia.

ADJOURNMENT

Mr. ALBERT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 16 minutes p.m.), under its previous order, the House adjourned until Monday, June 20, 1960, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2272. A letter from the Chairman, Foreign Claims Settlement Commission of the United States, transmitting the report prior to restoration of balances for the period as of June 15, 1960, pursuant to Public Law 798, 84th Congress; to the Committee on Government Operations.

2273. A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation entitled "A bill to repeal the act of October 22, 1919 (41 Stat. 293; 43 U.S.C., secs. 351–355, 357–360), and the act of September 22, 1922 (c. 400, 42 Stat. 1012; 43 U.S.C., sec. 356), and to require that entrymen of lands in Nevada under the Desert Land Act be resident citizens of Nevada"; to the Committee on Interior and Insular Affairs.

2274. A letter from the Commissioner, Immigration and Naturalization Service, U.S. Department of Justice, transmitting a copy of the order granting the application for permanent residence filed by Allen Shih-Chun Hsiao, A7957556, pursuant to the Refugee Relief Act of 1953; to the Committee on the Judiciary.

2275. A letter from the Commissioner, Immigration and Naturalization Service, U.S. Department of Justice, transmitting copies of orders suspending deportation as well as a list of the persons involved, pursuant to the Immigration and Nationality Act of 1952; to the Committee on the Judiciary.

2276. A letter from the Commissioner, Immigration and Naturalization Service, U.S. Department of Justice, transmitting copies of orders entered in cases where the authority contained in section 212(d)(3) was exercised in behalf of such aliens, pursuant to the Immigration and Nationality Act; to the Committee on the Judiciary.

2277. A letter from the Acting Secretary of State, transmitting the eighth report on the extent and disposition of U.S. contributions to international organizations for the fiscal year 1959, pursuant to section 2 of Public Law 806, 81st Congress (H. Doc. No. 418); to the Committee on Foreign Affairs and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. FALLON: Committee on Public Works. H.R. 11240. A bill to amend title 23, United States Code, to provide for participation of Federal-aid highway funds in the construction of approach roads to ferry facilities on the Federal-aid system; without amendment (Rept. No. 1895). Referred to the Committee of the Whole House on the State of the Union.

Mr. McMILLAN: Committee on the District of Columbia. H.R. 8697. A bill to amend the District of Columbia Redevelopment Act of 1945 with respect to the requirements for adoption of a redevelopment plan for a project area; with amendment (Rept. No. 1911). Referred to the Committee of the Whole House on the State of the Union.

Mr. LANE: Committee on the Judiciary. H.R. 11136. A bill for the relief of Princess Anne County School Board, Virginia; with amendment (Rept. No. 1912). Referred to the Committee of the Whole House on the State of the Union.

Mr. WILLIAMS: Committee on Interstate and Foreign Commerce. S. 1508. An act to provide for economic regulation of the Alaska Railroad under the Interstate Commerce Act, and for other purposes; without amendment (Rept. No. 1913). Referred to the Committee of the Whole House on the State of the Union.

Mr. WILLIAMS: Committee on Interstate and Foreign Commerce. S. 1509. An act to amend the Interstate Commerce Act, as amended, to provide "grandfather" rights for certain motor carriers and freight forwarders operating in interstate or foreign commerce within Alaska and between Alaska and the other States of the United States, and for certain water carriers operating within Alaska, and for other purposes; with amendment (Rept. No. 1914). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROBERTS: Committee on Interstate and Foreign Commerce. House Joint Reso-

lution 649. Joint resolution relating to the authority of the President, the Secretary of Health, Education, and Welfare, and the Surgeon General of the Public Health Service to provide for international cooperation in health research and research training, and for other purposes; with amendment (Rept. No. 1915). Referred to the Committee of the Whole House on the State of the Union.

Mr. DAVIS of Georgia: Committee on Post Office and Civil Service. S. 2857. An act to amend the Civil Service Retirement Act so as to provide for refunds of contributions in the case of annuitants whose length of service exceeds the amount necessary to provide the maximum annuity allowable under such act; with amendment (Rept. No. 1916). Referred to the Committee of the Whole House on the State of the Union.

Mr. HARRIS: Committee on Interstate and Foreign Commerce. S. 1965. An act to make uniform provisions of law with respect to the terms of office of the members of certain regulatory agencies; with amendment (Rept. No. 1917). Referred to the Committee of the Whole House on the State of the Union.

Mr. THORNBERRY: Committee on Rules. House Resolution 564. Resolution for consideration of H.R. 12261, a bill to amend the Agricultural Adjustment Act of 1938, as amended, and the Agricultural Act of 1949, as amended, with respect to market adjustment and price support programs for wheat and feed grains, to provide a high-protein food distribution program, and for other purposes; without amendment (Rept. No. 1918). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. LANE: Committee on the Judiciary. S. 285. An act for the relief of John A. Skenandore; without amendment (Rept. No. 1896). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. S. 1454. An act for the relief of Keitha L. Baker; without amendment (Rept. No. 1897). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. S. 2113. An act for the relief of George K. Caldwell; without amendment (Rept. No. 1898). Referred to the Committee of the Whole House.

Mr. TOLL: Committee on the Judiciary. S. 2277. An act for the relief of the Geo. D. Emery Co.; without amendment (Rept. No. 1899). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. S. 2817. An act for the relief of Joseph R. Paquette; without amendment (Rept. No. 1900). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H.R. 7618. A bill for the relief of H. P. Lambert Co., Inc., and Southeastern Drilling Corp.; with amendment (Rept. No. 1901). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H.R. 7792. A bill for the relief of Martin A. Mastandrea; without amendment (Rept. No. 1902). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H.R. 8885. A bill for the relief of William L. Berryman; with amendment (Rept. No. 1903). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H.R. 9715. A bill for the relief of Otis Drinkard; with amendment (Rept. No. 1904). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H.R. 10152. A bill for the relief of Miss Marie E. Mark; with amendment (Rept. No. 1905). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H.R. 11420. A bill for the relief of Ferdinand Hofacker; without amendment (Rept. No. 1906). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H.R. 11562. A bill for the relief of the Maritime Museum Association of San Diego; without amendment (Rept. No. 1907). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H.R. 11791. A bill to confer jurisdiction on the U.S. Court of Claims to hear, determine, and render judgment on the claim of Paul Bernstein against the United States; with amendment (Rept. No. 1908). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H.R. 12475. A bill for the relief of Claude L. Wimberly; without amendment (Rept. No. 1909). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H.R. 12476. A bill for the relief of John H. Esterline; without amendment (Rept. No. 1910). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. THORNBERRY:

H.R. 12699. A bill to cancel a deed of trust to the United States from the predecessor in name of Gallaudet College and any evidence of indebtedness related to the same transaction, to quiet the college's title to property belonging to it, and for other purposes; to the Committee on Education and Labor.

By Mr. BROOKS of Louisiana:

H.R. 12700. A bill to amend the National Science Foundation Act of 1950 to create a Special Committee on Marine Sciences, to develop and encourage a national program for the promotion of research, surveys, and education in the marine sciences, to recommend contracts, grants, or other forms of assistance, to encourage the cooperation of agencies and evaluate the programs of marine research undertaken by agencies of the Federal Government in these scientific fields; to the Committee on Science and Astronautics.

By Mr. BYRNES of Wisconsin:

H.R. 12701. A bill to amend the Internal Revenue Code of 1954 to make certain technical revisions in the income and administrative provisions; to the Committee on Ways and Means.

H.R. 12702. A bill to amend the Internal Revenue Code of 1954 by imposing a tax upon the sale of aviation fuel, and for other purposes; to the Committee on Ways and Means.

By Mr. BOGGS:

H.R. 12703. A bill to authorize refund or credit of certain additions to the tax under the Internal Revenue Code of 1939; to the Committee on Ways and Means.

By Mr. GILBERT:

H.R. 12704. A bill to amend the Civil Service Retirement Act to authorize the retirement of employees after 30 years of service without reduction in annuity; to the Committee on Post Office and Civil Service.

By Mr. JENNINGS:

H.R. 12705. A bill to delay for 60 days in limited cases the applicability of certain provisions of law relating to humane slaughter of livestock; to the Committee on Agriculture.

By Mr. KING of Utah:

H.R. 12706. A bill to require detailed accounting by Members of the House of Representatives in the case of travel expenses, and for other purposes; to the Committee on House Administration.

By Mr. MORGAN:

H.R. 12707. A bill to require the Secretary of the Army to confine within a conduit a portion of Dunlap Creek in Brownsville, Pa.; to the Committee on Public Works.

By Mr. PERKINS:

H.R. 12708. A bill to amend the Federal Trade Commission Act to strengthen independent competitive enterprise by providing for fair competitive acts, practices, and methods of competition, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. TEAGUE of Texas:

H.R. 12709. A bill to authorize the appropriation of $200,000 for use toward the construction of a U.S.S. *Arizona* memorial; to the Committee on Armed Services.

By Mr. ASHMORE:

H.R. 12710. A bill to amend section 1732(b) of title 28, United States Code, to permit the photographic reproduction of business records held in a custodial or fiduciary and the introduction of the same in evidence; to the Committee on the Judiciary.

By Mr. ASPINALL (by request):

H.R. 12711. A bill to authorize the issuance of exchange noncompetitive oil and gas leases under certain circumstances, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. FOUNTAIN:

H.R. 12712. A bill to delay for 60 days in limited cases the applicability of certain provisions of law relating to humane slaughter of livestock; to the Committee on Agriculture.

By Mr. HOGAN:

H.R. 12713. A bill to delay for 60 days in limited cases the applicability of certain provisions of law relating to humane slaughter of livestock; to the Committee on Agriculture.

By Mr. KING of Utah:

H.R. 12714. A bill to amend the Federal Trade Commission Act to provide for the issuance of temporary cease and desist orders to prevent certain acts and practices pending completion of Federal Trade Commission proceedings; to the Committee on Interstate and Foreign Commerce.

H.R. 12715. A bill to amend the Federal Trade Commission Act to strengthen independent competitive enterprise by providing for fair competitive acts, practices, and methods of competition, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. MEADER:

H.R. 12716. A bill to provide for a study of matters pertaining to the imposition by the States of certain taxes involving sales in interstate commerce; to the Committee on Rules.

By Mr. METCALF:

H.R. 12717. A bill to provide for deduction in computing income taxable under the Internal Revenue Code of 1954 of losses sustained by public transit systems in conversion from street railways to buses; to the Committee on Ways and Means.

By Mr. CHAMBERLAIN:

H.R. 12718. A bill relating to the reporting by Members of the House of Representatives of expenditures from the contingent fund of the House of Representatives and of expenditures of counterpart funds by Members of Congress; to the Committee on House Administration.

By Mr. RHODES of Pennsylvania:

H.R. 12719. A bill to repeal the provisions of law establishing a stationery allowance for Members of the House of Representatives; to the Committee on House Administration.

By Mr. COOLEY:

H.R. 12720. A bill to amend the Agricultural Trade Development and Assistance Act of 1954; to the Committee on Agriculture.

By Mr. LINDSAY:

H.J. Res. 764. Joint resolution proposing an amendment to the Constitution of the United States relating to cases where the President is unable to discharge the powers and duties of his office; to the Committee on the Judiciary.

By Mr. ROUSH:

H. Con. Res. 702. Concurrent resolution expressing the sense of the Congress in favor of the restoration of the principle of bipartisanship in American foreign policy; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mrs. GREEN of Oregon:

H.R. 12721. A bill for the relief of William H. Chinn; to the Committee on the Judiciary.

By Mr. POWELL:

H.R. 12722. A bill authorizing the President to present a gold medal to Louis Armstrong; to the Committee on Banking and Currency.

By Mr. RILEY:

H.R. 12723. A bill for the relief of Alfonso H. Patero; to the Committee on the Judiciary.

By Mr. UDALL:

H.R. 12724. A bill for the relief of Yee Mee Hong; to the Committee on the Judiciary.

By Mr. DIGGS:

H.R. 12725. A bill for the relief of Estrellita Tongco; to the Committee on the Judiciary.

By Mr. FLYNN:

H.R. 12726. A bill for the relief of Moy Sig Mon, Moy Sue Yook, Moy Dick Mon and Moy Don Mon; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

499. By Mr. CANFIELD: Petition of 226 citizens of Passaic County, N.J., in support of S. 1046 and H.R. 4488 to increase the minimum wage level to $1.25 per hour and extend the protection of the law to nearly 8 million workers not now covered; to the Committee on Education and Labor.

500. By Mrs. ST. GEORGE: Resolution No. 10 on taxes on U.S. property, by the Board of Supervisors of the County of Delaware, N.Y.; to the Committee on Interior and Insular Affairs.

EXTENSIONS OF REMARKS

The Crisis of the "Golden Sixties"

EXTENSION OF REMARKS
OF

HON. ROBERT C. BYRD

OF WEST VIRGINIA

IN THE SENATE OF THE UNITED STATES

Friday, June 17, 1960

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that an address I delivered before the 21st general convention of the System Federation No. 41 of the Chesapeake & Ohio Railway on Wednesday, June 15, 1960, be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

THE CRISIS OF THE "GOLDEN SIXTIES

I appreciate the honor of being with you here this morning. I appreciate the opportunity, too, of being able to discuss with you some of the major issues facing America today.

You undoubtedly remember that on January 1 of this year the newspapers were full of predictions that we were entering what they called the "golden sixties"—that this decade was one of glorious promise for the people of the United States. Less than 6 months have passed. But I wonder how many Americans are finding things so golden right now. Our position in world affairs is more precarious and more dangerous than it has been since the days of Korea. Here at home the problems of unemployment, the welfare of our aged, the education of our children, and other problems equally pressing, are going unsolved.

You have a right—and a duty—to ask why this is so. The answer is that we have a Government in Washington that, in the down-to-earth phrase coined nearly five centuries ago, is following a penny wise pound foolish approach to America's problems. To save a dollar today it is sacrificing America's promise for the future. It is sacrificing our most important resource—the strength and well-being of our people.

As a Senator, and as a member of the Democratic Party, I am disturbed by this. I can assure you that I and many of my colleagues on Capitol Hill are trying hard to do something about it. As you know, constructive action has been difficult because of the ever-present threat of—and the use of—the Presidential veto.

This is a time of crisis for America, both at home and abroad. The issue is not just how to get a chicken in every pot, but how we are going to win the struggle for survival.

There can be no question, the peace issue is predominant. No sane man, regardless of party, advocates the horrors of war. But peace cannot be secured through wishful thinking.

Last December the Democratic Advisory Committee issued its own "State of the Union" message for 1960, in which it observed: "The legitimate debate is not over ends but means—the policies which will produce the conditions most likely to secure the just and lasting peace which all Americans seek. The record of the Republican administration in foreign policy reveals erratic policy switches which have sadly damaged America's strength and prestige."

"Our foreign policy," the message continued, "should be far more than slogans, speeches and reassurances. Our foreign policy is basically a matter of our national strength, our national effort and our national will and ideals of human justice."

The conduct of our foreign policy is constitutionally vested in the hands of the executive branch of Government. There is little Congress can do to forestall the blunders. We can, however, urge, investigate and otherwise endeavor to persuade the President to conduct a responsible foreign policy.

I believe the leadership of my party is to be commended for its own responsible attitude and actions on foreign policy questions. It has urged the administration not to rely only on good-will trips, summit conferences and dollars to pave the road to peace. All of these things have their place. But, singly or collectively, they are not a substitute for a well-thought-out, well-executed foreign policy.

Whether we like it or not, the state of our defenses is a basic consideration in determining our position in the world today. Soviet strides in missiles and their successes with space satellites and moon shots have convinced nearly everyone that we should take a close look into how our defense money is being spent—everyone, that is, except the administration. But the Democrats in Washington are asking some searching questions, and the answers have not always been so satisfactory. It is, in fact, because of Democratic action in Congress that our defense posture is as good as it is.

I believe with Mr. Eisenhower that God is on the side of right. But I also believe that God helps those who help themselves. We cannot afford to let our military forces deteriorate while Mr. Khrushchev gloats. We need strength to match strength.

Even on the domestic front we are lagging behind. Look at education. The experts are warning that our children are not getting an education they will some day need to lead our country in its competition with the Russians. There are not enough classrooms. Teachers are underpaid. In higher education, we shall need in the next 10 years a number of new buildings equal to the total number built in the last 200 years. If we are going to meet these needs, the Federal Government must act. Many of us in Congress have long waged a vigorous battle for appropriate legislation. Right now we are fighting, and fighting hard, to get through a bill to aid in school construction.

The administration has finally come around to sponsoring a proposal, too. But this proposal, calling for expenditures carried out over a long period of years instead of meeting costs now, would in the long run be unnecessarily expensive and would still fail to meet the need. It is another example of the penny wise pound foolish attitude which is sapping the strength of our country.

A Presidential veto may be in the offing. But short of that, I promise you we are going to have this school issue resolved before Congress adjourns. We need more and better schools for our children—and we are going to have them.

One of the most serious problems confronting this country is that of creeping unemployment. I have heard a great deal from administration spokesmen about the dangers of creeping inflation. I, for one, certainly do not minimize the problems caused by the rising cost of living. But we rarely hear a word from the administration about the problem caused by rising unemployment. According to the statisticians, 2 years have passed since the start of the recovery from the disastrous 1958 recession. But there are a lot of people around here who do not know that the recession is over, and the economists are already talking about the beginning of the next one.

The facts are blatantly clear, and no amount of hiding can minimize their impact. Unemployment is a growing problem. We have had three recessions since the end of World War II. After the first recession, unemployment dropped nationally to a 3 percent level; after the second recession unemployment remained at the 4 percent level.

And now at least 5 percent of the working people of the Nation remain unemployed.

It is little consolation for the unemployed to know that we have reached a half-billion dollar economy. Certainly this is a great achievement, but it does not make hunger and suffering any easier to bear.

All kinds of excuses have been made for the persistence of unemployment. At first it was blamed on the steel strike. When the steel strike was over, the blame was placed on the snow and the rain. Now that summer is here and the snow has melted all we hear is the expression of hope that by and by it will all be better.

Meanwhile, the economy is operating way below capacity, the average duration of unemployment continues to rise, and the number of depressed areas is increasing. We have been warned by leading economists that if our rate of economic growth is not stepped up, we face the prospect of being outstripped by the Soviet Union.

And the administration refuses to do anything. Its only preoccupation seems to be to gather a budget surplus. But I say to you that inaction is the best way to get a budget deficit.

If this were a time for niceties, I would hesitate to say this. But we cannot afford the luxury of smiling pleasantries. I must say that the present administration reminds me of the old Bourbon king: "After me the deluge." Instead of offering a positive program to meet the needs of America, the administration is satisfied with the slogan of "one-third and one." As we have been reminded, this is all that is needed in order to sustain the vetoes of the positive program that the majority party is trying to enact in the present Congress.

Take, for example, the Presidential veto stopping aid to depressed areas. To the administration this legislation, so vital to America and to my State of West Virginia, is a squandering of money. This was the excuse given in the veto message.

I find this incredible. The President can talk all day about the necessity of giving aid to underdeveloped and needy areas abroad. This will strengthen democracy, he says. Well, I say it is high time we started strengthening our own democracy here at home.

We have more than a hundred communities in the United States, some of the worst ones being in my own State, which are suffering from chronic and persistent unemployment. In some of these areas unemployment has reached depression proportions. There are no labor shortage areas anywhere within the United States where these unemployed can migrate and find jobs. Your neighbors can tell you this. The only solution, then, is to try to create additional jobs and bring them to these communities. This is what the depressed areas bill would have achieved. Its major aim was to establish credit funds at reasonable rates of interest to encourage expanding business to locate in depressed areas. The bill would have helped to improve the public facilities in these communities to make them more attractive to new industry. It would also have provided for the retraining of workers, and in some cases it would have paid workers who have exhausted unemployment insurance subsistence payments while they would be undergoing these periods of training.

This, it seems to me, is a constructive approach to some important economic problems, not a wasteful one. Nothing, in fact, could be more wasteful than losing the productivity of a good part of our working force. But the administration has spoken. And there are not enough votes to override the veto.

One major piece of legislation which we were able to get through during the last session of Congress was an amendment to the Railroad Retirement and Unemployment Insurance Acts. The most important part of this legislation was that it increased retirement and survivor benefits in general by about 10 percent. This is a measure that is of enormous importance to the country and to my State of West Virginia. In 1958–1959 a total of more than $1 billion in benefit payments was paid to people throughout the country. The amount for West Virginia was more than $22 million. Because of this legislation, the amount for the future should be even greater.

But I know, and you know, that this does not solve the problems of the railroad employee. Total employment on American railroads has dropped sharply since World War II. Only 2 years have not seen a decline. In 1956, employment on class 1 railroads averaged just over 1 million; in 1957 it dropped to 985,000; in the recession year of 1958 it dropped further to 840,000. Railway employment declined throughout 1959, and averaged just 816,000 for the year. The November 1959 railway employment figure of 783,995 was the lowest monthly figure in this century.

The Railway Labor Executives' Association has backed a number of proposals which should help to relieve the crisis. One of these is the Passenger Train Service Act of 1960, which would require the railroads, as part of their public responsibility, "to provide reasonably frequent, safe, clean, and convenient passenger service" and to make every reasonable effort to serve the public adequately in their passenger train operations. This legislation, railroad labor believes, would not prevent the elimination of unneeded passenger services, but it would protect the public from the wholesale abandonment of passenger trains even though these trains are still needed to meet our country's transportation requirements.

Other bills of importance to railroad employees are the railroad accident reports bill, the railroad track motor car safety bill, and the railroad track and bridge safety inspection bill. These bills, and others, represent the responsible way in which the railroad employees are trying to improve railroad operation.

The railroad workers, the Democratic Party, and labor in general have joined forces in trying to get through a medical insurance program for the aged. We all know that the problem of how to finance medical care is a critical—almost impossible one—for most of our 16 million citizens age 65 and over. There has been a lot of delay in meeting the issues, but the Democratic leadership in the House and Senate is working hard to resolve them.

Time is running out, and I have not yet had the opportunity to discuss a lot of issues which our Democrats in Congress have been trying to solve. Let me mention some of them briefly.

There is a crying need for a realistic urban redevelopment and public facilities program. Congress enacted excellent legislation in these areas last year, but two vetoes forced the Congress to trim down the program and settle on one which is less adequate. The antipollution bill passed by Congress was also vetoed. Thus our cities continue to decay and our rivers and streams remain polluted.

A lot of us have been asking the administration to undertake studies which would help solve some basic economic problems. Automation, one of our greatest blessings and greatest curses, has created terrible problems in many areas. I myself have strongly urged the creation of a Coal Research and Development Commission, which would have opened new vistas for the use of our important coal resources. A bill which would have done this was vetoed last year.

This Congress is not yet over. If I have painted a black picture, I join you in hoping that it will be brightened before Congress adjourns. I can assure you that I and my colleagues are doing everything we can to push through positive legislation.

What the Democratic Party has stood for during this Congress can be summarized in the famous words spoken by Franklin Delano Roosevelt, at a time when America was still fighting its way out of the throes of the great depression. You know these words, but I hope you will bear with me while I recall them now. The President was discussing the differences between the Democratic, or liberal party, and the conservatives, and he said:

"One great difference which has characterized this division has been that the liberal party—no matter what its particular name was at the time—believed in the wisdom and the efficacy of the will of the great majority of the people, as distinguished from the judgment of a small minority. * * * The other great difference between the two parties has been this: The liberal party is a party which believes that, as new conditions and problems arise beyond the power of men and women to meet as individuals, it becomes the duty of the Government itself to find new remedies with which to meet them. The liberal party insists that the Government has the definite duty to use all its power and resources to meet new social problems with new social controls—to insure to the average person the right to his own economic and political life, liberty, and to the pursuit of happiness."

Nineteen Hundred and Sixty Osmers Presidential Poll

EXTENSION OF REMARKS

OF

HON. FRANK C. OSMERS, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, June 17, 1960

Mr. OSMERS. Mr. Speaker, the results of the presidential poll, which was part of my 1960 questionnaire, have now been tabulated. More than 9,800 replies have been received to date from the 46,000 constituents to whom questionnaires were mailed on May 2.

Of those replying, 30 percent indicated they considered themselves Democrats; 37 percent Republicans; 33 percent independents. This percentage division, among Democrats, Republicans and independents follows very closely the voting patterns of the Ninth New Jersey Congressional District over the past decade.

Each constituent to whom a questionnaire was sent was asked to mark a first and second choice for President from among the seven best known prospects listed or to write in their own choice. Possible candidates who received less than 1 percent are not shown on the chart. Bridges, Dirksen, Goldwater, Halleck, Lausche and Meyner received a number of votes each but under 1 percent. Lodge, who was not listed, received 3 percent of the Republican votes as a second choice—see footnote on chart. Because of the national interest in the July nominating conventions and in the candidates, I ask unanimous consent to include the tabulated results in

percentages in the CONGRESSIONAL RECORD. Answers to the other questions in my 1960 questionnaire appear on page 11128 of the CONGRESSIONAL RECORD for May 25, 1960.

The chart follows:

	Democrat, 30 percent of total		Republican, 37 percent of total		Independent, 33 percent of total		Combined, 100 percent	
	1st choice	2d choice	1st choice	2d choice	1st choice	2d choice	1st choice	2d choice
Humphrey	1	3	0	0	3	0	1	1
Johnson	9	20	2	5	6	9	6	11
Kennedy	55	23	8	11	18	16	25	16
Nixon	3	12	71	18	46	36	44	20
Rockefeller	4	12	16	60	15	18	11	33
Stevenson	22	23	2	2	9	18	10	14
Symington	6	7	1	1	3	3	3	4
Other	0	0	0	[1] 3	0	0	0	[1] 1

[1] 3 percent of the Republicans wrote in Lodge as 2d choice.

A Bipartisan Foreign Policy

EXTENSION OF REMARKS
OF
HON. J. EDWARD ROUSH
OF INDIANA
IN THE HOUSE OF REPRESENTATIVES
Friday, June 17, 1960

Mr. ROUSH. Mr. Speaker, the past few months have seen the United States confronted with crisis after crisis in world affairs. Each crisis has mounted in severity and difficulty with the events of the past few days shocking the world.

It is the desire of every American that the United States adopt and administer a foreign policy which is the best and the strongest the combined and unified political forces of America can produce. For that reason I have been, and am, a firm believer in a bipartisan foreign policy. Today as an expression of that belief and with the hope that an expression of approval of this Congress will result in the adoption of such a policy, I have introduced a concurrent resolution expressing the sense of Congress in favor of the restoration of the principle of bipartisanship in American foreign policy.

The idea is not, of course, original with me. The idea of a bipartisan foreign policy dates from World War II in the United States. It is difficult to isolate a precise moment or source of beginning. The idea of bipartisan foreign policy support played an important role in the wartime planning of postwar foreign policy by the Roosevelt administration. There is no doubt but what the failure of the Senate to ratify the League of Nations Covenant after the First World War loomed large in the thoughts of those planning the new United Nations. It was during this time that a number of Republican leaders, notably Senators Arthur Vandenberg and Wendell Willkie, pressed upon their party a foreign policy position fundamentally in accord with that of the administration.

Bipartisanship was given its first major test in the San Francisco Conference of 1945, establishing the United Nations. Great care was taken to make the U.S. delegation representative of both parties. John Foster Dulles, closely associated with Thomas Dewey, then titular leader of the Republican Party, served as a representative of the Department of State. A bipartisan congressional delegation also participated. The apogee of bipartisan foreign policy perhaps was reached in the signing of the Japanese Peace Treaty of 1951 which was largely drafted and negotiated by John Foster Dulles appointed by President Truman.

I believe we are living in the most critical moments of world history. In the face of these crises and the external challenge which confront us our Nation must unite. Yes, "politics stop at the water's edge." These are times which demand that we stand together—demonstrating the power of our inner strength to our friends—and our enemies.

All Americans should be assured that partisan considerations are neither controlling the formulation and administration of our foreign policy nor are partisan considerations dictating the criticisms of that policy. The world should know that our great objective is the advocation of the cause of freedom and to make and preserve a just and lasting peace.

A Proposed Series of American Flag Stamps

EXTENSION OF REMARKS
OF
HON. THADDEUS J. DULSKI
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Friday, June 17, 1960

Mr. DULSKI. Mr. Speaker, yesterday I introduced a bill, based upon a suggestion made by Mr. Carl P. Reuth, editor of Linn's Weekly Stamp News, which would provide for the continued issuance of the American flag series stamps on each July 4, subsequent to the 1960 flag issue—50-star—by the Post Office Department.

Since it appears that no more States will be added within the foreseeable future, I feel that this stamp series should be continued by honoring flags used since the beginning of our Nation, such as the following: National Flag, 1777; Bennington Flag, 1777; Navy Jack, 1775—Don't Tread on Me; Cambridge Flag, 1775; Continental Flag, 1775; Bunker Hill Flag; Pine Tree Flag, 1775; Taunton Flag, 1774; Gadsen Flag, 1775; Fort Moultrie Flag.

Stamps subsequent to July 4, 1970, would be issued as determined appropriate by the Postmaster General with the advice of the Citizens' Advisory Committee.

Keynote Speech of Congressman Jim Wright, Texas State Democratic Convention, June 14, 1960

EXTENSION OF REMARKS
OF
HON. HOMER THORNBERRY
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Friday, June 17, 1960

Mr. THORNBERRY. Mr. Speaker, on Tuesday, June 14, Texas Democrats in Austin, Tex., held the most harmonious and unified convention which has been held in our State in many years. The convention selected a strong delegation of distinguished Texas Democrats who are dedicated to work for the nomination and election as President of the United States the great majority and Democratic leader of the U.S. Senate, Hon. LYNDON B. JOHNSON.

Congressman JIM WRIGHT, our colleague, delivered a splendid keynote address to the delegates assembled at our State Democratic convention. It was enthusiastically received and acclaimed as one of the finest addresses of its kind delivered at any convention.

Under leave to extend my remarks, I am including a copy of that speech:

REMARKS OF CONGRESSMAN JIM WRIGHT, KEYNOTE SPEAKER, TEXAS STATE DEMOCRATIC CONVENTION, AUSTIN, TEX., JUNE 14, 1960

One only has to attend a Democratic convention to know what Will Rogers meant when he said, "I don't belong to any organized political party: I'm a Democrat."

A Democratic convention is a spirited affair, any way you look at it.

I can just imagine what confusion such a convention as the one we shall soon have in Los Angeles with its only partially organized bedlam would produce in the mind of the comfortable and fully adjusted Republican, accustomed as he is to the idea of a convention run on the precise schedule of a television commercial, and just about as exciting, with about as much suspense as a recitation of the alphabet and its nominee no more in doubt than the identity of the body in Grant's tomb.

We Democrats, by contrast, must appear to be a weird and motley crew.

STRENGTH FROM DIVERSITY

Yet the more I see of Democratic Party politics, the more convinced I become that out of our disorganization, our diversity, and even our disagreements, comes our strength.

For ours is the party of all the people. We are neither enchained by labor, nor enslaved by business, nor captive of the farmer. We are the party of no one because we are the party of everyone.

All are welcome within our gates—the New England fisherman with the salty tang of the Atlantic in his speech, the southern cotton planter with the scent of magnolias in his manner, the midwestern shopkeeper, the western mountain rancher, the wheat

farmer from the Great Plains, the stevedore, the coal miner, the factory worker, the teacher, the preacher, the oil driller and the housewife—tinker, tailor, toiler, sailor: it takes no pedigree and very few credentials to be a Democrat.

Here there are no barricades erected against ideas, no fences against individual aspirations. We want no hobbles on the mind, no shackles on the spirit. We impose no thought control, demand no particular orthodoxy, and expect no iron conformity.

Occasionally someone may walk out of one of our conventions, but he isn't thrown out. He just leaves when he discovers that he's come to the wrong place by mistake.

When we disagree in convention, we fight with the ferocity of a pack of strange bobcats thrown together in a telephone booth. But it's a family fight—and by November after we've all had our say we shall have joined ranks behind the nominee selected by the majority of us (and at least among those of us assembled here today, I think there's no disagreement as to who we want that nominee to be).

THE PARTY OF INNOVATION

It's a strange and wonderful thing that out of this mixed and heterogeneous group of people who call themselves Democrats have come the great innovations of our Nation's history—the raw, bold, and imaginative ideas which have inspired the Nation to new bursts of creative activity and charted the path of our Nation's progress.

And yet it isn't so strange in another sense. Our party is the great shock absorber of American life—the fermenting cauldron in which the clashes and conflicts of individual ideas are distilled and refined.

Composed of so many divergent strands, we offer the Nation a certain cohesiveness that only a party of diversification can—and a certain tough durability that can come only in the alloy of different metals.

It was the party of Jefferson that believed enough in the average man to let him vote, that had the vision to see an expanding future stretching across the broad, untamed frontier for the little nation clustered along the eastern seaboard and to insure that future by the Louisiana Purchase.

It was the party of Jackson that had the courage to assert the power of the Nation and all its people as greater than that of any one financial interest and to break the stranglehold of a little group of men upon the economic windpipe of the Nation.

It was the party of Cleveland that faced the issues of the complex era of our industrial expansion—the party of Wilson that enunciated the "New Freedom," took the children from the mines and mills and put them in the schools, and dreamed a dream of peace on earth.

It was the party of Roosevelt that had the heart to hear the cry of the dispossessed, the disinherited, the disenchanted, the distressed and to lift a desperate people out of the throes of disaster, and his party which generated the dynamic leadership to save the freedom of man in the world.

It was the party of Harry Truman, that tough, plainspoken, fearless man who had the capacity to make decisions and who will be treated with far greater kindness by the historic chroniclers of the future than he was treated by the hysterical chronics of his time.

And it is the party that produced that man of abiding honor and towering patriotism whose dedicated years of inspired and responsible service to his Nation have earned for him a place unique in history and unrivalled in the hearts of his countrymen, SAM RAYBURN of Bonham, Tex.

GREATER TOMORROWS

We could go on and on with a recitation of the programs and personalities produced by this party of innovation. But you did not come here today to hear a recital of past achievements and faded glories. We are not here to dwell upon the imperishable pages of our past, for ours is the party of hope and not of memory. Rather than looking back to great yesterdays, we must look forward to greater tomorrows.

We are here today to choose delegates to our national convention and to play our part in the selection of the next President of the United States.

It is a great moment, and an awesome moment. New problems call for new solutions. Complex challenges call for creative thinking. The problems and the challenges dwarf the concepts of the stereotyped past.

Gone forever are the days of which William McKinley spoke when he said that every town of 10,000 people in America had at least 10 men who could serve creditably as President.

For the Presidency today is not merely a ceremonial office nor an empty honor to be awarded in the manner of a popularity prize. It is not a place for a campaign pitchman whose only original thought is to question the patriotism of his opponents. It is an office of fateful decision.

In an age of danger and opportunity, when yesterday's dream is today's reality and tomorrow's history, the decisions of the Presidency can quite literally mean the difference between life and death for millions of people. This is what makes our responsibility so great and so grave.

I have the faith to believe that when the Democratic National Convention meets in Los Angeles, it will be not only nominating a candidate but choosing a President.

I feel certain that this will be true if we demonstrate the good judgment to articulate a constructive program for the whole Nation and not just a part of it, and to nominate a standard bearer with the demonstrated capacity to lead our whole party and not just a segment of it—and perhaps more importantly still, to set forth a program and personality that can attract the confidence and enthusiastic support of that great bulk of plain vanilla Americans who are not actively affiliated with either major political party but upon whose decision the results of the election will unavoidably rest.

LYNDON B. JOHNSON

There are many of us—and a rapidly growing number of us in every part of the country—who are devotedly convinced that the highly developed skills and deeply dedicated leadership necessary to a truly great President as well as the national stature and universal respect, the organizational prowess and qualities of personality necessary to lead us to an overwhelming victory in November are preeminently present in the person of the great majority leader of the U.S. Senate, LYNDON B. JOHNSON of Texas and of America.

I invite you to look with me at the truly unusual qualifications of LYNDON B. JOHNSON.

To serve as a Member of the U.S. Senate is a great honor and an awesome responsibility. This select group of 100 men has been called the world's most exclusive club. Certainly it is the world's most powerful legislative body. But LYNDON JOHNSON is much more than merely another Member of the Senate.

To be chosen by one's colleagues as their leader is an even greater honor and an even more overpowering responsibility. SAM RAYBURN has a saying that the Members of Congress are the most critical jury in the world, that each Member's qualities are shrewdly judged by those who work with him day in and day out. But LYNDON JOHNSON has been much more than just another Senate majority leader.

When elevated to this position of respect and responsibility at the age of 44, he was the youngest man ever so honored by his colleagues in either party. And I think no serious student of history will quarrel with me when I say that LYNDON JOHNSON, by the uncontestable proof of his record of accomplishment, has been the most effective majority leader certainly in the past 50 years, and probably in the entire history of the United States. But LYNDON JOHNSON is more than this.

In a party known for its divergent interests, LYNDON JOHNSON has demonstrated a historically unrivalled capacity to weld together the divergent factions into one united and fairly harmonious whole. He alone with his extraordinary gifts of leadership and conciliation has drawn together in the Senate the forces of city and of farm, of north and south and east and west, and led them together up a constructive path of solid achievement.

This is the unique JOHNSON characteristic, his incredible ability to find solutions to great problems which have baffled others and remained unsolved often for decades.

Here is a man who has placed achievement above argument, solutions above strife, action above oratory, service above sectional discord, and his Nation's interests first and last and above every other consideration.

Is his the kind of leadership the American people want? He, along with Speaker RAYBURN, has authored and directed the record of the Democrats in Congress upon which our Nation's public have three times in the past three congressional elections placed the stamp of their wholehearted approval, electing ever-increasing Democratic majorities each successive time.

And they will crown our efforts with approval if jointly we behave as responsibly in Los Angeles.

DEMANDS OF THE TIMES

The times are demanding the best that we have. They are demanding leadership that can stand up to Khrushchev either in negotiation or in the arena of world opinion, and not come off second best.

They are demanding leadership which can keep our own country from being split into bitterly hostile camps upon the thorns of wicked controversy.

Dangerous times when our very survival is at stake are demanding leadership in whose sinews is the steel of firm resolve, to promise no slick and easy way but to call us to sacrifice if need be.

Unaccustomed times are demanding the imaginative leadership to use our burgeoning surpluses of agricultural commodities to feed the hungry and clothe the naked and serve as an effective instrument of friendship and peace rather than accumulating huge storage bills in the Nation's warehouses.

Careless times where shiny suburbs sprawl into congeries of congestion and cities of skyscrapers neglectfully decay into sickening slums of smog, soot, and urban ugliness.

Contradictory times where behind the angel in the advertisement and the convertible on the screen are concealed the bitter dilemma of the broken home and the stark futility of the unemployed.

Restless times in the world where the underfed, the underprivileged, the underdeveloped explode in emergence, hysterical in their quest for opportunity, humble in their search for decency.

Enlightened times when education becomes not just a school or a book but the essence, the soul, and the spirit of human values.

Tenacious times where the economic fallacies of restricted growth and tight money foolishly prevent the energetic enterprise necessary to enter the new decade.

These times are demanding leadership which can inspire a renewed sense of national vision, of national purpose, and of national effort.

The times are calling to this office a man of height and a man of depth, a man of brilliantly youthful imagination but steeped in nature and seasoned judgment, a man capable both of hardened steel and of gentle velvet, a man of action and a man of reason.

No longer can we think in the old outworn cliches of blocs and groups and factions and sections. America has outgrown this threadbare approach. The Nation's future is one. Its potential is indivisible. It cries out for leadership of a broader vision.

The office is indeed seeking the man. Impressive support is rallying from every part of the country. For we are seeking a President to serve all of America and all the people of America. It is no longer a question of where a man lives, but where he stands. The American people are not concerned about where a man comes from; they want to know where he is going.

And with your help, I have the feeling that LYNDON JOHNSON and a Democratic administration, on a ticket bought and purchased by the American people, are going to the White House next January.

If you should feel slightly cheated in having listened through a Democratic keynote speech that did not beat the bones of Calvin Coolidge and berate the memory of Herbert Hoover: these omissions have occurred because I've felt that there were more important things to talk about.

If you should think it strange that I have not excoriated the so-called modern Republicans for their lack of vision, their lack of direction, their lack of compassion, the loss of momentum we have suffered in the national product, the loss of initiative we have suffered in world affairs, the failures of the present Republican administration: it is because I did not come to speak of failures.

It is not a time for frantic denunciations or superficial solutions or intemperate boasting. It is a time for dedication.

May we think not alone upon how bad they are—but upon how good we need to be. Let us not merely pray that we shall win, but let us pray that we may deserve to win.

For in performance only can there be reward; in vision can there be fulfillment; and in service to our fellow men come the victories of life.

Deportation of the Lithuanian People in 1940

EXTENSION OF REMARKS
OF
HON. DANIEL J. FLOOD
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Friday, June 17, 1960

Mr. FLOOD. Mr. Speaker, the Lithuanians are the most numerous of the Baltic peoples, and among these they are the best known in the West. These 3 million rugged and sturdy souls endured the oppressive alien yoke in their homeland for centuries, and in 1919 they succeeded in regaining their independence. But the independence thus earned did not last long, for during part of the time when they were masters of their fate, they were surrounded by aggressive dictators—in Nazi Germany and Communist Russia. And the treacherous designs of Communist Russia proved fatal to the freedom of the Lithuanian people.

Early in 1940 Lithuania was attacked, invaded and occupied by the Soviet Red Army. The country was then incorporated into the Soviet Union, and the people enslaved. But the Soviet authorities did more than that in their effort to subdue the Lithuanian people. They arrested more than 100,000 Lithuanians and deported them, under indescribable circumstances, to distant regions of the Soviet Union. That inhuman act was performed by Soviet authorities in June of 1940, and it is that event which is being observed today.

An Inspiring Service Story

EXTENSION OF REMARKS
OF
HON. ED EDMONDSON
OF OKLAHOMA
IN THE HOUSE OF REPRESENTATIVES
Friday, June 17, 1960

Mr. EDMONDSON. Mr. Speaker, a young Oklahoman named Floyd Eugene Goines probably owes his life today to the alertness and humanitarian spirit of two great services—the U.S. Air Force and the U.S. Navy.

An Air Force veteran who is a skin-diver by profession, young Goines was hastened to a Tahlequah, Okla., hospital early this week, suffering from acute decompression sickness as a result of an accelerated return to the surface after an 85-foot dive in Tenhiller Lake.

The physician attending young Goines, Dr. Herbert Masters, of Tahlequah, soon concluded that it was imperative to transport the young man immediately to a decompression chamber to avert death or possible permanent paralysis. At the time of Dr. Master's diagnosis Goines was paralyzed on one side and in acute pain.

The Tahlequah doctor telephoned the Navy's submarine base at New London, Conn., where doctors speedily agreed that the decompression treatment was urgently needed, and offered Navy decompression facilities to the young veteran.

The immediate problem was emergency transportation from Oklahoma, with physicians in agreement that even minutes of delay could be critical in young Goines' chances for survival.

At midnight on last Monday, I was called by long distance telephone from Muskogee, Okla., by County Attorney John Luton, who told me of the emergency and asked for help in obtaining a night flight to New London.

A call to Dr. Masters confirmed the urgency of the matter and also brought news that the plane provided would require pressurization, oxygen supply, and medical attendance, since Goines' condition was becoming increasingly critical.

I then placed a call to Maj. Gen. Thomas P. Gerrity at Tinker Airbase in Oklahoma City, and advised the general personally of the emergency.

General Gerrity's response was immediate and heartwarming. He said he would endeavor at once to assemble a crew with a doctor and a nurse for the mercy flight.

This was at midnight, e.d.s.t.

At 1:30 a.m., c.s.t., an Air Force plane took off from Tinker with young Goines aboard, after a 170-mile ambulance trip from Tahlequah to Oklahoma City.

At 9:57 a.m., e.d.s.t., the patient was in the decompression chamber at the Navy School of Deep Sea Diving here in Washington, under the expert care of Navy doctors and hospitalmen familiar with his injury.

Hospitalman 1/c Roger Christenson was in the tank with him on a 38-hour assignment that later was to send Christenson back to decompression for 4 hours himself, with a mild case of resulting "bends."

Under the watchful eyes of Comdr. J. C. McNicol, USNR, Lt. Comdr. Emmett W. Carpenter, USN, and a team of three Navy doctors, Goines was carefully moved through the critical stages of compression and decompression to dissolve the painful air embolism creating paralysis.

Thirty-eight hours later, he walked out of the tank, with only a slight weakness in one hand as a souvenir of his harrowing experience.

His recovery is the direct result of the generous and humanitarian service, beyond the call of duty, of our Navy and Air Force officers and men. We can be very proud of what they have done.

One of the splendid and commendable customs of our armed services in general is their demonstrated willingness, and generous readiness, to lend assistance to people who are the victims of disaster.

I believe every American is proud of this humanitarian custom, which is in the highest tradition of our country and its great heritage.

My personal thanks and congratulations are extended to all who helped to continue this tradition, in the case of Floyd Eugene Goines.

Pending Old-Age Health Benefit Legislation—How the States Would Share Federal Cost and Payments

EXTENSION OF REMARKS
OF
HON. BURR P. HARRISON
OF VIRGINIA
IN THE HOUSE OF REPRESENTATIVES
Friday, June 17, 1960

Mr. HARRISON. Mr. Speaker, the Social Security Amendments of 1960 (H.R. 12580) include a proposed new title XVI of the Social Security Act which would authorize Federal payments to the States toward the cost of providing certain health-care benefits to elderly citizens classified as medically indigent.

Table "A" on page 11 of the committee report on H.R. 12580—House Report 1799—breaks down by States the esti-

mated annual amounts of Federal funds which would become available to the States under the proposed title XVI for provision of medical services to the aged not covered by the old-age assistance program.

As we prepare to consider this legislation in the House, it is of interest to compare this breakdown with estimated State-by-State contributions to the Federal cost of the program as computed by the formula used by Tax Foundation, Inc., in its allocation of the Federal net budget tax burden, published in "Facts and Figures on Government Finance."

I include a table presenting these shares in rounded dollar amounts and percentages:

Estimated annual shares of the States in the Federal cost of the proposed medical services for the aged program (title XVI)

State	Percent of total estimated to be payable	Percent of Federal tax burden borne by State [1]	Federal share estimated to be payable	Estimated share of Federal cost borne by State [2]	State	Percent of total estimated to be payable	Percent of Federal tax burden borne by State [1]	Federal share estimated to be payable	Estimated share of Federal cost borne by State [2]
United States	100	100	$165,450,000	$165,450,000	Missouri	0.34	2.31	$567,000	$3,821,895
Alabama	.02	.97	39,000	1,604,865	Montana	.02	.31	35,000	512,895
Alaska	.0006	.12	1,000	198,540	Nebraska	.88	.61	1,455,000	1,009,245
Arizona	.008	.56	13,000	926,520	Nevada	.037	.20	62,000	330,900
Arkansas	.018	.45	29,000	744,525	New Hampshire	.76	.32	1,264,000	529,440
California	4.8	10.39	7,956,000	17,190,255	New Jersey	8.84	4.28	14,624,000	7,081,260
Colorado	.29	.91	477,000	1,505,595	New Mexico	.006	.37	10,000	612,165
Connecticut	4.8	2.20	7,992,000	3,639,900	New York	30.76	13.56	50,885,000	22,435,020
Delaware	.02	.60	38,000	992,700	North Carolina	.57	1.41	95,000	2,332,845
District of Columbia	.086	.68	144,000	1,125,060	North Dakota	.19	.22	314,000	363,990
Florida	.23	2.48	386,000	4,103,160	Ohio	3.32	5.85	5,501,000	9,678,825
Georgia	.009	1.31	15,000	2,167,395	Oklahoma	.61	.99	102,000	1,637,955
Hawaii	.035	.30	59,000	496,350	Oregon	1.87	.86	3,101,000	1,422,870
Idaho	.021	.25	36,000	413,625	Pennsylvania	2.81	7.22	4,655,000	11,945,490
Illinois	11.5	7.23	19,008,000	11,962,035	Rhode Island	.82	.53	1,355,000	876,885
Indiana	3.7	2.35	6,699,000	3,888,075	South Carolina	.0036	.61	6,000	1,009,245
Iowa	.14	1.15	241,000	1,902,675	South Dakota	.0048	.21	8,000	347,445
Kansas	1.0	.99	1,684,000	1,637,955	Tennessee	.014	1.16	23,000	1,919,220
Kentucky	.0097	1.09	16,000	1,803,405	Texas	.097	4.34	161,000	7,180,530
Louisiana	.085	1.20	141,000	1,985,400	Utah	.02	.36	39,000	595,620
Maine	.3	.43	488,000	711,435	Vermont	.03	.18	55,000	297,810
Maryland	.72	1.90	1,196,000	3,143,550	Virginia	.41	1.68	679,000	2,779,560
Massachusetts	8.5	3.47	14,077,000	5,741,115	Washington	2.85	1.54	4,718,000	2,547,930
Michigan	2.0	4.74	3,227,000	7,842,330	West Virginia	.087	.76	144,000	1,257,420
Minnesota	3.02	1.65	4,999,000	2,729,925	Wisconsin	3.96	2.08	6,552,000	3,441,360
Mississippi	.004	.45	6,000	744,525	Wyoming	.044	.17	73,000	281,265

[1] Based on allocation of the Federal net budget tax burden, Tax Foundation, Inc., formula.

[2] Tax Foundation, Inc., formula applied to estimated Federal cost of program.

The foregoing figures may have some interesting individual comparisons. Connecticut and California each will draw about $8 million for medical benefits, but Connecticut's share of the tax contribution is $3.6 million, whereas California's share is $17.19 million.

New Jersey contributes 4.28 percent of the tax burden, and Michigan contributes 4.74 percent of the same burden. Yet, New Jersey will receive 8.84 percent of the benefits and Michigan 2.0 percent.

Four States will receive more than half of the money payable for medical benefits:

	Percentage of benefits	Percentage of tax costs	Dollar benefits	Dollar tax cost
Connecticut	4.8	2.20	$7,992,000	$3,640,000
Massachusetts	8.5	3.47	14,077,000	5,741,000
New Jersey	8.84	4.28	14,624,000	7,081,000
New York	30.76	13.56	50,885,000	22,435,000
Total	52.90	23.51	87,578,000	38,897,000

Four other States which contribute in the tax burden about the same as the foregoing favored States receive a great deal less.

	Percentage of benefits	Percentage of tax costs	Dollar benefits	Dollar tax cost
California	4.8	10.39	$7,956,000	$17,190,000
Michigan	2.0	4.74	3,227,000	7,842,000
Ohio	3.32	5.85	5,501,000	9,679,000
Missouri	.34	2.31	567,000	3,821,000
Total	10.46	23.29	17,251,000	38,532,000

The six States of Connecticut, Illinois, Massachusetts, New Jersey, New York, and Wisconsin get 68.36 percent of the benefits while paying 41.01 percent of the proportionate taxes.

New York, which contributes 13.56 percent of the tax burden, receives 30.76 percent of the benefits, which, percentagewise, is more than nine times as much as 28 States and the District of Columbia, which receive a total of 3.35 percent of the benefits and contribute 28.24 percent of the taxes. New York gets $50,885,000 in benefits, whereas all 29 of these jurisdictions get $4,758,000 of benefits. The 29 are: Alabama, Alaska, Arizona, Arkansas, Colorado, Delaware, District of Columbia, Florida, Georgia, Hawaii, Iowa, Kentucky, Louisiana, Maryland, Mississippi, Missouri, Montana, Nevada, New Mexico, North Carolina, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, West Virginia, and Wyoming.

West Virginia Wesleyan College

EXTENSION OF REMARKS

OF

HON. KEN HECHLER

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, June 17, 1960

Mr. HECHLER. Mr. Speaker, as an educator and one who believes that education is vital to our national security, I am proud to call attention to the recent achievements of West Virginia Wesleyan College at Buckhannon, W. Va., and to discuss some of its accomplishments.

To my mind, West Virginia Wesleyan is a good example of the way our smaller, independent liberal arts colleges can share in the tremendous growth in the number of college students which is now taking place, and yet not sacrifice the intimacy, the ability to give special instruction and individual attention, and the pleasant small-college atmosphere.

West Virginia Wesleyan has a recent history of orderly and well-planned growth. Its student enrollment has doubled over the past 7 years, rising from 502 students in 1953–54 to 1059 in 1959–60. Yet the annual increase has never totaled more than 176 students in any one year, enabling the college's administration to make responsible plans for the increased student load. This is a far cry from the picture in some colleges, which have accepted a swelling tide of new students without making adequate plans for their training and care. Wise future planning envisioning a maximum student body of 1,250 also has been undertaken and approved.

The college is making serious efforts to attract the higher caliber student who can benefit most from the type of training West Virginia Wesleyan has to offer. Of 561 applications received for the 1960–61 school year—compared with 371 the year before—344 have been approved. Of this number, 53 of the students ranked in the top 10 percent of their high school class, and all but 54 in the top half. The school is hoping to add a special admissions counselor this year to insure even better screening and selection of future applicants.

As with most such institutions, this growth has created a strain on physical facilities. But the college is meeting this challenge with an excellent long-range plan which envisions renovation, and enlargement of the physical plant, which I might point out is one of the most beautiful in the entire State. An active campaign to raise funds on a national basis for a new athletic and physical education center is under way, and I feel certain that this drive will be successful, for the college has enjoyed a reputation in sports far beyond its small enrollment in the past.

Most importantly, however, West Virginia Wesleyan is recognizing the fact that more teachers are needed to cope with the growing student body. This year, 17 new faculty members have been added, and the total faculty now stands at 57 members. This figures to a student-faculty ratio of 20.5, a very commendable figure, and a reduction from 25.0 in 1955.

The college is busy with other plans also. A projection has been made to bring the first graduate-level courses to the college by establishment of a graduate school of religion. Since 140 of Wesleyan's students are enrolled in preministerial study or religious education, this is certain to improve the level of training and the service to the Methodist Church, which controls the college.

A special project also is underway to encourage faculty members to publish more papers and research projects, and to stimulate undergraduate students to assist in their preparation. This program has been highly successful in its 2 years of existence, with more than 35 publications coming from the college in that time. In addition, Wesleyan students were responsible for 8 of 17 papers read at the recent West Virginia Academy of Sciences conference.

These are only a few examples of the well coordinated program that is taking place at West Virginia Wesleyan. I feel certain that this excellent little college, now in its 71st year of existence, will continue to prosper under the able leadership of its president, Stanley H. Martin, and will bring continuing credit to its administration and to the State of West Virginia.

Flag Day Program Sponsored by the Altoona Little League, Inc., Altoona, Pa., June 15, 1960

EXTENSION OF REMARKS

OF

HON. JAMES E. VAN ZANDT

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, June 17, 1960

Mr. VAN ZANDT. Mr. Speaker, one of the many Flag Day observances in Pennsylvania was that sponsored by the Altoona Little League, Inc., at the Little League baseball field located in Altoona, Pa., on Wednesday, June 15, 1960, at 6 p.m.

The officials of the Little League headed by Joseph J. Riley are doing a tremendous job in fathering the six-team little baseball league which has the interest of some 90 little leaguers. The league schedule involves 40 games during the months of May, June and July after which an all-star team takes part in State competition among little leaguers.

It was my privilege to present the Altoona Little League with a 50-star flag at which time I delivered the following address:

ADDRESS BY REPRESENTATIVE JAMES E. VAN ZANDT, MEMBER OF CONGRESS, 20TH DISTRICT OF PENNSYLVANIA, AT FLAG DAY PROGRAM, SPONSORED BY ALTOONA LITTLE LEAGUE INC., LITTLE LEAGUE BASEBALL FIELD, JAGGARD STREET AND LOGAN AVENUE, ALTOONA, PA., WEDNESDAY, JUNE 15, 1960

It is a pleasure to participate in the observance of National Little League Week and to appear on this special Flag Day program sponsored by Altoona Little League Baseball, Inc.

The flag of our country provides one of the most dramatic chapters in U.S. history.

The emblem of the Stars and Stripes has always been a colorful reflection of American progress—yesterday, today and tomorrow.

That is why this is a very special occasion.

It marks the presentation of a new 50-star flag which may be officially flown for the first time at 12:01 a.m. on July 4, 1960.

It is my hope that each one of you will remember for a long time the significance of this occasion and what is done and said here.

History tells us that Betsy Ross, an expert needlewoman living in Philadelphia, made the first stars and stripes flag.

According to the popular story, in June 1776, shortly before the Declaration of Independence was signed, Betsy Ross received a call from three American leaders—George Washington, Col. George Ross and Robert Morris.

Those men told Betsy Ross that they were a committee from Congress and that they wanted her to make an American flag for them.

She replied: "I don't know whether I can, but I'll try."

George Washington then showed her a rough sketch for a flag.

After some changes were made Betsy Ross began sewing together some bright colored red, white and blue coth.

When she finished it the flag had 13 stripes—7 red and 6 white stripes—and a circle of 13 white stars on a field of blue in the upper lefthand corner.

George Washington and his committee approved the flag and Congress adopted it as the first official emblem of the United States on June 14, 1777.

Now, not all historians agree on the details of the Betsy Ross story but the fact remains that the Stars and Stripes flag is more than 180 years old.

The flag has changed as our country grew.

At one time it had 15 stripes instead of 13.

And as each new State came into the Union a new star was added to the flag.

Today the flag has 49 stars—and 13 stripes.

Within a few weeks or on July 4, 1960, the flag will have 50 stars denoting the latest new State—Hawaii.

Every detail and every color in the United States flag has a meaning.

Our flag tells a stirring story.

Each star is an emblem of struggles and toil, danger and hardship, suffering and privation to win a new State from the wilderness.

The 13 stripes, representing the Thirteen Original States, recall the history of the bitter 6-year struggle in the Revolutionary War during which the Colonies stood side by side and fought for freedom.

They won that war, so the 13 stripes tell us that in union there is strength.

There have been many interpretations for the colors in our flag.

Some people say that the red stands for the courage with which Americans have always defended the United States—our way of life.

The white in the flag has been likened to the purity of our ideals—freedom, liberty, justice, and the right of every American to worship God according to that person's own convictions.

And the blue color has been described as symbolizing our loyalty and strong desire for peace.

The flag is very much a part of our lives.

It is displayed in our courts and schools and churches.

It flies proudly from our buildings.

It is in our homes.

Every one of our ships sailing the seven seas carries the U.S. flag.

We can never forget the flag.

We should always respect it because it stands for everything we have, everything we are, and everything we hope to become.

These are some of the reasons in my capacity as your Representative in Congress that I am presenting to you this new and beautiful 50-star flag.

It is a proud moment to be paying you the highest honor possible in this free land of ours.

That honor is presenting to you this gift—the Stars and Stripes of the United States of America.

PLEDGE OF ALLEGIANCE

"I pledge allegiance to the flag of the United States of America,
And to the Republic for which it stands,
One Nation under God, indivisible,
With liberty and justice for all."

Edward R. Devlin

EXTENSION OF REMARKS

OF

HON. HERMAN TOLL

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, June 17, 1960

Mr. TOLL. Mr. Speaker, on behalf of my colleagues, the Honorables WILLIAM A. BARRETT, JAMES A. BYRNE, KATHRYN E. GRANAHAN, ROBERT N. C. NIX, and myself, I rise to pay tribute to the life and works of a good friend, a great public servant, and a dedicated American, the Honorable Edward R. Devlin. He was only 43 years of age when he passed away on June 12, 1960, in the Nazareth Hospital of Philadelphia, Pa. He was buried on June 15, 1960, in the Resurrection Cemetery, Cornwell Heights, near Philadelphia.

At the time of his death Ed Devlin was first deputy State secretary of revenue, having been appointed by Gov. David L. Lawrence in March of 1959. Prior to that time he served as deputy

register of wills of Philadelphia. He served in the Army of World War II and was a member of the American Legion. Since 1957 he had been the leader of the 57th ward.

Ed is survived by his wife, Mary Devlin, a sister of the Honorable WILLIAM J. GREEN, JR., chairman of the Democratic city committee of Philadelphia and Member of Congress from the Fifth District of Pennsylvania. He is also survived by four sons, Edward R., Jr., John Patrick, Terrence, and William, and a daughter, Mary, all of the home address, 8301 Algon Avenue, Philadelphia. In addition, he is survived by his mother, Mrs. Edward R. Devlin, Sr., and four sisters.

Ed was an amiable and faithful public servant and was extremely well liked and respected by the citizens of our city. He will be greatly missed by his family, his friends, and the community he served so faithfully.

SENATE

SATURDAY, JUNE 18, 1960

The Senate met at 10 o'clock a.m., and was called to order by Senator MIKE MANSFIELD, of Montana.

The Chaplain, Rev. Frederick Brown Harris, D.D., offered the following prayer:

Eternal Father, whose sheltering wings of might and mercy are the protection of Thy children, we come with the blessed assurance that—

From every stormy wind that blows,
From every swelling tide of woes,
There is a calm, a sure retreat,
'Tis found beneath the mercy seat.

When in our hours of greatest vision we glimpse the opulent riches of Thy grace—ours for the taking—we stand ashamed of our spiritual poverty.

Dowered with privileges as no other nation, may our high estate be to us Thy call to protect the weak and the exploited, that through the potent ministry of our dear land, all peoples of the earth may be blessed.

Above all other besetting sins, save us by our attitudes and our actions from vetoing our own prayers. Amen.

DESIGNATION OF ACTING PRESIDENT PRO TEMPORE

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., June 18, 1960.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. MIKE MANSFIELD, a Senator from the State of Montana, to perform the duties of the Chair during my absence.

CARL HAYDEN,
President pro tempore.

Mr. MANSFIELD thereupon took the chair as Acting President pro tempore.

THE JOURNAL

On request of Mr. JOHNSON of Texas, and by unanimous consent, the reading of the Journal of the proceedings of Friday, June 17, 1960, was dispensed with.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had passed a bill (H.R. 12619) making appropriations for Mutual Security and related agencies for the fiscal year ending June 30, 1961, and for other purposes, in which it requested the concurrence of the Senate.

HOUSE BILL REFERRED

The bill (H.R. 12619) making appropriations for Mutual Security and related agencies for the fiscal year ending June 30, 1961, and for other purposes, was read twice by its title and referred to the Committee on Appropriations.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. JOHNSON of Texas. Mr. President, under the rule, there will be the usual morning hour. I ask unanimous consent that statements in connection therewith be limited to 3 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

RESOLUTION OF BOARD OF DIRECTORS, KANSAS COUNCIL OF WOMEN

Mr. CARLSON. Mr. President, the Kansas Council of Women, at a recent meeting of the board of directors, approved a resolution requesting the preservation of the Huron Cemetery in Kansas City, Kans., as a national historic shrine.

Kansas is filled with historic spots where Indian history was made and none is more historic than the Huron Cemetery.

I ask unanimous consent that the resolution be printed in the RECORD and referred to the appropriate committee.

There being no objection, the resolution was referred to the Committee on Interior and Insular Affairs and ordered to be printed in the RECORD, as follows:

The Kansas Council of Women is a group organization which represents 32 of the major women's organizations in this State.

Through these individual organizations are represented some 500,000 active and interested and alert women in the State of Kansas.

Through action in our board of directors meeting, and in our annual meeting, it was resolved that the president request, and express the sentiment of this group, that Huron Cemetery in Kansas City, Kans., be held as a national historic site, as a preservation of early Indian history.

MRS. MARK BRAWLEY,
President, Kansas Council of Women.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. BYRD of Virginia, from the Committee on Finance, with amendments:

H.R. 9662. An act to make technical revisions in the income tax provisions of the Internal Revenue Code of 1954 relating to estates, trusts, partners, and partnerships, and for other purposes (Rept. No. 1616).

ADDITIONAL FUNDS FOR COMMITTEE ON APPROPRIATIONS

Mr. HAYDEN, from the Committee on Appropriations, reported an original resolution (S. Res. 335) to provide additional funds for the Committee on Appropriations, which was referred to the Committee on Rules and Administration, as follows:

Resolved, That the Committee on Appropriations hereby is authorized to expend from the contingent fund of the Senate, during the Eighty-sixth Congress, $5,000 in addition to the amounts, and for the same purposes, specified in section 134(a) of the Legislative Reorganization Act, approved August 2, 1946, Senate Resolution 137, agreed to July 6, 1959, and Senate Resolution 282, agreed to April 11, 1960.

BILLS INTRODUCED

Bill were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. BENNETT:

S. 3696. A bill to amend the Internal Revenue Code of 1954 to impose import taxes on lead and zinc; to the Committee on Finance.

By Mr. DODD:

S. 3697. A bill for the relief of Antonio Joaquim da Silva Aresta; to the Committee on the Judiciary.

By Mr. KERR:

S. 3698. A bill to amend the Internal Revenue Code of 1954 to impose import taxes on lead and zinc; to the Committee on Finance.

(See the remarks of Mr. KERR when he introduced the above bill, which appear under a separate heading.)

RESOLUTIONS

ADDITIONAL FUNDS FOR COMMITTEE ON APPROPRIATIONS

Mr. HAYDEN, from the Committee on Appropriations, reported an original resolution (S. Res. 335) to provide additional funds for the Committee on Appropriations, which was referred to the Committee on Rules and Administration.

(See the above resolution printed in full when reported by Mr. HAYDEN, which appears under the heading "Reports of Committees.")

GREETINGS TO MISS HELEN KELLER ON HER EIGHTIETH BIRTHDAY

Mr. HILL (for himself and Mr. SPARKMAN) submitted an original resolution (S. Res. 336) extending greetings to Miss Helen Keller on the occasion of her 80th birthday, which was referred to the Committee on Labor and Public Welfare.

(See the above resolution printed in full when submitted by Mr. HILL, which appears under a separate heading.)

IMPORT REGULATIONS ON LEAD AND ZINC

Mr. KERR. Mr. President, I introduce a bill with respect to import regulations on lead and zinc and ask that it be appropriately referred.

I desire also to give notice that it is my intention to offer this bill as an amendment to one of the bills which will likely be considered by the Finance Committee in the near future and which have heretofore passed the House. The distinguished chairman of the Ways and Means Committee has been made aware of this proposal and has agreed that it will be given a courteous and thoughtful reception in conference.

In August of 1959 I introduced, and the Senate unanimously adopted, Senate Resolution 162. This resolution, in effect, requested the Tariff Commission to make a finding as to the levels of production necessary to assure a sound and stable lead and zinc mining industry in the United States.

While only two of the six members of the Tariff Commission chose to answer the Senate request, the other four feeling that the Senate did not have the right to ask them for that kind of information, the minority statement presented what seems to be a profound and well-reasoned solution to the problem. The Commission held hearings and studied the matter thoroughly and they were unanimous in their finding that the present rigid quotas should be replaced. May I read a couple of quotations from the unanimous finding of the Commission—for although four members of the Commission refused to tell us what the quotas should be replaced with, they did say in no uncertain terms that they were not the solution.

I quote from pages 109 and 110 of the report of March 1960:

> The quotas are rigid and inflexible * * * and have tended to increase, rather than to reduce instability of market prices, and thereby to thwart the best interests both of domestic producers and consumers of lead and zinc. The system of import quotas has been discriminatory in its effects upon various producers, importers, and consumers, and has created unusual difficulties for some while it has brought windfall advantages to others. * * * Finally, import quotas have seriously interfered with normal trade relations between smelters or importers and their suppliers and between producers or importers and their customers, thereby forcing unusual, unnatural, vexing, and often uneconomic, adjustments.

Now, Mr. President, there can be little doubt that the present quota system should be replaced immediately. But with what?

Between 1953 and 1959 the Tariff Commission made three studies, held three hearings, and in each case made a unanimous finding of injury. On two of these occasions the Commission made recommendations of proper levels of protection. In this last Commission report the well-thoughout-out suggestions of the minority that chose to respond to Senate request were not far from the recommendations made earlier.

Now my bill is similar in most respects to those recommendations, but it also includes parts of—and is similar to—the administration sponsored bill of 2 years ago. It is a most reasonable adjustment of the features of the administration proposal and the Tariff Commission suggestions. It is a most moderate proposal and one that I feel confident the President would accept, yet it gives to our well-nigh prostrate mining industry an incentive to get back to work on a basis that will give the owners and workers a chance to show what they can do. It would give some stability to the mining and smelting organizations, something they have not had for many years.

The rates proposed in this bill follow closely the rates proposed by the administration sponsored bill of late 1957, and follow as closely the suggestions in the Tariff Commission report of March 1960. The removable tax feature is in line with the principles of the administration bill.

The bill would put a fixed duty on lead of 2 cents per pound, plus a removable additional duty of 1 cent per pound. The 1 cent removable duty would go on when the price of lead fell below 13½ cents and be taken off when the price reached 14½ cents.

It would put a fixed duty of 1½ cents a pound on zinc plus an additional duty of 1 cent per pound which would be applied when the price of zinc was below 12½ cents and be removed when the price of zinc reached 13½ cents.

The fixed duty on the lead content of ore would be 1.4 cents per pound with a removable additional duty of 0.7 cent per pound. The fixed duty on the zinc content of ore would be 1.05—one and five hundredths—cents per pound plus a removable additional duty of 0.7 cent per pound.

These rates on the metal content of the ores are also in line with the 1960 suggestions of the minority of the Tariff Commission and it will be noted that the combined duty on lead and zinc metals in ores would be identical with that suggested in the same report.

The bill would establish on all lead and zinc products practically the same rates as those recommended by the administration in its proposal of 1957.

Mr. President, I hope we can now settle this long debated issue and I urge that the Senators give it their close scrutiny so that when and if it comes to the floor they will be acquainted with it.

The ACTING PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 3698) to amend the Internal Revenue Code of 1954 to impose import taxes on lead and zinc, introduced by Mr. KERR, was received, read twice by its title, and referred to the Committee on Finance.

GREETINGS TO MISS HELEN KELLER ON HER 80TH BIRTHDAY

Mr. HILL. Mr. President, the 27th day of this month marks the 80th anniversary of the birth of a most remarkable and gentle lady who is loved and respected by people throughout the world.

She is the champion and wonderful inspiration to handicapped peoples everywhere and there is no need for me here to recite in detail the history and accomplishments of Miss Helen Keller.

All of us here today easily call to mind the story of the infant in Tuscumbia, Ala., made blind and deaf by disease and imprisoned, as she later called it, in a "no world."

All of us remember the challenging, inspiring story of how this pitiful child emerged into womanhood and how through her own determination and faith and through the patient understanding and devotion of a dedicated teacher, Miss Anne Sullivan, she won her magnificent victory over darkness and defeat.

Miss Keller's personal victory turned her life and ambitions to the service of others. As she has written:

> The more we try to help each other and make life brighter, the happier we shall be.

With this philosophy as her guide, Helen Keller has for more than half a century employed the symbol of her own hope and faith to the benefit of millions of her fellow handicapped in America and throughout the world.

And now, as one interviewer wrote in recent weeks:

> Helen Keller's life grows long, but from her dark, still world she radiates a bright young happiness that is absolutely contagious. It infects the people around her and fills her home with laughter.

Is it any wonder that with tremendous pride we in her native State of Alabama claim Helen Keller as our own?

Mr. President, on behalf of myself and my colleague, the junior Senator from Alabama [Mr. SPARKMAN], I submit, for appropriate reference, a resolution to express on the occasion of her 80th birthday some measure of the abiding admiration and deep respect which we all feel for Miss Helen Keller.

The ACTING PRESIDENT pro tempore. The resolution will be received and appropriately referred.

The resolution (S. Res. 336) was referred to the Committee on Labor and Public Welfare, as follows:

> Whereas Miss Helen Keller will celebrate her eightieth birthday on June 27, 1960; and
>
> Whereas this remarkable woman, stricken deaf and blind in infancy, has for more than fifty years tirelessly devoted herself to the battle for the economic, cultural, and social advancement of the physically handicapped throughout the world, making her own conquest of disabilities a symbol of hope for millions; and
>
> Whereas in her long and faithful association with the American Foundation for Overseas Blind she has traveled to more than a score of nations throughout the world; and
>
> Whereas in all these travels she has inspired immeasurable progress in services to the blind, the deaf, and the deaf-blind, and has won countless new friends for the United States of America and the cause of democracy and freedom; and
>
> Whereas Congress and the Chief Executive have expressed deep concern in improvement of conditions among the physically handicapped, and have initiated constantly expending programs to this worthwhile end: Now, therefore, be it
>
> *Resolved*, That, in recognition of the vast contributions made by Miss Helen Keller to the well-being of all humanity, the Senate hereby extends its greetings and best wishes to Miss Keller on the occasion of her

eightieth birthday, which will occur on June 27, 1960.

SEC. 2. The Secretary of the Senate is directed to transmit to Miss Helen Keller a copy of this resolution.

INCREASE OF PUBLIC DEBT LIMIT AND EXTENSION OF EXISTING CORPORATE NORMAL-TAX RATE AND EXCISE-TAX RATES—AMENDMENTS

Mr. GORE submitted an amendment, intended to be proposed by him to the bill (H.R. 12381) to increase for a 1-year period the public debt limit set forth in section 21 of the Second Liberty Bond Act and to extend for 1 year the existing corporate normal tax rate and certain excise tax rates, which was ordered to lie on the table and to be printed.

Mr. LONG of Louisiana (for himself and Mr. EASTLAND) submitted an amendment, intended to be proposed by them, jointly, to House bill 12381, supra, which was ordered to lie on the table and to be printed.

PRINTING OF REPORT ON WESTFIELD RIVER, MASS. (S. DOC. NO. 109)

Mr. CHAVEZ. Mr. President, I present a letter from the Secretary of the Army, transmitting a report dated June 16, 1960, from the Chief of Engineers, Department of the Army, together with accompanying papers and illustrations, on an interim report on Westfield River, Mass., requested by a resolution of the Committee on Public Works, U.S. Senate, adopted September 14, 1955.

I ask unanimous consent that the report be printed as a Senate document, with illustrations, and referred to the Committee on Public Works.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

HEALTH FACILITIES AND TRAINING ACT OF 1960—ADDITIONAL COSPONSOR OF BILL

Mr. JAVITS. Mr. President, I ask unanimous consent that the name of the Senator from Kentucky [Mr. COOPER] may be added as an additional cosponsor of Senate bill 3680, the Health Facilities and Training Act of 1960, introduced by me, for myself and the Senator from New Jersey [Mr. CASE], on June 16, 1960.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

AMENDMENT OF SMALL BUSINESS ACT—ADDITIONAL COSPONSORS OF BILL

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the name of the senior Senator from Minnesota [Mr. HUMPHREY] may be added as a cosponsor of the small business bill I introduced 2 days ago, Senate bill 3689.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

TWENTY-FIFTH ANNIVERSARY OF THE SOCIAL SECURITY SYSTEM

Mr. JOHNSON of Texas. Mr. President, tomorrow will mark the 25th anniversary of one of the most important steps the Senate ever took. On June 19, 1935, the Senate passed the bill which became the Social Security Act of 1935.

When President Franklin D. Roosevelt signed the measure later the same year, he said:

> Today a hope of many years' standing is in large part fulfilled. If the Congress in this long and arduous session had done nothing more than pass this bill, this session would be regarded as historic for all time.

President Roosevelt did not overstate the case. For the first time in our history, our Nation recognized the fact that there was a collective responsibility to our senior citizens, not a responsibility of charity, but a responsibility of helping them sustain themselves in the late afternoon of life.

Social security has now become an integral part of our country's way of life. It is considered as American as apple pie. No one seriously challenges the concept that people in their productive years shall, with the assistance of their Government, set aside a portion of their earnings to be used to take care of them in their old age.

But in 1935 this concept was considered revolutionary. It embroiled the Congress in a lengthy debate involving such epithets as "socialization" and "dog tag regimentation."

I think I may be pardoned for having a deep feeling of pride that it was my party—the Democratic Party—that overwhelmingly supported the principal issue, the provision which has come to be known as the old-age and survivors insurance program. But, of course, this does not prevent me from welcoming with open arms the great majority of the members of the other party who, over the years, have become converted to social security.

In the quarter century since social security became law, we have distributed $52 billion in old-age and survivors insurance payments. In this day, when we discuss with perfect calm billions and hundreds of billions of dollars, this is certainly a small amount in comparison to the work these dollars have done.

The social security system has brought dignity and security to our senior citizens. It has helped remove the haunting fear of loss of productive ability which once hovered over them.

We have added to the self-respect of mankind.

Mr. President, in this 25th anniversary year we are engaged in another controversy revolving around the social security program. We are faced with the making of a decision as to whether to take another important step in eliminating the haunting insecurity of old age.

This time the issue involved is health care. We must face up to the fact that medical costs have risen constantly, whereas our senior citizens generally live on fixed incomes.

Mr. President, it is not my intention, as the majority leader of the Senate, to comment on legislation which is now pending and is shortly to be acted upon in the House of Representatives; but I do feel that this is the next major step the Congress must take, the next improvement for all Americans. I hope that before this session is over we shall build another strongroom on the foundation that was so well laid 25 years ago.

MEDICAL CARE COSTS REDUCE SENIOR CITIZENS TO POVERTY

Mr. PROXMIRE. Mr. President, daily there pour into my office letters from senior citizens of Wisconsin who tell the tragic story of elderly people who have been reduced to poverty and humiliation by medical costs which they simply cannot meet. These letters give the true life stories of American citizens who have worked hard all their lives and have looked forward to retirement, but now find that their reward at the end of the trail is loss of savings, loss of home, loss of dignity, and loss of any semblance of security the first time illness strikes.

Is this the pattern of life we want for our senior citizens? But this is the pattern that now exists; and we can change it only by prompt and effective legislation to provide adequate medical care for our senior citizens.

Mr. President, I hold in my hand a letter which illustrates the pattern. I ask unanimous consent that the letter be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

> Your support of the Forand bill, H.R. 4700, would be greatly appreciated. I am retired on social security and a small pension.
>
> At the moment I am billed for $212 at the Milwaukee County Hospital for 8 days at $26.50 a day. We live in an old house over 50 years old with no bathroom. Do I have to sell our only home, such as it is, to take care of medical bills and ask for county relief? My wife has had a stroke and will need hospital care. What will I do then? I can tell you about other people who are also in the same fix. I have looked forward all my life to retirement after working as a machinest, but at this stage it does not look very cheerful.
>
> Respectfully,
>
> ANTON ZELLER.

WASTE IN THE DEFENSE DEPARTMENT

Mr. PROXMIRE. Mr. President, this morning there appears in the Washington Post an editorial which enthusiastically supports the position which was taken by the senior Senator from Illinois [Mr. DOUGLAS] in his excellent speech early this week. The editorial points out the appalling waste by the Defense Department because of its failure to follow competitive bidding practices, and because it follows instead, far too often, the procedure of negotiated bids, particularly from a sole source.

The editorial asks for specific action by the Congress, and concludes as follows:

> Few Members of the Senate have been more vigorous in their championship of a strong Defense Establishment than PAUL

DOUGLAS. There is nothing of parsimony or pacifism in his attack on waste and extravagance. He aims to strengthen national security. The appropriations committees ought to look into his accusations with the utmost care. Congress could soundly adopt as a motto: "Billions for defense but not 1 cent for ratholes."

Mr. President, I have introduced a small-business bill designed to some extent to meet this problem. It seems to have the concurrence of most members of the Banking and Currency Committee. That bill among other things would require the Defense Department to clear with the Small Business Administration all substantial contracts to assure the best possible prospect that small business might have a chance or an opportunity to bid competitively for the contract.

I ask unanimous consent that the editorial to which I have referred be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

APPALLING WASTE

The charge of "appalling waste" leveled at Defense Department procurement practices by Senator DOUGLAS is bolstered by particularity and by the Senator's own high reputation. The charge is a serious one, and the instances cited by the Senator are altogether shocking. Manifestly, the Defense Department should be called upon for a detailed explanation. And if the explanation is not satisfactory, there ought to be some housecleaning in the Pentagon.

Senator DOUGLAS gave 10 specific examples of egregious waste—among them a set of wrenches which, he said, cost the Army $29 and could be bought from a tool company for $3.89, and a lamp socket which cost the Navy $21.10, although it could be purchased for 25 cents in retail stores. "I believe," Mr. DOUGLAS told the Senate, "that as much as $2 billion to $3 billion a year could be saved by the Defense Department and could be and should be used for planes, tanks, guns, and missiles and Marine Corps and Army combat troops if there were the will to do so."

Few Members of the Senate have been more vigorous in their championship of a strong Defense Establishment than PAUL DOUGLAS. There is nothing of parsimony or pacifism in his attack on waste and extravagance. He aims to strengthen national security. The Appropriations Committees ought to look into his accusations with the utmost care. Congress could soundly adopt as a motto: "Billions for defense but not 1 cent for ratholes."

THE COUNTRY IS WAITING FOR ANOTHER INNOVATOR

Mr. PROXMIRE. Mr. President, Walter Lippmann, who, in my judgment, is certainly in the very first rank of the commentators—in fact, I may say he is in the very first rank of the adult educators of America—has contributed to the great Life magazine-New York Times debate on the national purpose an article which is up to his brilliant standard. In the article, Mr. Lippmann declares:

We have reached a point in our internal development and in our relations with the rest of the world where we have fulfilled and outlived most of what we used to regard as the program of our national purposes.

Mr. President, I find it interesting to note that in spelling out his position on the national debate, he makes some points which are extremely pertinent for consideration by the U.S. Senate this very day, as it considers the vitally important tax bill. Mr. Lippmann asserts how important it is for us to make the sacrifices we are called upon to make, to pay the taxes that we are called upon to pay, when we are facing the challenge we face.

In the article Mr. Lippmann writes:

The innovator for whom the country is waiting will not come with a new revelation of the ultimate ends and commitments of our society. The ultimate ends are fixed. The Nation is dedicated to freedom. It is dedicated to the rights of man and to government with the consent of the governed. The innovation which is now beginning, will be in the means, in the policies and programs, by which the ultimate ends of our free society can be realized today.

Mr. Lippmann points out that—

For the first time in American experience we are confronted with a rival power which denies the theory and the practice of our society, and which has forced upon us a competition for the leadership of the world.

Mr. President, a segment of Mr. Lippmann's article which I believe most pertinent to our consideration today is as follows:

As there is no chance that our immensely formidable rival will disarm or disappear, we shall have to live in the same world with him. We shall have to devise ways of protecting our vital interests, which are worldwide, and we shall have to do this without precipitating an insoluble crisis that would generate an inevitable war.

He feels that this will demand a deep reformulation of our foreign policy and a vast reeducation of American opinion. He points out:

The competition is in the whole field of national power. It is a competition not only in military power, but in all forms of power, the power to produce wealth and the power to use wealth for education, for the advancement of science and for public as well as private ends.

On our success in achieving military security by arms and by diplomacy depends our existence. Our ability to meet the challenge depends upon our success in learning to use our growing wealth for something more than just private satisfaction. It depends upon our being willing to use it for imponderable and immaterial ends, like science, education, and the public amenities.

To use increments of our growing wealth wisely and prudently for public and immaterial ends: that is the goal, so I believe, toward which are national purpose will now be directed.

We have to pay for defense, and there can be no dispute that we must pay for it. But we have also to be able and willing to pay for the things which cannot be consumed privately, such as the education of children, the development of beautiful cities and the advancement of knowledge. We have to be able and willing to pay for what is, to put it briefly, civilization itself.

Mr. President, I ask unanimous consent that this article on the great challenge to the American people, and I think a specific challenge to the U.S. Senate on this very day, be printed in full at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE COUNTRY IS WAITING FOR ANOTHER INNOVATOR

(By Walter Lippmann)

In a rather special sense Americans have always been a purposeful Nation. For the country is settled by the descendants of people who pulled up their roots in the old societies and crossed the wide ocean for a purpose. Always they came with a sense that they would make for themselves a better life in a new world. They believed that they had new work to do and that all who saw their example would be enlightened and inspired by it.

The bond of American union has not been piety and reverence for the past but a conviction of purpose and of the destiny it would bring for posterity. America has always been not only a country but a dream. There has always been a general and unquestioned belief that here on this soil there would be demonstrated to mankind the blessings of freedom: as the shackles and servitudes of the past were put away, there would arise a great and glorious society.

And so, until very recently at least, we have looked upon it as in the nature of things that for America nothing is finished, that this is a young Nation. Americans have been a Nation of exuberant optimists, sniffing the air with a buoyant feeling that it is the early morning and that it is good to be alive. Evil and perversities of fate were not more than obstacles to be gotten at and overcome.

There were no insoluble human problems. At the worst, there were problems that it might take a generation or two to master. It never occurred to Americans to ask whether they were going to survive. They had just begun to live. Nor did they worry about the consequences of becoming rich, fat, self-centered and beset with the illusion that the present can be made to last forever. For they were not yet rich and they had to work hard for a living.

If, as so many of us think today, we are now without such a general and inspired sense of national purpose, where shall we look for the cause and the remedy?

The cause of the vacancy is, I believe, this: We have reached a point in our internal development and in our relations with the rest of the world where we have fulfilled and outlived most of what we used to regard as the program of our national purposes.

We are rather like a man whose purpose it is to cross the continent, and having started from New York he has gotten to Chicago. Which way shall he go then? There is more than one way to cross the continent, and until he has chosen which way and then has worked out the intermediate stops, he will remain in Chicago, feeling worried and without a sense of direction and of clear purpose.

The American people today are like the man who got to Chicago, who needs a new road map to show him the way from there on.

In this century, the sense of national purpose has been a composite wrought under three innovating Presidents, under Theodore Roosevelt, Woodrow Wilson, and Franklin Roosevelt. They led the country on the road which it has taken for some 50 years—since America emerged as a great power in the world, and since at home it has become an ever more industrialized and urbanized society.

Time has passed and history has not stood still. The Roosevelt-Wilson-Roosevelt formulas and policies and programs no longer fit the character of the world Americans are now concerned with, the world as it has devel-

oped since the Second World War. We are now waiting to be shown the way into the future. We are waiting for another innovator in the line of the two Roosevelts and Wilson.

The innovator for whom the country is waiting will not come with a new revelation of the ultimate ends and commitments of our society. The ultimate ends are fixed. The Nation is dedicated to freedom. It is dedicated to the rights of man and to government with the consent of the governed. The innovation, which is now beginning, will be in the means, in the policies and programs, by which the ultimate ends of our free society can be realized today.

IT IS NOT THE NATION WHICH IS OLD BUT ONLY ITS LEADERS

My thesis is that to affirm the ultimate ends—as every public man does in almost every speech—is not a substitute for declaring our purpose and leading the Nation. These affirmations are like standing up when "The Star-Spangled Banner" is played, and then doing nothing further. They beg the question, which is not wither the Nation should go but how it should get there.

The remedy, then, will not be found in the restatement of our ideals, however resounding the rhetoric. It will be found in the innovation of the political formulas, the concrete measures, the practical programs by which our ideals can be realized in the greatly changed world we now live in. I feel sure that innovators will appear with the new generation that is rising to power. For it is not the Nation which is old, but only its leaders.

Broadly speaking, there have been two great epochs in our history, each with its own dominant national purpose. The first epoch extended from the middle of the 18th century down through the 19th. Beginning with the colonial wars of the 18th century and then with the founding of the Republic, the central purpose of the American people was to open up the continental territory, to consolidate that territory firmly within the American Union and to make the territory invulnerably secure against all other powers.

In the pursuit of this purpose the American colonists fought the French and Indians. The new American Nation fought the British and the Spanish and the Mexicans and the Indians. It fought a great and terrible Civil War to preserve the Union of its territory. Officially it may be said that this epoch, during which the national purpose was to consolidate the national territory, ended in 1890 when the last of our 37 wars with the Indians was concluded.

After the turn of the century, the original national American purpose having been fulfilled, a new epoch began. It began, we may say, with Theodore Roosevelt's recognition that the United States was no longer a sheltered and semidependent nation but that, having settled the continental territory, it had become one of the great powers. Roosevelt, who was a farseeing innovator, saw, too, that the United States was no longer a rural nation of independent farmers. Increasingly, it was becoming an industrial society inhabited by great corporations which exercised powers that often challenged the authority of the established Government itself.

The innovation begun by Roosevelt was carried further by Woodrow Wilson. Wilson accepted reluctantly the burden of our being a great power. When he was forced into the First World War he attempted to define a national purpose which would reduce that burden. He began by declaring that the world must be made safe for democracy and ended by demanding that it become democratic.

This has proved to be an aspiration rather than a purpose, policy or program. For had it become a national purpose, the Nation would have found itself committed to a perpetual crusade and, therefore, to perpetual war. Nevertheless the aspiration, though it is quite unrealizable in a very great part of the world, has become an element of the American conscience. Even when we feel compelled to subsidize some of our more primitive clients the Wilsonian ideology makes us uneasy and embarrassed.

When Franklin Roosevelt became President he found himself, rather unexpectedly, confronted with the breakdown of the established economic order. Contrary also to his hope and to his expectations, he was confronted with the rise of a new thing in modern history—the monster of the totalitarian state. Necessity became the mother of invention. It demanded the improvization of a new national purpose in domestic and in foreign affairs. The innovations of Franklin Roosevelt were a grand improvization.

From the New Deal, particularly from the second phase of it when Roosevelt turned from a planned economy to a compensated economy, the present generation of Americans have inherited the formulas of their political actions. They have inherited the compensated economy and the welfare state, and no serious person in either party would now propose to repeal and undo them.

In foreign affairs, the country learned in the Second World War that it was no longer one among many great powers but that in fact it was the leading power upon which the whole Western World depended for its security and for leadership. This is a burden and a responsibility and a danger and a demand upon our resources and a test of our wisdom which the first Roosevelt and Wilson never anticipated, but which the second Roosevelt began to be aware of from about the middle of the war to the time of his death.

In the 15 years which have passed since the end of the Second World War the condition of mankind has changed more rapidly and more deeply than in any other period within the experience of the American people. There has been a swift and radical change in the balance of power in the world. Among the masses of the people in the underdeveloped countries in all the continents there is a mounting revolution. There is a radical change in the technology of war and of industry. There is in the United States and other countries a threatening agglomeration of peoples in cities. There is a menacing increase in world population. There is a development of the mass media of communication which, because it marks a revolution in popular education and in the presentation of information, and in the very nature of debate and deliberation, is affecting profoundly the assumptions of the older democratic system.

IN PART WE HAVE OUTLIVED OUR OLD PURPOSES, IN PART THEY ARE IRRELEVANT

Nobody, it is fair to say, not the most sensitive and knowing among us, is as yet able to realize fully what all these changes mean and to point out specifically how this country should deal with them. But what we do know is that the formulations of national purpose which were made in the first half of this century are now inadequate. In part we have fulfilled them. In part we have outlived them. In part they have become irrelevant because of the unexpected changes in the condition of things. In part they are out of focus. All in all, they do not now mobilize our energies.

Necessity will again be the mother of invention, and in the time to come we shall close the gap which now exists between the new realities and the old formulations of our national purpose. I do not presume to anticipate the innovators for whom we are waiting. But there is already visible, it seems to me, the shape of the land across which the innovators must lead the Nation.

Thus for the first time in American experience we are confronted with a rival power which denies the theory and the practice of our society, and which has forced upon us a competition for the leadership of the world. This challenge coincides with the radically new fact that the oceans have ceased to be our ramparts and that our land is no longer invulnerable.

As there is no chance that our immensely formidable rival will disarm or disappear, we shall have to live in the same world with him. We shall have to solve problems which did not exist for Wilson or for the two Roosevelts. We shall have to devise ways of protecting our vital interests, which are worldwide, and we shall have to do this without precipitating an insoluble crisis that would generate an inevitable war. This will demand a deep reformulation of our foreign policy, which has hitherto been, and in a great part still is, addressed to a very different world situation. It will demand a reeducation of American opinion, not only when it yearns for the lost innocence of our old isolation, but also when it plunges into a new globalism which supposes that we are omnipotent, and averts its eyes from the hard reality of the power of the Communist bloc.

TO USE OUR GROWING WEALTH WISELY FOR PUBLIC ENDS: THAT IS THE GOAL

We know, of course, that the challenge is a broad one. The competition is in the whole field of national power. It is a competition not only in military power but in all forms of power, the power to produce wealth and the power to use wealth for education, for the advancement of science and for public as well as private ends.

On our success in achieving military security by arms and by diplomacy depends our existence. Our ability to meet the challenge depends upon our success in learning to use our growing wealth for something more than just private satisfaction. It depends upon our being willing to use it for imponderable and immaterial ends, like science, education, and the public amenities.

To use increments of our growing wealth wisely and prudently for public and immaterial ends: that is the goal, so I believe, toward which our national purpose will now be directed. We have to pay for defense, and there can be no serious dispute that we must pay for it. But we have also to be able and willing to pay for the things which cannot be consumed privately, such as the education of children, the development of beautiful cities, and the advancement of knowledge. We have to be able and willing to pay for what is, to put it briefly, civilization itself.

At bottom, we have to do these things because they need to be done, because they have to be done, and because they are supremely worth doing. Even if we were not challenged, we would need to do them for their own sake. We would need to do them even if Russia were still where it was 50 years ago.

But now we are in fact challenged, and because of that we must do these civilized things, not only to make a better life for ourselves but to mobilize the power to avoid a much worse life. Were there no great rival and challenger, we might dawdle along, we might indulge in a growing private affluence while we suffered a declining national greatness. But for us there is no choice but to respond to the challenge, even though this demands that we change many of our cherished dogmas and harden ourselves to a sterner way of life. For our freedom and our system of democratic government are not likely to survive just because we believe in them and enjoy them. We shall have to prove that with them and through them we can satisfy the needs of our people

and be equal to the challenge of the time we live in.

Western freedom will not survive just because it is a noble ideal. In our age it will survive if, and I think only if, we can take freedom down with us into the hurly-burly of the conflict and prove that a free society can make itself the good society.

I should like to add a postscript to express a personal feeling about the challenge we face and the response we must make. It is that with all the danger and trouble and worry it causes us, the Soviet challenge may yet prove to have been a blessing in disguise. For without it, what would become of us if we felt that we were invulnerable, if our influence in the world were undisputed, if we had no need to prove that we can rise above a tranquil self-satisfaction?

We would, I feel sure, slowly deteriorate and fall apart, having lost our great energies because we did not exercise them, having lost our daring because everything was so warm and so comfortable and so cozy. We would then have entered into the decline which has marked the closing period in the history of so many societies—when they have gotten everything they wanted, when they have come to think there is no great work to be done, and that the purpose of life is to hold on and stay put. For then the night has come and they doze off and they begin to die.

REPEAL OF DISCLAIMER AFFIDAVIT REQUIREMENT IN NATIONAL DEFENSE EDUCATION ACT

Mr. CLARK. Mr. President, a few days ago the Senate, by voice vote, eliminated the disclaimer affidavit requirement from the National Defense Education Act. There was a wide diversity of opinion among Members of the Senate as to the effect of our action, and indeed as to its wisdom. But I have found, at least in the metropolitan dailies on the east coast, a unanimity of editorial praise for what we did.

I ask unanimous consent that editorials from the New York Times and the Philadelphia Inquirer, commending the Senate for the action it took in eliminating the requirement of the disclaimer affidavit, may be printed in the RECORD at this point in my remarks.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the New York Times, June 17, 1960]

THE LOYALTY AFFIDAVIT

It is encouraging that the Senate should vote during a presidential year to take some of the nonsense out of the National Defense Education Act of 1958. This act required a college student asking for a Federal loan to do two things: first, to take an oath of allegiance to the United States; second, to sign an affidavit that he does not support or belong to an organization that favors the overthrow of the U.S. Government by force or violence or by any illegal or unconstitutional methods.

The Senate thinks the Nation will survive if the student takes the oath of allegiance but does not sign the affidavit. The reasoning is simple. A person can't defend the Constitution and laws of the United States and at the same time conspire to overthrow them. If he belongs to the Communist Party he will tell lies anyhow. If he doesn't belong to the Communist Party, or some similar organization, it is no more sensible to ask him to say he doesn't than to ask him to say he is not a burglar, an embezzler, or a big name in the numbers racket.

An amendment submitted by Senator PROUTY, of Vermont, would still require the student not to be a member of the Communist Party and would also subject him to penalties of fine and imprisonment if he was a member and didn't say so. We don't believe this amendment will do much harm. We are not called upon to cross-examine students as to their beliefs, but neither are we under obligation to instruct Communists in the doctrines of Marx, Lenin, and Stalin.

The situation existing under the National Defense Education Act is duplicated in principle, although not in form, in this city, and probably in other city school organizations. It is brought up also by requirements established for the State regents scholarships. Whatever the details may be, there is not much sense in lipservice to what the lawmakers choose as "loyalty." And loyalty itself needs redefining. It is disloyal to try to upset a law by violence. It is not disloyal to try to get a law repealed by rolling up the necessary votes. Some of the legislators who have been trying to intimidate or annoy our students might profit by going back to school themselves.

[From the Philadelphia Inquirer, June 17, 1960]

THAT NON-COMMUNIST OATH

Although the proposition may run into some tangles in the House of Representatives, Senate action to abolish the controversial non-Communist oath required of college students who apply for Federal loans to help pay their way in colleges is a proper step.

This requirement called on students to swear they are not Communists or sympathetic to any subversive activity against the Government. Far and wide it has been protested as insulting. It has caused many leading universities and colleges to withdraw from the Federal student loan program.

It is a naive viewpoint to accept the idea that a Communist or other subversive individual would hesitate for a moment to subscribe to an affidavit disclaiming connection or association with the Reds. They'll swear to anything, without a quiver. This palpable fact has been ignored by those who have tried to defend the non-Communist oath.

To us it seems that the measure passed by the Senate, and which we hope will be passed in the House, meets requirements. It calls for an oath of allegiance to the United States and prescribes severe penalties for any Communist or other subversive who obtains a Federal student loan while concealing connections with Red or semi-Red organizations. This covers all that is needed and should eliminate the non-Communist oath from the National Defense Education Act.

TRANSPORTATION AND COMMUNICATIONS—REMOVAL OF EXCISE TAXES

Mr. BYRD of West Virginia. Mr. President, during the last session Congress enacted legislation providing for removal of the Federal excise tax levied on local telephone services and for reduction, from 10 percent to 5 percent, of the excise tax on transportation of persons by public carriers for hire, effective beginning July 1, 1960. Now, in the face of this action and in disregard of the considerations which prompted it, the administration is insisting that these taxes be continued at the full 10-percent rate, a request which cannot be justified in view of the circumstances surrounding these particular taxes. They were imposed, along with other excise taxes, as a war measure for revenue and, more important, to discourage nonessential civilian use of transportation and communication facilities, which were overburdened by vital military traffic. Emergency taxes can be tolerated even though they are discriminatory, but the emergency which brought about these taxes is long past and the temporary tax on communications and transportation of persons remains.

The tax on local telephone service was included in a general tax measure concerned with so-called luxury taxes, several items being classified as luxuries in wartime. But telephone service can hardly be called a luxury in the United States today, and it should not be subjected to the same tax as articles such as jewelry, liquor, tobacco, furs, cabaret bills, and so forth. Most people regard the telephone as a necessity today, and the Federal Government recognizes it as such, as evidenced by the large Federal subsidies paid to aid rural telephone cooperatives in order to make this vital instrument available even in remote areas.

Most of the special wartime excise taxes have been removed, but the taxes on communication and transportation of persons remain nearly 15 years after the end of the war emergency and some 7 years after the Korean emergency. Telephone service is the only household utility thus taxed as a luxury; electricity, water, and gas services are not subjected to such a tax. The telephone is not a luxury when there is need to call for police aid, for the fire department, for the doctor, or to order groceries for the family or obtain goods for a customer. If the telephone is a luxury, why not consider all utilities luxuries? We could go back to cooking over an open fire; we could dig our own wells for water and burn candles for illumination; we could exist without all public utilities. A telephone is almost a medical necessity for elderly people and people living alone, specially for local service.

In repealing the World War I tax on long distance telephone service in 1924, the House called the tax "not only a burden on business but a tax on a public utility so widely used as to be a necessity." State public utility regulatory bodies, which are set up for the protection of the public, are opposed to the continuation of this communications tax. It is in reality a third tax on users who pay the excise, indirectly pay the cost of collection, and indirectly pay taxes levied on the utility company at State, local, and National levels. Removal of this excise tax, which is paid by the consumer, would aid both the individual consumer and the general economy, and would not benefit the companies involved except indirectly through removing any deterrent to the greater use of telephone service afforded by the tax. State regulatory agencies complain that this tax is inimicable to the maintenance of reasonably priced and nondiscriminatory communication service as it adds unnecessarily to rates and charges which they have carefully established.

The 10-percent excise tax amounts to approximately $15 additional to the av-

erage telephone subscriber's annual bill. Indirectly, he also pays for the cost of collecting the tax, as well as, through rates for service, for the cost of taxes to the company. For users in most localities the Federal, State, and local tax bill amounts to one-third of every dollar spent for telephone usage.

In enacting Public Law 86–75 in June 1959 this Congress recognized that this excise tax should, indeed, be excised—that is, erased, expunged, extirpated—at least insofar as local service is involved. If any action should be taken at this time, it should be to remove the tax also from the long-distance or toll service, rather than to continue the tax on local service. I urge that the 10-percent excise tax on local telephone service be allowed to terminate on June 30, 1960, as scheduled by existing legislation.

Concerning the excise tax on transportation of persons, which is scheduled to be reduced from 10 to 5 percent on June 30, 1960, we are also facing a concerted move to prevent this reduction and continue the entire tax. While much travel might well be considered nonessential, there are still a large number of instances where trips are essential and not a luxury. This tax is levied only upon those who travel by public carrier, and was originally devised to discourage civilian use of transportation which was urgently needed for military and defense purposes. Like the communications tax, it was also an emergency or temporary tax and placed the service in the luxury-item category. The tax was installed as a war tax in 1941, both to raise revenue and discourage nonessential civilian travel, but has remained for 15 years since the end of World War II. This is in sharp contrast to the World War I excise tax on common-carrier travel, which was repealed in 1921.

The rate was reduced in 1954 to the current 10 percent level from a maximum rate of 15 percent. As amended in 1956, a tax of 10 percent on transportation of persons was levied on the price of tickets by rail, motor vehicle, water, or air, paid in the United States for travel within the United States and to points outside the United States within 225 miles of the boundary. Instead of reversing the action reducing the tax, taken at the last session of Congress, we should carry through and eliminate the entire tax, instead of only a portion of it. Some of the cogent reasons for repealing this tax on travel by for-hire carriers are submitted for the Senate's consideration.

There is no doubt of the essential and important nature of the transportation industry to the economy of the Nation and to its defense. We must utilize all our economic resources efficiently—one important way in which this can be accomplished is through full utilization and maintenance of our commercial transportation system. In the face of current concern regarding public transportation and advancement of plans to aid the industry, it makes no sense to continue a tax which discourages the use of passenger transportation facilities. This travel tax is in derogation of the national transportation policy set forth in the Interstate Commerce Act.

The future of the railroad passenger service, which was relied on for 97 percent of all organized military travel needs in World War II, and which would be vital in another war, is threatened by large operating deficiencies. The tax discourages use of these facilities and weakens an essential public carrier. A vital air service is sustained by annual subsidies, which have increased considerably in recent years. The transportation tax aggravates the subsidy problem by assessing a financial penalty which discourages travel when the use of commercial transportation should be encouraged. Additional passenger revenue would contribute toward maintenance of adequate airlift potential to augment military airlift in emergencies. Much of the apparent revenue from the transportation tax is illusory, as every dollar which must be paid in subsidy is an offset to this revenue. Revenue is further reduced by tax allowances on income—deductible business expense—for business trips. In addition, the cost of collecting the transportation tax is borne by the carriers and included in operating costs, affecting the level of fares and acting to discourage travel further. The transportation tax adds over $200 million a year to transportation costs and to the extent this applies to business travel it is reflected in commodity prices, making the tax inflationary in effect.

The tax adds to the high cost of living. Conservative estimates class one-third of passenger transportation as necessary business travel. The tax on business travel is an added cost to the business and is passed on in higher prices to consumers of the goods and services supplied. Also, to the extent the tax discourages travel by public carrier, passenger revenues are insufficient to cover costs of the service. Particularly in the case of railroads, the freight rates must be increased to recover the loss on passenger service. The higher freight rates mean higher prices for commodities.

The transportation tax discriminates against lower income families. A Michigan University study of nonbusiness travel over 100 miles found that 29 percent of the population with incomes over $6,000 spent 52 percent of the total expenditures on nonbusiness common carrier travel; 9 percent of the population with incomes above $10,000 accounted for 27 percent of the total dollars spent for commercial transportation; and the highest 1.2 percent of the population in income spent 10 percent of the total transportation dollars. The class which spends the highest percent of income on travel is the under $1,000 income group. Further discrimination occurs in the lower income group, as 3 out of 10 people in this group cannot afford automobiles and must depend on public conveyances. Those living at greater distances from large population centers are forced to pay proportionately higher shares of the tax. These people generally must select the cheapest means—bus. Low income adults are the most frequent travelers by bus, but the lower cost of bus transportation is not great enough to offset the relatively larger number of trips. If trips under 100 miles are included, the burden on the low income group is more evident. Thus, the tax is not only discriminatory with respect to this group, but it is also a regressive tax, placing the heaviest burden on those least able to afford it.

Since the tax is applicable only to for-hire transportation, it is inherently discriminatory. When the measure first became effective, there was no discrimination between competing carriers. The advantage now evident in transportation by automobile was virtually nonexistent during the war. Had the tax been repealed at the end of the war, the inherent discrimination in the tax could not have developed fully. However, gasoline and other automotive rationing were discontinued, and the tax retained, so that private transportation by automobile gained advantages. This situation discriminates against those who do not have automobiles, and are, therefore, compelled to use public transportation which is subject to the tax.

Further discrimination resulted from the amendment limiting the tax so that only travel within the continental United States and a 225-mile buffer zone contiguous to the borders is taxed. International travel is encouraged at the expense of domestic travel, and those who wish to "See America First" are discouraged, to the detriment of public carriers and also of the Nation's resort and recreational industries. Millions of dollars are spent on national parks, and so forth, for the benefit of the citizens of this country, but they and our foreign guests must pay a penalty to visit them by train, plane, or bus. All tourist industry is affected adversely by this tax, and, in addition, certain areas suffer additional handicaps because of greater distances and consequently more costly travel.

Changes in the character of intercity travel between 1946 and 1958 indicate some effects of the tax in discouraging travel by commercial means. During 1946, 27 percent of the intercity travel was by common carrier, but by 1958 slightly over 10 percent was by this method. During this period total travel had almost doubled in volume. About 90 percent of intercity travel is now by families in automobiles, a mode which is not subject to the excise tax on transportation.

The sole argument for retaining the transportation tax—that it is a source of revenue—is at best a poor one. Net returns are considerably less than the apparent yield. The amount of revenue from this source has decreased since the end of the war, and the cost of collection has increased, further reducing the amount realized. Revenue loss to the Treasury from repeal of the tax would be at least partially offset by the increase in revenue from income taxes resulting from the stimulating effects on transportation and business generally and because tax collected on business travel would be deductible no longer as a business expense. Endangering the entire transportation system of the Nation for the net amount realized from this tax is difficult, if not impossible, to justify.

The tax on transportation of persons by public carrier should be repealed because it is discriminatory, inflationary, economically unsound, and is undermining public carriers which are vital to our commerce and defense.

The excise tax on telephone service should be repealed, and no action should be taken to reverse the provisions of existing legislation for discontinuing the 10 percent tax on local service beginning July 1, 1960. Telephone service is as much a household necessity today as electricity, gas, and water. None of the other household utilities is taxed as a luxury item, and there can be no justification for continuing to tax local telephone service.

If the Government, in these prosperous times, cannot make adjustments to elimination of emergency sources of revenue, what will it do should an actual emergency arise? We should get rid of the taxes which were set as temporary and to discourage the purchase of certain classes of goods or services on the assumption that they are luxuries. We should note that a luxury tax assumes that the Federal Government has the right to decide and the obligation to designate what goods and services people need or should have, and to apply punitive taxation to those things the Government has decided the people do not need. This concept may be tolerable in times of stress and in the best interests of the Nation during an emergency, but it cannot be accepted as the basis for tax policy at other times.

Repeal of both the transportation and the communications excise taxes would stimulate the economy; the benefits would accrue to the users—the consumers—for once, and not to the owners of the facilities. Action to accomplish repeal of these taxes should be taken without delay.

THE PHILOSOPHICAL SYSTEM OF HEGEL

Mr. MURRAY. Mr. President, I ask unanimous consent to have printed in the RECORD a lecture entitled "The Philosophical System of Hegel," by the Reverend Francis J. Conklin, S.J.

There being no objection, the lecture was ordered to be printed in the RECORD, as follows:

In this lecture we will be concerned with the philosophical system of Hegel. Hegel must be comprehended if we are going to penetrate Marx. But make no mistake about it: Hegel is difficult. There are no short cuts. Yet, if we have the patience and determination to stick with Hegel we will find that while studying and analyzing his works we are in contact with one of the finest minds in history. After Hegel we are all Hegelians. His brilliant and penetrating insights into the real world are at times overwhelming.

Terminology remains the major obstacle to comprehension of Hegel's philosophy. Let us begin by spelling out in some detail the terminology that Hegel employs.

For Hegel "the absolute" means a necessary being moving to complete self-consciousness. Pause for a moment and break down that definition because we will have occasion time and time again to refer to this absolute. A necessary being is one which cannot not exist. Hegel's absolute, unlike the Christian God, is an imperfect being because it is moving to further perfection—to complete self-consciousness.

The many beings which we see around us are manifestations of this one absolute. So what really exists? This absolute alone really exists. The word "reality" for Hegel refers to that which alone is absolute and ultimate being; that which produces the world out of itself; that which is independent; that which is universal. Reality contrasts with existence, because existence denotes the individual; that which is not universal; that which is present at a particular time or place; that which is dependent, individual, and limited.

Let us try to illustrate Hegel's expression of the truth with a simple example. If you look here at this table you can understand it under two quite distinct aspects. Regarding only this existing table means considering the object in a static moment of its existence. This means confining our observations to the present static moment.

Hegel designates the present, static moment "existence." But "reality" includes everything—past, present, future. Thus, for Hegel, it is only a partial truth to say, "This table exists," for this statement comprehends only an isolated, individual existence.

The whole truth about this object is properly expressed only when we consider the tree that was and the ashes that will be. The whole truth expresses not only the present but the past and future as well.

The immediate consequence of this—and it is a subtle insight—is that not "being," (for being expresses only what is here and now) but "becoming" (that which expresses both what is and what is not) correctly expresses the whole truth of the past, present, and future. Becoming, therefore, is the best expression of thought because only thought can unite past, present, and future. Only thought can reflect reality as reality truly exists.

We must continue to emphasize the dichotomy between reality and existence. Reality is not existence. Reality is universal; logical being; thought; objective mind; the source of all. Existence is singular; limited; particular; a mere appearance; shadow rather than substance.

We know from our personal experience that the human mind moves by necessity with a logical progression. Our mind necessarily makes progress. For example, we say: "All men are mortal"; "John is a man." Of necessity we must make the next step and say that "John is mortal." The human mind cannot hang balanced on the precipice of a logical conclusion.

We have already seen that only thought adequately expressed reality because only thought can comprehend the elements of reality: past, present, and future. Human thought moves forward with logical necessity. Consequently, reality makes progress in the same fashion. In other words, the real world of necessity relentlessly, tirelessly, dynamically moves forward. Progress is the key to understanding the real world.

Hegel expresses this thought in a much more complicated way in reference to the eternal philosophical problem of knower, object known, and the act of knowing. Hegel correctly states that dialectical opposition, or contradictory opposition is the fundamental law of all thinking. One may say, "God exists," another says "God does not exist." The real truth is a synthesis of these two contradictory opinions. Both must modify their opinions to arrive at the truth. The new synthesis of contradictory ideas is richer, truer, and more conformed to the real world.

As we have already seen, the thought process or rational process is a dynamic process that cannot be retarded nor stopped. Hegel explains the reason for the irresistible force of logic in the cryptic phrase "opposites are identical."

The "concept of being" is certainly the most abstract of all philosophical concepts. This refers, of course, to the logical notion of being which so delighted the scholastic philosophers for a number of centuries and which is arrived at by a complicated series of abstractions and precisions. If you begin your research into being with a real man and make logical precisions by using progressively lower common denominators such as "animal," "living," "today," "substance," etc., you finally arrive at the lowest common denominator of all—the abstractissima notio entis—ews ut sic—the logical concept of being. This abstraction has the widest possible extension since it is applicable to all that is or can be; but it has the narrowest comprehension.

According to Hegel, this notion of being pertains to everything and at the same time is so narrow in comprehension that it is devoid of meaning. "Being" thus means nothing. In other words, being contains its own negation. The old principle of contradiction that was so much in vogue among the scholastic rationalists states that a thing cannot be and not be at the same time. Hegel has shown that the very notion of "being" demolishes this principle. Consequently, only becoming expresses the truth of being. Being plus nonbeing coexist only in becoming, because becoming both is and is not at the same time.

To explain the real world in which we live, Hegel begins with the absolute idea. This absolute idea is the idea in itself potentially capable of knowing itself. To know itself a thing must have an object. Since this absolute idea is the only thing which exists, it must objectify itself for knowledge to be possible. This objectification is nature, the idea outside itself. The synthesis or unity of knower and known comes about when the absolute idea knows itself. This is called absolute spirit, or the idea in and for itself.

This terminology permeates Hegel's writings. We have here a true dialectic. Step one is the thesis, step two the antithesis, step three the synthesis. Reality, or the absolute idea, grows by a dialectical process, by a contradictory clash between opposites.

Where does man fit into the process of development of the absolute idea? We know that man alone is fully conscious. Man alone reflects. Only man knows his own nature. Therefore, in man the absolute idea arises to a knowledge of itself. "Man" does not mean a single individual person. "Man" means a whole people and Hegel insists continually upon this collective consciousness. He calls it the "volksgeist," the spirit of a people.

This history of mankind relates the story of this process, whereby the absolute idea achieves a fuller and fuller consciousness of itself. Absolute idea becomes absolute spirit; it becomes in and for itself.

Freedom for man is the consciousness of this necessity. The absolute idea alone is necessary. The absolute becomes conscious of itself and this is a consciousness of necessity. Consequently, man is free only when he is conscious of the inevitable necessity which powers the absolute. (In Christian terminology we would say that Hegel's absolute idea enjoys God's freedom.) For Hegel, history is mankind's march toward this realization of the absolute's necessity—in other words, mankind is marching toward the freedom enjoyed by God.

Man can be considered under two aspects: he is both the citizen and the person. In the citizen's role man is ordered; his freedom is organized by the almighty state. The state is the highest conscious embodiment of law and order, because the state constitutes the highest objective form of the absolute idea which underlies everything. This state allows the person to develop and

despite the external regimentation by the state man develops a true internal liberty. Within the human person transpires the true development of the absolute when the human mind expresses itself in religion, art, and philosophy.

(Before proceeding further into Hegel's philosophy of history let us pause for a moment and emphasize the obvious. Hegel is a pantheistic rationalist. He is an objective idealist. He does not regard the world as the creation of the human mind, for this would make him a subjective idealist. Hegel believes that the world is the creation of a pantheistic objective mind.)

We come now to the spiral of historical development. History must be analyzed in terms of citizen and state; then the person, i.e., religion, art, philosophy. We begin with the political childhood of mankind in the oriental political state. In early China there existed a paternal form of government and a picture language; in India a mystical caste system. Both nations vacillated between despotism and political chaos. This is the infant stage of the absolute objectifying itself as a state and restraining the citizen.

By the time of the Graeco-Roman period, aristocratic democracy and individual freedom have begun to make an impact. There is a more mature unity—and emphasis upon universal law. In western Europe during the Christian Middle Ages complete external unity between the church and state develops, solidifies, and passes on to posterity the impressive unity nascent during the Graeco-Roman era.

But the world does not stop. The Reformation emphasizes that man is free to worship as he pleases. Priesthood is abolished because all men are equal. The political consequence of such equality permits all small equal states to form a new synthesis. This new unity flowers under the supreme individual who is the monarch.

(N.B.—We are lightly tracing an outline of Hegel's philosophy of history, and this analysis is in no sense complete. We select examples from his writing to illustrate his trend of thought but like all random examples they can be misleading if you have not yet read the originals.)

As history flows relentlessly onward the present always contains the best of the past. Thus, during the Graeco-Roman period society organized and ordered itself in contrast to the oriental chaos. But the unity allowed diversity and some individual freedom. In western Europe moving toward the Reformation a highly organized society restricted individual liberty until the Reformation firmly reestablished the principle of individual freedom. In Hegel's own day the supreme individual, the monarch, divinely embodies law and order, yet all his subjects share in equal rights. This contrasts with Greece and Rome where only the select few enjoyed democratic civil rights. Briefly, the best of the past is summed up in the present and the present prepares to develop again into a higher synthesis in the future.

Moving into the field of art we find oriental art mysterious and penetrated with unconscious symbolism. This reflects the absolute's initial effort to reach out for the infinite. The Graeco-Roman period accentuates nature once again, so that gods become men and men become immortals. For this reason, the sculpture of ancient Greece is serene, polished, finished. Hardly has this art firmly established itself when suddenly Gothic art bursts upon the world to express man's aspirations toward the infinite. In Gothic architecture the mind is soaring, aspiring, attempting by falling short of completion. This reflects the eternal quest after the infinite and, as a higher state, embodies the best of the mysterious elements of oriental art.

The historical process does not stop here. In the new synthesis romantic art with its accent upon adventure, romanticism, love, and loyalty combines the emphasis upon man and nature found among the Greeks, with the striving after the infinite, the striving after love which characterized oriental and Gothic art.

The antithesis of art is religion. In oriental lands we discover a natural religion. In China and India religion reflects a nature which is infinite and monstrous. In Persia good and evil struggle for control of mankind. In Syria there are the dying and rising gods of winter and spring. In Egypt the accent is upon the mysterious and unknowable. These religions correspond to the despotic chaotic political situation and the inexplicable symbolism expressed in the art and architecture of the period.

Judaism accentuates the infinite and the transcendent. Jewish art is unproductive and sterile. It fails to capture the imagination of the world. Thus, the Jewish religion yields to the Hellenic and Roman anthropomorphism. God becomes man; gods are brought back to earth and, in Rome, these very gods rule the state.

The Christian religion synthesizes the best of everything that has preceded. The Father in the Trinity symbolizes the essential unity of the absolute. The Son emphasizes the absolute developing itself. By the generation, passion, and resurrection suffering is conquered and the absolute is enriched. Then arrives the synthesis called the Holy Spirit. Here the absolute is reunited through this outpouring of the Holy Spirit and we learn that the world is good in spite of evil.

Finally, religion and art clash and produce in the finest growth of the human mind—philosophy. Philosophy unfolds itself in the same dialectical pattern down through the ages. However, as graduate students of philosophy you are certainly capable of reading Hegel's lectures on the history of philosophy without further assistance.

Before concluding, a few other points should be emphasized: For Hegel, the individual is a hero or victim according to the relentless caprice of the historical process. History's cunning reason uses men and circumstances for the enrichment of the absolute. Like the flotsam and jetsam tossed about by the waves, some men are carried to the crest of historical prominence, others are crushed to powder upon the sands of time, while history flows relentlessly onward.

Hegel's philosophy of history can be ultra conservative or violently revolutionary. Immediately after his death his followers split into the leftwing Hegelians and the right wing. Hegel has proved that the present culture, the present state, the present institutions crystallize and embody the best of the past. This pinnacle of perfection was not achieved without hard won successes and the conservative is dedicated to the preservation of the status quo which embodies this success.

At the same time, in Hegel, nothing is ever final. There is no quiescence because something more perfect lies just beyond the horizon. The real alone is rational. The present culture must give way to progress. The present will soon be anachronistic. What is anachronistic has ceased to be rational and will soon cease to be real. Needless to say, the leftwing favored this radical interpretation.

When Hegel died in 1831 Marx was only 13 years old. However, as we shall demonstrate in subsequent lectures, Hegel had a profound influence upon Marx. It is quite impossible to comprehend the philosophy of communism without coming to grips with Hegel. The technical designation given to the philosophy of communism is dialectical materialism. The dialectic comes from Hegel. We will endeavor to uncover the sources of Marx's materialism relying upon your reading of Marx's works.

Mr. JOHNSON of Texas. Mr. President, has morning business been concluded?

The PRESIDING OFFICER (Mr. BYRD of West Virginia in the chair). Is there further morning business? If not, morning business is concluded.

Mr. JOHNSON of Texas. Under the order of last evening, I understand the first order of business this morning is the call of the calendar. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. JOHNSON of Texas. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that further proceedings under the call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

FRIENDSHIP FOR JAPAN'S PEOPLE

Mr. JAVITS. Mr. President, I notice from the morning press Moscow is describing the Tokyo affair as a diplomatic catastrophe for the United States comparable to the downing of the U–2 plane and the blowup at Paris. It is also rumored from Washington that a reassessment of United States ties with Japan are being considered here. We are also advised the Senate will consider the United States-Japan mutual security treaty next week.

In that connection, I should like to agree with the majority leader for what I consider to be a very wise decision in taking this matter in pace and in stride, rather than under any pressure. That is the fundamental attitude I had in mind to speak of today.

We are bound to have stormy seas as we experience world power. Confusion and excitement are typical on any battlefield—even one in the cold war—as anyone knows. I hope very much the American people and the Congress will hold steady at just this point. The Communists have not succeeded in their chosen aim to wreck the free world through fracturing it, and they must not be permitted to do so.

The Japanese people will yet have their opportunity to register their views upon this situation and to give some new mandate to their government. Indications already have shown there is likely to be a new national election in Japan very soon.

I am deeply confident, Mr. President—and the whole postwar history of the Japanese shows it—that the Japanese people will choose to further pursue democratic government. I believe the Japanese are not prepared to reject their form of government at the bidding of street mobs. I believe the Japanese place a high value upon their new-found friendship with the United States and

they will, if given an opportunity, further cultivate and develop this friendship. This has been the whole postwar history of the United States-Japanese relationships.

Mr. President, we have done on the whole well. In fact, even in respect to trade with Japan, which has been one of the very sensitive points in our relations since the end of World War II, we have with some exceptions held our own.

Japan is the most productive industrial nation in the Far East. The technology of Japan is equal to the technology of the other free world industrialized nations.

Mr. President, this is all a part of the Communist effort to weaken the free world by dividing it economically. We should not forget that Mr. Khrushchev, at the National Press Club, defined the phrase, "We will bury you," as meaning "We will bury you economically."

While competition from Japan is felt in the world markets, Mr. President, any businessman who is feeling that competition should think of what would happen to him if the economic and productive machine of Japan were in the hands of the Communists, or if the economy of Japan were being directed by the Communists to the disadvantage of the entire free world.

Mr. President, based upon my own knowledge of this subject, I know of no single factor which is more dangerous or more threatening to the economy and the trade of the entire free world than the control of Japan by the Communists.

This is a time for extending the hand of friendship of the American people to the Japanese people, in an hour of their greatest trial. I speak these words to articulate this friendship and this understanding.

DOES KHRUSHCHEV KNOW WHAT HE IS DOING?

Mr. WILEY. Mr. President, once in a while, at least, we obtain some valuable information from the European papers. I have in my hand an answer to the question, "Does Khrushchev Know What He Is Doing?" published in an article in the German News, Trifstr., Munich. It is a very fine answer to the question, which concludes with the thought:

All this goes to show that the Sverdlovsk incident—

That is the U–2 incident—

was not the cause of the new tension but merely a means in psychological warfare. The Soviet leader obviously wants to make full use of Russia's present military might. He is out to "solve" the Berlin and German question by signing a separate peace treaty with the Pankow puppet regime and to gain control over West Berlin. He is convinced that the Western Powers will not start a war over the former German capital and will go as far as his own judgment will allow him to.

The interesting part of this news release is the fact that it sets up in detail the incidents prior to the U–2 incident and coincides with the conclusion which most of us have arrived at, after listening to the evidence, which is that when Khrushchev went to Paris he had his mind made up to blow up the conference. That he did.

Of course, the recent incidents in Japan simply demonstrate that what Khrushchev did at Paris would be the pattern throughout the globe, wherever he could raise the issue of the West against the Communist bloc.

Mr. President, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DOES KHRUSHCHEV KNOW WHAT HE IS DOING?

The latest development of Soviet-American relations and Khrushchev's refusal to take part in the summit conference have brought up a number of questions. Why did the Soviet Premier change the course of his foreign policy after having worked steadily for a summit meeting for 2 years? Is Peiping behind it all? Is Khrushchev under pressure by the Stalinist wing of his party or by Soviet military leaders? The answers to all these questions are rather simple: There has been no change of Soviet foreign policy and Khrushchev is under no pressure. He is not the spokesman of a democratic body but a dictator with unlimited powers. And the Soviet Premier knows exactly what he is doing.

Most observers believe that the plane incident of May 1 was the turning point in East-West relations. A close review of Soviet propaganda, however, will show that the present state of affairs was psychologically well prepared some time ago. The following phases of Soviet propaganda, which always reflects the trend of Soviet policy, are also an indication of continuity in Moscow's foreign policy:

1. The campaign to defame German expellee leaders and organizations, the Bundeswehr and the West Berlin administration (1958–60).

2. The "peace and coexistence" campaign linked with violent attacks on the German Federal Republic and "Nazis, militarists and revengists in West Germany" (all through 1959).

3. Propagation of the "spirit of Camp David," praise for President Eisenhower and Vice President Nixon with a parallel campaign to defame George Meany, Walter Reuther, Nelson Rockefeller, and others as "war mongers and enemies of peace" (since Khrushchev's visit in the United States).

4. Attacks on Nixon and Herter, but not on President Eisenhower (March, April 1960).

5. The plane incident of Sverdlovsk and Khrushchev's speech before the Supreme Soviet (May 1–4, 1960).

6. Attacks on the United States, President Eisenhower and the whole U.S. administration (shortly before and during the summit meeting at Paris).

7. Khrushchev's violent attacks on President Eisenhower and Chancellor Adenauer (June 3–5, 1960).

All this goes to show that the Sverdlovsk incident was not the cause of the new tension but merely a means in psychological warfare. The Soviet leader obviously wants to make full use of Russia's present military might. He is out to solve the Berlin and German question by signing a separate peace treaty with the Pankow puppet regime and to gain control over West Berlin. He is convinced that the Western Powers will not start a war over the former German capital and will go as far as his own judgment will allow him to.

ORDER OF BUSINESS

Mr. PROXMIRE. Mr. President——

The PRESIDING OFFICER. Under the order entered yesterday the Senate will proceed to the consideration of bills on the calendar to which there is no objection, commencing with Order No. 1556.

Mr. CLARK. Mr. President, a parliamentary inquiry.

Mr. GORE. Is the Senate not in the morning hour?

Mr. PROXMIRE. Mr. President——

The PRESIDING OFFICER. The clerk will state the first measure on the calendar.

Mr. CLARK. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. CLARK. Morning business has not been completed. What is the order which stops morning business?

The PRESIDING OFFICER. Morning business has been completed.

Mr. CLARK. Mr. President, Senators were on their feet seeking recognition for morning business. The Presiding Officer did not declare that morning business was concluded.

The PRESIDING OFFICER. The morning business was concluded before the quorum call.

Mr. GORE. Mr. President, I ask unanimous consent that the morning hour may be extended until the junior Senator from Wisconsin [Mr. PROXMIRE] and the junior Senator from Tennessee have 2 minutes each for morning hour business.

Mr. JOHNSON of Texas. Mr. President, I have no objection. I was not aware that morning business had been concluded. I wish to make a statement, when it has been concluded, before the calendar is called, so I hope the request will be agreed to.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee? The Chair hears none, and it is so ordered.

PUBLIC DEBT AND TAX RATE EXTENSION ACT OF 1960—PROPOSED AMENDMENT

Mr. GORE. Mr. President, I send to the desk for printing an amendment to the revenue bill, H.R. 12381, and ask that it be printed and lie on the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GORE. Mr. President, the amendment conforms to the recommendations of the Under Secretary of the Treasury in a letter which he submitted to the Honorable HARRY F. BYRD, the distinguished chairman of the Senate Committee on Finance, on April 1, 1960. I wish to read a portion of the letter which relates to the amendment I have presented:

The present long-term capital gains treatment accorded to lump-sum distributions by qualified plans at termination of the employee's service or at his death should be removed. Instances have come to our attention where employees have received lump sums in excess of $800,000 taxable at capital gains rates. These lump-sum distributions

are not true capital gains and the present capital gains treatment seems to have been extended to them primarily to mitigate the impact of the progressive tax rates on sums which have accumulated over long periods of time. This aim would be served better by providing some form of direct averaging treatment for these lump-sum distributions, such as would be provided by H.R. 10 for lump-sum distributions received after the age of 65.

Mr. President, under existing law there is no limit to the number of corporate pension plans from which an individual may benefit. Evidence was presented to the committee that some individuals are beneficiaries of many corporate pension plans. Therefore it becomes, not a matter of providing an annuity for retirement, but a device for tax avoidance. Therefore, to close this loophole I have offered an amendment, which is in conformity, as I understand, with the recommendation of the Treasury Department, and it is one of several sources of additional revenue which I shall propose during the course of this discussion.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. CLARK. Mr. President, I suggest the absence of a quorum.

Mr. JOHNSON of Texas. Mr. President, will the Senator do me the courtesy to withhold his suggestion?

Mr. CLARK. I shall be happy to do so.

Mr. JOHNSON of Texas. Mr. President, we have arranged for a calendar call. We have planned to go over a number of private bills to which there is no objection by any Senator on either side of the aisle. They are bills which Senators are very anxious to pass.

There is yet to be acted upon a conference report on appropriations for Treasury-Post Office, a conference report on the Labor, Health, Education, and Welfare appropriation bill which has not been acted upon, the State, Justice, and Judiciary appropriation bill has not been reported yet; the Independent Offices bill has not been considered; there is the legislative appropriation bill; the public works appropriation bill; the military construction appropriation bill; the minimum wage bill; the medical plan for the aged bill; the space authorization bill; the mutual aid appropriation bill; the coal research bill; the conference report on aid to education, housing, and farm bills.

Since we have all those matters to be considered, I hope that we shall try to expedite the routine business of the Senate, and let the leadership follow through with its plans in the normal, routine way.

It is difficult to get live quorums on Saturday morning at 10 o'clock. All Senators know that. It is not necessary. Most of the Senators, except the authors of the bills, are not interested in the individual private bills. They have been printed on the calendar. Every Senator has had ample advance notice of them. A live quorum at this time of the morning could do nothing except cause delay.

I hope that the Senator from Pennsylvania will permit us to proceed with the call of the calendar of private bills, and then start his motions in accordance with his statement to me last night that he was going to filibuster this bill.

I am prepared to keep the bill (H.R. 12381) before the Senate for a reasonable time, and then to take it down and let it be the responsibility of the Senator from Pennsylvania from there on. We have other bills upon which we must act, and this bill is not going to keep the whole program back. If necessary, we will take this bill down after the Senator from Pennsylvania has won his point. He can filibuster the bill and keep other Senators here, and we will proceed to other bills and come back to this one shortly before the deadline, and if it is not passed then, the responsibility will not be ours.

I hope we can proceed with the calendar call without the necessity of having Senators, some of whom were here as late as 3 o'clock this morning, called from their homes.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. Yes, I yield.

Mr. CLARK. I have no desire to be any more stubborn than I probably have been already. I should like as much as possible to cooperate with the distinguished majority leader, for whom I have such high respect.

I have no desire to curtail the calling of the calendar. I have not the slightest desire to rout out of bed young, middle-aged, or elderly Senators who are no doubt at this moment sleeping the sleep of the just, having labored in the vineyard far into the evening, and, indeed, into the early hours of the morning.

If I could have some understanding with my good friend from Texas that if I do not persist in my request for a quorum call at this point, he would permit us to go home at a reasonable hour tonight—let us say 10 p.m.—and if the bill which he was so insistent upon calling up last night has not then been disposed of, I would be only too happy to cooperate with him.

Mr. JOHNSON of Texas. Yes, the Senator can lay down his terms exactly. He has been doing so since this session began. He started by telling us how many Senators ought to be members of the policy committee, how many ought to be members of the steering committee, what bills should be scheduled for consideration, when, and how. He told us yesterday when the bill presently under consideration could be brought up and what preliminary moves should be made.

Now he wishes to set the time that we shall adjourn tonight. I accept the Senator's wish because I wish to transact the public business, and if such agreement will expedite that purpose, I will give him my assurance that we will move at 10 o'clock this evening to go over until Monday.

I hope that action on the pending bill will be completed. If it is not completed, then we shall proceed to some other legislation on Monday, and we shall take up the pending legislation at a later date which I trust the Senator's judgment will show is good, and we can pass the measure then without too much trouble. But I wish to give the Senate an opportunity to act upon it if the Senate wishes to do so, and I want each Senator to have an opportunity to offer any amendments he wishes to present, and we can discuss them, table them, or pass upon them. But the best way to do so is to get on with the bill. That is what I wish to do.

We spent an hour or so last night talking in general terms about procedures and if the Senator wants assurance that we adjourn tonight at 10 o'clock I can give him that assurance.

I say to all Senators that the Senator from Pennsylvania, as a condition for withholding his request for a live quorum call before we call some private bills for consideration, insists that we must adjourn at 10 o'clock this evening. We will do so. As a matter of fact, I had intended to ask the Senate to adjourn earlier than that anyway, because I think that is a pretty late hour.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield.

Mr. CLARK. Mr. President, I do not think any useful purpose would be served by a public continuation of this colloquy. I am happy to hear my friend say that he does not intend to press this bill through tonight and into the morning hours of Sunday.

Mr. JOHNSON of Texas. I have never had any intention to hold a session on Sunday. That has never been done. Anyone who is familiar with the Senate knows that the leadership never schedules matters for Sunday.

Mr. CLARK. Mr. President, will the Senator yield further?

Mr. JOHNSON of Texas. I yield.

Mr. CLARK. Mr. President, I reiterate that I do not think any useful purpose will be served by continuing this colloquy. It takes two to make an argument. I am not prepared to get into one.

I can only say to my good friend the majority leader that I am happy to hear his announcement that we will adjourn at least by 10 o'clock tonight. As far as I am concerned, I would be only too happy to adjourn at an earlier hour, but I leave that to the good judgment and wisdom of the majority leader.

Mr. JOHNSON of Texas. I appreciate the Senator's generosity.

Mr. CLARK. Mr. President, will the Senator yield further?

Mr. JOHNSON of Texas. I yield.

Mr. CLARK. It would be my hope that we could have quite a full discussion of the bill during the course of the day and evening.

Mr. JOHNSON of Texas. That is what I am trying to get to as quickly as we can.

Mr. CLARK. Mr. President, will the Senator yield further?

Mr. JOHNSON of Texas. Yes; I yield.

Mr. CLARK. Reference has been made to a statement which I made to the majority leader yesterday, which, frankly, I say to my colleagues in the Senate, I now regret I made. It was that I felt it may be necessary to filibuster against the bill.

Mr. JOHNSON of Texas. The Senator went further than that. The Senator told me that if I brought up the bill we would split the Democratic Party wide open. I considered that the biggest piece of legislative blackmail that I have seen in 30 years.

Mr. CLARK. Mr. President, will the Senator yield further?

Mr. JOHNSON of Texas. Yes; I yield.

Mr. CLARK. I still refuse to be drawn into an argument with my friend from Texas, if he wishes to reveal what went on between us in what I considered to be a private conversation.

Mr. JOHNSON of Texas. I know nothing about secret conversations. The Senator started relating it last night on the floor.

Mr. CLARK. Mr. President, will the Senator yield further?

Mr. JOHNSON of Texas. Yes; I yield.

Mr. CLARK. Again I do not wish to be drawn into further colloquy with my friend from Texas.

Mr. JOHNSON of Texas. Then why does the Senator continue? Why does he not give us an opportunity to go on with the bills on the calendar?

Mr. CLARK. Mr. President, will the Senator yield further?

Mr. JOHNSON of Texas. Yes; I yield.

Mr. CLARK. I am glad the majority leader has indicated that he will not hold the Senate in session until later than 10 o'clock tonight. I hope he will let us go home earlier. However, I am prepared to stay here until 10 o'clock, if necessary, in order that the bill may be fully discussed.

In view of the assurance of the majority leader, which he has so graciously given, I wish to assure him that I will make no further objection to the continuation of the business of the Senate, which is to be call of the calendar.

Mr. JOHNSON of Texas. I thank my friend for his courtesy.

Mr. GORE. Mr. President, will the Senator from Texas yield?

Mr. JOHNSON of Texas. Yes; I yield.

Mr. GORE. First, I indicated to the assistants of the able majority leader that I had no objection to the bill being called up either last night or today.

Mr. JOHNSON of Texas. Would the Senator from Tennessee permit me to ask him to tell me whom he is talking about? He uses terms like "assistants." We have a great many assistants.

Mr. GORE. I was referring specifically to Mr. Baker.

Mr. JOHNSON of Texas. He is the secretary to the entire majority. He is not my assistant; he is the assistant to all the Democrats.

Mr. GORE. I was not trying to be technical or precise.

Mr. JOHNSON of Texas. I am, since there is some difference of opinion about whom he talked to last night. Someone talked to the pages. Someone talked to someone else. Someone had assurance that the bill would not be brought up until Tuesday. I wanted to know to whom the Senator was referring.

Mr. GORE. The only point I wish to make is that I had no objection to the bill being called up yesterday or being called up on Monday. As the able Senator knows, it is a matter of considerable technical effort to prepare amendments to the bill. My staff was working into the evening preparing amendments in order that I could get them submitted and printed for the consideration of the Senate. The distinguished chairman of the committee, my friend and friend of the majority leader, of course, the Senator from Virginia [Mr. BYRD] came by and said that the bill would not be called up until Tuesday. I immediately went to the telephone and called my staff members and said, "It will not be called up until Tuesday. So you may discontinue your labors until tomorrow."

They turned out the lights in the office and went home.

I have submitted an amendment for printing, and my staff is now preparing two more amendments for submission and printing. I bring this up to illustrate the difficulty involved in the consideration of the bill and amendments thereto. Three of my amendments have been submitted and have been printed, and are at the desk for consideration. I only suggest this to the majority leader to indicate the difficulty I have in presenting amendments. I appreciate the difficulty of the leadership in these closing days—perhaps closing days—but I know that there were changes back and forth as to whether the bill would be called up last night or yesterday.

Mr. JOHNSON of Texas. Will the Senator——

Mr. GORE. Just a moment. I am only relating what happened, and I seek to place no blame anywhere.

Mr. JOHNSON of Texas. I understand.

Mr. GORE. I know that later the distinguished chairman understood that the bill would be called up yesterday. I am only relating this for the information of the Senator from Texas and the Senate.

Mr. JOHNSON of Texas. I thank the Senator for his information. I understood his general position yesterday, and he has related it today, although I think that he indicated he preferred that the bill go over until next week.

Mr. GORE. No, I do not think I did that. I do not believe I did that.

Mr. JOHNSON of Texas. That was the information I had. It may be incorrect. I thought the Senator felt that he would like to have a meeting on Tuesday, and the caucus suggestion was made——

Mr. GORE. What the Senator refers to, I believe, is an indication of my preference, or, rather, a suggestion. I thought it might be in the interest of harmony to do so, but that was not an indication of my personal preference. I coupled with it my statement that the bill could be called up at any time so far as I was concerned.

Mr. JOHNSON of Texas. If the Senator did not express a preference, I was mistaken. However, we are ready to take it up. There was never at any time an indication that I would take the bill up on Tuesday. We had planned to take it up on Saturday. I told the Senator from Virginia [Mr. BYRD] to make his personal arrangements so that we could take it up on Saturday. I thought he understood clearly that we wanted to take it up on Saturday.

After that was general information for 3 or 4 hours, we were served with a letter, privately delivered, stating that the writers planned to have a caucus on Tuesday at 12:30 o'clock, and would I please call it. That threw everything out of gear. I took that letter to the Senator from Virginia and to other Senators, and I consulted them about it.

Even the signers of the letter interposed no serious objection. Most of them realized that since we had scheduled it for Saturday and since it had a deadline, that if we added amendments to it and it had to go to conference, the sooner we got to discussing it and the amendments, the better off we would be. After I had talked to all of them, and realizing that in my opinion with one exception—the exception being the Senator from Pennsylvania—the membership on both sides of the aisle was ready to proceed to debate the bill. I thought that we would call the calendar first and then proceed as quickly as we could to debate the bill.

I was told it would be held up because some Members were out of town.

The RECORD should show that I am not responsible for Senators being out of town. I had an engagement today, too. I have to be here. I do not believe that any one or two Senators ought to be used as a vehicle for delaying public business because some Senators are out of town. I was told that would be done, because certain Senators who would vote this way or that way on a certain amendment were out of town and wanted to be present when we voted, so there would be a filibuster. If there is, I want it to be on someone else's hands, not mine.

If any Senator has amendments and wishes to call them up, we will stay here and act on them as expeditiously as we can. If we cannot conclude them, and have to proceed to the Japanese Peace Treaty, or some other measure, we will do so, and return to this measure whenever we can. But I think we ought to use today as profitably as possible.

Mr. GORE. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield.

Mr. GORE. I am prepared to proceed and am ready to proceed. What I wanted to call to the Senator's attention and to the attention of the Senate is that because of the circumstances last evening, a very important amendment which has been recommended to Congress by the Treasury Department, and which would bring in considerable additional revenue to offset some of the additional appropriations which Congress has made, and for which I voted, has just been submitted. I would not want to have criticism of the amendment made that we have no printed copies of it. I call this to the Senator's attention, to illustrate the difficulty of rushing a bill of this importance through the Senate on Saturday night, when important amendments have not even been printed.

Mr. JOHNSON of Texas. There is no attempt to rush anything through. If we are ready to proceed, let us proceed.

I think I understand the attitude of the Senator from Tennessee. I want to proceed to the consideration of the bill. I want to have it discussed. I am not trying to rush any bill through, although I may say that several amendments were added to the defense appropriation bill which were not printed the day before. One of them, suggested by the Senator from Pennsylvania [Mr. CLARK] involved a large sum of money for the Marine Corps. He pulled that one out of the air pretty quickly. Those things have been done. However, I have no desire to rush; I simply have a desire to get on with the business.

Mr. GORE. I am ready.

Mr. JOHNSON of Texas. I hope the Senator from Tennessee will use his influence with his deskmate.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield.

Mr. CLARK. Is it the intention of the Senator from Texas to have a quorum call following the call of the calendar?

Mr. JOHNSON of Texas. Yes. I have notified each Member of the Senate and have said that the Senator from Pennsylvania desired a live quorum before the calendar call. I appreciate the Senator's withholding his request. That is why a number of Senators are in their seats this morning. I think most of the Senate wants to cooperate with the leadership. I think most of them will. If Senators have amendments they want to have considered on the merits, I hope they will call them up and let the majority prevail. We will call the roll.

CALL OF THE CALENDAR

The PRESIDING OFFICER. The call of the calendar will begin with Order No. 1556.

AMENDMENT OF WATERSHED PROTECTION AND FLOOD PREVENTION ACT

The bill (S. 3383) to amend section 4 of the Watershed Protection and Flood Prevention Act was announced as first in order.

Mr. JOHNSTON of South Carolina. Mr. President, a similar bill passed the House. It is Calendar No. 1587, H.R. 11615. The amendment of the Committee on Agriculture and Forestry to S. 3383 makes the Senate bill identical with the House bill. Therefore I ask unanimous consent that the Senate proceed to the consideration of the House bill and pass it, instead, so that the action can be completed.

The PRESIDING OFFICER. The House bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 11615) to amend section 4 of the Watershed Protection and Flood Prevention Act.

The PRESIDING OFFICER. Is there objection to the present consideration of H.R. 11615?

There being no objection, the bill was considered, ordered to a third reading, read the third time, and passed.

The PRESIDING OFFICER. Without objection, Senate bill 3383 will be indefinitely postponed.

SPECIAL POSTAL RATES

The Senate proceeded to consider the bill (H.R. 4595) to clarify and make uniform certain provisions of law relating to special postage rates for educational, cultural, and library materials, and for other purposes, which had been reported from the Committee on Post Office and Civil Service, with amendments, on page 2, line 5, after the word "notations," to strike out "and"; in line 8, to strike out "recordings" and insert "recordings"; and"; after line 8, to insert:

(4) by striking out the word "and" immediately before "(6)" and by striking out the period at the end thereof and inserting in lieu thereof a semicolon and the following: "and (7) printed educational reference charts, permanently processed for preservation."

After line 13, to strike out:

(b) Section 204(e)(1) of such Act, as amended (72 Stat. 140, 141; 30 U.S.C. 292a(e)(1)), is amended by striking out "(i) books consisting wholly of reading matter or scholarly bibliography or reading matter with incidental blank spaces for students' notations and containing no advertising matter other than incidental announcements of books; (ii) printed music, whether in bound form or in sheet form; (iii) bound volumes of academic theses in typewritten or other duplicated form and bound volumes of periodicals; (iv) phonograph recordings; and (v) other library materials in printed, duplicated, or photographic form or in the form of unpublished manuscripts." and inserting in lieu thereof the following: "(i) books consisting wholly of reading matter or scholarly bibliography or reading matter with incidental blank spaces for notations and containing no advertising matter other than incidental announcements of books; (ii) printed music, whether in bound form or in sheet form; (iii) bound volumes of academic theses in typewritten or other duplicated forms; (iv) periodicals, whether bound or unbound: (v) sound recordings; and (vi) other library materials in printed, duplicated, or photographic form or in the form of unpublished manuscripts.".

And, in lieu thereof, to insert:

(b) Section 204(e)(1) of such Act, as amended (72 Stat. 140, 141; 39 U.S.C. 292a(e)(1)), is amended—

(1) by inserting "(including cooperative processing by libraries)" immediately following "loaned or exchanged"; and

(2) by striking out "(i) books consisting wholly of reading matter or scholarly bibliography or reading matter with incidental blank spaces for students' notations and containing no advertising matter other than incidental announcements of books; (ii) printed music, whether in bound form or in sheet form; (iii) bound volumes of academic theses in typewritten or other duplicated form and bound volumes of periodicals; (iv) phonograph recordings; and (v) other library materials in printed, duplicated, or photographic form or in the form of unpublished manuscripts." and inserting in lieu thereof the following: "(i) books consisting wholly of reading matter or scholarly bibliography or reading matter with incidental blank spaces for students' notations and containing no advertising matter other than incidental announcements of books; (ii) printed music, whether in bound form or in sheet form; (iii) bound volumes of academic theses in typewritten or other duplicated form; (iv) periodicals, whether bound or unbound; (v) sound recordings; and (vi) other library materials in printed, duplicated, or photographic form or in the form of unpublished manuscripts.".

And, on page 4, after line 12, to strike out:

(c) Section 204(e)(2) of such Act, as amended (72 Stat. 141; 39 U.S.C. 292a(e)(2)), is amended by striking out "and catalogs of such materials" and inserting in lieu thereof "catalogs of such materials, and guides or scripts prepared solely for use with such materials".

And, in lieu thereof, to insert:

(c) Section 204(e)(2) of such Act, as amended (72 Stat. 141; 39 U.S.C. 292a(e)(2)), is amended—

(1) by inserting "scientific or mathematical kits, instruments, or other devices" immediately following "sound recordings,"; and

(2) by striking out "and catalogs of such materials" and inserting in lieu thereof "catalogs of such materials, and guides or scripts prepared solely for use with such materials".

Mr. JOHNSTON of South Carolina. Mr. President, I ask unanimous consent to have printed at this point in the RECORD a statement in explanation of the bill.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

EXPLANATION OF H.R. 4595

The purpose of this measure is to clarify and make uniform certain provisions of postal law relating to books, library books, and related materials. To that end the bill does the following:

1. Present law provides for "incidental blank spaces for students' notations" in books mailed at the special rate of postage for educational materials. As requested by the Post Office Department, the word "students" is removed, as no one can determine whether the space is actually to be used by students. The key word in the law is "incidental" which sufficiently restricts the amount of spaces in a book mailed at the special rate. This limitation is not affected by the change, but the administration of the provision is improved.

2. Reference in existing law to "phonograph recordings" is changed to "sound recordings." As in the first instance, this change is made at the request of the Post Office Department for the reason that there are various types of reproducing media in addition to the standard disk record. The Post Office Department advised the committee that identical musicals, drama, and the like are frequently reproduced on tapes, wire, and other records in addition to the disk type and does thus the more descriptive term is desirable.

3. The list of materials which may be mailed at preferential rates is broadened to include certain educational charts of a permanent nature and certain types of scientific or mathematical kits, instruments, or other devices.

4. The bill clarifies existing law to make certain that library material mailed to and from cooperative processing centers can be mailed at the same rate as though they were mailed to and from the libraries themselves.

5. The measure amends existing law under which "bound volumes of periodicals" qualify for the book or library rate so as to eliminate the requirement in regard to binding.

6. The final change by the bill carries out a recommendation of the National Audiovisual Association in connection with mailings of educational films. These materials commonly are accompanied by guides or scripts designed to be read with the presentation of the film or film strip and essential to the full utilization thereof. Under existing law, such guides or scripts do not qualify for the special book or library book rates applicable to the visual aids of which

they are a part. The bill amends existing law to provide that such auxiliary material may be mailed at the rate applicable to the principal material.

The Post Office Department initially requested this legislation and has concurred in the amendments made in the House and those made in the Senate. The Department advises that enactment of the measure will have little effect on postal revenues.

The PRESIDING OFFICER. The question is on agreeing to the committee amendments.

Mr. HART. Mr. President, I ask that the committee amendments be agreed to en bloc.

The PRESIDING OFFICER. Without objection, the committee amendments are agreed to en bloc.

If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill be read a third time.

The bill was read the third time and passed.

DUAL RATE CONTRACT AGREEMENT

The bill (H.R. 10840) to amend Public Law 85–626, relating to dual rate contract agreement was considered, ordered to a third reading, read the third time, and passed.

RECONVEYANCE OF CERTAIN PROPERTY FROM THE CITY OF WAUKEGAN, ILL.

The bill (H.R. 5738) to authorize the Secretary of the Army to transfer to the Waukegan Port District the commitment of the city of Waukegan, Ill., to maintain a public wharf in Waukegan Harbor on land conveyed to the city in 1914, and for other purposes, was announced as next in order.

Mr. HART. Mr. President, I ask unanimous consent that the senior Senator from Oregon [Mr. MORSE] may have permission to have a statement printed immediately prior to the passage of Calendar No. 1559, H.R. 5738.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR MORSE

H.R. 5738 would authorize the reconveyance of certain property to the Secretary of the Army in order that he, in turn, may convey the property to a port district subject to an obligation to maintain a suitable public wharf which shall always be kept open to the public.

The property in question was conveyed originally in 1914 by the Secretary of War to the city of Waukegan. The 1914 conveyance was conditioned upon the city's maintaining a public wharf which shall always be held open to the public.

The city now desires to convey to the Waukegan Port District for improvement of harbor facilities.

The conveyance authorized by H.R. 5738 is the most feasible means of transferring the public wharf maintenance obligation from the city to the port district.

The bill specifically provides that "in the event the property is not used for the aforementioned purpose (public wharf) title thereto shall at the option of the Secretary of the Army, revert to the United States of America which shall have the right of immediate entry thereon."

No violation of the Morse formula is involved. That is why I have raised no objection to passage of the bill.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the bill was considered, ordered to a third reading, read the third time, and passed.

EXTENSION OF FEDERAL TORT CLAIMS ACT

The Senate proceeded to consider the bill (S. 1764) to extend the Federal Tort Claims Act to members of the National Guard when engaged in training duty under Federal law, and for other purposes, which had been reported from the Committee on the Judiciary, with an amendment, to strike out all after the enacting clause and insert:

That chapter 7 of title 32, United States Code, is amended—

(1) by adding the following new section at the end thereof:

"§ 715. Property loss; personal injury or death: activities under certain sections of this title

"(a) Under such regulations as the Secretary of the Army or Secretary of the Air Force may prescribe, he or, subject to appeal to him, the Judge Advocate General of the armed force under his jurisdiction, if designated by him, may settle, and pay in an amount not more than $5,000 a claim against the United States for—

"(1) damage to, or loss of, real property, including damage or loss incident to use and occupancy;

"(2) damage to, or loss of, personal property, including property bailed to the United States or the National Guard and including registered or insured mail damaged, lost, or destroyed by a criminal act while in the possession of the National Guard; or

"(3) personal injury or death;

either caused by a member of the Army National Guard or the Air National Guard, as the case may be, while engaged in training or duty under section 316, 502, 503, 504, or 505 of this title or any other provision of law for which he is entitled to pay under section 301 of title 37, or for which he has waived that pay, and acting within the scope of his employment; caused by a person employed under section 709 of this title acting within the scope of his employment; or otherwise incident to noncombat activities of the Army National Guard or the Air National Guard, as the case may be, under one of those sections.

"(b) A claim may be allowed under subsection (a) only if—

"(1) it is presented in writing two years after it accrues, except that if the claim accrues in time of war or armed conflict intervenes within two years after it accrues, and if good cause is shown, the claim may be presented not later than two years after the war or armed conflict is terminated;

"(2) it is not covered by section 2734 of title 10 or section 2672 of title 28;

"(3) it is not for personal injury or death of such a member or a person employed under section 709 of this title, whose injury or death is incident to his service;

"(4) the damage to, or loss of, property, or the personal injury or death, was not caused wholly or partly by a negligent or wrongful act of the claimant, his agent, or his employee; and

"(5) it is substantiated as prescribed in regulations of the Secretary concerned.

For the purposes of clause (1), the dates of the beginning and end of an armed conflict are the dates established by concurrent resolution of Congress or by a determination of the President.

"(c) Payment may not be made under this section for reimbursement for medical, hospital, or burial services furnished at the expense of the United States or of any State or the District of Columbia or Puerto Rico.

"(d) If the Secretary of the military department concerned considers that a claim in excess of $5,000 is meritorious and would otherwise be covered by this section, he may pay the claimant $5,000 and report the excess to Congress for its consideration.

"(e) Except as provided in subsection (d), no claim may be paid under this section unless the amount tendered is accepted by the claimant in full satisfaction.

"(f) In any case where the amount to be paid is not more than $1,000, the authority contained in subsection (a) may be delegated to any officer of the Army or the Air Force, as the case may be, who has been delegated authority under section 2733(g) of title 10 to settle similar claims.

"(g) Notwithstanding any other provision of law, the settlement of a claim under this section is final and conclusive.

"(h) In this section, 'settle' means consider, ascertain, adjust, determine, and dispose of a claim, whether by full or partial allowance or disallowance."; and

(2) by adding the following new item at the end of the analysis:

"715. Property loss; personal injury or death: activities under certain sections of this title."

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended, so as to read: "A bill to amend title 32, United States Code, to authorize the payment of certain claims against the National Guard."

RICHARD SCHOENFELDER AND LIDWINA S. WAGNER

The bill (H.R. 8457) for the relief of Richard Schoenfelder and Lidwina S. Wagner was considered, ordered to a third reading, read the third time, and passed.

PIETRO MELA

The bill (H.R. 9226) for the relief of Pietro Mela was considered, ordered to a third reading, read the third time, and passed.

GEORGE T. MOORE AND OTHERS

The bill (H.R. 10631) for the relief of George T. Moore, Carl D. Berry, and Dr. Harold J. Heck was considered, ordered to a third reading, read the third time, and passed.

MRS. ETHEL B. MORGAN

The Senate proceeded to consider the bill (H.R. 9443) for the relief of Mrs. Ethel B. Morgan, which had been reported from the Committee on the Judiciary, with an amendment at the beginning of line 6, to strike out "be the widow (as defined in section 216(c) of that Act)" and insert "have been the wife and subsequently the widow (as those terms are defined in section 216 of that Act)."

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

RESOLUTION PASSED OVER

The resolution (S. Res. 331) referring S. 3307 to the Court of Claims was announced as next in order.

Mr. PROUTY. Mr. President, over, by virtue of the fact that the resolution is not calendar business.

The PRESIDING OFFICER. The resolution will be passed over.

NATIONAL WOOL MONTH

The joint resolution (S.J. Res. 187) to provide for the designation of the month of September 1960, as "National Wool Month" was announced as next in order.

The PRESIDING OFFICER. Without objection, the Senate will proceed to consider the identical House measure.

The joint resolution (H.J. Res. 696) to provide for the designation of the month of September 1960, as "National Wool Month," was considered, ordered to a third reading, read the third time, and passed.

The preamble was agreed to.

The PRESIDING OFFICER. Without objection, Senate Joint Resolution 187 will be indefinitely postponed.

BILLS AND RESOLUTION PASSED OVER

The bill (H.R. 8229) to amend the Internal Revenue Code of 1954 to provide an exemption from income tax for supplemental unemployment benefit trusts was announced as next in order.

Mr. KEATING. Over, by request.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 1868) to provide for the regulation of credit life insurance and credit accident and health insurance in the District of Columbia was announced as next in order.

Mr. HART. Over, by request.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 2692) to advance the marine sciences, to establish a comprehensive 10-year program of oceanographic research and surveys; to promote commerce and navigation, to secure the national defense; to expand ocean resources; to authorize the construction of research and survey ships and facilities; to assure systematic studies of effects of radioactive materials in marine environments; to enhance the general welfare; and for other purposes.

Mr. HART. Mr. President, over, as not appropriate for calendar action.

The PRESIDING OFFICER. The bill will be passed over.

The resolution (S. Res. 332) referring S. 1935 to the Court of Claims was announced as next in order.

Mr. PROUTY. Over.

The PRESIDING OFFICER. The resolution will be passed over.

DONALD B. THURSTON AND OTHERS

The bill (S. 1409) for the relief of Donald B. Thurston, and other employees of the Fish and Wildlife Service was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is hereby authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the persons enumerated below the sums specified, in full settlement of all claims against the Government of the United States as reimbursement for personal effects lost as a result of a boating accident on July 23, 1957, on the Yukon River, Alaska, while on official business of the Fish and Wildlife Service, Department of the Interior: Donald B. Thurston, $276; Stuart L. Murrell, $644; Jack W. Lentfer, $330; and James A. Reeher, Junior, $371.50: *Provided,* That no part of the amounts appropriated in this Act shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with these claims, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

ROBERT WILLIAM NEAL AND OTHERS

The bill (S. 3125) for the relief of Robert William Neal, Robert J. Naumann, Charles LeRoy Van Slyke and Franklin Jordan was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is hereby authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the persons enumerated below the sums specified, in full settlement of all claims against the Government of the United States as reimbursement for personal effects damaged or lost as the result of a fire on August 11, 1959, aboard the motor vessel Ranger VIII, at Auke Bay, Alaska, while on official business with the Bureau of Public Roads, Department of Commerce: Robert William Neal, $13.98; Robert J. Naumann, $26.04; Charles LeRoy Van Slyke, $56.53; and Franklin Jordan, $6: *Provided,* That no part of the amounts appropriated in this Act shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with these claims, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

MAY HOURANI

The bill (H.R. 2007) for the relief of May Hourani was considered, ordered to a third reading, read the third time, and passed.

MRS. VIRGINIA LEE SAGE

The bill (H.R. 3242) for the relief of Mrs. Virginia Lee Sage was considered, ordered to a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (H.R. 5033) for the relief of Betty Keenan was announced as next in order.

Mr. PROUTY. Over.

The PRESIDING OFFICER. The bill will be passed over.

LEILA BERNSTORFF GRAUERT

The bill (H.R. 5530) for the relief of Leila Bernstorff Grauert was considered, ordered to a third reading, read the third time, and passed.

WESLEY C. NEWCOMB

The bill (H.R. 6149) for the relief of Wesley C. Newcomb was considered, ordered to a third reading, read the third time, and passed.

LT. COL. ALONZO C. TENNEY

The bill (H.R. 9652) for the relief of Lt. Col. Alonzo C. Tenney was considered, ordered to a third reading, read the third time, and passed.

HENRY C. LARSON

The Senate proceeded to consider the bill (S. 2548) for the relief of Henry C. Larson, which had been reported from the Committee on the Judiciary, with an amendment, on page 2, line 8, after the name "Larson", to strike out "if at the time of his death the said David C. Larson had been an employee of the United States subject to the provisions of the Act entitled "An Act to defray the cost of returning to the United States the remains, families, and effects of officers and employees dying abroad, and for other purposes", approved July 8, 1940 (54 Stat. 743)." and in lieu thereof, to insert "in accordance with section 3(e) of Public Law 885 of the Eighty-fourth Congress, second session (70 Stat. 890) which authorizes the Secretary of State to pay the actual expenses of preparing and transporting to their former homes the remains of persons, not United States Government employees, who may die away from their homes while participating in international educational exchange activities under the jurisdiction of the Department of State.", so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Director of the National Science Foundation is authorized and directed to pay, out of any money appropriated to carry out the purposes of the National Science Foundation Act of 1950, as amended, to Henry C. Larson, of Cloquet, Minnesota, the sum provided for in section 2 of this Act. Such sum shall be in full satisfaction of all claims of the said Henry C. Larson against the United States for reimbursement of expenses incurred by him incidental to the death of his son, David C. Larson, who died in Paris, France, while studying at the Ecole Normale Superieure in Paris, France, under a predoctoral fellowship granted pursuant to

section 10 of the National Science Foundation Act of 1950, as amended.

SEC. 2. The sum payable under the first section of this Act shall be equal to the amount of the expenses which would have been payable by the United States incidental to the death of the said David C. Larson, in accordance with section 3(e) of Public Law 885 of the Eighty-fourth Congress, second session (70 Stat. 890) which authorizes the Secretary of State to pay the actual expenses of preparing and transporting to their former homes the remains of persons, not United States Government employees, who may die away from their homes while participating in international educational exchange activities under the jurisdiction of the Department of State.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

RELIEF OF CERTAIN ALIENS

The Senate proceeded to consider the joint resolution (H.J. Res. 688) for the relief of certain aliens, which had been reported from the Committee on the Judiciary, with an amendment, on page 3, after line 24, to insert a new section, as follows:

SEC. 13. For the purposes of sections 101 (a) (27) (A) and 205 of the Immigration and Nationality Act, Ernest Lee (Lee Ming-Sing) shall be held and considered to be the minor natural-born alien child of Watson G. Thoms, a citizens of the United States.

And, on page 4, at the beginning of line 5, to change the section number from "13" to "14".

The amendments were agreed to.

The amendments were ordered to be engrossed and the joint resolution to be read a third time.

The joint resolution was read the third time, and passed.

WILLIAM Y. ALLEN, JR.

The Senate proceeded to consider the bill (S. 3105) for the relief of William Y. Allen, Jr., which had been reported from the Committee on the Judiciary, with an amendment to strike out all after the enacting clause and insert:

That the Secretary of the Navy is authorized and directed to pay out of current appropriations available for the payment of severance pay, to William Y. Allen, Junior, Donald Baldwin Quintero, Johann Friedrich Stapelfeld, and Kenneth Gordon Woods, who were discharged from the United States Navy on June 30, 1959, amounts equal to the difference between (a) the amount of severance pay which would have been paid to them upon their discharge from the United States Navy if the computation of such severance pay had been based upon their actual commissioned service in the United States Navy, and (b) the amount of severance pay actually paid to them.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended, so as to read: "A bill for the relief of William Y. Allen, Jr., Donald Baldwin Quintero, Johann Friedrich Stapelfeld, and Kenneth Gordon Woods."

RELIEF OF THE STATE OF CONNECTICUT

The Senate proceeded to consider the bill (S. 3053) for the relief of the State of Connecticut, which had been reported from the Committee on the Judiciary, with an amendment, on page 2, line 4, after the word "Act", to strike out "in excess of 10 per centum thereof", so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the State of Connecticut, the sum of $10,000. The payment of such sum shall be in full satisfaction of all claims of the State of Connecticut against the United States for reimbursement of an amount paid by such State to certain persons as compensation for personal injuries and property losses which they sustained on September 24, 1957, when a wing fuel tank fell from a Connecticut Air National Guard F–94 jet aircraft while it was being operated by a United States Air Force Reserve officer on active duty: *Provided,* That no part of the amount appropriated in this Act shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. And person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

JOINT RESOLUTION PASSED OVER

The joint resolution (S.J. Res. 207) to suspend for the 1960 campaign the equal opportunity requirements of section 315 of the Communications Act of 1934 for nominees for the office of President and Vice President was announced as next in order.

Mr. HART. Over, as not being proper calendar business.

The PRESIDING OFFICER. The joint resolution will be passed over.

AMENDMENT OF COMMUNICATIONS ACT OF 1934

The Senate proceeded to consider a bill (S. 3496) to amend section 362(b) of the Communications Act of 1934, which had been reported from the Committee on Interstate and Foreign Commerce, with an amendment, to strike out all after the enacting clause and insert:

That the following language be added to section 362(b) of the Communications Act of 1934 (47 U.S.C.A. 360):

"The Commission may, upon a finding that the public interest would be served thereby, waive the annual inspection required under this section from the time of first arrival at a United States port from a foreign port, for the sole purpose of enabling the vessel to proceed coastwise to another port in the United States where an inspection can be held; provided that such waiver may not exceed a period of thirty days."

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

STRIKING OF MEDAL IN COMMEMORATION OF CENTURY 21 EXPOSITION

The bill (S. 3532) to provide for the striking of medal in commemoration of Century 21 Exposition to be held in Seattle, Wash., was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in commemoration of Century 21 Exposition, to be held in Seattle, Washington, beginning April 21, 1962, and ending October 21, 1962, the Secretary of the Treasury is authorized and directed to strike and furnish to the Century 21 Commission not more than five hundred thousand medals with suitable emblems, devices, and inscriptions to be determined by the Century 21 Commission and subject to the approval of the Secretary of the Treasury. The medals shall be made and delivered at such times as may be required by the Commission in quantities of not less than two thousand. The medals shall be considered to be national medals within the meaning of section 3551 of the Revised Statutes.

SEC. 2. The Secretary of the Treasury shall cause such medals to be struck and furnished at not less than the estimated cost of manufacture, including labor, materials, dies, use of machinery, and overhead expenses; and security satisfactory to the Director of the Mint shall be furnished to indemnify the United States for the full payment of such cost.

SEC. 3. The medals authorized to be issued pursuant to this Act shall be of such size or sizes and of such metals as shall be determined by the Secretary of the Treasury in consultation with such Commission.

STRIKING OF MEDALS IN COMMEMORATION OF FOUNDING OF STATE OF IDAHO AS A TERRITORY

The bill (S. 3160) to provide for the striking of medals in commemoration of the 100th anniversary of the founding of the State of Idaho as a Territory was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in the commemoration of the one hundredth anniversary of the founding of the State of Idaho as a Territory, the Secretary of the Treasury is authorized and directed to strike and furnish to the Idaho Territorial Centennial Commission not more than ten thousand medals of either silver or bronze or both, of a suitable size and with suitable emblems, devises, and inscriptions to be determined by the Idaho Territorial Centennial Commission subject to the approval of the Secretary of the Treasury. The medals shall be made and delivered at such times as required by the Commission in quantities of not less than two thousand, but no medals shall be made after December 31, 1963. The medals shall be considered to be national medals within the meaning of section 3551 of the Revised Statutes.

SEC. 2. (a) The Secretary of the Treasury shall cause such medals to be struck and

furnished at no less than the estimated cost of manufacture, including labor, materials, dies, use of machinery, and overhead expenses; and security satisfactory to the Director of the Mint shall be furnished to indemnify the United States for the full payment of such cost.

(b) Upon authorization from the Idaho Territorial Centennial Commission, the Secretary of the Treasury shall cause duplicates in silver or bronze or both of such medal to be coined, and sold, under such regulations as he may prescribe, at a price sufficient to cover the cost thereof (including labor).

BILLS PASSED OVER

The bill (S. 1964) to amend the act requiring certain common carriers by railroad to make reports to the Interstate Commerce Commission with respect to certain accidents in order to clarify the requirements of such act was announced as next in order.

Mr. HART. Over, by request.

The PRESIDING OFFICER. The bill will be passed over.

Mr. HART. Mr. President, I ask that the measures from Calendar Nos. 1607 through 1610, inclusive, be passed over as not being appropriate for Calendar action.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bills passed over are as follows:

The bill (H.R. 4601) to amend the act of September 1, 1954, in order to limit to cases involving the national security the prohibition on payment of annuities and retired pay to officers and employees of the United States, to clarify the application and operation of such act, and for other purposes, was announced as next in order.

The bill (S. 1638) to provide for an effective system of personnel administration for the executive branch of the Government.

The bill (S. 1425) to amend the Interstate Commerce Act so as to provide for the protection of railroad employees by regulating the use of track motor cars, and for other purposes.

The bill (H.R. 10596) to change the method of payment of Federal aid to State or territorial homes for the support of disabled soldiers, sailors, airmen, and marines of the United States.

LABEL DECLARATION OF USE OF PESTICIDE CHEMICALS ON RAW AGRICULTURAL COMMODITIES

The bill (H.R. 7480) to amend the Federal Food, Drug, and Cosmetic Act, with respect to label declaration of the use of pesticide chemicals on raw agricultural commodities which are the produce of the soil was announced as next in order.

Mr. HOLLAND. Mr. President, in order to explain the bill, I ask unanimous consent that the first three sections of the committee report be printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

The Committee on Labor and Public Welfare, to whom was referred the bill (H.R. 7480) to amend the Federal Food, Drug, and Cosmetic Act, with respect to label declaration of the use of pesticide chemicals on raw agricultural commodities which are the produce of the soil, having considered the same, unanimously report favorably thereon without amendment and recommend that the bill do pass.

EXPLANATION

This bill would provide for a label on the shipping container of raw agricultural commodities declaring the presence of pesticide chemicals, but would not require such declaration while such commodities are displayed for retail sale outside the shipping container.

The amendment proposed by this bill to section 403 would not in any way weaken the protection which the Federal Food, Drug, and Cosmetic Act gives to consumers against the use of unsafe pesticide chemicals on raw agricultural commodities. This protection against unsafe pesticide chemicals is assured by section 408 of the act, which prohibits the use of pesticide chemicals on produce unless the Secretary of Health, Education, and Welfare has prescribed safe tolerances for such chemicals. The Food and Drug Administration has acknowledged that this bill would not affect the safeguards to public health established by section 408.

The laws of States and territories would not be affected by this legislative proposal.

BACKGROUND

Losses of fresh fruits and vegetables due to decay in marketing run into the millions of dollars annually. Pesticide chemicals are being used to cut down on these staggering losses, without harm to the consumer, and thus enable the farm economy to deliver to consumers a greater quantity of healthful fresh produce of a high quality and at a lower price than would be possible without their use. The application of pesticide chemicals to fresh fruits and vegetables has been increasing rapidly as new and more effective chemicals are developed.

Pesticide chemicals have been found to be extremely effective in reducing the serious losses of perishable raw agricultural commodities due to decay and insect infestation. The necessity of their use for the marketing of fresh produce is fully recognized by the fruit and vegetable growers, by scientific experts in the field, and by the Federal Food and Drug Administration.

Section 403(k) of the Federal Food, Drug, and Cosmetic Act provides, in part, that a food shall be deemed to be misbranded if it bears or contains any chemical preservative, unless the food bears a label stating that fact. The term "chemical preservative" is defined by regulation of the Food and Drug Administration as "any chemical that, when added to food, tends to prevent or retard deterioration thereof but does not include common salt, sugars, vinegars, spices, or oils extracted from spices, substances added to food by direct exposure thereof to wood smoke, or chemicals applied for their insecticidal or herbicidal properties." To the extent that it is impracticable to comply with this labeling requirement, the Secretary of Health, Education, and Welfare is directed by section 403(k) to establish exemptions by regulation.

The Food and Drug Administration has taken the position that pesticide chemicals put on fresh fruits or vegetables or on other raw agricultural commodities in order to prevent, retard, or arrest the growth of molds or bacteria and thereby to prevent or retard rot or decay, are chemical preservatives within the meaning of section 403(k). With respect to chemical preservatives applied to fruits and vegetables as pesticide chemicals before harvest, the Secretary has found label declaration under section 403(k) to be impracticable and hence has granted an exemption to that extent. If applied after harvest, however, the presence of the pesticide chemical as a preservative must be declared.

Under the circumstances, fresh fruits and vegetables shipped in interstate commerce, which have safe residues of pesticide chemicals applied postharvest to retard decay during the marketing process, must bear a label indicating that a chemical preservative has been used. The name of the pesticide, however, does not have to be stated under section 403(k).

The label stating that a chemical preservative has been used on the fruits or vegetables must appear, under the present regulations, in or on the bulk shipping container and on the display bin at the retail store by means of a counter card or sign placed conspicuously so that the consumer will be advised of that fact. Incorrect labeling is a violation of the act, and is a criminal offense.

Under section 403(i)(2) of the Federal Food, Drug, and Cosmetic Act, the Food and Drug Administration has, moreover, insisted on label declaration of the common or usual name (not necessarily the chemical name) of a pesticide chemical applied after harvest. Section 403(i)(2) of the act requires label declaration of the common or usual name of each ingredient of a fabricated food except to the extent that the Secretary finds compliance impracticable. The Food and Drug Administration holds that when a fresh fruit or vegetable has been treated with a pesticide chemical after harvest, the fruit or vegetable is a "fabricated food" and the chemical is an "ingredient" the name of which must be declared in the absence of an exemption. No such exemption has been granted, though the Food and Drug Administration has proposed one for citrus fruit while displayed outside the shipping container at retail. This exemption would apply only to the requirement of declaration of the name, not to the requirement of section 403(k) as to the presence of a chemical preservative.

However, the fresh fruit and vegetable industry differs from the viewpoint expressed by the Food and Drug Administration and they presented evidence by industry witnesses and land-grant college experts in support of the position that pesticide chemicals used postharvest on fresh fruits and vegetables are not chemical preservatives within the meaning of section 403(k). These experts stated that fresh fruits and vegetables are living organisms, and not "preserved" by pesticidal residues. The presence of the residue does not eliminate any need for refrigeration by the purchaser of such commodities to avoid spoilage, in contrast to the preserved processed foods which do not require refrigeration.

The fresh fruit and vegetable industry has also strongly disagreed with the interpretation of section 403(i)(2), under which fresh fruits and vegetables treated postharvest with a pesticide chemical are considered "fabricated food" required to bear labeling showing the common or usual name of the chemical applied thereto. Furthermore, regardless of the question of interpretation, the industry has been urging that such label declarations are impracticable, especially at retail level, that where there is an attempt to compliance—by placard notice when the commodity is displayed at retail on the counter or in a bin—there is buyer resistance to the detriment of both producers and consumers, and that because of these labeling requirements large retailers are threatening to refuse fruits and vegetables so treated.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the bill was considered, ordered to a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (H.R. 10455) to amend the Mineral Leasing Act of February 25, 1920, was announced as next in order.

Mr. PROUTY. Over.

The PRESIDING OFFICER. The bill will be passed over.

ELIGIBILITY FOR SCHOLARSHIPS AND FELLOWSHIPS OF AMERICAN NATIONALS

The bill (H.R. 11985) to make American nationals eligible for scholarships and fellowships authorized by the National Science Foundation Act of 1950 was considered, ordered to a third reading, read the third time, and passed.

BOROUGH OF FORD CITY, PA.

The bill (H.R. 5850) for the relief of the Borough of Ford City, Pa., was considered, ordered to a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (H.R. 4964) for the relief of Mrs. Betty L. Fonk was announced as next in order.

Mr. PROUTY. Over.

The PRESIDING OFFICER. The bill will be passed over.

ANTHONY DI GIOVANNI

The bill (S. 598) for the relief of Anthony Di Giovanni was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That notwithstanding the provisions of paragraph (9) of section 212(a) of the Immigration and Nationality Act, Anthony Di Giovanni may be issued a visa and be admitted to the United States for permanent residence if he is found to be otherwise admissible under the provisions of such Act: *Provided,* That this Act shall apply only to grounds for exclusion under such paragraph known to the Secretary of State or the Attorney General prior to the date of the enactment of this Act.

PETER DOLAS

The bill (S. 2310) for the relief of Peter Dolas was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Peter Dolas shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

COL. JOHN A. RYAN, JR.

The bill (S. 2353) for the relief of Col. John A. Ryan, Jr., was announced as next in order.

Mr. JOHNSON of Texas. May we have an explanation of the bill, please?

Mr. KEATING. Mr. President, the purpose of the bill is to authorize the Secretary of the Treasury to pay to Col. John A. Ryan, Jr., of the U.S. Air Force, the sum of $100,000. The payment is to be in full satisfaction of all claims which he might have against the United States or any foreign country, resulting from the development by him, outside of official working hours, of a new bombing system known as the low-altitude bombing system and apparatus.

Colonel Ryan is one of the many unsung heroes serving our Nation. During the war, working on his own time outside of official working hours, he developed with his inventive skill an ingenious military device known as the low-altitude bombing system and apparatus.

For many years his invention was a closely guarded military secret. It was very widely employed by our Armed Forces, however, and is still standard equipment on such Air Force planes as the F–100C, the F–101A, and the B–57, the B–66B, and the B–47. Equipment involving his invention has been installed in quantity in aircraft supplied to the NATO countries by the United States.

The Department of the Air Force in recommending the bill has stated that Colonel Ryan's invention "contributed in a decided manner to the Air Force's and the Navy's capability, in that it provided the means for an early low-altitude safe and acceptable means for delivery of special weapons."

If Colonel Ryan had developed his system while working for private industry, he would be a millionaire many times over today. Actually, he has not received any financial reward for his magnificent contribution to our war and defense effort. It would be unjust, not only to Colonel Ryan, but to our Nation, if we did not in some appropriate way reward him for his contribution. We must do everything we can to encourage his example of selfless duty and initiative in order that our country will always have the benefit of similar inventive genius.

The amount of $100,000 called for in S. 2353, while substantial, is modest in relation to the actual value of Colonel Ryan's contribution. Because of security restrictions, Colonel Ryan had to forfeit any opportunity to protect his system. Now he has obtained patents covering the invention, but no royalties can be charged on these, and they will be assigned to the United States prior to the payment of the award under this measure.

The Senate Committee on the Judiciary was unanimous in its report on this measure. I know that it will be approved without objection in this body, and I hope that the House of Representatives will give it speedy consideration, so that our obligation to this patriotic and dedicated officer can be discharged prior to the adjournment of this session of Congress.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the bill (S. 2353) was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to John A. Ryan, Junior, colonel, United States Air Force, the sum of $100,000. The payment of such sum shall be in full satisfaction of all claims of the said Colonel John A. Ryan, Junior, against the United States, or any foreign country, resulting from the development by him outside of official working hours of a new bombing system known as the low altitude bombing system and apparatus, the said Colonel John A. Ryan, Junior, having been unable to protect or retain the domestic or foreign commercial rights to such system because of the security laws of the United States: *Provided,* That such payment shall be upon condition that Colonel John A. Ryan, Junior, assign to the United States the entire right, title, and interest to such invention: *And provided further,* That no part of the amount appropriated in this Act shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim.

MICHAEL NOLAN (FORMERLY MICHAEL PASVANIS)

The bill (S. 2974) for the relief of Michael Nolan (formerly Michael Pasvanis) was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That for the purposes of the Immigration and Nationality Act, Michael Nolan (formerly Michael Pasvanis) shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

ANDREW RERECICH AND HIS WIFE, GERMANA RERECICH

The bill (S. 3083) for the relief of Andrew Rerecich and his wife, Germana Rerecich, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Andrew Rerecich and his wife, Germana Rerecich, shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fees. Upon the granting of permanent residence to such aliens as provided for in this Act, the Secretary of State shall instruct the proper quota-control officer to deduct the required numbers from the appropriate quota or quotas for the first year that such quota or quotas are available.

ANASTASIA STASSINOPOULOS

The bill (S. 3237) for the relief of Anastasia Stassinopoulos was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Anastasia Stassinopoulos shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

CESAR S. WYCOCO

The bill (S. 3263) for the relief of Cesar S. Wycoco was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Cesar S. Wycoco shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

JOSEPHINE LUE FAN AND OTHERS

The Senate proceeded to consider the bill (S. 2585) for the relief of Josephine Lue Fan (also known as Josephine Fook-Lau), Joseph Lue Fan (also known as Joseph Lew-Fan), and Aura Joan Lue Fan, which had been reported from the Committee on the Judiciary, with an amendment, on page 1, line 5, after the name "Joseph", where it appears the second time, to strike out "LewFan" and insert "Lew-Fan", so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Josephine Lue Fan (also known as Josephine Fook-Lau), Joseph Lue Fan (also known as Joseph Lew-Fan), and Aura Joan Lue Fan shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of enactment of this Act, upon payment of the required visa fees. Upon the granting of permanent residence to such aliens as provided for in this Act, the Secretary of State shall instruct the proper quota-control officer to deduct the required numbers from the appropriate quota or quotas for the first year that such quota or quotas are available.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

HWACHII LIEN

The Senate proceeded to consider the bill (S. 2689) for the relief of Hwachii Lien, which had been reported from the Committee on the Judiciary, with an amendment on page 1, line 6, after the word "of", where it appears the first time, to strike out "the date of the enactment of this Act" and insert "November 17, 1954,", so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That for the purposes of the Immigration and Nationality Act, Hwachii Lien shall be held and considered to have been lawfully admitted to the United States for permanent residence as of November 17, 1954, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BRENDA NICHOLSON MILLER

The Senate proceeded to consider the bill (S. 2855) for the relief of Brenda Nicholson Miller which had been reported from the Committee on the Judiciary, with an amendment, on page 1, line 8, after the word "Act", to insert a colon and *"Provided,* That if the said Brenda Nicholson Miller is not entitled to medical care under the Dependents' Medical Care Act (70 Stat. 250), a suitable and proper bond or undertaking, approved by the Attorney General, be deposited as prescribed by section 213 of the Immigration and Nationality Act.", so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding the provisions of paragraph (3) of section 212(a) of the Immigration and Nationality Act, Brenda Nicholson Miller may be issued an immigrant visa and admitted to the United States for permanent residence if she is found to be otherwise admissible under the provisions of such Act: *Provided,* That if the said Brenda Nicholson Miller is not entitled to medical care under the Dependents' Medical Care Act (70 Stat. 250), a suitable and proper bond or undertaking, approved by the Attorney General, be deposited as prescribed by section 213 of the Immigration and Nationality Act. This Act shall apply only to grounds for exclusion under such paragraph known to the Secretary of State or the Attorney General prior to the date of the enactment of this Act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

KYONG-OK AHN

The Senate proceeded to consider the bill (S. 2863) for the relief of Kyong-Ok Ahn, which has been reported from the Committee on the Judiciary, with an amendment, on page 1, line 4, after the word "Act", to strike out "Kyong-Ok Ahn" and insert "Kyung Ok Ahn", so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Kyung Ok Ahn shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill for the relief of Kyung Ok Ahn."

ANGELA D'AGATA NICOLOSI

The bill (H.R. 1543) for the relief of Angela D'Agata Nicolosi was considered, ordered to a third reading, read the third time, and passed.

JUDICIAL REVIEW OF ORDERS ISSUED UNDER THE FEDERAL AVIATION ACT AND FOOD ADDITIVES AMENDMENT OF 1958

The bill (H.R. 7847) to make the uniform law relating to the record on review of agency orders (Public Law 85–791) applicable to the judicial review of orders issued under the Federal Aviation Act of 1958 and the Food Additives Amendment of 1958 was considered, ordered to a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (S. 1543) to amend the Federal Aviation Act of 1958 to authorize the Civil Aeronautics Board to include in certificates of public convenience and necessity limitations on the type and extent of services authorized, and for other purposes, was announced as next in order.

Mr. KEATING. Over, by request.

The PRESIDING OFFICER. The bill will be passed over.

EXTENSION OF TIME FOR FINAL PROOF UNDER DESERT LAND LAWS

The bill (H.R. 11706) to authorize an extension of time for final proof under the desert land laws under certain conditions was considered, ordered to a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (S. 3319) to authorize the Administrator of General Services to release the recapture provisions contained in the conveyance of certain real property to the city of Little Rock, Ark., and for other purposes, was announced as next in order.

Mr. HART. Over, by request.

The PRESIDING OFFICER. The bill will be passed over.

PROVISION OF QUARTERS, HOUSEHOLD FURNITURE AND EQUIPMENT, ETC., TO CIVILIAN OFFICERS AND EMPLOYEES

The bill (S. 3486) to authorize the Government agencies to provide quarters, household furniture and equipment, utilities, subsistence, and laundry service to civilian officers and employees of the United States, and for other purposes, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the head of each department, independent establishment, and Government corporation, may, under such regulations as the President may prescribe and where conditions of employment or availability of quarters warrant it, provide, either directly or by contract, civilian officers and employees stationed in the United States, its territories and possessions, the Commonwealth of Puerto Rico, and the Trust Territory of the Pacific Islands, with quarters (Government owned or leased), household furniture and equipment, utilities, subsistence, and laundry service.

SEC. 2. Rental rates for any Government owned or leased quarters provided under authority of section 1 of this Act, or occupied on a rental basis under authority of any other provision of law, and charges for any furniture and equipment, utilities, subsistence, and laundry service made available in connection with the occupancy of such quarters, shall be based on the reasonable value thereof to the officer, employee, or member of the uniformed service concerned, in the circumstances under which furnished. Such rates and charges shall be determined in accordance with such regulations as the President may prescribe, and the amounts thereof shall be paid by, deducted from the salary of, or otherwise charged against, such officer, employee, or member of the uniformed services.

SEC. 3. Whenever, as an incidental service in support of a Government program, any Government owned or leased quarters, and any related furniture and equipment, utilities, subsistence, and laundry service are provided, under specific Government direction, to any person who is not an officer or employee of the Government or a member of the uniformed services, the rates and charges therefor, which shall be paid or otherwise credited to the Government, shall be determined in accordance with section 2 of this Act.

SEC. 4. No civilian officer, employee, or member of the uniformed services, shall be required to occupy Government owned or leased rental quarters unless the head of the agency concerned shall determine that necessary service cannot be rendered or property of the United States cannot be adequately protected otherwise.

SEC. 5. Section 2 of this Act shall not be construed as repealing or modifying any provision of law which may authorize the provision, without charge or at specified rates, of any of the items enumerated in section 1 of this Act, to any specific civilian officer or employee, or to any class of such officers or employees, or to such officers or employees under emergency conditions, or to members of the uniformed services.

SEC. 6. Section 3 of the Act of March 5, 1928, 45 Stat. 193 (5 U.S.C. 75a), is repealed.

EXEMPTION OF STATE-CONTROLLED BANKS FROM LIMITS ON THE NUMBER OF THEIR DIRECTORS

The bill (S. 3158) to exempt State-controlled banks belonging to the Federal Reserve System from the statutory limits on the number of their directors was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 31 of the Banking Act of 1933 (12 U.S.C. 71a), as amended, is further amended by inserting after the word "members" where it appears in the clause "the board of directors * * * of every State bank or trust company which is a member of the Federal Reserve System shall consist of not less than five nor more than twenty-five members" the following: "except that these limitations shall not apply to a bank or trust company a majority of whose stock is owned by a State".

PRESENTATION OF GOLD MEDAL TO ROBERT FROST

The bill (S. 3439) authorizing the President of the United States of America to present a gold medal to Robert Frost, a New England poet, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized to present, in the name of Congress, an appropriate gold medal to Robert Frost in recognition of his poetry, which has enriched the culture of the United States and the philosophy of the world. For such purpose, the Secretary of the Treasury shall cause to be struck a gold medal with suitable emblems, devices, and inscriptions to be determined by the Secretary.

SEC. 2. There is authorized to be appropriated the sum of $2,500 to carry out the provisions of this Act.

EXTENSION OF DEFENSE PRODUCTION ACT OF 1950

The Senate proceeded to consider the bill (H.R. 12052) to extend the Defense Production Act of 1950 as amended for an additional 2 years, which had been reported from the Committee on Banking and Currency, with an amendment after line 6, to insert a new section, as follows:

SEC. 2. The second proviso to the first sentence of subsection (b) of section 304 is amended by striking out the word "quarter" and inserting in lieu thereof the words "six months".

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

SALES AND USE TAXES IMPOSED BY STATES ON BUSINESS ACTIVITIES IN INTERSTATE COMMERCE

The Senate proceeded to consider the bill (S. 3549) to amend the act of September 14, 1959, with respect to sales and use taxes imposed by States on sales and other business activities in interstate commerce, and authorizing studies by congressional committees of this type of taxation, which had been reported from the Committee on Finance, with amendments, on page 1, line 8, after the word "new", to strike out "titles" and insert "title"; at the top of page 2, to strike out:

TITLE III SALES AND USE TAX MINIMUM STANDARD

SEC. 301. (a) No State, or political subdivision thereof, shall have power to impose, after the date of the enactment of this title, a use tax assessment upon any person with respect to sales in interstate commerce if the only business activities within such State by or on behalf of such person during the period for which such assessment is imposed were or are either, or both, of the following:

(1) The solicitation of orders by such person, or his representative, in such State for sales of tangible personal property, which orders are sent outside the State for approval or rejection, and, if approved, are filled by shipment or delivery from a point outside the State; and

(2) The solicitation of orders by such person, or his representative, in such State in the name of or for the benefit of a prospective customer of such person, if orders by such customer to such person to enable such customer to fill orders resulting from such solicitation are orders described in paragraph (1).

(b) the provisions of subsection (a) shall not apply to the imposition of a use tax assessment by any State, or political subdivision thereof, with respect to—

(1) any corporation which is incorporated under the laws of such State; or

(2) any individual who, under the laws of such State, is domiciled in, or a resident of, such State.

(c) For purposes of subsection, (a), person shall not be considered to have engaged in business activities within a State merely by reason of sales in such State, or the solicitation of orders for sales in such State, of tangible personal property on behalf of such person by one or more independent contractors, or by reason of the maintenance of an office in such State by one or more independent contractors whose activities on behalf of such person in such State consist solely of making sales, or soliciting orders for sales, of tangible personal property.

(d) For purposes of this section—

(1) the term "independent contractor" means a commission agent, broker, or other independent contractor who is engaged in selling, or soliciting orders for the sale of, tangible personal property for more than one principal and who holds himself out as such in the regular course of his business activities;

(2) the term "representative" does not include an independent contractor; and

(3) the term "use tax assessment" means any assessment, fine, or penalty imposed or levied under the provisions of the retail sales and use tax law of any State because of the failure or refusal of a seller either to: (A) register as a seller or dealer; (B) collect a use tax from a purchaser; (C) file a use tax return; or (D) remit the use tax to such State.

(e) The provisions of subsection (a) shall not be construed to prohibit the collection, after the date of the enactment of this title, of any use tax assessment which was assessed on or before such date for a period ending on or before such date.

SEC. 302. If any provision of this title or the application of such provision to any person or circumstance is held invalid, the remainder of this title or the application of such provision to persons or circumstances other than those to which it is held invalid, shall not be affected thereby.

On page 4, line 17, in the heading, after the word "Title", to strike out "IV" and insert "III"; in line 18, in the heading, after the word "Committees", to insert "On Sales And Use Taxes"; at the beginning of line 20, to change the section number from "401" to "301"; and on page 5, at the beginning of line 7, to change the section number from "402" to "302"; so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act entitled "An Act relating to the power of the States to impose net income taxes on income derived from interstate commerce, and authorizing studies by congressional committees of matters pertaining thereto", approved September 14, 1959 (Public Law 86–272), is amended by adding at the end thereof the following new title:

"TITLE III—STUDY AND REPORT BY CONGRESSIONAL COMMITTEES ON SALES AND USE TAXES

"SEC. 301. The Committee on the Judiciary of the House of Representatives and the Committee on Finance of the United States Senate, acting separately or jointly, or both, or any duly authorized subcommittee thereof, shall make full and complete studies of all matters pertaining to the imposition of sales and use taxes by the States on sales and other business activities which are exclusively in furtherance of interstate commerce, or which are a part of interstate commerce, for the purpose of recommending to Congress proposed legislation providing uniform standards to be observed by the States in imposing sales and use taxes on such sales and business activities.

"SEC. 302. The committees shall report to their respective Houses the results of the studies authorized by this title together with their proposals for legislation on or before July 1, 1962."

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to amend the Act of September 14, 1959, to authorize studies by congressional committees with respect to sales and use taxes imposed by the States on sales and other business activities in interstate commerce."

PAYMENT OF DEBTS OUT OF COMPENSATION FOR TRUST LAND ON LOWER BRULE SIOUX RESERVATION

The bill (H.R. 6456) concerning payment of debts out of compensation for trust land on the Lower Brule Sioux Reservation taken by the United States was considered, ordered to a third reading, read the third time, and passed.

PAYMENT OF DEBTS OUT OF COMPENSATION FOR TRUST LAND ON STANDING ROCK SIOUX RESERVATION

The bill (H.R. 6498) concerning payment of debts out of compensation for trust land on the Standing Rock Reservation taken by the United States was considered, ordered to a third reading, read the third time, and passed.

PAYMENT OF DEBTS OUT OF COMPENSATION FOR TRUST LAND ON THE CROW CREEK SIOUX RESERVATION

The bill (H.R. 6529) concerning payment of debts out of compensation for trust land on the Crow Creek Sioux Reservation taken by the United States was considered, ordered to a third reading, read the third time, and passed.

PREPARATION OF ROLL OF MEMBERS OF THE OTOE AND MISSOURIA TRIBE AND DISTRIBUTION OF JUDGMENT FUNDS

The bill (H.R. 10639) to amend section 3(b) of the act of May 9, 1958 (72 Stat. 105), relating to the preparation of a roll of the members of the Otoe and Missouria Tribe and to per capita distribution of judgment funds was considered, ordered to a third reading, read the third time, and passed.

KICKAPOO TRIBAL COUNCIL OF OKLAHOMA

The bill (H.R. 9028) to provide that certain funds shall be paid to the Kickapoo Tribal Council of Oklahoma was considered, ordered to a third reading, read the third time, and passed.

DONATION OF TRACT OF LAND ON THE OJO DEL ESPERITU SANTO GRANT, N. MEX.

The bill (H.R. 11161) to donate to the Pueblos of Zia and Jemez a tract of land on the Ojo del Esperitu Santo grant, N. Mex., was considered, ordered to a third reading, read the third time, and passed.

PAYMENT IN ADVANCE FOR REQUIRED PUBLICATIONS

The bill (S. 3579) to authorize agencies of the Government of the United States to pay in advance for required publications, and for other purposes, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act of June 12, 1930 (46 Stat. 580), is amended by (1) inserting after the word "subscription" the words "or other", and (2) deleting the words "and other periodicals" and inserting in lieu thereof the words "periodicals, and other publications".

SEC. 2. The following parts of Acts and all amendments thereto are repealed:

(1) The proviso to the paragraph headed "General Expense Library" under the caption "Library, Department of Agriculture" in the Act of March 4, 1909 (35 Stat. 1054);

(2) The first proviso to the paragraph headed "Regular Supplies, Quartermaster Corps" in the Act of April 27, 1914 (38 Stat. 362);

(3) The first parenthetical phrase under the caption "Pay, Miscellaneous" in the Act of March 3, 1915 (38 Stat. 929);

(4) Section 5 of the Act of March 4, 1915 (38 Stat. 1049);

(5) The tenth paragraph under the caption "United States Veterans' Bureau" in the Act of June 7, 1924 (43 Stat. 533).

PAYMENT OF TRAVEL AND TRANSPORTATION COSTS

The bill (S. 3485) to amend section 7 of the Administrative Expenses Act of 1946, as amended, to provide for the payment of travel and transportation costs for persons selected for appointment to certain positions in the United States, and for other purposes, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsections (b) to (d), inclusive, of section 7 of the Administrative Expenses Act of 1946 (60 Stat. 808, as amended, 5 U.S.C. 73b–3) are amended to read as follows:

"(b) Appropriations for the departments shall be available in accordance with regulations prescribed by the President, for expenses of travel of persons appointed, and of student trainees when promoted upon completion of college work, to positions in the United States for which there is determined by the Civil Service Commission to be a manpower shortage, and for expenses of transportation of their immediate families and their household goods and personal effects and for advances of funds to the extent authorized by section 1 (a) and (b) of this Act, from their places of actual residence at time of selection or promotion to their duty station. Travel and transportation expenses shall not be paid upon promotion of a student trainee after completion of college work if such expenses were paid upon his appointment as a student trainee. Such travel expenses may include per diem and mileage allowance as provided for civilian officers and employees by the Travel Expense Act of 1949, as amended. Travel and transportation expenses may be allowed whether the person selected has been appointed or not at the time of such travel. However, the travel and transportation expenses authorized by this subsection shall not be allowed unless the person selected or promoted shall agree in writing to remain in the Government service for twelve months following his appointment or promotion unless separated for reasons beyond his control and acceptable to the department or agency concerned. In case of violation of such agreement, any moneys expended by the United States on account of such travel and transportation shall be recoverable from the individual concerned as a debt due the United States.

"(c) The authority of the Civil Service Commission to determine for purposes of this Act positions for which there is a manpower shortage shall not be delegated.

"(d) Nothing contained in this section shall impair or otherwise affect the authority of any department under existing law to pay travel and transportation expenses of persons designated in subsection (b) hereof."

SEC. 2. This Act shall take effect as of August 25, 1960.

NEGOTIATED CONTRACTS

The Senate proceeded to consider the bill (S. 3487) to amend the "Anti-Kickback Statute" to extend it to all negotiated contracts, which had been reported from the Committee on Government Operations, with an amendment, on page 2, line 24, after the word "any", to strike out "negotiated", so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the

Act of March 8, 1946 (60 Stat. 37), entitled "An Act to eliminate the practice by subcontractors, under cost-plus-a-fixed-fee or cost reimbursable contracts of the United States, of paying fees or kickbacks, or of granting gifts or gratuities to employees of a cost-plus-a-fixed-fee or cost reimbursable prime contractors or of higher tier subcontractors for the purpose of securing the award of subcontracts or orders" is hereby amended to read as follows:

"That the payment of any fee, commission, or compensation of any kind or the granting of any gift or gratuity of any kind, either directly or indirectly, by or on behalf of a subcontractor, as hereinafter defined, (1) to any officer, partner, employee, or agent of a prime contractor holding a negotiated contract entered into by any department, agency, or establishment of the United States for the furnishing of supplies, materials, equipment, or services of any kind whatsoever; or to any such prime contractor, or (2) to any officer, partner, employee, or agent of a higher tier subcontractor holding a subcontract under the prime contract, or to any such subcontractor either as an inducement for the award of a subcontract or order from the prime contractor or any subcontractor, or as an acknowledgment of a subcontract or order previously awarded, is hereby prohibited. The amount of any such fee, commission, or compensation or the cost or expense of any such gratuity or gift, whether heretofore or hereafter paid or incurred by the contractor, shall not be charged, either directly or indirectly, as a part of the contract price charged by the subcontractor to the prime contractor or higher tier subcontractor. The amount of any such fee, cost, or expense shall be recoverable on behalf of the United States from the subcontractor or the recipient thereof by setoff of moneys otherwise owing to the subcontractor either directly by the United States, or by a prime contractor under any contract or by an action in an appropriate court of the United States. Upon a showing that a subcontractor paid fees, commissions, or compensation or granted gifts or gratuities to an officer, partner, employee, or agent of a prime contractor or of another higher tier subcontractor, in connection with the award of a subcontract or order thereunder, it shall be conclusively presumed that the cost of such expense was included in the price of the subcontract or order and ultimately borne by the United States. Upon the direction of the contracting department or agency or of the General Accounting Office, the prime contractor shall withhold from sums otherwise due a subcontractor any amount reported to have been found to have been paid by a subcontractor as a fee, commission, or compensation or as a gift or gratuity to an officer, partner, employee, or agent of the prime contractor or another higher tier subcontractor."

SEC. 2. For the purpose of this Act, the term "subcontractor" is defined as any person, including a corporation, partnership, or business association of any kind, who holds an agreement or purchase order to perform all or any part of the work or to make or furnish any article or service required for the performance of a negotiated contract or of a subcontract entered thereunder, the term "person" shall include any subcontractor, corporation, association, trust, joint stock company, partnership, or individual, and the term "negotiated contract" means made without formal advertising.

SEC. 3. For the purpose of ascertaining whether such fees, commissions, compensation, gifts, or gratuities have been paid or granted by a subcontractor, the General Accounting Office shall have the power to inspect the plants and to audit the books and records of any prime contractor or subcontractor engaged in the performance of a negotiated contract.

SEC. 4. Any person who shall knowingly, directly or indirectly, make or receive any such prohibited payment shall be fined not more than $10,000 or be imprisoned for not more than two years, or both.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

CONVEYANCE OF ALL LANDS COMPRISING FORT DEARBORN, AND RYE AIR FORCE BASE, N.H.

The Senate proceeded to consider the bill (S. 2712) to authorize the Administrator of General Services to convey all lands comprising Fort Dearborn, Rye, N.H., and Rye Air Force Base, Rye, N.H., to certain former owners of such lands, which had been reported from the Committee on Government Operations, with an amendment on page 2, line 22, after the word "Administrator", to strike out the comma and "through negotiations with the former owner, to be a fair and equitable price" and insert "of General Services to be equal to the current fair market value", so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) notwithstanding any other provision of law, the Administrator of General Services is authorized to convey all right, title, and interest of the United States in and to all lands comprising Fort Dearborn, Rye, New Hampshire (consisting of ninety-one and forty-four one hundredths acres), and Rye Air Force Base, Rye, New Hampshire (consisting of approximately forty-four acres), acquired by the United States during World War II and which have been declared to be surplus to the needs of the United States, to the former owners of such land or any interest therein, upon receipt by the Administrator from any such owner of an application for reconveyance as hereinafter provided.

(b) In any manner as he shall by regulation prescribe, the Administrator shall give notice to the former owner of the availability for reconveyance of land or interest in land pursuant to this Act. Such reconveyance shall be made only after the Administrator has received from the former owner an application for reconveyance in the form prescribed by the Administrator by regulation. Such application shall be made within a period of forty-five days following the date of issuance of such notice.

(c) Any reconveyance of land or interest in land made pursuant to this Act shall be subject to (1) such exceptions, restrictions, and reservations as the Administrator may determine are in the public interest; and (2) payment by the former owner as consideration for the reconveyance of an amount determined by the Administrator of General Services to be equal to the current fair market value.

SEC. 2. Where arrangements satisfactory to the Administrator have not been made during a ninety-day period following the date of issuance of the notice provided for in subsection (b) of the first section of this Act, the Administrator may dispose of any land or interest in land with respect to which such application was filed in accordance with the applicable provisions of the Federal Property and Administrative Services Act of 1949.

SEC. 3. As used in this Act, the term "former owner" means the person from whom any land or interest in land referred to in subsection (a) of the first section of this Act was acquired by the United States; or if any such person is deceased, his spouse; or if such spouse is also deceased, one or more of his natural or adopted children.

SEC. 4. No application shall be received by the Administrator pursuant to the provisions of this Act after one year from the date of its enactment.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

PENALTIES FOR USE OF GOVERNMENT-OWNED VEHICLES FOR OTHER THAN OFFICIAL PURPOSES

The Senate proceeded to consider the bill (H.R. 766) to amend section 5 of the act of July 16, 1914, relating to penalties for the use of Government-owned vehicles for other than official purposes, which had been reported from the Committee on Government Operations, with an amendment on page 1, after line 9, to strike out:

Any officer or employee of the Government who willfully uses or authorizes the use of any Government-owned vehicle or aircraft, or of any vehicle or aircraft leased by the Government, for other than official purposes or otherwise violates the provisions of this subsection shall be subject to such disciplinary action as the head of the department concerned or his representative may prescribe, which disciplinary action may include removal from his position, if circumstances warrant.

And, in lieu thereof, to insert:

Any officer or employee of the Government who willfully uses or authorizes the use of any Government-owned vehicle or aircraft, or of any vehicle or aircraft leased by the Government, for other than official purposes or otherwise violates the provisions of this subsection shall be suspended from duty by the head of the department concerned, without compensation, for not less than one month, and shall be suspended for a longer period or summarily removed from office if circumstances warrant.

The amendment was agreed to.

The amendment was ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time and passed.

NATIONAL TROPICAL BOTANIC GARDEN

The Senate proceeded to consider the bill (S. 2919) to provide that the Secretary of the Smithsonian Institution shall study and investigate the desirability and feasibility of establishing and maintaining a national tropical botanic garden, which had been reported from the Committee on Public Works, with an amendment, to strike out all after the enacting clause and insert:

That the President of the United States is authorized to have a complete study and investigation made of the desirability and feasibility of establishing and maintaining a national tropical botanic garden to be located in the State of Hawaii for the purpose of research and education concerning tropical flora, and for the instruction and recreation of the people. The study and in-

vestigation may be made by such departments or agencies as the President may designate.

SEC. 2. There shall be submitted to Congress, within one year after funds are made available to conduct the study and investigation authorized by this Act, a report of the findings of such study and investigation, together with such recommendations as are deemed appropriate. Such report shall contain, but shall not be limited to, specific findings with respect to (1) which department or agency of the Federal Government would be best suited to establish and maintain the botanic garden referred to in the first section of this Act, and (2) the estimated cost to the United States of establishing and maintaining such a botanic garden.

SEC. 3. There are hereby authorized to be appropriated such sums, not to exceed $5,000 as may be necessary to carry out the provisions of this Act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended, so as to read: "A bill providing for a study and investigation of the desirability and feasibility of establishing and maintaining a national tropical botanic garden."

BILLS PASSED OVER

The bill (S. 3672) to adjust the rates of basic compensation of certain officers and employees of the Federal Government, and for other purposes, was announced as next in order.

Mr. HART. Over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 3278) to amend section 701 of the Housing Act of 1954 (relating to urban planning grants), and title II of the Housing Amendments of 1955 (relating to public facility loans), to assist State and local governments and their public instrumentalities in improving mass transportation services in metropolitan areas, was announced as next in order.

Mr. HART. Mr. President, this bill is a very desirable one; but I must ask that it go over, by reason of the fact that it is not appropriate for disposition during the call of the calendar.

The PRESIDING OFFICER. Objection is heard, and the bill will be passed over.

The bill (S. 2917) to establish a price support level for milk and butterfat was announced as next in order.

Mr. HART. Mr. President, let me say that this bill, too, is a very desirable one; but, again, I must ask that the bill go over, by reason of the fact that it is not appropriate for disposition during the call of the calendar.

The PRESIDING OFFICER. Objection is heard, and the bill will go over.

RELEASE OF RESTRICTIONS AND RESERVATIONS IN CONVEYANCE OF CERTAIN LAND TO THE STATE OF WISCONSIN

The bill (H.R. 11952) to repeal the act of May 29, 1958, which authorized and directed the Administrator of General Services to provide for the release of restrictions and reservations contained in an instrument conveying certain land by the United States to the State of Wisconsin was considered, ordered to a third reading, read the third time, and passed.

COLLECTION AND PUBLICATION OF STATISTICS OF GRADE AND STAPLE LENGTH OF COTTON

The Senate proceeded to consider the bill (H.R. 11646) to amend the act authorizing the Secretary of Agriculture to collect and publish statistics of the grade and staple length of cotton, as amended, by defining certain offenses in connection with the sampling of cotton for classification and providing a penalty provision, and for other purposes, which had been reported from the Committee on Agriculture and Forestry, with an amendment, on page 2, line 12, after "(c)", to strike out "for any person to alter, or cause to be altered, any sample taken for classification under this Act by any means such as trimming, peeling, or dressing the sample, or by removing any leaf, trash, dust, or other material from the sample" and insert "for any person knowingly to alter or cause to be altered a sample taken for classification under this Act by any means such as trimming, peeling, or dressing the sample, or by removing any leaf, trash, dust, or other material from the sample for the purpose of misrepresenting the actual quality of the bale from which the sample was taken".

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

BILL PASSED OVER

The bill (S. 3450) to amend section 22 (relating to the endowment and support of colleges of agriculture and mechanic arts) of the act of June 29, 1935, to increase the authorized appropriation for resident teaching grants to land grant institutions, was announced as next in order.

Mr. HART. Mr. President, again, it is a desirable bill, but certainly not appropriate for calendar action. I ask that it go over.

The PRESIDING OFFICER. The bill will go over.

EASEMENT OF CERTAIN LANDS TO THE CINCINNATI SOUTHERN RAILWAY

The bill (S. 3665) to authorize the Secretary of Agriculture to grant an easement over certain lands to the trustees of the Cincinnati Southern Railway, their successors, and assigns was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding any other provision of law, the Secretary of Agriculture is authorized, upon such terms as he may deem advisable, to grant and convey by proper instrument a perpetual easement to the trustees of the Cincinnati Southern Railway, their successors and assigns, in, upon, across, and over national forest lands and other lands under the jurisdiction of the Department of Agriculture for the construction, maintenance, and operation of the line of railway incident to the relocation of its main line between Tateville, Kentucky, and Flat Rock, Kentucky, and for any related purposes deemed appropriate by the Secretary: *Provided,* That such easement (a) shall be granted only upon a finding by the Secretary that it will not be incompatible with the public interest, (b) shall not include any more land than is reasonably necessary for the purpose for which granted, (c) shall include provisions for payment of adequate compensation, and (d) may include a right to use from the subject lands materials and products for the construction and maintenance of authorized improvements thereon upon the payment of adequate compensation therefor.

SEC. 2. All or any part of such easement may be annulled or forfeited by declaration of the Secretary for failure to comply with the terms of the grant or for nonuse for a period of two consecutive years or abandonment of rights granted under authority hereof.

TREATMENT OF BASIC AGRICULTURAL COMMODITIES

The Senate proceeded to consider the bill (S. 3117) to treat all basic agricultural commodities alike with respect to the cost of remeasuring acreage, which had been reported from the Committee on Agriculture and Forestry, with an amendment, to strike out all after the enacting clause and insert:

That section 374(b) of the Agricultural Adjustment Act of 1938, as amended (7 U.S.C. 1374(b)), is amended by striking out the last sentence thereof.

SEC. 2. Section 374(c) of the Agricultural Adjustment Act of 1938, as amended, is amended by adding at the end thereof the following: "The Secretary shall by appropriate regulations provide for the remeasurement upon request by the farm operator of the acreage planted to such commodity on the farm and for the measurement of the acreage planted to such commodity on the farm remaining after any adjustment of excess acreage hereunder and shall prescribe the conditions under which the farm operator shall be required to pay the county committee for the expense of the measurement of adjusted acreage or the expense of remeasurement after the initial measurement or the measurement of adjusted acreage. The regulations shall also provide for the refund of any deposit or payment made for the expense of the remeasurement of the initially determined acreage or the adjusted acreage when because of an error in the determination of such acreage the remeasurement brings the acreage within the allotment or permitted acreage or results in a change in acreage in excess of a reasonable variation normal to measurements of acreage of the commodity. Unless the requirements for measurement of adjusted acreage are met by the farm operator, the acreage prior to such adjustment as determined by the county committee shall be considered the acreage of the commodity on the farm in determining whether the applicable farm allotment has been exceeded.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

EXTENSION OF MINIMUM MARKETING QUOTA FOR EXTRA LONG STAPLE COTTON

The bill (H.R. 12115) to extend the minimum national marketing quota for extra long staple cotton to the 1961 crop was considered, ordered to a third reading, read the third time, and passed.

CONVEYANCE OF CERTAIN REAL PROPERTY TO THE VILLAGE OF HIGHLAND FALLS, N.Y.

The Senate proceeded to consider the bill (H.R. 6479) to provide for the conveyance of certain real property of the United States to the village of Highland Falls, N.Y., which had been reported from the Committee on Armed Services, with an amendment, on page 1, line 3, after the world "at", to strike out "50 per centum of the ".

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

BILLS PASSED OVER

The bill (S. 3473) to provide for advance consultation with the Fish and Wildlife Service and with State wildlife agencies before the beginning of any Federal program involving the use of pesticides or other chemicals designed for mass biological controls, was announced as next in order.

Mr. HART. Mr. President, by request, I ask that the bill go over, and I also ask the Calendar No. 1664, H.R. 12381, which is the pending business, also go over.

The PRESIDING OFFICER. Calendar Nos. 1663 and 1664 will be passed over.

QUIET TITLE TO CERTAIN LANDS WITHIN THE NEZ PERCE INDIAN RESERVATION, IDAHO

The Senate proceeded to consider the bill (S. 2711) to quiet title to certain lands within the Nez Perce Indian Reservation, Idaho, and for other purposes, which has been reported from the Committee on Interior and Insular Affairs, with an amendment, on page 2, after line 2, to strike out:

SEC. 3. This Act shall become effective upon entry of the Nez Perce Tribe into a stipulation in litigation now pending before the Indian Claims Commission under section 2 of the Act of August 13, 1946 (60 Stat. 1049) that this land is not involved in such litigation.

And, in lieu thereof, to insert:

SEC. 3. The Indian Claims Commission is directed to determine in accordance with the provisions of section 2 of the Act of August 13, 1946 (60 Stat. 1050), the extent to which the value of the title conveyed by this Act should or should not be set off against any claim against the United States determined by the Commission.

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That all of the right, title, and interest of the United States in the lands within the Nez Perce Reservation, Idaho, now reserved for agency, school, or cemetery purposes is hereby declared to be held in trust for the Nez Perce Tribe of Indians, subject to the right of the United States to use said lands for agency, school, or administrative purposes.

SEC. 2. Nothing in this Act shall be construed as confirming or denying the claim that said lands have, since 1855 and up to the effective date of this Act been held in trust by the United States for the Nez Perce Tribe.

SEC. 3. The Indian Claims Commission is directed to determine in accordance with the provisions of section 2 of the Act of August 13, 1946 (60 Stat. 1050), the extent to which the value of the title conveyed by this Act should or should not be set off against any claim against the United States determined by the Commission.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

TRUSTEESHIP OF CERTAIN LANDS FOR THE CHEYENNE RIVER SIOUX TRIBE OF INDIANS

The Senate proceeded to consider the bill (H.R. 4786) declaring certain lands to be held in trust for the Cheyenne River Sioux Tribe of Indians of South Dakota, which had been reported from the Committee on Interior and Insular Affairs, with an amendment, on page 2, after line 13, to insert a new section, as follows:

SEC. 3. The Indian Claims Commission is directed to determine in accordance with the provisions of section 2 of the Act of August 13, 1946 (60 Stat. 1050), the extent to which the value of the title conveyed by this Act should or should not be set off against any claim against the United States determined by the Commission.

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

CONVEYANCE OF CERTAIN LAND IN TRUST TO THE CITIZEN BAND OF POTAWATOMI INDIANS OF OKLAHOMA

The Senate proceeded to consider the bill (H.R. 7990) to convey certain land of the United States in trust to the Citizen Band of Potawatomi Indians of Oklahoma, which had been reported from the Committee on Interior and Insular Affairs, with an amendment, to strike out all after the enacting clause and insert:

That the Secretary of the Interior is authorized and directed to convey to the Citizen Band of Potawatomi Indians of Oklahoma, all right, title, and interest of the United States in and to approximately 57.99 acres of land more particularly described in section 2 of this Act, subject to the right of the Absentee Shawnee of Oklahoma, Sac and Fox of Oklahoma, Kickapoo of Oklahoma, and Iowa Tribe of Oklahoma to use the Potawatomi community house that may be constructed and maintained thereon. The title of the tribe thereto shall be subject to no exemption from taxation or restriction on use, management or disposition because of Indian ownership.

SEC. 2. The property referred to in the first section of this Act is more particularly described as follows: Lot 1 (northwest quarter of northwest quarter) and north half of lot 2 (north half of southwest quarter of northwest quarter) and the part of the north half of the southeast quarter of the northwest quarter laying west of the east right-of-way line of Oklahoma State Highway Numbered 18, all in section 31, township 10 north, range 4 east of the Indian meridian, in Pottawatomie County, Oklahoma, and containing 57.99 acres more or less.

SEC. 3. The Indian Claims Commission is directed to determine in accordance with the provisions of section 2 of the Act of August 13, 1946 (60 Stat. 1050), the extent to which the value of the title conveyed by this Act should or should not be set off against any claim against the United States determined by the Commission.

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

The title was amended so as to read: "An act to provide for the conveyance of certain land of the United States to the Citizen Band of Potawatomi Indians of Oklahoma".

BILLS PASSED OVER

The bill (H.R. 12232) making appropriations for the legislative branch for the fiscal year ending June 30, 1961, and for other purposes, was announced as next in order.

Mr. HART. Over, as not appropriate for calendar action.

The PRESIDING OFFICER. The bill will go over.

The bill (S. 3292) to provide for the establishment of a Department of Housing and Metropolitan Affairs, and for other purposes, was announced as next in order.

Mr. HART. Again, though a very desirable bill, this is not appropriate calendar business. I ask that it go over.

The PRESIDING OFFICER. The bill will go over.

Mr. HART. Mr. President, I ask that the calendar call be concluded at this point. No reports have been received with respect to the remaining items on the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HART. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CLARK. Mr. President, I understand the distinguished Senator from South Carolina——

The PRESIDING OFFICER. Debate is not in order during a quorum call.

Mr. CLARK. Mr. President, I ask unanimous consent that further proceedings under the quorum call be dispensed with, in order to permit the Senator from South Carolina to make a speech upon another matter before we consider the unfinished business.

Mr. MANSFIELD. Mr. President, reserving the right to object, may I ask the Senator from Pennsylvania a question?

Mr. McCLELLAN. Mr. President, reserving the right to object——

The PRESIDING OFFICER. There can be no debate during a quorum call.

Mr. MANSFIELD. Mr. President, I withdraw my objection.

The PRESIDING OFFICER. Objection is heard.

Mr. MANSFIELD. Mr. President, I withdraw my objection.

The PRESIDING OFFICER. The objection is withdrawn. Without objection, further proceedings under the quorum call are dispensed with.

Mr. McCLELLAN. Mr. President, did I correctly understand the unanimous-consent request was for a specific purpose, instead of a request to suspend proceedings under the quorum call, so that any business might be transacted?

Was there a request to put a condition upon the suspension, so that only one Senator could make a speech?

Mr. CLARK. Mr. President, I remove the condition.

Mr. McCLELLAN. With the condition removed, I have no objection.

PUBLIC DEBT AND TAX RATE EXTENSION ACT OF 1960

The PRESIDING OFFICER. Without objection the Chair lays before the Senate the unfinished business.

The Senate resumed the consideration of the bill (H.R. 12381) to increase for a 1-year period the public debt limit set forth in section 21 of the Second Liberty Bond Act and to extend for 1 year the existing corporate normal-tax rate and certain excise-tax rates.

FAILURES OF U.S. POLICY AS ADMINISTERED BY THE EISENHOWER ADMINISTRATION

Mr. JOHNSTON of South Carolina. Mr. President, after the collapse of the summit conference, I refrained from criticizing President Eisenhower or any of our officials in charge of foreign affairs, for an obvious reason.

President Eisenhower was not to blame for Mr. Khrushchev's blowup and his subsequent walkout from the summit conference. But at this point in our history I feel it is necessary for Americans to speak up and to be heard concerning the overall foreign policy which has been developed during the past 7½ years. While the collapse of the summit cannot be blamed personally on Mr. Eisenhower nor those in high place in our Government, it is the belief of many Americans that the stage for the collapse of the summit conference had been set by our 7½ years of drifting, weak foreign policies. I say foreign policies because we seem to have a different one for Latin America than we do for Europe and for our once-upon-a-time allies in other sections of the world.

The latest reflection from abroad substantiating the failure of our foreign policies is the cancellation of President Eisenhower's visit to Japan, caused by the unhalted rioting of radical leftwing mobs led by Communists in Japan. These untamed mobs, after having tasted blood, so to speak, I fear will not diminish their disorders, but will attempt now to overthrow the present friendly Japanese Government.

If that happens, Japan will then be stepping into the road which Germany followed after World War I, when Adolf Hitler led a frenzied, radical crowd and overthrew the democratic government headed by Von Hindenburg.

In Japan the United States has invested millions of dollars in foreign aid, in rehabilitation funds, in free food and clothing, and, most dangerously of all, in rehabilitating her industries, particularly her textile, plywood, and other industries which compete severely with American industries, both abroad and at home. Our industries under the grueling policies of our State Department—which, for the last 7½ years, has cried, "We must suffer in order to retain the friendship of Japan"—have lost billions of dollars in foreign markets and markets in the United States to Japanese-manufactured textile and plywood products made with cheap labor and imported into this country under extremely favorable conditions.

What advantage is there in retaining an alleged alliance or friendship with a nation which cannot guarantee the peaceful visit of our Chief Executive to that country?

The United States—as bitterly as we oppose the Russian Communist regime; as bitterly as we feel about Premier Khrushchev personally—not once failed to guarantee security for him when he visited this country. Yet when the President of the United States desires to visit Japan, a nation to which we have practically given everything from money to markets and industry, Japan cannot guarantee his safety.

The present administration has failed bitterly in its ventures into foreign affairs.

If the situation in Japan were an isolated condition, it would not be sufficient cause for alarm, but this situation we find in Japan is merely a reflection of situations we have witnessed occurring throughout the perimeter of so-called friendly nations surrounding the Communist bloc. Everywhere Communists are taking over radical groups, leftwing student organizations, and similar dissatisfied partisans, and are leading demonstrations either to embarrass or to actually overthrow governments which we have supposedly been strengthening through the years with billions of dollars of foreign-aid assistance and military pacts.

It is not necessary to go into the details of every riot in every nation. The truth is that we have had riots in our own United States which have Communist agitation as a foundation. I do not say those who participated in these riots were Communists, but they have swallowed the Communist line and have become the tools of Communist agitators. Even former President Truman, a most liberal man on the subject of integration, has acknowledged that student demonstrations taking the form of sit-in strikes in the United States have had Communist inspiration.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. JOHNSTON of South Carolina. I yield.

Mr. JAVITS. I think it is pertinent to the Senator's remarks to note that I have seen on the ticker the statement that the United States-Japan Security Treaty has taken effect, so far as Japan is concerned, notwithstanding the efforts of the Japanese demonstrators to stop it. I think, therefore, the Senator's remarks are most interesting at this particular moment.

We have a right to look forward to early approval by the Senate of the treaty, because of the fact that the people of both nations are asserting themselves, notwithstanding the effort of street mobs to distort the processes of democratic government. We have every right to expect that the Japanese people in a new election, which will probably come soon, will again assert their confidence in the value of democratic government, and that we shall assert ours by ratifying the treaty.

I thank my colleague.

Mr. JOHNSTON of South Carolina. I am glad to have the Senator's comments.

I was one who urged that we not consider the treaty until it had been acted upon in Japan, for I felt that would result in quicker action. I thought that if we held back and let the Japanese act first, action would come sooner.

Mr. JAVITS. The Senator has proved to be very prudent in that belief.

Mr. JOHNSTON of South Carolina. Going back to the matter of foreign policy failures, I think the most bitter pill that we have to swallow today is the situation we find only 90 miles from our shoreline on the island of Cuba.

We secured freedom for Cuba when we fought the Spanish-American War, and later guaranteed that nation freedom. In 1957, following an investigation I made as a member of the Internal Security Subcommittee of the Senate Judiciary Committee, I filed a report with the Senate which warned of Communist activity in Latin America. I pointed out that communism was directed mainly toward establishing a beachhead in some place in the Caribbean from which it would act as a springboard to stir up anti-Americanism, and to even overthrow friendly governments.

When I issued this report, the State Department brushed it aside with ridicule, and the great liberal newspapers of the Nation such as the local Washington Post and the New York Times made fun

of my warnings of Communist activity in Latin America. Today these great mouthpieces of the liberals are eating crow, much to the regret of Americans everywhere.

The Castro regime in Cuba has seized American properties valued at over $300 million to date. The seizures continue: the midnight late TV shows from Cuba continue to criticize the American Government in frenzied, fanatical Communist tones: the Communists continue to march into stronger positions in Cuba; they have negotiated with Russia for construction of a superairport capable of taking care of the largest bombers in the world; there are reports that Russian submarines will be tended from Cuba; Cuba is now a springboard of Communist propaganda aimed at running us out of the Panama Canal and cutting us off from our friends throughout Latin America.

Senators may recall that I made an investigation concerning the discontent and ill feeling toward the United States on the part of Panamanians, and I introduced a bill, which was subsequently passed, to make certain amends concerning payments to Panamanians who were working for our Government. The law brought some relief. But at the present time we still find discontent all along the Panama Canal.

It is a matter of public record that the Cuban Government has traded sugar for oil with Russia. American refiners in Cuba have refused to refine the Russian oil, and now the threat exists that these private properties will also be seized.

American-operated hotels in Cuba have been seized by the Castro Communist government.

This is not something happening behind the Iron Curtain; it is happening in our back door. With the establishment of a well-heeled Communist regime in Cuba, the soft underbelly of the United States becomes the most vulnerable area from a military standpoint.

While all this has been going on in Cuba, what has the present administration done about the situation except to drift?

The truth is that the present administration has done little, if anything, to change the sequence of events, but continues to allow various programs and policies to actually finance and underwrite most of the cost of operation of the Communist regime in Cuba. The very success of the Communists in Cuba reflects downright failure of our Central Intelligence Agency to have adequate knowledge of what was going on under the covers. These Communist successes likewise reflect the miserable failures of our State Department which, until recently, had been in chorus with the harping criticisms of the strongest allies we have against communism in Latin America such as the Dominican Republic.

I do not approve of dictatorships personally wherever they are found, but if it is a dictatorship friendly to this country, then I think we are fools to join the Communist conspirators in overthrowing such a government so long as it is friendly to us.

U.S. dollars have, to a large extent, financed the revolution in Cuba, which has created a Communist conspiracy against the United States. During 1960 alone, for example, U.S. consumers of Cuban sugar will contribute into Castro's treasury $128 million in subsidies under existing trade agreements. This amount may rise to as high as $140 million before the year is out. U.S. corporations have rendered to the Castro government between $100 and $150 million in goods and services for which they have never been paid. On top of all this there is the matter of over $300 million worth of private property owned by Americans which Castro has seized. There still remains another $500 million worth of private property threatened with seizure. Estimates place at one-quarter of a billion dollars in American money annually is being pumped one way or another into this anti-American, Communist-dominated regime in Cuba. I hope the State Department will not allow or tolerate any such support from this country of their revolutions in Latin America anywhere.

Several months ago, I said the Monroe Doctrine, as announced by President Monroe in 1823, needed to be redefined and expanded upon. I think our Monroe Doctrine, unless we redefine and reembrace it at this very hour, will become a dead duck. We must state emphatically that the Monroe Doctrine not only includes invasion by military force under the banner of a foreign country, but also must include infiltration by international communism in whatever manner, shape, or form it may take.

We need to tell the Cuban Government that, if it promotes active aggression against any other Latin American nation, we will intervene under the Monroe Doctrine pronouncement, because Cuba has left the realm of being a Western Hemisphere nation and has become the active aggressive tool of international communism.

We need to tell the Cuban Government that if it does not cease its hostilities and slanderous accusations against us, we will sever diplomatic relations and stop our trade with her.

The future is dark on every horizon from an international relations standpoint. Until we take the bull by the horns and aggressively announce our positions and stands in terms that militaristic communism understands, we will continue to be pushed around and taken by all the world to be—in the colloquial American expression—suckers.

It is time we began balancing our trade agreements so they balance in favor of the United States, and not in favor of wishy-washy countries that cannot even protect our President on a good-will mission. It is time we cut off foreign aid from any country which appears to be headed for communism instead of democracy.

We have played around with this game of supporting friends for nearly 15 years, and if we cannot tell by this time whether they are going to become democracies and stand on their own hind feet, then it is time we let them fall by the wayside. The burden of carrying them is intolerable to the taxpayers of this country.

We need to continue to maintain strong military might under our own supervision—strong enough so that when the alliances and pacts and military aids and economic assistances upon which we have constructed a weak future all over this world collapse, we will not be left naked for the military ravagings of Communist aggression.

It is time for an agonizing reappraisal, and time for the present administration to listen beyond the confines of "one world" theorists and advisers who have maintained an Iron Curtain around the White House during the past 7½ years.

I do not think we can even wait until after the election, for the world is turning into a tempest. Slogans and foreign aid will not get us out of this hole; we need God-fearing, aggressive, clear-headed thinking and action which, as I said before, militaristic, aggressive communism can understand.

We have not stopped Communist aggression since the Korean war. We have merely diverted it into undercover, subversive forms of aggression which we must now halt at all costs.

Mr. President, I believe we must do the following things if we are to survive:

First. Redefine and expand our 1823 Monroe Doctrine to include protection of Western Hemisphere nations against infiltration from international communism by whatever manner, shape, or form it may take.

Second. Tell Cuba we no longer consider it anything less than a Communist tool and lay down the law to Castro that if he attempts aggression against any other nation that we will move in with force to stop him. We should halt the purchase of Cuban sugar until Castro reverses his policies.

Third. Halt foreign aid to all countries who do not take aggressive steps to oust Communist activities within their borders, such as in the case of Japan. We should also begin curtailing foreign aid to all nations. It is time they stood on their own two feet. The tax burden of carrying them is intolerable.

Fourth. Stop trying to buy friends and demand that reciprocal trade agreements be reciprocal in order to stop the flow of dollars abroad. They are accumulating in foreign lands at the present time. It is something which has not happened heretofore.

Fifth. Declare to international communism in aggressive and clear tones that we will stop it at all costs if it does not stay in its own backyard.

Only after these things have been done do I believe we can obtain a just and lasting peace. As long as present poli-

cies tolerate retrenchment and bullying, Russia will continue to advance and push us around, either with military force or through infiltration and revolution, and the rest of the world will continue to play us for suckers.

Mr. President, the current issue of U.S. News & World Report contains an excellent article covering the tragic situation in which we now find ourselves in relation to Cuba. I ask that this article, which tells in concise terms how communism has taken over in Cuba, be printed in the body of the RECORD following my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the U.S. News & World Report, June 20, 1960]

COMMUNISTS TAKE OVER 90 MILES FROM UNITED STATES

Castro's Cuba is now exposed in its true role—a Communist satellite offshore from United States. After months of careful preparation—Red dictatorship is in full control, backed and guided by Moscow. It's cut to the classic pattern: "politburo" in charge, filling jails with all who resist; press leashed to the Communist line; plots against neighbors; collective farms; an end to private property. All this is causing official U.S. concern at last. Communists, with Cuba nailed down, are branching out, spreading hate America through the hemisphere, eying military sites that can be converted into Red bases.

(Reported from Havana and Washington)

Communists now have taken full control in Cuba—an island located strategically only 90 miles from United States.

The Communist take-over—long discounted by the U.S. State Department—is beginning now to be recognized and admitted.

A dictatorship of the proletariat is firmly fixed. This dictatorship looks to Soviet Russia and to Communist China for political guidance and for support.

All opposition to the Communist dictatorship, where it rises, is suppressed. Secret police spy on the people, spreading fear. Thousands of political prisoners crowd jails.

The last of Cuba's independent newspapers have been taken over or suppressed. The Government controls all broadcasting. It now is a crime to make any statement unfavorable to communism or to the Government.

Private property, more than 300 million dollars' worth of it American owned, has been seized by the Government without tangible compensation. Large amounts of property remain to be seized.

Only one political party, the Popular Socialist—Communist—Party, is permitted to exist.

VISITORS FROM MOSCOW

It is against this background that Nikita Khrushchev, Soviet dictator, has agreed to visit Cuba. Anastas Mikoyan, Soviet No. 2 man, already has visited the island to do business. Both the Soviet Union and Czechoslovakia are opening large embassies in Havana. A mutual-defense treaty is being mentioned.

Cuba's rulers intend soon to recognize Communist China. They plan to ask Chou En-lai, Red China's Premier, to visit the island. Chinese Communists are increasingly active in Cuba.

The communization of Cuba is being pushed in all fields.

The New York Times, which has been friendly to the Castro government, reported in a dispatch from Havana dated June 6:

"The Castro regime is bending every effort to capture the minds of youth.

"The pattern of training is similar to that used by many totalitarian governments. It includes indoctrination in schools, on radio and television and in the press; military training from 7 years of age; a hate campaign, this time directed against the United States; the organization of work brigades of boys from 14 to 18; and meetings and fiestas, all with a political purpose.

"The Government feels that, once the youth of Cuba is indoctrinated with hatred toward the United States, the relations between the two countries will be permanently damaged."

The Associated Press, in a dispatch from New York City dated June 7, said:

"Three exiled Cuban newspaper publishers declared today that the Fidel Castro government is a puppet regime of the Soviet Union * * *. The three publishers, now living in the United States, all expressed agreement when asked if they considered the Castro regime a puppet of the Soviet Union."

The Associated Press, in an article from Caracas, Venezuela, dated June 7, said:

"Enthusiastic demonstrations greeted Dorticós [Cuban President Osvaldo Dorticós] last night on his arrival at Maiquetia Airport from Lima, Peru, and in the working-class sections of Caracas."

Dorticós has been on a tour of six Latin-American nations, selling anti-Americanism to workers, students, and peasants.

HEMISPHERIC BASE

Use of Cuba as the base for Communist operations in the Western Hemisphere is beginning to be recognized by the U.S. Government as of great and growing importance to the Soviet Union.

Communists, earlier, had gained control in two countries of this Hemisphere—Guatemala and British Guiana. The British Government in 1953 threw out a Communist administration in British Guiana. In 1954, a revolution in Guatemala drove out the pro-Communist regime. Communists are looking for a comeback in British Guiana once independence is given to that British outpost.

The Soviet base in Cuba is described as of vastly greater importance than earlier bases.

Here, on the doorstep of the United States, is an island country 780 miles long, offering potentials for military operations as well as for propaganda offensives directed at a whole continent.

Military possibilities, related to Communist purposes, are no longer being discounted.

The U.S. naval base at Guantánamo Bay, important to defense of the Caribbean area in time of war, is being harassed. Its removal is an objective of the Communist rulers of Cuba.

The Panama Canal already is in the line of political fire. There, too, Communists are active from their base in Cuba. Cubans staged an abortive invasion of Panama in 1959. Political means are expected to be employed from now on to try to force the United States to give up rights in this vital area.

In Cuba itself, Soviet "geologists" are making a complete survey of the island.

Important U.S. military officials believe that these "geologists" are studying possibilities for submarine and missile bases in this strategic area—up against the so-called soft underbelly of the United States. Officials are convinced that, as of the present, Soviet submarines are not being supplied from Cuba, although they are operating in Cuban waters.

In recent months, Cuba's Communist Government, already heavily armed, has invested up to $100 million more in new weapons.

INVASION STRATEGY

Haiti, only 45 miles away, lives in constant fear of invasion. The Government of Guatemala charges that the Cuban Government is training forces that will try to put Communists back in power in that country. Reliable sources report that Cuba is training troops in the Sierra Maestra for a landing in the Dominican Republic.

The plan is said to be this: Before the end of 1960, an internal uprising or military coup will be staged against Generalissimo Rafael Trujillo. When this happens, Castro will announce that the help of Cuba has been asked, and will move in on the Dominican Republic to establish a Communist Government.

Cuba alone, U.S. officials realize, is not the final objective of the Kremlin.

It is through Cuba that the Soviet Union expects to create trouble and to outflank the United States in the Western Hemisphere. Soviet Russia, highly sensitive to U.S. bases on its own periphery, is greatly interested in finding a way to show the United States what it feels like to have a potentially hostile military base next door.

THE FINANCIERS

How much money the Soviet Union and Communist China are prepared to invest in their Cuban satellite remains a question.

To date, Russia has accomplished her objectives at no cost. Instead, the Soviet Union has saved some money by purchasing a substantial amount of Cuban sugar at below the world price. Russia then sold this sugar to her people at a profit.

Castro's Communist Government is paying the Soviet Union and Red China a high price for the technicians, "geologists" and others who are moving in to remake Cuba into a Socialist state.

Means to finance the communization of Cuba actually are being provided on a large scale by the United States.

United States consumers in 1960 will contribute $128 million to Cuba as a subsidized price for sugar. That total may rise to $140 million through diversion of unfilled portions of sugar quotas to Cuba. In addition, American companies have contributed goods and services amounting to between $100 million and $150 million for which they have not been paid.

In one year, official observers point out, the United States is putting up about a quarter of a billion dollars to finance a regime that is openly hostile.

On top of that, the Communists in Cuba have confiscated more than $300 million worth of American property. An additional $500 million worth of American property is in danger of being taken over. The fiction of payment is created by offering some Americans bonds of the National Institute of Agrarian Reform in amounts far less than the real value of the properties. Bankers describe these bonds as having little value.

Communists are pictured in Havana as enjoying the spectacle of the United States financing a Communist revolution—while under violent attack by the Communist rulers it is helping.

The U.S. Congress has balked at a recommendation from President Eisenhower that he be given authority to reduce the subsidy to Cuba.

Resources from the United States are helping a government that is actively engaged in promoting the success of Communist movements throughout Latin America.

AGITATION TARGETS

In the field of agitation and subversion, Cuban agents are highly active. Labor unions, student groups, journalists, professors, landless peasants and nationalist movements of all kinds are primary objectives of Communist penetration from Havana.

In Venezuela, Cuba's leaders are striving to gain hold of the powerful oil workers union. Labor unions of Cuba have been taken over by the Government. Their leadership is in Communist hands. The Reds have had some success in breaking the influence of more conservative labor organizations in a number of South American countries. Chile, in the same way as Venezuela, is a major target for Communist penetration of unions.

All through Latin America, Cuban embassies are centers of Communist activity. American officials describe these embassies as areas of infection from which Communist doctrine and activity are spread.

In private conversations, officials show growing concern. One pointed out that Chile's big Communist Party is now 100 percent for Castro. Said the defense chief of another Latin-American country: "Castro is sending agents all over South America. He is backed, and presumably financed, by Russia. He's being taken as a serious threat."

The Federation of University Students of the University of Havana is active among student groups in many Latin-American countries. Students, in turn, are leaders in the attacks upon the United States and in supporting Communist causes. Financing of this activity that had come almost entirely from the Soviet Union now is supplemented by support from Cuba.

In the field of propaganda, Cuba's activity is even more intense.

Attacks upon United States and glowing accounts of the socialization of Cuba are beamed by powerful radio stations out of Havana to listeners throughout South and Central America. These stations are Government operated. Their No. 1 product is anti-American propaganda.

A Cuban news service, Prensa Latina—staffed largely by Communists—is furnished free to newspapers of Latin America. This is a full-fledged press service—costly to produce and transmit. Part of the bill is picked up by the Castro government in Cuba and, it is understood, part by Moscow.

Cuban officials are constantly on the move in the hemisphere. Their attention is directed not at the governments of Latin-American countries increasingly hostile to the Cuban revolution, but to disgruntled groups within nations where political stability is rare.

THE LAND REFORM

Socialization of Cuba itself is proceeding at a rapid rate.

Basically, Cuba is an agricultural country. Its socialization is being carried out under INRA—the National Institute of Agrarian Reform. INRA has become a superstate. It holds more than 4 million acres of land—about half of it taken from American owners and the other half from Cubans. It holds feed mills, packing plants, the entire fishing industry, many factories, about 600,000 cattle. INRA has seized or established more than 2,000 rural stores, now called "stores of the people."

Plans call for INRA to take over all privately owned sugar mills, including American ones. The agency already holds about a fourth of the country's mills. INRA's plans also call for creation of a Government-owned iron and steel complex, with plants to be supplied by the Soviet Union.

At first the talk was of "land reform." Peasants were to be given the land of big landowners—many from the United States. This idea drew widespread support from commentators in the United States.

Actually, INRA is creating giant cooperative farms—along Soviet lines. Instead of owning land, most peasants are ending up as wage earners, in the same or less desirable state than before the theft of what had been privately owned land.

INRA's executive director, Antonio Nuñez Jiménez, on a recent trip to Moscow, arranged for Soviet experts in larger numbers to carry forward his program, now in a disorganized state.

Under socialism, as brought to Cuba by Castro and his Communist aids, the people are not faring too well. The loyalty of the peasants and of many workers, however, is being held by promises of many good things to come.

Pay of workers, in fact, has been reduced by "voluntary contributions" to revolutionary activity. Inflation is beginning now to eat into standards of living as wages are controlled and prices move higher. Goods of many kinds are beginning to run short. Replacement of these goods is more difficult as American suppliers begin to balk at making gifts of their products.

In the middle class and among some groups of wage earners, including construction workers, there is growing dissatisfaction and alarm. Here, methods taught by the Soviet Union are applied to keep people in line.

BRIMMING JAILS

Spies and informers are on every side. Waiters in cafes and bars, barbers, beauty-shop operators, store clerks, taxi drivers, bellhops and servants report any criticism of the regime to intelligence agents. Children in the juvenile patrols—which the Government organized to replace Boy and Girl Scouts—are instructed to inform on their parents and neighbors.

Arrest swiftly follows these denunciations. Cuban prisons are jammed with political prisoners. The largest prison, on the Isle of Pines, holds about 5,000, with two prisoners in cells intended for one. Food is bad, sanitary facilities worse. Reading is prohibited. Common criminals are given better treatment than political prisoners.

Communist techniques are applied in all fields to try to socialize Cuba.

There are growing doubts whether a Communist Cuba can be made to work. These doubts would increase further, some officials believe, if the United States should decide not to subsidize the venture into communism taking place next door. It now is doubted that American businessmen will continue to supply goods to Cuba without certainty of payment.

The question being raised is whether Soviet Russia, guiding Cuba to communism, will come forward with the volume of aid that would be required to prevent an outbreak of violence among the people. American officials say that the Soviet Union never has been noted for making outright grants of aid on a large scale.

Russia obviously is playing for bigger stakes than Cuba. Through a communized Cuba, the Soviet rulers are described as aiming to penetrate and to get a firm foothold in the larger nations of South America. Once they are in the Americas on a firm footing, trouble confronting the United States could be immense.

DISCONTINUANCE OF REQUIREMENT FOR CERTAIN REPORTS

The PRESIDING OFFICER laid before the Senate the amendments of the House of Representatives to the bill (S. 899) to provide for the discontinuance of certain reports now required by law, which were, to strike out all after the enacting clause and insert:

That the following provisions of law, which relate to the submission of certain reports to Congress or other Government authority, are hereby repealed, as follows:

(1) Section 209 of the Revised Statutes (5 U.S.C. 164), relating to a certain statement of expenditures required to be made by the Secretary of State with respect to contingent expenses of certain activities abroad, which reads as follows:

"SEC. 209. The annual statement of expenditures from the contingent fund required to be made by the Secretary of State, must include all the contingent expenses of foreign intercourse and of all the missions abroad, except such expenditures as are settled upon the certificate of the President.".

(2) Section 3 of the Act entitled "An Act authorizing an appropriation to effect a settlement of the remainder due on Pershing Hall, a memorial already erected in Paris, France, to the Commander in Chief, officers, and men of the Expeditionary Forces, and for other purposes", approved June 28, 1935 (49 Stat. 426; 36 U.S.C. 492), which reads as follows:

"SEC. 3. An itemized report shall be transmitted to the Senate and House of Representatives on the first day of each regular session of Congress of expenditures made in pursuance herewith.".

(3)(A) Section 646(b) of title 14 of the United States Code, relating to certain reports to Congress by the Secretary of the Treasury with respect to certain claims against the United States for damage by Coast Guard vessels, which reads as follows:

"(b) On payment of any claim determined, compromised, or settled under this section at a net amount exceeding $3,000, but not exceeding $25,000, payable by the United States, the Secretary of the Treasury within twenty days of payment shall report to the Congress setting forth the nature of the claim, the vessel involved, the amount paid with respect thereto, the basis of the determination, compromise, or settlement, and other pertinent facts. The Secretary of the Treasury shall report to the Congress, at each session thereof, all claims which have been paid under this section. During any war the reports required under this section may omit any fact or facts disclosure of which, in the opinion of the Secretary, would be prejudicial to the national security.".

(B) Section 647(b) of title 14 of the United States Code, relating to certain reports to Congress by the Secretary of the Treasury with respect to certain claims of the United States for damage to Coast Guard property, which reads as follows:

"(b) Within twenty days after receipt of a payment in a net amount exceeding $3,000 due the United States pursuant to determination, compromise, or settlement of any claim under this section, the Secretary of the Treasury shall report to the Congress setting forth the nature of the claim; the vessel or vessels involved; the amount received; the basis of determination, compromise, or settlement; and other pertinent facts. During any war the reports required under this section may omit any fact or facts, disclosure of which in the opinion of the Secretary, would be prejudicial to the national security.".

(4) Section 1552(f) of title 10 of the United States Code, relating to reports to Congress by the Secretary of Defense with respect to claims incident to correction of military records, which reads as follows:

"(f) The Secretary of Defense for the military departments, and the Secretary of the

Treasury for the Coast Guard, shall report to Congress every six months on claims paid under this section during the period covered by the report. The report shall include for each claim the name of the claimant, a brief description of the claim, and a statement of the amount paid.".

(5) (A) Section 714 of title 10 of the United States Code, relating to reports to Congress with respect to length of tours of duty outside the United States by members of the Army and Air Force, which reads as follows:

"§ 714. Reports to Congress on length of tours of duty outside United States by members of Army and Air Force

"The Secretary of Defense shall advise the Committees on Armed Services of the Senate and the House of Representatives, on April 1 and October 1 of each year, of the regulations governing the length of tours of duty outside the United States by members of the Army and the Air Force, including any changes in those regulations.".

(B) That part of the analysis of chapter 41 of title 10 of the United States Code which reads as follows:

"714. Reports to Congress on length of tours of duty outside United States by members of Army and Air Force.".

(6) Section 408(b) of the Act entitled "An Act to authorize certain construction at military and naval installations, and for other purposes", approved June 17, 1950 (64 Stat. 245), which reads as follows:

"(b) The Secretary of Defense is authorized and directed to make a report to the Congress at the beginning of the first session of the Eighty-second Congress, and at the beginning of the first session of each succeeding Congress, listing all projects for the establishment or development of military, naval, or air-force installations and facilities by the construction, installation, or equipment of temporary or permanent public works which have been authorized by the Congress subsequent to the beginning of the Eightieth Congress and for which adequate funds for the completion thereof have not been appropriated. The report shall include any recommendations which the Secretary of Defense deems appropriate with respect to the rescission of all, or any portion, of the authority to proceed with any such project.".

(7) (A) Section 9805 of title 10 of the United States Code, relating to certain reports to Congress by the Secretary of the Air Force with respect to certain claims against and by the United States, which reads as follows:

"§ 9805. Reports to Congress

"The Secretary of the Air Force shall report to the Committees on Armed Services of the Senate and the House of Representatives within 20 days after paying a claim in an amount over $3,000 under section 9802 of this title, or receiving payment of a claim under section 9803 or 9804 of this title. The report shall include a description of the claim, the names of the vessels involved, a statement of the amount paid or received, the basis of the determination, and other pertinent information. The Secretary shall also report to Congress at each session all amounts paid or received under those sections during the period covered by the report. However, during a war, the Secretary may omit from a report under this section any information the disclosure of which he believes would prejudice the national security.".

(B) That part of the analysis of chapter 951 of title 10 of the United States Code which reads as follows:

"9805. Reports to Congress.".

(8) (A) Section 4805 of title 10 of the United States Code, relating to certain reports to Congress by the Secretary of the Army with respect to certain claims against and by the United States, which reads as follows:

"§ 4805. Reports to Congress

"The Secretary of the Army shall report to the Committees on Armed Services of the Senate and the House of Representatives within 20 days after paying a claim in an amount over $3,000 under section 4802 of this title, or receiving payment of a claim under section 4803 or 4804 of this title. The report shall include a description of the claim, the names of the vessels involved, a statement of the amount paid or received, the basis of the determination, and other pertinent information. The Secretary shall also report to Congress at each session all amounts paid or received under those sections during the period covered by the report. However, during a war, the Secretary may omit from a report under this section any information the disclosure of which he believes would prejudice the national security.".

(B) That part of the analysis of chapter 451 of title 10 of the United States Code which reads as follows:

"4805. Reports to Congress.".

(9) The last sentence of section 8 of the Armed Forces Leave Act of 1946, as amended (60 Stat. 967; 37 U.S.C. 37), which reads as follows: "Amounts expended hereunder shall be included in the annual reports to the Congress by the Departments concerned.".

(10) (A) Section 7624 of title 10 of the United States Code, relating to certain reports to Congress by the Secretary of the Navy with respect to admiralty claims against the United States, which reads as follows:

"§ 7624. Reports to Congress

"(a) The Secretary of the Navy shall report to the Committees on Armed Services of the Senate and the House of Representatives within 20 days after an amount over $3,000 is paid by him under section 7622 of this title or is received by him under section 7623. The report shall include a description of the claim, the names of the vessels involved, a statement of the amount paid or received, the basis of the determination, and other pertinent information.

"(b) The Secretary shall report to Congress at each session all claims that have been paid under section 7622 of this title during the period covered by the report.

"(c) During a war the Secretary may omit from a report under this section any information the disclosure of which he believes would prejudice the national security.".

(B) That part of the analysis of chapter 653 of title 10 of the United States Code which reads as follows:

"7624. Reports to Congress.".

(11) Section 4 of the Act entitled "An Act to authorize the construction of certain naval vessels, and for other purposes", approved February 6, 1942 (56 Stat. 53; Public Law 440, Seventy-seventh Congress), which reads as follows:

"SEC. 4. The Secretary of the Navy from time to time, but not less frequently than once every six months, shall transmit to the Congress a full report of all acquisitions of land effected under authority of this or any subsequent Act.".

(12) Section 302 of the Penalty Mail Act of 1948, as amended (62 Stat. 1048; 39 U.S.C. 321j), which reads as follows:

"SEC. 302. The Postmaster General shall report to the Congress and to the Bureau of the Budget within ninety days after the close of each fiscal year the number of envelopes, labels, wrappers, cards, and other articles bearing such penalty indicia procured or accounted for through him during such fiscal year by each executive department and agency, by each independent establishment, and by each organization and person authorized by law to use the penalty privilege.".

(13) That part of section 13 of the Act of June 25, 1910 (36 Stat. 858; 43 U.S.C. 148), relating to the authority of the Secretary of the Interior to reserve certain Indian lands valuable for power or reservoir sites or for irrigation projects and his reports thereon, which reads as follows: ", and he shall report to Congress all reservations made in conformity with this Act".

(14) Section 3 of the Act entitled "An Act to authorize the President of the United States to make withdrawals of public lands in certain cases", approved June 25, 1910, as amended (36 Stat. 848; 43 U.S.C. 143), which reads as follows:

"SEC. 3. That the Secretary of the Interior shall report all such withdrawals to Congress at the beginning of its next regular session after the date of the withdrawals.".

(15) Section 4 of the Act entitled "An Act authorizing the Secretary of the Interior to arrange with States or Territories for the education, medical attention, relief of distress, and social welfare of Indians, and for other purposes", approved April 16, 1934, as amended (49 Stat. 1459; 25 U.S.C. 455), which reads as follows:

"SEC. 4. That the Secretary of the Interior shall report annually to the Congress any contract or contracts made under the provisions of this Act, and the moneys expended thereunder.".

(16) The last sentence of section 10 of the Act of June 18, 1934 (48 Stat. 986; 25 U.S.C. 470), providing for an annual report to Congress of transactions involving loans to Indians, which reads as follows: "A report shall be made annually to Congress of transactions under this authorization.".

(17) Section 3 of the Act of December 18, 1942 (56 Stat. 1057; 30 U.S.C. 15), providing for the establishment of a research laboratory for the utilization of anthracite coal, which reads as follows:

"SEC. 3. The Secretary, acting through the United States Bureau of Mines, shall make a report to Congress at the beginning of each regular session of the activities of, expenditures by, and donations to, the laboratory established under this Act."

(18) Section 2 of the Act entitled "An Act to authorize appropriations for the Bureau of Reclamation for payments to school districts on certain projects during their construction status", approved June 29, 1948 (62 Stat. 1108; 43 U.S.C. 385b), which reads as follows:

"SEC. 2. The Secretary of the Interior shall furnish to the Congress each year, on or before the 3d day of January, a report on all activities undertaken during the preceding fiscal year pursuant to the provisions of this Act, together with such recommendations with respect to problems relating to it as he shall think appropriate.".

(19) Section 6 of the Act of October 26, 1949, as amended (63 Stat. 929; 16 U.S.C. 468e), establishing the National Trust for Historic Preservation in the United States, which reads as follows:

"SEC. 6. The National Trust shall, on or before the 1st day of March in each year, transmit to Congress a report of its proceedings and activities for the preceding calendar year, including the full and complete statement of its receipts and expenditures.".

(20) Section 3 of the Act entitled "An Act to authorize the Secretary of Agriculture to

cooperate with the Government of Mexico in the control and eradication of foot-and-mouth disease and rinderpest", approved February 28, 1947, as amended (61 Stat. 8; 21 U.S.C. 114d), which reads as follows:

"SEC. 3. Thirty days after the enactment of this Act, and every thirty days thereafter, the Secretary of Agriculture shall make a report to the Congress with respect to the activities carried on under this Act.".

(21) Section 7 of the Act of May 8, 1914, as amended (67 Stat. 85; 7 U.S.C. 347), relating to annual reports to Congress with respect to agricultural extension work, which reads as follows:

"SEC. 7. The Secretary of Agriculture shall make an annual report to Congress of the receipts, expenditures, and results of the cooperative agricultural extension work in all of the States, Territories, or possessions receiving the benefits of this Act, and also whether the appropriation of any State, Territory, or possession has been withheld, and, if so, the reason therefor.".

(22) The last paragraph of section 7 of the Act of March 2, 1887, as amended (69 Stat. 674; 7 U.S.C. 361g), relating to annual reports to Congress with respect to the work of agricultural experiment stations, which reads as follows:

"The Secretary of Agriculture shall make an annual report to the Congress during the first regular session of each year of the receipts and expenditures and work of the agricultural experiment stations in all the States under the provisions of this Act and also whether any portion of the appropriation available for allotment to any State has been withheld and if so the reasons therefor.".

(23) The first sentence of section 3 of the Act of June 15, 1936 (49 Stat. 1506; 36 U.S.C. 139b), establishing The National Yeomen F, which reads: "That said organization shall report annually to the Secretary of the Smithsonian Institution concerning its proceedings, and said Secretary shall communicate to Congress such portions thereof as he may deem of national interest and importance.".

(24) Subparagraph (3) of section 4(k) of the Communications Act of 1934, as amended (66 Stat. 712; 47 U.S.C. 154(k)(3)), which reads as follows:

"(3) information with respect to all persons taken into the employment of the Commission during the year covered by the report, including names, pertinent biographical data and experience, Commission positions held and compensation paid, together with the names of those persons who have left the employ of the Commission during such year: *Provided*, That the first annual report following the date of enactment of the Communications Act Amendments, 1952, shall contain such information with respect to all persons in the employ of the Commission at the close of the year for which the report is made;".

(25) That part of paragraph (2) of subsection (a) of the first section of the Act of July 25, 1956 (70 Stat. 648; 31 U.S.C. 701(a)(2)), relating to the simplification of Government accounting and the facilitation of the payment of Government obligations, which reads ": *Provided further*, That prior thereto the head of the agency concerned shall make such report with respect to each such restoration as the Director of the Bureau of the Budget may require, and shall submit such report to the Director, the Comptroller General, the Speaker of the House of Representatives, and the President of the Senate".

And to amend the title so as to read: "An Act to repeal certain provisions of law requiring the submission of certain reports to Congress, and for other purposes."

Mr. McCLELLAN. Mr. President, this bill originated with the Committee on Government Operations.

In 1957, in response to a request made by the committee, the Director of the Bureau of the Budget conducted a survey within the executive branch of the Government and recommended the discontinuance of 59 reports authorized by law to be submitted to the Congress, which the respective agencies and the Bureau of the Budget recommended be discontinued since they no longer were considered necessary and were held to serve no useful purpose.

All committees of the Senate were canvassed by the Committee on Government Operations to ascertain whether or not they also agreed that the 59 reports recommended by the Bureau of the Budget could be discontinued. As a result of recommendations from the various chairmen of the Senate committees, 14 of the reports recommended by the Bureau of the Budget were eliminated from the bill. The bill passed the Senate in revised form authorizing the discontinuance of 45 reports. The House of Representatives followed the same procedure of the Senate committee and as a result of recommendations made by the various committees of the House, the number of reports to be discontinued as provided in the Senate bill was reduced from 45 to 21. The House committee inserted four new items, thereby increasing the total to 25 reports which would be discontinued under the bill as amended by the House of Representatives.

Mr. President, I do not believe that the House amendments actually go far enough to eliminate all the reports that could be eliminated. But certainly the elimination of 25, as contained in the House amendments, would be a forward step, and would be making progress in the right direction. In view of the limited time remaining in Congress, and in view of the position taken by the House, I believe it would be well for the House amendments to be accepted.

Therefore I move that the Senate concur in the House amendments.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Arkansas.

The motion was agreed to.

PUBLIC DEBT AND TAX RATE EXTENSION ACT OF 1959

The Senate resumed the consideration of the bill (H.R. 12381) to increase for a 1-year period the public debt limit set forth in section 21 of the Second Liberty Bond Act and to extend for 1 year the existing corporate normal-tax rate and certain excise-tax rates.

Mr. BYRD of Virginia. Mr. President, I ask unanimous consent that Mr. Jay Glasmann, Assistant to the Secretary of the Treasury, be granted the privilege of the floor during the debate on the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD of Virginia. Mr. President, I make a point of no quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk called the roll and the following Senators answered to their names:

[No. 234]

Aiken	Clark	Mansfield
Anderson	Curtis	Muskie
Bartlett	Dworshak	Pastore
Beall	Ervin	Prouty
Bible	Gore	Scott
Brunsdale	Hart	Smith
Bush	Hartke	Sparkman
Byrd, Va.	Johnson, Tex.	Talmadge
Byrd, W. Va.	Johnston, S.C.	Wiley
Cannon	Keating	Williams, Del.
Carlson	Kuchel	Young, Ohio
Case, S. Dak.	Lusk	

Mr. MANSFIELD. I announce that the Senator from Colorado [Mr. CARROLL], the Senator from California [Mr. ENGLE], the Senator from Rhode Island [Mr. GREEN], the Senator from North Carolina [Mr. JORDAN], the Senator from Washington [Mr. MAGNUSON], the Senator from Georgia [Mr. RUSSELL], the Senator from Mississippi [Mr. STENNIS], the Senator from Georgia [Mr. TALMADGE], and the Senator from South Carolina [Mr. THURMOND] are absent on official business.

The Senator from Missouri [Mr. HENNINGS] is absent because of illness.

I further announce that the Senator from Tennessee [Mr. KEFAUVER], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Michigan [Mr. MCNAMARA], the Senator from Oregon [Mr. MORSE], the Senator from West Virginia [Mr. RANDOLPH] are necessarily absent.

Mr. KUCHEL. I announce that the Senators from New Hampshire [Mr. BRIDGES and Mr. COTTON], the Senator from New Jersey [Mr. CASE], the Senator from Kentucky [Mr. COOPER], and the Senator from Nebraska [Mr. HRUSKA] are necessarily absent.

The Senator from Maryand [Mr. BUTLER] is absent because of illness.

The Senator from Indiana [Mr. CAPEHART] is absent by leave of the Senate.

The Senator from Iowa [Mr. HICKENLOOPER], the Senator from South Dakota [Mr. MUNDT], and the Senator from Kansas [Mr. SCHOEPPEL] are absent on official business.

The PRESIDING OFFICER. A quorum is not present.

Mr. MANSFIELD. Mr. President, I move that the Sergeant at Arms be directed to request the attendance of absent Senators.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to.

The PRESIDING OFFICER. The Sergeant at Arms will proceed to execute the order of the Senate.

After a little delay Mr. ALLOTT, Mr. BENNETT, Mr. CHAVEZ, Mr. CHURCH, Mr. DIRKSEN, Mr. DODD, Mr. DOUGLAS, Mr. EASTLAND, Mr. ELLENDER, Mr. FONG, Mr. FREAR, Mr. FULBRIGHT, Mr. GOLDWATER, Mr. GRUENING, Mr. HAYDEN, Mr. HILL, Mr. HOLLAND, Mr. HUMPHREY, Mr. JACKSON, Mr. JAVITS, Mr. KERR, Mr. LAUSCHE, Mr. LONG of Hawaii, Mr. LONG of Louisiana, Mr. MARTIN, Mr. MCCARTHY, Mr. MCCLELLAN, Mr. MCGEE, Mr. MONRONEY, Mr. MORTON, Mr. MOSS, Mr. MURRAY, Mr. O'MAHONEY, Mr. PROXMIRE, Mr. ROBERTSON, Mr. SALTONSTALL, Mr. SMATHERS, Mr. SYMINGTON, Mr. WILLIAMS of New Jer-

sey, Mr. YARBOROUGH and Mr. YOUNG of North Dakota entered the Chamber and answered to their names.

The PRESIDING OFFICER. A quorum is present.

ORDER FOR ADJOURNMENT UNTIL 10 A.M. ON MONDAY

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that when the Senate concludes its business today, it stand in adjournment until 10 o'clock Monday morning.

The PRESIDING OFFICER. Without objection, it is so ordered.

PUBLIC DEBT AND TAX RATE EXTENSION ACT OF 1960

The Senate resumed the consideration of the bill (H.R. 12381) to increase for a 1-year period the public debt limit set forth in section 21 of the Second Liberty Bond Act and to extend for 1 year the existing corporate normal-tax rate and certain excise-tax rates.

Mr. JOHNSON of Texas. Mr. President, the distinguished Senator from Virginia [Mr. BYRD] is about to explain the bill. It is a very important piece of legislation. We have already been in session 2 hours this morning, and we are just now reaching the bill. We have had to obtain a live quorum, although we are not going to have any votes immediately. I hope Senators will give respectful attention to the Senator from Virginia, so that he may complete his speech, and we may start on the consideration of amendments to the bill.

I should like to have all Senators know that we expect to have a late session this evening, if we have not passed the bill, up until at least 10 o'clock. I was forced to make that concession, or we would have wasted a lot of time on quorum calls today.

Mr. BYRD of Virginia. Mr. President, under present law, certain excise and corporate income tax rates which were increased during the Korean war are scheduled to be automatically reduced on June 30, 1960. This bill continues the present rates for fiscal year 1960, or until June 30, 1961. The bill also provides for a temporary increase in the public debt ceiling for fiscal 1960. The Committee on Finance adopted without change the foregoing provisions of the House-passed bill, but amended that bill to repeal the excise tax on general telephone service, telegraph service, and transportation of persons.

Under present law, the permanent debt ceiling is $285 billion and the temporary debt ceiling is $10 billion. Thus, the total debt limit is $295 billion. However, the provision for the temporary debt limit is scheduled to terminate on June 30 of this year. The House bill and the Senate committee bill provide for a temporary increase in the debt ceiling for fiscal year 1961 of $8 billion. Under the bill, the overall debt ceiling for fiscal year 1961 will be $293 billion.

The present corporate income-tax rate of 52 percent is scheduled for an automatic reduction to 47 percent on June 30. The House bill which the Committee on Finance adopted in this respect extends the 52-percent rate for another year, that is, until June 30, 1961. This action is estimated to increase revenues for a full year by $2,375 million.

The temporary increase in certain excise tax rates also are continued for another year, until June 30, 1961. The excise taxes involved in this action include the tax on distilled spirits, beer and wine, cigarettes, passenger cars, and auto parts and accessories. The committee has adopted the House bill with respect to the tax imposed upon these articles. This committee decision is estimated to result in a revenue increase, on a full-year basis, of $978 million.

Last year the committee reported, and Congress approved, a measure which, among other things, provided for the repeal of the excise tax on general—or local—telephone service, and a reduction to 5 percent in the case of the excise tax on the transportation of persons, both to be effective as of July 1, 1960. The House bill would have extended the present rates with respect to these services through fiscal year 1961. The tax on these services was necessary during the war to prevent excessive use of the facilities and to conserve them for the war effort. The committee, however, believes it is essential that there be no further delay in removing the excise tax on these services. Accordingly, the House bill has been amended to repeal both the excise tax on general—or local—telephone service and the excise tax on transportation of persons as of July 1. In addition, the committee considered it advisable to repeal the excise tax on domestic telegraph service. The House bill has also been amended to accomplish this purpose. These amendments reduce the yield under the House bill for a full year by $752 million. I may say, as a member of the committee, that I voted against this reduction in taxes.

The net effect of the committee bill, as indicated in the attached tables, is to increase revenues on a full-year basis by an estimated $3,196 million.

It is important that this bill be enacted immediately, since the temporary debt limit will expire on June 30, and the permanent debt limit will be exceeded on that day unless this legislation is passed. Furthermore, if the excise tax tax rates are not extended promptly, it will be difficult, both from a constitutional and a practical standpoint, to make them retroactive.

I ask unanimous consent to have printed in the RECORD a tabulation showing tax reductions and tax increases.

There being no objection, the tabulation was ordered to be printed in the RECORD, as follows:

Tax rates affected by the bill

	Unit of tax	Present rates	Rates to become effective July 1, 1960 under—		
			Present law	House bill	Committee bill
Rates continued in House and committee bill:					
Corporations	Normal tax net income (percent)	30	25	30	30
Excises:					
Liquor taxes:					
Distilled spirits	Per proof gallon	$10.50	$9.00	$10.50	$10.50
Beer	Per barrel	$9.00	$8.00	$9.00	$9.00
Wine:					
Still wine:					
Containing less than 14 percent alcohol	Per wine gallon (cents)	17	15	17	17
Containing 14 to 21 percent alcohol	do	67	60	67	67
Containing 21 to 24 percent alcohol	Per wine gallon	$2.25	$2.00	$2.25	$2.25
Containing more than 24 percent alcohol	do	$10.50	$9.00	$10.50	$10.50
Sparkling wines, liqueurs, etc.:					
Champagne or sparkling wine	do	$3.40	$3.00	$3.40	$3.40
Liqueurs, cordials, etc	do	$1.92	$1.60	$1.92	$1.90
Artificially carbonated wine	do	$2.40	$2.00	$2.40	$2.42
Tobacco taxes: Cigarettes	Per thousand	$4.00	$3.50	$4.00	$4.00
Manufacturers' excise taxes:					
Passenger cars	Manufacturers' sale price (percent)	10	7	10	10
Auto parts and accessories	do	8	5	8	8
Rates repealed under committee bill:					
Miscellaneous taxes:					
General telephone	Amount charged (percent)	10	0	10	0
Domestic telegraph service	do	10	10	10	0
Transportation of persons	Amount paid (percent)	10	5	10	0

Mr. BYRD of Virginia. Mr. President, I wish now to read a letter from the Secretary of the Treasury, dated June 18, 1960, addressed to me as chairman of the Senate Finance Committee:

JUNE 18, 1960.

MY DEAR MR. CHAIRMAN: On behalf of the administration, I wish to reiterate our support of the legislation which was enacted by the House of Representatives providing for a temporary public debt ceiling of $293 billion for the fiscal year 1961 and a 1-year extension of present tax rates on corporation income and certain excises.

We urge enactment without amendment of the proposed legislation as it was transmitted to the Senate by the House of Representatives. The Senate Finance Committee amendments would, if adopted, cut revenue almost three-quarters of a billion dollars in a full year.

Continuation of the taxes as provided in the House bill would, in combination with other elements of the President's program, produce a substantial surplus for the fiscal year 1961. The attainment of budget surpluses during periods of high levels of economic activity will allow the Federal Government to reduce its huge public debt. Such action will provide convincing demonstration both at home and abroad that this Nation is determined to so conduct its affairs as to promote the continuation of a sound economy and provide for our Defense Establishment as well as for job opportunities, and better living for our people.

It would be unfortunate indeed if premature and selective reductions in taxes were permitted to undermine the surplus in the budget for fiscal year 1961. Piecemeal tax reductions would not only prevent the attainment of the desired surplus for debt retirement in fiscal year 1961 but such reductions would also tend to postpone the achievement of the significant margin of revenues over expenditures that we should appropriately have in order to effect general improvements in the tax system. The financial position of the Government does not at this time permit a general reduction in taxes, and we do not believe that special tax reduction is now justified.

We urge every effort be made to enact H.R. 13281 as it was transmitted to the Senate by the House of Representatives.

Sincerely,

ROBERT B. ANDERSON.

The PRESIDING OFFICER. The clerk will report the first committee amendment.

The LEGISLATIVE CLERK. On page 3, after line 9, it is proposed to strike out

"(2) section 4251(b)(2) (relating to termination of tax on general telephone service);

After line 11, it is proposed to strike out:

(3) section 4261 (relating to tax on transportation of persons);

Mr. PROXMIRE. Mr. President, it is my understanding that the junior Senator from Tennessee [Mr. GORE] is anxious to speak at this time. I have no intention of delaying. I am sure no other Senator has any such intention. I am very anxious to proceed with the debate. I desire to make a speech as soon as I can.

In deference to the Senator from Tennessee, Mr. President, I suggest the absence of a quorum, so that we can locate the Senator.

Mr. KUCHEL. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. KUCHEL. Does the Senator have in mind making this a live quorum?

Mr. PROXMIRE. I have no intention to do so whatsoever. I simply wish to locate the junior Senator from Tennessee.

Mr. KUCHEL. I thank the Senator.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GORE. Mr. President, I offer an amendment to the first committee amendment, which I send to the desk and ask to have stated.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The LEGISLATIVE CLERK. In lieu of the language proposed to be stricken by the first committee amendment on page 3, lines 10 through 13, it is proposed to insert the following:

TITLE III—ADDITIONAL PROVISIONS

SEC. 301. DEPLETION RATE FOR CERTAIN CLAYS AND TREATMENT PROCESSES CONSIDERED AS MINING FOR COMPUTING PERCENTAGE DEPLETION IN THE CASE OF MINERALS AND ORES.

(a) DEPLETION RATE FOR CERTAIN CLAYS.—Subsection (b) of section 613 (relating to percentage depletion rates) is amended as follows:

(1) Paragraph (3) is amended to read as follows:

"(3) 15 percent—

"(A) metal mines (if paragraph (2) (B) does not apply), rock asphalt, and vermiculite; and

"(B) if paragraph (5) (B) does not apply, ball clay, bentonite, china clay, sagger clay, and clay used or sold for use for purposes dependent on its refractory properties."

(2) Paragraph (5) is amended to read as follows:

"(5) 5 percent—

"(A) gravel, mollusk shells (including clam shells and oyster shells), peat, pumice, sand, scoria, shale, and stone, except stone described in paragraph (6);

"(B) clay used, or sold for use, in the manufacture of building or paving brick, drainage and roofing tile, sewer pipe, flower pots, and kindred products; and

"(C) if from brine wells—bromine, calcium chloride, and magnesium chloride."

(3) Paragraph (6) is amended by striking "refractory and fire clay,".

(b) TREATMENT PROCESSES CONSIDERED AS MINING.—Subsection (c) of section 613 (relating to the definition of gross income from property) is amended as follows:

(1) Paragraph (2) is amended to read as follows:

"(2) MINING.—The term 'mining' means the extraction of the ores or minerals from the ground, the treatment processes considered as mining described in paragraphs (3) and (4), and so much of the transportation of ores or minerals (whether or not by common carrier) from the point of extraction from the ground to the plants or mills in which such treatment processes are applied thereto as is not in excess of 50 miles unless the Secretary or his delegate finds that the physical and other requirements are such that the ore or mineral must be transported to a greater distance to such plant or mills."

(2) Paragraph (3) is redesignated paragraph (5).

(3) Paragraph (4) is deleted and the following paragraphs are inserted in lieu thereof:

"(3) TREATMENT PROCESSES CONSIDERED AS MINING.—The following treatment processes where applied by the mine owner or operator with respect to the minerals or ores extracted from the ground by him shall be considered as 'mining':

"(A) In the case of coal—cleaning, breaking, sizing, dust allaying, treating to prevent freezing, and loading for shipment;

"(B) In the case of sulfur recovered by the Frasch process—pumping to vats, cooling, breaking, and loading for shipment;

"(C) In the case of all other minerals or ores—(i) where applied to crude minerals or ores—crushing, grinding, sorting, screening, washing, and drying to remove free moisture; (ii) beneficiation by concentration, and the processes necessary thereto; (iii) beneficiation by cyanidation, leaching, crystallization, or precipitation, and the processes necessary thereto; (iv) any additional process, if necessary, to bring the mineral or ore to form and condition suitable for shipment; and (v) loading for shipment. For pur-

poses of this subparagraph, the term 'beneficiation by concentration' means the application of processes solely for the purpose of eliminating waste, or separating the mineral or ore from other minerals or ores, by gravity, flotation, amalgamation, electrostatic means, magnetic means, or substantially equivalent processes. The processes referred to in (iv) are those processes which are necessary to bring the mineral or ore to the physical form and condition in which it is capable of being transported as distinguished from those processes applied to make the mineral or ore salable. The term 'loading for shipment' shall not include the cost of packaging unless otherwise provided for under (IV), nor shall it include the cost of containers, bags, or any similar items;

"(D) The pulverization of talc, the burning of magnesite, the furnacing of quicksilver ores, and the sintering and nodulizing of phosphate rock.

"(4) TREATMENT PROCESSES NOT CONSIDERED AS MINING.—The following treatment processes shall not be considered as 'mining':

"(A) In the case of all minerals or ores—electrolytic deposition, roasting, calcining, thermal or electric smelting, refining, polishing, fine pulverization, blending with other materials, treatment effecting a chemical change, thermal action, and molding or shaping, unless such processes are otherwise provided for in paragraph (3); and

"(B) Notwithstanding any other provisions of this subsection, any treatment process which follows a process that is not considered as 'mining' will not be considered as mining for the purpose of this subsection."

SEC. 302. EFFECTIVE DATE.—The amendment made by section 301 shall be applicable only with respect to taxable years beginning after December 31, 1960.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. JOHNSON of Texas. Is the distinguished Senator from Tennessee disposed to indicate about how much time he thinks the proponents of the amendment will consume?

Mr. GORE. I cannot estimate it.

Mr. JOHNSON of Texas. Does the Senator have any idea?

Mr. GORE. I have some ideas, but they are so indefinite that I do not wish to suggest them until there has been some debate on the amendment.

Mr. President, the first committee amendment to which I have offered an amendment would repeal the excise tax on local telephone service. The committee amendment, if adopted, would bring about a reduction in revenue of an estimated $450 million. I voted for the amendment in the Finance Committee. However, I offered amendments which would produce revenue from other sources, which procedure I regard as being more in the national interest, the suggested source being a more equitable source of revenue than an excise tax on local telephone service.

I should like to see the excise tax on local telephone service repealed. The amendment to the amendment which I have offered would save an estimated $600 million a year if present court decisions should stand, and the principles enunciated in those decisions were extended to other taxpayers.

Mr. KEATING. Mr. President, will the Senator yield for a clarifying question?

Mr. GORE. I yield.

Mr. KEATING. Is the amendment to which the Senator is addressing his remarks designated "6-17-60—C"?

Mr. GORE. That is the amendment. In order that Senators may identify the amendment and obtain copies at the desk, the amendment of which I speak is amendment "6-17-60—C."

I have offered it as an amendment to the committee amendment. If the Senate is to adopt an amendment to repeal the excise tax on local telephone service, it will have an opportunity to adopt an amendment to that committee amendment which might well save for the Treasury more revenue than a repeal of the local telephone service excise tax would lose.

By way of preface, I should like to read a letter from the Secretary of the Treasury, Hon Robert B. Anderson.

Mr. KEATING. Mr. President, will the Senator yield again for a further clarification?

Mr. GORE. I yield.

Mr. KEATING. The Senator's position is that we should accept the committee amendment, but should also adopt his as an amendment to that committee amendment. Is that correct?

Mr. GORE. That is correct. Then, if the committee amendment as amended by the amendment I have proposed is adopted, it may well be that the amendment, as amended, will increase revenue rather than decrease it, though I must say that this result depends to a considerable extent upon the outcome of litigation which has been appealed to the Supreme Court.

Mr. KEATING. In other words, the Senator does favor the repeal of the telephone tax on local telephone service.

Mr. GORE. I favor both the repeal of the tax on local telephone service and the closing of some loopholes so as to provide additional revenue.

Mr. KEATING. I thank the Senator.

Mr. SYMINGTON. Mr. President, will the Senator yield?

Mr. GORE. I will yield in a moment. I should like to say further to my distinguished friend, the able junior Senator from New York, that the amendment which I have offered and which he holds is a verbatim copy of an amendment sent to Congress by the Secretary of the Treasury. The Senator will find it in verbatim form in the hearings before the House Ways and Means Committee, following a letter from the Secretary of the Treasury to the Speaker of the House, which I will read into the RECORD.

I yield to the Senator from Missouri.

Mr. SYMINGTON. Will the Senator develop the loopholes that he believes should be closed in the law?

Mr. GORE. Yes; I propose to do that. I propose to discuss the first one, to which the first amendment I have offered is directed.

Mr. SYMINGTON. Will the Senator be good enough to tell me at this time, because I hope to be present at least for the discussion of one of them, which one he proposes to bring up first?

Mr. GORE. The one now pending redefines "mining." Under circuit court decisions, the depletion allowance is now allowed on the retail price of some finished products. If the percentage depletion allowance, which is supposed to be related to the natural resource, is permitted to be applied to sale price of nuts and bolts and brick and tile, then a vast number of our taxpayers will pay taxes on only one-half of their net profits. I hold in my hand a brick, the end product of clay that is mined from the earth. As the law was originally interpreted, the depletion allowance applied to the natural resource which was extracted from the earth.

Mr. SYMINGTON. Raw clay.

Mr. GORE. The raw clay—the value of the raw clay. Now the decisions have held that the depletion allowances extends to the retail value of the brick and the clay and in some items to sums up to a hundred times the amount of the value of the original product extracted from the earth.

Mr. SYMINGTON. Will the Senator yield further?

Mr. GORE. I yield.

Mr. SYMINGTON. If the company which mined the clay also produced the brick, then the full depletion will apply to the completed brick, as I understand the Senator.

Mr. GORE. According to present court decisions, that is true.

Mr. SYMINGTON. Suppose the raw clay were supplied to another corporation, which took the raw clay and produced the completed brick. Would the depletion apply?

Mr. GORE. I do not believe it would be available to the corporation making the brick. One of the results has been the trend toward integration of the industry.

Mr. SYMINGTON. In other words, as I understand the Senator, it would be a great incentive for the company which mined the clay to own the kilns that produced the brick.

Mr. GORE. I should like to read to the Senator a statement from Mr. Lindsay, general counsel of the Treasury Department. One of the results of these court decisions is as follows: "Acceleration of the trend toward fully integrated operations." A trend toward fully integrated operations means a trend toward monopoly, does it not?

Mr. SYMINGTON. I thank the Senator. He has covered the point in which I was interested.

Mr. GORE. This is an amendment, I may say to the able junior Senator from Missouri, which Congress should have enacted a long time ago. I am in the position, as I have been many times in the Committee on Finance, of advocating amendments which the Secretary of the Treasury and the Republican administration have asked Congress to enact. I hope I am not the most partisan man in the Senate. I confess I am not the least partisan, because I believe so enthusiastically in the two-party system, and I undertake to exercise party responsibility. But when I think the Secretary of the Treasury is correct in his recommendation, it does not deter me from supporting him because he happens to be a Secretary with whose monetary

policies I thoroughly disagree. The Secretary of the Treasury asked Congress to correct this situation early last year, and Congress has not done so. I think now is an appropriate time to do so.

Mr. SYMINGTON. I am impressed with the able Senator's presentation of this particular item.

Mr. GORE. I thank my friend very much. As I started to do a few moments ago, I shoud like now to read from the letter from the Secretary of the Treasury to the Speaker of the House, the esteemed and honored SAM RAYBURN. The letter bears the date of January 26, 1959, and reads as follows:

THE SECRETARY OF THE TREASURY,
Washington, D.C., January 26, 1959.

Hon. SAM RAYBURN,
Speaker of the House of Representatives, Washington, D.C.

MY DEAR MR. SPEAKER: In the budget message of the President, submitted to Congress on January 19, 1959, the President stated that the Treasury Department would recommend an amendment to the Internal Revenue Code specifying the treatment processes which shall be considered mining for the purpose of computing percentage depletion in the case of mineral products.

Early last year I testified before the Ways and Means Committee on the need to revise the law in order to preclude excessive depletion deductions for the brick and cement industries. My recommendation was made as a result of a series of court cases which permitted manufacturers of brick and cement to compute percentage depletion on the basis of the selling price of the finished manufactured product rather than on the volue of the clay or cement rock before it is manufactured.

It is now apparent under the court decisions that manufacturers of many other products may obtain depletion allowances based on gross income derived from the sale of finished products. This can only result in increasing the depletion deduction for all minerals severalfold—in extreme cases as much as 100 times. I do not believe that depletion on such an inflated scale is either reasonable or was intended. If permitted, the revenue losses will indeed be serious.

The problem arises because the term "mining" is defined in the statute to include the ordinary treatment processes normally applied to obtain the "commercially marketable mineral product or products" which, in many instances, may be an expensive finished product. Accordingly, in order to prevent excessive depletion allowances, I recommend the immediate elimination of the phrase "commercially marketable mineral product or products" from the statute and the substitution of a new definition of "mining" which will specify the allowable treatment processes for the various minerals.

The proposed legislation would not only prevent a substantial loss in revenue, but would also help resolve difficult and complex problems in determining for many mineral industries the stage at which taxpayers first obtain a commercially marketable mineral product.

The staff of the Treasury is now preparing a draft of the proposed legislation, and in this connection would be pleased to work in cooperation with the Ways and Means Committee staff and the joint committee staff in its development.

Sincerely yours,

ROBERT B. ANDERSON,
Secretary of the Treasury.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. JOHNSON of Texas. What was the date of the letter?

Mr. GORE. The date is January 26, 1959.

Mr. JOHNSON of Texas. Did the Treasury submit these proposals to the Committee on Ways and Means, to the Senator's knowledge?

Mr. GORE. Yes, it did. I have incorporated that proposed legislation in an amendment which I have now offered and which is now pending.

Mr. JOHNSON of Texas. Does the Senator have any information as to why the Committee on Ways and Means did not accept the proposals? I thought perhaps they were discussed in the Committee on Finance.

Mr. GORE. There has been some discussion, but I am unable to say why it was not adopted. As the Senator knows, there are several members of the committee, and the reasons may vary with the membership. I am unable to say.

Mr. JOHNSON of Texas. Would it be fair to say that the Committee on Ways and Means did not look with favor upon the Treasury's language?

Mr. GORE. I do not know. Perhaps it would be fair. If the Senator says it would be fair to so conclude, I am sure it would be. I do not know.

Mr. JOHNSON of Texas. I thought the question was discussed. Was the question discussed in the Committee on Finance?

Mr. GORE. I offered this amendment in the Committee on Finance; but after some discussion I presented a more simplified amendment, which would, incidentally, have gone further, according to Mr. Stam, our technical adviser, than the Treasury amendment goes. In fact, I doubt if the Treasury amendment goes far enough. However, I thought that since the proposal had been carefully drawn by the Treasury, the Senate might be more inclined to accept an amendment which the Treasury had drawn than one which the junior Senator from Tennessee had drawn, in view of the technical nature of the subject matter.

Mr. JOHNSON of Texas. Was that amendment voted on?

Mr. GORE. It was.

Mr. JOHNSON of Texas. What was the result of the vote?

Mr. GORE. I do not recall. The amendment was defeated—as, I must say, are most of my amendments in the Committee on Finance.

Mr. ANDERSON. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I yield.

Mr. ANDERSON. The Senator from Tennessee, I believe, would acknowledge, at least, that the amendment was not rejected because it was without merit, but for the same reason, perhaps, that it was rejected in the House. The Treasury presented the same amendment in the House. The members of the Committee on Ways and Means decided that since the matter was before the Supreme Court, and the Supreme Court was likely to rule by, perhaps, August, it might be well, first, to see what the Supreme Court would do.

I am certain the Senator from Tennessee will remember that I suggested we ought to have a sufficient staff in the Committee on Finance to begin to make a study of this most important situation. I agree with the Senator completely that this might be an enormous loophole; on the other hand, it might not be. The question ought to be the subject of careful study.

I feel certain that the Senator from Tennessee recognizes that his amendment was not rejected in the committee because of a feeling that it was not important, or because of the feeling that it might not close a loophole; but that, because a case is pending in the Supreme Court, this was not a matter which needed to be passed upon in connection with this particular bill, but might better be passed upon next January.

Mr. GORE. I am perfectly willing to have each member or any member of the committee state his own reasons for voting against the amendment. I am sure the amendment was not rejected because it was regarded as unimportant. I know the statement was made by the distinguished junior Senator from New Mexico that the question was pending in the courts.

Mr. JOHNSON of Texas. What relation does the court question have to this amendment?

Mr. GORE. The lower courts have held that the language of the statute authorizes the use of the value of the finished product as the measure to which the depletion allowance will apply.

Mr. JOHNSON of Texas. Has the lower court, in effect, held that a loophole exists?

Mr. GORE. The holdings of the lower courts have widened the loophole into unforeseeable proportions.

Mr. ANDERSON. Mr. President, will the Senator further yield?

Mr. GORE. Does the Senator agree with my statement?

Mr. ANDERSON. Yes. I simply wanted to say that the reason why I attach great importance to the proposal offered by the Senator from Tennessee is that I believe the Treasury took the position that if it lost all the way through, and if all these fabricated products took depreciation merely because a basic commodity, such as clay, or something else, took depreciation, then the loss might run as high as $600 million.

Mr. GORE. That is correct.

Mr. ANDERSON. Is not that the Senator's remembrance?

Mr. GORE. That is my memory.

Mr. ANDERSON. That is why, frankly, I said in the committee that I thought the Senator from Tennessee had performed a valuable function. I thought the proposal he made was extremely important. The only reason why I, for one, was willing to withhold action was that the High Court might conclude that the lower courts were wrong. If the High Court ruled that the lower courts were wrong, then the matter would be solved by that decision. If the High Court should hold to the contrary, then I am quite certain that the House Committee on Ways and Means and the Senate Committee on Finance would have to address themselves to this question immediately and diligently.

While the Senator from Tennessee and I differed as to when we ought to take

action, I have never said—and I certainly would not say—that the matter suggested by the Senator from Tennessee was not one of grave importance which has to be answered, and answered fairly soon.

Mr. GORE. The Senator from New Mexico has made an entirely fair and frank statement. I wish, however, to differ with him as to the advisability of legislative action. In essence, the Senator is proposing to let the Supreme Court legislate. I doubt if Members of the Senate, upon careful consideration, want to abdicate their responsibility in writing the tax laws, and then await an effort to get an interpretation from the High Court, the Court of Last Resort. That, in essence, is what the able Senator from New Mexico has said, "Let us not legislate on this subject; let us wait to see if the Supreme Court will not do so."

Mr. ANDERSON. Mr. President, will the Senator further yield?

Mr. GORE. I yield.

Mr. ANDERSON. I do not believe that is quite what I intended to say, if I said it. What I am trying to suggest is that if the Supreme Court acts in August, it will then lay down some guidelines which Congress can follow when it legislates in this most important field.

I think it would be extremely unwise for Congress not to legislate in this field. However, there are many complications which arise which will never be solved by the Supreme Court decision. One thing the Supreme Court decision will do will be to help the Committee on Finance and the Committee on Ways and Means as they try to solve the problem.

I apologize to the Senator for speaking at such great length.

Mr. GORE. Not at all. I appreciate the opportunity to debate the question.

Mr. ANDERSON. If, for example, there should arise a situation in which a producer of copper should be entitled to have depletion allowance only on the raw copper taken from the mine—and I am not sure but what that is the correct interpretation—there would be quite a different tax situation, as compared to the one if the depletion allowance ran not only to the copper as removed from the mine, but perhaps also to fire-refined copper produced at the site of the mine, and then, finally, to refined copper which might be produced in one of the New England States, where a great deal is handled.

Therefore, the question of how much of it should receive the depletion allowance needed to wait, it seemed to me, until the Supreme Court has passed on the case in August.

I believe it would have been well—and I said so frankly in the committee, and therefore I should say so frankly on this floor—if the committee had started to legislate in this field months ago, because there is a great deal of information which the Finance Committee should have developed. But having failed to develop it, I believe it unwise to rush into the situation without providing opportunity for the making of the type of study which I believe the committee should make.

The Senator and I have discussed the question of the staff of the Finance Committee. I believe it should have a far larger staff, especially in dealing with these very complicated fields of finance and taxation and I hope the committee will have such a staff.

But I believe we should wait until we see what the Supreme Court does, not because we shall be bound by what the Supreme Court does, but for the purpose of seeing what it does in the way of establishing guidelines, and then have the Congress act accordingly.

The Senator knows that I went through the tidelands struggle in which I found myself on the opposite side from that of some of my dear friends. I believe we finally passed some legislation which stood up fairly well because we did follow some guidelines which had been laid down by the Supreme Court. And that is my point of view in this case.

Mr. GORE. Mr. President, I am not a Harvard Law School graduate. I obtained my education in law at the YMCA night school. But based on my limited learning and on my experience as a legislator, I believe it is properly the province of the legislative branch of the Government to lay down the guidelines for our tax laws, rather than to await, petition, and beseech the judicial branch to lay down the guidelines. That is a very basic point in connection with this matter. So in that regard I wish to disagree with my able friend.

The able Senator has made some remarks about the need of the Senate Finance Committee for a larger staff. I wish to join him in his statement and in his recommendation, and I would emphasize a thousandfold what he has said in that connection. I know of no committee which is so much in need, not only of an enlarged staff, but also of a subcommittee structure. We have two lovely and charming young ladies who attend the sessions of the committee and serve us to the utmost of their capacity, in connection with their limited responsibilities; and we have a messenger who serves us coffee. But we do not have a single committee staff member or employee who qualifies in the technical expert category, as an adviser to the Finance Committee of the U.S. Senate. The Finance Committee must, of necessity, deal with extremely complicated and complex technical subjects, and the public interest requires that the committee have an adequate staff of well qualified, highly trained experts. I do not wish to discuss this subject further at this time, but I desire to join the able Senator from New Mexico in what he has said in that regard.

On the other hand, I thoroughly disagree with the Senator from New Mexico when he says we should wait for the Supreme Court to lay down guidelines.

Mr. LAUSCHE. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. Before I yield to my distinguished friend, the Senator from Ohio, I wish to reply to another point the Senator from New Mexico raised. He said he did not think we should rush into this matter. Well, Mr. President, the letter from the Secretary of the Treasury, which I read, was dated January 29, 1959; and the Secretary of the Treasury testified on this subject, before the Ways and Means Committee, in 1958. So we have not exactly been pell-mell in our "rush"; and I believe it appropriate for us to act. It is particularly appropriate for us to act now, in view of the fact that within a week we have voted to increase the amounts of some of the appropriation bills by approximately $1,500 million, and we are considering amendments to a bill which would reduce the revenue of the Treasury some $700 million below that received this year from particular sources.

Therefore, I believe it is not only timely, but also imperative, that we look to other and equitable sources of revenue; and I know of no source to which we can turn more equitably than to this depletion allowance which is taken on the value of the finished product.

Now I am glad to yield to the distinguished Senator from Ohio.

Mr. ANDERSON. First, Mr. President, will the Senator from Ohio permit me to finish what I was saying, so as to complete this part of the discussion?

Mr. LAUSCHE. Certainly.

Mr. GORE. I yield.

Mr. ANDERSON. I apologize for interrupting the Senator from Ohio; but I wish to complete my attempt to explain why I think there is some difference in this instance.

The law passed by the Congress—not by the Supreme Court—provides, in part, as follows:

> 2. Mining: The term "mining" includes not merely extraction of the ores or minerals from the ground but also the ordinary treatment processes normally applied by mine owners or operators in order to obtain the commercially marketable mineral product or products, and so much of the transportation of ores or minerals (whether or not by common carrier) from the point of extraction from the ground to the plants or mills in which the ordinary treatment processes are applied thereto as is not in excess of 50 miles unless the Secretary or his delegate finds that the physical and other requirements are such that the ore or mineral must be transported a greater distance to such plants or mills.

The able Senator from Tennessee proposed an additional definition of "mining" which would have corrected this situation. I do not argue about that now; but I think his amendment was simpler and better than the one eventually presented by the Treasury.

But so far as I am concerned, the argument was over what it takes to get the product to be a commercially marketable product. How many steps that requires, I do not know. I think the Congress, which wrote the original law, should act upon it.

But I was curious to see what the Supreme Court would say in regard to interpretation of the language already enacted into law by the Congress of the United States.

I thank the Senator from Ohio for permitting me to complete this statement.

Mr. GORE. Mr. President, I ask unanimous consent to have printed at this point in the RECORD a table which shows claims of individual companies illustrating potential tax losses resulting from extension of percentage depletion to manufactured products. This table was prepared more than a year ago. I am advised that many more claims may be pending or are soon to be pending. But this table will illustrate the gravity of this problem.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE III.—*Claims of individual companies illustrating potential tax loss resulting from extension of percentage depletion to manufactured products*

Mineral deposit	Mineral form claimed for depletion purposes by taxpayer	Year or years involved	Percentage depletion			Tax differential
			Computed by—		Percent, taxpayer to Government	
			Government	Taxpayer		
Bauxite	Aluminum sulfate (alum)	Unknown	$35,000	$232,420	664	$102,600
Bentonite	Caulking clay	do	39,600	95,400	241	29,000
Do	do	do	31,700	109,600	346	40,500
Clay, brick, and tile	Brick and tile products	1951–56	59,359	523,931	883	240,345
Do	do	1951–54	23,953	175,525	733	97,953
Clay, fire	Fire brick, mortar	1953–56	2,250,000	9,339,545	415	4,468,168
Do	Fire brick, structural brick	1951–53	350,000	1,773,291	507	717,220
Clay, fire, and shale	Various clay products	1951–54	44,019	537,779	1,222	250,871
Do	do	1951–53	9,786	123,720	1,264	66,700
Coking coal	Coke and byproducts	Unknown	140,700	258,000	183	83,100
Dolomite	Refractory brick, ground dolomite	1955–56	312,459	844,485	270	276,549
Fuller's earth	Uncertain, mineral primarily used as an absorbent or as rotary drilling mud.	Unknown	214,723	344,148	160	67,300
Granite	Building stone	1951–57	96,375	438,525	455	177,907
Do	Monuments	Unknown	36,173	106,553	295	36,000
Gypsum	Wallboard, plaster, and other construction uses	do	2,125,000	12,815,000	603	6,783,900
Iron ore	Steel	do	2,000,448	12,002,688	600	5,001,165
Limestone	Lime	1953–57	106,231	347,230	327	106,231
Do	Limestone and chemical plant (specific product unknown)	1951–53	8,064,000	37,680,000	467	19,268,000
Do	Cement	3 years	1,983,500	9,450,000	476	5,353,730
Do	do	1953–56	919,923	2,931,060	319	1,045,790
Limestone and shale/clay	do	1951–54	3,201,678	13,702,811	428	5,760,968
Do	do	1951–55	1,506,248	4,009,901	266	1,020,192
Perlite	Abrasives and aggregates	Unknown	2,570	15,527	604	3,535
Quartzite	Silica	1954–55	169,035	711,523	421	288,175
Salt brine	Chlorine and caustic soda	3 years	857,874	11,555,640	1,347	6,633,876
Do	Salt and salt products	4 years	1,770,498	8,290,912	468	3,260,207
Sandstone	Silica products	1951–55	70,169	243,923	348	111,181
Sand and gravel	Construction use	1953–55	7,750	62,069	801	28,340
Do	do	do	10,315	93,935	911	43,763
Shale	Tile	1951–54	11,805	214,585	1,818	104,827
Shells, oyster/clam, etc	Road construction	1951–53	78,612	171,620	218	63,962
Solite	Lightweight aggregate	Unknown	100,000	312,000	312	114,000
Do	do	do	8,080	26,779	331	8,725
Stone, crushed	Rough construction	3 years	1,730,484	3,568,283	203	924,500
Do	do	2 years	8,667	43,595	503	17,500

Mr. LAUSCHE. Mr. President, at this time will the Senator from Tennessee yield to me?

Mr. GORE. I yield.

Mr. LAUSCHE. It is my understanding that if the Supreme Court affirms the decisions rendered by the lower courts with respect to this issue, the annual tax loss will be—as stated by the Senator from New Mexico—in the neighborhood of $600 million.

My question is this: If we take no action and the Supreme Court affirms the decisions of the lower court, what will be the loss that will result to the Treasury because of our failure to act? Can that question be answered?

Mr. GORE. That, of course, would depend upon how many claims had been and would be filed, upon whether the Congress subsequently acted, and if it acted, whether it acted retroactively. It would be very difficult to answer the question with any precision.

Mr. LAUSCHE. That is, the longer the delay, the greater the loss?

Mr. GORE. I agree, and the more the complications.

Mr. LAUSCHE. That is, if we delay for 1 year, the loss will be $600 million.

Mr. GORE. Annually.

Mr. LAUSCHE. Annually. If we delay for another year, it will be another $600 million?

Mr. GORE. According to the Treasury estimates; but I am not sure that those estimates have accurately foreseen the additional claims and extensions which might result from the decision.

Mr. LAUSCHE. Is this inference sound, that if the Supreme Court acts to confirm the decisions of the lower court, and Congress does not act until late next year, and when it does act, it does not act retroactively, then the income of this year will be lost, as well as that of next year?

Mr. GORE. And of previous years. I might suggest to the able Senator that many of us are most reluctant to pass tax bills with retroactive features either for tax relief or for the application of burdens.

Mr. LAUSCHE. I have taken that position, and I took it with respect to the retroactive refund we made to certain insurance companies.

Mr. GORE. The Senator from Ohio and I fought together on that issue.

Mr. LAUSCHE. Yes. The tendency has been never to make the law, with respect to taxes, retroactive when the retroactivity would be to the benefit of the public, but always to make the law retroactive when the benefit would go to the big taxpayers. I am sure that is what will happen if anybody suggests making the decision retroactive, in the event the Supreme Court confirms the lower trial court.

Mr. GORE. I should like to comment just briefly. I should say, in behalf of the Senate Finance Committee, it is with reluctance that I have seen that committee act retroactively, whether for the application of additional liability or for the extension of tax relief. Sometimes the committee has done so, but I think the junior Senator from New Mexico [Mr. ANDERSON] will bear me out that the committee acts with the greatest of reluctance to provide for retroactivity.

Mr. ANDERSON. I agree completely with the Senator from Tennessee.

Mr. GORE. I yield further to the Senator from Ohio.

Mr. LAUSCHE. Then, the Senator from Tennessee will agree with me that, if the Supreme Court confirms the decisions of the lower court, the longer we delay, the greater will be the loss to the General Treasury?

Mr. GORE. The greater the loss, the greater the complications, the more the claims; and then it violates that which is basic, in my concept of the legislative branch of the Government, which is that it is a legislative prerogative to write the revenue laws of the United States.

Mr. LAUSCHE. I am very thankful to the Senator from Tennessee for urging this proposal.

Mr. ANDERSON. Mr. President, will the Senator yield for just this comment?

Mr. GORE. Yes.

Mr. ANDERSON. The gist of this argument is the very reason I gave to the Senator from Tennessee, in committee and out of committee, I think he has performed a valuable function in calling the matter to the attention of the Senate. While he suggests correctly that he and I voted differently on a great many things, I did not, and do not, change my opinion of the value and the importance of the contribution made by the distinguished Senator from Tennessee.

Mr. GORE. I am most grateful for the generous remarks and attitude of my distinguished friend and colleague, the exceptionally fine junior Senator from New Mexico.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point a table which shows the annual potential tax loss resulting from extension of the percentage depletion to designated manufactured products for 19 mineral categories, which was prepared by the Treasury Department more than a year ago.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE II.—*Annual potential tax loss resulting from extension of percentage depletion to designated manufactured products for 19 mineral categories*

[All dollar figures are in thousands of dollars]

Mineral	Manufactured product or product	Depletion rate on mineral	Mineral production [1] (thousands of tons)	Value,[1] mineral	Estimated value manufactured product	Difference in value	Estimated increase in the depletion deduction [4]	Estimated tax differential [5]
Bauxite	Aluminum	[2] 23	6,743	$45,852	$716,444	$670,592	$114,001	$59,281
Bentonite	Clay products	15	1,571	18,415	55,245	36,830	5,524	2,872
Clay, brick, and tile	Brick and tile, other products	5	34,385	41,516	145,306	103,790	5,190	2,699
Clay, fire	Refractory clay products	15	11,803	53,750	208,608	154,858	23,229	12,079
Clay and shale	Cement	[3] 15 and 5	9,067	9,302	87,954	78,652	7,865	4,090
Diatomaceous earth	Filtration, filler, insulation, miscellaneous	15	250	2,282	7,740	5,458	819	426
Fuller's earth	Mineral oils, absorbent uses, other	15	418	8,879	13,318	4,439	666	346
Granite	Building stone	15	39,636	65,447	229,065	163,618	24,543	12,762
Gypsum	Building board and plaster	15	14,652	41,913	321,652	279,739	41,961	21,820
Iron ore	Steel	15	96,730	749,657	4,804,450	4,054,793	608,219	316,274
Kaolin	Paper filling and coating, other	15	2,250	34,504	51,756	17,252	2,588	1,346
Limestone	Cement	15	81,008	85,230	785,774	700,544	105,082	54,643
Do	Lime	15	10,577	14,660	135,727	121,067	18,160	9,443
Salt	Chlorine, soda ash	10	14,565	45,876	339,994	294,118	29,412	15,294
Sand and gravel	Road construction	5	624,697	595,101	3,570,606	2,975,505	148,775	77,363
Sandstone	Finished stone	15	13,447	33,998	46,388	12,390	1,858	966
Marl, slag, gypsum, etc.	Cement	5	11,901	11,901	115,440	103,539	5,177	2,692
Stone	Rough construction	5	62,925	109,339	218,678	109,339	5,467	2,843
Talc	Ceramics, paints, filler, insecticides, other	15	739	4,859	15,026	10,167	1,525	793
Total							1,150,061	598,032

[1] Production and crude value figures are either taken directly or derived from figures in the "U.S. Bureau of Mines 1956 Mineral Yearbook."

[2] 23 percent is the depletion rate for the domestic production of bauxite. An assumed depletion rate of 17 percent is used to compute the estimated increase in depletion deduction. This is because approximately 70 percent of mined bauxite used in aluminum production is produced by U.S. manufacturers in the Caribbean area and subject to a depletion rate of 15 percent.

[3] It is assumed that equal tonnage of clay and shale is used in the production of cement; therefore, a 10-percent depletion rate is used to determine the estimated increase in depletion deduction.

[4] The figure for "Estimated increase in depletion deduction" assumes that the net income limitation does not apply.

[5] The figure for "Estimated tax differential" assumes a corporate tax rate of 52 percent.

NOTE.—Coal, petroleum, gas, and various other minerals are not represented because of insufficient data from which comparable statistics could be estimated.

Mr. GORE. Mr. President, let me repeat that what I have offered as an amendment to the committee amendment in the bill is the recommendation of the Secretary of the Treasury, Robert B. Anderson, in consequence of a budget message of the President of the United States. I shall hope for support not only on my side of the aisle, but surely from the other side of the aisle, on this recommendation of President Eisenhower and Secretary Anderson.

Before proceeding with this specific argument, there is one misunderstanding widely held which I should like to allay. Many people think that percentage depletion is related to the depletion of a natural resource. This is not accurate. Percentage depletion has no relationship to the depletion of a natural resource. Percentage depletion is a misnomer. Percentage depletion as written into the law is a formula for tax deduction, and this deduction from taxable income has a ceiling of 50 percent of net profits.

So if we permit this practice to continue as applied to, for example, that which I hold in my hand, a small package of salt, then we have extrapolated the tax deduction into vast proportions and enormous losses to the Treasury, and we have provided the most powerful stimulus of all for monopolies in industries relating to extraction of minerals from the earth and the marketing of products made therefrom.

Under the court decision which now pertains the man who sells the packaged container of salt, provided he also mined the original salt from the earth, can take a depletion allowance of 15 percent of his gross income. It is not profits to which I refer. The man can take 15 percent of his gross income—15 percent of the final sales price of the packaged, shipped, delivered product, provided that does not exceed 50 percent of his profits.

This item alone represents a potential estimated loss of revenue to the Treasury of $15 million per annum, over and above a very liberal depletion allowance on the mined and initially processed material.

Mr. President, I invite attention to the large potential revenue loss, which relates to steel products. A producer of steel products who mines his ore can use percentage depletion—it is really a tax deduction rather than depletion—under the formula of 15 percent of the gross value of the product he has mined, provided again, that does not exceed 50 percent of his profits.

Two tons of ore, by rule of thumb, produce approximately 1 ton of pig iron. One ton of pig iron can be processed into approximately a ton of steel products.

I must use general terms, because the exact figures vary with specific products and various companies in different areas of the country, but, generally speaking, the selling price of 2 tons of ore is $16. The selling price of a ton of pig iron is about $60. From then on we begin the jump in the value of the marketed product.

The price of steel, of course, may soon rise, but I shall not go into that at this moment.

The price of the fabricated steel product varies greatly and ranges widely. It ranges generally from more than $100 a ton for structural steel to about $300 a ton for structural steel bolts.

If a monopoly develops, which the present situation encourages—if the monopoly owns the iron mine, the foundry, the steel mill, and the fabricating plant—the original 2 tons of iron ore with the value of $16 will finally be processed into a finished product with a value of more than $300, and then the monopoly will be able to deduct 15 percent of the $300, which is $45 as a tax deduction, for a natural resource originally worth $16 after it was mined, provided, always, that taxes are paid on as much as one-half of the profits. Roughly, this means that the tax deduction in the case of structural steel bolts will be approximately 20 times what it would be as a genuine, legitimate allowance for the depletion of the iron ore.

Some 18 months ago the Treasury Department estimated a potential loss

of revenue to the Treasury on the iron and steel processing industry of more than $300 million annually.

With this glaring, utterly indefensible situation pertaining, why has not the Congress acted? What is the reason given on the floor of the Senate today why the Senate should not act? It is said, "Wait for the Supreme Court to legislate." That is the essence of what we have heard. I am unwilling to permit this situation to continue.

I shall refer now more generally to the development of the situation and the legislative problem involved. As the distinguished junior Senator from New Mexico earlier pointed out, the Internal Revenue Code provides that in the case of minerals other than oil and gas, gross income for depletion purposes means "gross income from mining."

Senators will notice, I hope, that I said "income for depletion purposes."

If possible, I wish to lay at rest during the course of the debate, the canard, the misunderstanding, that the percentage depletion as written into the law is an allowance for the depletion of a natural resource. The Treasury does not sustain this interpretation, which I have described as a misunderstanding. Percentage depletion is a formula for tax deduction—nothing less, nothing more.

In the Internal Revenue Code "Mining" is defined as not merely the extraction of minerals or ores from the earth, but also "the ordinary treatment processes normally applied by mine owners or operators in order to obtain the commercially marketable mineral product or products."

In addition, it is clear from the statute that certain processes shall be considered "ordinary treatment processes" and certain other processes shall not be so considered.

Before the court decisions to which I referred the Treasury Department, under both Republican and Democratic administrations, interpreted the definition of "mining" generally to include the extraction of ore or mineral from the ground, the separation of the ore or the mineral from the waste material or from other ores or minerals, and the loading of the ore or mineral for shipment.

I realize that the determination of the issue involves the interpretation of technical language and decisions of the court. That is all the more reason why the Senate Finance Committee, in my view, needs a technical staff on tax matters. I have undertaken in my own office, from the allowance provided for my own staff, to employ assistants who can give me advice, help, and aid on such questions as these.

These are important questions. The crying injustice of our society today is inequitable tax policies. The poor man on a salary has no way to avoid his taxes. His taxes are deducted from his paycheck every Saturday night. Before this debate is over, I intend to discuss many devices and schemes for tax avoidance.

If I may digress for a moment, earlier today I offered for printing an amendment which would repeal the loophole in the tax law by which pensions for corporate executives may now be distributed in lump sum with only capital gains tax treatment applied. Moreover, I intend to offer another amendment which would apply an estate and gift tax to the so-called corporate pensions that corporate officials may now pass on to their children and grandchildren without income tax being collected from the corporation which made the contribution and established the pension fund in the first place, and without the official for whom the pension is created ever having paid any tax at all, yet the money is passed on without even the application of the gift or estate tax.

Mr. LONG of Louisiana. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. LONG of Louisiana. I must say, as one member of the committee, and one who has been on the committee for about 6 years, that I was frankly amazed at the revelations of not only the tax avoidance possibilities, but also the actual realities which exist and are being taken advantage of under the name of pension plans and profit-sharing plans.

Those of us who in years past voted for such measures thought the idea behind the legislation was that a corporation would set up a retirement plan for the working people, and we were given a great number of examples in which a corporate owner-manager has only a single employee. The man who owns the corporation hires himself and then he sets up a pension plan which gives his company a tax deduction, no taxes being collected when the money is set aside. He has only one employee to share it with—himself.

Then he sets up a profit-sharing plan to share profits, and that, of course, is tax exempt, to encourage the sharing of profits with the workingman by the corporate owner. But in this case the corporate owner and the workingman is the same person. The man is sharing profits with himself.

I do not know whether the Senator has specific illustrations, but perhaps he recalls that in executive session an illustration was given to us of 82 companies of the small variety. Being small companies most of them would pay taxes of only 26 percent on earned income. In the case of those 82 companies, about 45 percent of the net income was set up for the owner-manager, either in terms of pension plan or profit sharing. Usually it is a combination of both.

I must say that as one member of the committee, I was extremely amazed to discover tax avoidance to that extent through such a device was possible. Nevertheless, it is, and the Treasury has asked us to do something about it, as the Senator knows.

Mr. GORE. I agree fully with the Senator from Louisiana. I recall the examples. As the able Senator knows, most of this information was supplied as a result of inquiries made by the junior Senator from Tennessee.

I ask the Senator if it was not also developed that there was no limit to the number of corporate pensions that any one man might have. I ask him also if there is any limit whatsoever in the statute on the size of the pensions and the number of pensions which can be passed on in a manner to avoid even the estate and gift tax.

Mr. LONG of Louisiana. Mr. President, I must say to the Senator that it seems unfair to me, if we are going to pass legislation to tax a workingman on the bus ticket he buys to go back and forth to work, to permit these corporate-owner managers to reduce their tax liabilities. These revelations have caused some of us to feel that perhaps we would be a great deal better off if we set the tax on income at a lower rate for these high bracket taxpayers and eliminated the loopholes, and have everyone pay on an even basis.

Mr. GORE. In line with the statement and question of my distinguished committee colleague, the able junior Senator from Louisiana, I should like to read from a statement made to the committee by Mr. David A. Lindsay, General Counsel of the Treasury Department. Before doing so I wish to pay tribute to Mr. Lindsay and to his assistant, Mr. Glassman, and other members of the staff.

Mr. LONG of Louisiana. The Senator means the Treasury staff.

Mr. GORE. Mr. Lindsay's staff. I would readily and gladly vote to confirm Mr. Lindsay as Secretary of the Treasury even in a Democratic administration. He has been forthright and candid with us, and when we have asked him questions he has responded with the facts to the extent of his ability, in my opinion. Does the Senator share with me that estimate of him?

Mr. LONG of Louisiana. Yes; I certainly do. I think he is a very honorable and forthright representative of the Treasury.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. GORE. I will yield as soon as I have read this excerpt from the testimony. I should like to read one paragraph from Mr. Lindsay's statement:

> The present long-term capital gains treatment accorded to lump sum distributions for qualified plans—

He is speaking of corporate pension plans——

Mr. LONG of Louisiana. It could be a qualified plan even if it were set up for one man.

Mr. GORE. I ask the Senator from Louisiana if we did not have evidence that men have many pension plans, and that this matter ceases to be a matter of serving the social purpose of providing an annuity for one's retirement; it has been converted in many instances to a tax avoidance device.

Mr. LONG of Louisiana. Yes.

Mr. GORE. I continue to read:

> The present long-term capital gains treatment accorded to lump sum distributions for qualified plans at termination of employee's service or at his death should be removed.
>
> Instances have come to our attention where employees have received lump sums in excess of $800,000 taxable at capital gains rates. These lump sum distributions are not true capital gains, and the present capital gains treatment seems to have been extended to them primarily to mitigate the

impact of progressive tax rates on sums which have accumulated over long periods of time.

At the same time that we had called to our attention this instance of the one individual who had received a lump-sum distribution of more than $800,000 subject only to capital gains tax rates, we were told that the same individual could have had a dozen other pension plans which he had not cashed in. Is that not true?

Mr. LONG of Louisiana. Yes; it is entirely true. We found that it could be set up that way, and we found that with reference to the inheritance tax, if he leaves it to his children, it can be set up in such a way that it can go from generation to generation, and never pay a tax on it until someone takes it out. I am sure the Senator knows that to be correct.

Mr. GORE. That is correct. I am glad that it was brought to the attention of the Committee on Finance, and I appreciate the Senator's bringing it to the attention of the Senate.

Mr. LONG of Louisiana. Mr. President, will the Senator yield further?

Mr. GORE. I yield.

Mr. LONG of Louisiana. Did the Senator share the impression entertained by some of us, after he saw how many tax avoidances are available, that the only people who really pay at a high income-tax rate were apparently men like Joe Louis, the prizefighter, who could not anticipate that he was going to make all the money in 1 or 2 years and failed to prepare for it; or someone who was patriotic?

Mr. GORE. Well, perhaps somebody will advise Joe Louis to go into the salt business.

Mr. President, I should like to refer to one more illustration, for the benefit of my colleagues. I hold in my hand a finished aluminum product. The value of our annual production of bauxite is approximately $46 million. The value of aluminum products manufactured from that bauxite is $716 million. To take 15 percent of $716 million, for percentage depletion purposes, is quite different from taking 15 percent of the value of the bauxite from which it was produced.

The Treasury estimated, some 18 months ago, that the annual potential tax loss which would result from extending the percentage-depletion formula for tax deduction purposes to the manufactured aluminum products would be $59 million per annum.

If I may now return, once again, to a discussion of the more general aspects of the problem, I should like to call the attention of the Senate to the fact that the Treasury Department, under both Democratic administrations and Republican administrations, has interpreted the statute to mean that the gross income to be used in the computation of the depletion deduction is the gross income attributable to treatment processes equivalent to those specifically named in the statute. The Department—against all claims—undertook to maintain that any other or further processing of the mineral to the condition of a finished, marketable, retail product should be disallowed, as manufacturing and as nonmining.

But the taxpayers went to the courts; and they have won decisions favorable to them, respecting the interpretation of the statute. Several taxpayers have successfully contended, in a series of cases, that the words "ordinary treatment processes" have a much broader meaning than the interpretation made by the Treasury. In many cases the Court has held that this term embraces virtually all processes which a taxpayer applies to the original mineral in order to produce the particular end product which is marketed—such as a brick, or such as cement products, the value of which is much greater than the original ore or mineral.

Mr. PROXMIRE. Mr. President, will the Senator from Tennessee yield?

The PRESIDING OFFICER (Mr. McGEE in the chair). Does the Senator from Tennessee yield to the Senator from Wisconsin?

Mr. GORE. I yield.

Mr. PROXMIRE. I wish to ask the Senator from Tennessee a series of very brief questions.

The first—I am sure he has covered it in his speech, but I wish to be sure I understand his answer—is this: How much money does the Senator estimate favorable action on his proposal would save the Treasury?

Mr. GORE. If the present court decision stands, the Treasury estimates an annual potential loss of revenue, at the current condition of our economy, of some $600 million. That does not include the accumulated claims to which the senior Senator from Ohio [Mr. LAUSCHE] referred earlier today. This is an annual estimate of $600 million.

Mr. PROXMIRE. That means the Treasury will lose, annually, some $600 million which in the past has been paid in; does it? As I understand, that was a court decision of fairly recent development; and it is my understanding that, on the basis of that court decision, it is anticipated that advantage will be taken of it, and, as a result, taxes will be reduced below what they are at the present time.

Mr. GORE. Well, many additional claims are being made.

Mr. PROXMIRE. Some of them retroactive?

Mr. GORE. Many other taxpayers are filing under protest, with due notice of claim for refund.

The extent to which this may go unless the Congress acts is utterly unpredictable. I give to the Senator the estimate of the Treasury; but I call to his attention the point that this estimate may not accurately foresee or take into account the corollary and additional interpretations and claims which may arise. The President of the United States and the Secretary of the Treasury have asked the Congress to enact legislation which will close this loophole.

Mr. PROXMIRE. Then this is a conservative estimate which may, at least for the next year or two, be exceeded quite substantially, on the basis of the returns which are being filed under protest and on the basis, perhaps, of the retroactive settlements by firms which did not realize that this loophole existed; is that correct?

Mr. GORE. I think we can generally assume that the Treasury Department of the present administration is a conservative one. I would point to the Senator one additional example of a product that is in wide use today—wallboard. It is made from gypsum. The value of gypsum produced annually in the United States is approximately $65 million, but the value of the wallboard produced from that much gypsum is about $250 million. To take a tax deduction by a percentage depletion formula on the finished product is vastly different from taking a deduction against the value of the gypsum as it comes from the earth. In this case, on gypsum products alone, the Treasury estimates a potential annual loss of more than $21 million.

Mr. PROXMIRE. Then, in the first place, revenue losses will occur if this amendment is not adopted. In the second place, the Treasury clearly and emphatically recommends the adoption of this amendment.

May I ask the Senator from Tennessee whether or not there has been any justification—any economic justification or any moral justification—or any kind of reasonable argument that has been advanced for permitting this loophole to be opened up and continued, if he knows about it?

Mr. GORE. I am sure people have attempted to justify it. I have not found any justification for it.

Mr. PROXMIRE. That is the reason why I have asked the Senator from Tennessee the question, because I have looked for that particular matter. I have looked in the financial journals and trade publications. I think the oil people have a legitimate case. I disagree with them on depletion, but they have stated their case pretty well. They have top economists who agree with them. But I have found nobody who has competence in the tax field who does not concur with the opinion expressed by the Senator from Tennessee, that this is a loophole and it should be plugged. This is exactly the kind of loophole that can open up and develop and widen, and in 5 or 6 years a justification will evolve. There will be a claim of justification on the basis of people having invested large sums of money in these businesses because of profitability. Because many people will have entered into the business with that in mind, it will be said they had this assurance from the court and no action to the contrary in Congress. As a result, there will be a vested interest in this particular loophole which will be almost impossible to overturn.

That is why I think the Senator's amendment is so appropriate. Every month—certainly every year—that passes is going to make it that much harder to close the loophole.

Mr. LAUSCHE. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I yield.

Mr. LAUSCHE. It has been suggested that we wait until the Supreme Court acts, that the Supreme Court might reverse the lower court decisions; but I

submit that is a very hazardous course to follow. If the Supreme Court does not reverse the lower court decisions, ipso facto we certainly shall suffer the loss of 1 year's revenues, and they would amount to at least $600 million. Then, the longer we delay, the loss increases proportionately, on the basis of $600 million a year.

I understand the Senator from Tennessee has pointed out that on January 19, 1959, the Treasury Department recommended the plugging of this loophole.

Mr. GORE. Yes.

Mr. PROXMIRE. And we have done nothing about it.

Mr. GORE. That is correct, and I do not know why. I do not think there is any justification for our failure to act.

Mr. LAUSCHE. I submit the presumption ought to be that the lower court was right and that the Supreme Court will confirm the decision. We may have a reversal, but with the lower court already having spoken, we have an expression from a judicial tribunal that this allowance is justifiable on the basis of investment in the finished product, as distinguished from the crude product.

Mr. GORE. The court did not hold that it was justifiable. It held that Congress had enacted a statute which was subject to that interpretation.

Mr. LAUSCHE. That is right.

Mr. GORE. And the court placed that interpretation on it.

Mr. LAUSCHE. Yes.

Mr. GORE. And the President of the United States has asked us to change that law. The Congress has not done so. It is a big loophole. It is a nuclear hole in our tax structure, and I am proposing exactly the language the Treasury Department submitted.

Mr. PROXMIRE. Mr. President, will the Senator yield on that point?

Mr. GORE. I yield.

Mr. PROXMIRE. What in the world would be wrong with adopting this amendment? If the Supreme Court should reverse the lower court, we shall have lost nothing.

Mr. GORE. And we may gain a lot.

Mr. PROXMIRE. We would certainly gain a lot in either event, whether the Supreme Court affirmed or reversed the lower court decisions.

Mr. GORE. Congress must decide now. I am going to ask the Senate to decide, and decide now, whether it wants to give to taxpayers a deduction of their taxable income based upon a percentage value of manufactured, completed, packaged, and delivered products, rather than an allowance for the depletion of the ore or mineral that is mined from the earth in the first instance.

Mr. LAUSCHE. Mr. President, will the Senator yield so that I may ask a question at that point?

Mr. GORE. Yes.

Mr. LAUSCHE. Is not the theory underlying the grants made in the depletion laws that a part of the capital is being used up by the mining interest, and that since it is capital, there ought to be some depletion or privileges granted in tax deductions?

Mr. GORE. I should like to read to the Senate what the Treasury Department has said about this, but I do not find it at the moment.

Mr. McCARTHY. Mr. President, will the Senator yield?

Mr. GORE. I am glad to yield to the junior Senator from Minnesota, who had distinguished service on the House Ways and Means Committee and who now serves with distinction on the Finance Committee.

Mr. McCARTHY. I will say to the Senator from Ohio that the justification for the depletion allowance has gone through three or four stages. The original argument was that depletion allowance was necessary for oil so that the savings on taxes through the use of the depletion allowance privilege might be used for exploration and discovery of new oil fields. Then the justification was based on the argument that natural resources were being depleted. Following that, of course, the privilege was extended to all kinds of minerals, and eventually to sand and gravel, and even oyster shells, as has been mentioned.

We find that depletion allowance is not really based on depletion of natural resources, but is applied, really, to profits; so that the concern is really about depletion of profits. That is the argument the Senator from Tennessee is making.

Mr. LONG of Louisiana. Mr. President, will the Senator yield?

Mr. GORE. I am happy to yield to a member of the committee.

Mr. LONG of Louisiana. Perhaps I can clarify this matter somewhat. Although I have often differed with the Senator on the question of percentage depletion, I do not fundamentally disagree with him on what he is trying to do by his amendment.

The theory of depletion is that capital is being used up. Let us suppose a farmer has a 40-acre farm. On that farm we may presume there is some coal under the ground. Perhaps the farmer will discover oil. The asset in place has a certain amount of value. Perhaps the farmer did not know about the asset, but the homestead, instead of being worth $100 an acre, is worth $300 an acre with the asset. The farmer may sell some of his property, which is the oil in place. When the oil is gone the farmer will be somewhat poorer, assuming he spends his money. He will have that much less of an asset, after he has sold it.

The depletion theory is to make allowance for the fact that capital is being used up, in the form of the oil or the coal under the ground. That is the same, in theory, as selling part of the land, which could be done at a tax rate involving capital gains. If the farmer sells the asset he depletes the resource and he is allowed a depletion allowance.

The difference between those who argue for cost depletion and those who argue for percentage depletion really relates fundamentally to whether one is going to place a value upon the asset in place based on what it is worth on the market as a discovered asset, or, instead, based upon what it costs to discover it. That is fundamentally the argument, although some people may not realize it.

In this case there is no process of using up the asset. Senators should keep in mind the difference between depreciation and depletion. Depreciation is a process in which the article must be replaced because of use.

Mr. GORE. The article is wearing out.

Mr. LONG of Louisiana. The article will be gradually used up. There is a cost involved—the cost of buying more machinery, as an example.

With respect to the depletion of a resource in place the depletion allowance makes sense. When we permit someone to deplete a cost of processing, there is no relationship whatever to the fundamental theory of depletion.

Mr. LAUSCHE. Mr. President, will the Senator yield to me?

Mr. GORE. I yield to the Senator from Ohio.

Mr. LAUSCHE. In any event, whether we approach the law upon the basis of the theory of inducing mining, upon the theory of protecting natural resources, or upon the theory of expanding the capital structure, none of the theories support the contention that the cost of the finished product should be reflective of the depletion, as contrasted to the value of the asset in the ground.

Mr. McCARTHY. Mr. President, will the Senator yield?

Mr. GORE. I yield to the Senator from Minnesota.

Mr. McCARTHY. The Senator from Ohio is quite correct. In any case, there is a need for clarification of the law. The argument that we ought to wait for the Supreme Court to decide the case is without any real substance, and really should not be suggested in this body, since about half of the Members disapprove of every decision of the Supreme Court.

Mr. LONG of Louisiana. Mr. President, will the Senator yield further?

Mr. GORE. I yield.

Mr. LONG of Louisiana. Actually, responsible officials oftentimes, when they face a revenue loss, secure the passage of legislation to meet the crisis. For example, in the State of Louisiana a lawsuit was filed to contest the constitutionality of a gas gathering tax. When the lower court held in favor of the oil company, while the case was on appeal to the Supreme Court the State legislature was called into session and a tax was passed on oil severance, which involved the same industry and the same revenue from a different approach, so that the State would not be left in financial disaster in the event it lost the lawsuit.

Most responsible administrators and Governors, if they observe that a main support of the State's revenue structure may be knocked out, will not wait for the disaster to occur. Most administrators will find ways of obtaining the revenue at the time the need is known.

In this case the lawsuit has been lost in the lower court. The Treasury Department has every reason to believe the case will be lost upon appeal. Therefore, the Treasury Department has asked for the legislation. The trouble with the

Treasury Department is that it takes the Department too long to move. It is too slow.

I regret to say that the Treasury recommendations are too long. If that is the recommendation of the Treasury Department before the Senator, I suppose it is about 18 pages long, is it not?

Mr. GORE. I think it consists of several pages. [Laughter.]

Mr. LAUSCHE. When was the decision rendered by the lower court?

Mr. GORE. There has been a series of decisions.

Mr. LAUSCHE. There has been a series of decisions?

Mr. GORE. There are many decisions.

Mr. LAUSCHE. The point I am trying to make is that the first decision must have been prior to January 1959, the date of the letter.

Mr. GORE. Yes. The Secretary of the Treasury appeared before the Committee on Ways and Means in 1958 to alert the Congress to the danger. He asked that the law be clarified.

The Senator asked earlier about the theory underlying the percentage depletion allowance. The Supreme Court in the case of Helvering against Bank Line Oil Company stated that "the purpose underlying the deduction for depletion is to compensate the taxpayer for the exhaustion of a mineral reserve."

Mr. LAUSCHE. Yes.

Mr. GORE. The Senator will notice the decision states "the purpose underlying."

The percentage depletion allowance, as the junior Senator from Louisiana so ably stated, bears no relationship to the cost of the natural resource which is being depleted.

The provision of law which is generally referred to as percentage depletion is a formula for giving a deduction from taxable income to businesses engaged principally in the extractive industries.

The lower courts have held that Congress wrote a formula which allowed the taxpayer to apply the percentage depletion deduction formula not to the value of the ore, but instead to the manufactured or completed product value. The President and the Secretary of the Treasury say that this is incorrect and that a person should not be allowed to deduct a percentage of the value of the packaged, finished, delivered product upon the theory that he is depleting an ore or a resource which has only a small fraction of the value of the manufactured product.

Mr. LAUSCHE. Mr. President, will the Senator yield further?

Mr. GORE. I yield.

Mr. LAUSCHE. The Supreme Court said that by force of the language——

Mr. GORE. The Supreme Court has not said that. The lower courts have.

Mr. LAUSCHE. The lower courts have said that by force of the language contained in the act dealing with this subject, they were obligated to rule that the proportion of the cost of the finished product becomes entitled to the tax allowance?

Mr. GORE. The Senator is correct.

Mr. LAUSCHE. Instead of using the value of the crude ore?

Mr. GORE. That is correct. Those decisions are interpretations of a legislative act.

The President and the Secretary of the Treasury have asked us to clarify that legislative act, yet we are asked to delay. Why? It is so that the Supreme Court may give us guidelines. We already have guidelines. It is our basic and fundamental responsibility to write the internal revenue laws. That is not the prerogative of the Supreme Court.

Mr. LAUSCHE. I am not familiar with the law upon this subject. If taxes have been paid upon the old theory that the deduction is reflected by the value of the extracted mineral in its crude state, what length of time does a taxpayer have to recoup his payments which were made under a mistaken idea of the law? Has that been discussed?

Mr. GORE. I shall undertake to obtain the complete answer to the question.

I believe the rule ordinarily is 3 years, but it is complicated by the fact that some of these cases were decided as long as 3 years ago, and taxpayers have been filing under protest, with service of notice that a claim for refund will be filed.

Mr. LAUSCHE. Then the ramifications probably can become greater than anyone conceives at this time. One has 3 years in which to make claim to recover taxes paid by mistake of fact or law. Taxpayers could be filing such claims for refunds today.

Mr. GORE. They are.

Mr. LAUSCHE. And they will be able to have refunded taxes which were paid by mistake in the past 3 years. Some taxpayers filed their returns 3 years ago.

Mr. GORE. They were not filed by mistake but under protest.

Mr. LAUSCHE. But payments were made under such returns in the belief that the law had one meaning when it had another.

Mr. McCARTHY. Mr. President, will the Senator yield?

Mr. GORE. I yield to the distinguished and able junior Senator from Minnesota.

Mr. McCARTHY. The depletion allowance on oil was defended on the ground that the owner of an oil well had no assurance that he could find another well when his property was depleted.

To encourage further exploration, the idea of an oil depletion allowance was advanced, and the theory was more or less accepted that the owner should recover at least the cost of his investment in the original well.

Both the Senator from Tennessee [Mr. GORE] and the Senator from Ohio [Mr. LAUSCHE] know that in many cases through depletion allowance the cost of drilling a particular oil well by a particular company has been recovered many times over.

A second justification that is always raised is one which relates to defense. The argument was made that the allowance should be given to create reserves in case of a war emergency. There are two answers to that argument. We have proven reserves in the ratio of 30 to 1, the "1" being the consumption in a single year. At one time it was said that we needed a ratio of 10 to 1 to be reasonably secure, but at the present time proven reserves around the world are approximately 30 to 1.

In addition, as the Senator from Ohio knows, the nature of the ore has changed and the need for proven oil reserves all around the world is no longer as significant as it was during World War II and the years immediately after.

So the two or three principal justifications have not been eliminated altogether, but their effectiveness has been greatly reduced.

Perhaps more serious than what I have mentioned is the fact that the idea of depletion has been extended from the grant of the oil depletion allowance, as has been pointed out here, even to sand and gravel.

The Senator may know that a rather strong case was made in the last few years by the Jockeys' Guild of America. They made an effective argument. I think a more logical argument can be made for the granting of a depletion allowance to jockeys, since their capabilities are in part physical and in part intellectual. Their assets deplete, and the justification for applying the depletion allowance to their particular skill is certainly greater than for applying it to something like the finished wallboard which the Senator from Tennessee has presented by way of example.

Mr. CLARK. Mr. President, will the Senator from Tennessee yield while I ask a question of the Senator from Minnesota?

Mr. GORE. I yield.

Mr. CLARK. I ask my friend from Minnesota, since he grants the logic of a depletion allowance for jockeys, whether he does not think there should be a depletion allowance for U.S. Senators who must put up with this kind of thing all day.

Mr. McCARTHY. I do not know——

Mr. GORE. Does the Senator's comment refer to my speech?

Mr. CLARK. I apologize to the Senator.

Mr. McCARTHY. In the case of jockeys the argument was made that the average riding life is less than 4 years. We would have to have a different standard applied to U.S. Senators. At least the average senatorial life runs around 12 years; does it not? Would it not be possible, by establishing statistics from the time of the Founding Fathers all the way through 1960, to come up with a plan, if our Republican friends do not wince at the word, which would enable one to determine an appropriate depletion allowance for Senators?

I think if we continue to extend the privilege as fully as is now being done, perhaps we should extend the depletion allowance to U.S. Senators, although in my judgment they should be the last ones to be given that consideration.

Mr. CLARK. Mr. President, will the Senator further yield?

Mr. GORE. I yield.

Mr. CLARK. Both my friend the Senator from Tennessee and my friend the Senator from Minnesota came to the

Senate the hard way through the House of Representatives. I wonder if they would not agree that Members of the House of Representatives are more nearly allied to jockeys than are Senators, that perhaps the wear and tear on Members of the House of Representatives is substantially higher than the wear and tear on Senators who, after all, serve for 6 years.

Mr. McCARTHY. I believe the 4-year average life which is ascribed to a Member of the House of Representatives is a true average of 4 years. I would say that on the average they are effective for 4 years.

Mr. CLARK. Some of them come from areas of the country where they can rely on reelection more so than can some of the rest of us.

Mr. GORE. In connection with the claim of the jockeys for depletion allowance, I would not want Senators to be ruled as entirely incapable of jockeying.

Mr. McCARTHY. As I recall, it was Eddie Arcaro who made the case for the jockeys, and it may well be that if we consider where he finished in the Preakness, he probably deserves some kind of depletion allowance.

Mr. GORE. Mr. President, in further reference to the inquiry of the senior Senator from Ohio, I wish to read a statement from Mr. Lindsay, but before doing so I should like to point out that the Supreme Court has already denied writs of certiorari in a number of cases, so those decisions are now in effect.

One case which is regarded as critical and typical of the issue is now pending.

However, the Department of the Treasury has proceeded to implement some of the decisions. I read:

Mr. LINDSAY. I think it is fair to emphasize that we have attempted to conform our administrative practice to the adverse decisions of three circuits which allowed additional processes found to be customary across the Nation for brick manufacturers and cement rock. Indeed, within 4 days of the Supreme Court's denial of certiorari in several such cases the Internal Revenue Service issued a news release in part as follows:

"The Internal Revenue Service * * * is taking steps to dispose of pending litigation in claims involving brick and tile clay and cement rock as required under these decisions, and to conform Treasury regulations and outstanding rulings accordingly. This should permit the expeditious disposition of the great majority of such cases."

So it is clear from the quotation that rights are already vested, and we have delayed for nearly 2 years taking action which the President and the Secretary of the Treasury have recommended to clarify the legislation.

Mr. LONG of Louisiana. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. LONG of Louisiana. Can the Senator recall what the estimated Treasury loss will be from depletion being allowed on processing cost?

Mr. GORE. Potentially $600 million annually.

Mr. LONG of Louisiana. Are we losing all of that money now or are we only in prospect of losing it?

Mr. GORE. I should say it is held in abeyance, and, according to my committee colleagues, awaiting the possible action of the Supreme Court.

Mr. LONG of Louisiana. Is it possible under existing law for corporations which have failed to claim this allowance to file amended returns for bygone years?

Mr. GORE. I am advised that the general rule is that they have 3 years in which to do so.

Mr. LONG of Louisiana. For only the recent past years there is a revenue loss of perhaps $1,800 million.

Mr. GORE. Eighteen months ago we were advised by the Department of the Treasury that claims totaling almost $300 million were pending at that time.

Mr. McCARTHY. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. McCARTHY. If what happened in that case follows what happened in similar cases in the past, we can expect that eventually they will try to catch up and try to recover the entire $1,800 million.

I recall the hearings on the question of reserves, when a special provision was written into the law to permit companies to set up reserves on anticipated expenses. Some of them anticipated all their expenses in 2 years, and the effect, of course, was to give them a double deduction for 1 year. In the case of some corporations it would be impossible to catch up with them in a hundred years. Perhaps a corporation would go broke. In that case one could never catch up with them. One of the witnesses representing a company which had not taken advantage of that provision was asked about it. He was asked, "Did you not know of this special provision?"

He said, "Yes; but it looked too good to be true."

I assume that there are some people who, with regard to the depletion allowance, will realize that it is true.

Mr. GORE. Mr. President, I wish to close. I have spoken, I hope only a reasonable length of time, on this very important problem. The sad part of the whole situation is that we have undertaken a discussion of a very important, timely and technical matter, and there have been only 12 or 15 Senators listening to the discussion. I do not know what will happen to the amendment. I have done my best to present it. I am prepared to yield the floor.

Mr. CLARK. Mr. President, before the Senator yields the floor, will he yield to me?

Mr. GORE. I yield.

Mr. CLARK. I should like to say to my friend from Tennessee that I hope he will not be discouraged by the sparse attendance.

Mr. GORE. I should acknowledge the fact that there are many duties a Senator must perform. I myself am absent from the floor at times, attending committee meetings and looking after the business of my office. I should like also to observe that it is now 20 minutes to 3 on Saturday afternoon, after we were here until after past midnight last night.

Mr. CLARK. Mr. President, will the Senator yield further?

Mr. GORE. Yes.

Mr. CLARK. I am particularly concerned that the Senator is not discouraged by the sparse attendance, because I am confident that as the debate proceeds those of us who feel as the Senator from Tennessee feels will be heartened by the interest our colleagues will take in this very important subject as a result of the debate. That is one reason why I believe it is so important that he develop these facts fully today, so that our colleagues, who are conscientious men, will have an opportunity to read the debate in the RECORD tomorrow or over the weekend, and thus get by eye what they obviously are not getting by ear.

My friend from Tennessee has spoken a good long while, but not too long, explaining a very technical and complex amendment. My guess is that even the relatively small number of Senators who have sat through his argument—I was not able to do so all through the argument—would like to have the matter in written form so they can study it and realize exactly how important it is. The vital fact my friend pointed out is that by his amendment of the revenue laws, recommended by the Treasury and supported by Mr. Anderson, there would be yielded $100 million a year of additional revenue over and above what we are about to lose as a result of court decisions.

Mr. GORE. It would prevent the possible loss of that amount of revenue.

Mr. CLARK. As I understand from what appear to be the only hearings which were held on this subject, which was a statement by the Secretary of the Treasury, the hearings were confined to a discussion of the debt limit and of the balance-of-payments problem which affects our foreign trade. The Secretary of the Treasury was not asked a single question about my friend's amendment; nor did anyone from the Treasury testify on the desirability of it. It took the Senator from Tennessee, acting on his own—and belonging to a party different from that of the administration—to bring this matter up. When he did so he was unable to command a majority of his own Committee on Finance, for reasons which are completely inexplicable. So the only alternative facing my friend from Tennessee was to bring this matter out on the floor, as he has so ably done, and thus call the attention of not only the Senate but of the country to the wickedness of the thing and the need for the amendment.

He is to be highly commended. I hope he is not going to be discouraged because he was not avidly listened to by a majority of Senators. I wish to congratulate him personally for his work in preparing and presenting his arguments. I hope every Senator will read the debate in full in the RECORD.

Mr. GORE. I thank the Senator.

Mr. SPARKMAN. Mr. President, will the Senator yield?

Mr. GORE. I am glad to yield to the Senator.

Mr. SPARKMAN. I have enjoyed very much the presentation by the Senator from Tennessee. I have not been able to be on the floor during all of it, but I have been present during a good part of it. Frankly, this whole question of depletion is one which has caused me considerable concern and difficulty over the years I have served in Congress. In the beginning it was supposed to represent compensation for the wasting of assets or for the decrease of resources. It seems to me that in applying the rule, as in some of the cases the Senator from Tennessee has presented to the Senate, we have gotten away from that idea, or at least we have not stuck strictly to it. I have always been impressed with the idea that when a person uses up a part of his resources in earning the income he should be entitled to a reasonable depletion, but that that should be geared to the actual depletion of the resource. Does the Senator agree?

Mr. GORE. I agree with that. I would be very liberal both with respect to the depletion of a resource owned by the taxpayer and in giving an allowance to encourage exploration and development. But, as the Senator has stated, we have gone far astray from that. Now we have a percentage formula which bears no relation whatever to the value of the resource. If it does, it is entirely accidental.

Mr. SPARKMAN. That is what has disturbed me. I was going to say that I would be willing also to allow something to encourage exploration, particularly in those fields where we needed to increase the production of a particular commodity. But I think the ideas ought to be kept and distinct. I think there ought to be a formula that recognizes a depletion that is tied to the consuming of resources——

Mr. GORE. The use.

Mr. SPARKMAN. The use. Well, consuming of resources.

Mr. GORE. Exhaustion.

Mr. SPARKMAN. Exhaustion. That is the word. I think there ought to be consideration if it is one of the cases where we ought to encourage exploration, but the formula ought to be separate unto itself. The two can be tied together, but there should be a clear understanding as to which is for which.

Mr. GORE. I agree with the Senator. There is no justification for giving a big tax deduction to someone who is not discovering anything except a means of avoiding the tax.

Mr. SPARKMAN. That is the thing that has bothered me and has made me loath to vote for amendments which sought either to do away with or drastically reduce the depletion allowance, even when I recognized that there were weaknesses in these depletion allowances. It is the fact that it seems to me there has never been a—shall I say—scientific study of what these allowances are and how they should be geared according to the basic formula upon which the Senator from Tennessee and I concur.

That is what bothers me. We are working more or less in the dark. I think the Senator from Tennessee and the Senator from Pennsylvania indicated the same thought a few minutes ago. We are working on the basis of guesses.

Mr. GORE. The department may have made the kind of study indicated, but no one in the Senate, so far as I know, has made one.

Mr. SPARKMAN. Has a committee ever checked into these questions and really made a determination that this does represent depletion?

Mr. GORE. Not, so far as I know, in the Senate. There may have been subcommittees of the Committee on Ways and Means in the House who looked into the subject. The distinguished Senator from Minnesota may know about that.

Mr. McCARTHY. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. McCARTHY. This matter has gotten somewhat out of hand.

Mr. SPARKMAN. That is exactly how I feel. It has gotten away out of hand. It is difficult to know how to bring it back into hand.

Mr. McCARTHY. What happens, as in so many other cases under the tax code, where it is found that someone has an advantage, is that some other group, or even individuals, raise the cry of equity. I think we would be horrified to know what injustices have been perpetrated in the name of equity. Each one comes in and says, "In the name of equity, give me a special privilege or advantage which someone else has."

In the case of the depletion allowance, I think there was some depletion in oil. The depletion might have been subject to some change in 1953 or 1954. What happened? In the name of equity, we extended the depletion provision to other minerals, even including sand and gravel and oyster shells.

Mr. SPARKMAN. The Senator from Minnesota has referred several times to sand and gravel. If a man owns a plot of ground in which he has a deposit of sand and gravel, and he uses them up and if there is a true depletion formula, is he not entitled to the depletion allowance? That is the reason why I made the suggestion that there should be a basic formula relating to the using up of the natural resource, whatever it is.

Perhaps the fact that we have had the overall depletion on capital exploration incentives has created the demands for equalization.

Mr. McCARTHY. It is quite possible that a man might have bought land at a cost of $100 an acre——

Mr. SPARKMAN. What difference does that make? I know of some land which was bought at the price of $1 an acre, on which oil was found, but on which the owner got his depletion allowance.

Mr. McCARTHY. Suppose gravel is found, and it is worth 25 cents a yard. The owner may get a depletion allowance through the years which may run as high as $300,000 or $400,000.

Mr. SPARKMAN. Yes. Although he may have purchased the land for a dollar an acre, he might get a million dollars in depletion allowance.

Mr. McCARTHY. Why not give such a benefit to a jockey? Why not give it to every citizen?

Mr. SPARKMAN. I think we get into something different in that case. We are speaking now about using up resources; about something a man takes out of the earth. In the other instance, we are dealing with human beings. If it is decided to go into that phase, we should give the benefits across the board. I think that matter should be the subject of considerable study.

Mr. McCARTHY. The Senator could argue that any time one is dealing with a physical asset, no tax should be collected so long as the asset is being used up.

Mr. SPARKMAN. I think that principle has been partially recognized in the case of artists and writers.

Mr. GORE. In the case of percentage depletion, the tax deduction bears no relation to either the cost or the depletion of the resource.

Mr. SPARKMAN. But that has been of limited value.

Mr. McCARTHY. It would really be easier to make an application for a depletion allowance for sand and gravel than to apply it to gas and other minerals. I think oil may be one subject to which the principle may be applied.

Mr. SPARKMAN. That may be true; but it seems to me a very careful survey and scientific study ought to be made of the whole field of depletion allowances.

Mr. GORE. Senators are discussing a matter which is not involved in my amendment. Depletion allowances for gas and oil are not involved in it. What is involved in my amendment is the application of the percentage depletion deduction formula to the manufactured product, instead of to the value of the ore as it comes from the earth.

Mr. SPARKMAN. I realize that; however, I think it relates to a point I have made, that there should be a true depletion formula. It should relate to the using up of the resource. The Senator has used brick as an example. Why should a brick manufacturer be entitled to a depletion allowance on the finished product? It seems to me the resource is used up when the clay is taken out of the ground and sold. That is why I believe there should be a basic depletion formula. That is why I brought up the question.

As the Senator from Minnesota [Mr. McCARTHY] said a minute ago, we have let the matter get out of hand. We have gotten away from the idea on which I believe the depletion allowance was originally designed; namely, the using up of natural resources.

Mr. LAUSCHE. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. LAUSCHE. Probably the Senator from Tennessee has already covered the items I shall mention. If he has, he can tell me, and I will not pursue the thought.

What has been the period of time in which the Treasury Department has been interpreting this law in the manner in which they gave the allowance on the

basis of value as taken out, instead of existing value in the finished product?

Mr. GORE. Since the enactment of the law; and the Treasury still believes that the interpretation which not only the Treasury in this administration, but in previous administrations, placed upon the statute was a correct one, but some of the court decisions have been otherwise.

Mr. LAUSCHE. When was the law enacted?

Mr. GORE. The last enactment of which I am aware is the codification of 1954. However, I do not believe the matter was changed substantially then. It goes back to 1932, I believe.

Mr. LAUSCHE. Then, for approximately 26 years there was an interpretation of this law which granted an allowance reflecting the value of the mineral as taken out of the land, instead of its value as put into the finished product?

Mr. GORE. "Yes" is the answer.

Mr. LAUSCHE. Twenty-six years later, some lawyer found that there might be a chance of changing the interpretation through judicial decree?

Mr. GORE. The first claim of which I have any knowledge was filed in 1951—for the taxable year 1951.

Mr. LAUSCHE. Approximately when was the first decision rendered? I should like to have the information for the RECORD.

Mr. GORE. I am advised by Mr. Colin Stam, to which I wish to pay tribute—he is not on the staff of the Committee on Finance, but he is a member of the technical staff, and an excellent one, of the Joint Committee on Internal Revenue Taxation—that the first case was lost by the Government some 3 years ago, but that for the past 2 years the Government has been losing all of them.

Mr. LAUSCHE. Then, the fact is that for about 25 years this law was interpreted in a manner which produced far more in taxes than the interpretation now made by the different courts will produce.

Mr. GORE. That is correct.

Mr. LAUSCHE. The proposal of the Senator from Tennessee is to place the interpretation as nearly as possible in the same category it was in for 25 years before the courts acted upon it.

Mr. GORE. My amendment is exactly the amendment recommended by the Treasury Department. I am not certain that I can say it would restore the interpretation to what it was.

Mr. LAUSCHE. I said to a substantial degree.

Mr. GORE. Substantially; yes, I agree. In my thinking, I would go further than the Treasury Department; but they may be correct; and the chances are that they are correct.

Mr. LAUSCHE. If we do not agree to the amendment of the Senator from Tennessee, and if the Supreme Court should sustain the finding which has been made recently by the lower courts, the loss of revenue to the Treasury would be approximately $600 million a year.

Mr. GORE. That is the estimate of the potential loss.

Mr. KEATING. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. KEATING. If the Supreme Court should reverse the lower court, would not that effectuate what the Senator from Tennessee is seeking to do by the proposed legislation?

Mr. GORE. Not entirely, because many cases have been lost. The Supreme Court has denied certiorari in many of them.

The style of the case now pending is Cannelton Sewer Pipe Co. against United States of America. I am not sure what a decision of the Supreme Court would do; even though it completely upheld the position and the contention of the U.S. Government, in my view, it would only partially correct the situation.

But I wish to say in the august presence of the distinguished senior Senator from Mississippi [Mr. EASTLAND], the chairman of the Senate Judiciary Committee, that I do not endorse or condone the notion that the U.S. Senate should wait for the Supreme Court, before legislating on any internal revenue matter, which is the prerogative of the legislative branch of the Government.

Mr. KEATING. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I yield.

Mr. KEATING. I would not want my remarks to be regarded as indicating or implying that I had any thought that the Supreme Court should legislate, as against the legislative branch. I have always been a firm believer in the separation of powers and in the principle that it is not the duty of the Court to legislate.

I was seeking to determine what the effect would be. As I understand the position of the Senator, it is that even though the Supreme Court were to reverse the holding of the lower courts, the decision would be made on the specific facts of the case before the Court, and therefore would not give the full relief which is embodied in the Senator's amendment.

Mr. GORE. Yes, that is my understanding.

Mr. LAUSCHE. Mr. President, will the Senator yield? I should like to add something to that statement.

Mr. GORE. I yield.

Mr. LAUSCHE. I do not think it is safe to assume that if the Supreme Court were to overrule the holding by the lower courts, all would be well. It is true that all would be well, except in some minor degree, as regards decisions which already have been rendered, and no subsequent Supreme Court's decision could affect the rights acquired by the litigants in those decisions.

Mr. GORE. Certiorari has already been denied in several cases.

Mr. LAUSCHE. But let us assume the Supreme Court reversed the findings of the lower courts, and then we proceeded to pass legislation. All of the claims that had accrued in the past and all of the claims for taxes erroneously paid for 3 years before would be pressed, and payment by the Government would be demanded; and if 1 year from now we passed legislation, after the Supreme Court sustained the holding, the loss, in my opinion, would be $2 billion.

Mr. McCARTHY. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I yield.

Mr. McCARTHY. I think we should realize that the responsibility in this matter is not primarily that of the Court. During the years, the Congress has added to the code with regard to the depletion allowances, to the extent of building in a kind of subsidy, in many cases. So I think the Congress should straighten out this situation.

Mr. GORE. I agree with the Senator.

Mr. President, I am most grateful for the consideration and attention of my colleagues. I thank each one of them.

Mr. LAUSCHE. Mr. President——

The PRESIDING OFFICER. The Senator from Ohio is recognized.

Mr. LAUSCHE. Last evening, the Senator from Pennsylvania [Mr. CLARK] stated that we are indulging in irresponsible fiscal practices in this session, by following the course of increasing spending and reducing taxes. I should like to discuss briefly this general subject.

Last night, I referred to a letter which I received from a citizen of Ohio. In the letter he said, in effect, "If you want long tenure in public office, I advise you to follow the course of supporting all spending programs, opposing all new tax measures, and supporting all measures to repeal existing taxes." Probably there is some truth in what he said; but, in my opinion, in general he is grossly mistaken.

Mr. President, it is my belief that the people of the country want to follow a course that will insure the security of the Government and the Nation. They do want taxes reduced and taxes eliminated, and they want expenditures made wherever justified in the interest of the security of the Nation and the welfare of the people. If we followed the course of letting them know what our problems are, they would be glad to subscribe and applaud. However, if we fail to acquaint them with our problems, they grope in the dark, and follow the easiest course.

At one time in our country there was the philosophy that the Government should spend whatever was necessary for the assurance of the security of the country and for the development of the welfare of the people, and then should impose the taxes necessary in order currently to defray those expenditures. That was a sound theory. Surpluses were not developed; deficits were not accumulated.

Then there came a period in which it was advocated, "Spend and spend, and tax and tax." That might have been well in the period of a very catastrophic depression; but that course could not go on and insure the life of our country.

Regrettably, in my opinion, we are now following the course of "Spend and spend, but do not tax." Mr. President, that cannot be. It is irrational; it is illogical; and it can only lead to calamity.

I should like to point out for a moment what has happened since 1931. In the 29 years since 1931, in only 4 years have revenues exceeded expenditures. In 25 out of the last 29 years, we have operated on a deficit basis. The highest deficits, except in the war years, occurred in 1953 and 1959. In 1953, the deficit

was $9,449 million. In 1959, it was $12,427 million.

I concede that there can be negligible deficits in a growing economy without causing grave danger to the general economy and governmental structure, but I likewise submit that we cannot interminably be indulging in deficits without facing a probable calamity at some time in the future.

The theory that we can spend ourselves into prosperity has never been found sound, although it has been advocated by some economists in the decades from 1930 to 1960. The ordinary individual who each year spends more than he takes in finds out that the path which he is traveling leads to the poor house. And if we as a nation keep spending each year more than we take in, we shall be coming to the point where there will be a brink ahead of us.

On the matter of deficit operations, I point out that in the year 1942, the deficit was $21 billion; in 1943, $57 billion; in 1944, $51 billion; and in 1945, $53 billion.

It will be observed that I have taken the years from 1942 to 1945, both inclusive. The deficit for those years, in the aggregate, was $182 billion.

The point I want to make is that if we get into international difficulties again, and if we have to gear our economy to a wartime program, the deficits will probably jump to a hundred billion dollars a year. My query is, How are we going to carry them? We have not placed ourselves in a better fiscal situation since the end of the war. At the end of the war our national debt was $258 billion. It is estimated to be $284 billion in the year 1960. That means the debt has increased, since the end of the war, in the sum of $26 billion.

We have allegedly been living in a period of prosperity. Abundance has been the gift of the people of the land. But in that period of prosperity and abundance, instead of having done what the frugal housewife and the frugal husband would do—pay off our debt—we have increased it.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. LAUSCHE. Yes.

Mr. CLARK. Would not the Senator agree that one of the reasons why we have had these deficits in a time of comparative peace, a time of cold war, to be sure, but not a shooting war, is because of the very improvident action taken in 1954 by substantially decreasing the Federal tax take, from which we have been suffering ever since, and now it looks as though we are going to do it all over again?

Mr. LAUSCHE. I have already expressed myself on that question, Mr. President. I think that in 1954, when the general tax reduction was made, a serious mistake was perpetrated. I feel just as certain, as I stand here now, that I would not have gone along with that proposal in 1954.

Mr. CLARK. I am sure my friend would not have, if he had been in the Senate.

Mr. LAUSCHE. I was then Governor of Ohio, and I knew what was happening. My opinion at that time, and I so expressed it, was, "Pay off the debt first, and then reduce the taxes."

Mr. CLARK. If the Senator will briefly yield further, it is true, is it not, that having reduced taxes in 1954—the Senator from Ohio and I think improvidently—we did find a condition in the country of substantial economic recession as a result of which the reduced tax load was unable to produce a balanced budget, and we had the largest peacetime deficit in the history of our country?

Mr. LAUSCHE. Yes, that is true. The deficit in 1953 was $9 billion, but it was $12 billion in 1959.

On that score, should not we take a look at, not the prospect, but the portent and the danger of a depression, in which the deficits, instead of being $9 billion, as it was in 1953, and $12 billion, as it was in 1959, might rise to $20 billion and $25 billion? My query is, If that happens, where do we have the reserves upon which to draw to face the problem?

Mr. CLARK. Mr. President, will the Senator yield?

Mr. LAUSCHE. I yield to the Senator from Pennsylvania.

Mr. CLARK. I find myself in complete accord with my friend from Ohio, but I should like to ask him a question as a member of the Foreign Relations Committee of the Senate. Does he not view with considerable concern the worsening of the military situation and the international posture of the United States, not only as a result of the failure of the summit conference, but as a result of the disaster which occurred in connection with our Japanese policy, and now the shelling of the Quemoy islands by the Chinese Communists? Would not the Senator be concerned that we might, in the interest of self-preservation and national security, have to, within the coming fiscal year for which we are now budgeting and appropriating, increase even further our expenditures to protect our safety?

Mr. LAUSCHE. There are other Members of the Committee on Foreign Relations present. Those Senators have been Members of the committee longer than I. However, I do not hesitate to give my views.

My views are that neither the Soviet Union nor the United States dares to precipitate an all-out conflict. If we are to remain secure it is necessary, however, that we have a military posture of such a magnitude that the Soviets will constantly be cognizant of the fact that if any war is started the Soviet Union will be destroyed.

Mr. CLARK. What would be my friend's views with respect to the possibility of trouble breaking out in the Far East, through the Chinese Communists, who perhaps are even less restrained than the Soviets?

Mr. LAUSCHE. My own view is that we shall have to increase our expenditures in the military field so long as this threat is over our heads. For that reason 2 days ago I voted for a billion dollar increase in the appropriations for the Department of Defense. On that score, every time a measure comes before the Senate, if I have a doubt in my mind I shall resolve the doubt in favor of spending more rather than not spending enough for the defense of our country.

Mr. CLARK. I also voted for the increases in the Defense Department appropriations, for approximately the same reasons given by my friend from Ohio. I feel an obligation, and I wonder if my friend feels the same obligation, to find the revenues to make up for the appropriations for which I have voted.

Mr. LAUSCHE. Mr. President, that is the point I contemplate making in the address I am now presenting. I do not subscribe to the philosophy of spending and not taxing. If we are to stop the deficit operations, they will only come to an end when we tax adequately to meet the expenditures we authorize.

I wish to point out what has been the impact of 25 out of 29 years of deficit operations. The dollar in purchasing value has fallen from 100 cents in 1941 to 47 cents in 1960. Its value is now 53 cents less than it was in 1941.

Each year we have had a deficit we have issued bonds. Those bonds frequently were payable at some belated time in the future. We indulged in the luxury of spending, but we were unwilling to carry the responsibility of taxing. The deficit operations are caused by a number of factors, but in large degree have resulted from the factors I have mentioned.

What has been the impact of the cheapening of the dollar? During the war I spoke to many citizens of my city of Cleveland. I urged them to buy bonds. I stated:

> For every dollar you put into Government bonds you will get 100 cents back. It is the soundest investment you can make. If all else fails, the Government will survive; and you will be paid back for every dollar invested.

I believed that argument was sound, and I repeated it time after time. Within the last year I have received letters from Ohio citizens, telling me they are the holders of bonds and that for the 100-cent dollars they paid for the bonds they are getting back dollars worth only 47 cents. I could not answer those statements. They were true.

People deposited their money in banks. They now find that the deposits which they made, instead of being worth 100 cents on the dollar, are worth 47 cents. Ministers, teachers, college professors and persons who made payments to the social security system lived in the belief that the dollars they would receive by way of pensions would sustain them. They now find that those dollars are worth only half of what they should be worth. These people have been duped.

The whole chain of events has been that we have robbed thousands of Americans by taking from them, exactly as if we put our hands in their pockets, a part of the moneys which they accumulated, the bonds which they bought, the pensions which they earned, and the social security payments to which they contributed their sound dollars.

Deficit operations will accentuate the cheapening of the dollar and the robbing of the citizen who has been a thrifty citizen, who has wanted to provide for himself in the future.

I should like to discuss another aspect of this folly of indulging in deficit operations for 25 out of the last 29 years, with the prospect that in the year 1961, instead of having a surplus of $4.2 billion, as contemplated by the President, we shall have a deficit, probably, of a billion dollars.

In the last year, the Treasury Department had trouble selling its bonds. People felt it was better to buy stocks, paintings, real estate, and other tangible articles rather than Government bonds. I can understand why they chose that course. The fact is they were not sure, with regard to buying Government bonds, they would get back dollars of the same value as the dollars which they paid.

In addition to the difficulty of selling bonds, we found in the year of 1959 our gold reserves dropped by $3.2 billion. The gold reserves were $22.9 billion, and I understand they have dropped to $19.7 billion. Part of the drop resulted from a deficit in our trade balances. Some experts claim part of the drop resulted from the fact that our creditors demanded payment in gold instead of accepting American dollars.

We have found that the value of the American dollar compared to the value of the Canadian dollar is gradually dropping. All of these things are evidences to indicate the folly of and the dangerous results of deficit operations.

I wish to refer now to the present situation. My recollection is that in respect to tax items which have come before the Senate, we gave a special inducement to investors who would invest in foreign countries. We provided some tax grant which amounted to about $30 million a year.

That is one tax measure that we handled. It was in effect a tax repeal. The committee which submitted the bill now before us recommends the elimination of the telephone excise tax and the transportation tax, which would result in a loss to the Treasury of $654 million. That is the second fiscal measure that came before the Senate. Each of the tax questions that have come before us has involved the reduction of taxes.

I should like to reduce taxes. No Senator has a greater proclivity to reduce them than I have. But I will not vote to reduce taxes when I know that the security and the fiscal position of my Government would be impaired by doing so.

Proposals for tax reduction have been adopted. The President has recommended the imposition of some new taxes, including the tax about which the Senator from Tennessee [Mr. GORE] has been speaking. None of the proposals has been accepted. We look indifferently upon them. We are eliminating taxes, but we are increasing spending. I am not able to enumerate in detail how we have proceeded in our spending program, but I will try to recall.

Mr. CLARK. Mr. President, will the Senator yield for a suggestion?

Mr. LAUSCHE. I am glad to yield.

Mr. CLARK. I should like to make the observation, which can be documented, no doubt, by the Senator from Ohio—if not, I will be prepared to do so later—that as a result of the action the Senate has taken in this session, we shall have eliminated the entire $4,200 million surplus which the President had forecast in his budget if we pass the bill as it came from the Finance Committee.

Mr. LAUSCHE. I agree with that statement. I am of the belief that we shall not only have eliminated the $4,200 million surplus anticipated, but that we shall have created a deficit of between $500 million and $1 billion. But let us take a look at the figures. We have increased the budget of the Department of Defense by $1,100 million, I believe. We passed the bill granting a salary increase to Government employees at a cost of $750 million. We have not yet acted upon the proposal of the President to increase the gasoline tax by 1 cent and postal rates. I do not know what loss will result through failure to pass those measures.

Mr. CLARK. Mr. President, if the Senator will yield, I have the figures.

Mr. LAUSCHE. I yield.

Mr. CLARK. Failure to pass the postal rate increase will cost us $554 million. Failure to increase the aviation fuels tax, and so forth, will cost us $146 million.

Mr. LAUSCHE. We go even beyond those figures. If the Forand bill in some form is passed, I am of the belief that the minimum cost will be about $1 billion a year.

Mr. CLARK. Mr. President, will the Senator yield on that point?

Mr. LAUSCHE. I am glad to yield.

Mr. CLARK. Actually the Forand bill, if passed, would not affect the budget because it calls for an increase in the social security tax.

Mr. LAUSCHE. Yes.

Mr. CLARK. However, there is a bill pending in the Senate, of which I am a cosponsor, together with the Senator from Michigan [Mr. MCNAMARA] and a number of others, which would impose some drain on the Federal Treasury as a result of making aged individuals who are not presently insured under social security eligible for a certain amount of medical care. I had better not put in the RECORD the figures I have because three zeroes are omitted in a rather significant place in the statement. I want to be sure to be accurate.

Mr. LAUSCHE. There are other items pending which will increase expenditures, and those would lead to an increase in the deficit. I submit that we cannot continue with that type of program.

Mr. MCGEE. Mr. President, will the Senator yield?

Mr. LAUSCHE. I yield.

Mr. MCGEE. I have been listening throughout the Senator's very excellent exposition on fundamental economics and fiscal responsibility, and with a question or two I wish to pin down some aspects of that responsibility for the RECORD.

I recall in the earlier portion of the Senator's remarks that he alluded to the substantial deficit spending of World War II years, 1942 through 1945, and it recalled to my mind a movement that occurred around 1940 or 1941, if I recall correctly, to amend the Constitution of the United States so as to fix the debt ceiling at $45 billion.

From the deficits for the years the Senator from Ohio has mentioned—$40 billion or $50 billion a year—it was obvious that we quickly exceeded the contemplated debt ceiling, which was to be a measure of a bankrupt government otherwise.

I wonder if the Senator can explain for the RECORD why it was that, in spite of exceeding the ceiling, the fiscal operations of the Government survived?

Mr. LAUSCHE. They survived because of an increase in the gross national product. But that does not alter the proposition that when abundance is with us, good husbandry requires that we reduce our debt so as to create a reserve for future dark days.

Mr. MCGEE. I agree with the Senator, but he had not made reference to that aspect of the matter, and I wanted to be sure the RECORD showed it.

Second, the Senator referred to the fact that we came out of World War II with a total national debt of $258 billion.

Mr. LAUSCHE. Yes.

Mr. MCGEE. At that time what had our gross national product become?

Mr. LAUSCHE. I cannot give the figures offhand, but they were substantially less than they are now, as I recall, and I recognize the fact that those subjects should be looked at proportionately. I submit that the $38 billion increase in debt from 1946 to 1959 is not in the same proportion as the increase in the gross national product has been to the national product since 1946.

Mr. MCGEE. Although I was in the chair listening with great interest to the remarks of the Senator from Ohio and did not have time to check the figures, I believe the gross national product in 1946 was approximately $200 billion, or $209 billion, to be exact. The national debt in that year was $258 billion. According to the Senator, the national debt has increased $38 billion since 1946. The gross national product, according to the President, was approximately $485 billion for the past year. He says at present it is increasing at the rate of $50 billion a year. I suggest that perhaps there has been an improvement in the relative debt situation. I do not suggest that this occurrence should encourage unlimited deficit spending. I suggest only that it does place in better perspective the relative severity of the problem of which the Senator speaks.

Mr. LAUSCHE. I suggest that in approaching this problem an examination be made of the proportion of our gross national product to our debt in several of the years preceding the war.

In those years the relative position was far better than it is now, but it must be conceded that we are not justified in having deficit operations. If the gross national product warrants increased taxes, we should impose them, so as to eliminate deficits. I assume the Senator will agree with me that it is a fraud and thievery for us to indulge in spending and transferring the tax burden onto our grand-

children and great grandchildren, 20 and 30 years from now.

Mr. McGEE. I certainly agree with the Senator on that point. However, I would emphasize that we have not taken a realistic look at what we are capable of doing with relation to what we ought to do. I could not agree more with the importance of our being fiscally responsible in taking on these responsibilities.

I would submit that comparisons with our debt structure and our gross national product before the war, say in the 1930's, are not necessarily valid. There were a number of other indices, and we had a very serious depression in that time, in addition to the relative debt position.

I think that in the interest of the Senator's very plausible and important point, that we assume responsibilities for what we are doing this year, that we ought to be prepared as a Nation to face up to these responsibilities. I only wanted to be sure that the Senator did not leave us with the impression that the debt relationship was so hopeless that we had better cut back and go back, when I believe the need is to go ahead.

Mr. LAUSCHE. I say with deep regret that on the floor of the Senate we should be willing to approve every spending proposal, indifferent as to whether we are collecting enough money to defray the expenses of the program. I do not say it vainly, but I am nevertheless proud to say that I have not been following that course, and I do not contemplate following it.

Mr. McGEE. I thank the Senator for his comments.

Mr. LAUSCHE. That has been the fact for the last 3 years. The philosophy has been to spend but not tax. If we do not collect enough money to defray the spending, it is urged that we sell bonds and let our grandchildren pay for them. I do not believe that that is a part of integrity or honesty, or worthy of the character of a U.S. Senator.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. LAUSCHE. I yield.

Mr. CLARK. I now have what I believe to be an accurate estimate of the general tax structure, as distinguished from social security taxes with respect to the McNamara bill for help for the aged. It is $300 million a year. I promised I would give the Senator the figures.

Mr. LAUSCHE. Has the Senator from Pennsylvania available the figures in general on the several items that I have mentioned?

Mr. CLARK. Yes; I have. They show a deficit somewhat less than that of my friend from Ohio. Of course the figures which I have would indicate that we have converted, or will convert if we pass the bill, a $4,200 million surplus into a $194,673,468 deficit, assuming that the estimates for revenues from various income taxes are valid. Of course they were based on the average gross national product through fiscal year 1961 of $510 billion, which is a figure that we are unlikely to reach for the balance of the current calendar year, because of the cutback in steel and automobiles and in other parts of the economy.

Mr. LAUSCHE. I take it that the figures given by the Senator from Pennsylvania are sound. I had already seen them. I wish to point out that they embrace only the manifest things that have thus far happened. We have 3 weeks more to go to create additional ruin.

Mr. CLARK. I believe they include everything significant which in our folly we might do before the 4th of July. Of course I could be wrong.

Mr. LAUSCHE. I wish at this time to commend the Senator from Pennsylvania for the position which he took last night. The use of the term "fiscal irresponsibility" is quite severe, but I think it is justified in the face of what we have been doing.

Mr. CLARK. I thank my friend for his kind words, of which I have not received too many in the last 24 hours.

Mr. LAUSCHE. I should like to close, and I have just this further comment to make. I have been getting many letters from Ohio citizens urging me to vote for the repeal of the transportation and the communications tax. I have answered those letters by telling my constituents that I want to eliminate those wartime taxes and that I will do everything I possibly can to effectuate their wishes. However my ultimate vote will depend upon what is done in Congress by way of new spending.

My hopes will be, and my fight will be, to see to it that spending will not be indulged in to the extent of creating deficits. If the spending programs which are voted indicate a deficit for the year 1961, then, not through my vote, but through the vote of others, I will not be able to consider the repeal of those two taxes. That, in effect, states my position on this item. I want to vote for appropriations that are needed. I want to lessen the burden of the taxpayer. Over and above that, I want to follow a course which in my opinion will best secure the future life of our country. We must give recognition to the fact that deficits will cause ruination and that good husbandry requires balanced budgets.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. LAUSCHE. I yield.

Mr. WILEY. I always listen with profit when my good friend from Ohio speaks, because, in the language of the people, "from the soil he talks commonsense."

I agree fully with his philosophy as to the comparative need of balancing outlays with spending. I wonder if there has been put into the RECORD the letter of the Secretary of the Treasury. I shall read the last paragraph, which confirms what the distinguished Senator from Ohio has said. It reads:

> It would be unfortunate indeed if premature and selective reductions in taxes were permitted to undermine the surplus in the budget for fiscal year 1961. Piecemeal tax reductions would not only prevent the attainment of the desired surplus for debt retirement in fiscal year 1961 but such reductions would also tend to postpone the achievement of the significant margin of revenues over expenditures that we should appropriately have in order to effect general improvements in the tax system. The financial position of the Government does not at this time permit a general reduction in taxes, and we do not believe that special tax reduction is now justified.

Mr. LAUSCHE. I had not placed the letter in the RECORD. I do not know whether any of the preceding speakers placed it in the RECORD.

Mr. CARLSON. I may advise the Senator from Ohio that the chairman of the Committee on Finance, the distinguished Senator from Virginia [Mr. BYRD], placed it in the RECORD at the beginning of the session today. The letter is in the RECORD.

Mr. LAUSCHE. Mr. President, I may say to the Senator from Wisconsin that I can go in unison with the policy of being thrifty and reducing taxes. I can go with the man who wants to spend but who is willing to tax to justify his spending. But I cannot go with those who want to spend and are unwilling to bear the responsibility of imposing taxes. It is the latter class, if we come to destruction fiscally, which will be responsible for that.

Mr. WILEY. Mr. President, will the Senator yield for another suggestion?

Mr. LAUSCHE. I yield.

Mr. WILEY. I was listening, as I said, with interest and profit to the sound remarks of the distinguished Senator from Ohio. In connection therewith, I am thinking in terms of the 100 million insurance policyholders. I am thinking in terms of the 40 million owners of U.S. bonds. I am thinking in terms of our responsibility to make certain that the dollars which were put into those bonds and into the insurance policies are not further depleted in their purchasing power.

As I understand the Senator from Ohio, his position is that we owe a responsibility not only to future generations, but also the savers of the country—those who have saved in insurance and those who have saved in bonds; those who have made America competent to meet the challenges of the past as well as the challenges of the present. We owe an obligation to them to make certain that their savings are not further depleted. If we balance the budget and begin paying on the debt, we will seek to reinstate further the value of the dollar.

Mr. LAUSCHE. I point out that in the 1930's Congress adopted a social security system. The workers of the country were told that a plan had been evolved under which they would pay a part of their earnings, and the employers would pay a part. The people were told that when they were mature in years and relegated from their work, they would receive payments which would sustain them in the aged years of their lives.

The people believed that representation. But the very Congress which made the representation has, in the years following, adopted a course which has robbed the people of their right.

I do not know whether the Senator from Wisconsin has received any letters from the beneficiaries of the social security system, writing in effect what I have just stated: "I was a worker in 1940. I was retired, and I received a certain

social security payment. To me, at that time, it was adequate. I felt that with what I had accumulated and the payments which I was to receive, I would be able to support myself through old age. But what have you done? You have reduced the value of those payments from 100 to 47 percent. It is not my fault. You have done it."

He is completely correct in every word he speaks. We, in a substantial degree, have robbed the people of their earnings. But now we propose, by diverse means, to restore those benefits. It is a vicious cycle. We restore the benefits, but we further cheapen the dollar.

Mr. WILEY. I would agree to a large extent with what the distinguished Senator from Ohio said, but not fully. The value of the dollar has gone down in large part because we were called upon to meet the challenge of the World War and the tremendous obligations which became ours afterward in seeking to keep the cold war from breaking into a third world war. In that process, the tremendous amount of money which became evident and the increase in wages which were granted have had, to a large extent, an impact upon the purchasing power of the dollar. Exactly what the causes were, I do not know. I do know that I agree fully with the Senator from Ohio that it is now our obligation to stop, look, and listen. That was the sign which was always used, when I was a boy, at railroad crossings. The idea was that if one got on the track and a train hit him, there would be nothing left of him. If we do not stop, look, and listen, and preserve to a large extent the present value of the dollar, we will be remiss in our obligations not only to the children of tomorrow, but to the people of today, who have had faith in Government bonds, in life insurance, and in the dollar.

If we do not keep the dollar intact in its present 47-cent value, we will be running into more troubles. Again I express my appreciation to the distinguished Senator from Ohio for what I believe is one of the finest, levelheaded talks we have had on the floor of the Senate.

Mr. LAUSCHE. I concur in what the Senator from Wisconsin has said about the impact of the war spending upon the dollar. I mentioned earlier that the deficits in the years 1942, 1943, 1944, and 1945 aggregated $182 billion. That was an important factor. However, it still does not remove the proposition that prudence, consideration of the taxpayers, and care about our country require that we eliminate deficits, create surpluses, and use the surpluses to pay off the debt, especially the war debt.

Mr. WILEY. I thank the Senator from Ohio.

Mr. LAUSCHE. Mr. President, I yield the floor.

Mr. WILLIAMS of Delaware. Mr. President, I desire to propound some parliamentary inquiries in connection with the amendment now pending to the bill.

The PRESIDING OFFICER. The Senator from Delaware will state them.

Mr. WILLIAMS of Delaware. Was the pending amendment, offered by the Senator from Tennessee, offered as a substitution for the committee amendment or as an addition to the committee amendment?

The PRESIDING OFFICER (Mr. DODD in the chair). The amendment offered by the Senator from Tennessee proposes to insert certain language in lieu of that proposed to be stricken out.

Mr. GORE. Mr. President, I could not hear the ruling. Will the Chair restate his decision?

The PRESIDING OFFICER. The Chair stated that the Gore amendment proposes to insert what was proposed to be stricken out by the committee amendment.

Mr. WILLIAMS of Delaware. The committee amendment which is now pending, is the amendment appearing on page 3, lines 10 to 13. If the Gore amendment were approved by the Senate, would that mean that the language which was in the House bill and which the committee amendment strikes would be removed entirely?

The PRESIDING OFFICER. If the Gore amendment were agreed to, it would replace the House language, which the committee amendment would strike out.

Mr. WILLIAMS of Delaware. Mr. President, a further parliamentary inquiry.

The PRESIDING OFFICER (Mr. DODD in the chair). The Senator from Delaware will state it.

Mr. WILLIAMS of Delaware. The House language in paragraph (2) dealt with the telephone tax. Paragraph (3), in lines 12 and 13, dealt with the transportation tax. The committee amendment strikes out both items.

I understand the ruling of the Chair to be that a vote for the Gore amendment would, in effect, be a vote against extension of both the transportation tax and the telephone tax. Is that correct?

The PRESIDING OFFICER. As the amendment has been submitted, that would be the effect.

Mr. WILLIAMS of Delaware. I think that situation should be made clear, because I do not believe that is the way the Senator from Tennessee wanted his amendment offered.

I raise these questions as a Member of the Senate who is in favor of the substance of the amendment of the Senator from Tennessee; and as he knows, on previous occasions I have supported that position; however, I am opposed to the repeal of the other taxes at this time.

The amendment of the Senator from Tennessee would recover revenue in the amount of approximately $50 million, based upon the Treasury's estimate. It would safeguard against a potential future loss of revenue—and I emphasize the word "potential" because I do not wish to prejudge a possible Court decision—a potential future loss of revenue which could be as great as $400 or $500 million.

I am in favor of the substance of the Gore amendment and if offered separately I will vote for it. However, from the ruling which has been made by the Chair, I understand that if we voted for the Gore amendment, as it is presently pending, we would, in effect, be voting for a total reduction of revenue in the amount of $730 million as against a recovery of $50 million, or a total loss of $680 million in revenue.

I do not think the Senator from Tennessee intended his amendment to operate in that way; but I understand that to be the actual parliamentary situation at this time.

Mr. GORE. Mr. President, will the Senator from Delaware yield to me?

Mr. WILLIAMS of Delaware. I yield.

Mr. GORE. I did not intend the amendment to operate in that way, and I do not believe that is the actual situation.

The first committee amendment deals with the telephone tax. The committee amendment proposes to strike from the bill the language in lines 10 through 13. The committee amendment does not actually use the words "strike out"; but in the bill, that part of the committee amendment is indicated by the use of horizontal lines drawn through the words to which I have referred—in other words, drawn through the words in lines 10 through 13. In that connection, the words "strike out" are inferred, rather than actually stated.

I have submitted an amendment to the committee amendment. Certainly the offering of an amendment to the committee amendment is entirely proper, under the rules of the Senate, for a committee amendment or any other amendment is subject to amendment. So I have offered an amendment to the committee amendment.

The committee amendment itself proposes that lines 10 through 13 be stricken out. My amendment proposes to add to the committee amendment—and, as I have stated, the committee amendment proposes that those lines be stricken out—the words set forth on the paper I sent to the desk.

Therefore, Mr. President, if my amendment were adopted, thereafter the question would properly recur on agreeing to the committee amendment as amended by my amendment. If the committee amendment as thus amended were adopted, the result would be to strike out the telephone tax and to insert the words of my amendment. That is bound to be the parliamentary situation.

What seems to be confusing the distinguished senior Senator from Delaware is the fact that the committee amendment does not actually use the words "strike out," but involves the use of horizontal lines struck through the words in the lines of the bill to which we have referred—which is a parliamentary practice that has been followed ever since I have been in the Congress.

Mr. WILLIAMS of Delaware. Mr. President, as the Senator from Tennessee knows, I am not quarreling with what he seeks to do, because I find myself in complete agreement with what he is endeavoring to accomplish, and if he were able to obtain from the Chair a ruling that that would be the effect of the amendment, that would be different.

But is the Senator correct in saying that his amendment would deal only

with the telephone tax? As the amendment has been offered, would it not deal with both the telephone tax and the transportation tax?

The PRESIDING OFFICER. First, let the Chair state that the best way for the Senate to proceed is to act first on the committee amendment, and either agree to the committee amendment or reject it; and then take up the Gore amendment, which proposed that certain language be added. Otherwise, if the committee amendment were amended by means of the Gore amendment, and if thereafter the committee amendment, as thus amended, were to be rejected, the Gore amendment would also be rejected.

Mr. DIRKSEN. Mr. President, will the Senator from Delaware yield? I wish to inquire about the parliamentary situation.

Mr. WILLIAMS of Delaware. I yield.

Mr. DIRKSEN. I should like to ask about the schedule for the remainder of today, and whether there is any likelihood that a vote will be taken today on the question of agreeing to the amendment of the distinguished Senator from Tennessee [Mr. GORE], and whether the plan, earlier announced, in regard to the length of the session today—in other words, that it would last until as late as 10 p.m.—is still the program in connection with the plans of the majority leader for today.

Mr. JOHNSON of Texas. Mr. President, I am unable to respond to the Senator's question. I attempted to obtain some general idea of the prospects, so that I could inform Senators this morning. But I was unable to do so.

If the Senator from Illinois has been able to obtain information, perhaps he will give it to us.

Mr. GORE. Mr. President, I did not understand the Senator's question.

Mr. DIRKSEN. I asked whether there is a likelihood that a vote will be taken today on the pending amendment.

I ask the question because some Senators have plane reservations, and all Senators wish to be able to make their plans, in view of the fact that today is Saturday.

Mr. GORE. I completed my speech about an hour ago, and I have no further remarks to make on the amendment. So far as I am concerned, the roll can be called now. I should like to have a yea-and-nay vote taken.

But, first, I should like to have the parliamentary situation clarified; I believe that desirable and proper.

Mr. JOHNSON of Texas. Of course we wish to have the pending amendment voted on as promptly as possible. If it is voted on this afternoon, then I would be willing to have the proceedings go over until Monday.

Of course, later we might find it necessary to set aside the further consideration of this measure, in order to handle certain other measures, and to return to it thereafter, before the expiration date.

Mr. GORE. Of course, I can speak only for myself.

Mr. JOHNSON of Texas. Mr. President, in order to ascertain whether we may have a chance to vote on the pending amendment today, I now ask unanimous consent that not to exceed 30 minutes to a side be allowed for the further consideration of the amendment submitted by the Senator from Tennessee [Mr. GORE] and that then the Senate proceed to vote.

Mr. GORE. Mr. President, reserving the right to object—although I shall not object—let me say that in view of the general interest of Senators in this matter, perhaps there should be a brief quorum call, in order to alert Senators to the fact that a unanimous-consent request is being submitted.

Mr. MANSFIELD. Mr. President, let me state that 5 minutes ago I asked some of the attachés to try to locate the Senator from Pennsylvania [Mr. CLARK], who is interested in this matter.

Mr. JOHNSON of Texas. Mr. President, I withdraw my request. Perhaps the Senator from Tennessee——

Mr. PASTORE. First, Mr. President, will the Senator from Texas yield for a question?

Mr. JOHNSON of Texas. I yield.

Mr. PASTORE. Do I correctly understand from the distinguished majority leader that if the Senate votes this afternoon on the Gore amendment, then the Senate will take a recess until Monday, and then, on Monday, will proceed to complete its action on the bill?

Mr. JOHNSON of Texas. Yes.

Mr. PASTORE. Is that correct?

Mr. JOHNSON of Texas. Yes. Otherwise we shall go to about 10 o'clock, as I have said.

I want to be reasonable and fair. At the same time, every Senator knows we have bills to consider on minimum wage, coal research, space, a medical plan for the aged and the Japanese Treaty—the Secretary of State is calling on us to bring that up. We had a conference with the leadership and the chairman of the Foreign Relations Committee and representatives of the State Department on it in the last 30 minutes. We have the sugar bill and some six or eight appropriation bills to consider. If we can make some progress on this bill, we will. If we cannot, we will set it aside and bring it up at a later date.

Mr. LONG of Louisiana. Mr. President, reserving the right to object——

Mr. JOHNSON of Texas. I have withdrawn my request.

Mr. LONG of Louisiana. I was not going to object. I was merely going to reserve my right to object so I could make a statement. I hope the Senator will agree to have a roll call in 15 minutes, and have the word go out that we are going to vote in 15 minutes. If any Senator wanted to respond, he could take the next 15 minutes to do so before we voted.

Mr. KEATING. Mr. President, a parliamentary inquiry.

Mr. JOHNSON of Texas. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. JOHNSON OF Texas. Mr. President, I ask unanimous consent that further proceedings under the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent, now that the Senator from Tennessee has made his case on his amendment, that we have not to exceed 30 minutes, to be equally divided, on the Gore amendment, and then proceed to a vote.

Mr. CLARK. I object.

Mr. WILLIAMS of Delaware. Mr. President, reserving the right to object——

Mr. MANSFIELD. It has been objected to.

Mr. WILLIAMS of Delaware. I was in favor of the limitation, but I wanted to make a statement to clear up the matter before we voted on it.

Mr. JOHNSON of Texas. Mr. President, I just wanted to make clear what was evident, that there was a deliberate effort to delay a vote. I had been told certain Senators had said that, and if there was any chance to get a vote, I thought I would try to get it.

There is going to be some legislation that people want passed that is not going to be passed in the next 10 days. I want to clearly fix the responsibility for the result, because I am trying to get a vote on the bill. The author of the amendment is ready to vote on it. So far as I know, every Senator is ready to vote on it, but objection has been made. We will stay here until 10 o'clock, if the Senate will stay with us until we get a vote on it. If not, we will come in at 10 o'clock Monday, and we probably will have to shift to other legislation, because of the emergency nature of it, and come back to this bill if and when we can.

Mr. ANDERSON. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. Yes.

Mr. ANDERSON. Why not call the roll without a unanimous-consent request? We are ready to vote.

Mr. JOHNSON of Texas. I would be glad to have that done, but the Senator from Pennsylvania objects.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. Yes.

Mr. CLARK. I should like to be heard at some length. It is my understanding that the Senator from Minnesota [Mr. MCCARTHY] has a speech he desires to make. The Senator from Wisconsin [Mr. PROXMIRE] wishes to be heard.

Let me say again I have no desire to delay coming to an issue on this bill. I propose to offer a motion to recommit at the appropriate time, but I think that motion to recommit ought to be pretty fully discussed and ought to be made in the light of the speech which I believe the Senator from Minnesota and the speech the Senator from Wisconsin desire to make, and also in light of the speech I want to make. I am not attempting in any way to do anything else than to have the matter of these loopholes fully and completely laid before the Senate. I realize that many Senators are not going to be on the floor to hear what is said, but I have a good deal of confidence they will read in the RECORD tomorrow at least the substance of what is said.

I wish to indicate my strong view that this is a matter of the greatest importance. I am not willing to go ahead to a vote on the Gore amendment until the addresses Senators desire to deliver are made.

Mr. JOHNSON of Texas. If the proponents of the amendments have been acting in good faith, as I think they have, and I had been warned earlier they were not going to permit a vote, and all the evidence bears that out—if they are acting in good faith, I am prepared to ask the Senate to stay in session, and any Senator who wants to listen to them can do so. I assume they will not be asking for a rollcall. But we will keep the Senate in session and stay here until 10 o'clock so that any Senator who wants an opportunity to make a speech on the Gore amendment or on the bill will have that opportunity, so the speeches may appear in the RECORD tomorrow. We will come in Monday at 10 o'clock and we will make as much progress Monday as we can, consistent with the serious demands made upon us. We may have to set this bill aside and take up another measure, and if so, all will know we have spent 12 hours every day trying to get action.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield.

Mr. MANSFIELD. I talked with the Senator from Wisconsin [Mr. PROXMIRE]. He did not express opposition to a vote, but said he wanted an opportunity to deliver a speech before coming to a vote.

Mr. PROXMIRE. Mr. President, if the Senator will yield, I had an informal discussion with the Senator from Montana. I said I wanted to get a statement on the record, but I felt, so far as the Senator from Tennessee was concerned, I would be guided by his wishes.

Mr. ANDERSON. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. Yes.

Mr. ANDERSON. What is happening illustrates the situation we are in. The Senator from Tennessee is quite willing to go to a vote on the amendment. The Senator from Wisconsin [Mr. PROXMIRE] does not desire to delay a vote, but he wants an opportunity to speak. The Senator from Pennsylvania indicated that if we were to vote, he could speak until 7 or 8, but it would not take him any longer. We would have disposed of one amendment. What is wrong with that? I do not see the Senator from Minnesota [Mr. MCCARTHY] indicating that he is trying to get the floor.

All I say is that if what the Senator from Pennsylvania says is correct, then why should we not vote upon the Gore amendment and give every Senator who wants to speak an opportunity to speak as long as he wishes to speak for the RECORD? That way we will make some progress.

Mr. JOHNSON of Texas. Mr. President, I yield to the Senator from Minnesota, so that he can state whether he desires to speak before we vote upon the Gore amendment, if the Senate remains in session.

Mr. MCCARTHY. I will say to the majority leader, that I have no particular desire to speak upon the Gore amendment. I would defer to the wishes of the Senator from Tennessee. If the Senator from Tennessee is willing to have a vote at this time, that is satisfactory to me.

Mr. JOHNSON of Texas. If we could have a vote, I will say to Senators, then it will not be necessary to have more votes. Any Senators who desired to speak could speak up until 10 o'clock this evening. We will come in at 10 o'clock in the morning on Monday and have as many votes as are permitted. Then we can consider some other bill, if it is necessary.

Mr. LONG of Louisiana. Actually, although I know the Senator would like to do that, is it not correct to say that if the Senator from Texas wants to have a vote upon the Gore amendment he can have a vote now, by making a motion to table? I know the Senator from Texas does not desire to do that.

Mr. JOHNSON of Texas. I do not desire to do so, with respect to the amendment of the Senator from Tennessee, until Senators have had a full and adequate opportunity to discuss it. We have been in session since 10 o'clock this morning. Senators have had a number of hours to speak about the amendment.

Mr. LONG of Louisiana. Mr. President, the Gore amendment could be offered in a slightly altered form. If the amendment is rejected, and the Senator feels it is rejected because of the absence of certain Senators, he could offer the amendment in a slightly different form later.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. Mr. President, in order to resolve the problem, I think I shall move to table the Gore amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

Mr. CLARK. Mr. President, will the Senator withhold his motion until I have an opportunity to make a statement?

Mr. JOHNSON of Texas. Mr. President, I withhold the motion temporarily.

Mr. President, we have been in session for 6 hours and 20 minutes. The Senator from Tennessee has made his case. The proponents have had their say. A motion to table may be a little unfair to the opponents, but I do not know who the opponents might be. No Senators have asked for any time in opposition.

I assume that certainly the Senator from Pennsylvania is not an opponent of the Gore amendment.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. To answer that question? I will yield for a question.

Mr. CLARK. Mr. President, I desire to present a motion to recommit, which, I believe, under the rules of the Senate, would take precedence over the Gore amendment. I do not believe I should present the motion to recommit for a vote tonight.

Of course I am not opposed to the Gore amendment. I support the Gore amendment. However, I think the motion to recommit is a more appropriate way to proceed. I should like to have a vote upon the motion, but not tonight, in the absence of many Senators who I believe will support the motion. I am prepared to come in early Monday and to stay all day Monday. If my motion to recommit is defeated, we can vote upon any or all amendments.

Also, I am of the view that if the Senator from Minnesota does not wish to make a speech tonight and if the Senator from Wisconsin does not wish to make a speech tonight, I should like to make a speech tonight. After I make my speech, I shall then be quite ready and willing to go home, but I shall stay until 10 o'clock if the majority leader wishes to stay.

Mr. JOHNSON of Texas. Mr. President, I renew my motion.

Mr. KEATING. Mr. President, will the Senator from Texas withhold his motion and yield to me?

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that I may withhold my motion and yield to the Senator from New York, without losing my right to the floor.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas? The Chair hears none, and it is so ordered.

Mr. KEATING. Mr. President, I have no objection to voting upon the motion to table in 15 minutes or 30 minutes or any reasonable time, but I should like to have about 5 minutes before then.

The PRESIDING OFFICER. The Senator will suspend. The Senate will be in order, so that the Chair and the Parliamentarian can hear the Senator from New York.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that I may yield to the Senator from New York [Mr. KEATING] for not to exceed 3 minutes, without losing my right to the floor.

Mr. KEATING. Will the Senator make it 5 minutes, please?

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas? The Chair hears none, and it is so ordered. The Senator from New York is recognized for 3 minutes.

Mr. KEATING. Mr. President, I am not prepared to yield under those circumstances. I yield back my time.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that I may yield to the Senator from Delaware for 2 minutes without losing my right to the floor.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas? The Chair hears none, and it is so ordered.

The Senator from Delaware is recognized for 2 minutes.

Mr. WILLIAMS of Delaware. Mr. President, I should like to finish the parliamentary inquiries we were conducting earlier.

Mr. President, in order that we may know on what we are voting I wish to be sure that we are clear on the parliamentary situation.

Assuming that the Gore amendment as it has been offered is approved by the Senate, the effect will be to uphold the Senate committee position as to the

repeal of the telephone tax and the transportation tax. Is that correct?

The PRESIDING OFFICER. That is correct.

Mr. WILLIAMS of Delaware. In other words, Mr. President, if we vote for the Gore amendment we shall be voting to repeal both the transportation tax and the telephone tax at the same time?

The PRESIDING OFFICER. That is correct.

Mr. WILLIAMS of Delaware. I desired to have that made clear because I am one who is in favor of the substance of the Gore amendment. I would vote for the Gore amendment if the Senator would offer it later as a separate measure. However, if it is offered at this time in this way we are caught in a dilemma. We would be voting for an amendment which would recover $50 million in revenues but which would carry with it the reduction of the telephone tax and of the transportation tax, which would result in a loss of revenue of $730 million. The net effect would be a loss of $680 million to the Federal Treasury.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. Mr. President, I ask unanimous consent that I may yield to the Senator from Montana.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Delaware? The Chair hears none, and it is so ordered.

Mr. MANSFIELD. I should like to get the matter straight. As I understand the remarks of the Senator from Delaware, a vote "aye" for the Gore amendment is a vote, in effect, against the action taken by the Finance Committee to repeal the taxes on telephones and transportation?

Mr. WILLIAMS of Delaware. No. The ruling of the Chair is the other way. I hope the Parliamentarian and the Presiding Officer will follow these remarks because I want to have this straight in the RECORD.

As I understand the situation, Mr. President, a vote for the Gore amendment will be, in effect, a vote to sustain the committee action which was to repeal the transportation tax and the telephone tax. Therefore, if Senators vote for the Gore amendment as it has been interpreted by the Presiding Officer and the Parliamentarian at this moment, Senators will also be voting to repeal the transportation tax and the telephone tax, which is in line with the committee recommendation?

The PRESIDING OFFICER. That is the ruling of the Chair.

Mr. ANDERSON. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Senator from Delaware may yield to the Senator from New Mexico, without my losing my right to the floor.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas? The Chair hears none, and it is so ordered.

Mr. ANDERSON. Is it not true that the only motion which is before the Senate is the motion of the Senator from Texas to table? That motion does not have anything to do with anything else. It is a simple motion to table. Why do we not vote upon that motion?

Mr. WILLIAMS of Delaware. If the Senator from New Mexico will bear with us for a moment, I shall not delay the vote.

I merely want to state that as a Senator who is in favor of the Gore amendment, I would vote for it if the vote were a straight vote on the amendment itself. However, I am forced to vote to table the Gore amendment at this time.

Mr. JOHNSON of Texas. Mr. President——

The PRESIDING OFFICER. The Senator from Texas.

Mr. HOLLAND. Mr. President, a parliamentary inquiry.

Mr. JOHNSON of Texas. Mr. President, I yield 3 minutes to the Senator from New York, and if the Senator has not completed in that time I shall be glad to yield such time as is necessary.

The PRESIDING OFFICER. The Chair points out that the Senator from Texas has withheld his motion to table.

Mr. JOHNSON of Texas. Mr. President, I have withheld the motion, and I am holding the floor. I ask unanimous consent that I may yield to the Senator from New York.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas? The Chair hears none, and it is so ordered.

Mr. JOHNSON of Texas. I yield to the Senator from New York for 3 minutes. If the Senator from New York has not completed in that time, I shall yield further time.

Mr. KEATING. Mr. President, it seems to me that the Senator from Tennessee made out a strong case for his amendment. If the motion to table is rejected, we shall then have before us both the question of the cancellation of the taxes and the Gore amendment.

This was pointed out by my distinguished colleague from Delaware [Mr. WILLIAMS] who just raised some questions about our parliamentary situation, and indicated his support for the Gore amendment standing by itself. In this regard, I apprehend that many Members who want to table the Gore amendment at the present time would be disposed to support it were it standing alone.

Mr. President, on June 1 I spoke to the Senate, indicating my interest in a proposal, put forth by Governor Rockefeller, that the Federal excise tax on general telephone service, shown at page 3, lines 10 and 11 of the bill, the section which the Gore amendment pertains to, should be relinquished to the States, for educational purposes.

This proposal has been advocated by many Governors and by a number of educators and experts in the fields of government and public finance. I think the distinguished Governor of New York is entitled to commendation for focusing attention, by his telephone tax proposal, on a number of fundamental questions concerning the political and economic relations between the Federal Government and State and local governments. In effect, his proposal follows and adheres to the longstanding position of the administration that we must carefully examine our ideas as to the size and scope of our Federal Government, and that we must encourage the reallocation of certain Federal functions to States and localities.

I have always taken a special interest in this very crucial field. Last year I introduced a resolution establishing a Joint Committee on Federal-State Economic Relations. Although this particular resolution was not passed, the Congress did enact legislation setting up a commission in the executive branch to examine and study various problems in the field of intergovernmental relations. This Commission is presently in existence and is now hard at work on its various studies.

Governor Rockefeller has clearly called attention to a number of basic and far-reaching questions of importance here and which are raised by his proposal that the Federal excise on local telephone service should revert to the States. In doing so, he has indeed performed a valuable service for all of us who favor a reevaluation and revision of the role and functions of the Federal Government and of State and local governments throughout our Nation.

Those who support Governor Rockefeller's proposal and the many similar proposals which have been put forward in this area must be pleased with the action taken by the Senate Finance Committee in striking the Federal general telephone excise from the bill before us today.

In my remarks on June 1 I discussed New York State's recently enacted legislation giving school districts the authority to level a 10 percent excise on general telephone service for educational purposes. This farsighted action was predicated on the assumption that the Federal tax or local telephone service would expire, as scheduled, on July 1 of this year. The action by the Senate Finance Committee is a significant stride toward the day when New York's new school tax legislation can be put into effect.

There are two basic reasons for relinquishing the Federal excise on general telephone service which, as I see it, underlie the position which has been taken by the Governor and the Legislature of New York State.

First, the fact that for the most part local telephone service is a service rendered within the boundaries of a single State makes this an especially appropriate tax for the States to levy. Whenever it is proposed that State and local governments expand a particular service or program, we often hear the argument that the Federal Government has preempted all of the best sources of taxable revenue and that the States, and more especially local governments, simply cannot obtain the necessary funds. There is much truth to this allegation. The bill as reported is a clear affirmation of the Senate's willingness to recognize this fact and to do something about it.

A second reason underlying the position which New York State has taken on this issue has to do with the fact that we are pinpointing education as the purpose for which the general telephone tax should be relinquished.

The reasoning here is simple and straightforward. We need better schools and better teachers' salaries. The challenge to our Nation's school systems grows every day. It is abundantly clear from the current pressures in Congress for Federal aid for education that we must meet this challenge head on. The repeal of the general telephone excise would not by any means mark an end to the efforts for Federal aid for education. But it will help; and assuming we are not able to pass a school aid bill this year, it will fill a gap about which many of our Nation's political leaders are greatly concerned.

All States, I know, will not follow New York's lead and levy an excise on general telephone service for education. I still favor repealing this tax. In doing so, we would materially assist many States in meeting their school needs, and besides the Federal general telephone excise is a tax which should have been repealed long ago.

We have talked about repealing a number of the so-called temporary war excises from the day they were enacted. It is now time to do something about them. Unfortunately, we cannot repeal them all at once. But there are many good reasons for beginning with the 10-percent general telephone excise.

If we do not take this step when times are good and our budgetary situation is favorable, we shall never do it.

If we repeal this tax, the Treasury would lose some $350 million. Now, if we also adopt the amendment submitted by the Senator from Tennessee [Mr. GORE], we will very likely regain more than the amount which would be lost as a consequence.

Mr. BENNETT. We would pick up $50 million only.

Mr. KEATING. My friend from Utah says that we could pick up only $50 million as a result of the Gore amendment.

It is my understanding that this is a subject of considerable dispute, because if the Supreme Court upholds the lower courts, we can pick up considerably more than that figure—as I read the evidence that has been presented. The grand total would likely be a great deal more than the amount involved in the telephone excise tax. Therefore, I favor the Gore amendment to the committee amendment repealing the local telephone tax. I hope that the committee amendment and the Gore amendment will be agreed to.

We must be ever mindful that unless we close this loophole, the cost of retaining it must come out of the pockets and pay envelopes of all Americans.

Mr. BENNETT. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield.

Mr. BENNETT. The $600 million, which I think the Senator from Tennessee has indicated, is not new income which would be picked up, but it represents money that would not be lost if the Supreme Court decides one particular way.

Mr. KEATING. If one does not lose $5 from his pocket, he is $5 ahead, just as if someone had given him that amount of money.

Mr. JOHNSON of Texas. Mr. President, I move to lay on the table the amendment of the Senator from Tennessee, and I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on the motion of the Senator from Texas to lay on the table the amendment of the Senator from Tennessee [Mr. GORE]. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from Colorado [Mr. CARROLL], the Senator from New Mexico [Mr. CHAVEZ], the Senator from California [Mr. ENGLE], the Senator from Rhode Island [Mr. GREEN], the Senator from Indiana [Mr. HARTKE], the Senator from North Carolina [Mr. JORDAN], the Senator from Oklahoma [Mr. KERR], the Senator from Washington [Mr. MAGNUSON], the Senator from Montana [Mr. MURRAY], the Senator from Georgia [Mr. RUSSELL], the Senator from Mississippi [Mr. STENNIS], the Senator from Georgia [Mr. TALMADGE], the Senator from South Carolina [Mr. THURMOND] are absent on official business.

I also announce that the Senator from Missouri [Mr. HENNINGS] is absent because of illness.

I further announce that the Senator from Tennessee [Mr. KEFAUVER], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Michigan [Mr. MCNAMARA], the Senator from Oregon [Mr. MORSE], the Senator from Wyoming [Mr. O'MAHONEY], and the Senator from West Virginia [Mr. RANDOLPH] are necessarily absent.

I further announce that, if present and voting, the Senator from Oklahoma [Mr. KERR], the Senator from Mississippi [Mr. STENNIS], the Senator from Colorado [Mr. CARROLL], and the Senator from New Mexico [Mr. CHAVEZ] would vote "yea."

On this vote, the Senator from Rhode Island [Mr. GREEN] is paired with the Senator from Indiana [Mr. HARTKE]. If present and voting, the Senator from Rhode Island would vote "nay," and the Senator from Indiana would vote "yea."

On this vote, the Senator from Missouri [Mr. HENNINGS] is paired with the Senator from North Carolina [Mr. JORDAN]. If present and voting, the Senator from Missouri would vote "nay," and the Senator from North Carolina would vote "yea."

On this vote, the Senator from Oregon [Mr. MORSE] is paired with the Senator from Montana [Mr. MURRAY]. If present and voting, the Senator from Oregon would vote "nay," and the Senator from Montana would vote "yea."

On this vote, the Senator from West Virginia [Mr. RANDOLPH] is paired with the Senator from Michigan [Mr. MCNAMARA]. If present and voting, the Senator from West Virginia would vote "yea," and the Senator from Michigan would vote "nay."

On this vote, the Senator from Massachusetts [Mr. KENNEDY] is paired with the Senator from South Carolina [Mr. THURMOND]. If present and voting, the Senator from Massachusetts would vote "nay," and the Senator from South Carolina would vote "yea."

On this vote, the Senator from Washington [Mr. MAGNUSON] is paired with the Senator from Georgia [Mr. TALMADGE]. If present and voting, the Senator from Washington would vote "nay," and the Senator from Georgia would vote "yea."

Mr. KUCHEL. I announce that the Senators from New Hampshire [Mr. BRIDGES and Mr. COTTON], the Senator from New Jersey [Mr. CASE], the Senator from South Dakota [Mr. CASE], the Senators from Kentucky [Mr. COOPER and Mr. MORTON], the Senator from Nebraska [Mr. HRUSKA], the Senator from New York [Mr. JAVITS], the Senator from Arizona [Mr. GOLDWATER], and the Senator from North Dakota [Mr. YOUNG], are necessarily absent.

The Senator from Maryland [Mr. BUTLER] is absent because of illness.

The Senator from Indiana [Mr. CAPEHART] is absent by leave of the Senate.

The Senator from Iowa [Mr. HICKENLOOPER], the Senator from South Dakota [Mr. MUNDT], and the Senator from Kansas [Mr. SCHOEPPEL] are absent on official business.

If present and voting, the Senator from New Hampshire [Mr. BRIDGES], the Senator from New Jersey [Mr. CASE], the Senator from South Dakota [Mr. MUNDT], the Senator from Kentucky [Mr. COOPER], the Senator from Arizona Mr. [GOLDWATER], the Senator from Nebraska [Mr. HRUSKA], and the Senator from Kansas [Mr. SCHOEPPEL] would each vote "yea."

The result was announced—yeas 39, nays 26, as follows:

[No. 235]

YEAS—39

Aiken	Dodd	McClellan
Allott	Dworshak	Mansfield
Anderson	Eastland	Martin
Beall	Ellender	Pastore
Bennett	Ervin	Prouty
Bible	Fong	Robertson
Brunsdale	Frear	Saltonstall
Bush	Fulbright	Scott
Byrd, Va.	Hayden	Smathers
Byrd, W. Va.	Holland	Smith
Carlson	Johnson, Tex.	Wiley
Curtis	Johnston, S.C.	Williams, Del.
Dirksen	Kuchel	Williams, N.J.

NAYS—26

Bartlett	Humphrey	Monroney
Cannon	Jackson	Moss
Church	Keating	Muskie
Clark	Lausche	Proxmire
Douglas	Long, Hawaii	Sparkman
Gore	Long, La.	Symington
Gruening	Lusk	Yarborough
Hart	McCarthy	Young, Ohio
Hill	McGee	

NOT VOTING—35

Bridges	Hartke	Morton
Butler	Hennings	Mundt
Capehart	Hickenlooper	Murray
Carroll	Hruska	O'Mahoney
Case, N.J.	Javits	Randolph
Case, S. Dak.	Jordan	Russell
Chavez	Kefauver	Schoeppel
Cooper	Kennedy	Stennis
Cotton	Kerr	Talmadge
Engle	McNamara	Thurmond
Goldwater	Magnuson	Young, N. Dak.
Green	Morse	

So the motion to lay on the table was agreed to.

Mr. GORE. Mr. President, I understand some Senators voted to table the amendment because it was offered as an amendment to a committee amendment. I shall take a moment to advise the Senate that after the committee amendments have been acted upon, I shall reoffer the amendment as an amendment to the bill.

Mr. LONG of Louisiana. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. LONG of Louisiana. Senators might like to know the point of view of a number of oil and gas companies. I find that the independent oil producers as a group, while they have not taken an official position, favor the amendment of the Senator from Tennessee. They say that the type of practice which the Senator's amnedment seeks to prevent never was intended and never should have existed. They feel that it puts the depletion allowance itself in a very bad light, because it permits depletion to be taken in an amount far greater than anyone can conceivably justify.

For example, if the principle the Senator from Tennessee is trying to have adopted were applied to the Standard Oil Co. of New Jersey or to the Gulf Oil Co., instead of taking the depletion against a barrel of oil coming out of the well, where they would get a deduction of 72½ cents applied against a $3 barrel of oil, they could take it out of the gasoline as it came out of the plant. So the deduction, if applied against the finished product, would be almost as much as the price of a barrel of oil. It is possible, if the principle were applied to concerns owning their own refineries, that they would owe no tax whatever.

The Treasury tells us that this is a vast and growing loophole, which costs the Government an estimated $600 million a year, which could be applied generally, because this practice was never intended.

While I voted against the amendment in committee, because I had not had a chance to study it, I learned that the vast majority of oil producers and gas producers favor the amendment because they feel the depletion principle has been abused.

If we do not do something to correct this condition, we shall have to pass a retroactive tax bill to get back the many hundreds of millions of dollars we have lost. However, Senators are always much more reluctant to tax retroactively than for the future.

Mr. GORE. Mr. President, if Senators will give me their attention, I shall certainly not trespass on their time.

This is not a partisan question. I have offered verbatim the amendment which the administration submitted to Congress. For 2 years, the Eisenhower administration has been pointing out this glaring loophole and has been asking that it be closed. I simply wish to read one sentence from the letter of the Secretary of the Treasury:

> This can only result in increasing the depletion deduction for all minerals several fold—in extreme cases as much as 100 times.

Mr. President, the amendment will be reoffered as an independent proposal to the bill after the committee amendments have been acted upon.

Mr. MANSFIELD. Mr. President, I am delighted that the Senator from Tennessee will offer his amendment again, in a different manner.

A question in my mind is, What was the relationship of the amendment to the question of the reduction of the excise tax on telephone and telegraph service and travel?

Mr. GORE. The first committee amendment was to strike from the House bill the language which would continue, if adopted, the 10-percent tax on local telephone service. I favor the repeal of the local telephone tax if the revenues derived therefrom can be recouped from other sources, sources which I think it would be more equitable to tax.

Mr. MANSFIELD. Such as manufactures?

Mr. GORE. Such as depletion allowance on salt in its finished, packaged form. So I offered my amendment to the committee amendment. My amendment has now been tabled. I regret that the majority leader saw fit to move to table it, but that vote is over. I shall later offer the amendment as a separate proposition, not as an amendment to the committee amendment, but as an amendment to the bill.

Mr. MANSFIELD. In other words, when the Senator next offers his amendment, it will be offered on a straight-out basis, not on a quid pro quo basis.

Mr. GORE. On a straight-out basis; whether we want to give the salt miner a depletion percentage on the price of the finished, manufactured, packaged, and delivered product, or on the raw material he takes out of the ground.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I yield.

Mr. WILLIAMS of Delaware. When the Senator reoffers his amendment on a straight-out basis, I shall support it, as I supported it on previous occasions when it was offered.

As the Senator knows, I have felt for the last 2 years that this action should be taken. I am glad to know the Senator will reoffer his amendment later.

As I told him before the vote, I shall at that time speak for it and fully support it, because I think it an action we should take.

Unfortunately, at the time we voted before, we were caught in the position of having to support the proposal at the same time as or after the repeal of the transportation and telephone tax. I did not feel we could do that at this time.

Mr. GORE. I am of the opinion the Senator from Delaware is in error in his interpretation of the parliamentary situation; but let us not argue about that now; it is in the past.

Mr. WILLIAMS of Delaware. Perhaps the Parliamentarian was in error; but we have to accept the ruling of the Chair; and the ruling was as the Chair just stated.

Mr. MONRONEY. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. MONRONEY. Do I understand, as I have been advised informally, that this amendment is necessary to correct a judicial decision that has expanded the law beyond what Congress intended, and that there has been no definitive legislation to amend the abnormal, unusual, and unjustified depletion allowances; that it is the result of a court decision which had nothing to do with what Congress had in mind in providing for the depletion allowance?

Mr. GORE. I do not wish to decline to respond to questions such as that of the Senator from Oklahoma. I spoke for 2 hours and a half. Unfortunately some Senators were not in the Chamber.

In response, I shall read as rapidly as I can a reasonably short letter from the Secretary of the Treasury.

Mr. President, in 1958 the Secretary of the Treasury appeared before the congressional committees and asked that action on this subject be taken by Congress.

On January 26, 1959, the Secretary of the Treasury wrote to the Speaker of the House of Representatives a letter which I wish to read, in responding to the question the Senator from Oklahoma [Mr. MONRONEY] has asked. The letter reads as follows:

> THE SECRETARY OF THE TREASURY,
> *Washington, D.C., January 26, 1959.*
>
> Hon. SAM RAYBURN,
> *Speaker of the House of Representatives,*
> *Washington, D.C.*
>
> MY DEAR MR. SPEAKER: In the budget message of the President, submitted to Congress on January 19, 1959, the President stated that the Treasury Department would recommend an amendment to the Internal Revenue Code specifying the treatment processes which shall be considered mining for the purpose of computing percentage depletion in the case of mineral products.
>
> Early last year I testified before the Ways and Means Committee on the need to revise the law in order to preclude excessive depletion deductions for the brick and cement industries. My recommendation was made as a result of a series of court cases which permitted manufacturers of brick and cement to compute percentage depletion on the basis of the selling price of the finished manufactured product rather than on the value of the clay or cement rock before it is manufactured.
>
> It is now apparent under the court decisions that manufacturers of many other products may obtain depletion allowances based on gross income derived from the sale of finished products. This can only result in increasing the depletion deduction for all minerals severalfold—in extreme cases as much as 100 times. I do not believe that depletion on such an inflated scale is either reasonable or was intended. If permitted, the revenue losses will indeed be serious.
>
> The problem arises because the term "mining" is defined in the statute to include the ordinary treatment processes normally applied to obtain the "commercially marketable mineral product or products" which, in many instances, may be an expensive finished product. Accordingly, in order to prevent excessive depletion allowances, I recommend the immediate elimination of the phrase "commercially marketable mineral product or products" from the statute and the substitution of a new definition of "mining" which will specify the allowable treatment processes for the various minerals.
>
> The proposed legislation would not only prevent a substantial loss in revenue, but would also help resolve difficult and complex problems in determining for many mineral

industries the stage at which taxpayers first obtain a commercially marketable mineral product.

The staff of the Treasury is now preparing a draft of the proposed legislation, and in this connection would be pleased to work in cooperation with the Ways and Means Committee staff and the joint committee staff in its development.

Sincerely yours,

ROBERT B. ANDERSON,
Secretary of the Treasury.

Mr. MONRONEY. I thank the Senator from Tennessee. The draft which has been before us today, and which has just now been defeated, but which the Senator will later bring up, by way of motion, in its own right, not in connection with the committee amendment, is that draft, is it?

Mr. GORE. That is correct; it corresponds verbatim with what the Secretary of the Treasury sent up. The situation the amendment is designed to correct is utterly indefensible.

Let me read one paragraph from the statement made by the Chief Counsel of the Treasury Department:

A producer of steel products who mines the iron ore used in his business is entitled to a percentage depletion deduction equal to 15 percent of his gross income derived from his mining operations. Two tons of iron ore, which this producer extracts from the ground, can be processed into about 1 ton of pig iron, and the 1 ton of pig iron can then be processed into about 1 ton of steel products. The selling price of 2 tons of iron ore is about $16.

Mr. President, let me digress to say that I hope Senators will notice that 2 tons of iron ore have a value, according to the Chief Counsel of the Treasury, of $16, whereas the selling price of 1 ton of pig iron is about $60; and the selling price of 1 ton of steel products will vary widely, depending upon the product involved, but ranges generally from approximately $100 for a ton of simple structural steel to $295 for a ton of structural steel bolts.

I read further from the statement by the Chief Counsel of the Treasury Department:

The selling price of 1 ton of pig iron is about $60. The selling price of 1 ton of steel products will vary widely depending upon the product involved. It ranges generally from about $110 for a ton of simple structural steel to $295 for a ton of structural steel bolts.

The Treasury Department takes the position that a producer of steel products is entitled to compute his depletion deduction on the value of the iron ore. In this example, the depletion deduction would be $2.40. If producers were permitted to compute their depletion deduction on the value of the pig iron, the deduction in this example would be $9, which is about four times the deduction based on the value of the iron ore.

At least one producer takes the position that it is entitled to compute its depletion deduction on the selling price of its finished steel products.

If this extreme position were to prevail—

I digress to say that for 2 years the Government has lost every case on this subject—

the deduction in the case of the structural steel would be $16.50, which is almost seven times the deduction based on the value of the iron ore—

Which was $16—

and $44.25 in the case of the structural steel bolts, which is over 18 times the deduction based on the value of the iron ore.

Mr. ANDERSON. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I yield.

Mr. ANDERSON. Would the Senator from Tennessee leave the impression that any steel company has tried to take this deduction on pig iron, instead of on the raw ore? I ask that question because I do not think the practice is widespread; and that is why the Finance Committee was willing to give people an opportunity to be heard.

Does the Senator from Tennessee know of a single steel company that takes the deduction on pig iron, instead of on the raw ore?

Mr. GORE. Mr. President, I placed in the RECORD a list of cases and a list of claims. I do not have that list before me at this time. I clipped those sheets from the testimony given by the Treasury Department. The Treasury estimates that the potential revenue loss will be, not $50 million a year, but $600 million a year.

Mr. ANDERSON. On that point, I hope the Senator from Tennessee will go back to the testimony and reexamine it. As I recall the testimony, it was that the loss might run as high as $50 million a year, and that if everyone tried to take it, it might run as high as $600 million a year. But I do not recall an estimate by the Treasury of an actual loss of $600 million a year, as the situation now exists. Does the Senator have that information?

Mr. GORE. I am sure I am correct in the estimates, because Mr. Colin Stam gave them to me—that if the case now pending in the Court is lost, the Treasury estimates an annual loss of $600 million a year.

Mr. ANDERSON. I agree with that statement.

Mr. GORE. And the Treasury has asked the Congress to amend the law. But if the Congress shall not do so, perhaps there is some hope that the Supreme Court will render a favorable decision.

Mr. ANDERSON. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I yield.

Mr. ANDERSON. I quite agree with the Senator that if the case now before the Court is finally lost, and if every firm which might take advantage of it tried to take advantage of it, then the loss might be $600 million.

I see Mr. Stam nod his head, following my making of that statement, so I understand that he agrees. That is the situation. This is not plugging a loss of $600 million. The Senator from Louisiana pointed out what might happen if an oil company tried to apply the depletion allowance to refined gasoline. Can the Senator name an oil company that is doing that? I think not, because not an oil company is doing it.

Mr. GORE. Neither a gas nor an oil company is involved in my amendment, so far as I know. It relates only to the taking of a depletion allowance on a finished product like aluminum, ceramics, chalk, brick, salt—a piece of manufactured product that comes from and is based upon a mineral or natural resource. I am sure neither gas nor oil is involved in the amendment.

Mr. LONG of Louisiana. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. LONG of Louisiana. The Senator should not be so certain about that statement.

Mr. GORE. I said "so far as I know."

Mr. LONG of Louisiana. It is being contended in the gas and oil fraternity that if this is to be permitted, a depletion allowance would be taken on the delivered price in the District of Columbia, for example, which is $1.50 a thousand, rather than the field price of 7 cents.

Mr. GORE. Perhaps I should stand corrected. At least, so far as the Treasury Department is concerned, this has been presented as separate and apart from gas and oil depletion. I have treated it that way. I was not aware that people in the oil industry were saying if this is done for salt, then they are entitled to it; but I would not be surprised. If we let this provision stand, there is not an oil or gas company, or many others in the extractive industries, that will not ask for it.

Mr. LONG of Louisiana. It would be easy enough to change the way of doing business so that it can be taken on the delivered price. Gas is separated at the well. It does not become a commercial product at the well. It does when the distillates and other elements contained in the gas are separated from it. If it is shipped through a pipeline before it is put through a separator, the transportation cost has to be added to the value of it, which is the price of hauling it around the country, and that adds to the value of the product four or fivefold before it becomes a commercial product. I believe the law refers to the fact that the first point where the product becomes a commercial product is the point at which the depletion allowance can be taken.

If gas is not separated, if it is not a commercial product in the manner in which it is produced at the well, and does not become a commercial product until certain refining and separating is done, so long as it is less than a commercial product, the depletion allowance can be taken against the commercial product rather than the product that comes out of a well or mine. There is no question that if the law remains as it is, no gas or oil company will watch brick producers and everyone else get this kind of depletion allowance without doing something about it.

Mr. GORE. The Senator illustrates the dangerous proportions to which it might be carried. It is already being carried to great extremes, and the Secretary of the Treasury, in a letter which I read, warns that in extreme cases it may be 100 times more than the Treasury thinks is justified.

Mr. LONG of Louisiana. One interesting aspect of the question is that the Secretary of the Treasury, who is asking us to close the loophole, is a man who made his way in the business world in the oil and gas business and well understands depletion, that being a major aspect of

the business in which for many years he made his name and reputation.

Mr. GORE. Let me close my colloquy with the Senator from Louisiana by saying I have offered the proposal as the Treasury has recommended it. Insofar as I knew, it did not involve the gas and oil industry. If this provision is permitted to stand, perhaps the Senator is right—not only gas and oil companies, but many others will try to get this type of depletion allowance.

Mr. LONG of Louisiana. Why should they not?

Mr. GORE. Perhaps so.

Mr. SYMINGTON. Mr. President, will the Senator yield?

Mr. GORE. I yield to the Senator from Missouri.

Mr. SYMINGTON. It may be correct that no pig-iron company has asked for that depreciation, but counsel for any company that did not ask for it, based on this interpretation of the law, would be derelict in his duty as counsel for the corporation. I have listened to the Senator's explanation. I think it is able and intelligent, and I think this amendment should be approved by the Senate, because it is obvious that the provision as it now reads is an asset to big business and a liability to little and middle-sized businesses.

If a man who is in the clay business buys kilns and makes bricks and porcelain he gets a far greater depletion allowance than the man who can afford only to have the mine itself and sell only the raw clay. As one who has been in the clay business and in the steel business, and who operated companies in the clay and steel business—and I happened to have been head of the Eastern Clay Products Co. and Rustless Iron & Steel Corp.—the first thing I would do would be to say to my counsel, "Arrange for us to get this additional depletion under the law."

Mr. GORE. To illustrate that point, counsel for the Treasury listed, as one of the results of permitting this provision to stand, the acceleration of the trend toward fully integrated operations. Does the Senator not think that fully integrated operations in the extractive industries, all the way to the fully finished product would encourage a trend toward monopoly?

Mr. SYMINGTON. There is no question about it. One of the greatest dangers to the future of our economy, in agriculture, business, and banking, in the United States, is the trend toward vertical integration of business, under which, the more a business can control, the more it can fix prices.

Mr. GORE. Further, with reference to pig iron, the Treasury advises that an increasing number of claims for refund are being filed and, further, that taxes are being paid under protest. If the decision in the Court is unfavorable, they have 3 years' time in which to file their claims. I would not be surprised to see many companies take advantage of it.

Mr. SYMINGTON. It is known that some of the automobile companies own iron-ore deposits, and if that procedure were carried to its logical conclusion, a company could get a depletion allowance on a finished automobile.

Mr. ANDERSON. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. ANDERSON. There is a saying that it is strange how a man with facts can break up an argument. If one reads the law, he will see it cannot be done on a completed automobile. The law is specific on that point. It cannot be done.

There is considerable merit in the amendment of the Senator from Tennessee. Some of us have felt that people who are affected by it ought to have their day in court, but the language of the law does not apply to a completed automobile any more than it applies to completed pig iron.

Mr. SYMINGTON. How about completed brick?

Mr. ANDERSON. That is a different case entirely, and that is why the issue is in court.

Mr. GORE. The Senator from New Mexico has said that the law is plain. The Treasury is only asking the Congress to make it plain.

Mr. SYMINGTON. Mr. President, after reading the law, I am satisfied that it would not apply with respect to automobiles, but I believe it would be possible with respect to pig iron.

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. GORE. I yield to the Senator from Florida.

Mr. HOLLAND. I invite attention to what seems to me to be one of the needs which may have been mentioned by the distinguished Senator; that is, the need to clear up the picture so as to bring about fair competition.

In the phosphate industry of my State there is sentiment for claiming the depletion allowance against triple superphosphate, which is the form in which the product, after having been processed, is offered to growers or to fertilizer companies. A question arises immediately. If one company does this, can the others afford not to do it? This has caused great concern, because there are some who feel that if the claim for depletion allowance goes that far, it will jeopardize the whole right to the depletion allowance provision under the law, to which these companies feel they are entitled, but which they do not wish to see abused.

The Senator can observe how it at once poses in that field—and I am sure in many others—a serious question as to how fair competition can be maintained among competing producers of a product.

Mr. GORE. I point out to the able Senator that not only has he foreseen this, but also the counsel of the Treasury Department has said exactly the same, in the third of four major problem areas described by him to the Ways and Means Committee:

> Inequitable treatment as between taxpayers in different industries.
>
> This creates a competitive situation which forces one to take advantage of any tax break another receives.

Mr. HUMPHREY and Mr. MONRONEY addressed the Chair.

Mr. GORE. I yield first to the Senator from Minnesota.

Mr. HUMPHREY. Mr. President, I express my thanks to the Senator from Tennessee for a very lucid and concise argument. It is not difficult to understand what the Senator is talking about, even though he is talking about a complex subject.

I have listened tentatively to the Senator's discourse as to the amendment and its purpose. I have listened to the reading of the letter from the Secretary of the Treasury. It is quite obvious that while currently there may not be a large number of companies which are applying for this kind of percentage depletion allowance upon processed or finished products—I repeat, while at the present time there are not many companies doing this——

Mr. GORE. There are many which are doing it.

Mr. HUMPHREY. It is quite obvious there could be a substantial number, running into the hundreds and thousands of companies.

When I say "not many" I refer to the argument of the Senator from New Mexico. The Senator asked, "Are there any oil and gas companies doing this?" The Senator from Tennessee indicated there were not, to his knowledge.

It is to my mind, at least, clear that this could happen. The same thing could be true with respect to a pig iron company. If it can be claimed there is a percentage depletion on a processed product such as brick made out of clay, or salt which is fit for human consumption, processed and packaged, then it is quite obvious that any of the other minerals or ores which go into a finished product could at least make a request for the application of the percentage depletion formula. The Treasury Department could be in very serious trouble, if the decision of the court in the case now pending should be adverse to the interests of the Treasury.

Mr. GORE. The Supreme Court has denied writs of certiorari in a large number of cases, and those decisions of the lower courts are already in effect.

Mr. HUMPHREY. I understand.

Mr. GORE. I read from the testimony of January 1959 from the Treasury Department.

> It shows that the Government could sustain a tax loss of nearly $297 million for these years if all taxpayers whose claims are now on file were to recover the amounts claimed.

That was 18 months ago. The years in question were 1951 to 1957. We are now in 1960. Congress has refused to do anything about this problem. A Republican administration has asked the Congress to close a loophole of Democratic favoritism. What have we done? For 18 months we have done nothing. This is the first time the question has, to my knowledge, reached the floor of either House of Congress.

Mr. HUMPHREY. Mr. President, will the Senator yield further?

Mr. GORE. I yield.

Mr. HUMPHREY. There are arguments which are made for percentage depletion allowances, and those arguments have merit. Some of us who have opposed what we think are extravagant

or excessive percentage depletion allowances have recommended modest reductions in the percentage of depletion. We have not recommended abolition.

I am forced to say that the argument made by the Senator from Louisiana [Mr. LONG], and the argument initiated and made by the Senator from Tennessee, led me to believe that unless the loophole which leads to such outright abuses is plugged those who advocate percentage depletion allowances will literally be jeopardizing the entire structure. I cannot for the life of me understand why anyone would want to jeopardize the entire structure of something some people have worked for for years, in order to throw the gates wide open for a percentage depletion allowance interpretation under current law which could permit large processing companies and manufacturing companies to have a tax benefit which results from a loophole beyond any calculation we have ever dreamed of or contemplated.

I think the Senator from Florida made this quite clear a moment ago, in terms of some of the tax favoritism which would come into the business structure under the full application of the current law as it relates to percentage depletion allowances.

Mr. GORE. I remind the Senator that I read the letter from the Secretary of the Treasury, which stated that this could amount in extreme cases to a depletion allowance of 100 times what would normally be allowed.

I point out to the Senator that it is the responsibility of the legislative branch of the Government to write the tax laws. This is an inequity which has been pointed out to the Congress for 2 years. Why do we not act?

Mr. MONRONEY. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. MONRONEY. As one who has made countless speeches, both in the Senate and in the other body, in behalf of the 27½-percent depletion allowance, and as one who firmly believes this allowance is necessary to maintain the domestic supply of oil, I am fearful, indeed, with respect to the extreme we face, if the allowance is extended, as the Senator has outlined, to the processors. I fear we will lose the depletion allowances.

I hold out a warning to all those who have joined in the fight. The allowance of 27½-percent depletion, which I believe is the most fair and the best way to handle our oil industry, may be lost. It may be hacked away at until there will be no longer a fair depletion allowance for genuine mineral production, if this "free loading" is allowed to stand, if the subsidy which the court interpretation has permitted extends to monopolies. That is what it amounts to, a subsidy for monopolies. It is a subsidy to drive business into a completely integrated operation, to pyramid a normal tax allowance for depletion into something completely unreasonable. We should not allow the decision to stand.

Mr. GORE. I agree with the able Senator. So far as my attitude is concerned toward the depletion allowance to encourage exploration and development, I wish to be sure I am sufficiently lenient in that regard, but this has no relationship to that problem at all.

Mr. MONRONEY. That is my impression. I should like to ask the Senator another question.

Mr. GORE. Before the Senator proceeds, lest someone may think the Supreme Court is going to solve the question by a decision, if it should render one in favor of the Government, I wish to say that only one case has gone to the Supreme Court. The Supreme Court has denied writs of certiorari in a large number of cases. Many cases have been lost by the Government. In fact, I do not think the Government has won a single case in this field for the past 2 years.

Many of these decisions are already in effect. I read to Senators from the testimony of Mr. Lindsay, who testified in January of 1959:

> I think it is fair to emphasize that we have attempted to conform our administrative practice to the adverse decisions of three circuits, which allowed additional processes found to be customary across the Nation for brick manufacturers and cement rock.
>
> Indeed, within 4 days of the Supreme Court's denial of certiorari in several such cases, the Internal Revenue Service issued a news release in part as follows:
>
> "The Internal Revenue Service is taking steps to dispose of the pending litigation in claims involving brick and tile clay and cement rock as required under these decisions, and to conform Treasury regulations to the outstanding rulings accordingly. This should permit the expeditious disposition of the great majority of such cases."

That is the situation. The Supreme Court cannot by deciding one case enact legislation to solve the problem for us. It is a legislative problem. Perhaps on Monday the Senate will think better of the amendment.

Mr. MONRONEY. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. MONRONEY. I am impressed with what the distinguished junior Senator from Tennessee has said with regard to the Supreme Court cases. We know that the Supreme Court intends to adjourn next week. We also know that the Senate intends to adjourn in about a week or two. If the measure is allowed to be passed over to the next session, if it is allowed to rest until the Supreme Court has decided the cases before it, which may be next June or July, we could suffer a loss by the Court's decision. We can consider the reluctance, which I think is a proper reluctance, on the part of Congress to enact retroactive taxes to cover cases in which the Court has interpreted the law in a different way from that which Congress intended.

Thus we would either be required to do a very grave injustice to taxpayers, once these cases had been settled by the court against the appeal of the Government, and to refund the money the court decision might indicate the taxpayers were entitled to, for the reason that Congress had refused to clarify the act.

In the name of justice to the companies, the investors who may buy stock in companies, and whose stocks will boom if this windfall loophole is allowed to exist, in the interest of solid business concept, we must clarify the act this year and thus avoid the retroactivity of taxation, the chances of inflated stocks on the market, and multiplication of consolidations and mergers to get under the big umbrella that will have been raised over companies to assist corporations, instead of maintaining normal private individual type of business operation under a normal extension and proper use of the tax allowance for genuine mineral depletion.

Mr. GORE. The Senator has certainly illustrated some of the difficulties that would arise for Congress in dealing with this problem in the event of an unfavorable decision of the court, a partially favorable decision of the court, or even a favorable decision of the court, because rights have been vested as a result of the decision in which certiorari has been denied. The longer we wait, the more claims will be filed, the more taxes will be paid under protest. The revenue loss looms perfectly enormous.

Mr. MONRONEY. There is no retroactivity, no ex post facto law involved in the amendment of the Senator from Tennessee. It will apply, as I understand, on deductions arising for legitimate mineral depletion after passage of the bill.

Mr. GORE. To state the question briefly, the proposed amendment changes the definition of "mining" to preclude the interpretation of the term as including operations involved in processing the finished product, the packaging, and the shipping of the finished product.

Mr. ANDERSON. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. ANDERSON. Will the Senator give the date of the letter of the Secretary of the Treasury from which he has been reading?

Mr. GORE. January 26, 1959.

Mr. ANDERSON. Does the Senator not recognize that some things happened that may explain the legislative delay?

Mr. GORE. I am afraid a great many things have happened to explain it. I think I understand some of them.

Mr. ANDERSON. The Ways and Means Committee of the House of Representatives, of which I happened to be a member when I was in the House, started to hold hearings. They ran into storms of protest because of the language that was in the bill. They therefore decided they could not use the language that is in the Senator's amendment, and they, along with members of the joint committee staff, decided that they would try to redraft the amendment so that it might be usable.

While they were trying to redraft the amendment, the case which is now in the Supreme Court arose. The Supreme Court granted certiorari. When that occurred, the Treasury Department then requested the Ways and Means Committee to withhold action until the case was decided. I believe that is not in accordance with the letter quoted by the Senator. Whether or not the Ways and Means Committee acted wisely, certainly it withheld action in response to a request of the people who are most interested in correcting the situation, and who by the letters which the Senator has

read have indicated their desire to straighten out the difficulty.

The question therefore has not been considered by the Senate at any great length, because we generally depend upon the House of Representatives to originate revenue measures. I think that is the customary practice. I think if we should pass the bill, having spent days in considering it, and it should go to the House, it would promptly be dropped in conference, because I think I know how members of the House Ways and Means Committee feel, and I think I know exactly what would happen to it.

Mr. GORE. I would like to talk on that subject for just a moment. I do not know why we wish to presume that on a matter of this importance the Senate need not act because certain members of the House Ways and Means Committee might not accept our view. This question has gone so far that it has almost reached the point of being ridiculous.

I do not know why the Senate cannot work its will with respect to a provision of the internal revenue law because it imagines that certain Members of the House will not accept a measure passed by the Senate. I do not accept that thesis and I do not act upon that premise. I think we should proceed to write the best bill of which we are capable and then go to conference and insist upon the provisions of the bill. I realize perfectly well that members of the conference committee may not endorse my view on a measure, but I think the Senate conferees would undertake to uphold the will and position of the Senate in the conference.

Mr. ANDERSON. I did not suggest to the Senator from Tennessee that the Senate should not do the thing that we believe is right, regardless of what the other House may wish to do. I say only that this is not a question which the other body has not explored. This is a subject on which the House has held hearings. I understand the Senate has not. As a result of those hearings the House has decided to drop the legislation. Therefore I presume it would be very difficult to persuade the House subsequently to accept the legislation.

Also I assume there would be a recommendation from the Treasury Department, following the earlier recommendation, namely, to hold the bill in abeyance until the Court had decided the cases before it.

I repeat, however, that I think the Senator from Tennessee has presented a very interesting problem. I think it will be solved. I hope he will produce an amendment. I believe the simple amendment which he proposed in the committee was better than the belabored amendment presented by the Department of the Treasury.

Mr. GORE. In the first place, I am not aware that the Treasury Department asked Congress not to act. My understanding of the situation is that the Treasury Department despaired of the possibility that Congress would act adequately on the proposed legislation. To clarify the point I suppose we shall have to get the record. I do not understand the situation to be exactly as the Senator has stated it. He may be correct.

Mr. ANDERSON. I may be incorrect. I say to the Senator only that I described the situation as I have understood it. I may be wrong. I am willing to grant that in advance.

Mr. GORE. So am I.

Mr. KEATING. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. KEATING. To bring this discussion down to earthly facts, am I not correct that in some of the documented instances which the Senator from Tennessee has cited today the actual depletion allowance on the finished product would be greater than the total sales price of the originally mined article?

Mr. GORE. That is according to the testimony of the officials of the U.S. Treasury.

Mr. KEATING. That certainly presents a case that needs remedial legislation. I express the hope that when the Senator's amendment is reoffered, either in the present form or in modified form——

Mr. GORE. I will offer it in this form, because, although according to the junior Senator from New Mexico I might prefer a more simplified amendment, nevertheless, this has been drawn carefully by the lawyers of the Treasury Department, and I am willing to rely upon them.

Mr. KEATING. I express the hope that when it is reoffered as a separate amendment it will command the support of a majority of Senators, because we must remember that every dollar of taxes which we allow someone to escape from paying under the series of abuses to which the Senator has referred must be made up by someone else out of his pocket, or in some other way. Certainly we would be remiss, it seems to me, if we permitted to continue the situation to which the Senator from Tennessee has referred in his presentation today.

Mr. GORE. I thank the Senator. I will offer the amendment as soon as I can.

Mr. SMATHERS. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. SMATHERS. Mr. President, I am a member of the Committee on Finance. I do not remember how the amendment was discussed and under what circumstances it was discussed in committee. I wish the able Senator would refresh my memory. Did the Senator offer this particular amendment in committee in this form?

Mr. GORE. I offered it in this form. Then, because of its complexity and the difficulty of examining the technical nature of the language, and the pressure of time, I offered a simplified amendment. I am not sure whether the Senator was present at the time. The Treasury officials were there at the time, and they stated that the later amendment I offered would go further and be more stringent than the one they had prepared.

Mr. SMATHERS. The arguments the Senator has made this afternoon seem almost unanswerable. I was not aware of having heard these arguments in committee. I am not one who changes his mind very easily about things like this. However, I do think that the arguments the able Senator from Tennessee has made with respect to his proposed amendment have been very persuasive. I will support the amendment, and I am satisfied that other members of the committee, who now say they were absent when the amendment was presented in the form it was presented, will also be persuaded. I congratulate the Senator for doing a fine job.

Mr. GORE. I am very grateful and pleased. I very deeply thank my colleague on the committee. From the indications around the Chamber I believe that the amendment will be adopted on Monday. I surely hope so.

Mr. McCARTHY. Mr. President, will the Senator yield?

Mr. GORE. I am glad to yield to my distinguished colleague on the committee.

Mr. McCARTHY. I wished to point out that what is likely to happen in the case of this special tax privilege would be very much like what happened when Congress tried to meet special problems of firms which had set up reserves for expenses which would occur in the future. We tried to clarify the law. The effect was to open it up to the point where many businesses began to set up reserves for all the expenses they were going to have in the future, or at least in the next year. The result was to give them a kind of double deduction for all expenses in a single year, with the prospect that we would never catch up with them. So they had a double deduction for one year, and there would never be a time when we could catch up with them, or the time when they would be held accountable. Once this was discovered, other firms began to take advantage of it. Congress was called upon to plug that loophole. This was after the 1954 revision had been passed. We had to act on that loophole.

I suggest that the same thing is about to happen with regard to depletion allowance. Once one or two favorable court decisions have been received by one company or another, other companies, either because they have to compete with the companies that have special tax favors or because stockholders say, "You had better do something about it," or because of their desire for more profit, will seek to take advantage of this kind of tax favor. This situation is as important as it was with regard to the reserves for future expenses. It is necessary and important, therefore, that we close this loophole at this time. I am satisfied that we can perfect language to the point where it will be workable. We have until Monday or Tuesday to obtain the cooperation of the Treasury and to work with our own draftsmen, and I believe we can draft language which will in no way prejudice decisions of the Court, but which may do a great deal to protect the integrity of the tax laws of the country.

Mr. GORE. I thank the Senator. I conclude a hard day's work with a grateful heart because, although one vote has

been lost, I think now that the atmosphere has been cleared and the parliamentary wrangle resolved, on Monday the amendment may receive favorable consideration.

Mr. McCARTHY. We can learn from the experience we had in the parliamentary conflict and wrangle, because, as it turned out, it was a good device to get a crowd here. Because we got the crowd here and had more Senators to listen to the Senator from Tennessee give his very thorough exposition of the amendment, we are now in a much better position, and will be on Monday or Tuesday, than before the parliamentary conflict.

Mr. ANDERSON. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. ANDERSON. I hope the Senator will not feel that any ground has been lost by the situation that arose this afternoon. I wish to repeat what I said inside the committee, outside the committee, and on the floor. The Senator from Tennessee has performed a valuable service in bringing this question to the attention of the Senate. There may be considerations which may make it desirable to postpone action until after the court case has been decided. I am not sure. That will be a decision for the Senate to make. So far as the able Senator from Tennessee is concerned, his record today has been a good one.

Mr. GORE. I thank the Senator very much.

During the delivery of Mr. GORE's speech:

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. CURTIS. Mr. President, I ask unanimous consent that the Senator may yield to me without losing his right to the floor and that I may in turn yield to the distinguished Senator from Kansas [Mr. CARLSON], and that my remarks and the remarks of the Senator from Kansas may follow the remarks of the distinguished Senator from Tennessee.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CURTIS. Mr. President, we have before us a bill to extend certain excise and corporate taxes which will expire on June 30. The bill, as it passed the House, involves revenue amounting to almost $4 billion. Failure to pass this bill will not only wipe out any hope of a surplus but will actually put the Government in the red. This means more burdens on our children and our children's children.

When this bill was before the Finance Committee action was taken to end the excise tax on local telephone service, telegrams, and on the transportation of passengers. These amendments to the House bill would cause a loss of revenue of $752 million as compared to what the House bill would bring in. President Eisenhower and Secretary of the Treasury Robert Anderson wholeheartedly support the bill as it passed the House.

Mr. President, it would be very pleasant for me to stand in my place and state that I favored the removal of the tax on the telephone bills paid by Nebraskans and to tell Nebraskans that I was also voting to end the tax on telegrams, bus tickets, airplane tickets, and railroad tickets. This I would do if our financial house was in order and if the Congress would assert its constitutional power and responsibility to control wasteful and extravagant spending.

But, let us look to what the Senate of the United States has done this week in the way of voting for the spending of money over and beyond the President's budget. This week and this week alone the Senate has voted for spending far in excess of a billion dollars exclusive of any raises in our defense program. That is a billion dollars beyond the budget. The Federal pay raise bill which was not budgeted will cost $600 million annually. The appropriations for the Department of Health, Education and Welfare exceeded the budget request by $464 million. The cost of the housing bill to the Treasury is a bit difficult to determine because it involves a secondary obligation resulting from guarantees and insurance, but this bill which the Senate passed may have exceeded the budget in excess of $190 million. I voted against all of these measures.

Mr. President, the spenders of public money prevent tax reduction at this time. I wish it were otherwise. I would like to see the tax taken off telephones and telegrams and transportation. I would like to see tax relief given to individuals and a raising of the personal exemption. I would like to see tax relief for business and tax relief for the investors who provide the risk capital. None of these things can come about until we control spending.

Mr. President, there is no other course before me but to extend these taxes. I do not favor increasing the national debt.

USE OF PESTICIDES FOR DESTRUCTION OF WEEDS IN GROWING WHEAT

Mr. CURTIS. Mr. President, I desire to raise my voice in protest of the action which has been taken by the Department of Agriculture and the Department of Health, Education, and Welfare.

Mr. President, a few months ago we witnessed the fiasco of the cranberry situation, and also the one involving caponets. In both instances the Government frightened the people, interfered with the market, and accomplished nothing. The caponets in question, I understand, were purchased by the Government and used for the school lunch program.

I have before me a photostatic copy of an article published in the Lincoln, Nebr., Star of June 16, 1960. The headline reads: "Sale of Wheat Imperiled by Preharvest 2–4D Spray."

The article reads:

Wheat farmers were warned against using 2–4D spray Thursday by grain and health officials who have advised that spraying between now and harvest in the wheatfields can leave a residue on the wheat that will make it illegal for sale.

Sam D. Fine, director of the Kansas City district, Pure Food and Drug Administration, reaffirmed the warning by issuing this statement: "There is no tolerance allowance for 2–4D on wheat and any amount of residue would make it illegal for sale and subject to seizure.

Mr. President, would the purpose of that statement be to lift the price of the farmers' product? I continue to quote:

Fine reports many calls for information on the chemical effects on wheat. He advises that additional inspectors from his department will be making elevators and on-the-farm visits during harvest to check for 2–4D residue on wheat.

A report that some wheat had been seized in Kansas was not confirmed by Fine, who said, "We have no reports of seizures in Kansas yet."

Mr. President, the Departments are operating under a law passed in 1954. Even if they were right from the standpoint of the chemical content, why did they not take this action in January? Why do they do a thing like this on the eve of harvest?

Mr. President, this is serious. I have before me a letter from the Grain and Feed Dealers Association, from which I shall read excerpts:

Much of the wheat in Kansas and eastern Nebraska this year is thin, and weeds will develop in those fields. The farmer has but two choices, either spray with 2–4D to kill the weeds ahead of harvesting, or let his crop be harvested in poor condition. Many of the fields in central Kansas have already been sprayed; many farmers in eastern Nebraska have made plans to spray in the next 2 weeks.

Mr. President, I ask unanimous consent to have the entire letter printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

GRAIN AND FEED
DEALERS ASSOCIATION,
Lincoln, Nebr., June 16, 1960.

Hon. CARL T. CURTIS,
U.S. Senate,
Senate Office Building,
Washington, D.C.

DEAR SENATOR CURTIS: It seems that if it is not one problem facing agriculture this year, it is another. Now we have been alerted that there is a possibility that wheat which has been sprayed with 2–4D to control weeds will be seized by Food and Drug Administration if they can find any traces of the chemical on the harvested grain, either in commercial channels or in bins on the farm.

Much of the wheat in Kansas and eastern Nebraska this year, is thin and weeds will develop in those fields. The farmer has but two choices, either spray with 2–4D to kill the weeds ahead of harvesting, or let his crop be harvested in poor condition. Many of the fields in Central Kansas have already been sprayed, many farmers in eastern Nebraska have made plans to spray in the next 2 weeks.

Information from the director of the Kansas City office of Food and Drug, Mr. Sam Fine, reported yesterday that they are looking for 2–4D in wheat, that they have hired extra help and when they find it, the wheat will be seized. He also told the Lincoln Star that it could be much more serious and widespread than the cranberry mess of last fall.

This all stems from the fact that there has not been a tolerance set for 2–4D established by Food and Drug for wheat, even though there are tolerances for 2–4D on many other food products. These tolerances are reported in the Federal Register, dated February 1, 1960, which established a tolerance of 5 parts per million of 2–4D on apples, pears, quinces, and citrus fruits. The same tolerance of 5 parts per million on asparagus and also in the March 5, 1960, Federal Register, the use of 2–4D is approved for the use of intensifying color on potatoes.

The use of 2–4D to control weeds in wheat fields, prior to harvest, has been a common practice with farmers for many years, it has never been questioned before though manufacturers of the chemical advise using it at least 50 days prior to harvest. And now, even though tolerances have been established on other food crops and the chemical is not toxic to man or animal, Food and Drug have announced—just as they did in the cranberry case, just before harvest, that if evidence of 2–4D can be found in the harvested grain that it will be seized. This practice will cost the farmers and the grain trade—if they are caught—millions of dollars and will, if widespread, break many farmers and grain dealers.

If it is not possible to stop the action of Food and Drug Administration we will, of course, use every method possible to alert farmers of the hazard. We have already contacted the press, the University of Nebraska, the Aerial Sprayers Association, the Nebraska Wheat Commission, the Nebraska Wheat Growers Association, and all others that have contact with farmers.

We are quite sure you can readily realize the seriousness of this situation and we will appreciate anything you can do on the Washington level to find a suitable solution to the problem.

Sincerely,

HOWARD W. ELM,
Executive Secretary.

Mr. CURTIS. Mr. President, the action which has been taken will not only interfere with the farmer destroying the weeds; it will frighten customers and consumers and will drive prices down. That is wrong.

I shall read from a telegram I received from J. D. Furrer, extension agronomist, of the University of Nebraska College of Agriculture:

There are thousands of acres of winter wheat in Nebraska where weed problems exist. 2–4D is the only economical way to control the weeds and permit harvesting. Unless 2–4D is used, many farmers will suffer large financial losses because weeds will lower quality due to weed contamination and resulting higher moisture at harvest.

Listen to this statement, Mr. President, which I read from the telegram:

In the past 13 or 14 years, thousands of acres of wheat have been sprayed with 2–4D with no reported deleterious effects on value of the grain for milling or other food uses. In many cases, spraying with 2–4D has improved grain quality by eliminating green weed materials.

Mr. President, that is not a communication from a party in interest; it is not a communication from someone who is selling 2–4D. It is not a communication from a worried farmer. It is a communication from as good an authority as there is in any bureau in Washington.

Mr. President, I ask unanimous consent to have the entire telegram from the extension agronomist, Mr. J. D. Furrer, printed at this point in the RECORD.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

LINCOLN, NEBR., *June 18, 1960.*

Re wheat spraying with 2,4–D in Nebraska.

Hon. CARL T. CURTIS,
U.S. Senate, Washington, D.C.:

(1) There are thousands of acres of winter wheat in Nebraska where weed problems exist. 2,4–D is the only economical way to control the weeds and permit harvesting. Unless 2,4–D is used, many farmers will suffer large financial losses because weeds will lower quality due to weed contamination and resulting higher moisture at harvest.

(2) In the past 13 or 14 years thousands of acres of wheat have been sprayed with 2,4–D with no reported deleterious effects on value of the grain for milling or other food uses. In many cases spraying with 2,4–D has improved grain quality by eliminating green weed materials.

(a) This 50-day period was arbitrarily selected and not based on critical research evidence.

(b) Seldom is 2,4–D used at the full pound rate for weed control in wheat.

(c) No evidence has been submitted to show whether there will or will not be residues of 2,4–D on grain at harvest regardless of time of application.

(d) Tolerances for insecticides such as DDT at 7 parts per million have been established on many fruits and vegetables which are eaten fresh or cooked.

(e) Tolerances of 5 parts per million for 2,4–D have been established on apples, pears, citrus fruits, quinces, and asparagus. No tolerances have been established for wheat or other farm crops.

(3) 2,4–D is a hormone-type herbicide which is closely related to natural hormones in plants. It has a very low oral toxicity rating for warmblooded animals. A thousand-pound animal could consume at one feeding all the 2,4–D applied to an entire acre of wheat without suffering ill effects.

(4) Sunlight, moisture, and microorganisms cause relatively rapid chemical breakdown of 2,4–D at summer temperatures.

(5) There have been no withdrawals of any registered use of 2,4–D by Federal agencies.

(6) In April 1957 ARS published a summary of certain pesticide chemical uses as an aid to registrants in preparing acceptable labels. This indicates that no residues would be expected from a 1-pound per acre application of 2,4–D if it were applied 50 days preharvest. Commenting on this:

(f) The use of 2,4–D on potatoes to intensify red color was extended 1 year effective March 6, 1960, to enable the establishment of 2,4–D tolerances or exemption from the requirements of tolerances.

(7) Winter wheat and other farm crops should be exempt from 2,4–D tolerances or the time required to establish tolerances should be extended for 1 year.

(8) Please wire any progress made with FDA or HEW.

Very truly yours,

J. D. FURRER,
Extension Agronomist.

Mr. CARLSON. Mr. President, will the Senator from Nebraska yield?

Mr. CURTIS. Mr. President, I thank the Senator from Tennessee. I now yield, under the unanimous-consent agreement, to the distinguished Senator from Kansas [Mr. CARLSON], with whom I have joined in sending a telegram to the two Cabinet officers.

Mr. CARLSON. Mr. President, I compliment the distinguished junior Senator from Nebraska for his alert and active interest in this situation which has rapidly developed in the Midwest wheat-producing area. It is mild to say that it is causing serious concern in that great area.

The report has gone out that the spraying of wheat preceding the harvest, for the destruction of weeds, will contaminate the wheat so that it cannot be used for human consumption. There is no basis for it. My information is that no tests have been run and it is purely a matter of speculation.

The confusion and concern arises from a press statement emanating from the regional office of the Food and Drug Administration.

I am pleased that the distinguished junior Senator from Nebraska has called this matter to the attention of the Senate. He and I discussed it this morning and agreed that some action must be taken. On the basis of the information we have received, we prepared telegrams, one of which was sent to the Honorable Arthur S. Flemming, Secretary of Health, Education, and Welfare, which reads:

DEAR MR. SECRETARY: Great concern has developed in the wheat-producing areas of the Middle West as a result of statements and press releases regarding the use of pesticides for the destruction of weeds in growing wheat. Steps must be taken in order to clarify this situation immediately. Otherwise we will have another situation similar to that which happened in the cranberry industry.

Mr. President, there may have been a few million dollars worth of cranberries destroyed; probably large numbers of bushels of cranberries destroyed. But if a similar situation develops in the wheat-producing area, where hundreds of millions of bushels of wheat are produced, it might be said, parenthetically, that the cranberry situation would be "peanuts" compared to the situation which might develop in wheat growing. Therefore, I say it is important that action be taken immediately to remedy the situation. I continue to read from the telegram:

We are also contacting the Department of Agriculture, as there seems to be a lack of coordination between the Department and the Department of Agriculture on the problem. In view of the urgency, we would appreciate a meeting with you and representatives of the Department of Agriculture in your office Monday morning, June 20. We are confident that by getting together with you and the Department officials involved, we can arrive at a meeting of minds that will give needed assurance to our people.

That is the text of a telegram which the junior Senator from Nebraska and the junior Senator from Kansas sent to the Secretary of Health, Education, and Welfare this morning.

We also sent a copy of the telegram to the Secretary of Agriculture, the Honorable Ezra Taft Benson, and were assured of his cooperation.

I am pleased to inform the Senate that the meeting has been set for 4:30 on Monday afternoon, in the Office of the Secretary of Health, Education, and

Welfare. We have been assured that Department people will be present; and I have every reason to believe that in regard to this situation we can work out a satisfactory statement which will give relief to the people who are so greatly concerned about it.

If other Senators are interested in this problem, they are invited to attend the meeting on Monday of next week, at 4:30 p.m.

Mr. President, again I say I do not know of anything in recent times that has caused more concern among the wheatgrowers, the elevator operators, and the consumers generally, than has this situation.

I thank the Senator from Tennessee for yielding to me.

PUBLIC DEBT AND TAX RATE EXTENSION ACT OF 1960

The Senate resumed the consideration of the bill (H.R. 12381) to increase for a 1-year period the public debt limit set forth in section 21 of the Second Liberty Bond Act and to extend for 1 year the existing corporate normal-tax rate and certain excise-tax rates.

Mr. PROXMIRE obtained the floor.

Mr. McCARTHY. Mr. President, will the Senator yield to me?

Mr. PROXMIRE. I yield to the Senator from Minnesota.

Mr. McCARTHY. I should like to propound a parliamentary inquiry.

The PRESIDING OFFICER (Mr. DOUGLAS in the chair). The Senator will state it.

Mr. McCARTHY. I intend to offer an amendment which would repeal the dividend credit provision of the present law. My parliamentary inquiry has to do with the time at which the votes must be taken on the committee amendments, which I understand are now pending.

The PRESIDING OFFICER. The Parliamentarian advises the Chair that there is no definite time at which the committee amendments must be passed upon, but that they must be passed upon before amendments are offered from the floor, except by unanimous consent.

Mr. McCARTHY. If I may change my question slightly, if I were to offer amendments in order to have them voted upon before the vote on the committee amendments, they would have to be offered as amendments to the committee amendments. Is that correct?

The PRESIDING OFFICER. The Chair is advised by the Parliamentarian that a bona fide amendment to a committee amendment would have to be acted upon before the committee amendments themselves were acted on.

Mr. McCARTHY. Mr. President, a further parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Minnesota will state it.

Mr. McCARTHY. If the motion to reconsider the action on the committee amendments were postponed until after the votes on other amendments were taken, would it be in order to reconsider the action taken on the committee amendments, even though there had been votes on amendments to other sections of the code?

The PRESIDING OFFICER. That can be done within the 2-day limit.

Mr. McCARTHY. I thank the Chair for that information.

I shall offer an amendment to repeal the dividend credit. If my amendment is agreed to, it will have the effect of providing approximately $335 million to $350 million in revenue. I think the amendment should be considered most seriously, in view of the committee action which would have the effect of losing approximately $750 million in revenue which the Government would have collected if the bill, at least as it is now before the Senate, had not been modified by the Committee on Finance.

I point out also that the Committee on Finance has acted on H.R. 10, which has passed the House, and which if passed by the Senate and agreed to in conference, depending upon what the conferees may agree to, would result in the additional loss of approximately $300 million of revenue.

The House committee, at least, has acted upon measures dealing with the taxation of corporations doing business overseas which, if passed, would result in the loss of approximately $100 million in revenue.

We should take into account that within this week we have increased appropriations above the budget estimates, including defense, by approximately $1,200 million, and the salaries of postal and other Government employees by approximately $750 million.

Considered together, the increase in appropriations and the proposed reductions in revenue will result in a loss of approximately $3 billion.

In view of this action, it seems to me rather obvious that if we have any sense of fiscal responsibility, we ought to move to close loopholes, and we ought to move to restore revenue which is lost by special considerations which have now been written into the tax code.

ORDER FOR SUBCOMMITTEE ON EDUCATION OF THE COMMITTEE ON LABOR AND PUBLIC WELFARE TO MEET ON MONDAY

Mr. SMATHERS. Mr. President, I ask unanimous consent that the Subcommittee on Education of the Committee on Labor and Public Welfare be authorized to meet on Monday in order to hear the president of the University of Illinois and other university presidents.

The PRESIDING OFFICER. Without objection, it is so ordered.

PUBLIC DEBT AND TAX RATE EXTENSION ACT OF 1960

The Senate resumed the consideration of the bill (H.R. 12381) to increase for a 1-year period the public debt limit set forth in section 21 of the Second Liberty Bond Act and to extend for 1 year the existing corporate normal-tax rate and certain excise-tax rates.

Mr. PROXMIRE. Mr. President, I understand that tonight, after I complete my remarks, the senior Senator from Illinois [Mr. DOUGLAS] and then the senior Senator from Pennsylvania [Mr. CLARK] will speak. Mr. President, I call the attention of the Senate to the significance of the timing of our speeches. The fact that we are speaking now indicates, I think, that if there has been any feeling on the part of Senators that we who are very anxious to plug loopholes in the present revenue act wanted to delay action on the bill, this is not the way to do it. We all know we could stop now, not take any more votes tonight, go home, and make our speeches at length on Monday. But we shall make our speeches tonight, at considerable sacrifice on the part of the employees of the Senate, the distinguished acting majority leader, the distinguished acting minority leader, and ourselves. We do not wish to delay the Senate. We desire to proceed as rapidly as we possibly can. We are very desirous to get this case into the RECORD, where it can be read and studied.

I think the arguments for plugging loopholes are overwhelming. I think the case must be made, and made as thoroughly and emphatically as possible.

The amendment which I intend to propose requires a withholding tax on dividends and interest. This would result in permitting the Government to collect vast sums of money which should legally be paid but now escape it. These are sums which are now not the property of any private citizens, but the property of the United States of America. These are funds which are owed the Treasury. These are funds which should be collected. There will be no increased tax rate on anyone. No new tax will be imposed. There will be no argument by groups who say they should not have to pay the tax.

Sometimes there is a controversy as to how much a tax proposal will raise. I think I can show, on the basis of the most expert and painstaking documentation, that this proposal will raise at least $1 billion. I think the authority for this estimate of potential revenue is by far the most competent and the most objective of any that can be shown for any tax measure which is likely to be proposed at this session.

This is not a new proposal. It has been offered before. As a matter of fact, it was a part of the original Withholding Tax Act which was passed during World War II. This proposal passed the House at that time. It came to the Senate, and the Committee on Finance killed it. It passed the House again in a different form in 1950. It came to the Senate and was killed by the Senate.

It passed the House again in 1951, it came to the Senate, and was killed.

Last year it was introduced by me, and the Senate decided against it.

Every single objection to this proposal—without exception—has now been met on the basis of what I believe is one of the most competent jobs of tax bill drafting that I have seen.

I may say, incidentally, that three able men are primarily responsible for the amendment. They are Professor Holland, Professor Kahn, and an outstanding economist with the Committee for Economic Development, Mr. Joseph Pechman. I think all those who have

any experience in tax matters know that Kahn, Pechman, and Holland are three of the most able, fairest, and most objective men in the whole tax field.

Two principal objections were made to the proposal last year. One was that there is in any bill like this a burden on those who have to withhold the tax or the collector who will have to make the collections. This objection was eliminated in 1951; somehow or other, the elimination of this objection had not been recognized. But it has been eliminated. The fact is that all that those who withhold the tax have to do is, when they declare a dividend of a dollar a share, for example, withhold 20 percent. They withhold 20 cents. They make no report to the Treasury on each individual withholding. If they pay dividends of $1 million each quarter, at the end of each quarter they simply send to the Treasury a check for $200,000, at the cost of a 4-cent stamp. That is the entire cost. They would do this four times a year. Thus the proposal has been called by Mr. Pechman, who is principally responsible for this reform, the 16-cent proposal. It would cost a corporation, no matter how big it is or how small it is, only 16 cents a year.

One of the objections raised by a distinguished Republican member of the Committee on Finance, a man for whom I have the greatest admiration, and a man who is one of the most competent, certainly, in the country on this issue, is the question of what will be done with the payment by individual persons to other individual persons in cases in which it is required that the individual make a withholding.

This objection has been met in the simplest possible way in the amendment simply by exempting that kind of interest payment.

The argument has been made that this kind of proposal discriminates among taxpayers. We have had many years of experience in the withholding of wages. We all know that most wages have to be withheld. But there are exceptions. Throughout the years exceptions have been made. There have been periods when domestic servants have been excepted. Obviously, the occasional employment of babysitters, and so forth, is excepted. The history of the withholding tax law is replete with exceptions under such circumstances. No one has ever challenged the legality of this kind of exception. It seems to me that that fully and completely meets the other argument, and I think it was a very proper objection to the proposal in its initial form.

All kinds of justification are made about every proposal, but I think the basic argument, as in the case of most of these proposals, is the moral argument. I think we cannot make a stronger moral argument for any kind of tax bill than that those who legally owe money to the Federal Government should pay it. It is immoral if they do not pay it.

Also, of course, if they do not pay it, as the distinguished Senator from New York said earlier, in connection with another subject, someone else has to pay it. That means that we all lose. As I pointed out, more than $1 billion is lost because people do not pay taxes on the interest or the dividends they receive. The tax level has to be a billion dollars higher on every honest taxpayer because of this evasion. That means that the honest taxpayers must pay that much more because the dishonest or the careless or the neglectful taxpayers do not pay their taxes.

Mr. President, I hope that when I submit the amendment to be voted on, each Senator will have before him a copy of a mimeographed statement which has been prepared. It sets forth the arguments in favor of this amendment, and simplifies and clarifies the situation.

As I have said, I think the amendment would have been adopted long, long ago if it had been understood.

Authoritative estimates are that in 1957—and, Mr. President, I have adjusted my figures so as to reflect the situation in 1960—I think I can do that with a fair degree of accuracy, based on the relationship between dividend payments in 1957 and those in 1960, as reflected in Economic Indicators; and in that way we can get a reasonably correct estimate—that in 1957, the latest year for which tax return data are available, $1.8 billion of dividends and $6.9 billion of interest failed to show up on the returns of individuals subject to tax. That is an enormous amount of money to evade taxation. But I believe I can document it on the basis, as I have said, of the most careful tax study I have seen in regard to a matter of this kind.

The $8.7 billion estimate of the dividend and interest gap does not take into account amounts which are received by individuals with total incomes less than the filing requirement. Roughly $450 million of dividends and $2.5 billion of interest, it is estimated, will be received by such individuals in 1960.

I may say that is the most conservative sort of estimate. It is based on the most careful and thorough examination of a great deal of statistical data which I intend to put into the RECORD shortly, which I think document thoroughly this matter.

So this is not a matter of pulling figures out of a hat or making a wild guess. This is a matter of a careful study, over many months, by the most able economists.

When we subtract the approximately $3 billion paid to persons whose incomes are lower than the smallest incomes for which the filing of an income tax return is required, we arrive at the figure of $5,700 million of dividends and interest which should have been reported but which was not reported on taxable returns.

As I have said, these are conservative estimates of the amounts of dividends and interest which now escape the individual income tax due on them. Conservatively estimated, therefore, adoption of this withholding plan would increase Federal revenues by $1 billion.

I may say that Dr. Pechman, a very competent economist for a conservative business organization—the Committee for Economic Development—estimated the loss in 1957 at $900 million; and between 1957 and 1960 there has been an increase of more than 8 percent in dividends and an increase of more than 26 percent in interest. So it is obvious that if we apply the same figures, Dr. Pechman's estimate must be increased to well over $1 billion.

Dr. Holland, of the Massachusetts Institute of Technology, estimated, for 1957, a conservatively estimated loss of revenue in this way of $1 billion. I estimate that if we project that loss to date—in 1960—the loss figure for 1960 would be $1,400 million.

Mr. President, the withholding plan offered by means of this amendment would be simply to comply with, both for the withholding agent and for the recipient of interest or dividends. The dividend or the interest payor would merely deduct 20 percent from each dividend or interest payment. A simple return reporting the total amount of dividends or interest paid and 20 percent of the total, together with the amount of tax withheld, would be the only net additional burden to the payor. The dividend or interest recipient would report the actual amount of interest or dividends he received plus one-fourth of that amount, which would represent the total dividend or interest payment before withholding, compute his tax on this total amount in the usual way, and then credit against his tax the amount of tax withheld.

Efforts to enact a withholding provision in the past have encountered three major objections:

First. Compliance burdens would be too great.

Second. Tax would be withheld on payments to individuals—widows and orphans—who incur no tax liability with respect to the dividend or interest payments.

Third. Certain types of interest payments—notably those on coupon bonds—would be too difficult to withhold on.

All three of these objections are overcome in the amendment. The proposed withholding plan involves no paper work and therefore imposes no significant burdens on withholding agents. The amount to be remitted to the Government is a flat percentage—20 percent—of total dividends or interest paid by the paying agent. As for the taxpayer, the actual computations that he would have to make in order to show the total amount of dividend or interest paid, the amount of tax withheld, and the remaining tax liability would involve a couple of extra lines on his tax return and the simplest possible arithmetic. For example, the additional lines on the tax return might be illustrated in the case of an individual receiving, say, $200 of interest, as follows:

(1) Enter here the total amount of interest you actually receive	$200
(2) Divide the amount in line 1 by four (4) and enter the result here (this is the amount of tax that was withheld on your interest)	50
(3) Total interest you received (add lines 1 and 2)	250

To give the taxpayer credit for the tax withheld there would be a line on page 1

of the tax return instructing him to enter the amount shown in line 2 above.

Any withholding system which makes no provision for a personal exemption will undoubtedly involve over-withholding. Over-withholding in the case of wage and salary recipients is common. More than 30 million refund checks are mailed each year, most of which are on account of over-withholding of tax. Yet no one weeps for the wage or salary earner upon whom excess taxes have been withheld.

Here I may say that one of the strongest arguments in favor of this proposal is that we already do this in the case of earned income. Therefore, why should we not treat in the same way the recipients of unearned income—in other words, the recipients of all income? Why should we give a particular advantage, which we can prove results in escape from taxation, to persons who receive unearned income, whereas no such advantageous position or no such privileged position is given to those who work in shops or in stores or in factories and earn their income by the sweat of their brows?

Existing law gives an advantage to the recipients of unearned income—income from interest and income from dividends. I think it would be wrong to give such an advantage to any taxpayers—either those who receive unearned income or those whose income is earned.

In the 1930's it was a legal fact—as is well known—that unearned income enjoyed a special advantage in tax law over earned income, but the present system gives this definite advantage to the recipients of unearned income, as compared to the recipients of earned income; and such an arrangement does not make sense.

In order to minimize the hardship for overwithholding in the case of dividend and interest payments, however, the attached amendment would provide for a quick refund where the dividend or interest recipient has gross income less than the statutory filing requirements, that is, $600 in the case of an individual under 65 years of age, $1,200 in the case of an individual 65 years of age or over. Refunds would be made quarterly.

Therefore, we persist in allowing special consideration to be given to the recipients of dividends or interest. We do that because perhaps some kind of case can be made for it. But dividend and interest recipients would not have to wait for an entire year, as in the case of one whose wages are withheld. Instead, they could make application within each quarter, and perhaps within a matter of weeks; but in any event they would never have to wait for more than 3 months to receive the refund.

Provision is also made in the amendment for quick refund in the case of tax-exempt organizations. The administrative cost of this quick refund system would be very low.

Mr. President, I think those who worked out this plan were very ingenious. I hasten to state that I am not the one who worked it out.

It is argued that the large tax-exempt organizations—the educational institutions, the churches, and similar organizations—receive a great deal of their income from dividends. Of course, that is well known. So it is said that if 20 percent of that income were withheld, a real hardship would be worked on these organizations.

Therefore, Mr. President, in order to compensate for that, we have proposed that they be allowed to keep for themselves a compensating amount of the taxes which they withhold from the salaries of their employees.

In other words, if a foundation or an educational institution, now before this bill becomes law, enjoys a million dollars in dividend and interest income, and it is paid, under this proposal therefore $800,000. It would not have to wait even a day for a refund. For instance, if it has a $10 million payroll, it will withhold, on that $10 million payroll, some $1,500,000. It will be able to send to the Federal Government $1,300,000. It would be able to compensate itself in this way for the full $200,000 temporary loss of income, and would not, for 1 minute, be deprived of the income.

Studies have been made which establish that this provision would eliminate hardships for just about 99 percent of the institutions, and the hardships on the remaining institutions would be extremely slight and transient.

For an individual whose gross income exceeds the filing requirement, but who nevertheless has no tax liability with respect to dividends or interest he receives, overwithholding would be no more or less severe than in the case of the wage or salary earner. Moreover, the extent of the problem has been grossly overstated. In 1957, for example, a total of 4,168,499 returns reported receipt of dividend income. Of this number, only 587,739 were nontaxable returns. Interest income was reported on 7,286,314 returns. Of these, 1,164,564 were nontaxable. On the assumption that these nontaxable returns would represent the major hardship cases, it is clear that the total number of individuals who would have tax refunds due them for periods up to as much as a year would still be very, very low. Moreover, by virtue of the fact that they are nontaxable, the amount of overwithheld tax would also be very low.

It has been objected, in the past, that certain types of interest payments do not lend themselves to withholding of tax. The principal illustration offered is the case of coupon bonds. In this case, the owner of the bond detaches the coupon and can present it for payment virtually any place, since the coupon itself is a negotiable instrument.

I recall so well being challenged on this point by the distinguished Senator from Delaware [Mr. WILLIAMS], who is one of the most brilliant men in the Senate, and who is extremely competent on tax matters. He raised this point last year. Frankly, I was not able to answer him very well. I suppose that is one of the reasons why we did not do so well. But I think the answer is here.

The attached withholding amendment presents no difficulty in such cases. Suppose the owner of the coupon bond cashes a coupon, say, at the corner grocery—which is what the Senator from Delaware [Mr. WILLIAMS] proposed—assuming that the coupon has a face value of a dollar, the grocer would remit to the bondholder 80 cents. The grocer then would present the coupon to his bank and would be reimbursed for 80 cents. The bank would remit the coupon to the issuing corporation and be reimbursed 80 cents, and the issuing corporation would remit the remaining 20 cents, that is the tax withheld, to the Government.

In this way nobody will be inconvenienced. Everybody could understand it instantly. It is not a matter of a complex transaction, but, as a matter of fact, I think the number of people who cash their coupons in grocery stores throughout this country probably could not fill half of this Chamber. We know that where the people cash their coupons on bonds is where they keep their bonds. The overwhelming majority of the people keep their coupons and bonds in vaults in banks. When they go to the banks and the vaults to clip their coupons, they go to the cashier's window and cash them. But even if people have some eccentric reason why they want to keep their coupon bonds under their mattresses, they could go to the corner grocery store and cash them. So the objection which was raised before is fully met.

Under this situation, the correct amount of tax, therefore, would be withheld regardless of the number of persons who handle the coupon from the time it was cashed to the time it was presented to the issuing corporation. Moreover, no necessity arises for disclosing the identity of the bondholder any more than under the present law.

In the case of series E U.S. savings bonds, redemption agents would be provided with redemption tables which would take into account not merely the amount of the accumulated interest on the bond but the amount of tax to be withheld as well. No greater burden, therefore, would be imposed upon the bank teller or the bank itself than exists under present law.

The amendment provides for exemption from the witholding requirement in a number of specified cases, primarily those in which the dividend or interest recipient is a nontaxable entity under the Internal Revenue Code.

As I have said before, I have relied very, very heavily in preparing this statement, on the distinguished economist of the Committee for Economic Development, Dr. Pechman. Dr. Pechman made a statement to the Committee on Ways and Means last fall. It was an exceedingly compact statement. I have talked to members of the Ways and Means Committee. They confess frankly they were very much persuaded by Dr. Pechman's presentation. They say this proposal is a matter of timing, but they are convinced it will work, and work very well.

I cannot understand any reason in the world why this Government should deprive itself of $1 billion a year any longer. If we postpone this matter for some obscure reason of timing, it means we are going to forego $1 billion a year.

The Senator from Minnesota [Mr. MCCARTHY] made a good case, a few min-

utes ago, for raising every possible nickel we can. The President has been hammering away at the Democratic Party and insisting on balancing the budget, and I think we should do everything we can to balance the budget. I think his plea is correct. Heaven knows, we should, wherever we can, collect money wherever it is owed to the Government. That money should be collected from the standpoint either of morality or legality.

It does not make sense to me to postpone this proposal for another month, or year, or 2 years. I have talked to members of the Finance Committee. They say it has to be studied, that it is being worked on. It is always being studied and worked on. I remember we were told a year ago that the Ways and Means Committee and the Treasury Department and the universities were all working on this matter. The experts who have been working on it say they have it perfected, and they can convince people who will listen to them that they have it perfected and that it will work. I see no reason not to adopt this proposal.

It has been argued that we do not pass tax increases in election years. Well, that is a cynical observation, but perhaps there is some practical sense to it. However, this is not a tax increase proposal. This is a matter of tax enforcement. This is a matter of collecting revenue that is due the Federal Government.

In the course of the presentation by Mr. Pechman to the Ways and Means Committee, Mr. Pechman met the proposal of Mr. Harrington, of the Internal Revenue Service, who has proposed in the meantime that information letters be sent out to dividend and interest recipients, and that they be told that the interest or dividend was an obligation on which they should pay taxes. It was also proposed they should be told how much their dividend or interest was, so it would be convenient and easy for them to compute it. There is no doubt that if that is done, we shall collect a lot more, and that more would be collected on a voluntary basis.

It seems to me, Mr. President, Mr. Pechman met this argument and completely demolished it. He showed that Mr. Harrington's proposal was unworkable. I quote from his refutation:

> Critics of withholding have argued that the Internal Revenue Service should be able to enforce the tax on interest and dividends through the use of information returns. Mr. Harrington mentioned this possibility and here, again, I must disagree with him. Aside from being very costly for both withholding agents and the Government, this suggestion simply will not do the trick.
>
> The number of information returns for these two items already runs into the millions; it would be multiplied severalfold if the coverage of the information returns were enlarged to include most recipients of interest. In many instances, interest and dividend recipients give different names—and, sometimes, different addresses—to corporations, banks, and other savings institutions. To collate the information returns by name, and then to match them with the tax returns filed by the recipients, would be a large and expensive undertaking, even with the latest electronic equipment.
>
> I must remind the committee that electronic equipment and the time on these machines are not costless.

Contrast, this Mr. President, with the present proposal, which would not cost the corporation more than 16 cents a year. The corporation would make no reports to anyone. Four times a year the corporation would have to put a 4-cent stamp on a letter and mail a check to the Federal Government.

Mr. President, I continue to quote Mr. Pechman's statement:

> If the collection part of the operation were ever completed, it would then be extremely costly to follow through individually on the hundreds of thousands of delinquent stockholders and interest recipients with small amounts of tax due. No tax-enforcement officer with limited resources at his disposal would allocate the funds necessary to complete such an operation, since the funds could be used more efficiently in other ways.
>
> The Treasury has performed a useful public service in confirming the fact that billions of dollars of interest and dividends are not reported on tax returns each year. But it is hard to understand the reasoning behind the Treasury's plea to corporate payers of interest and dividends, which appears on the last page of the instructions for next year's corporate tax return, to remind taxpayers to report their interest and dividends.
>
> One of the Treasury's suggestions is that corporations and savings institutions should send a notice to their stockholders and depositors at the end of the year informing them of the amount of interest or dividend they received. Consider what this would mean for a corporation like A.T. & T. with 1,700,000 stockholders. One mailing per year to every one of these stockholders would cost A.T. & T. $68,000 for postage alone. To this must be added the cost of the additional machine operations, as well as the cost of 1,700,000 pieces of paper and 1,700,000 envelopes.
>
> I understand that it would cost A.T. & T. tens of thousands of dollars merely to stuff a notice reminding the stockholder to report his dividends on his tax return in the envelope containing his dividend check.
>
> By contrast the annual cost of the 1951 withholding plan for A.T. & T. would be 16 cents—for four mailings to the Government of the amount it withheld—plus the time it takes to multiply the number of shares outstanding on each dividend date by the amount withheld per share.
>
> In other words, the withholding plan I suggest would be virtually costless for the withholding agent, while the information-return system would impose heavy costs on both the Treasury and the very people who have opposed withholding.
>
> Incidentally, the Treasury might well be asked whether it will follow through on its own suggestion and inform all Federal interest recipients at the end of each year exactly how much interest they received. If the Treasury expects to act on its own suggestion, I am sure the members of this committee, and the Appropriations Committee, will be very interested to know how much such an operation would cost. I have little doubt that the estimate would be an eye opener.
>
> I see no reason why such costs should be imposed by the Government either on itself or on corporations, banks, and other savings institutions.

Mr. President, the banks and corporations should be beating a path to the door of the Senate, to get support for the amendment. The amendment would save them money. I know they are honest people, and they want taxes to be paid by those who owe taxes. This is a proposal which would enable corporations to do this in the most efficient and easiest possible way.

Mr. President, I ask unanimous consent that the statement of Mr. Pechman, which is a model of precise and concise expression, appearing on pages 791 through 793 of the hearings of the Committee on Ways and Means be printed in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF JOSEPH A. PECHMAN, COMMITTEE FOR ECONOMIC DEVELOPMENT

Under present law, interest and dividends are reported by individual income taxpayers on a voluntary basis and the Internal Revenue Service depends on its regular enforcement procedures to detect underreporting. But as this morning's testimony indicated, I think rather conclusively, the present system has been grossly inefficient. Compliance with respect to both interest and dividends, particularly the former, has been poor.

The possibility of closing this gap in our administrative procedures by extending withholding to interest and dividends has been explored by the Congress on several occasions, most recently in 1950 and 1951. In each of these years, a withholding provision for dividends—and interest, in 1951—was included in the revenue bill passed by the House, but both attempts were unsuccessful in the Senate.

The 1950 plan, which was patterned after the wage withholding system, was rejected largely because corporations claimed that the cost of compliance would be burdensome for them. The 1951 plan reduced the burden of compliance for withholding agents virtually to zero.

I would like to repeat that the 1951 plan reduced the burden of compliance for withholding agents virtually to zero. It was rejected, nonetheless, partly because it involved withholding from nontaxable recipients of dividends and interest, and partly because opponents of withholding stubbornly refused to admit that it is possible to withhold without costing them much more than the price of a 4-cent stamp four times a year.

I am particularly disappointed that a man with Mr. Harrington's experience is still under the impression that a dividend and interest withholding system need be burdensome for the withholding agent, or for the recipient.

You will recall that the 1951 withholding plan was devised by the staffs of the Treasury Department and the joint committee at the request of the Ways and Means Committee. It relies on a simple bit of arithmetic. If tax is withheld at a flat rate of 20 percent on the gross payment, the amount withheld is 25 percent of the net amount after withholding. With this as a basis, it is possible to operate withholding system without requiring any additional recordkeeping on the part of the withholding agent.

For example, suppose an individual owns 10 shares of General Motors stock, which now pays a dividend of 50 cents per quarter. At a 20-percent withholding rate, General Motors would send him a dividend check of $4 each quarter and would remit to the district director of internal revenue the balance of $1. At this point the corporation's role ends—it prepares no documents for the Government or for the stockholder.

On his income tax return, the individual would first enter the $16 of dividends he actually received during the year. He would then add one-quarter of this amount, or $4, which was the amount withheld. A space on the tax return would be available for this computation. The total of $20, the amount

of dividends he received before withholding, would be included in his adjusted income. After computing his total tax liability, he would deduct the amounts withheld on wages and salaries, payments on declarations of estimated tax, and the $4 withheld at source on his dividends to obtain the overpayment—which would be refunded to him—or the balance of tax due—which he would remit to the district director of internal revenue with his return.

Critics of withholding have argued that the Internal Revenue Service should be able to enforce the tax on interest and dividends through the use of information returns. Mr. Harrington mentioned this possibility and here, again, I must disagree with him. Aside from being very costly for both withholding agents and the Government, this suggestion simply will not do the trick.

The number of information returns for these two items already runs into the millions; it would be multiplied severalfold if the coverage of the information returns were enlarged to include most recipients of interest. In many instances, interest and dividend recipients give different names—and, sometimes, different addresses—to corporations, banks, and other savings institutions. To collate the information returns by name, and then to match them with the tax returns filed by the recipients, would be a large and expensive undertaking, even with the latest electronic equipment.

I must remind the committee that electronic equipment and the time on these machines are not costless.

If the collection part of the operation were ever completed, it would then be extremely costly to follow through individually on the hundreds of thousands of delinquent stockholders and interest recipients with small amounts of tax due. No tax-enforcement officer with limited resources at his disposal would allocate the funds necessary to complete such an operation, since the funds could be used more efficiently in other ways.

The Treasury has performed a useful public service in confirming the fact that billions of dollars of interest and dividends are not reported on tax returns each year. But it is hard to understand the reasoning behind the Treasury's plea to corporate payers of interest and dividends, which appears on the last page of the instructions for next year's corporate tax return, to remind taxpayers to report their interest and dividends.

One of the Treasury's suggestions is that corporations and savings institutions should send a notice to their stockholders and depositors at the end of the year informing them of the amounts of interest or dividend they received. Consider what this would mean for a corporation like A.T. & T. with 1,700,000 stockholders. One mailing per year to every one of these stockholders would cost A.T. & T. $68,000 for postage alone. To this must be added the cost of the additional machine operations, as well as the cost of 1,700,000 pieces of paper and 1,700,000 envelopes.

I understand that it would cost A.T. & T. tens of thousands of dollars merely to stuff a notice reminding the stockholder to report his dividends on his tax return in the envelope containing his dividend check.

By contrast, the annual cost of the 1951 withholding plan for A.T. & T. would be 16 cents—for four mailings to the Government of the amount it withheld—plus the time it takes to multiply the number of shares outstanding on each dividend date by the amount withheld per share.

In other words, the withholding plan I suggest would be virtually costless for the withholding agent, while the information-return system would impose heavy costs on both the Treasury and the very people who have opposed withholding.

Incidentally, the Treasury might well be asked whether it will follow through on its own suggestion and inform all Federal interest recipients at the end of each year exactly how much interest they received. If the Treasury expects to act on its own suggestion, I am sure the members of this committee, and the Appropriations Committee, will be very interested to know how much such an operation would cost. I have little doubt that the estimate would be an eye opener.

I see no reason why such costs should be imposed by the Government either on itself or on corporations, banks, and other savings institutions, when a virtually costless alternative that will do the job efficiently and completely is available. More important, in these times of high tax rates there is no justification for a loss in Federal revenues approaching the billion-dollar mark because of the continued delay in the adoption of dividend and interest withholding. Whether the underreporting of these incomes on tax returns is due to inadvertence or to outright evasion, it is simply bad public policy to permit these income recipients to avoid paying their full share of the taxload.

I should like to add, in closing, that the views I have expressed are my own and not necessarily those of CED.

Thank you, Mr. Chairman.

The CHAIRMAN. Thank you, Mr. Pechman.

Mr. PROXMIRE. Mr. President, I have said the amount to be raised can be most thoroughly and completely documented. I have before me a statement presented to the Committee on Ways and Means, in hearings which began November 16, 1959, by Daniel M. Holland of MIT, an outstanding and distinguished economist and professor at one of the greatest institutions in the country. Mr. Holland has devoted a great deal of time to the most painstaking scrutiny of the Internal Revenue statistics and figures. He is a thoroughly competent statistician. He is very careful in all his assumptions. He has made what I think is a really definitive analysis as to how much the Federal Government is losing through tax evasion from interest and dividend recipients who fail to file tax returns.

Perhaps it will be interesting to Senators to know that upon the basis of this very careful study by Dr. Holland, confirmed by Dr. Pechman—and I understand Professor Kahn also has worked in this field—it seems very clear that about 15 percent of the taxes which should be paid on dividends are not paid. The figure fluctuates quite a bit, but it has been going up rather than down. The situation has been getting worse.

Mr. President, 58 percent of the interest income paid to people is not reported. That is more than half. More than half of the interest income escapes taxation.

Mr. President, this is not a wild assertion and is not merely a statement made for the purposes of documenting a case on a bill. This is the result of the most careful kind of computation made by a thoroughly competent statistician upon the basis of a very careful and thorough scrutiny of revenue loss. The figure with regard to tax loss on interest income is 58 percent.

This subject has been studied over a period of many years. The amount fluctuates, but fluctuates relatively little. Between 57 and 60 percent of the interest paid to individuals is not reported and no tax is paid thereon.

Think of the great inequities in our system, when we consider particularly that in the past 8 years the interest income has doubled.

The Federal Reserve Board studies show that two-thirds of all the capital in the country is owned by about 10 percent of our people. These people, upon the basis of the most careful study made, who own bonds and receive interest, fail to report some 58 percent of their interest income.

Mr. President, I ask unanimous consent that the statement by Mr. Daniel M. Holland, presented to the Committee on Ways and Means, entitled "Unreporting of Dividends and Interest on Tax Returns," which appears at pages 1397 through 1438 of "Tax Revision Compendium," submitted to the Committee on Ways and Means in connection with the panel discussions on the same subject to be conducted by the Committee on Ways and Means, beginning November 16, 1959, volume 2, be printed in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

UNREPORTING OF DIVIDENDS AND INTEREST ON TAX RETURNS

(By Daniel M. Holland, School of Industrial Management, Massachusetts Institute of Technology)

(NOTE.—This paper draws on some materials initially developed by the author in connection with a research project undertaken at the National Bureau of Economic Research. It is, however, a purely personal statement, and has not undergone the National Bureau's usual review procedure.

(Revision and extension of the dividend gap estimates and measurement of the interest gap was supported by the Sloan research fund of the school of industrial management at MIT. I wish to thank Massimo Brighi who, in addition to performing the computations, helped to improve the methods used in the estimates and assisted in writing up the description of procedures in the appendix.)

I. INTRODUCTION

The difference between the aggregate amount of specific types of income generated in the productive process and the totals of such types of income traceable to tax returns has over the years, particularly since the "democratization" of the income tax, been a subject of interested speculation. The reasons for this interest are obvious; they have to do with the honesty of taxpayers and with the possible revenue losses of the Federal Government.

Work on this problem has, of course, gone beyond speculation; estimates of the gap have been made.[1] And additional estimates for dividends and interest will be set forth in this paper. But it is wise to note at the outset that some measure of speculation will always surround such estimates and what they actually demonstrate or prove.

My paper takes up a very specific topic and handles it in a particular way. These limitations should be stressed. The paper is designed to provide background data, not

[1] Pioneering work has been done by Selma Goldsmith—cf. her "Appraisal of Basic Data for Constructing Income Size Distribution," pt. VI, "Studies in Income and Wealth," vol. 13, National Bureau of Economic Research, 1951, and "Relation of Census Income Distribution Statistics to Other Income Data," "Studies in Income and Wealth," vol. 23, Princeton University Press for the National Bureau of Economic Research, 1958. Mrs. Goldsmith's general framework has been used in deriving the estimates of this paper.

to suggest any policy. Moreover, it is a particular concept of underreporting which we seek to provide estimates of, a concept which is several degrees removed from both dishonesty and revenue loss. Part of the job, then, is to make very clear what our measures mean or do not mean, and to provide some idea of the range of error that attaches to them. For it is only in the light of information of this kind that one can interpret the findings. That is why the procedures and methods of estimating are spelled out in more detailed fashion than might seem necessary; and that is why, also, several estimates have been undertaken where there seemed to be legitimate grounds for alternative approaches.

The general question that I will take up is the divergence between the total of dividends and interest paid out to people and the amounts of these two types of income reported on tax returns. This divergence is here called the dividend or interest gap. The gap as we measure it is made up partly of dividends that weren't reported and didn't have to be under the revenue laws, and of dividends that weren't reported but legally should have been. (The same is true of interest.) It is this latter category that we designate as underreported dividends or interest, as the case may be, and to which we pay particular attention. For, as will be argued in greater detail below, where the underreported segment of the gap cannot be precisely broken out, inferences as to its size and growth or decline over time can still be made.

For dividends and interest, each separately, three topics are covered:

1. The present size of the gap and the revenue loss associated with it.

2. Trends in the gap over the last 20 years.

3. Evidence on the income class distribution of underreporting.

We start with dividends; and, having established the pattern of presentation there, will treat interest in more summary fashion. Now to end this introduction with a brief statement of salient differences between dividends and interest receipts. Dividends have a much more concentrated distribution either by adjusted gross income class or dividends (or interest) size class. The recipients of small amounts of income from the particular source are more numerous for interest than dividends. Dividends have their origin in basically a single economic act—the provision of equity capital for corporate enterprise. The number and variety of interest earning transactions is much greater, as is, at least proportionately, the number of persons who receive small amounts of interests.[2] Another important difference for the purpose at hand lies in the accuracy of the national income accounts estimate of total personal income from each source. For in deriving the gap we take this to be a correct figure. For dividends it is considered an accurate estimate; but their interest estimate is subject to a wider range of error.

[2] In 1956, taxpayers with under $5,000 of adjusted gross income accounted for one-quarter of all dividend recipients and 7.5 percent of dividends; while one-third of all interest recipients fell in this group, and they received 18.5 percent of total interest. If we take taxpayers with under $10,000 of adjusted gross income, we account for about two-thirds of dividend recipients and 20 percent of dividends, but three-quarters of interest recipients and 50 percent of interest receipts can be traced to the under $10,000 group. ("Statistics of Income for 1956," p. 4.) Or look at dividend and interest receipts directly. The 1952 data show that one-third of dividend recipients had dividends of under $100; 46 percent of all interest receivers reported interest of under $100. ("Statistics of Income for 1952," p. 26.) But this is unnecessary detail. We all know that it is more common to own a savings account than to own shares of stock. Thus the latest New York Stock Exchange census (1959) finds 12.5 million individual stockholders in public corporations. The most recent survey of consumer finances shows over 28 million spending units with savings accounts.

II. DIVIDENDS

The dividend gap in 1957

The national income accounts developed by the National Income Division of the Office of Business Economics of the Department of Commerce set a figure of $12,495 million for the dividend component of personal income in 1957. While this is an estimate, as are all the major items in these accounts, the dividend total is considered to be quite accurate.[3] We start, therefore, by taking this estimate to be a correct figure and compare the personal income tax return data with it. No circular reasoning is involved here, for the National Income Division's estimate is based on the corporate income tax returns filed—that is, on what corporations paid out—while the personal income tax tabulations summarize what was reported in the way of dividends received.

How much of the $12.5 billion paid out by corporations to individuals in 1957 can be found on the personal income tax returns filed in that year? Or to phrase the question differently: How much of what individuals received in the way of dividends failed to show up on tax returns?[4] With the income tax a mass levy, and the distribution of dividends among income classes more concentrated than any other major source of income, the expectation would be that almost all of the dividend total as estimated by the National Income Division could be found on tax returns. With appropriate adjustments one can go beyond this a priori judgment. Table 1 summarizes these adjustments and compares adjusted national income accounts and tax return dividends totals for 1957.

TABLE 1.—*Derivation of dividends not reported on tax returns, 1957*

DIVIDEND CATEGORY

[In thousands of dollars]

	Amount
1. Dividends reported by individuals on tax returns, including dividends received from fiduciaries (estates and trusts)	9,448,421
2. Plus estimated dividends in "other income" 1040A returns	3,000
3. Plus dividends retained by fiduciaries (estates and trusts) and dividends paid by fiduciaries to charitable and nonprofit organizations	366,103
4. Minus dividends on returns from Alaska and Hawaii	29,907
5. Equals personal dividend receipts accounted for on tax returns	9,787,617

[3] Thus, Selma Goldsmith, in discussing Commerce data, holds that "The extent of error is relatively small, also, for the important items of Government transfer payments and dividends" (Selma Goldsmith, "Relation of Census Income Distribution Statistics to Other Income Data," in "Appraisal of the 1950 Census Income Data, Studies in Income and Wealth," vol. 23, Princeton University Press for the National Bureau of Economic Research, 1958, p. 74).

[4] The language here is purposely ambiguous. As will be clarified below, we do not mean by this the amount that should have been reported but wasn't. To conjecture about the magnitude of dividends in this latter category requires some steps additional to those about to be described.

TABLE 1.—*Derivation of dividends not reported on tax returns, 1957*—Continued

DIVIDEND CATEGORY—Continued

[In thousands of dollars]

	Amount
6. Personal dividend receipts as estimated by NID[1]	12,495,000
7. Minus dividend receipts of mutual insurance companies	167,000
8. Minus dividend receipts of nonprofit organizations	516,043
9. Minuus dividend receipts of noninsured pension funds	338,000
10. Minus taxes withheld on dividend payments to foreigners	44,000
11. Equals NID[1] personal dividend receipts adjusted for comparability with tax return data	11,429,957
12. Dividend "gap"=(11)−(5)	1,642,340
13. Relative dividend "gap"=(12)÷(11)——percent	14.4

[1] National Income Division, Office of Business Economics, Department of Commerce.

Start with dividends received and reported as such by individuals on tax returns. (This includes dividends received by individuals from estates and trusts.) Then, add the small amount of dividends tabulated under "other income" on form 1040A returns, add the dividends retained by estates and trusts (fiduciaries), and the dividends they paid to charitable and nonprofit institutions, and take out the dividends reported on returns from Alaska and Hawaii (since the Commerce figure is for the continental United States) to reach a figure of $9.8 billion of dividends accounted for on tax returns (line 5). In the next six lines of table 1, we adjust the national income accounts dividend total for comparability with tax returns.[5] In these accounts a number of institutions and nonpersons not subject to the personal income tax, and hence not included in the personal income tax tabulations, are put in the "personal" sector. Their dividends must be taken out for comparability with the tax return figure. Hence the deduction of the dividend receipts of mutual insurance companies, nonprofit organizations, and corporate noninsured pension funds (lines 7 through 9). Taxes withheld on dividend payments to foreigners (line 10) are also subtracted, since they would not show up on tax returns. After these subtractions we end up with a figure of $11.3 billion (line 11) for the National Income Division's estimate of personal dividend receipts adjusted for comparability with tax return data. The difference between this total and line 5 (dividends accounted for on tax returns) is called the dividend gap in this paper. We measure the gap in relative terms also by taking it as a percent of the adjusted national income accounts total.[6]

For 1957 the gap between tax returns and national income account dividend totals was estimated as $1.65 billion or 14.4 percent of total personal dividend receipts after adjustment to a personal income tax return basis. How should this "gap" be interpreted? It is not solely a measure of dishonesty or evasion in the reporting of dividends, and, even more strongly we note that it is not a base to which to apply a marginal rate to arrive at an estimated revenue loss due to the failure of taxpayers to report some of their dividends. As a first qualification we note that some of the "gap" may be due to errors in the Department of Commerce estimate of dividends. Such errors could, of course,

[5] These adjustments, in general, follow procedures developed by Selma Goldsmith. See the references in an earlier footnote.

[6] A detailed statement of our procedures and data for all years, 1936–57, appears in the appendix.

either accentuate the size of the gap or make it smaller. There is good reason, however, as we have already noted, to expect such errors of estimate to be small. Secondly, in addition to (a) those dividends that should have been reported but weren't, the "gap" as herein estimated includes (b) the dividend receipts of those persons and estates and trusts who, because their adjusted gross income was below the filing requirement of $600, did not have to report for tax purposes. Failure to report when the tax law calls for reporting—i.e., category (a)—we call underreporting.[7] How much the category (b) dividends came to it is not possible to determine with any precision. But there are several considerations that suggest the dividends in category (b) were a small total, something on the order of $425 million.

For example, close to $50 million of dividends was reported on nontaxable returns with no adjusted gross income or adjusted gross income under $600. On one basis of reckoning, this is about as much as persons with under $600 of adjusted gross income received in all.[8] But this judgment rests on assuming what is contrary to fact—a close similarity in the income definitions of the Census and the Internal Revenue Service. The difference between the two is liable to be very pronounced at the lowest income levels, and a comparison of them could very well understate the amount of dividends going to those with adjusted gross incomes rather than money income of under $600.

Disregarding this information, therefore, and turning to other shreds of evidence, we find them, too, suggesting a small amount of dividends going to those not required to file.

1. As to individuals, suppose we say, very loosely, that if we take as the cutoff point $1,500 of family money income, we are likely to include all those with adjusted gross incomes of under $600 (with the exception of minors who are the recipients of under $600 of trust income. We will get to them a little later. On gifts of stocks to wives that lead to dividends of less than $600 no special complications ensue. For we can expect such dividends to be reported on joint returns, since the tax saving due to income splitting would be far greater than the tax liability saved on under $600 of dividends). On this assumption, the data of the Bureau of Labor Statistics-Wharton School study suggest that something like $200 million of dividend receipts are accounted for by individuals (or families) with adjusted gross income under $600.[9] Roughly similar magnitudes follow from some estimates in Raymond Goldsmith's, "A Study of Savings in the United States."[10]

Now as to minor nontaxable recipients of dividends. Estimates that lean over strongly in the direction of overstating their dividends provide a figure of $225 million.[11]

In summary, this is the order of magnitude of category (b)—dividend receipts of those not required to file. For individuals other than minors about $200 million. For minors and nontaxable recipients of nontaxable fiduciaries' dividends about $200 million; all in all about $400 million. Remember, too, that in our judgment this is an overstatement because in our choice of assumptions we consistently leaned in this direction.

We conclude, then, that in 1957 about $1.2 billion of dividends (i.e., the gap of $1.6 billion minus the category (b) estimate of $400 million) that should have been reported on tax returns were not.

The revenue loss associated with underreporting of dividends

To go from this figure to the amount of dividends directly related to revenue loss, however, requires some additional adjustments. For some of this underreporting is a venial sin as far as tax revenue is concerned, since some taxpayers who are required to report their dividends but fail to do so, would not be taxed on them anyway, because their exemptions and deductions exceed their adjusted gross income, or because of the exclusion from taxable income of the first $50 of dividends (on separate returns) or $100 of dividends (on joint returns). Moreover, some dividends are unearthed by audit and called to account at a later date by the Internal Revenue Service.

There is no way of arriving at a basis for making these adjustments. Arbitrarily I put them at $200 million, and obtain then an increment to tax base of $1 billion if all underreporting of dividends were corrected. Using the estimates of table 6 below as a guide for a rough income class distribution of underreported dividends and applying the marginal rates appropriate to this distribution furnishes a gain in revenues of about $280 million. Thus, were underreporting of dividends completely abolished, the Federal revenues would be higher by at least $280 million. We say "at least" because of the general stress in our procedure on a conservatively small estimate of nonjustified underreporting. Recognizing this built-in bias, it would be more appropriate to set the revenue gain associated with full correction of underreporting as about $300 million.[12] (This can, of course, also be considered the current revenue loss on the score of dividend underreporting.) This estimate is an overstatement of the revenue loss due to dividend underreporting to the extent that the Internal Revenue Service discovers this underreporting later in its audit of tax returns. There is, of course, some recoupment on this score; how much it comes to I do not know.

Trends in the dividend gap, 1936–57

1. Explanation of measures: In addition to the current relationships between income received and income reported on tax returns—i.e., the present size of the gap—interest attaches also to the movement of the gap over time. For from such data, we can get some indication as to whether underreporting has become more or less significant. For if it has tended to dwindle over time, we might look on it as one of those problems that carry the seeds of their own correction; but if it has grown or remained at about the same level, this would suggest more positive action than heretofore taken will be necessary to correct it. Also, an examination of the trends in underreporting may give us some insight into the factors that affect it. Does underreporting go up when the tax saving from not reporting increases (that is to say, when tax rates rise), and does it fall as taxes become less severe? Is there a growth in underreporting that we can trace to a lagged response to a sharp increase in aggregate dividend payments? Our data, of course, are not precise enough to provide unequivocal answers to these questions. They will, however, permit some inferences to be drawn.

With these considerations in mind, estimates of the dividend gap were prepared for the span of years from 1936 through 1957. The results, summarized in table 2, enable us to examine variations and trends in the size and relative importance of the gap. However, before turning to a discussion of the behavior of the gap over time, some general remarks are in order.

---

[7] To go from underreported dividends so defined to tax base loss involves an additional estimate and subtraction of the dividends not reported by persons who had to report but would have been nontaxable anyway.

[8] Daniel M. Holland and C. Harry Kahn, "Comparison of Personal and Taxable Income," in "Federal Tax Policy for Economic Growth and Stability," papers submitted by panelists appearing before the Subcommittee on Tax Policy, Joint Committee on the Economic Report, 1955, p. 336, footnote 5.

[9] Blowing up the data for 1950 in "Study of Consumer Expenditures, Incomes, and Savings, volume XI, Details of Family Accounts for Income, Savings, Insurance, and Gifts and Contributions," tabulated by the Bureau of Labor Statistics, Department of Labor for the Wharton School of Finance and Commerce, University of Pennsylvania, 1957, gives an estimate of 2.6 percent of total personal dividends in the under $1,500 family income groups. It is not likely with the upward drift of incomes since 1950, that 1957's percentage going to this group would be as high. But assume that it is. In 1957, using the 1956 data as a guide, estates and trust received about $2 billion of dividends and other "personal" sector institutions about $1 billion (see our estimates in table 1). So about $9.4 billion of dividends is the appropriate figure to match the 2.6 percent against. And this gives an estimate of $236 million, of which $50 million was reported on tax returns.

[10] Goldsmith's estimates from the Federal Reserve Board-Survey Research Center's survey of consumer finances data for stockholders as of early 1950 for income classes as of 1949 show just over 2 percent of total personal stockholders by value in the income group under $2,000 (which is higher than our $1,500 cutoff). This indicates an even smaller amount of dividends going to those not required to file than the $200 million just cited. W. Goldsmith, "A Study of Savings in the United States," Princeton University Press, 1956, vol. III, p. 122.

[11] Details of the estimate follow:

(1) In 1956 some 360,000 fiduciaries who filed tax forms received dividends. Assume as many as 200,000 of them paid out dividends to nontaxable minors to an amount that averaged $300 each. This yields a total of $60 million in dividends.

(2) The New York Stock Exchange's 1959 census of shareowners, "Share Ownership in America: 1959," p. 35, estimates 200,000 civilian minor owners of stocks. Since the stock gift to minors acts are relatively new, a liberal estimate would be 150,000 such in 1957. Again using an average of $300 of dividends each (i.e., assuming their holdings averaged over $6,000), we get a dividend figure of $45 million.

(3) Eli Shapiro and Raymond Goldsmith have estimated in connection with their work on the National Bureau of Economic Research's "Postwar Capital Markets Study" the assets of fiduciaries not required to file, i.e., with gross annual income of less than $600, as $6.3 billion in 1952. They consider this figure to be an overstatement rather than an underestimate. Assuming that stock comprised the same fraction of their assets as it did for the fiduciaries that did file (53.64 percent), we get a figure of $3.4 billion of stockholdings for fiduciaries in this group. Using a yield of 4.76 percent (the yield implicit in the Shapiro-Goldsmith multiplier of 21 by which dividend flows were capitalized to arrive at stockholdings), we estimate that $162 million of dividends were received by fiduciaries not required to file. Since dividends in 1957 were about one-third higher than in 1952, we may estimate that about $210 million of dividends were received in 1957 by fiduciaries not required to file. A generous guess is that half these dividends—$100 million—went to individuals not required to file.

[12] See appendix for an explanation of how this revenue gain was estimated.

TABLE 2.—*The dividend gap, 1936–57*

Year	Absolute gap (in millions)			Relative gap		
	Variant 1	Variant 2	Variant 3	Variant 1 (percent)	Variant 2 (percent)	Variant 3 (percent)
1936	$617	$375	------	14.0	8.5	--------
1937	708	466	------	15.7	10.3	--------
1938	399	227	------	13.0	7.4	--------
1939	553	351	------	15.1	9.6	--------
1940	257	93	$104	6.6	2.4	2.7
1941	221	−5	−37	5.2	−.1	−.9
1942	554	280	442	13.5	6.8	10.8
1943	830	544	659	19.3	12.7	15.3
1944	838	565	745	18.7	12.6	16.6
1945	779	559	558	17.3	12.4	12.4
1946	1,031	701	726	18.7	12.7	13.2
1947	927	611	699	15.0	9.7	11.3
1948	843	479	651	12.3	7.0	9.5
1949	875	451	580	12.4	6.4	8.2
1950	1,161	787	909	13.3	9.0	10.4
1951	1,058	722	873	12.4	8.5	10.3
1952	1,074	818	------	12.8	9.8	--------
1953	1,396	1,067	------	16.2	12.3	--------
1954	1,487	1,450	------	16.4	16.0	--------
1955	1,983	1,939	------	19.2	18.7	--------
1956	1,989	1,942	------	17.8	17.4	--------
1957	1,691	1,642	------	14.8	14.4	--------

Although this gap is a residual made up both of dividends that should have been reported but were not, and dividends that were not reported because they did not have to be, and although it is not possible to pinpoint these two components, nevertheless the data permit inferences concerning stockholders' zealousness in reporting their dividend income. Thus, for example, if between 2 years the income above which filing was required was lowered and the gap (particularly in relative terms) rose, one can infer an increase in purposeful underreporting (assuming, as seems reasonable, that subconscious memory lapse and poor records are stable factors not subject to sharp variations over short periods). For, other things equal, the gap should have declined.

This same conclusion would follow if, with exemptions and filing requirements unchanged, incomes increased and the gap remained relatively as large or grew larger.[13] But such inferences should be drawn only after due regard to the range of error that characterizes our estimates. Any pronounced changes shown up by the data are probably real. On the other hand, the data will not support refined arguments based on relatively slight differences. In what follows, therefore, we shall be concerned only with sharp and clear differences; small variations that cannot be dissociated from the imprecision of the estimates are neglected. To be more specific, with reference to table 2, the difference between 1950 and 1951 is probably not significant; the difference between 1939 and 1940 or 1941 and 1942 very likely is.

Just a word of explanation about the seeming embarrassment of riches in table 2. That there are three different estimates of the dividend gap is due to two thing—the change in the way dividends were tabulated in "Statistics of Income" because of the tax relief provided this income share in the Internal Revenue Code of 1954, and my good fortune in having the advice of Dr. Joseph Pechman at an early stage of my work on these estimates. The change in the tax law explains the use of variant 1; Dr. Pechman's insight led to the development of variant 2. Some brief description of these variants is a necessary prelude to what is to come.[14]

The variants differ among themselves in only one respect—the way in which the dividend component of the income of estates and trusts (fiduciaries) is accounted for. In variant 1, the solid line of the chart, there is added to individuals' dividends reported as such the dividend component of their income from estates and trusts,[15] and the dividends retained by fiduciaries. The sum of the dividend components of individuals' income from estates and trusts and the dividends retained by fiduciaries is a narrower base than that used in variants 2 and 3, as indicated by the bigger dividend gaps provided by variant 1. But for comparisons over time, it is not necessarily the level of the gap, but changes in the level that is of prime importance. Moreover, variant 1 has its advantages: It is conceptually more appropriate for a comparison over time that includes the years 1954–57, and its estimates of fiduciary dividends while more narrowly based are probably more accurate than those of variants 2 and 3 from 1940 through 1951.[16] Variants 2 and 3 account for the dividends of estates and trusts on the basis of what these entities per se whether taxable or not reported on the returns they filed. Because they account for dividends at the point of the fiduciaries' receipt of them, rather than when some beneficiary of the trust reports having received them, variants 2 and 3 will have a larger magnitude for the dividends associated with fiduciary income than will variant 1. Variants 2 and 3 will and variant 1 will not include dividends paid out by fiduciaries to individuals not required to report and to tax-exempt organizations. Since they will also include dividends paid out by fiduciaries to individuals who although required to report fail to do so, variants 2 and 3 overstate the degree of reporting. Also, to the extent individuals who, although required to report for tax purposes pay out dividends to individuals who report them on their tax returns, variant 1 includes something not covered by 2 and 3. The failure of variant 1 to include dividends paid by fiduciaries to tax-exempt organizations is trivial. I estimate it for 1957 at less than $50 million; in earlier years it was less, presumably.

All this suggests no clean-cut superiority of one variant over another; there are legitimate grounds for presenting both sets of variants.

As to the difference between variants 2 and 3, this has its origin in the method of estimating the dividends of nontaxable fiduciaries in the years in which only the data for taxable fiduciaries were published—1936, 1937, and 1940–51. For variant 2, dividends of nontaxable fiduciaries were estimated by using the ratios (or interpolating between them) of fiduciary dividends to total personal dividends in the years for which both taxable and nontaxable fiduciary data were tabulated—1939, 1952, 1954, and 1956. For variant 3, it was the ratio of taxable fiduciary dividends to dividends of nontaxable fiduciaries in 1939 and 1952 that was used as the basis of estimation. In developing these estimates I had initially used variant 3, but at the suggestion of Joseph Pechman, tried the variant 2 method. While there is no way of establishing which of these two variants, 2 or 3, is more correct, the variant 2 values appear more reasonable, especially for 1942 and 1943, and I shall, therefore, refer to them and the variant 1 values in discussing changes in the dividend gap. In any event, the differences among all three annual measures concern levels of the gap and not its pattern of movement over time. When it comes to year-to-year changes, all tend to give the same picture, as can be confirmed by a glance at chart 1.

2. "Unequivocal evidence—1939 compared with 1952: But the first, and, it should be noted, the most firmly based of our findings, rest on data not incorporating either of the estimates just discussed. For in both 1939 and 1952, the years to be used in establishing this finding, the dividends of all fiduciaries (both taxable and nontaxable) were tabulated and published. So in these 2 years, the variant 2 (or 3—they are the same in these years) values to which we direct attention are less open to question than any other of our estimates.

Compare these 2 years first in terms of the scope and coverage of the personal income tax. In 1939, filing requirements were $2,500 or $1,000 of net income for married or single taxpayers respectively, or $5,000 of gross income regardless of net; less than 2 million dividend returns and less than 8 million returns in all (both individual and fiduciary) were filed; and about 40 percent of total adjusted gross income was reported on tax returns.[17] In 1952, filing requirements were $600 of adjusted gross income (whether married or single); well over 4 million dividend returns, just under 57 million returns in all were filed and about 92 percent of total adjusted gross income was reported on tax returns.[18] Now compare 1939 and 1952 in terms of the coverage of dividends on tax returns. In 1939, the dividend gap came to $351 million or 9.6 percent of total dividends adjusted for comparability with tax returns; in 1952 the gap was $873 million or 10.4 percent.

Comparison of these 2 years with regard to the tax system's scope and coverage suggests, other things unchanged, that there should have been a noticeable fall in the gap, particularly when measured relative to total dividend receipts. But other things were not equal. An almost twofold increase in the gap in absolute terms and even a slight relative increase at a time when the coverage and scope of the tax system was greatly extended can only mean that something must have changed. It is hard to resist the conclusion that the zeal with which taxpayers reported their dividend income diminished between 1939 and 1952. A ready explanation

[13] Assuming in both this and the previous statement that there were no startling changes from year to year in the way stock-ownership and dividend receipts are divided up within the family unit. This is a reasonable assumption, for it would have paid those rationally seeking to minimize taxes to make such arrangements before the start of our period.

[14] Detail on the values used in their derivation appears in the appendix.

[15] From 1954 on to get the benefit of the exclusion and credit dividends received from estates and trusts were broken out and reported and tabulated as dividends. For the years 1936–53 we had to estimate the dividend component of what was reported under the heading of income from estates and trusts.

[16] These are the years in which dividends of nontaxable estates and trusts were not tabulated and had to be estimated for variants 2 and 3. But in all years individuals reported income from estates and trusts whether the estate or trust was taxable or not, and while the dividend component of this income, as noted above, had to be estimated up through 1953 for variant 1, this estimate is probably less subject to error.

[17] Filing requirements and number of returns from "Statistics of Income for 1939," pt. 1, pp. 298, 82, and 211. Adjusted gross income percentage estimated by C. Harry Kahn of the National Bureau of Economic Research.

[18] Filing requirements and number of returns from "Statistics of Income for 1952," pt. 1, pp. 89, 18, and 70. Adjusted gross income percentage estimated by C. Harry Kahn.

lies in the change in tax rates over this period as summarized in table 3. Clearly they were very much higher in 1952 than in 1939 at every income level. At the lower incomes the proportionate increase was obviously manifold. At the higher income levels the severity of the rise may more appropriately be judged by the percentage decrease in income after tax. (See table 4.)

TABLE 3.—*Effective rates of individual income tax for a married person with 2 dependents and a single person, at selected levels of net income, 1940–59*

[1] No tax in 1939.

Persons on the margin of doubt as to whether to report dividends or not might be more directly influenced by marginal rates. But these in general tell much the same story. For example, using a married man with two dependents for illustrative purposes: At the margin, failing to report a dollar of dividend receipts at the $5,000 net income level would have saved 4 cents in 1939, but over 22 cents in 1952; at $10,000 the tax saving would have been 9 and 25 cents, respectively; at $50,000 it would have been 31 and 66 cents; while at $500,000 the tax advantage of not reporting a dollar of dividends was 62 cents in 1939 and 92 cents in 1952. Even more pronounced at most income levels are the differences between 1939 and 1952 rates for separate returns. (It should be noted also that rates were considerably lower in 1952 than they were in the middle forties, especially for those who filed joint returns.)

In my judgment, this evidence on the dividend gap for 1939 and 1952 suggests that one response to high tax rates has been a tendency for stockholders to fail to report a growing amount of their dividend income.[19]

[19] One rational response to increased tax rates would be the splitting up of stock ownership and dividend income within the family unit to minimize tax liability. This could be done by giving stock to minors or to a spouse. The tax advantage of arrangements that change stock ownership from husband to wife or vice versa was substantially removed by the introduction of income splitting in 1948. It is not likely that to get a relatively small amount of dividends down to a nontaxable level, the advantages of income splitting would be foregone. What happened between 1947 and 1948 suggests that prior to general income splitting where there was a parceling out of stock ownership within the family; the effect was to get dividends down lower in the tax schedule, but not down so low that they did not have to be reported. For while the number of taxable returns reporting dividends fell between these years by about 300,000, the increase of $676 million between 1947 and 1948 in dividends reported as such on tax returns in relation to the $737 million increase in total personal dividends is not very much different from the $621 million increase in dividends reported on tax returns in the immediately preceding period, i.e., between 1946 and 1947, in relation to the $737 million growth in total personal dividend payments over this period. Therefore, we can infer that transfer of stock ownership (and, hence, dividends) between married partners may have put some dividends into lower tax brackets, but freed a relatively small amount of dividends from the necessity of having to be reported. As regards gifts to minors, over the span of years under discussion here this had to be effected via a trust arrangement. To the extent that such trusts had enough income to be required to file, their dividend receipts are included in our estimates via dividends of fiduciaries. (Parenthetically it may be noted that very recent legislation, starting in 1954, has simplified this procedure, and currently in over 40 States transfer of stock to minors is permitted without the necessity of setting up a trust.) Another possibility, giving stocks to charities and foundations, if availed of, would show up in our estimates in the dividend receipts of nonprofit organizations.

3. Year-to-year changes in the gap suggest a loose but direct relation between levels of tax rates or changes therein and dividend underreporting: Can we go beyond this comparison based on two widely separated years and discover more generally an association between tax rates and dividend underreporting? I think that the answer is "Yes," but this conclusion rests on somewhat shakier data than that for 1939 and 1952. To see the basis for this judgment start with our initial year and observe the dividend gap over the years that follow. It makes little difference for this purpose whether we use alternative 1 or 2 values.

In 1936, only a small fraction of the population was involved in the income tax. Filing requirements were set at $2,500 of net income for maried persons and $1,000 for single taxpayers. Most income recipients fell well below these limits, as did most of the income received. Thus adjusted gross income on tax returns came to only 37 percent of total adjusted gross income. That well over 90 percent (variant 2) or well over 85 percent (variant 1) of dividends could be traced to tax returns was due to the sharply concentrated distribution of dividend receipts.

Over the next several years through 1939 the income tax remained a minority levy, skimming only the cream of income recipients, and the nonreported percentage for dividends stayed at substantially its 1936 level. But starting with 1940 and in the space of only a few years, exemptions and filing requirements were lowered sharply, income rose, and the tax became a mass levy. Thus the growth in the percent that tax return adjusted gross income comprised of total adjusted gross income—from 40 in 1939 to 81 by 1942.[20] Evidencing the increased scope of the income tax, we find the percentage of dividends not traceable to tax returns declining by three-quarters between 1939 and 1940, from 9.6 percent to 2.4 percent on a variant 2 basis; by over 50 percent according to variant 1. And we find again a drop in this percentage to just about zero by 1941 if we follow variant 2, or to 5 percent on a variant 1 basis. In absolute terms, too, of course, dividends not reported on tax returns underwent a pronounced decline, in both variants but most pronouncedly under variant 2, from 1939's $350 million to 1941's slightly negative amount. This latter is a very low figure, although not as remarkable as it may seem. In view of the general lack of precision of our estimates, it should be taken to indicate no more than that dividend receipts not traceable to tax returns came to a very small total. In a sense, 1941's results

[20] Returns filed were 7.7 million in 1939 and 36.7 million in 1942.

constitute a rockbottom figure for the gap, the coverage of dividends on tax returns being so high that one would not expect a decrease in the gap despite the further lowering of filing requirements and the upward movement of incomes, both of which led to a higher fraction of the population and its income receipts coming under the personal income tax. Nor would it be surprising, given the roughness of our estimates, if the gap should increase slightly under these conditions.

But it did not remain substantially unchanged. On the contrary, the amount and relative degree of noncoverage on tax returns increased substantially in 1942 and again in 1943. Compared with variant 2's dividend gap of close to zero in 1942, there was a gap of almost $300 million in 1942, and well over $500 million in 1943. (In terms of variant 1 a similar rise occurred, from $221 million in 1941 to over $550 million in 1942 and over $800 million in 1943.) In relative terms, variant 2 shows in sharp contrast to a gap of about zero in 1941, the nonreported percentage was almost 7 in 1942, and nearly 13 in 1943; variant 1 gives a rise from 5 to 19 percent. This does not square with the following evidence:

Between 1941 and 1942, the number of returns filed increased by 11 million; between 1942 and 1943 there was an additional 7 million increase in the number of returns. (This is as convenient a place as any to note that all the data for 1942 and 1943 are as tabulated in Statistics of Income, rather than on a basis adjusted for the institution of withholding. But this does not affect their relevance for our purpose.)

Some of this rise in dividends not reported can be explained by the special tax provisions for military personnel, but on any reasonable estimate this could account for only a small part of the increase.[21] Nor is it realistic to expect that much of this increase in the gap can be explained by a sudden sharp increase in infrafamily shuffling of stock ownership to minimize tax liability.[22] Between 1941 and 1943 the rate increases were severe and concentrated, of course, in a short span of years.[23] Apparently more taxpayers were pushed below the margin of honesty as it became more profitable not to report dividend receipts (as well as other sources of income). But this should not be viewed as a purely mechanical response. In part it may be due to the shock effect of the rapidity of the rate rise. Also the increase in the gap over this period may, in part at least, simply be one expression of the lower standard of conduct that characterized the war years.

Yet, after the war was over, dividend reporting did not revert to its prewar level. Compare the results in 1941 or 1940 with those for 1946. In 1940, for example, with the income tax covering less than three-fifths of the income received by persons, over 97 percent (93 percent under variant 1) of all dividends showed up on tax returns; while in 1946, just over 87 percent could be so traced by variant 2 (81 percent under variant 1), although 90 percent of all income was covered by the tax structure. Or go back further, say to 1936, when the income tax was still a select levy. In that year the gap constituted 8.5 percent of total dividends as measured by variant 2, or 14 percent under variant 1, although only little more than a third of the community's income was called to account for tax purposes. This contrasts with the experience 10 years later—a gap of 13 percent or close to 19 percent for variants 2 and 1, respectively.

Effective tax rates at given income levels reached a peak in 1944–45. Over the next 4 years, increases in exemptions, the lowering of rate schedules, and, most significantly for married persons, the introduction of income splitting (in 1948), all led to a decline in effective rates. This decline was substantial; for married couples, at least, at most income levels, by 1948 legislated effective rates were somewhere between their 1941 and 1942 values; for separate returns the decline was not as pronounced. (Of course, to the extent that their incomes increased, taxpayers were subject to higher effective rates than a comparison of legislated rates at a given income level would indicate.) Along with this decline in effective rates we find that the dividend gap fell somewhat in absolute amount, from almost $700 million in 1946 to just over $450 million in 1949. The decline as measured by variant 1 was considerably less—from a little over $1 billion to $875 million. With the aggregate flow of dividend payments increasing over time, this meant a sharper decline in the relative importance of the gap—the values in these 2 years being 12.7 and 6.4 percent, respectively,[24] under variant 2; 18.7 and 12.3 percent according to variant 1.

Thus it appears, especially if we focus on the relative size of the gap, that the response to tax rates has been symmetrical—just as underreporting increased as rates rose, so it declined when tax rates fell. But the fall in underreporting was not as vigorous as its rise earlier. The gap remained relatively much larger than in 1940 or 1941.

Is this finding borne out in the more recent years of our period, say from 1950 on? A glance at table 3 shows a slight rise in tax rates between 1949 and 1950, more severe increases in 1951 and 1952 and 1953, and then a fairly pronounced fall in 1954, with a continuance of rates at the 1954 level up through the present. In general, the behavior of the dividend gap over this period confirms our conclusion that there is a relation between the dividend gap and changes in tax rates. But the relation in this most recent period is loose, and there was a lagged response. Thus it was not until 1953 that the variant 1 gap (on a relative basis) had become noticeably higher than in 1949; the evidence of variant 2, however, shows a more immediate response to tax rate increases.

Embarrassing for our generalization is the behaviour of the gap between 1953 and 1955. Here reliance is placed on variant 1 because, with the change in tax treatment of dividends introduced in 1954 (the exclusion of $50 for separate returns and $100 for joint returns, and the credit against tax of 4 percent of dividends above the excluded amount) variant 2's values for 1954 are adjusted estimates and quite liable to be out of line with the run of years up to that time.[25] If we examine the variant 1 gap, as measured in relative terms, we find it constant between 1953 and 1954, despite a sharp decline in tax rates. And even more surprising is the rise in the gap between 1954 and 1955, in the face of tax rates that did not vary between these 2 years. Now it happens that aggregate personal dividend receipts (National Income Division estimate adjusted for comparability with tax return data—see line 12 of table A–1 in the appendix) had been running at about $8.5 billion from 1950 through 1953; moved up $400 million in 1954; and took a $1.3 billion step forward in 1955. This suggests the possibility that there may be another factor in addition to tax rates that can help to explain the size of the dividend gap. It might

---

[21] Those serving abroad were permitted, beginning in 1941, to defer filing until 6 months after their return to the United States. (This privilege expired June 15, 1948. See "Statistics of Income," pt. I, 1948, p. 428.) In 1942 an exclusion of $250 if single and $300 if married was permitted noncommissioned personnel. In 1943 this was raised to an exclusion of the first $1,500 of military pay for all members of the Armed Forces. But it is doubtful whether these provisions could explain much of the decline in dividend reporting. One rough idea of the relevant order of magnitude is the following:

In late 1951 or early 1952 when there were 1.8 million persons on average in the Armed Forces it has been estimated that members of the Armed Forces "who are members of family groups" constituted three-tenths of 1 percent of the total number of individual share owners. (Lewis H. Kimmel, "Share Ownership in the United States," the Brookings Institution, 1952, p. 98.) Raise this to four-tenths of 1 percent to take account of those not members of family groups, and assume it applies to dividend receipts from both public and privately owned corporations as well as to stock ownership. Assume further that this same percentage ruled in 1941 when the average number in the Armed Forces were roughly comparable, and, finally, assume that new accretions to the ranks of the military over the years 1942 and 1943 received dividends to an amount 50 percent higher than those in the Armed Forces in 1941, and that none of these additions filed tax returns. (All of these assumptions are in the direction of overstating the amount of dividends legitimately not reported by members of the Armed Forces. This last one for example implies they were all serving abroad.)

Then we can attribute about 1 point of the almost 7-point rise of variant 2 in the nonreported percentage between 1941 and 1942 to dividends of members of the Armed Forces and between 1.5 and 2 points of the 6-point variant 2 rise between 1942 and 1943 to this same factor. Thus, correcting for the Armed Forces (and really under the assumptions made there is an overcorrection), 1942's percentage for dividends not reported would read 5.8 and 1943's about 11 (both as measured by variant 2). These are still very different from 1941's.

[22] To the extent that this took the form of trust arrangements the dividends are in the main included in our figures. Other ways of arranging stockholdings probably were availed of earlier since tax rates were by no means negligible before 1942. Moreover, much of the reshuffling to minimize taxes involved not taking dividend receipts out of the tax return population, but pushing them lower down the marginal rate schedule. That such had been the case is suggested by a comparison of the data immediately before and just after the introduction of mandatory income splitting for married persons in 1948, as noted in an earlier footnote.

[23] Two factors are involved in the problem under discussion here. With everything else unchanged, an extension of the tax system's coverage would tend to close the "gap," but an increase in rates would tend to open it by increasing the tax saving associated with underreporting. Thus, apparently, the increased scope of the tax system brought in more dividends between 1940 and 1941 than the rise in rates between these 2 years squeezed out. But by 1941 most of the tax base expansion had taken place, yet in the years that followed rates were raised further.

[24] The decline over this period is all the more noteworthy because the increase in exemptions and filing requirements from $500 of adjusted gross income to $600 in 1948 should, as we measure it, have led, other things equal, to a rise in the gap.

[25] That there is some quirk in the data here that I have not been able to iron out is suggested by the very pronounced narrowing of the difference in the gap as measured by variants 1 and 2 from 1954 on.

be argued that one could expect the "gap" to be positively associated with sharp increases in the total volume of dividends paid out, either because new people were getting them or because with a sharp increase people's tax liability would increase and, especially if pushed into a higher rate bracket, so would their incentive to underreport. What constitutes a "sharp" change is, of course, a matter of opinion. From our data we have picked out periods in which there were changes that might reasonably come under this designation, and calculated the change in dividends (National Income Division estimate adjusted for comparability with tax returns) and the change in the relative dividend gap. The results are summarized in table 5.

TABLE 5.—*Comparison of percentage change in aggregate personal dividends [1] and in the dividend "gap" for selected periods*

[Percent]

Years	Percentage change in—		
	Aggregate dividends	Relative dividend "gap"	
		Variant 1	Variant 2
(1)	(2)	(3)	(4)
1938–39	19	17	30
1940–41	10	−22	−105
1945–46	23	8	2
1946–47	12	−20	−24
1947–48	11	−11	−28
1949–50	23	8	42
1954–55	14	17	[2]
1955–56	8	−7	[2]

[1] Adjusted for comparability with tax return tabulations.

[2] Variant 2 values are estimated on a basis different from earlier years and considered too imprecise to use.

NOTE.—A minus sign in cols. 3 and 4 indicates a negative association between an increase in aggregate dividends and an increase in the dividend "gap."

On first glance, the evidence does not seem to support the hypothesis that sharp increases in total dividends and increases in the dividend gap are associated. Under variant 1, in four of the eight periods of dividend increase the gap fell; by variant 2, also, only half the periods showed a rise in the gap. But look more closely at the results for, say, variant 1. The four periods of "gap" increase are also the four periods in which the percentage increase in aggregate dividends was most pronounced—1938–39, 1945–46, 1949–50, and 1954–55. (The same is true for the three periods that showed this result according to variant 2.) Thus there is some reason to believe that very sharp changes in aggregate dividends have been associated with a rise in the relative dividend gap.

By way of quick summary of the trend in the dividend gap, compare the initial and terminal years of our period. For this purpose, as already noted, it is the variant 1 values that are appropriate. It is an interesting fact that the relative gap in 1936 was slightly lower than in 1957, but for all practical purposes we can consider them in the same range—close to 14 percent.[26] And this is surprising in view of the fact that in 1936 the income tax was a minority levy while in 1957 almost all income recipients were involved in it. There is this obvious point that should be added. Constancy of the relative gap does not, of course, mean that the revenue loss on the score of underreporting is getting no more serious. For with the growth in aggregate dividend payments a constant relative gap means a growing absolute gap. (Compare 1936's variant 1 gap of $617 million with the $1.65 billion of 1957.) And, in addition, as incomes increase, higher marginal rates apply. So for these two reasons, despite an unchanging relative gap, there would be an increasing revenue loss.

Finally, we must repeat the need for caution in interpreting our results. I have set forth only those findings that stand out in sharp outline above the imprecision of our data. Yet they remain more in the nature of personal judgments than established facts. That there are errors of estimate in our measure of the dividend gap cannot be denied. That there are likely to be random elements in these errors and, therefore, an accentuation of their effect on the size of the gap cannot be denied either. Yet, there are good grounds for holding that the distortion would not be large enough to affect our conclusions on the behavior of the gap. Of the adjustment items delineated in table 1 the most sizable (with the exception of fiduciary dividends which has already been discussed and for which alternative estimates have been made) is line 8, dividend receipts of nonprofit organizations. For the other estimated entries, "big" percentage errors would have only a slight effect on the gap. And our estimate of the dividend receipts of nonprofit organizations appears to be well above two others that have been made.[27] Thus on this score our estimates make for a smaller gap than would either of the two alternative figures just cited.

Some evidence on the income class distribution of dividend underreporting

Granted that taxpayers fail to report a slice of their dividend receipts and that the size and relative importance of this slice has apparently responded to variations in tax rates, there is much more we would like to know about underreporting. For example: Where is the underreporting concentrated? and how much of it might be uncovered by audit? are two questions that follow naturally. It is easier to raise such questions, of course, than to answer them. But an attempt at an answer is possible with the evidence uncovered for 1 year by the Internal Revenue Service (then the Bureau of Internal Revenue).

In connection with the tax returns filed in 1948, the Bureau undertook a careful statistical investigation—the audit control program (hereinafter referred to as the ACP)—designed to "determine the size of the individual tax enforcement problem confronting the Bureau of Internal Revenue."[28] For a scientific sample of tax returns, errors (e.g., reporting less or more than should have been reported) and the amount of tax change associated with them were determined by audit, and from this information estimates for the whole taxpaying population were made.[29] The data on errors, including those made in reporting dividends, and the tax change their discovery led to, were tabulated in four broad income classes—under $7,000, $7,000 and under $25,000, $25,000 and under $100,000, and $100,000 and over. Thus they permit us to say something about the income class distribution of underreporting as determined by dividing tax changes disclosed by audit by the appropriate marginal rates. Since a number of assumptions were necessary in obtaining these estimates, it is more appropriate to present them as ranges rather than to use a single figure that might spuriously suggest more precision than was possible.[30]

TABLE 6.—*Estimates of the amount of dividend underreporting and the frequency of such errors in 1948 as derived from the audit control program data*

[Dollar amounts in millions]

Income class	Estimated dividend underreporting	Dividends reported	(2) as a percent of (3)	Estimated number of underreporting errors [2] (thousands)	Number of returns reporting dividends (thousands)	(5) as a percent of (6)	Percent of total estimated dividend underreporting
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
Under $7,000	$30.9–$61.7	$1,110.3	2.8–5.6	297.5	2,345.6	12.7	34.5
$7,000 and under $25,000 [1]	42.2– 84.3	1,351.2	3.1–6.2	159.5	794.9	20.1	47.1
$25,000 and under $100,000	14.0– 28.0	1,508.4	.9–1.9	31.2	166.9	18.7	15.6
$100,000 and over	2.6– 5.1	1,001.0	.3– .5	2.5	14.5	17.2	2.9
Total	89.6–179.1	4,970.9	1.8–3.6	490.7	3,321.9	14.8	100.0

[1] The estimate for this class covers also errors on business returns with adjusted gross income of less than $7,000 where gross receipts exceeded $25,000.

[2] Includes both returns on which dividends were reported, but too low, and those that should have reported dividends, but didn't. These latter, properly additive to column 5, are not included therein, because there is no way of estimating them.

Table 6 contains our estimates for dividends uncovered by the ACP. In the aggregate we estimate between $90 million and $179 million of dividends would have been uncovered in 1948 if all returns had been carefully audited. This comes to something between 1.8 and 3.6 percent of the amount of dividends actually reported by individuals. About one-third of dividend underreporting was found in the lowest income class, about half in the class $7,000 and under $25,000, and the rest in the income groups over $25,000. More significant, however, is the relative degree of underreporting among income classes. Reading from low to high income classes there appears a general tendency for the amount and relative importance of underreporting to vary inversely with income class. Dividends discovered by the ACP [31] fell in a range of something like 3 to 6 percent of those voluntarily reported for the two lower income classes, and between 1 and 2 percent for the $25,000 and under $100,000 class, and between one-quarter and one-half of 1 percent for the top income class. These results seem reasonable: In the upper income classes recordkeeping is su-

[26] By variant 2, we get a much higher gap in 1957 than in 1936. But as explained above, variant 2 for the later year is an unreliable estimate.

[27] For 1952 we obtained a figure of $339 million. Selma Goldsmith puts it at $200 million for that year (see p. 100 of Selma F. Goldsmith, "The Relation of Census Income Distribution Statistics to Other Income Data," in an "Appraisal of the 1950 Census Income Data, Studies in Income and Wealth," vol. 23, published by the Princeton University Press for the National Bureau of Economic Research, 1958); and the Federal Reserve Board's flow of funds estimate is $100 million for 1952 (data from Federal Reserve Board worksheets).

[28] Bureau of Internal Revenue, "The Audit Control Program, A Summary of Preliminary Results," p. 3. A generally similar kind of survey was made for 1949, but no data relevant to our problem are currently available.

[29] The auditors and auditing procedures of the ACP were probably superior to those generally in use at that time.

[30] Details of the estimating procedures appear in the appendix note. The estimates are based on materials made available by the Internal Revenue Service in 1951.

[31] This, of course, is our estimate from the tax change data released by the ACP.

perior as a rule, the consequences of not reporting more serious, and audit is a more likely possibility.

The frequency of errors in dividend reporting was more prominent than the rather slight amount of unreported dividends as estimated from the ACP data. The estimated 490,700 returns with dividend underreporting errors represented close to 15 percent of the total number of returns reporting dividends. For all but the lowest income class, however, the percentage was above this, ranging between 17 and 20 and varying but slightly with income class. (See col. 7 of table 6.) Thus the practice of underreporting was less prevalent in terms of numbers (relatively) in the lowest income class than any other, but otherwise about the same for the remainder of the income range. Together with the finding noted earlier on the relative importance of the amount underreported—the ratio of underreported to reported dividends tending to decline with income class—this suggests that individually underreporting errors were considerable more important in the lower classes.[32] One way of gaging their importance is to compare the estimated average amount uncovered by the ACP with the average amount of dividends initially reported in each of the four broad income classes. Such a comparison is made in table 7[33] which is limited to 1040 returns.

TABLE 7.—*Estimated absolute and relative size of underreporting and overreporting errors for returns with major and minor errors in dividends, 1958*

UNDERREPORTING ERRORS

Income class	Average amount of dividends reported	Number of returns with major error in dividends (thousands)	Estimated average error, returns with major error in dividends	Error as percent of amount reported ((4)÷(2))	Number of estimated average error as—		
					Returns with minor error in dividends (thousands)	Error, returns with minor error in dividends	Percent of amount reported ((7)÷(2))
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
Under $7,000 [1]	$265	129.2	$110- $220	41.5-90.0	128.5	$126- $251	47.5-95.0
$7,000 and under $25,000 [2]	978	65.5	237- 473	24.2-48.4	94.0	312- 624	31.9-63.8
$25,000 and under $100,000	7,939	12.2	426- 852	5.4-10.8	19.0	542-1,084	6.8-13.6
$100,000 and over	66,732	1.0	1,000-2,000	1.5- 3.0	1.5	1,334-2,667	2.0- 4.0
OVERREPORTING ERRORS							
Under $7,000 [1]	$265	7.6	$39- $78	14.7-29.8	13.8	$77- $154	29.0-58.0
$7,000 and under $25,000	978	8.1	155- 310	15.8-31.6	14.8	97- 193	9.9-19.8
$25,000 and under $100,000	7,939	1.8	231- 461	2.9- 5.8	3.3	341- 682	4.3- 8.6
$100,000 and over	66,732	.2	700-1,400	1.0- 2.0	.4	688-1,375	1.0- 2.0

[1] Form 1040 returns only. Thus number of returns with underreporting errors in this class differs from the number in table 6.

[2] Includes business returns with adjusted gross income of less than $7,000, where gross receipts exceeded $25,000.

On average the underreporting error in the two lower income classes was serious. In the under $7,000 class its value probably ranged between approximately half to almost the whole average amount of dividends reported for returns with minor error in dividends, somewhat below this for returns with major errors. In the income class $7,000 and under $25,000, dividend errors averaged between one-quarter and two-thirds of the average amount reported. In the two upper income classes, judged this way, dividend underreporting errors were much less important—between 1 and 10 percent. Note also the relatively large average overreporting error (lower half of table 7), which also follows the pattern of decline in importance relative to reported dividends moving up the income scale. This suggests that some of the underreporting of dividends, too, can be laid to carelessness and poor recordkeeping rather than purposeful evasion. But this is not the whole story: overreporting errors averaged only half as much or less than underreporting errors, not to mention the much greater frequency of underreporting errors.[34] The number of returns with dividend error and tax decrease was only about 11 percent as great as the number of returns with dividend error and tax increase.

We should not end this section on what the ACP data appear to indicate about dividend underreporting without some reference to the gap discussed earlier. For 1948 we estimated the gap at about $500 million. (This is the variant 2 value which, compared with variant 1, gives a considerably lower gap.) On the basis of reasoning similar to that used earlier in getting at the category (b) dividends for 1957, about $150 million of this might be explained as dividend receipts of those not required to file. (This allows for the $40 million reported in classes below the filing requirement.) The rest presumably was pure underreporting. But estimates derived from the ACP data fall distinctly short of $350 million. As noted above, they were something like $100 or $200 million. There are no data that would permit a reconciliation of these differences. It may be mentioned that the ACP, of course, could discover only the underreported dividends of filers: it was not designed to find out anything about the dividend receipts of purposeful nonfilers. And this could explain some of the difference between these two estimates of underreported dividends.

Our estimates, then, point to the possibility that even if all returns were audited with the care with which the ACP was undertaken, a goodly amount of dividends might remain undiscovered. Moreover, the usual auditing procedures can be expected to uncover only a fraction of what a program like the ACP would find in any year. This suggests that if more thorough coverage of dividends on tax returns and recoupment of the tax liability associated therewith are desired, serious consideration should be given to a change in present procedures. There are several possibilities which may be noted (evaluation of their administrative feasibility lies beyond the scope of this paper): institution of withholding of tax liability on dividend payments; or, perhaps, jogging the flagging memory of taxpayers and alerting them to their dividend receipts, and to the Internal Revenue Service's potential cognizance thereof, by requiring corporations to send a copy of information returns 1099 to each dividend recipient along with a statement that this is a copy of a form sent to the Collector of Internal Revenue,[35] or, a stepped up and widely publicized auditing program concentrating on returns with adjusted gross income of under $25,000.

III. INTEREST

The interest gap in 1957

With the groundwork laid by the preceding discussion of dividends, interest underreporting can be handled in more summary fashion. As will be brought out in what follows, while the data on dividends were accurate and profuse enough to permit rather refined treatment of certain estimating problems, for interest we had better give up the scalpel and turn to the proverbial blunt instrument.

How things stood as regards interest in 1957 is sketched out in table 8. The scheme and procedures follow a course similar to that noted for dividends, with, of course, some features specific to interest.

---

[32] "Lower" is defined with reference to the four income classes into which the ACP data are classified, rather than the usual income distributions for which the topmost classes would be close to the upper limits of our "lower" classes.

[33] Note that the classifications of major or minor error in dividend reporting is not related to the size of the dividend error, but to its importance relative to all errors made by the taxpayer. More specifically a major dividend error as defined by the ACP "means that (*a*) the error in dividends * * * was responsible for the largest portion of change in adjusted gross income and (*b*) the change in adjusted gross income was responsible for a larger portion of the tax change than either exemption change, or personal deduction change, or mathematical error." All other dividend errors were classified as minor. The fact that minor errors were at least as large as major errors means that the minor errors occurred on returns generally more error prone and with a larger total tax change than returns with major errors.

[34] The data on table 6 are net—i.e., the excess of estimated underreporting dividends over estimated overreported dividends.

[35] Currently any dividend payments in excess of $10 per annum must be reported to the collector in Internal Revenue on form 1099. Many corporations, however, find it simpler to report all such payments no matter how small.

TABLE 8.—*Derivation of interest not reported on tax returns, 1957—interest category*

	Amount (in thousands)
1. Interest reported by individuals on tax returns	$3,318,950
2. Plus interest in "other income" 1040A returns	$3,000
3. Plus interest included in partnership income	$279,970
4. Plus interest received by fiduciaries (estate and trusts)	$418,294
5. Minus interest on returns from Alaska and Hawaii	$12,698
6. Equals personal interest receipts accounted for on tax returns	$4,007,516
7. Personal monetary interest receipts as estimated by NID[1]	$11,066,000
8. Minus interest receipts of nonprofit organizations	$272,500
9. Minus interest receipts of noninsured pension funds	$373,000
10. Minus tax-exempt interest on State and local government bonds	$501,000
11. Minus accrued interest on U.S. savings bonds	$413,000
12. Minus interest of group hospitalization and health plans	$14,500
13. Equals NID[1] total personal monetary interest adjusted for comparability with tax return data	$9,490,000
14. Interest "gap"=(13)−(6)	$5,482,484
15. Relative interest "gap"=(14)÷(13)—percent	57.8

[1] National Income Division, Office of Business Economics, Department of Commerce.

To the interest reported as such by individuals on tax returns add the estimated amounts of interest reported by them under a different heading—as part of "other income" on 1040A returns and as part of income from partnerships; then add also the interest receipts of fiduciaries (both taxable and nontaxable); and, finally, subtract the interest receipts on returns outside the continental United States (Alaska and Hawaii) to arrive at the figure of personal interest receipts accounted for in tax returns (line 6) of $4 billion. This is compared with aggregate personal monetary interest receipts as estimated in the National Income Accounts, but such a comparison is valid only after this figure is adjusted.

The adjustments all involve taking out the interest receipts of nontaxable entities or the interest receipts of individuals which are exempt from taxation. Thus, from the personal monetary receipts of individuals as estimated by the National Income Division (line 7), we subtract—

(a) the interest received by organizations exempt from income tax, line 8.

(b) the interest receipts of noninsured pension trusts, line 9.

(c) the interest paid on State and local government bonds (line 9) for this is exempt from the Federal personal income tax. (A double subtraction of negligible amount is involved here, since some nonprofit organizations and pension trusts hold tax-exempt bonds.)

(d) the accrued discount on U.S. Government savings bonds (line 11). (This is a subtraction item on the assumption that all taxpayers choose the option of deferring the reporting of such interest and should be expected to account for it only when they cash in their savings bonds.)

(e) the small amount of interest earned by group hospitalization and health plan funds (line 12).

And after these subtractions we have a figure (line 13) of personal monetary interest adjusted for comparability with tax return data which in 1957 came to $9.5 billion.

By subtracting the interest accounted for on tax returns from the adjusted total of personal monetary interest receipts, an interest "gap" of $5.5 billion (line 14) or about 57.8 percent of adjusted total personal monetary interest (line 15) is obtained for 1957. This is clearly of a different order of magnitude than for dividends. And no reasonable adjustments that might be made would substantially alter this conclusion. Nor is the conclusion invalidated by the fact that the national income accounts estimate of interest is considered to be considerably less accurate than their dividend estimate.[36]

For there is no reason to hold that this greater degree of error would necessarily operate only to make the "gap" larger. Moreover, even a very large error and in this direction would leave a substantial interest "gap."

To go from the "gap" per se to illegitimate nonreporting, requires that we adjust for (a) statistical error, and (b) interest receipts of persons and fiduciaries not required to file in order to have as a residual, (c) interest receipts that should have been reported, but weren't. And to go from (c) to a basis for estimating the revenue loss requires a further subtraction, this time on the score of those who illegitimately failed to report, but who, if they had reported, wouldn't have been taxed anyway. Whereas, for dividends the data permitted reasonable conjectures on these items, for interest our surmises will have to be more ad hoc. For individuals suppose we assume that all the interest received by families with income of $2,500 or less either didn't have to be reported, or, if reported, it would not result in an increase in tax liability because exemptions and deductions were sufficiently high to exclude it from taxable income.[37] The BLS-Wharton School data for 1950, cited earlier for dividends, when "blown" up suggests that about 20 percent of all personal interest was received by families with income of $2,500 or below. Applying this percentage to the relevant total of personal monetary interest (i.e., after taking out nonprofit organizations, noninsured pension funds, estates, and trusts, and the interest component of partnership income) gives a total of nonreported interest that if reported would not add to the tax base of $2 billion.[38]

On this basis our "gap" of $5.5 billion is reduced to a revenue base loss due to nonreporting of $3.5 billion. Needless to say this is a rough and ready procedure. In my opinion, if anything, it leads to an overstatement of legitimate nonreporting, and hence, an understatement of the reduction in tax base (and, of course, the estimated revenue loss) due to underreporting.

The revenue loss associated with interest underreporting

Working with this addition to revenue base that we estimate would occur if there was no underreporting and the marginal rates derived from the income class distribution of underreporting as set forth in table 10 below, we get a revenue gain (or view it as the loss associated with underreporting currently) estimate of just under $800 million, if interest underreporting were fully corrected.[39] Once more the reminder that this is at best a gross approximately of the "true" figure. In all honesty, then, it would be more appropriate to cite as the revenue loss associated with interest underreporting (the revenue gain that might be expected from its abolition) to be on the order of somewhere between $700 and $900 million. Again we note that to the degree that later audit by the IRS leads to more of the interest of 1957 being reported, this figure overstates the revenue loss from interest underreporting.

Trend in the interest gap, 1936–57

The background explanations of the reasons for analyzing the time pattern of income-reporting gaps, and what might be discovered from them have already been presented in connection with dividends, and will not be repeated here. So, too, we will not repeat the general background material on filing requirements, the scope of the personal income tax, and the severity of tax rates. There is no need for three alternative measures of the interest gap as there was in the case of dividends. We did estimate interest of estates and trusts on two bases between 1940 and 1951, but interest is not as large for fiduciaries as is dividends, and the difference in the interest gap caused by an alternative value for this item was so small, particularly in view of the size of the gap that we run our commentary here on the basis of a single measure.[40] Moreover tax treatment of interest and method of tabulating interest receipts in "Statistics of Income" have remained unchanged over the years covered by our study. So a single measure is all that is needed for a comparison over time, even one that brings in the most recent experience. In table 9 and chart 2 the record of the interest gap 1936–57 is summarized.

---

[36] Thus Selma Goldsmith, after noting the small degree of error that attaches to the national income accounts estimates of wages and salary, transfer payments, and dividends, goes on to say: "Certain of the personal income components are subject to greater error, for example, rent and interest income of persons." (See "Relation of Census Income Distribution Statistics to Other Income Data," op. cit., p. 74.)

[37] Thus we assume also that all interest receipts of families with over $2,500 of money income should have been reported and would have been taxable (considering them as a marginal increment). This assumption is generally true, but there are exceptions. However, the exceptions to the one stated in the text above are probably even greater. So, all in all, our assumption tends to understate the "gap."

[38] To this we must add for completeness, the interest of fiduciaries too small to have to file. But this we estimate at something like $40 million or so, and given the general looseness of our procedures as regards interest, it would be unduly pious to throw this item in. The conclusion that this item would be of such negligible size comes from data supplied by Eli Shapiro and Raymond Goldsmith already cited in the section on dividends. For trusts and estates that did file, taxable interest assets come to 17 percent of total assets; applying this to the $6.3 billion total assets of fiduciaries too small to file furnishes about $1 billion taxable of interest-yielding assets, on which a return of 3 percent or so appears reasonable. All this is for 1952. For 1957 something higher—say $40 million seems in order.

[39] For details of the estimate see the appendix.

[40] In table A–2 the alternative measure and the gap based on it is also given. The values we use here are those called variant 1 in table A–2. Chart 2 [not printed in RECORD] plots both variants.

[Chart not printed in RECORD.]

TABLE 9.—*The interest gap, 1936–57*

Year	Absolute gap (in millions)	Relative gap
		Percent
1936	$2,038	62.7
1937	2,060	63.3
1938	2,013	62.7
1939	1,962	62.2
1940	1,746	56.3
1941	1,660	53.5
1942	1,501	51.6
1943	1,484	54.1
1944	1,501	55.6
1945	1,819	59.6
1946	2,066	59.0
1947	2,459	62.1
1948	2,315	58.1
1949	2,436	55.8
1950	2,755	57.7
1951	3,079	58.8
1952	3,185	57.9
1953	3,556	58.2
1954	3,810	56.7
1955	4,179	57.1
1956	4,663	57.3
1957	5,482	57.8

Start as we did with dividends with what we unequivocally know. For interest there are 4 years in which interest of both taxable and nontaxable fiduciaries were tabulated—1939, 1952, 1954, and 1956—and these are, therefore, the years that required a minimum of estimating. Over the period covered by these 4 years there was a noticeable fall in the interest gap measured relatively from 62 percent to something like 57 percent—not a startling fall but a real one. Such a decline is to be expected in view of the much deeper scope of the income tax in the 1950's compared with the 1939. But notice in contrast to this decline in the relative gap is the great rise in the absolute size of the gap; it more than doubled between 1939 and 1956.

Since the interest gap is such an imprecise estimate at best, there is little profit in seeking to discover an interest reporting response to variations in tax rates from any but the sharpest changes in the gap. Viewing the picture in this light only the earlier years of our period have a story to tell. Here apparently starting with 1936 and moving forward in time we can observe a decline in the gap associated with the broadening of the tax base up through 1941. And a response, albeit a lagged reaction, to the high tax rates of the war period shows up starting in 1943. There is also a suggestion of a decline in the relative degree of underreporting coincidentally with the postwar reduction in rates. But this latter suggestion is slight, and even the wartime rise must be qualified in view of the general dislocation and deferred filing privileges of that period. (This has been discussed in the dividend section.) And, of course, the interest gap remained about the same in relative terms from 1950 through 1957 in the face of rather substantial variations in personal income tax rates. Thus little in the way of precise year-to-year response of interest underreporting to tax rate changes can be established. On the other hand, the failure of the gap in the postwar years to be lower than in the few years immediately before the war, is a broad hint that some taxpayers let their zeal for reporting interest receipts flag in the face of higher rates of tax.

Because of the height of the gap and because so little in the way of response to particular rate changes can be discerned, there would appear to be in interest underreporting a heavier component of lethargy, ignorance, oversight, forgetfulness, etc., than there is for dividends. That this is to be expected follows from the multiplicity and small size of interest-yielding asset holdings (again, as compared, with stocks), and is confirmed by a comparison of the audit control program's findings for errors connected with the reporting of interest receipts with that program's findings on dividend reporting. For 1948 the Bureau of Internal Revenue (now the Internal Revenue Service) estimated that the universe of tax returns, if audited with care, would show about 491,000 returns on which dividends were underreported, while for interest underreporting their estimate was almost four times as large—1,863,000 returns.

We turn now to a discussion of these findings.

Some evidence on the income class distribution of interest underreporting

As with dividends, the results of the audit control program for 1948 permit some estimates of the income class distribution of interest underreporting. Our estimate of interest uncovered by the ACP from an analysis of the tax returns for 1948, i.e., interest that should have been reported but wasn't, are laid out in table 10. Given the way the ACP presented its findings, it is impossible to do more than suggest the ranges within which interest underreporting in the aggregate might fall. And, of course, the reminder once more that, of necessity, these are estimates subject to wide margins of error. Hence it is better in all honesty to mark out the range of possibility, than to appear spuriously precise by choosing a single magnitude.

TABLE 10.—*Estimates of the amount of interest underreporting and the frequency of such errors in 1948 as derived from the audit control program data*

Income class	Estimated interest underreporting	Interest reported	(2) as a percent of (3)	Estimated number of underreporting errors [1]	Number of returns reporting interest	(5) as a percent of (6)	Percent of total estimate interest underreporting
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
	Millions	*Millions*	*Percent*	*Thousands*	*Thousands*	*Percent*	*Percent*
Under $7,000	$119.4–$238.7	$657,444	18.1–36.3	1,563.5	3,102.8	50.4	62.4
$7,000 and under $25,000 [2]	60.9– 121.8	356,695	17.1–34.1	274.3	706.6	38.8	31.9
$25,000 and under $100,000	9.4– 18.7	212,722	4.4– 8.8	23.6	140.9	16.7	4.9
$100,000 and over	1.6– 3.3	66,582	2.5– 5.0	1.2	13.2	9.1	.8
Total	191.2– 382.5	1,293,443	14.8–29.6	1,862.5	3,963.5	47.0	100.0

[1] The estimate for this class covers also errors on business returns with adjusted gross income of less than $7,000 where gross receipts exceeded $25,000.

[2] Includes both returns on which interest was reported, but too low, and those that should have reported interest but didn't. These latter, properly additive to col. 6, are not included therein, because there is no way of estimating them.

In the aggregate, if all personal income tax returns had been audited carefully, in 1948 somewhere between $190 and $380 million more of interest receipts than was actually reported would have shown up. This is a large amount, for it comes to something like 15 to 30 percent of the interest that was reported. Over 60 percent of interest underreporting that would have been discovered fell in the lowest of the income classes used by the ACP in presenting its findings—taxpayers with under $7,000 of adjusted gross income. (While this is the lowest of the income classes, it is not, as we have already noted in the discussion of dividends, by any means a low income class.) And close to a third of the underreporting fell in the adjoining income class, those with adjusted gross income between $7,000 and under $25,000. These two classes together, i.e., taxpayer with incomes under $25,000, accounted for almost 95 percent of interest underreporting. We remind the reader that for dividend underreporting, we got only a third falling in the lowest income group and almost a half in the one next to it. Or looking at taxpayers with over $25,000, we find them responsible for over 18 percent of the dividend underreporting, but less than 6 percent of underreported interest. Thus interest underreporting even more than dividends is a problem involving the "lower" income taxpayers.[41] Even more to the point, here, is the fact that of the 1,863,000 interest underreporting errors, all but 25,000 were found in the income class under $25,000.

But, of course, this concentration of interest underreporting may be no more startling a "discovery" than that they also received almost all of the interest. In other words, is there a disproportionately heavier degree of underreporting of interest in the lower income classes? The percentages in column 4 of table 10 argue for an affirmative answer. These percentages are derived by relating the estimated interest uncovered by the ACP to the amount that was voluntarily reported in each income class. In both the under $7,000 class and the income range $7,000 and under $25,000 uncovered underreporting came to something that ranged from 17 (or 18) to 34 (or 36) percent of what was actually reported. For the two higher income classes, the range is 4.5 to 9 and 2.5 to 5 percent, respectively.

We have already noted that underreporting of interest is a more serious problem than underreporting of dividends in the sense that many more interest recipients than stockholders failed to report as much income from the particular source as they should have. Our earlier estimates of the revenue losses due to underreporting also show interest underreporting as causing more loss to the Treasury than dividend underreporting. And the estimates derived from the ACP substantiate this conclusion (although they run at a lower order of magnitude for both types of income). We remind the reader that the dividend underreporting estimate from the ACP data was between $90 and $180 million, and compare with this our estimate from the ACP data for interest of $190 to $380 million.

Back now to interest underreporting per se. Interest errors were, of course, very common in the two lower income classes,

[41] "Lower" in quotes to show the qualified way we use this phrase to refer to income of $25,000 and under.

but not unknown in the higher ones. (See col. 7.) For in the income class $25,000 and under $100,000, the number of returns with interest errors came to almost 17 percent of the number of returns that reported interest, while even in the highest income class the relevant percentage was over 9. For the two lower classes, of course, the number underreporting was proportionately greater. Returns with interest underreporting errors in the income class under $7,000 numbered half as much as those reporting interest; in the next class, $7,000 and under $25,000, they came to almost 40 percent as much. This again, is quite a contrast with dividend underreporting. (Compare col. 7 of tables 6 and 10.)

The results of an attempt to assess the seriousness of interest reporting errors appear in table 11. If we compute the average amount of underreporting for returns with underreporting errors and relate this to the amount of interest reported, on average, by interest recipients, then we find that underreporting errors were not trivial. For returns with major errors in interest at all income levels they come to between one-fifth and one-half (our answers, as always, run in range of possible values) of the average amount of interest reported; for returns with minor errors in interest, the underreporting errors loomed even larger relative to the reported amounts, but tended to decline in relative importance as income level rose. (See cols. 5 and 8.) It is refreshing to point to the overreporting portion of table 11, for this indicates that taxpayers do not all err against the revenue, and it is impressive to observe the relative size of overreported amounts (computed in the same way as the relative importance of average underreporting). But a sober check to such reflections comes from observing how small the number of overreporting errors is compared to the number of underreporting errors.

TABLE 11.—*Estimated absolute and relative size of underreporting and overreporting errors for returns with major and minor errors in interest, 1948*

UNDERREPORTING ERRORS

Income class	Average amount of interest reported	Number of returns with major error in interest (thousands)	Estimated average error returns with major error in interest	Error as percent of amount reported ((4)÷(2))	Number of returns with minor error in interest (thousands)	Estimated average error returns with minor error in interest	Error as percent of amount reported ((7)÷(2))

[1] Only form 1040 returns.

[2] Includes business returns with adjusted gross income of less than $7,000, where gross receipts exceeded $25,000.

About interest one must speak more cautiously than about dividends. We have noted this before in a number of connections and expanded on the reason for it. And it is an apropos observation once more because it is natural at this juncture to compare our gap and these estimates from the ACP data of interest underreporting. The ACP data suggests aggregate underreporting of something like $200 to $400 million. Our gap was much larger, some $2.3 billion. But for any comparison it has to be adjusted for legitimate nonreporting. On the basis of the same kind of considerations noted above in the discussion of the revenue loss in 1957, and allowing a generous adjustment of $1 billion to represent this adjustment, this would leave us with a gap comparable to the ACP's uncovering of $1.3 billion, considerably more than even the upper limit on the possible range of underreported interest as obtained from the ACP data. All we can say is that there is a suspicion here, not a confirmation, that a goodly amount of unreported interest was not picked up even in this competently audited sample. This is really too strong a conclusion. The only judgment that is warranted is this: this disparity in results suggests that, if in fact this has not yet been done, careful work on the interest (and dividend) gap, more careful than I have undertaken and with access to tax return data and the results of sample audit, should be undertaken. For if, as appears from the behavior of these gaps over time, the reporting deficiency is not self-correcting, and if there is a serious interest in correcting it, and if more extensive and careful auditing is cited as the procedure through which to accomplish this, it would be important to know if, in fact, it is likely to be successful.

IV. SUMMARY

These are the highlights of our survey of dividend and interest coverage on tax returns. They are presented here in bald and summary fashion, without the numerous qualifications and caveats that attach to the estimates on which they are based. So little can be made of them and they cannot be evaluated sensibly without reference to the preceding portions of the study.

1. At the most recent accounting, a sizable amount of dividends and interest that should have been reported on tax returns was not. While the amount of such income from these sources is difficult to pinpoint precisely, it appears to run at well over $1 billion, perhaps as much as $1.2 billion, for dividends; and for interest over $3 billion, perhaps as much as $3.5 billion.

2. Not all that wasn't reported, even if under the Revenue Code it should have been, meant a loss of revenue to the Treasury, because some of it went to people whose exemptions and deductions exceeded the adjusted gross income they did report. Adjusting as best we could for this factor, we estimated that currently the revenue lost by the Treasury because of the failure to report dividends and interest fully totals $1 billion or more—about $300 million in connection with dividend underreporting and about $800 million because of the underreporting of interest. But this loss is offset to some degree by the interest and dividends later called to account as a result of audit by the Internal Revenue Service.

The revenue loss attributable to unreported dividends and interest would seem to be a relatively small and unimportant item. One billion dollars seems like "slim pickings" in the context of the size of total personal income tax collections. Or to look at it differently, the Treasury probably suffers a greater revenue loss from "moonshining" than from interest and dividend underreporting. But this would be dismissing the problem too lightly. For unreported income may have repercussions more important than the revenue loss that is directly traceable to it. Underreported income constitutes one piece of a broader problem. A general feeling that some types of income and some particular groups of taxpayers are not pulling their share of the taxload could have serious consequences. For such a feeling, if widespread, might undermine the zeal with which many taxpayers police themselves. With the income tax essentially a self-policing levy, and reliant on taxpayer compliance for its success, the importance of interest and dividend underreporting could transcend the revenue loss directly associated with the failure of some taxpayers (a small proportion of the total) to report all their interest and dividend receipts.

3. Neither for dividends nor interest did we discern a tendency for the gap, i.e., the unreported amount to correct itself over time. Insofar as such comparisons can be made, over the last 20 years, years which witnessed a revolutionary conversion of the income tax from a levy with which a few citizens were involved to one that reaches almost every income recipient, there has been an absolute rise in the gap both for dividends and interest, and hence, by inference, a growing revenue loss on this score. Measured relatively, i.e., in a way that takes account of the fact that the flow of interest and dividend payments has tended to rise over time, we find a slight decline in the interest gap and virtual constancy in the dividend gap. This behavior is puzzling since one would expect the gap to fall solely because the tax system's coverage expanded so greatly. (This statement is borne out more directly by the dividend gap results, although there is a degree of confirmation also in the failure of the interest gap measured on a relative basis to fall more rapidly.)

With particular reference to the dividend gap, the clue to this puzzle appears to be taxpayer response to variations in tax rates. Speaking roughly, we find an association between the size of the relative gap and variations in tax rates. This shows up most powerfully on the side of tax-rate increases. For here the data strongly suggest similarly timed increases in the gap (measured relatively). Thus over the war period, the dividend gap rose sharply. That this kind of response to changes in rates is symmetrical, to some degree at least, may be concluded from a decline in the nonreported percentage as tax rates were reduced in the several years following

World War II. But the degree of underreporting remained higher than just before the war, suggesting that increased tax rates are more powerful in inducing underreporting than are lowered rates in encouraging fuller reporting. Finally, again with reference to dividends, the evidence that higher rates discourage reporting and lower rates encourage it is murkier for the period since 1950 than it is for the years before that date.

4. Estimates from a sample audit undertaken by the Bureau of Internal Revenue of the personal income tax returns for 1948, suggest that the degree of dividend and interest underreporting declines as stockholder income rises. Thus, on a per return basis (relative to amounts actually reported) and in the aggregate as well the most serious underreporting is probably found among interest and dividend recipients with incomes of less than $25,000. Although, of course, particular individuals with incomes greater than this may underreport significantly, in the aggregate, total underreporting at the higher incomes ($25,000 and above) is not great, and, in any event, it is more likely to be discovered.

5. The difference between what would have been uncovered in the way of dividends and interest by auditing all tax returns in 1948 and our measure of the dividend and interest gaps (adjusted roughly for comparability) is large enough to suggest, although it cannot conclusively establish, that to get interests and dividends fully called to account for tax purposes may not be possible even with an addition to the auditing resources of the Internal Revenue Service. This statement must be qualified in view of the growth in auditing productivity that has occurred since 1948, and because the threat of more extensive auditing backed up by a commitment of resources may cause taxpayers to report more fully.

APPENDIX

This appendix consists of two basic tables that contain details of the annual estimates of the dividend and interest gaps, and notes on the sources of the data and estimating procedures.

TABLE A–1.—*Derivation of dividends not reported on tax returns, 1936–57*

[Dollars in thousands]

	1936	1937	1938	1939	1940	1941	1942	1943	1944	1945	1946
1. Dividends reported by individuals on tax returns	3,173,844	3,188,006	2,211,500	2,543,650	2,998,642	3,298,887	2,832,521	2,779,833	2,986,025	3,009,554	3,673,857

[1] National Income Division, Office of Business Economics, Department of Commerce.

NOTES FOR TABLE A–1

(The paragraph numbers refer to lines of the table)

1. As tabulated annually in "Statistic of Income," part 1. For 1944 and 1945, when a combined dividend and interest figure was reported, dividends were estimated on the basis of the 1946 ratio of dividends to dividends and interest combined. For 1957 with only premlinary data available excluded dividends were estimated.

2. Estimated for 1944–56, by taking dividends and interest to be half of wages and salaries not withheld on and dividends and interest of under $100 on form W–2 or 1040A returns as given in a footnote to table 2 of "Statistics of Income," part 1 (cf. Selma Goldsmith, "Appraisal of Basic Data Available for Constructing Income Size Distribution," part VI of "Studies in Income and Wealth," volume 13, NBER 1951, pp. 360–361), and then applying against this figure the fraction that dividends constituted of dividends plus interest for all returns under $5,000 as tabulated in "Statistics of Income." For 1957 arbitrarily put at $3 million.

Estimated for 1941–43 by applying the ratio of dividends to total property income (of specified types) on 1040 returns to the property income component of 1040A returns.

3. Tabulations in special supplements to "Statistics of Income" for 1939, 1945, 1947, and 1953. For all other years between 1936 and 1953, estimated by interpolation using dividends received by partnerships as a percent of total dividends from Survey of Current Business, July 1957.

4. A—Variant 1, 1936–53. Sum of (a) dividend component of individual income from estates and trusts and (b) dividends retained by fiduciaries. The value for (a) estimated annually by applying ratio of dividends to total income of taxable fiduciaries to income from estates and trusts reported by individuals. The value for (b) estimated by applying the same ratio used for (a) to the retained income of fiduciaries. For 1944 and 1945 dividends estimated from combined dividend and interest totals on basis of 1946 percentages.

1954–57: Starting in 1954 dividend component of individual income from estates and trusts reported under dividends and shows up in line 1 total. Value for (b) estimated from tabulations for fiduciaries in 1954 and 1956 as sum of excluded dividends, fiduciaries share of dividend tax credit blown up to its dividend equivalent and an adjustment to take account of dividends not eligible for exclusion and credit. For 1954 two additional adjustments needed: (1) Because only 92 percent of returns filed on new basis of IRC of 1954 (this being a transitional year) the tabulated dividend total was assumed to be only 92 percent of correct figure and was adjusted accordingly. (2) Credit applied to dividends received after July 1, 1954, and tabulated credit was raised on this basis to a full year's equivalent. 1955 and 1957 values assumed to be same percentage of NID personal dividend receipts as in 1956.

B—Variant 2: Dividends of taxable and nontaxable fiduciaries as tabulated in "Statistics of Income" 1937, 1938, 1939, and 1952. Assumed same in 1936 as 1937. Estimated 1940–51 on the basis of interpolation between 1939 and 1952 percentage that dividends of fiduciaries represented of NID personal dividend receipts. 1953 estimated by interpolation between similar percentages for 1952 and 1954. From 1954 on same as variant 1 above with addition of dividend component of fiduciary charitable contributions estimated by applying fraction dividends comprised of total fiduciary income to charitable contributions of fiduciaries. For 1944 and 1955 dividend figure broken out of combined dividend and interest total by applying 1946's ratio.

C—Variant 3: Applies only for 1940–51. Derived by applying values obtained by interpolating between the 1939 and 1952 ratios of dividends of taxable fiduciaries to total fiduciary dividends to the dividend of taxable fiduciaries as tabulated in "Statistics of Income." 1944 and 1945 dividends separated out from combined dividend and interest tabulation by using ratio for 1956.

5. Hawaii: as published in "Statistics of Income," part 1, but adjusted 1954–56 to take account of exclusion. Alaska: 1939–42, and 1955 and 1956 as tabulated in "Statistics of Income," part 1, 1936–38 estimated by applying to Hawaii dividends in these years Alaska's dividend as a percent of Hawaii's dividend in 1939; 1943–54 as just noted but using 1939 and 1955 as benchmark dates for obtaining Alaska's as a percent of Hawaii's dividend total by interpolation; 1957 estimated by applying to NID's personal dividend receipts of that year the percentage Alaska and Hawaii's dividends comprised of NID personal dividend receipts in 1956.

* * * * *

7. As estimated by the National Income Division of the Office of Business Economics of Department of Commerce, and published in "National Income" 1936–45 and "U.S. Income and Output," 1946–55. The 1956 and 1957 values are revised data from July 1959 Survey of Current Business.

8. Data supplied by Selma Goldsmith, National Income Division, Office of Business Economics, Department of Commerce.

9. Estimated by applying to line 7 the ratio of nonprofit organization stockholdings to total stockholdings (net of corporate holdings). Total stockholdings 1936–44 as estimated by Raymond Goldsmith (table F–4 of app. F of "Financial Intermediaries in the American Economy Since 1900," National Bureau of Economic Research, 1958) for benchmark dates 1933, 1939, and 1945, and by interpolation for the other years in the period; for 1945–55, estimated prepared for the National Bureau of Economic Research "Post-War Capital Markets" study provided by Morris Mendelson. Nonprofit organization stockholdings 1936–49 as estimated by Raymond Goldsmith ("A Study of Saving in the United States," vol. III, Princeton, 1956, pp. 450, 452) for benchmark dates 1933, 1939, 1945, and 1949 and by interpolation for the other years in the period; for 1950 and 1951 similarly estimated on basis of Goldsmith 1949 and estimate for 1952 in Morris Mendelson, "The Flow of Funds Through the Financial Markets," 1953–55, a technical paper of the National Bureau of Economic Research (in press); 1953–55 from this same source. For 1956 and 1957 we used 1956's percentage of total stockholdings.

10. For 1936–51 estimated in essentially the same manner as line 9. Stockholdings of pension funds for 1939, 1945, and 1949, from Raymond Goldsmith's "Financial Intermediaries in the American Economy Since 1900," table A–10 and 1952 from Mendelson's "The Flow of Funds, etc.;" for the remaining years estimated by interpolation using the values for these 4 years and 1933. For 1952 through 1957 estimated as follows from data in SEC, "Corporate Pension Funds," annual releases: to the pension fund bondholdings, yield figures were applied, and the estimated interest receipts were subtracted from the total of interest and dividends received by pension funds. The dividend figure so obtained was raised by 5 percent to take account of omissions in the coverage of the SEC survey.

11. Estimates supplied by National Income Division, Office of Business Economics, Department of Commerce.

Even this brief description will indicate that our results rest on numerous assumptions rather than precise data. For almost all items, however, alternative assumptions or estimating procedures would have yielded substantially similar figures. In only one category would this not have been the case—line 4, dividends of the fiduciaries—and here we have provided three sets of estimates.

TABLE A–2.—*Derivation of interest not reported on tax returns, 1936–57*

[Dollars in thousands]

	1936	1937	1938	1939	1940	1941	1942	1943	1944	1945	1946
1. Interests reported by individuals on tax returns	828,867	810,170	823,008	831,516	1,003,262	1,028,729	981,500	885,754	886,763	886,971	1,067,062
2. Plus estimated interest in other income 1040A or W–2 returns						70,569	105,531	67,472	8,301	9,264	10,263
3. Plus interest included in partnership income	61,010	60,963	60,005	59,249	62,177	65,729	66,386	68,159	73,161	87,244	86,207
4. Plus interest of fiduciaries (estates and trusts):											
A—Variant 1	324,093	323,803	315,208	305,297	290,258	277,970	255,062	238,048	232,942	252,524	271,312
B—Variant 2					260,918	298,735	230,928	239,133	209,133	247,872	316,313
5. Minus interest on returns from Alaska and Hawaii	1,570	1,896	1,559	1,559	1,635	1,499	1,316	1,301	1,366	1,690	1,393
6. Equals personal interest receipts accounted for on tax returns:											
A—Variant 1	1,212,400	1,193,040	1,196,662	1,194,503	1,354,332	1,441,498	1,407,163	1,258,132	1,199,801	1,234,313	1,433,451
B—Variant 2					1,344,722	1,462,263	1,383,029	1,259,217	1,175,992	1,229,661	1,478,452
7. Personal interest receipts as estimated by NID [1]	3,886,000	3,883,000	3,822,000	3,761,000	3,701,000	3,672,000	3,494,000	3,391,000	3,451,000	3,903,000	4,376,000
8. Minus interest receipts of nonprofit organizations	109,200	109,900	111,400	112,800	114,900	115,300	113,000	110,600	108,300	106,000	105,200
9. Minus interest receipts of noninsured pension funds	21,900	22,600	24,100	25,600	28,100	33,700	40,600	47,700	54,800	62,000	67,900

[1] National Income Division, Office of Business Economics, Department of Commerce.

NOTES FOR TABLE A–2

(The paragraph numbers refer to lines of the table)

1. As tabulated annually in "Statistics of Income," part 1. For 1944 and 1945 when a combined dividend and interest figure was reported, interest was estimated on the basis of the 1946 ratio of interest to interest and dividends combined.

2. See notes for line 2 of table A–1.

3. Tabulations in special supplements to "Statistics of Income" for 1939, 1945, 1947, and 1953. For all other years up to 1953 estimated by interpolation using interest received by partnerships as a percent of total personal monetary interest as determined from NID data published in "U.S. Income and Product" (for derivation see notes for line 7 below). For 1954 on similarly estimated using 1953's percentage.

4. A–Variant 1: Tabulated in "Statistics of Income" for 1937, 1938, 1939, 1952, 1954, and 1956. Estimate for all other years by use of percentages (or interpolations thereof) that interest of fiduciaries comprised of total personal monetary interest as from the tabulations computed for these years. Nineteen hundred and fifty-seven's value derived by using same percentage as 1956.

B–Variant 2: Estimates for 1940–51 derived by applying values obtained by interpolating between the 1939 and 1952 ratios of interest of taxable fiduciaries to total fiduciary interest to the figure (tabulated in "Statistics of Income") for interest of taxable fiduciaries. For both variants 1 and 2, interest broken out of combined interest and dividend total using ratios that applied in 1946.

5. Hawaii: All years but 1943 from "Statistics of Income." Nineteen hundred and forty-three estimated from 1942 ratio of Hawaii's interest to total interest. For 1944 and 1945 separated from dividends in the combined total reported by using 1946 percentage.

Alaska: 1930–42, 1955, and 1956, from "Statistics of Income." Values for all the other years are estimates based on interpolation of 1939, 1942, and 1955 ratios of Alaska's interest to total interest.

Nineteen hundred and fifty-seven estimated for Alaska and Hawaii combined by applying to 1957 personal monetary interest, the ratio found for 1956 for Alaska and Hawaii interest in relation to total interest.

7. Derive from estimates published by the National Income Division of the Office of Business Economics of the Department of Commerce—1936–45 in "National Income" (1954 edition; 1946–55 in "U.S. Income and Output"; 1956 and 1957 from "Survey of Current Business," July 1959. For all years we derived the line 7 values by subtracting imputed interest paid from and adding imputed interest received to personal interest income.

8. Derived by applying bond yields and mortgage interest rates to estimated bond and mortgage holdings of nonprofit organizations.

End of the year figure for U.S. Government securities, corporation bonds, farm and nonfarm mortgages owned by nonprofit organizations were taken:

(a) For 1933, 1939, 1945, 1949 from R. Goldsmith, "A Study of Savings With U.S.," volume III, page 450 (table X–1), Princeton. Interpolation was used for the other years in between.

(b) For 1953–55 from National Bureau of Economic Research, "The Flow of Funds Through the Financial Markets" 1953–55, by Morris Mendelson (in press).

Average yields for corporate bonds Aaa rating of Moody's Investor Service was chosen.

Interest rates for nonfarm mortgages estimated as follows: 1936–44 from page 132 of R. J. Saulnier's "Urban Mortgage Lending by Life Insurance Companies" (National Bureau of Economics Research, 1950). 1945–57, table B, page 17 of "Joint Investment Bulletin" note No. 259 of Life Insurance Association of America.

For farm mortgages from U.S. Department of Commerce, Bureau of the Census "Historical Statistics of the U.S." column 253, page 111.

The following procedure was followed to estimate the accrued interest in each year:

From the average amount of securities owned in 1 year (obtained by averaging the two end-of-the-year figures) was subtracted the average amount owned in the preceding year. The amount thus obtained was multiplied by the average yield of that year.

To take account of the fact that the increase in holding took place evenly throughout the year, half of increment of interest in year one was credited to year one and half to year two; half of the increment of interest in year two was credited to year two and half to year three, and so on.

Interest of nonprofit organizations for 1956 and 1957 estimated by applying to personal monetary interest figures for these years the ratio of interest of nonprofit organizations to personal monetary interest in 1955.

9. End of the year value of bondholding were taken—

(a) For the period 1936–46: Benchmarks data for year 1933, 1939, 1945 from R. W. Goldsmith's, "Financial Intermediaries in the American Economy," page 371. Interpolations were used for the years in between.

For the period 1945–50, bondholdings percentages figure estimated by R. Goldsmith in the above-mentioned book were applied to total assets estimated by Roger Murray, "A Fresh Look at Pension Funds" in "Trusts and Estates," November 1955. For the years 1951–57 from SEC "Corporate Pension Funds," annual release.

Amount of mortgages: End of the year value for 1955–57 from SEC "Corporate Pension Funds," 1958, table 1.

1935–54: Estimated as 1 percent of total asset in Robert Tilove "Pension Funds and Economic Freedom" (fund for the Republic, 1959), 1 percent is the 1955 ratio of mortgages to total assets.

Average yields as calculated by Moody's Investor Service and Interest rate for mortgages as explained in notes for line 8.

The procedure to estimate accrued interest in each year was exactly like that followed for line 8 except that for the calculation of interest from corporate bonds, the yearly increase in bondholding was multiplied by 0.707 (that is the proportion of public utility bonds owned by noninsured pension funds in 1954 according to the New York State banking study, "Pension and Other Employee Welfare Plan: A Survey of Fund Held by State and National Bank in New York State"). The figure thus obtained was multiplied by the average yield of public-utility bonds from "Moody's Investor Service." The remaining amount was treated as industrial bonds and Moody's Investor Service Aaa yields were used for them. Interest so estimated for 1951–57 raised by 5 percent to take account of omissions in the coverage of the SEC survey.

10. 1936–52 from Lawrence H. Selzer, "Interest as a Source of Personal Income and Tax Revenue," National Bureau of Economic Research, Occasional Paper No. 51, page 1282. Value for 1953–55 from Lawrence H. Seltzer's worksheets, with $8 million added to take care of wholly and partially exempt Federal securities. 1956 and 1957 estimated by applying 1955 ratio of Seltzer's extension of George Lent's individual holdings of State and local government securities to total gross State and local debt to interest payments of State and local governments in 1956 and 1957. (Then we added the $8 million noted above on the score of Federal securities.)

11. 1936–52 from Lawrence H. Seltzer, "Interest," etc., as cited above, page 1280. 1953–57 estimated on a basis similar to Seltzer's from table 3, page 35 of Treasury Bulletin, March 1958.

12. 1952–55 end of the year value as tabulated in Morris Mendelson's "Flows of Funds Through the Financial Markets," 1953–55 (NBER, in press). 1956–57 estimated by applying the same percentage increase as between 1954 and 1955 (approximately 20 percent). 1940–52 estimated taking 1940 and 1952 as benchmark years and interpolating in between, and assuming 1940 and previous years amount equal zero.

The procedure followed to estimate the increase in interest accrued was like that followed for line 8 except that here we used yields on long-term Governments, as given in the Federal Reserve Bulletin.

EXPLANATION OF TABLES 6 AND 10

These are rough estimates based on tabulations of the ACP data made available by the Internal Revenue Service in 1951. We describe the dividend estimates of table 6. The procedures used in deriving the table 10 values are the same.

The estimate of underreporting must be made as a range rather than any single value, because, with only the total tax change reported for returns with dividend errors, it was necessary arbitrarily to assign fractions of that total tax change to the dividend error alone. In the ACP tabulations dividend errors were classified as major or minor errors. All returns that met the following conditions were placed in the major error category:

(a) The error in dividends accounted for the largest portion of the change in adjusted gross income, i.e., the addition (or subtraction) due to audit.

(b) The change in adjusted gross income was responsible for a bigger fraction of the total tax change than exemption or deduction changes, or mathematical error.

All other returns with dividends errors were designated minor error returns.

Following this classification we set up 3 possibilities for major error returns: 100, 75, and 50 percent of the total tax change due to the dividend error; and 3 percentage assumptions for minor error returns: 40, 30, and 20 percent. In every case we estimated the dividends uncovered by the ACP by dividing the tax change assumed due to the errors in dividend reporting by the marginal rate that applied on average to all taxpayers (taken from "Statistics of Income") in each of the broad income classes by which the ACP data were tabulated and for joint and separate returns.

The lower value of the estimates in table 6 is the sum of the 50 percent for major errors and 25 percent for minor error assumptions; the upper values of the range come from adding the results of the 100 and 40 percent assumptions. The upper value of the range is almost surely above the actual figure, but it cannot be stated as positively that the lower limit of our range is below the real value.

Tables 7 and 11 are derived from 6 and 10 and data from "Statistics of Income."

Estimating the revenue gain associated with full correction of dividend and interest underreporting

1. Dividends: From table 6 we derived the income class distribution of dividend underreporting, applied these percentages to our residual underreporting figure of $850 million, and multiplied the amounts so obtained by the marginal rates (weighted by the proportion of joint and separate returns) that applied to the taxable income in each adjusted gross income class.

Summary table—Dividends

Adjusted gross income class	Each class percent of total underreporting [1]	This percent of $1 billion (millions)	Weighted average marginal rate [2] (percent)	Revenue gain (millions)
Under $7,000	34.5	$345	20.0	$69
$7,000 and under $25,000	47.1	471	22.3	105
$25,000 and under $100,000	15.6	156	51.7	81
$100,000 and over	2.9	29	82.5	24
Total	100.0	1,000		279

[1] Derived from table 6.
[2] Derived from data of table 10, p. 1423, "Statistics of Income—1956, Individual Income Tax Returns."

2. Interest: From table 10 we derived the income class distribution of interest underreporting, applied these percentages to our residual underreporting figure of $3.5 billion, and multiplied the amounts so obtained by the marginal rates (weighted by the proportion of joint and separate returns) that applied to the taxable income in each adjusted gross income class.

Summary table—Interest

Adjusted gross income class	Each class percent of total underreporting [1]	This percent of $3.5 billion (millions)	Weighted average marginal rate [2] (percent)	Revenue gain (millions)
Under $7,000	62.4	$2,184	20.0	$437
$7,000 and under $25,000	31.9	1,116	22.3	249
$25,000 and under $100,000	4.9	172	51.7	89
$100,000 and over	.8	28	82.5	23
Total	100.0	3,500		798

[1] Derived from table 10.
[2] Derived from data of table 10, p. 1423, "Statistics of Income—1956, Individual Income Tax Returns."

Mr. KEATING. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. Mr. SMATHERS in the chair). The Senator will state it.

Mr. KEATING. I was temporarily occupied. I did not hear the last request.

Mr. PROXMIRE. I asked unanimous consent that a statement by Professor Holland of M.I.T. relating to the bill on which I am working be printed in the RECORD at this point.

The PRESIDING OFFICER. The Chair assumes that the Senator from New York has no objection.

Mr. KEATING. I have no objection.

Mr. KUCHEL. May I join in the absence of objection?

Mr. PROXMIRE. I ask unanimous consent that an article by Mr. Joseph A. Pechman entitled "Withholding for Interest and Dividends," which appears in "Essays in Federal Taxation," a publication of the Committee for Economic Development of December 1959, be printed in the RECORD at this point. The article starts on page 63 and runs through page 82.

There being no objection, the article was ordered to be printed in the RECORD.

WITHHOLDING FOR INTEREST AND DIVIDENDS

(By Joseph A. Pechman [1])

Under present law, interest and dividends are reported by individual income-tax payers on a voluntary basis and the Internal Revenue Service depends on its regular enforcement procedures to detect underreporting. Payers of interest and dividends file annual information returns with the Internal Revenue Service for each person to whom dividend payments of $10 or more and interest payments of $600 or more are made during a calendar year. However, the information-return system has not been effective, and compliance with respect to both interest and dividends, particularly the former, has been poor.

The record of compliance by recipients of interest and dividends contrasts sharply with the compliance record of wage earners. During World War II, when most wage earners became subject to the individual income tax for the first time, it was recognized that collection at source was essential to provide for effective compliance and enforcement. The wage withholding system, which was enacted in 1943, is now regarded as a major advancement in tax administration: It has pushed compliance of wage earners close to the 100-percent level and has provided a convenient method for the individual to budget his taxes.

The possibility of extending withholding to interest and dividends has been explored by the Congress on several occasions, most recently in 1950 and 1951. In each of these years, a withholding provision for dividends (and interest, in 1951) was included in the revenue bill passed by the House, but both attempts were unsuccessful in the Senate. The 1950 plan, which was patterned after the wage withholding system, was rejected largely because corporations claimed that the cost of compliance would be burdensome for them. The 1951 plan departed substantially from the basic procedures used in wage withholding and greatly minimized the burdens of compliance for withholding agents and taxpayers. It was rejected, nonetheless, primarily on the ground that it involved withholding of tax from nontaxable recipients of dividends and interest.

The purpose of this paper is to present the considerations for and against withholding on dividends and interest. As background for the discussion, the paper begins with a review of the withholding plans considered by the Congress to date and the objections raised against them (sec. I). It then summarizes the statistical evidence on underreporting of interest and dividends (sec. II); explains in detail how the 1951 plan would operate and how it can be modified to provide prompt refunds to individuals and organizations not subject to tax (sec. III); and, finally, evaluates the remaining arguments for and against withholding (sec. IV).

The major conclusions of the paper are as follows:

1. The revenue loss due to the underreporting of dividends and interest has been serious enough to warrant the adoption of withholding for many years. Moreover, the statistical evidence shows that compliance has not only not been improving, but has actually been deteriorating under present enforcement procedures. In 1957, the latest year for which tax return data are available, $1 billion of dividends and $3.5 billion of interest failed to show up on the returns of individuals subject to tax.

2. Since there are tens of millions of interest and dividend recipients, it would be prohibitively costly for the Internal Revenue Service to match the amounts reported on tax returns with the information returns filed by payers of interest and dividends. Commissioners of Internal Revenue under both Democratic and Republican administrations have failed to stop the deterioration in interest and dividend compliance by the use of the regular enforcement techniques, simply because it would be wasteful to use their scarce resources for enforcing the tax on interest and dividends when these resources can be used more productively elsewhere. The only practical alternative is to withhold.

3. Among the withholding methods considered to date, the 1951 plan provides a good balance among the various considerations that must be taken into account in designing a withholding system for interest and dividends. It would impose no additional burdens on payers, and would not complicate the individual income tax return unduly. The major drawback of the original 1951 plan is that it would withhold on nontaxable individuals. If this is regarded as a serious inequity, the 1951 plan can be modified to provide quarterly refunds to such persons.

4. A comprehensive interest and dividend withholding system would increase the revenues of the Federal Government roughly $900 million at this year's income levels. With the pressure for revenue as large as it is, and is likely to be in the foreseeable future, it is bad public policy to continue to lose revenues of this magnitude from any source. Whether the underreporting of interest and dividends is due to inadvertence or to outright evasion, it is inequitable to permit recipients of these types of income to avoid paying their full share of the taxload.

I. HISTORY OF PROPOSALS TO WITHHOLD ON INTEREST AND DIVIDENDS

A. Revenue Acts of 1913–16

Few people realize that withholding is not a recent innovation in the annals of income taxation in this country. The Tariff Act of 1913, the first income law enacted after the 16th amendment was ratified, provided for collection at source of the normal individual income tax on—"interest, salaries, wages, premiums, annuities, compensation, remuneration, emoluments, or other fixed and determinable annual periodic gains, profits, and income."

This provision was retained in the Revenue Act of 1914 and 1916. Dividends were not made subject to withholding under these acts because they were at the time (and, in fact, until 1936) exempt from the normal tax.

Since the income tax applied to a very small proportion of the Nation's income recipients in this period, the withholding system was not essential for tax inforcement. Moreover, in actual operation, the early withholding system was crude and ineffective and the Secretary of the Treasury recommended its discontinuation in his annual report for fiscal year 1915. The recommendation was accepted by the Congress in the Revenue Act of 1917 and reporting of "information at the source" was substituted instead.

B. World War II proposals

Withholding was not considered seriously again until 1941. In that year, the Treasury informally presented to the Ways and Means Committee a plan for withholding on wages, salaries, interest, and dividends at a 15-percent rate. But the committee's reaction was unfavorable and action was postponed until the following year.

Early in 1942, the Treasury formally proposed withholding on wages, salaries, bond interest, and dividends. In the case of dividends and interest, the Treasury's plan provided for withholding at a rate of 10 percent on all dividends and bond interest paid to all individuals except those who filed a certificate with the payer certifying that their gross income for the taxable year was expected to be less than their exemptions and credits for dependents. Payers were required, under the plan, to accompany all payments of interest and dividends with a receipt showing the amount withheld. At the end of the year, they were also required to send to the Internal Revenue Service a list of all payments made during the year, the amount of tax withheld from each recipient, and a copy of the exemption certificates for recipients not subject to withholding. The revenue bill of 1942, as passed by the House, included the Treasury's withholding plan, modified to apply to all bond interest and dividends in order to eliminate the complications of exemption certificates.

While the bill was being considered by the Senate, the Treasury's plan was severely criticized by representatives of industry, banks, accountants, and other groups. The major objections were that the furnishing of receipts to bondholders and stockholders and the processing of withholding exemption certificates would place a heavy burden of compliance on those who were required to withhold, particularly in the case of those paying interest on coupon bonds. In addition, it was felt that the proposed plan would require the disclosure of the names of owners of stocks and bonds who had registered their securities with "nominees" or "street names."

As a result of these objections, the Treasury proposed the following modifications of its plan before the Senate Finance Committee: (1) Exemption from the withholding system of interest on coupon bonds and dividends paid by credit unions, savings and loan associations, cooperative banks, and farm cooperatives; (2) substitution of annual receipts to interest and dividend recipients by the payer, instead of receipts with every payment; and (3) no disclosure of ownership to payers by nominees and street names, with the requirement that the nominee transmit a receipt for the amount withheld to the owner.

The Senate Finance Committee omitted withholding on interest and dividends from its version of the revenue bill of 1942. As finally passed, the 1942 act provided for withholding of the victory tax on wages and salaries only, effective at the beginning of calendar year 1943.

Withholding on interest and dividends was considered again the following year when the present system of current payment was enacted. In the interest of gaining acceptance of the major features of a pay-as-you-go system, the Treasury excluded interest entirely from the withholding system and, during the hearings of the Ways and Means Committee, gave only lukewarm support for the inclusion of dividends. As finally passed, the Current Tax Payment Act of 1943 limited collection at source to wages and salaries.

C. Revenue Act of 1950

The next attempt to expand the withholding system to nonwage incomes was made in 1950. The revenue bill of 1950, as passed by the House, contained a withholding provision for dividends at a flat rate of 10 percent, with no exemptions.

Under the plan proposed by the House, stockholders would have received from the corporation either at the end of the year or after each dividend payment a statement, in any form convenient to the paying corporation, showing the amount of dividends paid and tax withheld. The tax withheld would have been handled on the individual income tax return in the same way that the tax withheld from wages and salaries is handled. The stockholder would have reported his total dividends, including amounts withheld, and would have claimed credit against his total tax liability for the amounts withheld from his wages, salaries, and dividends. Like

[1] The views expressed herein do not necessarily reflect those of the trustees, officers, and other staff members of the Committee for Economic Development.

the present forms W–2 for wages, the dividend withholding statements furnished by corporations would be attached by the individual to his return as validation of his claim for refund.

The plan was again strongly criticized in the hearings held by the Senate Finance Commitee both on equity and practical grounds. The equity argument was that it is unfair to withhold on tax-exempt organizations and individuals not subject to tax. The practical argument was that it would have been very costly for corporations to supply their stockholders with information on the amounts withheld. The Finance Committee agreed with these arguments and deleted the dividend withholding provision from the bill it sent to the Senate. After considerable debate, the Senate voted to sustain the decision of the Finance Committee. In the end, the House agreed to omit the dividend withholding provision from the bill.

D. Revenue Act of 1951

The most comprehensive and refined withholding system ever considered by the Congress was included in the revenue bill of 1951. This system was designed to meet the major objections made against the dividend withholding plan passed by the House in 1950 and to extend withholding to interest as well as dividends. As on previous occasions, the House accepted the plan, the Senate Finance Committee deleted it from the bill, the Senate followed the Finance Committee's recommendation, and the final bill as passed followed the Senate's decision.

The major advance made by the 1951 plan over the plans previously considered was the elimination of the need for any accounting of tax withheld by the payer of interest and dividends subject to withholding. The plan provided for withholding at a flat rate of 20 percent. The payer would not have been required to keep records of the amounts withheld from each individual or to submit an accounting of such amounts to the individual. Nor would he have been required to reconcile his remittances to the Government with the actual amounts withheld as is now required under the wage withholding system.

To account for his total interest and dividend receipts and to claim credit for the amounts withheld on his account, the individual would have grossed up the amounts he actually received by a factor of 25 percent. He would also have taken credit against his final liability for the amount by which his net interest and dividends were grossed up, since this is the amount withheld at the source.

The definition of dividends subject to withholding was comprehensive. The bill provided for withholding on all dividends paid to individuals and tax-exempt organizations (as well as to intercorporate dividends of nonaffiliated groups of corporations). In the case of interest, however, exemptions were made for interest on U.S. savings bonds, postal savings, bank deposits, State and local government securities, and payments on shares in savings and loan associations and credit unions. (As indicated below, it was perfectly feasible to withhold on these payments; they were exempted partly because it was felt that a large proportion of the recipients would not be taxable and partly because it was feared that withholding would discourage saving in these forms.) For practical reasons, interest payments made by individuals to other individuals were also exempted from the withholding system.

Individuals would have been required to wait until their annual return was filed to claim any refund due them. Tax-exempt organizations, on the other hand, would have been permitted to deduct the amounts withheld on their interest and dividends from any income and payroll taxes they were required to pay. In addition, they were permitted to claim refunds quarterly for any amounts of withheld interest and dividends that they were not able to offset as credits against their income and payroll tax remittances to the Government.

The House bill also required withholding on royalties, but this was not an integral part of the plan. In fact, the withholding system for royalties was patterned after the wage withholding system rather than the proposed interest and dividend system. Payers of royalties would have been required to prepare withholding receipts, similar to forms W–2, for wages and salaries. Copies of these receipts would have been sent both to the Internal Revenue Service and the taxpayer, and the latter would have been required to append a copy of his receipts to his return to validate his claim for a credit or refund.

In rejecting the new plan proposed by the House, the Senate Finance Committee again reiterated its concern about equity and compliance problems. Since this was the last time the Finance Committee has officially expressed its views about this subject, it is worth quoting its own summary of its reservations. In its report on the revenue bill of 1951 (report to accompany H.R. 4473, S. Rept. No. 781, 82d Cong., 1st sess., p. 65), the committee stated:

"While your committee recognizes that there may well be substantial underreporting of such income, largely through carelessness or inadvertence on the part of the taxpayers, it does not believe that sufficient investigation of the problem has been made to justify such a drastic solution as the House proposes. Your committee believes that the withholding provisions of the House bill would work a great hardship upon many taxpayers and impose expensive administrative burdens upon the withholding agents."

E. Lessons from the historical experience

It is clear from the foregoing record of the experience to date that a number of objections must be satisfactorily answered to make withholding on interest and dividends acceptable to the majority of the Senate:

1. Although the Finance Committee has had the benefit of all of the available estimates of underreporting of interest and dividends, it was still not convinced, as of 1951, that "a drastic solution" like withholding was justified.

2. Since 1943, the proposed plans would have applied withholding to interest and dividends at a flat rate, without regard to the tax status of the recipients. This was done because, during all of the discussions, corporations and other payers of interest and dividends repeatedly stated that it would be inordinately costly for them to take account of exemption status in withholding on these payments. To eliminate these costs, the plans applied withholding across the board to all dividends and interest. This meant that nontaxable recipients of interest and dividends would be subject to overwithholding. Such overwithholding was considered inequitable—despite the fact that close to $600 million of tax has been withheld annually from the wages of about 8 million nontaxable wage earners in recent years. Regardless of the merits of the arugment, it seems clear that a system of quick refunds to nonprofit organizations and nontaxable individuals is necesary to make withholding on interest and dividends more acceptable to its opponents.

3. There is a lingering feeling, particularly in the Senate, that interest and dividends withholding is extremely complicated and would add greatly to the costs of the withholding agents. This may have been true in the case of the earlier plans that provided for exemption certificates to prevent overwithholding on nontaxable recipients of interest and dividends, and for the transmission of a statement by the withholding agent to the recipient showing the amount of tax withheld. As already noted, the 1951 plan eliminated both of these features. Under this plan, the compliance problems of the withholding agent would be no greater than the time it takes to compute 20 percent of his total interest and dividend payments and to remit that amount to the Government. Nevertheless, doubts continue to be expressed about the practicability of such aspects of the plan as the treatment of coupon bond interest, series E bond interest, interest and dividends received through intermediaries, and other technical details. All of these problems were solved in the 1951 legislation, but critics of withholding continue to argue that the plan is excessively complicated.

In brief, the three critical questions that remain to be answered are: (1) Is the evidence of underreporting of interest and dividends conclusive enough to warrant adoption of withholding? (2) Can the 1951 plan be adapted to provide quick refunds to nontaxable individuals and organizations? (3) Has provision been made to handle the many different forms of interest and dividend payments without undue complications? These questions are considered in the following sections.

II. EVIDENCE OF UNDERREPORTING OF INTEREST AND DIVIDENDS

Although it is not possible to estimate precisely the amount of understatement of dividends and interest on tax returns, two independent sources of information indicate without any doubt that the understatement is very large. These sources are: First, the audit control program conducted by the Internal Revenue Service for 1948; and, second, historical comparisons of statistics on interest and dividends paid to individuals, as estimated by the Department of Commerce, with the amounts reported by individuals on their tax returns. Most of the data in this section are drawn from the work of Prof. Daniel Holland of the Massachusetts Institute of Technology, who reports on his results in detail in his own paper in this compendium entitled "Underreporting of Dividends and Interest on Tax Returns." I am indebted to Professor Holland for permitting me to use his estimates prior to publication.

A. Results of the audit control program

On the basis of a scientifically drawn sample of tax returns which were examined carefully by trained field auditors, the Internal Revenue Service has estimated that, of the 52.1 million returns filed in 1948, 13.7 million were erroneous by at least $2 of tax. Of this latter number, over 540,000 contained dividend errors and almost 2 million contained interest errors. The dividend and interest errors in about one-half of the returns with errors in these two income sources were the major sources of error on these returns. More than 90 percent of the taxpayers who made dividend and interest errors paid too little tax.

The average tax error on the 260,000 returns with major errors in dividend income was $79; this varied from $31 on returns with incomes of less than $7,000 to $1,420 on returns reporting incomes of $100,000 and over. For the 1 million returns with major errors in interest income, the average tax error was $18 and varied from $12 in the lowest brackets to $1,467 in the highest.

"Statistics of Income" indicate that 3.3 million form 1040 returns reported dividends and 4 million reported interest in 1948. The 540,000 returns with dividend errors thus

constituted almost 18 percent of the total number of 1040 returns on which dividends were reported. The 2 million returns with errors in interest constituted almost 50 percent of the 1040 returns reporting interest.

On the basis of these data, Professor Holland has estimated that between $90 million and $180 million of dividends (or between 1.8 percent and 3.6 percent of the total amount reported on all returns) would have been uncovered in 1948 if all returns filed in that year had been audited as carefully as the returns included in the audit control sample. About one-third of the underreporting was found in adjusted gross income classes below $7,000; one-half was between $7,000 and $25,000; and the remainder was above $25,000. The proportionate amount of underreporting varied inversely with the size of individual incomes: It was between 3 and 6 percent of the total dividends voluntarily reported on returns with adjusted gross incomes below $25,000; between 1 and 2 percent between $25,000 and $100,000; and between one-fourth and one-half of 1 percent above $100,000.

Professor Holland's calculations also indicate that a complete audit of all tax returns in 1948 would have uncovered between $190 million and $380 million of interest (or between 15 and 30 percent of the amounts actually reported on returns). About 62 percent of the underreporting was in adjusted gross income classes below $7,000; 32 percent was between $7,000 and $25,000; and the remainder above $25,000. The proportionate amount of underreporting was between 17 and 35 percent of interest reported on returns with adjusted gross incomes under $25,000; between 4 and 9 percent between $25,000 and $100,000; and between 2.5 and 5 percent above $100,000. Thus, at all income levels, the percentage underreporting was larger for interest than for dividends, but a much larger proportion of the interest errors was concentrated in the lowest income brackets.

B. Comparisons of aggregates of interest and dividends paid with amounts reported on tax returns

The incomes reported by individuals on their tax returns cannot be compared directly with the personal income estimates of the Department of Commerce because the two sets of data differ in concept and coverage. However, it is now possible to make fairly reliable estimates of the most important adjustments needed to put the series on a comparable basis with the series obtained from tax returns.

Estimates of the adjusted series for the years 1948–57, prepared by Professor Holland, are shown in tables 1 and 2. In 1957, the amount of dividends not accounted for on tax returns was of the order of $1.7 billion, or 15 percent of the adjusted dividend payments. In the same year, $5.5 billion of interest, or 58 percent of adjusted interest payments, was not accounted for on tax returns. (This estimate understates the interest gap because the basic personal interest income series does not include interest paid by one individual to another on personal loans.)

Between 1948 and 1957, the dollar amount of dividends and interest not accounted for on tax returns more than doubled—in the case of dividends, from $844 million to almost $1.7 billion, and in the case of interest, from $2.3 billion to $5.5 billion. In relative terms, the dividend gap varied between 12 and 13 percent in 1948–51, increased to 16 percent in 1953–54 and to 19 percent in 1955, and then declined to 15 percent in 1957. On the other hand, the interest gap has varied narrowly between 56 and 59 percent throughout the period through 1957.

TABLE 1.—*Estimated gap between dividends paid and amounts accounted for on income tax returns, 1948–57*

[Dollar amounts in millions]

Year	Adjusted dividend payments [1]	Dividends accounted for on tax returns [2]	Gap	
			Amount	Percent of adjusted payments
1948	$6,860	$6,016	$844	12
1949	7,086	6,211	875	12
1950	8,706	7,545	1,161	13
1951	8,498	7,440	1,058	12
1952	8,378	7,304	1,074	13
1953	8,647	7,251	1,396	16
1954	9,069	7,582	1,487	16
1955	10,350	8,364	1,986	19
1956	11,163	9,174	1,989	18
1957	11,430	9,739	1,691	15

[1] Dividends paid, as estimated by the Department of Commerce, less dividends received by foreigners, mutual insurance companies, nonprofit organizations, and noninsured pension funds.

[2] Dividends reported by individuals on their tax returns as dividends and as "other income" on forms 1040A, plus dividends received through partnerships and taxable and nontaxable fiduciaries, less dividends received by residents of Alaska and Hawaii.

TABLE 2.—*Estimated gap between interest paid and amounts accounted for on income tax returns, 1948–57*

[Dollar amounts in millions]

Year	Adjusted interest payments [1]	Interest accounted for on tax returns [2]	Gap	
			Amount	Percent of adjusted payments
1948	$3,988	$1,672	$2,315	58
1949	4,365	1,929	2,436	56
1950	4,777	2,022	2,755	58
1951	5,240	2,161	3,079	59
1952	5,505	2,320	3,185	58
1953	6,106	2,550	3,556	58
1954	6,716	2,906	3,810	57
1955	7,319	3,140	4,179	57
1956	8,131	3,468	4,663	57
1957	9,490	4,007	5,483	58

[1] Personal interest income less net imputed interest, as estimated by the Department of Commerce, less interest receipts of nonprofit organizations, noninsured pension funds, and group hospitalization and health plans, tax-exempt interest, and accrued discount on U.S. savings bonds.

[2] Interest reported by individuals on their tax returns as interest and as "other income" on forms 1040A, plus interest received by partnerships and taxable and nontaxable fiduciaries, less interest received by residents of Alaska and Hawaii.

Source: Paper by Daniel Holland in this compendium, "Underreporting of Interest and Dividends on Tax Returns", table A–2, variant 1.

It is significant that there has been no noticeable trend downward in either of the two gaps during this period. Since exemptions and filing requirements have remained the same while incomes have risen, the proportion of income recipients required to file returns has increased. One might have expected, therefore, that the gaps would have shown a slight tendency to decline in relative terms. Since the percentage of dividends not accounted for on tax returns has increased, dividend compliance must have deteriorated in recent years. And the fact that the percentage of interest not accounted for on tax returns has remained about the same suggests that interest compliance has also been declining as incomes have risen. However, despite the recent rise in the dividend gap, interest compliance is still much poorer than dividend compliance both in absolute and relative terms.

It is evident that the gaps computed from aggregate data are larger than the estimates of underreporting derived from the audit control program. For the year 1948, the dividend gap of roughly $840 million is $660 million larger than the maximum estimate of underreporting disclosed by the audit control program, while the interest gap of $2.3 billion is $1.9 billion larger than the maximum estimate of interest underreporting disclosed by the audit control program. These differences are the result of three factors: First, the gap estimates include incomes received by persons who are not required to file returns; second, the audit control program did not include individuals who were required to file but failed to do so; and, third, many taxpayers in the audit sample undoubtedly successfully concealed their true receipts from the examining officers. The very large difference between the interest gap and the estimate from the audit control program suggests that substantial amounts of interest are received by persons who are not required to file. Nevertheless, it is clear that, even if every return were audited carefully by the Internal Revenue Service, a large amount of dividends and an even larger amount of interest would not be detected.

C. Estimated revenue loss and recoupment of revenue through withholding

To calculate the revenue loss from underreporting of interest and dividends, it is necessary to have data on the proportion of the unreported amounts received by persons who would not be taxable and the average marginal rate of tax that would apply to the amounts received by those who are taxable. Neither of these figures is known. However, even on the basis of conservative assumptions, Holland estimates that $1 billion of dividends and $3.5 billion of interest were not reported by taxable individuals in 1957 and that the total revenue loss due to this underreporting was in the neighborhood of $1 billion ($300 million for dividends and $700 million for interest).

It is difficult to estimate precisely how much of this lost revenue would be recovered if interest and dividends were subject to withholding. To avoid overstating the revenue recoupment, I have assumed that the additional tax collected on the amounts not reported by taxpayers would be at the first-bracket rate after allowing for the standard deduction, of 18 percent. On this assumption, withholding would have increased tax collections by $800 million in 1957. Since personal interest income and dividends were running 14 and 5 percent higher, respectively, in mid-1959 than in 1957, the potential revenue gain is probably on the order of $900 million at the present time.

These estimates are imperfect in two respects. On the one hand, the assumption that nothing beyond the first-bracket rate would be collected from the unreported dividends is clearly an understatement. If a withholding system were put into effect, many taxpayers in the higher income brackets who now fail to report their interest and dividends would probably report them to claim credit for tax withheld. On the other hand, it may be impractical to withhold on some types of interest payments that were included in the gap estimates, the most important of which are interest payments on home mortgages held by individuals. These two factors would tend to offset one another, but there is no way of knowing which would be the more important. In view of the conservative assumptions used, however, the revenue that would be recovered by a comprehensive interest and dividend withholding system would probably not be very far from the $900 million estimated earlier.

No allowance has been made in this estimate for the revenues recovered from interest and dividends through the present

enforcement procedures. Such an allowance is unnecessary, in my opinion, because the funds now used for enforcing the tax on interest and dividends received by the large majority of taxpayers would be diverted to other areas if these items were made subject to withholding, so that there would probably be no net reduction in the additional tax collected through enforcement as a result of the adoption of interest and dividend withholding. In any case, we know that the tax on interest and dividends uncovered by audits must be a small fraction of the amount potentially to be gained by withholding. In recent years, the total additional collections from individual income tax enforcement have amounted to roughly $500–600 million per year. This includes amounts collected from taxpayers making error of any sort, including mathematical errors, overstatement of deductions and exemptions, and understatement of incomes other than interest and dividends as well as interest and dividends. Unfortunately, the Internal Revenue Service does not break down the additional tax it collects by source of error. But, in view of the relative importance of other incomes and of the high frequency of errors in reporting of deductions and exemptions, it would be surprising if the additional tax collected from interest and dividends amounted to more than $50 million annually. (It may be noted parenthetically that the lack of a breakdown of the additional income and tax by type, disclosed through the regular auditing procedures is a serious gap in our information on the effectiveness of the enforcement process. If it does not do so of its own accord, the Internal Revenue Service should be instructed by the Congress to make such information regularly available to the public.)

In summary, in the 8 years since the Congress last considered withholding on interest and dividends, the relative amount of underreporting of dividends has increased and the relative amount of interest underreporting has not declined perceptibly. The revenue loss from this underreporting is large, even after generous allowances are made for interest and dividends received by nontaxable individuals. Conservatively, it is estimated that a comprehensive interest and dividend withholding system would increase revenues by about $900 million per year at this year's income levels.

III. DETAILS OF THE 1951 WITHHOLDING PLAN

The 1951 interest and dividend withholding plan relies on a single and obvious bit of arithmetic. If tax is withheld at a flat rate of 20 percent on the gross payment, the amount withheld is 25 percent of the net amount after withholding. With this as a base, it is possible to operate a withholding system without requiring any additional recordkeeping on the part of the withholding agent.

For example, suppose an individual owns 10 $1,000 corporate bonds, with an interest return of 3 percent per annum. At a 20-percent withholding rate, the corporation would pay to the individual $240 annually ($300 less 20 percent for withholding). The corporation would remit to the district director of internal revenue the balance of $60. At this point, the corporation's role ends—it prepares no documents for the Government or for the interest recipient.

On his income tax return, the individual would enter the $240 of interest he received. He would then add one-quarter of this amount or $60, which was the amount withheld. The total of $300—the amount of interest he received before withholding—would be included in his adjusted gross income. After computing his total tax liability, he would deduct the amounts withheld on wages and salaries, payments on declarations of estimated tax, and the $60 withheld at source on interest to obtain the overpayment (which would be refunded to him) or the balance of tax due (which he would remit to the district director of internal revenue with his return).

The computations would be the same even if the individual received interest and dividends from several sources. In all cases, he would enter the net amounts received from these sources and would then "gross up" for the total receipts (not separately for each receipt). The "grossing up" procedure would automatically provide the correct computation of the amounts withheld and of the amounts to be credited against final liability. It would add a few lines to the tax return form, but the steps are simple and would not introduce any serious complications on the return. (See sec. IV–A1, below.)

A. Provision for changes in rates

The withholding rate, under the 1951 plan, was designed to approximate the starting individual income tax rate, without requiring individuals and the withholding agents to use fractional percentages in computing the amounts withheld. At the starting rate of 22.2 percent under the 1951 bill, the simplest withholding rate for dividends and interest was 20 percent, since it meant that the tax withheld would be exactly one-quarter of the net amounts received after withholding. This withholding rate also accounted exactly for the standard deduction (22.2 percent less the standard deduction of 10 percent gives a net rate of 20 percent).

The system can be adapted to any other starting rate, but it would be difficult to take account of the standard deduction precisely in all cases. For example, at the present starting rate of 20 percent, a withholding rate of 18 percent would be required to allow for the standard deduction. This would mean that individuals would be required to gross up their net dividends and interest by a factor of eighteen-eighty-seconds, or 22 percent. Thus, a corporation would withhold $18 from a dividend payment of $100. The taxpayer, in turn, would be required to multiply his net dividend of $82 by 22 percent to arrive at the $18 which must be added to obtain the total dividend to be included in his income.

To avoid these fractional percentages, it would be simpler to lower the withholding rate in this case to 16⅔ percent, or one-sixth. At this withholding rate, the amount withheld is exactly 20 percent or one-fifth of the net amount received by the taxpayer after withholding (16⅔ divided by 83⅓). With this arrangement, payers could withhold at a rate of one-sixth of the dividends and interest they pay, and dividend and interest recipients would gross up by one-fifth, or 20 percent. While the withholding rate would not be geared exactly to the first-bracket rate, the difference would be relatively small and would achieve substantially the same compliance as the exact withholding rate.

In general, if the withholding rate is 1/r, the grossing up factor is 1/r–1. The following table indicates a series of withholding rates and grossing up factors that might be used for various individual income tax starting rates ranging from 10 percent to the present level of 20 percent.

Individual income tax starting rate (percent)	Rate after 10 percent standard deduction (percent)	Withholding rate	"Grossing-up" factor
20	18.0	1/6	1/5
18	16.2	1/6	1/5
16	14.4	1/7	1/6
14	12.6	1/8	1/7
12	10.8	1/10	1/9
10	9.0	1/11	1/10

B. Effect of the dividend credit and exclusion

Given the present dividend credit of 4 percent, the marginal rate of tax on dividends (after the $50 exclusion) of taxpayers in the first bracket is 14 percent (20 percent minus 2 percent for the standard deduction minus 4 percent for the dividend credit). A withholding rate of one-seventh would be very close to 14 percent. But, since there is no credit for interest, the closest fraction for withholding at the first bracket rate on interest is one-sixth. There is no reason why different withholding rates cannot be used for dividends and interest—the taxpayer would be instructed to gross up each of these receipts separately on his tax return in any event. Nevertheless, if two withholding rates are regarded as confusing, either one-sixth or one-seventh could be used for both. The larger fraction would have the advantage of increasing slightly the revenue gain from withholding; the smaller fraction would minimize overwithholding.

It would be impossible to make allowance for the $50 exclusion under the 1951 plan without complicating it unnecessarily. If the dividend exclusion is disregarded, the maximum amount of overwithholding for taxpayers with dividends less than $50 would be $8.33 ($16.67 on joint returns) at a withholding rate of one-sixth. According to statistics of income, the average refund due to taxpayers who overpaid their tax either through withholding or payments on declarations was more than $100 in 1957. Since refunds of these magnitudes are tolerated by taxpayers (in some cases, they are welcomed as a convenient device to save), the small additional amounts of overwithholding under a withholding system that disregarded the dividend exclusion are hardly likely to be noticed by most people.

C. Treatment of interest

Unlike the plans previously considered, the 1951 plan was easily adaptable to withholding on most interest payments to individuals, even if the amounts are small.

For example, assuming a withholding rate of one-sixth, a savings and loan association or a bank paying 2-percent interest on deposits semiannually would credit each account at the rate of 1.67 percent. To calculate the amount to be remitted to the Government, it could either multiply the total interest actually credited to all accounts by one-fifth, or apply 0.33 percent to the total balances in all accounts on the date interest was credited to them.

In the case of a coupon bond, the owner would turn in his interest coupon at a bank and would receive 83 percent of its face amount from the bank. (If the owner cashes the coupon, say, at the corner grocery store, the grocer would also pay him only 83 percent and would receive that amount from his bank when he cashes it.) The bank would, in turn, be reimbursed for 83 percent of the face amount of the coupon by the corporation issuing the bond and the corporation would remit the remaining 17 percent to the Government. Thus, the correct amount would be withheld, regardless of the number of different persons handling the coupon while it is en route to being cashed, without requiring the corporation to know the identity of the bondholder.

In the case of series E bonds, banks and other agents authorized to redeem such bonds would be provided with tables showing the gross redemption value, the interest included in this redemption value, income tax withheld, and the net amount to be paid at redemption. For example, where an individual redeems a $50 bond at maturity, the purchase price is $37.50, interest is $12.50, the tax withheld would be $2.08 (at a withholding rate of one-sixth), and the bank would remit to the bond owner $47.92. This redemption procedure would involve no more work for the bank teller redeeming the bond than he is required to do under present procedures since he would read off the amount

to be paid to the bond owner from a table, just as he does today.

In the usual case, most individuals will not have entered the interest from series E bonds on their annual returns as it accrued. Consequently, inclusion of the total interest received in the year of redemption would ordinarily yield the correct amount of interest includible in taxable income that year. In the rare case where an individual will have accrued his interest, the grossing-up procedure would overstate the amount of interest to be included in income in the year of redemption. For these few cases, it would be necessary to make provision for deducting the interest entered on prior-year returns. However, the full amount of tax withheld would be credited against his final liability.

While it would be desirable to make the interest withholding system as comprehensive as possible, it would be impractical to require withholding on interest paid by individuals. Thus, it would be necessary to exempt from withholding all interest payments on home mortgages and personal loans. However, the exception should be limited to individuals acting only in their personal capacity. If they operate a business, there is no reason why they cannot withhold on interest just as they now withhold on wages and salaries paid to their employees.

D. Treatment of dividends or interest received through partnerships or trusts

Dividends and interest received by individuals through intermediaries such as partnerships and trusts were also subject to withholding under the 1951 plan. To enable the individual to prepare his return, the partnership or trustee would make the information on the amount of dividends and interest received and the tax withheld available to him when he is given the annual summary of his share of income derived from the organization. Space would be provided for the individual in schedules C and G of form 1040 to enter the amounts withheld through partnerships and trusts and these amounts would also be credited against final liability.

In the case of trusts not distributing the full amount of income, the allocation of amounts withheld as between the trust and the beneficiaries would be made on a proportionate basis according to the relative amounts distributed and retained.

E. Provision for prompt refunds to persons and organizations not subject to tax

As already noted, the major objection to the 1951 plan was that it withheld on interest and dividend payments whether or not the recipient was taxable. Tax-exempt organizations strenuously objected to this reduction in their investment income, and provision was made in the House bill to minimize the amount of overwithholding for such organizations. However, no special treatment was provided for individuals not subject to tax.

The plan for tax-exempt organizations was to allow them to offset currently the amounts withheld from their dividends and interest against the amounts they withheld from their employees. For example, if during a given quarter a university withholds $50,000 from its employees, and $30,000 was withheld from its interest and dividends, it would pay only $20,000 to the Government. In those instances where the amount withheld exceeds the amount owed to the Government, the excess would have been refunded promptly at the end of each quarter.

In view of the concern regarding withholding on nontaxable individuals, it will probably be necessary to expand the system of quarterly refunds to include persons who are not taxable as well as tax-exempt organizations. Like the plan for the latter in the 1951 bill, withholding agents need not be involved at all. They would withhold at a flat rate on all their interest and dividend payments. At the end of each quarter, individuals eligible for refunds would prepare a claim on a simple form and would send this form to the Internal Revenue Service. The refund claim need be no more complicated than the claim now filed by farmers for taxes on gasoline used on farms (form 2240), which is printed on a punchcard. (Aside from the claimant's name, address, and signature, the form contains three lines for the computation of the refund.) With modern machine methods, such claims can be processed within a matter of days.

It is possible to permit all nontaxable interest and dividend recipients to claim intra-annual refunds. However, it would be advisable, at least at the beginning to restrict the privilege of filing a claim to those who expect to have total incomes of less than $600 during the year ($1,200 for persons over 65 years of age and the blind); that is the present filing requirements. This would take care of a substantial proportion of the hardship cases and would forestall a large number of refund claims by individuals who would find themselves taxable at the end of the year.

If all persons who expect to be nontaxable are permitted to file refund claims for tax withheld on interest and dividends, nontaxable wage earners should also be given the same privilege. As already noted, 8 million nontaxable wage earners are now withheld on annually, and they would be as entitled to quick refunds as dividend and interest recipients. (Actually, nontaxable wage earners do not seem to object to withholding, and it is doubtful whether quick refunds are needed either for them or for nontaxable interest and dividend recipients. But the cost of a quick refund system is negligible as compared to the hundreds of millions of dollars to be gained by withholding on interest and dividends, and it would be a small price to pay for this large amount of revenue.)

IV. PROS AND CONS OF WITHHOLDING ON INTEREST AND DIVIDENDS

A. Advantages

1. Improved compliance: One overwhelming advantage of the 1951 plan is that it would collect practically the entire tax liability on dividends and interest received by taxpayers subject to the first bracket rate, without requiring withholding statements or information returns for the millions of small amounts of dividends and interest paid each year. Unless the withholding rate is substantially less than the first bracket rate, taxable individuals subject to the first bracket rate would gain very little by understating the amounts of interest or dividends they receive. Correspondingly, the Government would lose nothing even if first-bracket taxpayers failed to report dividends and interest on their returns.

For those with incomes taxable at higher bracket rates, compliance would be enforced on the basis of the information returns by the methods employed today. Because of the automatic enforcement achieved through withholding for low-income taxpayers, the Internal Revenue Service would have available more resources for enforcing compliance with respect to dividends and interest by higher bracket taxpayers.

Although critics of withholding have argued that the Internal Revenue Service should be able to enforce the tax on interest and dividends by using the information returns it now receives, it is not hard to see why this is out of the question. The number of information returns for these two items runs into the tens of millions. In many instances, interest and dividend recipients give different names (and, sometimes, different addresses) to corporations, banks, savings and loan associations, and other payor institutions. To collate the information returns by name, and then to match them with the tax returns filed by the recipients, would be a large and expensive undertaking, even with the latest electronic equipment. (Use of different initials, abbreviations, and other minor differences in designation would slow up the matching operation whether it is done by machine or by hand.) Even if this part of the operation were ever completed, it would be extremely costly to follow through individually on the hundreds of thousands of delinquent stockholders and interest recipients with small amounts of tax due. No tax enforcement officer with limited resources at his disposal would allocate the funds necessary to complete such an operation since the funds could be used much more efficiently in other ways.

Since there would be no paperwork, the withholding plan would not impose any burdens on the withholding agent. The amount to be remitted to the Government would be a flat percent of the total dividends or interest paid, and it would not be necessary to reconcile this amount with the total of the amounts withheld. In actual practice, the payor would not be required to make any more computations for each account than he does today; the only difference would be that he would pay dividends and interest to each stockholder and interest recipient at a somewhat lower rate. Thus, for example, assuming a withholding rate of one-sixth, a corporation paying a dividend of $1 per quarter would actually pay out $0.83 to their stockholders; and a bank paying 3-percent interest would actually credit 2.5 percent to their depositors' accounts.

As for the taxpayer, a few simple instructions on the return form would prevent any misunderstanding. Suppose the withholding rate is one-sixth and he receives a total of $260 of interest after withholding. He would report this information approximately as follows on his return:

(1) Enter here the total amount of interest you actually received	$260
(2) Divide the amount in line 1 by 5 and enter the result here (this is the amount of tax that was withheld on your interest)	52
(3) Total interest you received (add lines 1 and 2)	312

To give the taxpayer credit for the amount withheld, there would be a line on page 1 of the tax return instructing him to enter the amount shown in line 2 above. These are very simple procedures indeed, particularly when compared with the very complicated schedules and instructions taxpayers are now required to fill out and read to claim the dividend and retirement income credits.

2. Increased revenues: Since the ordinary enforcement techniques cannot be used to detect the millions of small dividend and interest errors on tax returns, withholding is the only way to recover the bulk of the estimated revenue now lost through underreporting of these items. As previously indicated, the revenue gain would probably amount to $900 million at current income levels. This would be enough to increase the per capita exemption by about $30; or to level out the tax rates at the top of the income scale to a maximum of 50 percent; or to reduce the corporate tax rate by 2 percentage points; or to eliminate the excise taxes on local and long-distance telephone calls and to halve the tax on transportation of persons. In these days of high rates and low exemptions, such revenues can hardly be disregarded.

3. Assistance to taxpayers: It is not easy for most taxpayers to keep track of small amounts of interest and dividends. Depositors in banks and savings and loan associations must make a special trip to the saving institution to have their accounts credited with the proper amounts of interest. Series E bondholders receive their interest

and principal in a lump sum when they cash their bonds, and must make a special effort to determine the amount of interest. Even if interest and dividend recipients make memorandum notes of the amounts received during the year, such notes are frequently lost before the tax return must be prepared. While a withholding system would not eliminate the need for recordkeeping by interest and dividend recipients, it will at least discharge the tax liabilities of most taxpayers. Honest taxpayers will welcome withholding, not only as a convenient device to budget their taxes, but as a method to prevent them from tax delinquency through inadvertence and carelessness.

4. Increased equity and taxpayer morality: Perhaps the most important argument in favor of withholding on interest and dividends is that it would improve the equity of the income tax. Even if most of the interest and dividend errors are due to inadvertence or carelessness, the fact of the matter is that a large number of taxpayers do not pay their full share of the taxload. Wage earners have been paying their taxes at the source for 16 years; in the meantime recipients of other incomes have underreported substantial amounts. Since withholding is practical for interest and dividends, it is unfair to continue to incur large revenue losses from these sources, and it is also wasteful to require the Internal Revenue Service to use its scarce resources to track down the underreporting of these items.

Some people have opposed withholding on the ground that it would reduce saving. The argument implies that savers will be discouraged from saving merely because the Government requires full payment of the tax they owe on their property incomes. Clearly, such an argument can hardly be made the basis for objecting to the improvement of enforcement of present tax rates. If tax rates are too high for incentive or other reasons, they should be reduced for everybody—not only for a minority who are either careless or choose to be dishonest.

B. Disadvantages

1. Overwithholding: By its very nature, a withholding system that applies to all dividends and interest without any allowance for personal exemptions must involve some overwithholding. Whether this is a serious problem is a matter of judgment. During the early days of the wage-withholding system, considerable concern was expressed by some people that wage earners would resent being overwithheld on. In fact, more than 30 million refund checks are mailed each year—yet few complaints have been received by the Internal Revenue Service. Nevertheless, the inequity of withholding on nontaxable dividend and interest recipients will exist and, if it is regarded as intolerable, the only alternatives are to permit nontaxable interest and dividend recipients to file exemption certificates with the withholding agents or to provide for intra-annual refunds.

2. Excessive claims for refunds: It would be possible, under the 1951 plan, for nontaxable individuals to overstate the amounts of interest and dividends they receive. By making such overstatements, they would have automatically refunded to them the amount by which the dividend and interest are grossed up. Obviously, it would be very difficult to check overstatements by a large number of taxpayers if the practice became widespread. Some have argued that, even though excessive claims for refunds might be infrequent when the plan was put into effect, nontaxable individuals would soon learn that it was profitable to overstate their interest and dividends. If this led to overstatement on a wide scale, confidence in the entire tax system would be impaired.

It should be recognized, however, that overstatement of interest and dividends would be a fraudulent act, which is not common among the mass of taxpayers. Excessive refunds can be claimed at the present time by filing several tax returns with different forms W–2 or by forging forms W–2, but cases of outright fraud of this type have been infrequent. While there is some risk, the risk is small and it is more than offset by the advantage of practically full compliance for the great majority of dividend and interest recipients.

3. Unclaimed refunds: Because of the large number of small interest and dividend recipients, some people may not claim the refunds due them, either because they will not be aware that they are entitled to a refund or because the amounts involved will be small. The problem will be most serious with respect to small savings accounts. For example, children often receive no more than $1 or $2 interest on their savings accounts in a full year, and the amounts withheld on such accounts will be a matter of a few cents. Unfortunately, there is no way of avoiding this problem so long as banks and savings and loan associations continue to insist that it would be too costly for them to operate an exemption certificate system. Under the circumstances, the best that can be done is to permit claims for intra-annual refunds along the lines described in section III–E above. In addition, the Internal Revenue Service will have to make special efforts to give widespread publicity to the refund procedures and to encourage payor institutions and newspapers to assist in this educational campaign.

On balance, the advantages of withholding on interest and dividends far outweigh the disadvantages. In a tax system as large as ours, every effort should be made to provide automatic enforcement techniques, not only to keep enforcement costs within reasonable limits but also to make it as easy as possible for taxpayers to comply with the requirements of the tax law.

The same sort of doubts that were expressed about the practicability of withholding on wages and salaries before it was enacted have been expressed about the practicability of withholding on interest and dividends. Since then, however, none but a few malcontents have seriously suggested going back to the old system of tax collection with respect to wages and salaries. Since the revenue loss from interest and dividend underreporting is so large, withholding on these sources of income should be enacted at least for an experimental period. I have little doubt that, once in operation, interest and dividend withholding will be acknowledged to be just as fair and essential a part of the enforcement process as the wage and salary withholding.

Finally, it is important to remember that, although taxpayer morality is generally on a high level in the United States, it would be a mistake to assume it will continue at this level indefinitely if there are obvious inequalities in tax enforcement. Other countries have had great difficulties in raising the revenues they need by allowing enforcement to deteriorate. Taxpayer morality is, therefore, an important asset and it should be encouraged and protected to the greatest degree possible. By removing a serious inequity, adoption of withholding on interest would be a worthwhile investment in this very important national asset.

Mr. PROXMIRE. This article, I think, is one of the most readable and persuasive expositions of the case that I have read. Dr. Pechman has devoted an enormous amount of time to this subject. He has demonstrated his competence in many ways, and I do not think anyone can read his article without being persuaded that the proposal is thoroughly practical as well, of course, as being in the very great interest of the taxpayers and the American people.

I ask unanimous consent that a statement by Professor Holland, which appears on page 765 of the hearings of the Committee on Ways and Means on Tuesday, December 8, 1959, be printed in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF DANIEL M. HOLLAND, ASSOCIATE PROFESSOR OF FINANCE, MASSACHUSETTS INSTITUTE OF TECHNOLOGY

I shall summarize briefly some of the findings presented in the paper I prepared for the Tax Revision Compendium on the Underreporting of Dividends and Interest.

I will, of course, be happy to go into these matters more deeply or take up points not covered in this summary, should you desire, in the course of today's discussion.

For many years now the tax liability associated with wages and salaries received in the normal course of employment has been collected at source, prior to the employee's receipt of such payments, but reporting of and paying the tax liability on other types of income receipts has remained the responsibility of the taxpayer.

Given this dichotomy in administrative practice, the zeal with which taxpayers have assumed their responsibility to report income is more than a piece of information; it is a matter of real concern.

For two such categories of income—dividends and interest—I have attempted to measure over the last 20 years or so, the extent to which dividend receipts and interest receipts did not show up on tax returns.

Very simply, I have compared the total of these income types derivable directly or indirectly from tax returns, with the aggregate amount of dividends and interest receipts of individuals as estimated by the National Income Division of the Office of Business Economics of the Department of Commerce, adjusting these latter data as best I could for comparability with tax law definitions and reporting requirements.

The difference between estimated aggregate personal dividend—or interest—receipts so adjusted, and the total of same derived from tax returns has been taken to be a measure of underreporting.

I call it a gap. But—and this cannot be too strongly emphasized—this gap is not a measure of dishonesty or memory lapse.

True, these enter in, but so do also the dividend and interest receipts of persons not required to report for tax purposes or whose exemptions and deductions exceed their taxable income.

Moreover, we should recognize that some portion of the gap could be a consequence of errors in measurement due to imperfections of the data or the estimator.

Unfortunately, as you will note in what follows, I am in a position to give specific evidence on this latter point. To put it bluntly, I made a mistake, a mistake which caused me to overstate the gap for the last 5 or 6 years particularly, and I welcome this opportunity to rectify it. But more of this in a moment.

With these qualifications in mind, here is a quick summary of my findings, first for dividends, and then for interest.

The National Income Division estimates the dividend component of personal income at $12.5 billion for 1957.

After a number of adjustments—all subtractions from this total primarily to take out the dividend receipts of the institutions treated as persons in the national income accounts and the capital gains dividends paid by investment companies which are reported on tax returns as capital gains, not as dividends—we get a figure of about $11.1

billion as the maximum that we could expect to find on tax returns.

But to the tax returns filed in 1957, we can trace directly or indirectly some $9.8 billion of dividends. The difference between the adjusted NID figure of $11.1 billion and the tax return total of $9.8 billion—i.e., $1.3 billion—we call the dividend gap.

In 1957 the gap of $1.3 billion represented about 11.5 percent of the total that might have been reported.

Let me interrupt the main thread of this summary to point up the mistake I referred to earlier.

You will note, if you compare the results just cited with those on page 1399 of my paper, that the present version of the gap is some $350 million—almost 3 percentage points less on a relative basis—than it appears in the paper. This is because, while preparing the paper, I overlooked the fact that included in the NID dividend estimate were the capital gains dividends of investment companies, which on tax returns are reported as capital gains, not as dividends.

This oversight affects the dividend gap as I initially measured it for all the years covered in my paper, but only for the period 1954 through 1957 is the effect substantial.

I have taken the liberty of appending to this statement revisions of some of the data in my paper. In the main, the conclusions of the paper are unaffected by these corrections.

That the gap was $1.3 billion in 1957 does not mean that taxpayers purposely avoided or forgot to declare $1.3 billion of dividends that they should have. I have estimated—and I consider this a very liberal estimate—that $400 million of dividends went to nontaxable adults and minors. The rest, $900 million or so, remain a complex of evasion, memory lapse, and statistical error.

If we are interested in the revenue loss associated with the failure to report dividends, we should recognize that some dividends not currently reported are uncovered later by audit.

An allowance of $200 million on this score would be generous. This leaves about $700 million increment to tax base, or about $200 million more in tax liability were unwarranted underreporting of dividends to be corrected.

Despite all the uncertainty that characterizes my measure of the gap, there is no reason to think that the sources of statistical error would operate capriciously. That is to say, while we may justifiably feel quite unsure about the accuracy of the level of the gap, we can still accept changes of the gap overtime to be indicative of the true trend in underreporting.

My measurements for the years 1936–57 show that the gap measured as a percentage of that might have been reported was little different in the thirties and fifties.

And this is surprising in view of the income tax conversion over this period from a minority levy to a tax involving most of the population.

Total dividends are much larger now than they were 20 or 25 years ago, so the constancy of the gap in relative terms is associated with a considerably larger amount of unreported dividends currently.

In my judgment, these measures of the gap, imprecise as they may be, warrant the conclusion that dividend underreporting and, of course, the revenue loss associated with it, have not tended to be self-correcting overtime. Dividend underreporting is about as pronounced now on a relative basis as it was 25 years ago, and on an absolute basis it is more serious now.

For interest receipts my summary shall be brief indeed. The conclusions are similar to those for dividends, and the inadequacies of the data and consequent inaccuracies of the estimates make detailed discussion unrewarding.

But the magnitude of the interest gap triumphs over all statistical imprecision. And it is clear that interest underreporting is considerably more serious even though total cash interest receipts of individuals have in recent years run below dividend receipts.

For 1957 I estimated an interest gap derived on a basis similar to that used for dividends of $5.5 billion and estimated also that some $2 billion of this was received by nontaxable individuals.

Hence, about $3.5 billion that should have been reported, wasn't. I repeat, this figure could be off sizably in either direction, but on any basis of estimation the unwarranted underreporting of interest is substantial.

This suggests a revenue loss associated with interest underreporting of about $750 million.

The trends in the interest gap over the last 20 years shown no real fall in relative underreporting and, of course, an absolute increase in the amount of unreported interest.

Despite the wide ranges of error to which our estimates are subject, the following conclusions seem justified:

1. A goodly amount of dividends and an even more substantial amount of unreported interest receipts cannot be explained away. Taxpayers forget to, or purposely fail to, report them.

2. The proportion of such dividends and interest is about as high now as it was 25 years ago; the absolute amount much higher.

3. The revenue loss associated with unwarranted nonreporting of dividends and interest may currently be close to $1 billion.

Thank you.

The CHAIRMAN. Thank you, Mr. Holland.

Without objection, your material as appended to your statement will be included immediately following your statement.

Mr. HOLLAND. Thank you, sir.

REVISIONS OF ESTIMATES IN "UNDERREPORTING OF DIVIDENDS AND INTEREST ON TAX RETURNS," BY DANIEL M. HOLLAND

(Pp. 1397–1438 of Tax Revision Compendium)

1. Table 1, page 1399, add:

Line 10a. Minus capital gains dividends of investment companies ---------- $365, 592

and change the values in succeeding lines as follows:

Line 11---------- $11, 064, 365

Line 12---------- $1, 276, 748

Line 13---------- 11.5

2. Substitute for table 2, page 1403, the following table:

TABLE 2.—*The dividend gap, 1936–57*

Year	Absolute gap (in millions)			Relative gap		
	Variant 1	Variant 2	Variant 3	Variant 1 (percent)	Variant 2 (percent)	Variant 3 (percent)
1936	580	358	------	13.6	8.1	--------
1937	690	448	------	15.3	9.4	--------
1938	381	209	------	12.5	6.9	--------
1939	535	333	------	14.7	9.2	--------
1940	239	75	87	6.2	1.9	2.2
1941	205	−22	−54	4.8	−.5	−1.3
1942	537	263	425	13.1	6.4	10.4
1943	808	523	638	18.9	11.2	14.9
1944	811	538	718	18.2	12.1	16.1
1945	745	525	524	16.7	11.8	11.8
1946	996	665	690	18.2	12.1	12.6
1947	891	575	663	14.5	9.3	10.8
1948	806	442	614	11.8	6.5	9.0
1949	829	406	535	11.8	5.8	7.6
1950	1,106	732	853	12.8	8.5	9.9
1951	991	665	806	11.8	7.9	9.6
1952	993	737	------	12.0	8.9	--------
1953	1,309	979	------	15.3	11.4	--------
1954	1,316	1,299	------	14.8	14.6	--------
1955	1,694	1,650	------	16.8	16.4	--------
1956	1,604	1,576	------	14.9	14.6	--------
1957	1,326	1,277	------	12.0	11.5	--------

Mr. PROXMIRE. Mr. President, I ask unanimous consent that a very abbreviated section-by-section analysis of the bill, but one which I think thoroughly and comprehensively presents the bill item by item, be printed in the RECORD at this point, also.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

SECTION-BY-SECTION ANALYSIS OF PROPOSED AMENDMENT TO WITHHOLD INCOME TAX ON DIVIDENDS AND INTEREST

SECTION 301

The short title of this act is "Interest and Dividends Withholding Tax Act of 1960."

SECTION 302

This section adds a new chapter 7 to the income tax law (subtitle A of the Internal Revenue Code) to provide a system for withholding income taxes on interest and dividends. The new chapter has three subchapters.

Subchapter A—Interest

Sections 1601–1602: Every person, other than an individual, paying interest after December 31, 1960, must withhold a tax equal to 20 percent. Withholding also extends to non-interest-bearing obligations issued at a discount. For such obligations, withholding will equal 20 percent of the amount by which the surrender or redemption price exceeds the issuing price.

The requirements for withholding shall not apply to—

1. Any interest which, irrespective of the person to whom payable, is wholly exempt. (An example is interest on State and local bonds.)

2. Interest paid to the United States, a State, other political subdivision, or wholly owned instrumentality or agency.

3. Interest paid to or by a foreign government, international organization, nonresident alien, or foreign corporation or partnership not engaged in business in the United States.

4. Interest paid by a corporation to an affiliate with which it files a consolidated return.

Subchapter B—Dividends

Sections 1611–1612: Every person paying a dividend after December 31, 1960, shall withhold a tax equal to 20 percent. Included in the requirement for withholding are payments by a stockbroker as a substitute for dividends, and dividends or other payments made by mutual savings banks, savings and loan associations, credit union, etc. (Patronage dividends of cooperative associations are not included.)

The requirements for withholding shall not apply to—

1. Dividends paid in stock or rights of the distributing corporation.

2. Capital gain dividends (except those of regulated investment companies), and dividends with respect to which gain or loss is not recognized as in the case of a liquidation.

3. Certain dividends (which are either exempt or involve various complexities) derived from stock redemptions, corporate reorganizations, etc.

4. Amounts treated as dividends from undistributed taxable income of subchapter S small business corporations.

5. Dividends paid to the United States, a State or other political subdivision, or its wholly owned instrumentality or agency.

6. Dividends paid to a foreign government, international organization, nonresident alien, or foreign corporation or partnership not engaged in business in the United States.

7. Dividends paid by a foreign corporation not engaged in business in the United States.

8. Dividends paid by a Federal Reserve bank, Federal land bank, Federal home loan bank, central bank for cooperative, or the bank for cooperatives.

9. Dividends paid by a corporation to an affiliate with which it files a consolidated return.

Subchapter C—General provisions

Section 1621: Every person (including the proper officer or employee of a governmental payor) required to withhold, shall make a return and pay the tax at such time and for such period, and in such manner as the Treasury by regulation shall prescribe. There is no need to record the names of those on whose behalf taxes are withheld; a withholding agent shall have no liability to such persons for taxes withheld.

Section 1622: Special provision is made for refund or credit for taxes withheld on dividends or interest paid to tax-exempt organizations. The principal credit provision is found in a new section 3505 (discussed below) while section 1622 provides for a refund when the taxes withheld exceed the credit claimed under section 3505 for any calendar quarter. Claims for refund may be filed after the close of the calendar quarter and until March 15 of the fourth year after the close of the particular quarter. The Treasury will pay no interest on refunds (generally) if made by March 16 of the calendar year succeeding the quarter for which the refund is claimed.

Section 1623: Special provision is also made for a refund to certain low-income individuals who receive dividends or interest on which taxes have been withheld. If such an individual certifies to the Treasury that his gross income will not exceed $600 ($1,200 in the case of a person over 65 years of age) for the taxable year, he may secure an immediate refund. Claims for refund may be filed after the close of the calendar quarter and until April 15 of the fourth year after the close of the particular quarter. The Treasury will pay no interest on refunds (generally) if made by April 16 of the calendar year succeeding the quarter for which the refund is claimed.

Section 1624: Regulated investment companies and personal holding companies though required to withhold tax on dividends paid by them, may credit against the sums required to be withheld (but not exceeding 100 percent thereof) all amounts required to be deducted on interest and dividends paid to them.

Section 1625: Unless reasonable cause exists for failure to file any required return, the addition to tax required to be shown on such return shall not be less than $5.

Section 1626: Any tax withheld shall not be allowed as a deduction in computing taxable income for the purpose of any Federal income tax.

Section 1627: The term "person" includes a Government, and its political subdivisions, instrumentalities or agencies. A "nonresident alien individual" includes an alien resident of Puerto Rico.

SECTION 303

Section 39: This is a new section relating to a credit to recipients for tax withheld on interest and dividends. Under Treasury regulations, sums withheld as tax on interest and dividends shall be allowed to the recipient as a credit against income tax for the year of receipt. If the recipient is a partnership or current trust fund, the tax credit is allocated among the partners or participants in the trust fund. A similar allocation is made in the case of estates and trusts for those beneficiaries who are required to include their proportionate share of the interest or dividends in their taxable income. [In lieu of this credit, see the special provisions discussed above (secs. 1622–1624) relating to tax-exempt organizations, certain low-income individuals, regulated investment companies, and personal holding companies, as well as those discussed below (sec. 3505) relating to tax-exempt organizations.]

SECTION 304

Section 3505: This is a new section providing relief for tax-exempt organizations in addition to that provided above in section 1622. Under this new section, tax-exempt organizations, and any other person (including Governments and their agencies or instrumentalities) exempt from income tax who receive interest or dividends on which tax has been withheld, may credit sums withheld against any liability in respect of employment taxes imposed (1) to finance old age benefit payments, or (2) under the requirements for withholding income tax at source on wages. This credit will be allowed only if claim therefor is made at the time of filing quarterly returns.

SECTION 305 (TECHNICAL AMENDMENTS)

Sections 1441(c)(7), 1442: Existing law already seeks to insure payment of taxes owed by nonresident aliens, both individual and corporate, by a system of withholding. The rate of withholding (except as provided by convention) is 30 percent. Sections 1602 and 1612 (discussed above) generally exempt interest and dividends paid to such aliens from the present proposal. However, amendments to sections 1441(c)(7) and 1442 provide that where any person is required to withhold tax under sections 1441 or 1442 and also under this proposed law, he shall, under sections 1441 and 1442, withhold only the amount by which the requirements of sections 1441 and 1442 exceed the requirements of sections 1602 and 1612.

Sections 6014 and 6015: These two sections of existing law relate (1) to persons filing the short form who may elect to have their income taxes computed for them by the Treasury, and (2) to persons who are required to file a declaration of estimated income tax. The specifications with respect to both groups are modified to give recognition in setting dollar limitations or requirements, to the proposed withholding of tax on dividends and interest.

Section 6042: Information returns by corporations with respect to dividends paid to shareholders will no longer be required for shareholders who are paid dividends totaling less than $300 during the taxable year.

Section 6109: Old section 6109 is renumbered 6110 and a new section 6109 is added. The new section requires the Treasury to publish annually statistics on taxes withheld on interest and dividends.

Section 6401(b): This amended section provides that if the amounts allowable as credit for tax withheld on interest and dividends exceed a taxpayer's total income tax, the excess shall be considered an overpayment available for credit against other taxes or refund.

Section 6511(d): The present law limits most claims for refunds to 3 years from the time a return is required to be filed, or 2 years from the time a tax is actually paid, whichever expires later. A proposed amendment establishes a 7-year period of limitations for filing claims not exceeding $2 in the case of individuals receiving dividends or interest on which tax has been withheld, provided such individuals were not required to file an income tax return for the taxable year because their gross income was less than $600 ($1,200 in the case of persons over 65 years of age.)

Section 6513(b): For purposes of computing time limitations on the filing of claims for credit or refund and petitions to the Tax Court, taxes withheld at the source on dividends and interest shall, in respect of the recipient of the income, be deemed to have been paid on the last day prescribed for filing the annual income tax return.

Section 7701(16): Redefinie "withholding agent" to include persons withholding tax on interest and dividends.

The technical amendments made by this act shall apply to taxable years beginning after December 31, 1960.

Mr. PROXMIRE. Mr. President, I ask unanimous consent to have my amendment printed in full at this point in the RECORD.

There being no objection, the amendment intended to be proposed by Mr. Proxmire to the bill (H.R. 12381), was ordered to be printed in the RECORD, as follows: At the end of the bill add the following:

SECTION 1. AMENDMENT OF 1954 CODE.

Whenever an amendment is expressed in terms of an amendment to a section of other provision, the reference shall be considered as to be made to a section or other provision of the Internal Revenue Code of 1954.

SEC. 2. WITHHOLDING OF INCOME TAX ON INTEREST AND DIVIDENDS.

(a) IN GENERAL.—Subtitle A (relating to income taxes) is amended by adding at the end thereof the following new chapter:

"CHAPTER 7—COLLECTION OF INCOME TAX AT SOURCE ON INTEREST AND DIVIDENDS

"SUBCHAPTER A. Interest.
"SUBCHAPTER B. Dividends.
"SUBCHAPTER C. General provisions.

Subchapter A—Interest

"SEC. 1601. Income tax collected at source on interest.
"Sec. 1602. Exemptions.

"SEC. 1601. INCOME TAX COLLECTED AT SOURCE ON INTEREST.

"(a) REQUIREMENT OF WITHHOLDING.—Every person (other than an individual) making payment after December 31, 1960, of interest shall deduct and withhold on such interest a tax equal to 20 percent of the amount thereof. If the withholding agent is unable to determine the person to whom the interest is payable, such tax shall be deducted and withheld at the time payment thereof would be made if such person were known.

"(b) INTEREST DEFINED.—For purposes of this chapter, the term 'interest' means—

"(1) interest within the meaning of section 61(a)(4), and

"(2) in the case of an obligation described in section 454 (a) or (b) (relating to noninterest bearing obligations issued at a discount), the amount by which the amount paid on surrender or redemption of such obligation exceeds the price for which such obligation was issued.

"(c) CREDIT FOR TAX WITHHELD.—

"For credit, against income tax of the recipient of the income, of amounts required to be deducted and withheld under this section, see section 39.

"SEC. 1602. EXEMPTIONS.

"(a) IN GENERAL.—The provisions of section 1601 shall not apply to—

"(1) Any interest which, irrespective of the person to whom payable, is wholly exempt from taxation under chapter 1.

"(2) Interest paid to—

"(A) the United States,

"(B) a State, a possession of the United States, a political subdivision of a State or of a possession of the United States, or the District of Columbia.

"(C) a wholly owned instrumentality or agency of any one or more of the foregoing.

"(3) Interest paid to or by—

"(A) a foreign government,

"(B) a political subdivision of a foreign government,

"(C) an international organization,

"(D) a wholly owned instrumentality or agency of any one or more foreign governments, political subdivisions thereof, or international organizations,

"(E) a foreign corporation not engaged in trade or business within the United States,

"(F) a nonresident alien individual, or

"(G) a partnership not engaged in trade or business within the United States and composed in whole or part of nonresident alien individuals.

"(4) Interest paid by a corporation to another corporation if both corporations are members of the same affiliated group which filed a consolidated return under chapter 6 for the preceding taxable year of the payor corporation.

"(b) IDENTIFICATION OF RECIPIENT.—Paragraphs (2) and (3) of subsection (a) shall apply with respect to any payment of interest only if, at the time of payment, the recipient of such interest has been identified to the withholding agent as a government, organization, or person described in such paragraphs.

"Subchapter B—Dividends

"Sec. 1611. Income tax collected at source on dividends.

"Sec. 1612. Exemptions.

"SEC. 1611. INCOME TAX COLLECTED AT SOURCE ON DIVIDENDS.

"(a) REQUIREMENT OF WITHHOLDING.—Every person making payment after December 31, 1960, of a dividend shall deduct and withhold on such dividend a tax equal to 20 percent of the amount thereof. If the withholding agent is unable to determine the person to whom the dividend is payable, such tax shall be deducted and withheld at the time payment thereof would be made if such person were known.

"(b) DIVIDEND DEFINED.—For purposes of this chapter, the term 'dividend' means—

"(1) any distribution by a corporation which is a dividend (as defined in section 316);

"(2) a payment made by a stockbroker to any person as a substitute for a dividend (as defined in section 316) on which a tax is required to be deducted and withheld under this chapter; and

"(3) a payment (whether or not designated as a dividend) by a mutual savings bank, savings and loan association, building and loan association, cooperative bank, homestead association, credit union, or similar organization, in respect of withdrawable or repurchasable shares, investment certificates, or deposits.

"(c) WITHHOLDING WHERE AMOUNT OF DIVIDEND IS UNKNOWN.—If the withholding agent is unable to determine the portion of a distribution which is a dividend, the tax required to be deducted and withheld under this chapter shall be computed on the entire amount of the distribution.

"(d) CREDIT FOR TAX WITHHELD.—

"For credit, against the income tax of the recipient of the income, of amounts required to be deducted and withheld under this section, see section 39.

"SEC. 1612. EXEMPTIONS.

"(a) IN GENERAL.—The provisions of section 1611 shall not apply to—

"(1) a dividend paid in the stock or rights to acquire the stock of the distributing corporation whether or not the recipient of such stock or rights had an option to be paid in money, or other property, in lieu of such stock or rights;

"(2) distributions (other than capital gain dividends described in section 852(b)(3)(C) to shareholders which are treated under chapter 1 as amounts received on the sale or exchange of property, or distributions with respect to which gain or loss is not recognized under chapter 1 to the shareholders);

"(3) any amount which is includible in gross income as a taxable dividend under the provisions of section 302 or 303 (relating to redemptions of stock), section 354(b) (relating to receipt of property on transfer to corporation controlled by the transferor), section 356 (relating to receipt of additional consideration in connection with certain reorganizations), or section 1081(e)(2) (relating to certain distributions pursuant to order of the Securities and Exchange Commission);

"(4) amounts treated under section 1373 as amounts distributed as dividends;

"(5) dividends paid to—

"(A) the United States,

"(B) a State, a possession of the United States, a political subdivision of a State or of a possession of the United States, or the District of Columbia, or

"(C) a wholly owned instrumentality or agency of any one or more of the foregoing;

"(6) Dividends paid to—

"(A) a foreign government,

"(B) a political subdivision of any foreign government,

"(C) an international organization,

"(D) a wholly owned instrumentality or agency of any one or more foreign governments or political subdivisions thereof, or international organizations,

"(E) a foreign corporation not engaged in trade or business within the United States,

"(F) a nonresident alien individual, or

"(G) a partnership not engaged in trade or business within the United States and composed in whole or part of nonresident alien individuals;

"(7) dividends paid by a foreign corporation not engaged in trade or business within the United States;

"(8) dividends paid by a Federal Reserve bank, Federal land bank, Federal home loan bank, central bank for cooperatives, or bank for cooperatives;

"(9) dividends paid by a corporation to another corporation if both corporations are members of the same affiliated group which filed a consolidated return under chapter 6 for the preceding taxable year of the payor corporation.

"(b) IDENTIFICATION OF RECIPIENT.—Paragraphs (5) and (6) of subsection (a) shall apply with respect to any payment of dividends only if, at the time of payment, the recipient of such dividends has been identified to the withholding agent as a government, organization, or person described in such paragraphs.

"Subchapter C—General provisions

"Sec. 1621. Returns and payment.

"Sec. 1622. Refund or credit of tax to tax-exempt organizations.

"Sec. 1623. Refund of tax to individuals not required to file income tax returns.

"Sec. 1624. Credit for regulated investment companies and personal holding companies.

"Sec. 1625. Failure to file returns.

"Sec. 1626. Nondeductibility of tax in computing taxable income.

"Sec. 1627. Definitions.

"SEC. 1621. RETURNS AND PAYMENT.

"(a) GENERAL RULE.—Every person required under this chapter to deduct and withhold any tax shall make a return of such tax and shall pay such tax, at such time, for such period, and in such manner as the Secretary or his delegate may by regulations prescribe, by making a return of the total amount of interest and the total amount of dividends with respect to which tax is required to be deducted and withheld by such person under this chapter for such period and paying a tax, for which such person shall be liable, in an amount equal to 20 percent of each such total.

"(b) GOVERNMENTAL PAYOR.—If the person referred to in subsection (a) is the United States, a State or political subdivision thereof, a possession of the United States or political subdivision thereof, or the District of Columbia, or any agency or instrumentality of any one or more of the foregoing, the return and payment required by subsection (a) shall be made by any officer or employer of the United States, or of such State or political subdivision, of such possession or political subdivision, of the District of Columbia, or of such agency or instrumentality, as the case may be, having control of the payment of the interest or dividend, or appropriately designated for that purpose.

"(c) ADJUSTMENT OF TAX.—If more or less than the correct amount of tax due for any period under subsection (a) is paid with respect to such period, proper adjustments with respect to the tax shall be made, without interest, in such manner and at such times as may be prescribed by regulations made under this chapter.

"(d) INDEMNIFICATION OF WITHHOLDING AGENT.—A withholding agent shall not be liable, except as provided in subsection (a), to any person for the amount of any tax required to be deducted and withheld under this chapter.

"SEC. 1622. REFUND OR CREDIT OF TAX TO TAX-EXEMPT ORGANIZATIONS.

"In the case of a person which is exempt from the tax imposed by chapter 1, if the amount required to be deducted and withheld as tax under this chapter with respect to interest and dividends received by it during any calendar quarter exceeds the credit claimed by and allowed to such person under section 3505 (relating to credit against employment taxes) for such quarter, the excess shall be immediately refunded or credit to such person as an overpayment of the tax imposed by this chapter, but only if claim therefor is filed (or, if no claim is filed, if credit or refund is made) after the close of such calendar quarter and on or before March 15 of the fourth calendar year beginning after the close of such calendar quarter. No interest shall be allowed or paid with respect to any such refund or credit for any period before the date on which claim for such refund or credit is filed or before March 16 of the calendar year succeeding the close of the calendar quarter in respect of which such refund or credit is claimed, whichever date is the later.

"SEC. 1623. REFUND OF TAX TO INDIVIDUALS NOT REQUIRED TO FILE INCOME TAX RETURNS.

"In the case of an individual who certifies (in such form and manner as the Secretary or his delegate prescribes by regulations) with respect to interest and dividends received by him during any calendar quarter that he reasonably believes (at the time of such certification) that—

"(1) he will not, for the taxable year of which such calendar quarter is a part, have a gross income of $600 or more, or

"(2) in the case of an individual who has or will attain the age of 65 before the close of such taxable year, he will not, for such taxable year, have a gross income of $1,200 or more,

the amount required to be deducted and withheld as tax under this chapter with respect to interest and dividends received by him during such calendar quarter shall be immediately refunded to him as an overpayment of the tax imposed by this chapter, but only if claim therefor is filed (or, if no claim is filed, if refund is made) after the close of such calendar quarter and on or before April 15 of the fourth calendar year beginning after the close of such calendar quarter. No interest shall be allowed or paid with respect to any such refund for any period before the date on which claim for such refund is filed or before April 16 of the calendar year succeeding the close of the calendar quarter in respect of which such refund is claimed, whichever date is the later.

"SEC. 1624. CREDIT FOR REGULATED INVESTMENT COMPANIES AND PERSONAL HOLDING COMPANIES

"In the case of any withholding agent which is a regulated investment company

(as defined in section 851) or a personal holding company (as defined in section 542), the amount required to be deducted and withheld as tax under this chapter with respect to interest and dividends received by it during a taxable year shall be allowed, under regulations prescribed by the Secretary or his delegate, as a credit against (but not in excess of) the tax for which such withholding agent is liable under section 1621(a) in respect of dividends paid by it during such year. For purposes of this section, a dividend shall be considered as having been paid within a taxable year—

"(1) in the case of a regulated investment company, if treated as paid during such taxable year under section 855(a), or

"(2) in the case of a personal holding company, to the extent elected under section 563(b), in determining the dividends paid deduction for purposes of the personal holding company tax, in the return for such year.

"SEC. 1625. FAILURE TO FILE RETURNS.

"In case of a failure to make and file any return required under this chapter within the time prescribed by law or prescribed by the Secretary or his delegate in pursuance of law, unless it is shown that such failure is due to reasonable cause and not to willful neglect, the addition to the tax or taxes required to be shown on such return shall not be less than $5.

"SEC. 1626. NONDEDUCTIBILITY OF TAX IN COMPUTING TAXABLE INCOME.

"Any tax deducted and withheld under this chapter shall not be allowed as a deduction in computing taxable income for the purpose of any tax on income imposed by Act of Congress.

"SEC. 1627. DEFINITIONS.

"For purposes of this chapter—

"(1) PERSON.—The term 'person' includes a government, a political subdivision of a government, and an instrumentality or agency of one or more governments or political subdivisions thereof.

"(2) NONRESIDENT ALIEN.—The term 'nonresident alien individual' includes an alien resident of Puerto Rico."

(b) TABLE OF CHAPTERS.—The table of chapters for subtitle A is amended by adding at the end thereof:

"CHAPTER 7. Collection of income tax at source on interest and dividends."

SEC. 2. CREDITS AGAINST INCOME TAX FOR TAX WITHHELD.

(a) ALLOWANCE OF CREDIT.—Part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits against tax) is amended by adding at the end thereof the following new section:

"SEC. 39. CREDIT FOR TAX WITHHELD ON INTEREST AND DIVIDENDS.

"(a) GENERAL RULE.—Under regulations prescribed by the Secretary or his delegate, the amount required to be deducted and withheld under section 1601 as tax on interest and under section 1611 as tax on dividends shall be allowed to the recipient of the income as a credit against the tax imposed by this subtitle for the taxable year in which the interest or dividend is received or accrued.

"(b) PARTNERSHIPS, TRUSTS, AND ESTATES.—If the recipient of the interest or dividend is a partnership or a common trust fund, then the credit provided by subsection (a) shall not be allowed to such recipient, but the members of the partnership, or the participants in the common trust fund, as the case may be, shall be allowed their proportionate share of such credit. If the recipient is an estate or trust, and if any legatee, heir, or beneficiary subject to the tax imposed by this chapter is required to include a portion of such interest or dividend in computing his taxable income, such legatee, heir, or beneficiary shall be allowed such portion of the credit as is properly allocable to him on the basis of the income allocable to him under subchapter J (sec. 641 and following, relating to estates, trusts, beneficiaries, and decedents) for the taxable year of the estate or trust, and such portion of the credit shall not be allowed to the estate or trust.

"(c) REGULATED INVESTMENT COMPANIES AND PERSONAL HOLDING COMPANIES.—In the case of a regulated investment company or a personal holding company, the credit provided by subsection (a) shall be reduced by the amount of credit allowed such company under section 1624.

"(d) TAX-EXEMPT ORGANIZATIONS, ETC.—

"(1) IN GENERAL.—The credit provided by subsection (a) shall not be allowed—

"(A) to any recipient which is exempt from the tax imposed by chapter 1; or

"(B) to an individual, with respect to interest and dividends received during any calendar quarter for which he has made a certification under section 1623.

"(2) CROSS REFERENCES.—

"(A) For refund or credit under chapter 7 in case of a recipient which is exempt from income tax, see section 1622.

"(B) For refund under chapter 7 in case of an individual who is not required to file an income tax return, see section 1623."

(b) TABLE OF SECTIONS.—The table of sections for such part IV is amended by adding at the end thereof the following:

"Sec. 39. Credit for tax withheld on interest and dividends."

SEC. 3. CREDIT FOR TAX-EXEMPT ORGANIZATIONS

(a) ALLOWANCE OF CREDIT.—Chapter 25 (relating to general provisions relating to employment taxes) is amended by adding at the end thereof the following new section:

"SEC. 3505. SPECIAL CREDIT IN CASE OF ORGANIZATION EXEMPT FROM INCOME TAX.

"(a) GENERAL RULE.—In the case of any person (including any government or political subdivision, agency, or instrumentality thereof) which is exempt from the tax imposed by chapter 1, the amount required to be deducted and withheld as tax under chapter 7 with respect to interest and dividends received by it during any calendar quarter shall be allowed, under regulations prescribed by the Secretary or his delegate, as a credit against (but not in excess of the amount shown on the return of such person as its liability (after the adjustments, if any, provided for in sections 6205(a) and 6413(a)) for such quarter in respect of the taxes imposed by chapter 21 (Federal Insurance Contributions Act) and by chapter 24 (collection of income tax at source on wages). Such credit shall be allowed only if claim therefor is made, in accordance with such regulations, at the time of the filing of the return with respect to the taxes under chapter 21 and chapter 24 for such quarter.

"(b) CROSS-REFERENCE—

"For refund under chapter 7, see section 1622."

(b) TABLE OF SECTIONS.—The table of sections for chapter 25 is amended by adding at the end thereof the following:

"Sec. 3505. Special credit in case of organizations exempt from tax."

SEC. 4. TECHNICAL AMENDMENTS.

(a) WITHHOLDING OF TAX ON NONRESIDENT ALIEN INDIVIDUALS.—Section 1441(c) (relating to exceptions to the withholding of tax on nonresident alien individuals), is amended by adding at the end thereof the following new paragraph:

"(7) INTEREST AND DIVIDENDS ON WHICH TAX IS WITHHELD UNDER CHAPTER 7.—Where any person is required to deduct and withhold a tax under subsection (a) on an amount on which a tax required to be deducted and withheld under chapter 7, such person shall deduct and withhold under subsection (a) only the excess of—

"(A) the amount which would be required to be deducted and withheld under subsection (a) but for the application of chapter 7, over

"(B) the amount required to be deducted and withheld under chapter 7."

(b) WITHHOLDING OF TAX ON FOREIGN CORPORATIONS.—Section 1442 (relating to withholding of tax on foreign corporations) is amended by striking out the period at the end thereof and inserting in lieu thereof a comma and the following: "and except that where any person is required under this section to deduct and withhold a tax on an amount on which a tax is required to be deducted and withheld under chapter 7, such person shall deduct and withhold only the excess of—

"(1) the amount which would be required to be deducted and withheld under this section but for the application of chapter 7, over

"(2) the amount required to be deducted and withheld under chapter 7."

(c) TAX COMPUTED BY SECRETARY OR HIS DELEGATE.—Section 6014 (relating to income tax not computed by the taxpayer) is amended—

(1) by striking out in subsection (a) "and whose gross income other than wages, as defined in section 3401(a), does not exceed $100," and by inserting in lieu thereof "and whose gross income (other than wages, as defined in section 3401(a), and other than interest and dividends on which tax is required to be deducted and withheld under chapter 7) does not exceed $100,"; and

(2) by inserting after "other than wages on which the tax has been withheld at the source" in subsection (b) the following: "and other than interest and dividends on which tax is required to be deducted and withheld under chapter 7".

(d) DECLARATION OF ESTIMATED INCOME TAX BY INDIVIDUALS.—Section 6015(a) (relating to declaration of estimated income tax by individuals) is amended—

(1) by striking out so much of paragraph (1) thereof as precedes subparagraph (A) and inserting in lieu thereof the following:

"(1) the gross income for the taxable year can reasonably be expected to consist of wages (as defined in section 3401(a)), and interest (as defined in section 101(b)) and dividends (as defined in section 1611(b)) on which tax is required to be deducted and withheld under chapter 7, and of not more than $100 from sources other than such wages, interest, and dividends, and can reasonably be expected to exceed—"; and

(2) by striking out so much of paragraph (2) thereof as precedes subparagraph (A) and inserting in lieu thereof the following:

"(2) the gross income can reasonably be expected to include more than $100 from sources other than wages (as defined in section 3401(a)) and other than interest (as defined in section 1601(b)) and dividends (as defined in section 1611(b)) on which a tax is required to be deducted and withheld under chapter 7, and can reasonably be expected to exceed the sum of—".

(e) INFORMATION BY CORPORATIONS.—Section 6042 (1) (relating to returns regarding corporate dividends, etc.) is amended by adding at the end thereof the following: ", except that if the amount of dividends paid to any shareholder during a calendar year is

less than $300 and tax is required to be deducted and withheld under chapter 7 on the entire amount of such dividends, no such return shall be required with respect to such shareholder for such calendar year".

(f) PUBLICATION OF STATISTICS ON TAX WITHHELD.—

(1) REQUIREMENT OF PUBLICATIONS.—Subchapter B of chapter 61 (relating to miscellaneous provisions relating to information and returns) is amended by renumbering section 6109 as 6110, and by inserting after section 6108 the following new section:

"SEC. 6109. PUBLICATION OF STATISTICS ON TAX WITHHELD ON INTEREST AND DIVIDENDS.

"The Secretary or his delegate shall prepare and publish annually statistics reasonably available with respect to the operation of chapter 7 (relating to collection of income tax at source on interest and dividends), including the amount of tax withheld on interest under section 1601 and the total amount of interest paid on which tax was withheld, the amount of tax withheld on dividends under section 1611 and the total amount of dividends paid on which tax was withheld, and any other facts deemed pertinent and valuable."

(2) TABLE OF CONTENTS.—The table of contents for such subchapter is amended by striking out

"Sec. 6109. Cross references."

and inserting in lieu thereof

"Sec. 6109. Publication of statistics on tax withheld on interest and dividends.

"Sec. 6110. Cross references."

"(b) EXCESSIVE WITHHOLDING.—If the amounts allowable as credits under section 31 (relating to credit for tax withheld at source under chapter 24) and section 39 (relating to credit for tax withheld on interest and dividends under chapter 7) exceed the taxes imposed by chapter 1 against which such credits are allowable, the amount of such excess shall be considered an overpayment."

(g) EXCESSIVE WITHHOLDING.—Section 6401(b) (relating to excessive withholding) is amended to read as follows:

(h) SPECIAL PERIOD OF LIMITATIONS FOR SMALL REFUNDS ON TAX WITHHELD AT SOURCE.—Section 6511(d) (relating to special rules for limitations on allowance of credits and refunds) is amended by adding at the end thereof the following new paragraph:

"(4) SPECIAL ROLES RELATING TO TAX ON INTEREST AND DIVIDENDS WITHHELD AT SOURCE.—In the case of an individual filing a claim for credit or refund of an overpayment for a taxable year for which he was not required under section 6012(a) to make a return, to the extent that the overpayment is attributable to the credit allowed under section 39 for tax required to be deducted and withheld under chapter 7 (relating to tax withheld at source on interest and dividends), in lieu of the 3-year period of limitation prescribed in subsection (a), the period shall be 7 years from the date prescribed by law for filing a return for the taxable year with respect to which the claim is made. In the case of such a claim, the amount of credit or refund may exceed the portion of the tax paid within the period provided in subsection (b)(2), to the extent of the amount of the overpayment attributable to such credit allowed under section 39, or to the extent of $2, whichever is the lesser."

(i) PRESUMPTIONS AS TO DATE OF PAYMENT.—Section 6513(b) (relating to time tax considered to be paid) is amended by adding at the end thereof the following new sentence: "For purposes of section 6511 or 6512, any tax required to be deducted and withheld at source during any taxable year of the recipient under chapter 7, shall, in respect of the recipient of the income, be deemed to have been paid by him on the last day prescribed for filing the return under section 6012 for such taxable year (determined without regard to any extension of time for filing such return)."

(j) DEFINITION OF WITHHOLDING AGENT.—Section 7701(a)(16) (defining the term "withholding agent") is amended by striking out "or 1461" and inserting in lieu thereof "1461, 1601, or 1611".

(k) EFFECTIVE DATE.—The amendments made by subsections (a) and (b) shall apply to taxable years beginning after December 31, 1960.

Mr. PROXMIRE. Mr. President, I conclude by making this very general statement. As I understand, the Senator from Minnesota [Mr. MCCARTHY] has indicated his intention to propose an amendment that would knock out the dividend credit provision in the present law and, according to his estimate, raise around $350 million.

The proposal I have made would raise, in my judgment, much more than $1 billion, and I think we could establish conservatively that this would do so on the basis of the most competent and careful estimate on the part of people who are recognized authorities in the field.

I understand that the Senator from Illinois [Mr. DOUGLAS] intends to propose another revenue-raising loophole-plugging amendment, and the Senator from Pennsylvania [Mr. CLARK] will also offer an additional amendment. It seems to me that all the amendments together will give the Senate an opportunity to show its fiscal responsibility, and show it in at least two ways.

It has been reiterated over and over again, and it should be reiterated, that this is a period of relative prosperity, a period in which we should have a balanced budget and should attempt to retire as much of the national debt as we possibly can. At the same time I am not one of those who agree to the continuation of regressive sales taxes on the American people when people are simply not paying their income taxes on the dividends and interest they receive. Nor shall I agree to a continuation of a sales tax on people who ride in trains or who have telephones which they need in order to protect themselves and their families in the event of illness, a tax which is also regressive, while we continue great handouts to the oil industry through the notorious oil depletion allowance.

I cannot see in good conscience any reason on the face of the earth why we should go along with some of these other regressive sales taxes when we have the expense account racket, which is well known throughout America by anyone who has had any contact or association with business, an evasion of taxes that is notorious.

It seems to me that the fight that the Senator from Illinois [Mr. DOUGLAS], the Senator from Minnesota [Mr. MCCARTHY], and the Senator from Pennsylvania [Mr. CLARK] are making on this matter is a fight not only for fiscal responsibility, but for morality, and I feel strongly that we are entirely correct in voting in favor of the amendments. We could achieve a more equitable tax structure by not only attempting to plug these loopholes, but also attempting to repeal the repressive taxes imposed upon those least able to pay.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. DOUGLAS in the chair). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SMATHERS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. PROXMIRE in the chair). Without objection, it is so ordered.

TAX REFORM

Mr. DOUGLAS. Mr. President, we have had a very constructive discussion today of the various loopholes within the present revenue structure, and while the attendance of Senators has at times been scanty, a very full record has been made, and in the speeches of the Senator from Tennessee [Mr. GORE] and the Senator from Wisconsin [Mr. PROXMIRE], very startling facts have been developed.

A revision of our tax system is long overdue, because billions of dollars of revenue are now being lost by exceptions and exemptions made for specific classes of incomes. These loopholes, as has been developed, have been steadily widening through the years. If continued, the whole revenue structure will break down.

This Republic of ours, in its revenue features, is going very much the way of the Roman Republic, because under the Roman Republic the tax collectors for the districts were given a tax quota, and then were allowed to pocket everything they had collected in excess of that quota. This enriched the collectors, but it impoverished the taxpayers. The injustices which were brought about under this system contributed greatly to the social turmoil under the Republic and later under the Empire.

The historians of that period ascribe as one of the reasons for the general demoralization of Roman life which set in the fact that people with equal incomes were paying grossly unequal taxes, and that the tax collectors were obtaining excessive sums.

THE PROGRESSIVE FEDERAL TAX SYSTEM

The breakdown of our system takes a somewhat different form. We imposed a tax law which was originally intended to be fair and was based upon the principle of ability to pay. This progressive Federal law was intended to offset the regressive nature of State and local taxes. This should be borne in mind. I believe that the purpose of the original tax laws, using the income tax and the corporation tax as the main sources of revenue, was proper and wise.

TAX EVASION AND AVOIDANCE

Almost immediately the special interests began to work for ways in which these laws could be avoided and evaded. The result now is gross inequality as between individuals. The conscientious individual will pay a high percentage of his income in taxes. The sharp operator, with skilled tax lawyers, can take advantage of what are termed loopholes. The result is gross inequality, with some people paying too much and others paying much too little. A festering sense of injustice pervades the entire community, with each exemption giving rise to added claims for exemption and evasion.

DEPLETION ALLOWANCES

The facts which the Senator from Tennessee [Mr. GORE] brought out must have startled those who were not aware of how the depletion allowance had spread. It was originally intended as a stimulus to exploration and discovery of minerals, and was originally designed primarily for gas and oil. Then it was extended to almost the complete gamut of articles contained within the earth. I remember being in the Senate in 1951, when it was extended to oyster shells and clam shells and sand and gravel. The prospect of dry holes in these cases certainly is not very great. The possibility of losses due to inability to find minerals is relatively small; yet virtually everything contained within the earth now has a depletion allowance attached to it. Very few people realize that this is being extended to cover not merely clay, not merely salt, not merely gas and oil, but the products which are fabricated from these raw materials.

This is an example of how an infection, once started, spreads rapidly through the whole financial structure, and undermines the whole revenue system.

In individual views which I submitted to the Technical Amendments Act of 1958, and which are printed on pages 255 to 266, I outlined some of the weaknesses in the revenue system as I saw them at that time. I ask unanimous consent that these sections be printed in the RECORD at this point in my remarks, with permission that certain corrections may be made in the table contained on page 259 of the original document.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

INDIVIDUAL VIEWS OF SENATOR PAUL H. DOUGLAS

As this bill came from the House, it was, on balance, a reasonably good bill. But, even as it came from the House, at best it dealt with comparatively minor abuses and, for the most part, closed relatively insignificant loopholes. It pointedly ignored the many shocking injustices within our tax structure which permit certain favored taxpayers to pay a much lower tax on a given amount of income than that which other taxpayers pay on equal incomes from other sources. These unjust tax differentials in the aggregate cost the Government several billion dollars a year in revenue. They have increased over the years so that the tax structure of the country is now seriously eroded.

Among the most serious of these inequities and evasions are the following:

(1) Excessive depletion allowances in oil and gas and certain other subsurface deposits;

(2) The dividends-credit monstrosity, including the exclusion from gross income of the first $50 of dividends received and a deduction of 4 percent of the remaining dividends received, not against taxable income but against the actual tax liability itself;

(3) The fact that, while the basic income tax of 20 percent on wages and salaries is withheld at the source, withholding upon dividends and interest received is not required;

(4) Abuses in the conversion of ordinary income into capital gains;

(5) Abuses in the area of family partnerships;

(6) Abuses in the taxation of corporate "spin-offs" and "split-offs";

(7) Abuses in the field of stock options and other fringe benefits for executive and other employees;

(8) Abuse of the "ordinary and necessary" business expenses deduction;

(9) Excessive benefits to upper income groups from income splitting on a joint return.

Unless Congress cures these and other erosions and injustices, they will continue to spread like a cancer through our tax system. For when some are given favored treatment, others chafe at the additional burdens imposed upon them and demand similar exemptions. Loopholes widen into huge apertures; a breed of skilled tax lawyers develops, skilled in helping wealthy clients avoid taxes in return for big fees. The general taxpayer, too public spirited or too uninformed to obtain similar tax favors, is left bearing the burdens. Democratic government is itself weakened by the unfairness of the whole setup. Just as injustices in the collection of taxes helped to undermine the Roman republic and the ancient regime in France, so similar practices serve to breed discontent here at home and undermine men's faith in their government.

It is important, therefore, that we not only stop further erosion of the tax structure but that we begin to undo some of the damage already done. It would be plainly impossible to cure all of the defects at once. There is not time enough in this session for that. Nor is public and legislative opinion sufficiently informed and aroused. But a start can and should be made.

I therefore proposed in committee that we deal with three of the most important abuses, namely, the excessive depletion allowances on oil and gas; the failure to provide a withholding tax at the source on dividends; and the 4-percent dividends received credit against tax and the $50 dividends received exclusion from gross income.

These are the reasons in brief why these features of our present tax laws should be changed. A more detailed discussion will be given when these issues are discussed on the floor.

I

The most conspicuous of these abuses is the 27½-percent depletion allowance on income from oil and gas. Under the present law, a host of costs and special allowances are deductible from gross income before even the depletion allowance applies. These are:

(1) Operating costs.

(2) Intangible drilling and development costs. These can be written off in 1 year and not spread over a period of years as is the case in other industries. It has been estimated that between 75 percent and 90 percent of all costs can be written off in 1 year in this manner. We have, therefore, accorded to this industry virtually the ultimate in accelerated depreciation and fast tax writeoffs.

(3) Unsuccessful or dry holes, of course, can be written off.

(4) The 14-point reduction in the tax itself—or a reduction from 52 percent to 38 percent on taxable income—for income derived from operations abroad in the Western Hemisphere.

(5) Royalty payments abroad, particularly in the Near East, may be disguised as income-tax payments for which the foreign tax credit is then available so that a company then escapes liability for U.S. tax by being allowed to take a tax credit for payment which a domestic taxpayer would be permitted only to deduct from gross income rather than to take as a credit against tax.

But, in addition to all these provisions which would seem to be quite generous, a further allowance is permitted called the percentage depletion allowance. In the case of gas and oil, this amounts to an additional 27½ percent of gross income up to one-half of net income. This allowance is, moreover, permitted in perpetuity as long as there is any flow of oil or gas from the well. It is not limited to recapturing the cost of the well in question, most of which cost—as we have seen—is recovered for tax purposes in the year the outlay is made through the intangible drilling and development cost deduction. This allowance is in addition to all other deductions and it continues through time without relationship to the taxpayer's investment in the venture and whether or not that investment has been recovered for tax purposes.

The beginnings of this allowance go back a little over 30 years when an effort was made to revise the prevailing discovery depletion provisions. From its inception, the percentage depletion allowance has been 27½ percent. As corporation income taxes have risen from 14 percent to the present 52 percent, the value of this allowance has grown. Not only is this true but it has brought in its train a host of similar deductions on virtually everything else that is extracted from the earth and sea, including oystershells, clamshells, sand and gravel. There would seem to be no danger of "dry holes" here. It is almost a perfect example of a case where instead of closing a loophole in the law, an attempt has been made to make the loophole universal.

These deductions for depletion allowances in the extractive industries were $2.8 billion in 1955, the latest year for which official figures are available. For oil and gas alone, the deductions came to over $2 billion in that year.

The results of investigations which appear in the compendium on Federal tax policy, published by the Joint Economic Committee in 1955 (see p. 902), show that in 1954, the effective tax rate paid by one major oil company was only 9.2 percent. For another company, the rate was 16.3 percent, while another paid only 18.5 percent. The effective tax rate paid by 24 large petroleum companies was only 22.6 percent, while all other corporations in that year paid taxes at an effective rate of 48.1 percent. A study which I have made of 27 producing companies dealing in oil and/or gas shows that many paid infinitesimal fractions of their profits in taxes.

In 1951, the Secretary of the Treasury published official statistics on certain unidentified individuals in the oil and gas industry which showed that one individual operator, with net income in the years 1943–47 of $14.3 million, paid income taxes of only $80,000 in this period. The following table

submitted by the Secretary of the Treasury in the House hearings on the Revenue Act of 1950 gives examples of the excessive income tax deductions from the depletion allowance and the allowance for drilling and development costs:

TABLE 9.—*Income, deductions, and tax liabilities of 10 selected individual oil and gas operators, for the 5-year period 1943–47*

[Money figures in millions]

Individual operator	Net income			Special deductions		Taxable net income	Income tax liability	
	From oil and gas [1]	From other sources	Total	Percentage depletion [2]	Development costs [3]		Amount	Percent of total net income
A	$10.5	$3.8	$14.3	2.2	$13.0	[4] −$0.9	$0.08	0.6
B	5.0	.8	5.8	3.1	2.1	.6	.5	8.6
C	3.9	.5	4.4	3.2	4.4	[4] −3.2	.15	3.4
D [5]	9.3	.3	9.6	2.7	0	6.9	6.1	63.5
E	2.7	.8	3.5	1.0	.3	2.2	1.4	40.0
F	1.7	1.4	3.1	.8	1.5	.8	.6	19.4
G	7.7	−1.3	6.4	3.5	2.1	.8	.5	7.8
H	2.1	3.6	5.7	1.0	.6	4.1	2.2	38.6
I	1.7	.1	1.8	.5	1.0	.3	.2	11.1
J	8.0	−.7	7.3	2.9	1.7	2.7	2.2	30.1
Total	52.6	9.3	61.9	20.9	26.7	14.3	13.93	22.5

[1] Income after deductions for operating expenses, depreciation, adjusted-basis depletion, exploration costs and losses on abandonment.
[2] Excess of percentage depletion over adjusted-basis depletion.
[3] Development costs are expenditures for the preparation of mineral properties for production, which are deducted as expenses in the year incurred. Consequently, these expenditures are not included in the tax basis of the property and future cost or adjusted-basis depletion is correspondingly reduced. The treatment of development costs as a current expense, however, does not diminish percentage depletion in subsequent years, since the latter is determined on the basis of income in those years.
[4] While special deductions more than offset the total net income for the 5 years, some income tax was paid because there were deficits only in some years. A deficit caused by excess percentage depletion cannot be carried over against net taxable income of other years.
[5] Includes only 4 years, 1943–46.

Source: Bureau of Internal Revenue, special tabulation.

While no such statistics have been published by the Treasury in recent years, there is no reason to suppose that the facts are any different or any better now.

The justification given for such a high deduction is that it is a needed inducement for exploration and drilling. There is something to this contention but not enough to justify the added allowance of 27½ percent of gross revenue. In the first place, the other tax features provided for the industry—as we have seen—are extremely liberal and, in addition to this, the capital gains treatment, which I have not gone into, gives even further advantages.

I have, therefore, proposed an amendment which would reduce the depletion allowance of 27½ percent to 15 percent if the taxpayer's gross income from oil and gas wells exceeds $5 million in any 1 year, but that the allowance be reduced only from 27½ percent to 22 percent for those with a gross income from oil and gas wells of between $1 million and $5 million, and that the depletion allowance remain at 27½ percent for those whose gross income from oil and gas wells does not exceed $1 million per year.

This amendment is not a punitive one for (1) it does not do away with the depletion allowance altogether, and (2) it would not affect the small wildcat driller or the small producer.

There is a good reason for this last provision. Drilling for oil and gas involves some risk. It is estimated that only about 1 in 9 wells which are drilled actually produce gas or oil. The small driller, with only a few wells over which to spread this risk, does not have enough wells to assure that he will hit the 1 in 9 and may, in fact, drill 20 or 30 dry holes before hitting oil or gas. Consequently, without a great number of wells over which to spread the risk, he takes a greater risk than the large driller, who will average 1 in 9 successful wells if he drills 100 or 200 wells per year. It is only proper that this fact be recognized in the law. This is precisely what my amendment is intended to accomplish.

The Treasury estimates that the adoption of this amendment would result in a net revenue increase to the Federal Treasury of $305 million to $310 million per year at the present time. Others have estimated that it would bring in as much as $400 million to $500 million additional revenue per year.

II. THE DIVIDENDS RECEIVED CREDIT AND EXCLUSION

It is estimated that the provisions of the 1954 Tax Code which grant the 4 percent dividend received credit and $50 exclusion from gross income cost the Treasury about $360 million per year. The provisions give a special tax credit and exclusion for income from dividends. The result is that an individual taxpayer pays a lower tax on a given amount of income than he pays on an equal amount of wages or salaries.

These credits and exclusions go to a very few people. According to Statistics of Income for 1955, only 2.2 percent of all the returns which were filed contained 75 percent of all the reported dividends. In addition, the bulk of the dollar amounts of the dividends were received by a relatively small proportion of those who received any dividends at all. Thus, in 1955, only 28 percent of the very small number of returns which reported any dividends at all included 75 percent of the total amounts of the dividends received.

The difference in tax treatment may be seen from an example of a married individual with 2 children who has a yearly earned income of $10,000 and a similar individual who has $10,000 in income entirely from dividends. Their tax liabilities would differ by $280.40 per year as follows:

Married taxpayer with 2 children and income of $10,000 per year

Joint return of taxpayer A—All income from wages and salary:	
Income	$10,000
Less 10 percent standard deduction	1,000
Income after deduction	9,000
Less personal exemptions	2,400
Taxable income	6,600
Tax owed	1,372

Joint return of taxpayer B—All income from dividends: [1]	
Income from dividends	$10,000.00
Less dividend exclusion	100.00
Income after dividend exclusion	9,900.00
Less 10 percent standard deduction	990.00
Income after dividend exclusion and the 10 percent standard deduction	8,910.00
Less personal exemptions	2,400.00
Taxable income	6,510.00
Tax liability before credit	1,352.00
Less 4 percent of $9,900 credit against taxes	260.40
Tax owed	1,091.60

[1] Stocks on which dividends paid owned jointly by husband and wife.

NOTE.—With the same income, taxpayer A pays $1,372 in taxes while taxpayer B with all income from dividends, pays only $956, a tax savings of $416 or 30.3 percent.

III. WITHHOLDING OF DIVIDENDS AT THE SOURCE

Virtually every study made of individual income reporting for the Federal income tax shows a significant gap between the amount of dividends which should be reported and the amount actually reported on individual income tax returns. In a paper presented before the American Finance Association at the end of 1957, Daniel Holland estimated this dividend gap for the taxable year 1955 to be about $1,235 million, or about 12.1 percent of total dividend receipts, adjusted for comparability with tax returns. Even if one assumes that 20 percent of this "gap"—about $250 million—were the dividends received by individuals not required to file income tax returns and/or by individuals required to file returns but not taxable, there remains about $1 billion of dividends which should have appeared, but did not, to taxable individual returns in 1955. If the effective rate were only 20 percent in the case of these dividends—and there is every reason to believe that it would be higher—the revenue loss in 1955 amounted to $200 million to the Treasury. It is conceivable that the revenue loss could be as much as $300 million.

I have therefore submitted an amendment which, while recognizing some of the administrative problems, would withhold the basic tax on dividends at the source, as is now done for personal income.

Such a system of withholding on dividend income would contribute materially to improving compliance with the law. From the point of view of the taxpayer who is not a deliberate evader of the law, dividends withholding has the positive virtue of assisting him to be as honest as he would wish to be. From the point of view of the deliberate tax evader, withholding—by reducing the rewards of dishonesty—might well produce a net gain in revenues above those from the withholding itself, as he is often in a bracket higher than the basic or minimum bracket and the Government would recoup not only the amount withheld but the additional taxes which would not otherwise be paid.

IV. HOW THE SAVINGS COULD BE USED

These three amendments, if passed, could result in a savings to the Treasury of almost $1 billion per year. How should this $1 billion be used?

Personally, I have always felt that our tax laws should provide that taxpayers with a specific amount of income should pay essentially the same tax as any other taxpayer with the same income, no matter from what source. If this were done, it would be possible for us to lower rates across the board and not only give some tax savings to low-income groups, but also to reduce the extremely high surtax rates which very few taxpayers—even with great amounts of income—actually pay but which a few taxpayers do pay.

Therefore, if we were to close the loopholes in our tax laws, we could increase our revenues to such an extent that a reduction in the general level of taxation for all taxpayers could be brought about.

The three amendments I have proposed would, of course, be only a beginning and would not provide enough revenue to carry out this purpose. However, they could be a start and if we made a good start, the act of closing loopholes could become contagious; in which case, we would have enough revenues to both make our tax system more equitable and to reduce the rates which the average person pays in order to make up the revenues which are lost by the great number of special privileges given to particular taxpayers or groups of taxpayers.

The $1 billion in savings from these amendments might be used initially to reduce or repeal many of the numerous wartime excises which are nuisances, regressive, and unfair, or, if these amendments should pass, I am prepared to offer further amendments which will distribute these savings equitably over the range of income-tax payers.

There are those who are frightened by the deficits in our budget. Personally, I believe that these deficits should be reduced in times of prosperity and I am not overly alarmed by them in times of recession. However, the savings could be used for such purposes and if it is the will of Congress and these savings should, therefore, appeal to those who are frightened by the deficits.

Moreover, there are great needs to be met both in our defense and domestic economy. We are in a race with the Russians to produce missiles, and over the years we shall be needing additional revenues for this purpose. We have huge social gaps in the shortage of schools and hospitals and in the need to clear the slums of our great cities.

These needs are so great that it is unconscionable to allow a few taxpayers the special privileges which they receive by way of favored tax treatment. Thus, the ways in which these savings could be used in a constructive way are almost too numerous to mention and, if we were to make a start in closing the loopholes by way of these three amendments, and then if the tax experts in the Treasury would come forward with constructive proposals to close numerous other loopholes, we could save enough in lost revenues to have a really constructive revision of our entire tax structure.

V

I hope that it will not be taken amiss if, as a junior member of the Finance Committee, I offer some comments upon the way Congress is being increasingly called upon to pass legislation granting tax favors and interpretative legislation to aid specific firms and individuals.

I have always assumed that the function of Congress was to pass general legislation and then to allow the administrative agencies and finally the courts to determine the precise application of these laws to individual instances. For this purpose, we have created a Tax Court with rights of appeal to the Supreme Court. In this way, we provided for the judicial review of administrative decisions and thus protected the individual from arbitrary action by the Internal Revenue Service and the Treasury Department. If, to be sure, some of these judicial decisions seemed to be unjust and at variance with the purposes of Congress and the country, then Congress should have not only the power but the duty to act.

But these powers should be invoked sparingly and should be a last and not a first resort. In practice, however, there appears to be a growing departure from this principle. Individuals and companies dissatisfied with administrative rulings or Tax Court decisions come to Congress and ask for legislative relief. They propose legislation which is ostensibly general in nature but which is in fact tailormade for their particular purposes. This is quite commonly done before they have exhausted their judicial remedies. Highly complicated questions of interpretation are thus brought before the committees of Congress. The hearings on these proposals are seldom adequate and are frequently nonexistent. Tax lawyers and lobbyists buttonhole Senators, committee members and staff, and present their side of the case.

While the lawyers for the Treasury are heard in executive session, the testimony and pressures tend to be one-sided in character. The general public is almost completely ignorant of what is going on and Members of Congress who are not members of the appropriate committees are relatively in the dark.

The usual result is for the committees to propose, and Congress to pass (generally in the closing days of the session), a group of amendments to the tax laws designed to give relief and tax favors to specific persons and corporations. Some of these are undoubtedly wise, but many are not. In nearly all cases, there have been no adequate hearings and the pleadings have been largely ex parte. Senators swamped with other duties must find it hard to go into the minutiae of tax law involving such questions as depreciation, the precise nature of income and of capital gains, and a myriad of others.

More and more individuals are carrying their grievances with the Treasury over the interpretation of existing laws to Congress rather than to the courts. Our preoccupation with these relatively limited questions, moreover, absorbs time and energy on our part which might better be devoted to broad questions of tax policy, to trade and tariffs, and to social security.

What I fear, therefore, is that we may be passing ill-considered legislation which frequently increases rather than diminishes injustices in our tax structure, opens new loopholes rather than closing old ones, and broadens and deepens those that already exist. In addition, we are overburdening ourselves by taking on administrative and judicial functions which tend to break down that wise separation of powers which our constitutional fathers so sagely provided.

I would modestly and respectfully suggest that Congress refrain from reinterpreting the law until after the courts have finally spoken and that if and when it does consider these issues, no proposal be considered unless there has been a public hearing upon it, or adequate discussion within the committee itself.

OIL AND GAS DEPLETION

Mr. DOUGLAS. Mr. President, I wish to discuss today the depletion allowance itself. I believe the Senator from Tennessee [Mr. GORE] will carry his point on Monday. I believe that the indignation which was evidenced on the floor of the Senate as he made his explanation, following the approval of the motion to table his amendment, and the pledges of support which came to him from both sides of the aisle, from men who had voted against him, is very clear indication that when he reoffers his amendment in a different form on Monday, it will carry.

But there is danger that we will rest in well-doing at that point, and will therefore say that we had enough reform for the day and for the year and that we will leave the original depletion allowances on minerals extracted from the earth in the same form in which they are now found.

This would be a great mistake, because our present system of depletion allowances, primarily those dealing with gas and oil, are grossly excessive, result in a great loss of revenue to the Treasury and to the taxpayers, create inequity between taxpayers, and serve as an infection center from which the whole revenue system becomes progressively undermined.

1951 TAX FIGHT

I well remember 1951 when, as the Senator from Wisconsin has mentioned, certain very deserving features which had been included in the House bill were eliminated on the floor of the Senate. The CONGRESSIONAL RECORD for that period will show that the then junior Senator from Minnesota [Mr. HUMPHREY] and I conducted a running fight for several days, trying to have adopted a series of amendments which in part tried to reestablish principles which the Ways and Means Committee of the House had recommended, and in part trying to plug these loopholes which had developed. We did not have any success.

Had Congress accepted the recommendations which we had fought for, this country probably would have saved between $20 billion and $30 billion in revenue.

The national debt could have been reduced, and many features of social welfare and national defense could have been added. But Congress did not act. The revenue has been lost, and we are the losers for it.

In recent years we have had very valuable recruits who have joined our ranks. The Senator from Delaware [Mr. WILLIAMS], who voted for the original Humphrey-Douglas amendment to reduce the depletion allowance, has become even more active in the cause. We have had very excellent accessions to the Senate in the persons of the present Presiding Officer of the Senate, the distinguished junior Senator from Wisconsin [Mr. PROXMIRE], the distinguished Senator from Pennsylvania [Mr. CLARK], the distinguished Senator from Minnesota [Mr. MCCARTHY], the distinguished Senator from Tennessee [Mr. GORE], and others. Our ranks are increasing with the passage of time.

The issue is getting out more and more to the American public. It has become a matter of national concern, and the American people are waiting to see how the parties, Senators, Representatives, and candidates line up on these issues.

Those who are in the galleries may wonder why it is that we who are presenting these issues discuss them when

there are so few Senators in the Chamber. The explanation is very simple. Senators may not like to listen, but they read; and they read the CONGRESSIONAL RECORD—most of them—very carefully. So, although they are busy with other occupations, the RECORD will be laid on their doorsteps tomorrow morning. If most Senators do as I assume they do, like the Senator from Illinois, the RECORD will be read before breakfast, or shortly thereafter.

Even more important than that, the RECORD is read by newspaper reporters and columnists, and furnishes a basis for news stories. The CONGRESSIONAL RECORD goes out to some 40,000 individuals throughout the United States. Those 40,000 individuals include, generally, those who are most alert to social issues and political problems.

I have frequently gone into small communities in Illinois and there found a local editor, a local doctor, or a local lawyer reading the CONGRESSIONAL RECORD, thinking about the issues raised, and discussing those issues. This is true within the cities as well as within the smaller communities.

Thus words are not absolutely dead things, but contain within themselves a potency which permits the ideas, if they are sound, to germinate, spread, and ultimately to bear fruit.

So we are not discouraged by the very small attendance of Senators upon the floor tonight, because we know that the invisible reading audience is many tens of thousands of times greater than the very scanty number who are here.

Mr. President, I shall discuss the depletion allowance itself, and I ask unanimous consent to have printed at the conclusion of my remarks the text of my amendment designated "6-17-60—F."

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

WHAT AMENDMENT DOES

Mr. DOUGLAS. Mr. President, the depletion allowance amendment which I shall offer would reduce the allowance for depletion which gas and oil operators could take in the following way: Instead of being allowed the existing 27½ percent allowance across the board, the amendment would provide for a sliding scale allowance of 27½ percent on the first $1 million of income from oil and gas properties, 21 percent on the income from such properties which amounts to between $1 and $5 million in any one year, and 15 percent on the income in excess of $5 million a year.

When I speak of income, I speak of gross income, not net income.

Furthermore, the amendment would apply to each individual operator or company or to the oil properties over which the individual or company has effective control.

OTHER SPECIAL TAX ALLOWANCES

Under the present law, a host of costs and special allowances are deductible from gross income of oil and gas companies, even before the depletion allowance applies. These are as follows:

First, operating costs. This is, of course, necessary and desirable.

FAST TAX WRITEOFFS

Second, intangible drilling and development costs. These can be written off in the year in which they occur and are not spread over a period of years, as is the case in other industries. It has been estimated that between 75 and 90 percent of all costs can be written off in 1 year in this manner. We have, therefore, already accorded to this industry virtually the ultimate in accelerated depreciation and fast tax writeoffs.

This is very important to realize. We speak of accelerated depreciation—writing off amounts in 5 years or 10 years. Here is a case in which from 75 to 90 percent of the investment can be written off in 1 year.

Some persons say that depletion is simply depreciation; but it is not. Depletion is in addition to depreciation and in addition to the intangible drilling and development costs.

DRY HOLES

A third deduction which is permitted is the cost of unsuccessful or dry holes, which can be written off against the income from successful drillings.

In addition to these, there are two further favors granted to the oil industry, and in some cases to other corporations, on investments and operations abroad.

FOURTEEN-POINT WESTERN HEMISPHERE REDUCTION

The fourth point is a 14-point reduction in the corporation tax itself—or a reduction from 52 to 33 percent on taxable income—for income derived from operations abroad in the Western Hemisphere; that is, Venezuela, Canada, Mexico, and so forth.

Thus the companies which operate in Venezuela—and that is a rich oil country—pay only 38 percent upon their taxable income instead of the 52 percent, as here. When I say they pay only 38 percent upon their taxable income, I mean the very limited amount of their total income which is taxed after all the deductions, including the depletion allowance, have been subtracted.

FOREIGN TAX CREDIT

The fifth favor is particularly appropriate in the Near East, for royalty payments abroad may be disguised as income tax payments, for which the foreign tax credit is often available. A company, therefore, can escape liability for the U.S. tax by being allowed to take a tax credit for a payment for which a U.S. taxpayer would be permitted to deduct from gross income rather than take it as a credit against the tax itself. This is an extremely important point.

It is well known that some of the big American companies have the exclusive rights to drilling in Saudi Arabia; that they share pools and drilling in Iraq and Iran and other sections of the world. It is well known that, in general, the royalty payments are approximately 50 percent of the gross revenue.

The interesting point is that this is called a tax, and it can be applied against the tax which these corporations otherwise would pay on the income. So in some cases they pay no U.S. taxes at all. That point was brought out on the floor of the Senate last year, I think. So far as I know, it has never been denied. Although certain testimony taken in executive session by the Finance Committee has been sealed as confidential and not to be published, I have never heard any representative of these oil companies in Saudi Arabia deny the statements which were made, not by me, but by others, upon the floor of this body.

DEPLETION IN ADDITION

All these arrangements are extraordinarily generous. But in addition to this, there is the further allowance which is called percentage depletion. In the case of gas and oil, as I have said, this amounts to an additional 27½ percent of gross income, up to one-half of net income. Moreover, this allowance is permitted in perpetuity, for as long as there is any flow of oil or gas from the well. So long as the well runs, the depletion allowance continues.

Some years ago I went to Galveston, and I was told that the well which came in, in Galveston, around the turn of the century was still flowing. It has been flowing for many, many years after the depletion allowance was begun, and the depletion allowance continues.

We might paraphrase Tennyson's "Brook":

Men may come, and men may go
But I, the depletion allowance, go on forever.

Or for at least as long as the oil or gas flows or runs.

It is not limited to recapturing the cost of the well in question, most of which cost—as we have seen—is recovered for tax purposes in the year when the outlay is made, through the intangible drilling and development cost deduction. This is in addition to all that.

And this allowance continues through time, without relationship to the taxpayer's investment in the venture or whether or not that investment has been recovered for tax purposes.

From its inception, the percentage depletion allowance has been 27½ percent. But when it was begun, the corporation income tax amounted to only 14 percent. So at that time the percentage of income lost by the Government in those early days was not too great. But now, as we know, the corporate tax is 52 percent. So the 27½-percent allowance, up to one-half of net income, now benefits the companies, not to the extent of one-half of 14 percent, but to the extent of one-half of 52 percent—at least that much.

LOOPHOLE UNIVERSALIZED

And, as I said earlier, the depletion allowance has brought in its train a host of similar deductions on virtually everything else that is extracted from the earth or from the seas—on every mineral; on sulfur, on which the allowance is, I believe, 23 percent; on coal, on which the depletion allowance is comparatively low; on bauxite—on every mineral; and also, as I have said, on oyster shells, clam shells, sand, and gravel. It is almost a perfect example of a case in which, instead of closing a loophole in

the law, an effort has been made to make the application of the loophole universal. And today we have heard about the last act in this play—namely, that the depletion allowance is now being extended to the manufactured products; that the depletion allowance on clay is now being extended to the sale of bricks; that the depletion allowance on sand is now being extended to the sale of glass; that the depletion allowance on raw salt is now being extended to the sale of manufactured table salt; and so it goes.

FACTS ABOUT DEPLETION

Mr. President, now let me turn to some of the facts in regard to depletion allowances in general, and the oil and gas depletion allowances in particular. I have before me three tables which show the amount of all depletion which corporations took as income tax deductions in the period from 1946 to 1957, and also listing the same deductions by total assets classes, and a further table which shows corporate depletion deductions and net income by total assets classes, for the years 1952–57. I ask unanimous consent that these tables be printed in the RECORD.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

TABLE 1.—*Selected corporate business deductions, all corporations, 1946–57*

[Dollar amounts in millions]

Deduction	1946	1947	1948	1949	1950	1951	1952	1953	1954	1955	1956	1957

THREE AND ONE-THIRD BILLION DOLLARS IN DEPLETION

Mr. DOUGLAS. Mr. President, the first table shows that in 1957 the total amount of deductions for depletion, by all corporations with balance sheets, was in the amount of $3,346,800,000. I repeat, Mr. President, over $3⅓ billion of income which otherwise would have been taxable, was not taxed.

It is proper to ask how much of this consisted of gas and oil allowances. We have some figures which indicate what these totals would be, because in 1955 the total depletion allowances amounted to $2,800 million, and $2 billion of that was on gas and oil, or a little more than 71 percent.

In 1957, the total depletion allowances taken, as I have said, amounted to approximately $3,347 million. When we apply the 71-percent ratio, it indicates that the oil and gas depletion allowance probably amounted to $2,380 million of revenue which was lost to the taxpayers, but was a gain to the gas and oil well operators.

Mr. PROXMIRE. Mr. President, will the Senator from Illinois yield?

The PRESIDING OFFICER (Mr. CLARK in the chair). Does the Senator from Illinois yield to the Senator from Wisconsin?

Mr. DOUGLAS. I am glad to yield to the Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, a little earlier the Senator from Illinois was talking about the fact that depreciation is taken, and that depletion is a second kind of deduction.

Mr. DOUGLAS. It is really a third or a fourth kind of deduction. There are operating costs, drilling and development, and the cost of drilling the dry or the unsuccessful holes, and then depletion, in addition.

Mr. PROXMIRE. I understand. My point is that depreciation and depletion are both viewed as the same kind, with the same sort of justification—in other words, an opportunity for the investor to be repaid for his capital expenditure.

Yes; but they are very different.

Mr. PROXMIRE. I understand that. The point I wanted to make relates to its difference.

Mr. DOUGLAS. There is a quantitative difference. In 1957 the depreciation allowances for all companies, not including depletion, amounted to $16,968 million, or approximately $17 billion for depreciation; and the $3,347 million for depletion was over and above this.

Mr. PROXMIRE. The point I wanted to make is that I understand it has been estimated by a very competent and authoritative Government agency that this depletion allowance enables the oil companies, on the average, to write off their capital investments, not once, not twice, not three times, but 19 times.

Mr. DOUGLAS. I would say that is possible.

Mr. PROXMIRE. I want to supply for the RECORD, at a later date, that authority, because I do not happen to have it with me at the present time, but it is based on a competent study. In other words, it is perfectly logical and proper, it seems to me, for someone who has made an investment in machinery, or equipment, or a plant, to depreciate that machinery. After all, the investment goes into the product being produced, and should be considered as a part of the cost of that product. But to be able to write it off over and over and over again seems to me to be dishonest. I can understand some justification for it, but to make it so excessive as 27½ percent seems hard to justify.

Although the Senator from Illinois is making a very strong case for the abolition of it, he is not proposing it.

Mr. DOUGLAS. No.

Mr. PROXMIRE. As I understand his proposal, he would reduce it from 27½ to 15 percent, and only, in this case, for the big oil companies which gross over $5 million. Is that correct?

Mr. DOUGLAS. That is correct.

Mr. PROXMIRE. And for the middle-sized oil companies, grossing between $1 million and $5 million, the decrease would be something like 21 percent.

Mr. DOUGLAS. That is correct.

Mr. PROXMIRE. And for the smaller oil companies, there would be no reduction whatsoever.

Mr. DOUGLAS. That is correct; and that needs to be emphasized, because the oil companies are spreading propaganda throughout the country, and throughout my own State, that I am trying to eliminate that provision entirely, cut down the little man, and cut down royalties to every farmer where drilling occurs.

Mr. PROXMIRE. The little operator would not be affected at all, but would be given some sort of advantage. In view of the disadvantages under which he operates, not having much capital or other advantages that big business have, this would be a form of opportunity for him.

Mr. DOUGLAS. Yes.

Mr. PROXMIRE. So the proposal of the Senator from Illinois is a restrained one. As a matter of fact, I think it would provide for substantially greater depletion benefit to an oil concern than it enjoyed in 1926, when this allowance was originally applied, and when, as the Senator from Illinois has told us, the income tax was one-quarter of what it is today. Therefore, the value of the depreciation is magnified fourfold, because the income tax has increased that much. The proposal of the Senator from Illinois will leave even the big company with twice as much benefit as it enjoyed back in 1926, when this allowance was originally conceived, justified, and written into law.

DEPLETION ALLOWANCE GROWS

Mr. DOUGLAS. That is correct.

Mr. President, there is another important fact to be noted from the table, and that is how the depletion allowance has grown through the years, and I refer to all forms, not merely oil and gas.

In 1946 it amounted to $798,900, or just about $800 million.

In 1947 it increased to $1,210 million.

In 1948 it increased to $1,711 million.

In 1949 there was a reduction to $1,476 million.

In 1950 it was $1,709 million.

In 1951 it was $2,085 million.

That was the year that the Senator from Minnesota [Mr. HUMPHREY] and I made our fight to reduce the depletion allowance. I think we got nine votes on the floor of the Senate at that time. We failed, and the next year it went up to $2,126 million. The next year it was $2,302 million.

The next year it was $2,359 million.

The next year it was $2,805 million.

The next year it went up to $3,084 million.

In 1957 it was $3,347 million.

No one knows how much it is today, but it was growing, from 1954 to 1957, by approximately $1 billion. We can be

pretty certain, I think, that it has increased since that time, and that it is much more than $3⅓ billion today. We may find it is as high as $4 billion. I do not say it is, but we might find it is up as much as $4 billion. And if it is extended, as it will be, unless we act, to fabricated products, it will exceed that amount.

LARGE FIRMS GET LION'S SHARE

Table No. 2 deals with depletion deductions by corporations classified according to the amounts of their assets. I ask that this table be very carefully studied. It also covers the years from 1946 to 1957, inclusive. It shows that in 1957, of the total depletion allowances of approximately $3⅓ billion, $2,309 million, or 69.3 percent, were taken by corporations with net assets of over $100 million.

Those with assets of from $10 million to $100 million took 18.1 percent of the total allowance, or approximately $600 million.

So it is the big corporations which take the giant share, those with over $100 million in assets getting almost 70 percent of the total depletion allowance.

Back in 1950, the Secretary of the Treasury, Mr. John Snyder, came before the House Ways and Means Committee and urged that it reduce the depletion allowance. He made a very cogent argument for his position, and he further placed in the record a great many facts and figures which were informative and persuasive. His figures showed that one individual operator, having a net income in the years 1943 to 1947, of $14.3 million, paid income taxes of only $80,000 in this entire period, or only a little over one-half of 1 percent of his income.

Mr. President, I ask unanimous consent that the testimony of Secretary of the Treasury Snyder and the exhibits which he introduced, which appear in the hearings of the Ways and Means Committee, 81st Congress, 2d session, February 3, 1950, on the revenue revision of 1950, be printed in the RECORD at this point.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

REVENUE REVISION OF 1950—TESTIMONY OF SECRETARY OF TREASURY SNYDER

[From hearings, Ways and Means Committee, 81st Cong., 2d sess., vol. 1, Feb. 3, 1950]

SPECIAL DEPLETION ALLOWANCES

Depletion in ordinary accounting usage is intended to permit taxpayers to recover the cost of mineral properties over the producing life of the properties. Depletion is the counterpart of depreciation which is intended to permit recovery of the cost of other assets over the period of their useful life. When the original investment has been recovered, no further depreciation is allowed for tax purposes. However, in the case of depletion, special provisions which allow recovery of more than the cost of mineral properties have been in the law since 1918.

Under present law, special allowances are granted on the basis of specified percentages of gross income for different types of minerals. The percentage of gross income allowed is 27½ percent for oil and gas, 23 percent for sulfur, 15 percent for metals and a large number of nonmetallic minerals, and 5 percent for coal.

Percentage depletion continues for the life of the property and generally results in the tax-free recovery of many times the cost. It is granted to those purchasing properties as well as to those operating properties they have developed. The allowances have become more valuable as tax rates have been increased.

Furthermore, the benefits from percentage depletion are increased by provisions which permit development costs to be deducted as an expense in the year incurred instead of being treated as a capital cost to be recovered later through depletion deductions. This is equivalent to a double deduction for the same costs, once when they are incurred and again under percentage depletion. In the oil industry during 1946 and 1947, for every $3 million allowed as percentage depletion, another $2 million was deducted as development costs.

The combination of percentage depletion and the expensing of development costs provides a mechanism for pyramiding extensive holdings in oil assets with payment of little or no income tax.

As the President has indicated, millions of dollars are made annually from operating oil properties on which little or no income tax is paid. The President mentioned one outstanding example. You will find others in the attached material (exhibit 2). In the examples cited, annual incomes, on the average, of over $1 million were obtained on which an average tax of only 22½ percent was paid. This is the rate now paid by persons with incomes of less than $25,000.

These illustrations suggest how much additional revenue the Government would gain by limiting some of these special allowances.

You will find from an examination of the materials I am submitting to assist the committee in considering revision of these provisions that—

First, the estimated revenue loss is between 400 and 500 million dollars annually. This is as much as the yield of all the retail excises.

Second, the allowance is especially excessive in the case of oil and gas and exempts a higher proportion of the earnings of this industry which may expense more of its development costs than the other mineral industries.

Third, the provision has been found to be of little benefit to small prospectors on whose behalf it is so frequently supported.

Fourth, these deductions enable high-income individuals to reduce to negligible proportions taxes on income from sources totally unrelated to these industries.

There are a number of ways in which the necessary revision of present allowances can be accomplished. In general, these involve either the limitation of percentage depletion or the termination of the option to expense development costs. The benefits of expensing development costs are confined to the finding of new properties. Percentage depletion on the other hand may be obtained on established as well as new properties, and regardless of whether the recipient contributed to the development of the property. The reduction of percentage depletion would tend to reduce windfalls while protecting incentives for exploration.

A reasonable way to reduce the excessive benefits would be to limit the percentage of gross income which might be deducted as depletion. A reduction in the present net income limitation would leave the more excessive allowances untouched while reducing the benefits on the small, less profitable properties.

Specifically it is proposed that percentage depletion for oil, gas, and sulfur be reduced to 15 percent of gross income and that percentage depletion for nonmetallic minerals be reduced to 5 percent. The existing 15 percent rate for depletion allowed to the metals would be left unchanged.

It is further proposed that oil and gas operators who elect to expense intangible drilling and development costs be required to reduce income from the property by the amount of such expensed costs in computing their depletion allowance. This requirement will reduce the extent of the double deduction now enjoyed by oil and gas enterprises with respect to certain of their capital costs.

Together these proposals would remove the more obvious inequities of the present system without interfering significantly with production incentives.

SPECIAL DEPLETION ALLOWANCES FOR MINERAL PROPERTIES

One of the major avenues of escape from income tax is the special depletion allowance now accorded mineral properties. This subject has received consideration by congressional committees on a number of occasions.

Nearly 25 years have passed, however, since the date of the investigation of depletion costs on which present allowances were established. In the intervening years there have been important basic changes in those industries.

This study presents current information on the basic aspects of this problem and discusses the considerations affecting the desirability of the present allowances.

I. PRESENT PROVISIONS

The Federal income tax recognizes depletion of wasting mineral assets as a deductible cost in determining net taxable income. The purpose is to allow the taxpayer to recover tax free the capital he has invested in the mineral property. Special allowances in excess of cost are granted to certain groups of taxpayers. In most cases these special allowances are based on a percentage of gross income. Of less importance are special allowances based on discovery value.

(a) *Percentage depletion*

Percentage depletion is computed as a specified percentage of gross income, without regard to the capital cost of the property. The rates range as high as 27½ percent of gross income in the case of petroleum, but the deduction is limited to 50 percent of the net income (computed without regard to depletion) from the particular property. The following percentages of gross income are allowed different minerals under present law.

Mineral:	*Percentage rate on gross income*
Oil and gas	27½
Sulfur	23
Metals	15
Coal	5
Bauxite, fluorspar, flake graphite, vermiculite, beryl, feldspar, mica, talc (including pyrophyllite), lepidolite, spodumene, barite, ball, sagger, and china clay, phosphate rock, rock asphalt, trona, bentonite, gilsonite, thernardite, and potash	15

Percentage depletion continues to be deductible even after 100 percent of the invested capital has been retrieved tax free. The total tax-free recoveries may be substantially in excess of the cost of the property, and in a large number of cases amount to many times the capital investment.

(b) *Discovery depletion*

Those minerals which are not eligible for percentage depletion may qualify for discovery depletion, under certain conditions. Owing to the wide range of minerals excluded because they are eligible for percentage depletion, and the special conditions attaching to the use of discovery depletion, it applies only to certain nonmetallic substances and is of limited significance at the present time.

Under discovery depletion, a taxpayer who discovers a mine on an unproven tract, the value of which is materially larger than the cost to the taxpayer, is allowed depletion deductions designed to amortize the appreciated discovery value over the economic life of the mine. As in the case of percentage depletion, the annual deduction for discovery depletion is limited to 50 percent of the net income from the property. However, aggregate tax-free recoveries under this method are limited to the discovery value.

(c) Cost of adjusted-basis depletion

Percentage depletion is one of the most complex provisions in the tax law. Depletion allowances are computed with respect to each individual mineral property. Mineral-tax payers commonly own several, and in many cases thousands of properties. Each year for each property the taxpayer takes the largest depletion deduction allowable. Both gross and net income must be determined for each separate property to compute percentage depletion. Moreover, a corporate-tax payer's accounting for each property entitled to percentage depletion must reflect each of the three different depletion concepts: (1) Allowable depletion, including percentage or discovery, (2) adjusted-basis depletion, and (3) strict cost depletion.

In all cases the taxpayer is allowed depletion based on cost as a minimum. The annual cost depletion (usually termed adjusted-basis depletion) is computed by spreading the original cost, less amounts previously recovered tax free, over the estimated remaining life of the property, measured in units of mineral product. Increased deductions for percentage depletion reduce the remaining cost or adjusted basis more rapidly. Therefore, the adjusted-basis depletion, which represents the minimum annual deduction, must be recomputed at a lower figure each year after percentage depletion is taken.[1] When the original cost is exhausted through depletion allowances the adjusted-basis depletion is reduced to zero, although percentage depletion may continue to be deducted.

Corporations also account for annual cost depletion computed without regard to amounts recovered from time to time through percentage depletion, in determining their net profits for reports to stockholders and other purposes. Cost depletion in this sense is also recognized for tax purposes in connection with the treatment of liquidating dividends in the hands of the stockholders.[2]

For purposes of determining gain or loss upon sale or other disposition of a depletable property, the tax basis is reduced by the total amount of allowable depletion (percentage, discovery, or adjusted-basis depletion) in previous years.[3] While percentage depletion may continue even though more than 100 percent of the basis has been recovered tax free, the basis for determining gain or loss is reduced only to zero.

(d) Expensing of capital costs

In addition to depletion allowances, certain capital costs of developing mineral properties are treated as expenses incurred in doing business and allowed as deductions in the year incurred. This expensing treatment does not reduce allowable percentage depletion in future years, which is based on the income from the developed property. This results in a double deduction for recovery on the same capital investment.

Owners of oil or gas wells have wide opportunities for expensing capital costs incurred in developing their properties. At their option, they may treat intangible drilling and development costs of wells (including expenditures for labor, supplies, repairs, and hauling) as current expenses deductible from taxable income from any source. For example, 90 percent of an oil operator's capital outlay, exclusive of depreciable items, may be for intangible drilling and development costs. If this is deducted as a current expense, and thus recovered tax free at the outset, only 10 percent of the investment remains to be recovered through depletion allowances. Hence, depletion allowances based on the entire income in effect overlap the initial deduction of a large portion of the capital outlays.

In the case of mines, development costs can be immediately offset against income only to the extent that there are receipts derived from the mine during the development period. However, if considerable quantities of ore are taken out while developing a mine to full producing status, it is possible for a taxpayer to recoup, tax free, immediately a large part of the capital costs of development.

II. BACKGROUND AND DEVELOPMENT OF SPECIAL DEPLETION ALLOWANCES

The original income-tax legislation provided a "reasonable allowance," not to exceed 5 percent of gross income, for wasting mineral assets. This was later changed to a more specific allowance of depletion based on cost, or 1913 value.

Allowances in excess of cost depletion were first granted in the form of discovery depletion in 1918 as a measure to stimulate mineral exploration for war purposes and to lessen tax burdens on small-scale prospectors who made discoveries after years of fruitless search. Discovery depletion deductions allowed the discoverer of any new mineral deposit to retrieve not only his costs but also the materially larger appreciated value of the property at the time its profitability was established. Since no limit was placed on the discovery depletion deduction, in many cases the deduction was in excess of the income from the discovered property and served to offset income from other sources. To prevent such excessive discovery depletion allowances, the annual deduction was limited in 1921 to 100 percent of the net income from the mineral property. In 1924, the limit was reduced to 50 percent of the net income from the property, in order to provide for the taxation of at least one-half of the income from these properties.

Percentage depletion was substituted for discovery depletion in the case of oil and gas properties in 1926 and extended to metals, sulfur, and coal in 1932. The original percentage-depletion rates, still embodied in present law, were in general fixed at levels which would permit the respective industries approximately the same total annual depletion they had previously enjoyed under discovery depletion.

Despite the recommendation of the Treasury in 1942 that percentage depletion be eliminated it was extended in 1942 and 1943 as a temporary measure to certain nonmetallic minerals at the 15-percent rate applicable to metals. In 1947 the temporary wartime extensions were made permanent, and in addition some items not previously covered were granted the special allowance. Since 1947 a wide range of nonmetallic producers who have not been granted percentage depletion have sought similar preferential tax treatment.[4]

III. SURVEY OF DEPLETION AND RELATED ALLOWANCES

Information on percentage depletion and other special allowances for mineral producers has been recently developed through a special survey of 350 corporation income tax returns. These returns accounted for about three-fourths of all corporation income tax allowances for depletion for the year 1946 (table 1). Although the survey group does not necessarily represent a cross section of the mineral industries, the high proportion of tax allowances for depletion provides reliable information on the mineral-depletion provisions. The statistical data obtained in the course of this survey are presented in tables 1 to 10.

While the survey covers corporations only, it is estimated that corporations account for more than 80 percent and individuals for less than 20 percent of all depletion deductions.

(a) Excess depletion and resulting revenue loss

The allowable depletion deducted by the corporations included in this survey amounted to $555 million in 1946 and $839 million in 1947. Of these amounts only 10 to 15 percent represented adjusted-basis depletion which would have been required to recover original investment cost.[5] The remaining 85 to 90 percent constituted the excess allowance attributable to the special depletion provisions for mineral industries (table 2).

The indicated revenue loss for all corporations in the survey due to excess depletion was about $180 million in 1946 and $290 million in 1947 (table 3). On the basis of these findings it is estimated that the total revenue loss for all corporations due to excess depletion was nearly $250 million in 1946 and $400 million in 1947.

(b) Distribution of excess depletion by industry groups

The excess of percentage depletion over cost or basis depletion was correspondingly high for most industry groups. Relatively low excess depletion for a few industries, such as coal and the stone, clay, and glass group, reflects either a low-percentage depletion rate (5 percent for coal) or ineligibility of important components of the industry for percentage depletion.

A high proportion of the excess depletion shown in table 2 was received by corporations whose major activity was other than mining and quarrying. In 1946, for example, $345 million or more than 70 percent of the total excess was deducted by manufacturing enterprises (notably in the petroleum field) representing large integrated firms whose predominant industrial activity was not mineral extraction.

(c) Distribution of special depletion and related allowances by mineral products

Survey data for 1946 and 1947 showing the distribution of depletion allowances (including deductions for development costs) classified by the principal mineral products are

---

[1] In addition to determining the minimum annual allowance, the adjusted-basis depletion is important in computing the net operating loss deduction. Under the present 2-year carryback and 2-year carryforward of net operating losses, the loss to be carried over is reduced by the excess of percentage over cost depletion (and similar tax-exempt items) in the year in which the loss occurs. Similarly, the amount of the loss which is deductible is reduced by the amount of such exempt income in the year to which the loss is carried.

[2] Under existing law dividends to stockholders are taxable to the extent they are paid out of earnings and profits. For this purpose, earnings and profits are computed on the basis of cost depletion.

[3] For years prior to 1932 the excess of percentage over cost depletion was not applied to reduce the tax basis.

[4] Within the past 3 years bills have been introduced in Congress to extend percentage depletion to amblygonite, oil shale, tripoli, marble, pumice, scoria, limestone, crushed stone, perlite, diatomaceous earth, granite, borax, calcium and magnesium carbonates, shell, sand, gravel, stone, and all other nonmetallic clays and minerals.

[5] In most cases the adjusted-basis depletion was approximately equal to cost depletion.

presented in tables 4 and 5. As shown in these tables, the bulk of the benefit of percentage depletion in excess of basis depletion was derived by the oil and gas group. They received almost 85 percent of the excess depletion compared with 55 percent of the gross income for corporations included in the survey.

Total deductions for development costs by the selected corporations were $394 million in 1946 and $486 million in 1947. Comparison of the development-cost deductions with the excess of percentage over basis depletion for these 2 years indicates that for every $3 allowed as percentage depletion another $2 was deducted as development costs. In addition, substantial deductions were taken for exploration costs and losses on abandonment, amounting to $204 million in 1946 and $255 million in 1947.

Nearly all of the development-cost deductions were taken by oil and gas producers, and these producers also claimed most of the allowances for exploration and losses on abandonment.

Substantial variations are also shown by tables 4 and 5 in the relative tax benefits derived from special depletion allowances among different types of mineral producers, due in large part to disparities in the rates of percentage depletion. In 1947, for example, allowable depletion was about equivalent to basis depletion for nonmetallics not entitled to percentage depletion, about 3 times basis depletion for coal, 5 times basis depletion for metals, and 16 times basis depletion for oil. Sulfur producers were entitled to virtually no basis depletion, yet more than one-third of their aggregate net income was excluded from taxation through excess percentage depletion.

The relative importance of special depletion allowances for different type of mineral producers is presented in table 6. As shown in this table, all the corporations included in the survey had depletion deductions equal to about 40 percent of their net income before depletion in the years 1946–47. By contrast, the amount of basis depletion required to recover remaining cost ratably over the useful economic life was only 6 percent of net income in 1946 and 3.6 percent in 1947. Significant variations are shown among mineral products. Thus, depletion allowances in 1946 amounted to 49 percent of net income in the case of oil and gas compared with 1½ percent for nonmetallic products not entitled to percentage depletion, and 18 percent for all nonmetals.

(d) Depletion allowances in relation to size of firm

The distributions of various mineral-depletion allowances in dollar amounts and in relation to income, by size of firm, for 1946 and 1947, are shown in tables 7 and 8.

As shown in table 7, about three-fourths of the total depletion allowances and of the excess of percentage over basis depletion was received by very large corporations, with assets of at least $100 million. By contrast these firms received slightly less than two-thirds of the total gross income from mining.

The percentage of income excluded from taxation through depletion allowances tends to be greater for larger corporations (table 8). In 1947, for example, firms with assets of $100 million and over had depletion allowances of 20 percent of their gross and 38 percent of their net income, as against 9 percent of gross income and 34.5 percent of net income for corporations with assets between $100,000 and $1 million. The benefits of special depletion allowances, reflected in the ratio of allowable depletion to basis depletion, also tend to increase with the size of the firm. In 1947, for example, the allowable depletion of corporations with assets of $100 million and over was 13 times their basis depletion as compared with about 8 times for corporations with assets between $1 million and $10 million.

IV. ILLUSTRATIVE CASES SHOWING TAX EFFECTS OF SPECIAL ALLOWANCES

In connection with the survey of special depletion and related allowances, the effect of these provisions on the tax liabilities of particular taxpayers was studied.

Substantial reductions in income taxes were obtained by a number of individual oil and gas operators for the 5 years 1943 to 1947. In 10 illustrative cases, summarized in table 9, the effective rate of tax on net economic income (based on cost or basis depletion) varied from 63.5 percent to as low as six-tenths of 1 percent. This represents a striking difference between the effective rates of tax actually paid and the general statutory rates on such income, which ranged as high as 90 percent in these years.

During the 5-year period these 10 individual taxpayers received a total economic net income of $52.6 million from oil and gas properties. This net income was computed after all deductions for operating expenses, depreciation, basis depletion, exploration costs, and losses on unsuccessful ventures. These taxpayers also received a total of $9.3 million of net income from other sources. Of their aggregate net income from all sources, totaling $61.9 million, 77 percent was eliminated for tax purposes through the special deductions.

Similar information for 20 corporations taken from income-tax returns for 1947 is shown in table 10.

(NOTE.—In the following tables figures are rounded and will not necessarily add to totals. Percentages were computed on the basis of unrounded figures.)

[1] Gross income subject to depletion represents the amount for which the taxpayer sells, or could sell, in the immediate vicinity of the mine or well, the crude mineral output thereof.

[2] Net income subject to depletion represents the gross income subject to depletion less the allowable tax deductions attributable to the particular mineral property.

[3] Allowable depletion is the deduction permitted for income-tax purposes, and is the larger of either adjusted-basis depletion or percentage depletion.

[4] Basis depletion is the deduction necessary to recover the unamortized portion of the taxpayers' depletable property over its estimated remaining useful life. The unamortized portion, or adjusted basis, is reduced each year by the amount of allowable depletion.

[5] Development costs are expenditures for the preparation of mineral properties for production, which are deducted as expenses in the year incurred. Consequently these expenditures are not included in the tax basis of the property and future cost or adjusted-basis depletion is correspondingly reduced. The treatment of development costs as a current expense, however, does not diminish percentage depletion in subsequent years, since the latter is determined on the basis of income in those years.

[6] Tax deductions for exploration costs represent expenditures which are made in the search for mineral deposits but which cannot be attributed to the capital costs of particular depletable properties. Abandonment losses represent tax deductions for recovery of capital invested in particular mineral properties which are abandoned before recovery of adjusted basis. Both exploration costs and abandonment losses represent tax deductions for capital recovery in addition to depletion deductions.

[7] Less than $50,000.

[8] The following nonmetallics are entitled to percentage depletion: Fluorspar, ball and sagger clay, rock asphalt, potash, flake graphite, vermiculite, beryl, feldspar, mica, talc, lepidolite, spodumene, barite, bauxite, china clay, phosphate rock, bentonite, trona, gilsonite, and thenardite.

Total	348	3,447.8	1,241.0	553.2	74.8	392.9	203.7
1947							
$100 under $1,000	$20	$25.8	$6.7	$2.3	$0.1	$0.1	(8)
$1,000 under $5,000	101	268.3	72.5	26.8	3.4	11.0	$1.8
$5,000 under $10,000	42	160.1	60.0	23.5	3.1	7.4	3.6
$10,000 under $50,000	97	870.2	301.7	118.4	14.4	59.0	25.8
$50,000 under $100,000	14	353.3	117.2	51.4	10.7	16.5	13.2
$100,000 and over	68	3,108.7	1,604.8	614.3	47.1	390.8	209.6
Total	342	4,768.6	2,162.9	836.8	78.8	484.8	254.1

[1] Total asset classes are based on the net amount of total assets after reserves for depreciation, depletion, amortization and bad debts, as of the close of the taxable year 1946. Only corporations with balance sheets are included. Consequently, the number of corporations differs slightly from that in the tabulations by industry groups and by principal mineral products.

[2] Gross income subject to depletion represents the amount for which the taxpayer sells, or could sell, in the immediate vicinity of the mine or well, the crude mineral output thereof.

[3] Net income subject to depletion represents the gross income subject to depletion less the allowable tax deductions attributable to the particular mineral property.

[4] Allowable depletion is the deduction permitted for income tax purposes, and is the larger of either adjusted-basis depletion or percentage depletion.

[5] Basis depletion is the deduction necessary to recover the unamortized portion of the taxpayers depletable property over its estimated remaining useful life. The unamortized portion, or adjusted basis, is reduced each year by the amount of allowable depletion.

[6] Development costs are expenditures for the preparation of mineral properties for production, which are deducted as expenses in the year incurred. Consequently, these expenditures are not included in the tax basis of the property and future cost or adjusted-basis depletion is correspondingly reduced. The treatment of development costs as a current expense, however, does not diminish percentage depletion in subsequent years, since the latter is determined on the basis of income in those years.

[7] Tax deductions for exploration costs represent expenditures which are made in the search for mineral deposits but which cannot be attributed to the capital costs of particular depletable properties. Abandonment losses represent tax deductions for recovery of capital invested in particular mineral properties which are abandoned before recovery of adjusted basis. Both exploration costs and abandonment losses represent tax deductions for capital recovery in addition to depletion deductions.

[8] Less than $50,000.

Total	52.6	9.3	61.9	20.9	26.7	14.3	13.93	22.5

[1] Income after deductions for operating expenses, depreciation, adjusted-basis depletion, exploration costs and losses on abandonment.

[2] Excess of percentage depletion over adjusted-basis depletion.

[3] Development costs are expenditures for the preparation of mineral properties for production, which are deducted as expenses in the year incurred. Consequently, these expenditures are not included in the tax basis of the property and future cost of adjusted-basis depletion is correspondingly reduced. The treatment of development costs as a current expense, however, does not diminish percentage depletion in subsequent years, since the latter is determined on the basis of income in those years.

[4] While special deductions more than offset the total net income for the 5 years, some income tax was paid because there were deficits only in some years. A deficit caused by excess percentage depletion cannot be carried over against the net taxable income of other years.

[5] Includes only 4 years, 1943–46.

Source: Bureau of Internal Revenue, special tabulation.

Mr. DOUGLAS. Mr. President, in 1955, the Joint Economic Committee asked a number of tax experts to participate in its study of Federal tax policy for economic growth and stability. One of the finest papers which was presented to the committee was that by William F. Hellmuth, Jr., of Oberlin College, who wrote on the subject of the "Erosion of the Federal Corporation Income Tax Base." This paper appears on pages 888 to 917. I ask unanimous consent that a section of that paper, which appears on pages 897 to 903, and which deals with the percentage depletion question, be printed at this point in the RECORD.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

DEPLETION

Present depletion deductions are probably the most glaring and most widely condemned source of erosion in the corporate income-tax base. These deductions may also be the ones which have been most liberalized and extended over the past 15 years.

Corporations have been permitted a tax deduction for the exhaustion of oil and mineral resources since 1913. In economics and in our tax law, the principle is well established that the gradual exhaustion in use of a well or mineral deposit represents a cost of production for which deductions should be allowed in computing net income. Controversy exists as to timing and total amount of depletion deductions allowable.

On the basis of tax neutrality between different industries and economic activities, deductions from income over the life of a property would be limited to original cost, with annual tax-free recovery reflecting the portion of the total deposit which is extracted during the year. Using the business-income yardstick, there would be depletion deductions based on actual cost or in some cases no deductions at all for depletion.[1] Full recovery of actual cost under cost depletion would correspond to tax treatment of depreciation or amortization for other capital assets.

Existing legislation allows taxpayers owning an economic interest in mineral deposits the choice of a depletion deduction based on cost or percentage depletion. Percentage depletion gives an annual deduction equal to the smaller of a statutory percentage of gross income from mineral property or 50 percent of net income from the property before any allowance for depletion. Total tax-free deductions under percentage depletion are not limited or even necessarily related to capital cost. Annual percentage depletion deductions are related to production, prices, net income, and statutory percentages. There is no ceiling on the total amount of these deductions and over the life of a property they may total many times a taxpayer's actual investment costs. Thus percentage depletion deductions diverge from allowable deductions which conform either to tax neutrality or to business-income concepts and are an important element of erosion.

The dollar estimate of the excess of percentage over cost depletion is based on Treasury studies of those corporations which accounted for 75 to 80 percent of all depletion allowances claimed by corporations during 1946–49.

[1] Smith and Butters, op. cit., pp. 80–84. Some businesses make no deduction for depletion due to the difficulty of estimating the future life of a deposit accurately.

Year	Number of corporations	Allowable depletion	Adjusted basis depletion	Excess of allowable over basis		
				Amount	Percent of allowable	Percent of net income
1946	352	$555	$75	$480	86.5	38.4
1947	344	839	79	760	90.6	35.0
1948	260	1,291	77	1,214	94.0	36.3
1949	260	1,120	61	1,059	94.6	40.1
Total		3,805	292	3,513		
Weighted average					92.3	

NOTE.—See also an interpretation of the 1946–47 data by D. H. Eldridge, Tax Incentives for Mineral Enterprise, Journal of Political Economy, June 1950, pp. 222–240.

Sources: 1946 and 1957 data from Revenues Revision of 1950, hearings before the Committee on Ways and Means, House, 81st Cong., 2d sess., vol. I, pp. 194, 197; 1948 and 1949 data from E. E. Oakes, Incentives for Mineral Industries, the President's Materials Policy Commission, Resources for Freedom, vol. 5, pp. 14–15. Admittedly adjusted-basis depletion is not identical to cost depletion but is based on cost less allowable depletion (larger of percentage or cost depletion) in prior years.

This table indicates that total allowable depletion deductions were at least 10 times depletion deductions based on cost. As legislation in 1951 and 1954 further liberalized percentage depletion and extended the opportunity to expense (currently or deferred) exploration and development costs so they never are charged to a depletion basis, allowable depletion may now be nearer 20 times cost depletion. These figures conceal a wide variation between individual products. Percentage depletion deduction as a multiple of cost depletion during 1946–49 varied from a high of over 200 for sulfur to 19 for oil and gas down to about 3½ for copper and coal. Note that oil and gas accounted for more than 80 percent of all depletion deductions:

Allowable depletion compared with adjusted basis depletion for certain products, 1946–49 combined

[In millions]

	Allowable depletion	Adjusted-basis depletion	Allowable as multiple of adjusted basis	Product percent of total allowable
All products	$3,805	$292	3.7	100.0
Oil and gas	3,143	167	18.9	82.8
Sulfur	60	(1)	(1)	1.6
Coal	136	38	3.5	3.6
Copper	182	49	3.7	4.8

[1] Allowable depletion for sulfur was less than $300,000 for all 4 years combined. Individual years' totals were too small to be reported in tables. Thus allowable depletion for sulfur was at least 200 times the amount of adjusted-basis depletion and possibly much more.

Source: Computed from Treasury depletion studies of several hundred large companies for 1946–49, op. cit.

The most recent Statistics of Income indicate corporate depletion deductions of $2,126 million for 1952. Corporate depletion in 1955 might amount to $2,500 million, assuming increased dollar volume and another $100 million for the liberalization of depletion by the 1954 code. Ninety percent of this total gives $2,250 million as the conservatively estimated amount of corporate income excluded from taxable income due to over-generous percentage depletion.[2]

Erosion of the tax base due to depletion has been rapid in recent years and perhaps has now come to a position of equilibrium, at a position of great liberality, with percentage depletion now available to every metallic and nonmetallic mineral from anorthosite to zinc, including even oyster-shells and peat. Under section 613(b) of the 1954 code, only soil, dirt, turf, water, and mosses, or minerals from sea water, the air, or similar inexhaustible sources are not eligible for percentage depletion.

But this hope—that there will be no further erosion from depletion—is probably too optimistic. Industries entitled to a low rate of percentage depletion are continually pressing for higher rates; pass-through of depletion deduction opportunities to corporate stockholders in extractive industries has been requested. A Federal circuit court recently held that the value of finished brick could be used in the income measure for percentage depletion.[3] If this view prevails for brick, other industries will push for equal treatment, possibly even to the value of gasoline for a vertically integrated oil company.

The statutory history of depletion is a superb example of at least three types of tax changes which erode the corporate tax base.

The initial break from cost depletion came in 1918 when Congress allowed, to the discoverer only, tax-free deductions based on value of property at the time of the discovery or within 30 days thereafter. This was probably the first instance under the Federal income tax where increment of value after 1913 was not taxed. Usually, of course, discovery of oil or minerals increases the value of a property substantially over cost. This higher value was justified as an incentive to exploration and discovery to meet the World War I emergency. A comparable situation arose during World War II when percentage depletion, restricted until then to oil and gas (1926), and sulfur, metal mines, and coal (1932), was extended in 1942 to 3 nonmetals and in 1943 to 10 additional nonmetallic minerals. This expansion of percentage depletion was limited to the period of the war emergency to encourage production of minerals believed to be scarce for meeting the wartime demands. After both wars, these incentive features first introduced to meet temporary emergencies were not rescinded nor allowed to expire, but instead remained permanently in the tax structure. The first generalization is that temporary tax incentives are difficult or impossible to terminate.

A second observation from experience with depletion is that simplification of tax administration is often advanced at the expense of revenue or equity or both. To overcome administrative difficulties from the use of discovery value,[4] percentage depletion was allowed in 1926 for oil and gas wells. A figure of 27½ percent of gross income was chosen, apparently to give approximately equal dollar deduction under the new method as had been available under the discovery value method. But this percentage

[2] Since corporations account roughly for 80 percent of all depletion, an additional $500 to $600 million of depletion erosion would be estimated for the 1955 individual income-tax base. Revenue Revision of 1950, hearings before the Committee on Ways and Means, House, 81st Cong., 2d sess., vol. I,

[3] *Cherokee Brick & Tile Co.* (122 Fed. Supp. 59 (5 CCA, 1954)).

[4] Such questions as what was a new discovery, determination of value just after the discovery, and whether the owner was the discoverer plagued tax administrators.

method became more valuable as tax rates rose far above the 1926 corporate rate of 13.5 percent and as price levels increased, causing a high revenue cost to the Treasury and arousing the envy of other industries still restricted to cost or discovery value depletion. And the percentage depletion method, as noted above, unlike the cost and discovery value methods, has no overall limit so that deductions continue as long as a property is producing income.

A third lesson is that it is difficult to limit tax favors to just those who discover a new oil or mineral deposit or even to a few selected entire industries, however justified this special incentive is on grounds of relative risks or probable scarcity relative to needs for economic growth and national security. The other extractive industries regarded the availability of percentage depletion at liberal rates to a few industries as unfair discrimination and a tax deduction to which they were equally entitled. Politically the have-nots broke the dikes against percentage depletion in 1947, 1951, and again in 1954. Coverage was extended, percentage rates were raised, processes covered were broadened, and even mine residues were made eligible for percentage depletion. Apparent discrimination against certain industries was ended by extending the liberal deduction to all.[5] Companies exploiting sand and gravel pits and oystershells now qualify for percentage depletion along with oil companies and uranium prospectors, though at different rates.

The incentive value of percentage depletion for certain scarce minerals has been blunted by extending the favors to all. One problem is that there are no yardsticks to indicate the incentives needed to get the socially desired amount of investment in different fields. Congress has no guide to determine which industries are entitled to percentage depletion and what depletion rates produce the needed amount and distribution of investment in the extractive industries.[6]

The economic defense of generous percentage depletion results from national policy to provide an incentive or subsidy for certain selected minerals for reasons of national security. But on grounds of tax neutrality, tax equity, and conformity to business income accounting practice, the excess of percentage over cost depletion reflects erosion in the income tax base. In fact from the standpoint of accounting or economics, it is questionable whether these deductions are properly called depletion since they do not relate to any capital sum which is being exhausted. In some cases the income against which the statutory percentages apply includes not only extraction but also processes which are essentially manufacturing in character, such as finished brick or industrial talc.

The excess of percentage over cost-depletion deductions reduces corporate taxable net income by about $2¼ billion in 1955 and this figure, under existing legislation, will tend to increase with an expanding economy.

[5] No reduction in depletion rates has ever been voted by Congress. In 1954 every amendment extending percentage depletion was passed in the Senate. It was impossible even to get the necessary 10 Senators to request a record rollcall on any of these votes. See CONGRESSIONAL RECORD, vol. 100, pt. 7, pp. 9301–9319.

[6] The President's Materials Policy Commission, op. cit., vol. I. pp. 33–35. The Commission recommended that percentage depletion be retained because of its strong inducement to risk capital to enter the minerals field. It also recommended that no depletion rates be raised above the 1952 level and that recent additions to minerals eligible for percentage depletion be reexamined to see if incentives are needed for their production.

EXPLORATION AND DEVELOPMENT COSTS

Exploration and development costs are closely allied with the problem of depletion for mineral and oil producers. Current tax legislation allows these producers the option of capitalizing or expensing development and, with qualifications, exploration costs.

Oil and gas producers have enjoyed this option since 1917, first by Treasury regulation, now codified by the 1954 Internal Revenue Code. Intangible drilling and development costs include all costs of labor, fuel, repairs, materials, and construction, except cost of assets which have a salvage value, the latter assets being depreciated. The development costs eligible for expensing account on the average for about 75 percent of the costs incurred in bringing in a well.[7]

The Revenue Act of 1951 extended this option even more fully to mining. A taxpayer with mining interests may now decide each year for each mine to expense or capitalize development costs. Mine exploration and development costs can be deducted currently or set up as deferred expense to run over the life of ore benefited. In either case a deduction in lieu of cost depletion is given, but percentage-depletion deductions continue undiminished. Before 1951 all development costs in excess of current net income from a property during the development stage had to be capitalized.

This option to expense what are essentially capital costs is another loss to the tax base. Tax neutrality and conformity to business accounting would require that these costs be capitalized and amortized over the life of the assets or, if the assets cannot be moved, over the life of the mineral deposit, if it will be exhausted before the assets are fully depreciated.

The erosion here is twofold. First, the option to expense development costs allows deductions to be taken sooner than if these costs were capitalized and deducted gradually over a period of years. This means that total deductions to any given date are larger than if these costs were spread over several years. Secondly, expensing of development costs combined with percentage depletion allows double deductions for the same costs. To the extent that development costs are expensed, there is no need for depletion to recover investment. If 75 percent of the cost of an oil well is expensed, only the remaining 25 percent remains to be recovered tax free through cost depletion. But with percentage depletion, the annual and total deductions bear no direct relation to capital costs but depend on gross and net income. The dollar amount of deductions under percentage depletion is not influenced by the election to capitalize or expense.

Thus, with the expensing of development costs, percentage depletion becomes more than ever an additional deduction which must be justified on grounds other than recovery of costs for these are recovered through expensing. Leasehold costs cannot be expensed but they are usually in the form of royalty payments. Development costs may be offset against income from all sources, a feature which has attracted corporations (and individuals) primarily interested in other industries to finance new oil wells, thus reducing or even eliminating their taxable income while building up their capital assets.[8]

The Treasury study for 1946–47 cited above reported that 96.8 percent of all corporate development costs were claimed by oil and gas producers and that these deductions were about two-thirds of the excess of percentage over cost depletion. Applied to 1955, this suggests about $1.5 billion of costs which are expense in addition to being recovered through percentage depletion. Without percentage depletion, to avoid any erosion these costs would still not be expense but would be capitalized and deducted gradually over the life of the assets or the life of the well, whichever is shorter; from this point of view erosion would be at least $1.1 billion a year at first, declining gradually as annual depreciation charges accumulate for all such property in use.

The great value of these tax-saving features to the oil industry is documented by published 1954 annual reports. The following table compares the tax position of 3 companies which specialize in crude-oil production, 24 large oil companies combined (whose annual reports were available), and all corporations. Note that the effective tax rate increases from 9.2 percent for Tidewater, to 22.6 percent for 24-company aggregate, to 48.1 percent for all corporations.

Federal taxes and effective tax rates for oil companies and all corporations, 1954

	Net income before tax	Federal income tax	Effective tax rate	Per share	
				Earnings before tax	Federal income tax
	Millions	*Millions*	*Percent*		
Tidewater Associated Oil Co	$38.0	$3.5	9.2	$3.45	$0.32
Humble Oil & Refining Co	174.8	28.5	16.3	4.86	.79
Skelly Oil Co	36.1	6.7	18.5	6.28	1.16
24 large petroleum companies	2,541.0	575.0	22.6		
All corporations	34,042.0	16,369.0	48.1		

Source: Annual reports: Department of Commerce estimate of corporate profits and Federal tax liability.

Since the Revenue Act of 1951, mining companies may expense a limited amount of exploration costs, even if for a productive property. The limit on such costs of a mining taxpayer was raised to $100,000 a year and $400,000 total by the 1954 code. The cost here is relatively small, although taxpayers are increasing their tax saving by incorporating each mine separately. Exploratory expenses above these limits by mining corporations must be capitalized. Only exploratory expenses which lead to dry holes may be expensed currently by the oil and gas industry. This conforms to neutrality and accounting concepts.

Mr. DOUGLAS. Mr. President, among the other points which Professor Hellmuth makes is that, in 1954, one major oil company paid taxes at an effective rate of 9.2 percent, another at 16.3 percent, and still another at 18.5 percent. He shows further that 24 large petroleum companies paid taxes at an effective rate of only 22.6 percent.

Mr. President, I myself have been collecting some facts and figures on the taxes paid by oil and gas producing companies. I have collected figures for 27 companies since 1945, and I have

[7] Oakes, op. cit., p. 17.

[8] J. K. Butters, L. E. Thompson, L. L. Bollinger, Effects of Taxation: Investments by individuals, pp. 201–202 (1953). Some investors regard investments in the oil industry as a source of tax exempt income, competitive with State and municipal securities.

figures which show the amount of income taxes they have paid compared with their net income before taxes. As we all know, since World War II, these taxes for most corporations have been in the neighborhood of 47 to 52 percent. However, these oil and gas companies have paid taxes at a considerably lower rate than what one would believe they should pay and what other corporations actually pay.

I am calling these companies company A, company B, company C, and so forth, for they have done nothing illegal and I do not wish to condemn them, but merely wish to condemn the principles of percentage depletion. Thus, I have no reason to go after any of the individual companies, but I do wish to illustrate the effects of the great many legal tax avoidance provisions of the tax code on the taxes which these companies actually pay.

Mr. President, let us consider company W. From 1956 to 1958 inclusive this company had a net income after taxes of approximately $40 million and paid only $175,000 in taxes during this time. That was a foreign income tax, so the company paid no domestic income tax. The company paid nothing in 1957 or 1956 or 1955. From 1953 to 1958 the net income after taxes of this company amounted to approximately $65 million, and it paid no income taxes to this country, but actually received a net refund of $425,000.

Let us consider company S. In the year 1954 its net income after taxes was $5,198,179. The company paid only $43,000 in income tax or less than 1 percent. In other years it paid between 5 and 7 percent of its net income in the form of taxes.

There are many other lurid cases—company O, company X, company Y, company U.

Mr. President, a man with a wife and three children, earning $4,000 a year, paid more taxes than company W, with net profits over 5 years of $65 million. When these facts become known, as they should become known, how long will the American people be happy under those conditions?

Mr. President, I ask that tabulations in that connection be printed at this point in the RECORD.

There being no objection, the tabulations were ordered to be printed in the RECORD, as follows:

Company A

Year	Net income before income taxes	Income taxes	Net income after income taxes	Percent of income taxes to income before taxes

[1] State and foreign income taxes included.
[2] Credit.

Mr. DOUGLAS. Mr. President, these are only some of the facts concerning the depletion allowance. My amendment is designed to plug, in small part, a very large and a very serious loophole. It is so large it should be called a truck hole. In fact, when one considers all of the special privileges which are accorded to this industry and the small amount in taxes which it pays, I am amazed at the extreme modesty of my proposals.

My amendment is not a punitive one, for, first, it would not do away with the depletion allowance altogether and, second, it would not affect at all the small wildcat driller or the small producer, except to his competitive advantage. In fact, my amendment is written in such a way that the small royalty holder would not be affected by my amendment. However, the amendment is written in such a way that depletion taken on foreign assets by American companies would be reduced on the same sliding scale principle as would apply to domestic companies.

The reason for making a graduated reduction in the amendment is that drilling for oil and gas involves some risk.

It will be remembered that the scale which I propose is not to alter the present 27½-percent depletion allowance for individuals and corporations whose gross income from oil and gas is less than $1 million a year, but to reduce the percentage to 21 percent on the increments of income from $1 million to $5 million a year, and to reduce the percentage 15 percent on the increments of income above $5 million a year.

Some people have asked, "Why do you seek a graduated reduction?" The reason is that drilling for oil and gas involves some risk. It is estimated that only about one in nine wells which are drilled actually produces gas or oil. The small driller, with only a few wells over which to spread this risk, does not have enough wells to assure that he will hit the one in nine and may, in fact, drill 20 or 30 dry holes before hitting oil or gas. Consequently, without a great number of wells over which to spread the risk, he takes a greater risk than the large driller who will average one in nine successful wells if he drills 100 or 200 wells a year.

Indeed, the large driller will average more than one in nine successful wells, because usually he drills in fields which already have been developed, and which are known to contain large quantities of oil and gas. He is not a pioneer like the wildcatter, upon the frontier of the in-

dustry. My amendment reflects this greater risk for the small operator.

The Treasury estimated, a year ago, that the adoption of the amendment which I offered a year ago would result in a net revenue increase to the Federal Treasury of $305 million to $310 million per year. That was the increased revenue from domestic operations. Another $90 million should be added for foreign depletion. In other words, the amendment would have produced $400 million annually.

The amendment I offer is in a slightly modified form and might not pick up quite as much if based on the previous figures for depletion taken. However, the latest figures we have show an additional $262.5 million which has been taken in depletion allowance yearly since the $400 million estimate. Consequently, it is clearly true that this amendment, even in its slightly modified form, would bring in at least $400 million per year.

I would also like to have printed in the RECORD at the conclusion of my remarks a comparison of the tax advantages which come from an investment in an oil property as compared with an investment in depreciable facilities; a memorandum on the application of capital gains treatment to the oil industry; a paper on "Writeoffs, Cost Depletion, and Percentage Depletion," by Dr. Paul Haber; and a correspondence between Dean Griswold of the Harvard Law School and Mr. Rex Baker of the Humble Oil & Refining Co.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibits 1, 2, 3, 4, and 5.)

Mr. DOUGLAS. Mr. President, I am about to yield the floor. I should like to say for the sake of the RECORD that this is an abuse which the American public cannot tolerate for much longer. I wish to tell the oil industry, which is carrying out its propaganda against this very reasonable proposal, that if it does not accept this proposal it is likely in the future either to have the depletion allowance reduced across the board to 15 percent, or have it swept away. If the oil and gas industry knew what was good for it, it ought to give a medal of honor to those who propose this amendment. I am not seeking that medal, and if offered I would return it. Those who do not bow to justice sow the whirlwind and prophets will arise which know not restraint or moderation.

A great word today is "moderation." A great belief is in a bland life. This is the most bland proposal one could possibly conceive.

Mr. President, I see only three other Senators in the Senate Chamber, but I know Senators read even though they do not listen, and it is alleged that newspapermen upon occasion read. I have heard that questioned, but I am not one who questions it. So I hope that my comments, those of my colleagues who preceded me, and of my very able colleague from Pennsylvania [Mr. CLARK], who is to follow, may be duly noted. I yield the floor.

EXHIBIT 1

SEC. 7. PERCENTAGE DEPLETION FOR OIL AND GAS WELLS.

(a) Section 613 of the Internal Revenue Code of 1954 (relating to percentage depletion) is amended—

(1) by striking out, in subsection (a), "specified in subsection (b)" and inserting in lieu thereof "specified in subsection (b) and (d)";

(2) by striking out paragraph (1) of subsection (b) and inserting in lieu thereof the following:

"(1) Oil and gas wells.—The percentage applicable under subsection (d)(1)."; and

(3) by redesignating subsection (d) as (e), and by inserting after subsection (c) the following new subsection:

"(d) OIL AND GAS WELLS.—

"(1) PERCENTAGE DEPLETION RATE.—In the case of oil and gas wells, the percentage referred to in subsection (a) is as follows:

"(A) 27½ PERCENT—to the extent that, for the taxable year, the taxpayer's gross income from the oil and gas well, when added to (i) the taxpayer's gross income from all other oil and gas wells, and (ii) the gross income from oil and gas wells of any taxpayer which controls the taxpayer and of all taxpayers controlled by or under common control with the taxpayer, does not exceed $1,000,000;

"(B) 21 PERCENT—to the extent that, for the taxable year, the taxpayer's gross income from the oil and gas well, when added to (i) the taxpayer's gross income from all other oil and gas wells, and (ii) the gross income from oil and gas wells of any taxpayer which controls the taxpayer and of all taxpayers controlled by or under common control with the taxpayer, exceeds $1,000,000 but does not exceed $5,000,000; and

"(C) 15 PERCENT.—To the extent that, for the taxable year, the taxpayer's gross income from the oil and gas well, when added to (i) the taxpayer's gross income from all other oil and gas wells, and

(ii) the gross income from oil and gas wells of any taxpayer which controls the taxpayer and of all taxpayers controlled by or under common control with the taxpayer, exceeds $5,000,000.

"(2) CONTROL DEFINED.—For purposes of paragraph (1), the term 'control' means—

"(A) with respect to any corporation, the ownership, directly or indirectly, of stock possessing more than 50 percent of the total combined voting power of all classes of stock entitled to vote, or the power (from whatever source derived and by whatever means exercised) to elect a majority of the board of directors, and

"(B) with respect to any taxpayer, the power (from whatever source derived and by whatever means exercised) to select the management or determine the business policies of the taxpayer.

"(3) CONSTRUCTIVE OWNERSHIP OF STOCK.—The provisions of section 318(a) (relating to constructive ownership of stock) shall apply in determining the ownership of stock for purposes of paragraph (2).

"(4) APPLICATION UNDER REGULATIONS.—This subsection shall be applied under regulations prescribed by the Secretary or his delegate."

(b) The amendments made by subsection (a) shall apply only with respect to taxable years beginning after the date of the enactment of this Act.

EXHIBIT 2

COMPARATIVE TAX BENEFITS IN INVESTMENT IN OIL PROPERTY AND IN DEPRECIABLE FACILITIES

Taxpayer A invests $100,000 in developing an oil property. Taxpayer B invests $100,000 in, say, a manufacturing enterprise through purchase of $100,000 of depreciable facilities.

In the year in which these investments are made, Taxpayer A in computing his Federal tax liability, may claim a deduction for that portion of the $100,000 outlay which goes into intangible drilling and development costs, i.e., costs of labor, fuel and power, materials and supplies, tool rental, repairs of drilling equipment, etc., incurred during the drilling of wells and their preparation for production. Such outlays may aggregate two-thirds of the total capital outlay in bringing the well into production. Of his initial $100,000 outlay, therefore, Taxpayer A will have recovered, for tax purposes, all but one-third in the first year, through the privilege of expending certain capital costs. Most if not all of this remaining one-third will represent depreciable facilities, e.g., drilling rigs, structures, etc., which are subject to depreciation allowances for tax purposes. Assuming the average useful life of these facilities is, say 10 years, Taxpayer A may claim, for tax purposes, an additional deduction of about 6⅔ percent of his capital outlay.[1] Together with the intangible drilling and development cost deduction, therefore, he may claim in the year of his investment close to 75 percent of his outlay.

Taxpayer B, on the other hand, can claim as a tax deduction, with respect to his capital outlay in the year the investment is made, only the amount allowable as depreciation on the facilities he acquired. Assuming the average economically useful life of these facilities is, say 10 years (and ignoring salvage value), the most liberal depreciation he can claim would be 20 percent of his outlay.

Assuming both A and B are corporate taxpayers, taxpayer A will enjoy a tax advantages of $28,000 ($=52\ (.75\times 100{,}000-.20\times 100{,}000)$) in the year in which the investment is made with respect to direct capital recovery charges.

In addition, however, taxpayer A can claim a percentage depletion allowance equal to 27½ percent of the gross income produced by the oil property up to 50 percent of the net income therefrom. If, conservatively estimated, the oil property produces an annual gross income of $50,000 and a net income of, say, $25,000, annual depletion allowances will be $13,750. Accordingly, taxpayer A's total deductions for intangible drilling and development costs, depreciation, and percentage depletion will exceed his actual $100,000 investment in less than 2 taxable years. Over the same 2 years, taxpayer B's capital recovery deductions through depreciation will total 36 percent of his investment. In 2 years' time, therefore, taxpayer A will enjoy a tax advantage compared to taxpayer B of $33,713, or more than one-third of the original capital outlay.

Since total percentage depletion allowances which may be claimed are not limited by the unrecovered investment in the property, taxpayer A may continue to claim percentage depletion so long as the well continues to produce. In this example, therefore, he will be able to claim, during the remaining 8 years of production by the well, additional deductions of $110,000, or total deductions over the 10 years of about $210,000, more than double his actual investment.

Taxpayer A's actual savings, with a 52-percent corporate tax rate, will amount to almost $110,000, or 10 percent more than his actual investment. On the other hand, taxpayer B's actual tax savings will be $52,000, less than half taxpayer A's.

EXHIBIT 3

APPLICATION OF CAPITAL GAINS TREATMENT TO INCOME FROM OIL AND GAS PROPERTIES

A taxpayer owning rights in an oil and gas property may sell a fractional share in these

[1] Using the double declining-balance depreciation method, the first year's depreciation deduction would be 20 percent of $33,333, or $6,666.

rights and claim capital gains treatment with respect to the excess of the proceeds from the sale over his adjusted basis in the fractional share sold. The character of the fractional share as a capital asset within the meaning of section 1221 of the Internal Revenue Code of 1954 is not and has not been seriously questioned. The distinguishing characteristic of such fractional shares is that the original owner permanently divests himself of all interests therein, i.e., no provision is made for a return of the rights to him after a specified period of time, or after a specified volume of production or number of dollars of royalties realized with respect to the fractional share.

On the other hand, for some considerable time past there has been considerable confusion about the tax treatment of "carved out" oil payments. These differ from assignment or sale of fractional shares in that the taxpayer does not permanently relinquish rights to income in the oil and gas property but merely assigns or sells some portion thereof for a limited period of time. For example, he may sell the next 2 years' production, or the next 100,000 barrels, or the next $1 million worth of output. Upon satisfaction of these conditions, the rights revert to the taxpayer. Numerous court decisions, at variance with Treasury rulings, maintained that the proceeds from such sales should be treated as capital gains.

Quite recently, however, the U.S. Supreme Court in the Lake case, ruled that proceeds from sale or exchange of carved-out oil payments were to be construed as realization of future income and therefore subject to ordinary income-tax treatment. The Treasury Department apparently feels that the Supreme Court ruling is sufficiently broad and sufficiently definite as to preclude further dispute about the tax treatment of carved-out oil payments. However, the ingenuity of the American taxpayer must never be underestimated.

EXHIBIT 4

WRITEOFFS, COST DEPLETION, AND PERCENTAGE DEPLETION—AN APPRAISAL

(By Paul Haber, J.D., Ph.D.)

INTRODUCTION

Our Federal tax system is supposed to be based on the principle of progressive taxation or "ability to pay"—the higher the net income, the higher the rate of tax. In the case of taxpayers who engage in the business of crude oil, however, this principle is made to work in reverse—the higher the net income from the production and sale of crude oil, the lower the rate of tax.

There seems to be considerable misconception as to the true value of the tax subsidy to crude oil. It is generally assumed that it consists of "percentage depletion" only, which is supposed to be worth about $1.5 billion a year. Those who are acquainted with the subject know that the "writeoffs" subsidy is worth at least $7 billion more. Nobody, however, seems to be aware of the fact that "cost depletion" also represents a subsidy to crude oil. Because this last subsidy is concealed in a provision of the code which on the surface seems to have nothing to do with depletion, it seems to have escaped everybody's attention. It is the "sleeper" subsidy and it is costing the country at least $5 billion a year.

WHO ENTERS THE CRUDE OIL BUSINESS?

Consider the tax situation of individuals in the following groups:

1. The stockholders who own large blocks of stock in the corporation listed on the various stock exchanges, who receive fabulous incomes from dividends;

2. The active heads of these listed corporations, who receive substantial salaries for their services and dividends on any stock they may own in the corporation;

3. The professional advisers for these corporations, who receive large fees for their service;

4. The movie stars and other independent professional men who earn large salaries and fees;

5. The more than 150,000 partners, stockholders and sole proprietors, who own the thousands of medium-size businesses in this country, who derive substantial income from dividends, salaries, interest, or profits.

The more than 200,000 individuals who compromise these 5 groups derive incomes anywhere from $100,000 to $25 million a year, are subject to taxes in the very top brackets. Would it be reasonable to assume that if these people are smart enough to earn such large incomes, they are naive enough to pay it out in taxes? Especially, when the tax laws applicable to crude oil offer them a safe and sure way out by transforming the "progressive tax rates" into "regressive tax rates," so that instead of paying out 90 percent of their incomes in taxes and keeping 10 percent they are able to keep 90 percent and pay out 10 percent?

THE WRITEOFFS SUBSIDY

Mr. Smith, whose income is $1 million a year, decides to avail himself of the tax subsidies to crude oil instead of paying a 90-percent tax on the income. He spends his income buying fractional interests in a large number of pools or joint ventures which engage in the search for oil. In this manner, he spreads the risk over a large number of drilling operations, one or more of which are bound to find oil.

The million dollars thus spent by Mr. Smith is costing him $100,000, because the tax laws permit him to write off the cost of the search for oil, irrespective of whether the search results in a dry hole, a commercial producer, or a gusher. Only a small fraction of the cost of the search must be capitalized, less than 12 percent, when the well finds any oil at all. Thus, as far as the costs of the search are concerned, the odds are 9 to 1 in favor of Mr. Smith, because Mr. Smith is drilling for oil with money which would otherwise have gone to pay the income tax on the million dollar income. These 9-to-1 odds in favor of Mr. Smith more than make up for the risk of not finding oil. In actual practice, because the risk is spread over a great many drilling operations, the overall odds in favor of Mr. Smith are 20 to 1 that he will come out a happier man drilling for oil than he would be paying income taxes. When a taxpayer enters the crude oil business, he forgets about income taxes; there simply are not any to pay, as we shall see below.

The best evidence as to Mr. Smith's probabilities of becoming a happy and prosperous oilman can be attested by the more than 55,000 wells which are being drilled each year in this country, at an average cost of $150,000 per well, or a total cost of $2,250 million a year. We are drilling in this country 6 times as many wells as the rest of the world does, even though our oil reserves are less than one-sixth the world's reserves (our 30 billion barrels to the world's 200 billion barrels).

Drilling for oil is like playing dice with the Treasury: "Heads I win, tails you lose," with the Treasury always on the losing end. As a matter of fact, high tax rates are a boon to the crude oil industry rather than a burden, because the higher the rate of tax the lower the net cost (the after-tax cost) of the drilling operation. This explains why the American Petroleum Institute does not support the National Association of Manufacturers in its fight to reduce the top tax bracket from 90 percent to 40 percent. If the rate were reduced to 40 percent, the search for crude oil would fall off tremendously, because the taxpayer's share of the cost of the search would have been increased from 10 percent (100 percent less 90 percent tax) to 60 percent (100 percent less 40 percent tax). As a matter of fact, the phenomenal growth of the crude oil industry dates back to the year 1940, the year in which the wartime rates were first brought into the statute.

It is evident from the above that taxwise it is far more profitable when the drilling operation is done by a taxpayer (as an individual) who is in the 90 percent tax bracket than by a corporation which is subject to the 52 percent tax bracket. That is why at least 40,000 wells a year, out of the total of 55,000, are drilled by individual taxpayers and only 15,000 are drilled by the major oil companies. On this altogether plausible assumption, the value of the "writeoffs" subsidy is $6,557 million, computed as follows:

90 percent of 40,000 wells multiplied by $150,000	$5,400,000,000
52 percent of 15,000 wells multiplied by $150,000	1,157,000,000
Total value of tax subsidy	6,557,000,000

THE "COST DEPLETION" SUBSIDY

Having gotten rid of his original income in the search for oil, the taxpayer's next problem is to get rid of the income from the oil property after an oil discovery. Since the taxpayer has no cost basis in the oil property (having previously written off the cost of the search through "writeoffs"), the taxpayer cannot compute the deduction for depletion on the basis of full discovery value of the property. His deduction for depletion is limited to "percentage depletion" (27½ percent of the gross income from the property, not to exceed 50 percent of the net income from such property). This however, would leave him with a substantial amount of income from oil, subject to ordinary income tax rates. To relieve him of such excess income the code contains a "sleeper" provision which makes it possible for him to convert the income from the oil property into capital gain without his giving up ownership in the property.

During the hearings conducted by the Senate Committee on Economic Growth ("Federal Tax Policy for Economic Growth," 84th Cong., 1st sess., Joint Committee on the Economic Report), neither Prof. Horace M. Gray nor Prof. Arnold C. Harberger, nor Prof. James R. Nelson—who argued against the depletion subsidy—were aware of the "sleeper" provision in the code. Messrs. Henry B. Fernald, Lowell Stanley, and Arthur A. Smith, who argued in favor of depletion, were, of course, careful to keep the "sleeper" provision well hidden under cover.

The "sleeper" provision

Section 1239 of the 1954 code, which corresponds to section 117(o) of the 1939 code, provides as follows:

"(a) In the case of a sale or exchange, directly or indirectly, of property described in subsection (b)—

"1. Between a husband and wife; or

"2. Between an individual and a corporation more than 80 percent in value of the outstanding stock of which is owned by such individual, his spouse, and his minor children and minor grandchildren; any gain recognized to the transfer or from the sale or exchange of such property shall be considered as gain from the sale or exchange of property which is neither a capital asset nor property described in section 1231.

"(b) This section shall apply only in the case of a sale or exchange by a transferor of property which in the hands of the transferee is property of a character which is subject to the allowance for depreciation."

In simple English, this section states that when property which is subject to depreciation, such as real estate, patents, etc., is sold to a spouse or to a corporation controlled by the transferor (and/or the transferor's spouse, minor children, and minor grand-

children), the gain realized on the sale is ordinary income not capital gain. The same rule applies when the sale is from one corporation to another corporation, if the selling corporation owns 80 percent or more of the stock of the buying corporation. The purpose of this provision in the code is to prevent fictitious sales, for the sole purpose of establishing a higher depreciation basis in the hands of the "related" transferee by the payment of a capital-gains tax on the part of the transferor.

Section 1239, however, does not apply to property which is subject to depletion, as distinguished from property which is subject to depreciation. Consequently, a taxpayer (whether an individual or a corporation) who has no cost basis in an oil property (such costs having been previously written off from the taxpayer's income) is not limited to the deduction of 27½ percent of the gross income from the property ("percentage depletion"). The income from the property can be made fully deductible through "cost depletion" by the simple device of a "sale" of the property for its full discovery value to one's spouse or to one's "controlled" corporation. The 25-percent capital-gains tax incurred on the transaction is then reported on the installment basis, spread over the life of the oil property. In this way the income from the oil property automatically is limited to a maximum tax rate of 25 percent, payable as, when, and if the oil is produced.

The value to the crude oil industry of this loophole in the law is approximately $5 billion a year. Since the value of all the oil minerals produced in this country each year is $8 billion (see "Facts and Figures for 1956," p. 149, published by the American Petroleum Institute), the depletion, if it were computed on the "percentage depletion" basis, would have amounted to $2.2 billion (27½ percent of $8 billion). Computed on a "cost depletion" basis, the depletion is automatically increased from $2.2 billion to $8 billion, at a tax savings of some $5 billion.

PERCENTAGE DEPLETION

This subsidy, which has been assumed generally to be the principal villain in our tax laws, is by comparison with the last two subsidies a small handout. Its principal purpose is to scoop up the tax leftovers to which the taxpayers in the crude oil business may unexpectedly be exposed to. Thus, if the property should be found to contain oil after the deductions have been taken under the "cost depletion" methods, "percentage depletion" steps in to absorb the excess income with which the taxpayer is inconvenienced. "Percentage depletion" may be said to act as a sort of basket for any leftover income, left after the "cost depletion" subsidy has been fully availed of.

The value of "percentage depletion" subsidy to the crude oil industry is comparatively small, less than half a billion a year, as compared with a total of some $12 billion from the "writeoffs" and the "cost depletion" subsidies. This being the case, why does the crude oil industry so bitterly resist any cut in the 27½-percent rate?

Is it because by resisting a cut in the very smallest subsidy the people's attention remains focused on "percentage depletion" as the apparent villain and is thus diverted from the real villain—"writeoffs" and "cost depletion"—which are worth at least 25 times as much? There is no other explanation.

THE GROWTH OF THE INDUSTRY

As would be expected, an industry which is the beneficiary of three tax subsidies aggregating close to $13 billion a year would grow fast and big. The crude oil industry has grown very fast and very big. The shares of the listed oil companies are worth more than $50 billion, or more than the combined value of all the listed shares of the steel, chemical, and automobile industries. This does not include the value of the tens of thousands of unlisted companies, the stock of which is held by the hundreds of thousands of spouses, minor children, and minor grandchildren of the top bracket taxpayers engaged in the crude oil business. And to think that less than 20 years ago the crude oil industry was a small industry by comparison with either steel, chemicals, or automobiles.

The rate of the crude oil industry's growth may be better appreciated when the stock splitups of a few of the major oil companies are taken into consideration. Humble Oil Co., the second largest subsidiary of Standard Oil of New Jersey, has split its stock five times since 1922; four shares for one in 1922; three shares for one in 1933 (a depression year); two shares for one in 1943; two shares for one in 1951; two shares for one in 1957. Thus, each share of the 1922 vintage stock is today 96 shares, and this does not take into account the many stock dividends voted by the company from time to time. The stock is selling for approximately 100 times its earnings after taxes. What makes this stock so valuable? When 90 percent of a corporation's true income (concealed in the writeoffs and cost depletion) is exempt from income taxes and only 10 percent is subject to tax, a stock is bound to sell for 100 times the amount of earnings. In reality, however, the value of the stock reflects the fact that 90 percent of the company's true earnings are exempt from tax.

Standard Oil Co. of California split its stock twice in recent years: 2 for 1 in 1951 and 2 for 1 in 1956. The same is true of Texas Co. Standard of New Jersey had two recent splitups: 2 for 1 in 1951 and 3 for 1 in 1956. The latter company now has more than 200 million shares outstanding, selling around $50, or a total of more than $10 billion.

It may be interesting to observe that after each stock splitup the price of the postsplit stock soon catches up with the price of the presplit stock. Apparently you cannot kept a crude oil stock down. When a stock remains unsplit, as in the case of Superior Oil Co. of California, its price zooms to fantastic heights. This stock has recently been selling at $1,800 per share, even though its earnings are about $10 a share. Thus, the stock is selling at 180 times its net earnings. For the 5-year period from 1952 to 1956, the company wrote off on the average $36 million a year; its net income before depletion was $9 million a year, on the average; the average amount of income tax paid by it was $40,000 a year. Even a religious organization could not ask for more.

The Oil Record, published by the Petroleum Institute Projects, lists several hundred oil companies, giving their financial operations for the 5-year period from 1952 to 1956. These results, of 25 companies selected at random, are reproduced in the table below. To appreciate the significance of the figures in the table, it is suggested that they be examined carefully, reading each line across rather than down.

Name of company	Writeoffs	Net income	Income tax paid
Union Oil & Gas Co. of Louisiana	$7,000,000	$3,000,000	$30,000
Superior Oil Co. of California	36,000,000	9,000,000	40,000
Texas Pacific Coal & Oil Co	6,000,000	7,500,000	800,000
Franco Wyoming Oil Co	1,650,000	1,500,000	160,000
Kewanee Oil Co	7,000,000	2,000,000	75,000
Crown Central Petroleum Co	$1,700,000	$1,750,000	$500,000
General Crude Oil Co	6,000,000	3,500,000	200,000
Bishop Oil Co	600,000	350,000	18,000
Humble Oil Co	130,000,000	160,000,000	33,000,000
Tidewater Oil Co	35,000,000	935,000,000	4,000,000
Sunray Mid-Continent Oil Co	44,000,000	42,000,000	16,000,000
Phillips Petroleum Co	90,000,000	85,000,000	22,000,000
Reserve Oil & Gas Co	850,000	700,000	100,000
Skelly Oil Co	30,000,000	30,000,000	10,000,000
Eason Oil Co	700,000	600,000	45,000
Kerr-McGee Oil Industries	7,500,000	3,500,000	350,000
Anderson-Pritchard Oil Co	7,750,000	4,750,000	500,000
Argo Oil Co	2,750,000	4,000,000	225,000
Drilling & Exploration Co	2,900,000	750,000	22,000
Petroleum Exploration	500,000	750,000	80,000
Getty Oil Co	5,000,000	10,000,000	1,500,000
Aztec Oil & Gas Co	650,000	600,000	
Weststates Petroleum Co	575,000	150,000	30,000

Is it any wonder that the growth in the ranks of oil millionaires keeps pace with the growth in the ranks of unemployed? Such crude distortion of the principle of progressive taxation in the case of crude oil is bound to cause periodic depressions. When the peoples' purchasing power is being drained by high taxes in order to make up the loss of $13 billion in revenue which should come from the crude oil industry, there is bound to be unemployment. Some people in high office say that the current depression is temporary—the economy is catching its breath. A more correct explanation for the current condition would be: The people are taking a rest to get up more strength to pay the taxes which should be paid by our largest industry.

How can we fight the battle of peace with any degree of success when our own house is in such disorder? Our cause is not too convincing so long as people are allowed to bore into the vitals of our national economy through excessive drilling, to add to the swollen ranks of oil millionaires and the swollen ranks of jobless.

In order to eliminate one of the principal causes of periodic depressions and to restore a modicum of social justice, the following changes in our tax laws are proposed:

1. The deduction for intangible drilling costs should be limited to situations where the well finds no oil;

2. Intangible drilling costs should be capitalized when the well does find oil;

3. The loophole in section 1239 should be plugged, to discourage fictitious sales to related taxpayers or a controlled corporation, to prevent a stepped-up depletion basis based on cost;

4. Enact legislation to prevent the tens of thousands of reciprocal sales from one taxpayer to another, for the twofold purpose of establishing capital gains and cost-depletion basis. Apply the dealer rule to sales of oil properties which now applies to sales of real estate;

5. Eliminate percentage depletion as an unwarranted handout.

The above changes in our tax laws would discourage tax drilling and encourage scientific drilling. It would bring many billions of revenue to the Treasury.

The world's known oil reserves are estimated at 250 billion, enough to last us more than 100 years. Why not start using them?

The crude oil industry now enjoys a $3 monopoly price per barrel of oil and a $13 billion tax subsidy. The people can make it give up one or the other through reduced consumption of gas and oil.

EXHIBIT 5

PERCENTAGE DEPLETION—A CORRESPONDENCE [1]

(By Rex G. Baker, general counsel, Humble Oil & Refining Co.; Erwin N. Griswold, dean, Harvard Law School)

(EDITOR'S NOTE.—On Sepetmber 18, 1950, Dean Erwin N. Griswold made a speech before the tax section of the American Bar Association,[2] in which he referred to "gross inequities of the law in favor of the oil and gas interests." A number of newspaper accounts of the speech reported this as an attack on the percentage-depletion provision of the Internal Revenue Code.[3] On the basis of these reports, Mr. Rex G. Baker, general counsel of the Humble Oil & Refining Co., wrote the letter that began the correspondence reproduced herein. Neither author had any intention to publish these letters at the time they were written. No revisions have been made except to eliminate those parts irrelevant to the percentage-depletion controversy and to add footnotes where it has been thought useful to refer to source materials.)

SEPTEMBER 22, 1950.

DEAR DEAN GRISWOLD: You will recall our conversation in Washington concerning the percentage-depletion allowance for oil and gas wells.

Your remarks before the tax section regarding the depletion allowance received widespread publicity, and I am afraid they will be very damaging to the producers of oil and gas in view of your reputation and the responsible position you occupy in the education world.

Both in peace and in war the country must have and is very dependent upon oil and gas. Our civilian economy and the national safety would be jeopardized if we failed to maintain adequate reserves of petroleum and a backlog or reserve producing capacity. This means that it is essential to our country's welfare and safety that the exploration for oil and gas within the United States be continued at an accelerated rate due to increasing demands for petroleum and its products year after year.

The exploration for petroleum is an extremely costly and hazardous business. Oilmen must lease vast areas, must spend large sums in geophysical operations, must drill very expensive wildcat wells, of which four out of five on the average are dry holes, and must then make enormous expenditures of money in developing proven or semiproven acreage. Risk capital is not invested unless there is hope of reward.

The producer of oil depletes his capital asset. If he is to stay in the business he must find and develop new sources of supply. If the depletion allowance were taken off, our present tax laws would tax away a large portion of his capital.

It must be remembered that a large percentage of exploratory activity is carried on by the independent wildcatter. He often spends a lot of money and goes broke without finding anything. To say that he would be protected by charging off losses ignores the fact that until he finds oil he has no income against which to charge off his losses. This is quite typical of the wildcatter. If he finally succeeds in finding oil he creates new capital and must be rewarded for the risks he has taken. This reward can be adequate only if the depletion allowance is maintained.

The fact of the matter is that the oil industry has consistently spent in exploratory effort a good deal more than the 27½-percent depletion allowance. It has thus had to look elsewhere for funds with which to help finance its quest for oil.

The 27½-percent depletion allowance was established in 1926. Congress has made searching inquiries on several occasions since as to the necessity for the depletion allowance and the wisdom of maintaining it at 27½ percent. Each time after full investigation and inquiry it has sustained the 27½-percent allowance. This fact alone should, it seems to me, cause anyone to be sure of his ground before he launches an attack upon the depletion allowance.

Herewith I enclose some material which I believe you will find helpful in your future consideration of this matter: A booklet entitled "Let's Keep on Hunting Oil," some statistical data which will show that the 30 leading oil companies have found it necessary to secure new capital by issuing stock and borrowing, that their net worth has consistently been lower than the comparable figures of manufacturing companies, that a large percentage of the net investment of the 30 leading oil companies is in oil and gas producing facilities, data showing the ratio of dividends to net income, the cost of replacing crude petroleum, this cost having steadily risen, financial information for the 25 leading oil companies which shows moderate incomes, and a chart showing a comparison of petroleum prices with the price of coal and all commodities. This chart shows that the public have been the beneficiaries of the depletion allowance in the form of low prices for petroleum products.

Your attention is also invited to the hearings before the Committee on Ways and Means of the House of Representatives relating to the 1950 revision of the revenue laws.[4]

Yours sincerely,

REX G. BAKER.

SEPTEMBER 25, 1950.

DEAR MR. BAKER: Thank you very much for your letter of September 22, which has reached me this morning. I particularly appreciate its fair and restrained tone. This is in considerable contrast with the attitude which is often taken on this matter by others in your area.

As a matter of fact, I said nothing at all in my speech in Washington about percentage depletion. My remarks were directed entirely to the so-called in-oil payment provisions which had been added to the bill by the Senate.[5] This seemed to me, and still seems to me, to have been a rather clear matter of special privilege. Naturally, I am pleased that it was finally eliminated by the conference committee.

As I have indicated, I did not talk about percentage depletion and had no thought of doing so. There is lots to talk about there, though. In the first place, I would want to make it plain that I have never advocated eliminating the depletion allowance. That would be taxing capital. There would be no more sense in it than in eliminating the depreciation allowance.

Nor do I disagree with you at all as to the importance of oil in our economy, and the desirability of encouraging the industry, particularly with respect to exploration. I do think, though, that there is real reason to question whether the present 27½-percent depletion allowance is not excessive, whether it does not cost more than other ways of achieving the same results, and whether a very large proportion of the benefits do not now go in fact to persons who are not the ones who do the exploring and take the risks.

How about direct subsidies to explorers, for example? Might this not be a better way, and at the same time, a cheaper way? We use subsidies in maritime shipping and elsewhere in our economy. It might be a much more effective stimulus than the present backhanded way of doing it through the depletion allowance.

For example, may I call your attention to the sentence in your letter which reads as follows: "To say that he would be protected by charging off losses ignores the fact that until he finds oil he has no income against which to charge off his losses." I think you will agree that this is really no argument, since it is equally applicable to the percentage depletion deduction. The wildcatter gets no depletion deduction until he finds oil. In other words, the method I suggested then, as far as this point is concerned, would be just as effective, indeed, even more effective (because I would allow a 100-percent deduction until all principal costs had been recovered while percentage depletion allows only a 27½-percent deduction) than is the percentage depletion allowance.

You must know of situations where the present system of taxing oil production works out outrageously. I hear about actual cases from time to time, and they must come to your attention much more frequently. What I would like to see us do is to work out a system which would maintain adequate incentive and stimulate further production of oil without granting enormous tax advantages to drones and others who take little or no risk. I think it is a very real problem, and it would be a great contribution if people in your area, who are familiar with the situation, would devote themselves toward developing a sound and sensible solution to it.

At any rate, having the benefit of percentage depletion, it would seem to me to be the heart of wisdom for persons interested in the oil industry not to jeopardize that advantage by seeking to get additional tax favors which are less warranted. I refer, of course, to such things as the in-oil provision, and others which are suggested from time to time. There is a good deal of feeling about percentage depletion but is very likely that nothing can or will be done about it. I would point out, though, that the community property problem was finally solved, though it seemed for many years at least as difficult. The surest way that I can think of to focus attention of other parts of the country on the percentage-depletion situation, and possibly to produce fairly strong reaction, is to push it even more in the way of tax privileges.

Very truly yours,

ERWIN N. GRISWOLD.

---

[2] Sec. 86 A. B. A. J. 999, 1057 (1950).

[3] Internal Review Code, sec. 114(b)(3), provides as follows: "In the case of oil and gas wells the allowance for depletion under sec. 23(m) shall be 27½ percent of the gross income from the property during the taxable year, excluding from such gross income an amount equal to any rents or royalties paid or incurred by the taxpayer in respect of the property. Such allowances shall not exceed 50 percent of the net income of the taxpayer (computed without allowance for depletion) from the property, except that in no case shall the depletion allowance under sec. 23(m) be less than it would be if computed without reference to this paragraph."

[4] Hearings before Committee on Ways and Means on H.R. 8920, 81st Cong., 2d sess., 49–60, 100–101, 119, 133–134, 177–309, 733–740, 818–895, 901–926, 1267–1269, 1282–1286, 2975–2983, 2999–3001, 3017–3026, 3028–3029, 3040–3046 (1950).

[5] The Revenue Act of 1950, as reported by the Finance Committee of the Senate, provided that the amount received from the sale of the right to obtain a stated amount of production from an oil, gas, or mineral property, while retaining a continuing interest in such property, should be treated as proceeds from the sale or exchange of a capital asset. H.R. 8920, 81st Cong., 2d sess., sec. 214 (1950) (as passed by Senate); see S. Rept. 2375, 81st Cong., 2d sess., 66, 91 (1950).

OCTOBER 11, 1950.

DEAR DEAN GRISWOLD: I did not have an opportunity to hear your speech in Washington. My information came from remarks made by people who did hear it and from press reports. It is reassuring to be told that you had nothing to say in your speech about percentage depletion. As for the "in oil" payment provision referred to, I quite agree with you that this proposed legislation was not justified. I do not know who sponsored it. It is my belief that no responsible person in the oil industry did so. I, too, am pleased to know that the conference committee eliminated this measure from the bill that was finally passed.

It helps clarify our thinking for you to state that you have never advocated elimination of the depletion allowance. I agree with you that to do so would amount to taxing capital. The question is at what point the depletion allowance should place in order to encourage the generation of risk capital so essential in finding oil. Those of us in the oil industry who have lived close to the subject believe that the 27½-percent depletion allowance is more than justified.

The rate of 27½ percent for the depletion allowance has resulted over a period of years in a depletion which has been very nearly equal to the actual expenditures for finding oil by the industry. A survey of the Mid-Continent Oil & Gas Association of companies producing approximately half of the oil in the United States showed that in the period 1925–48 the expenditures for finding oil were within 10 percent of the allowable depletion. In 3 of the 5 years, 1944–48, the expenditures for finding oil exceeded the allowable depletion of this group of producers and for the 5-year period, 1944–48, allowable depletion was within about 6 percent of the expenditure for finding oil. These close relations indicate that the allowable depletion does have a direct effect on expenditures for finding oil and that the amount is not excessive in relation to the capital risked in the search for oil.

The rate of 27½ percent for depletion was determined by congress after study of experience on the part of the industry in the years immediately prior to 1926 when this method was first adopted. The rate has been reexamined subsequently a number of times and approved by Congress in spite of attack by the Treasury Department. The depletion provision has encouraged the search for oil, resulting in great discoveries and supplies. Even if the rate of 27½ percent had been too high at one time, it has become part of the industry's cost and price structure so that any change in the rate now would tend to affect supply and price.

You have raised the question whether the 27½ percent depletion allowance does not cost more than other ways of achieving the same results. Percentage depletion probably costs less than any other way which could be devised to compensate for the risks involved in the exploration for oil and to encourage the necessary amount of exploration. This is probable from an economic standpoint, because the provision stimulates efficiency on the part of operators, since depletion is limited to 50 percent of the net profit margin. The operator has, in addition to the normal stimulus of profit from efficiency, the further attraction of a tax incentive under the present law. The depletion provision also attracts into the search for oil some capital that otherwise never would be risked in the industry, some of which adds to the discovery of oil and some of which is lost forever.

Direct subsidies to explorers probably would cost more and be less effective than percentage depletion. In the year 1949 there were 14,109 dry holes drilled in the United States. The average cost of these wells was at least $50,000 and the total cost was about $700 million. The Treasury Department has never claimed that taxes could be increased by any amount approaching such a figure through a change in percentage depletion. Even if Government subsidies involved paying only part of the cost of dry holes instead of the complete cost, the cost of the program might be greater than $700 million a year because of the additional number of dry holes that could be encouraged by the subsidies. A drilling contractor, unable to find sufficient work to keep all of his rigs busy, for example, very probably would be led by subsidies into drilling wells even if he did not expect to establish production. Efforts to limit the cost of the subsidy by controlling the drilling location of wells would involve the Government in endless details and expense regarding geology, geophysics, and other matters, and subject the industry to stifling controls by men in Government who know nothing about the business of finding oil.

Subsidies in maritime shipping are closely related to the fact that the Government has imposed regulations on the shipping industry which result in high costs relative to the merchant marine of foreign countries. There is no comparable reason for subsidies in petroleum production. The oil-producing industry feels that it is entitled to reasonable tax treatment to avoid the taxation of the capital which it creates through the discovery of new reserves, but it does not seek subsidies which at best would be destructive of efficiency, difficult of interpretation and administration, and extremely expensive to the taxpayers. Oilmen are by nature individualists and are opposed in principle to Government subsidies.

You further inquire whether a very large portion of the benefits from the depletion allowance does not go to persons "who are not the ones who do the exploring and take the risks." Statistics cited by the Treasury Department in its latest proposal to reduce percentage depletion make it clear that the great majority of the benefits go to the companies—both small and large—which are now engaged in exploration and development.[6] All of the large oil companies which produce more than half of the oil in the United States, are engaged in extensive and expensive exploration and development programs. A review of the annual reports of these companies demonstrates the vast sums of money, running into the billions of dollars, which have been poured into the search for and development of new reserves within the past few years. The small operators, similarly, are spending sums proportionately as large considering their production. It is not true, as is sometimes alleged, that the small operator searching for oil today sells his property upon development of production. Occasionally some operators sell producing properties, principally to put their estates in liquid conditions to pay inheritance taxes, but the great majority of the operators, who discover production today develop their properties and produce them. Such operators are receiving the benefits of the reasonable tax provisions applicable to oil production as a result of taking risks in exploration and development.

The purchaser of a proved property, who is still taking considerable risks with respect to the amount of recoverable oil and the future price, generally pays a price which means that percentage depletion is of no benefit to him because it is less than cost depletion. At the present time, for example, developed oil reserves in the ground generally sell for about $1 a barrel which exceeds the percentage depletion, amounting to a maximum of 71 cents a barrel on the present price of $2.58 a barrel. If the percentage depletion provision is applicable and appears to place the purchaser in a position to save taxes, it influences the price he is willing to pay for the property and so results in a benefit to the operator who found and developed it. An inflationary trend which raises the price of all commodities may result in tax benefits even to a purchaser whose cost depletion at the time of the purchase exceeded the prevailing percentage depletion, but that is the reason for criticism of the conditions which bring about inflation and not for criticism of the operator who purchased an oil property on the basis that it was a reasonable investment at the prices then prevailing.

Perhaps the criticism that the benefits of percentage depletion go to persons who are not the ones who do the exploring and taking of risk is meant to apply to royalty owners. Even the royalty owner, however, may take risks and there are, in fact, many royalty owners who are also engaged in exploration and drilling. In fact, many independent operators regularly buy royalties as part of their business. Basically, however, the reason for application of percentage depletion even to the royalty interest is to protect the capital of the royalty owner which arises from the discovery and development of oil. The royalty owner, as much as the producer, has a known capital value as soon as production is established and is entitled to protection of that capital value before his income is subjected to the ordinary tax rates.

In your comments relative to the "in oil" provision you seem to imply that percentage depletion is an advantage amounting to a tax favor, even though you can see it is warranted more than the provision regarding oil payments.[7] In the opinion of the oil industry the percentage depletion provision is merely a recognition of the penalties inherent in the risks involved in finding oil, and is necessary to avoid a tax penalty amounting to taxation of its capital to which it should not be subjected. Percentage depletion merely places the oil industry, insofar as the taxing of capital is concerned, on an equal footing with other industries which do not create new capital through discovery of hidden resources.

Yours sincerely,

REX G. BAKER.

OCTOBER 14, 1950.

DEAR MR. BAKER: The figures which you cited in your last letter are interesting and significant. However, they do not, I believe, take account of the fact that a large proportion of these expenses are deducted in computing income taxes, in addition to the percentage depletion deduction. I am referring, of course, to the optional deduction allowed for intangible drilling costs, and other similar deductions.[8] The figures you give would be more persuasive to me if they showed a comparison between the costs on the one hand and the aggregate deduction on the other. By aggregate deduction, I mean not only percentage depletion, but also the deduction allowed for intangible drilling costs and other expenses. I do not believe that the comparison would be nearly as favorable as the figures you give indicates. Indeed, I should think this might be a major weakness in your argument.

Now let me turn to the last paragraph of your letter. The basic difficulty here, it seems to me, is one which is rarely disclosed in discussions from the oil country. This is the "discovery" allowance which is implicit in percentage depletion. I know of no other area in our tax law where very large increments in capital value are wholly exempt from taxation. You say that percentage depletion is necessary to enable the industry to preserve its capital. But this is

[6] Hearings before Committee on Ways and Means on H.R. 8920, 81st Cong., 2d sess., pp. 49–60 (1950).

[7] See p. 365, supra.

[8] U.S. Treasury Regulation III, sec. 29.23 (m)—16(b) 1943.

obviously using capital in a double sense, and in a sense which is not applicable to other taxpayers. For other taxpayers, that capital, recoverable through depreciation, or on sale, or otherwise, is their investment in the property. Only in the oil business do "discoveries" become capital for tax purposes. Frankly, I find some trouble seeing why this should be so.

You suggest that this is necessary because of the risks involved in finding oil. I do not minimize these risks. I know that in a sense, they are very great. However, I think a pretty good case can be made for the proposition that large outfits, like the Texas Co., or the various Standard Oil companies do not take very substantial risks, except in a sense analogous to that in which it is said that the New York Life Insurance Co. takes risks. Or, to put it another way, when the operations are on a large scale, as in the life insurance business, the probability that things will come out somewhat as planned is very great. I do not mean to say that the probability is nearly as great in the oil industry as in the life insurance business. Nevertheless, experience has shown over the past 20 years that the big oil companies stand a high probability of success. They have no difficulty recovering the costs of their unsuccessful ventures from the products of their successful ones. I really seriously question whether it can be shown that percentage depletion is a necessary compensation for risks taken in these cases. The situation with respect to wildcatters, and the problem of stripper wells, are quite different. But the big companies account for a very large proportion of the production. It is far from clear to me that percentage depletion is ever necessary either (a) to compensate them for risks taken or (b) to safeguard their capital investments.

Very truly yours,

ERWIN N. GRISWOLD.

OCTOBER 16, 1950.

DEAR DEAN GRISWOLD: Enclosed is a section of yesterday's Houston Chronicle which contains a good deal of information concerning the oil and gas industry.[9] It will give you some idea of the enormous cost involved in finding and developing oil and gas, and of the tax burdens borne by the industry.

Yours sincerely,

REX G. BAKER.

OCTOBER 20, 1950.

DEAR MR. BAKER: It was good of you to send me the oil progress section of last Sunday's Houston Chronicle. I have looked at this with much interest.

I must confess, though, that I am still not impressed by the tax burdens borne by the industry. I have no doubt that the industry presents many problems and bears a good many burdens. But its tax burdens would surely seem to be lighter than those carried by most other industrial enterprises. Take a look someday at the proportion of taxes to net income of three large oil companies, on the one hand, and three large nonoil industrial enterprises on the other. The figures are astounding.

If you say that you are not talking about the big companies, but about the little fellows, then I think we might meet on common ground. But a very high proportion of the tax benefit goes to the big companies.

Very truly yours,

ERWIN N. GRISWOLD.

OCTOBER 26, 1950.

DEAR DEAN GRISWOLD: It is a pleasure to receive your letters of October 14 and 20 on the subject of taxes paid by the oil industry. Your interest in this subject leads me to set forth a few additional points about the operations of the oil industry, for it seems that the lack of general understanding of the peculiarities of oil production is one of the principal reasons why the tax provisions relating to oil production are often criticized.

A crucial point, as brought out in your letter of October 14, is the question of contribution of the developer of oil production and the measure of the capital which he is entitled to recover free of tax. Two points seem pertinent on this question.

In the first place, let us consider two individuals investing $500,000 each, one in the search for oil and the other in an office building. The individual searching for oil may spend $100,000 on each of five different leases and establish production on only one of the leases. The other individual erects an office building with his $500,000. Would it be fair to allow the oil operator to recover as capital on his productive lease only the $100,000 that he put into that lease? If the individual is to risk his money in the search for oil it would seem that he would do so only with the prospect that he would recover more than the $500,000 spent on all of his ventures if he is successful. There is always the chance that he may find no production with his investment and all of his capital may be lost. To offset that risk there must be the attraction of a reward commensurate with his success if he finds oil. Another individual might venture $500,000 in the search for oil and discover twice as many barrels of reserves as his competitor, due to skill and good fortune. In this latter case he has made a contribution to society which is worth twice as much as that of his competitor. As soon as the oil is discovered and developed it can be sold in place, without being produced, for a known capital value, and, in case of such sale, taxes are on the basis of capital gain rather than current income.

The second point is that a producer of oil realizes two distinct kinds of income; namely, a capital gain on the sale of an asset which has been held for a long period of time and a short-term income on the operation of a producing property. The capital gain is measured by the difference between his investment in establishing the production and the price at which he could sell the oil in place and turn it over to someone else who would then make the current profit on the operation of the producing property. The percentage-depletion provision results in substantially the same rate of taxation as would result from the separation of income into its two component economic parts and the taxation of one part as capital gains and one at current income tax rates. In the absence of such consideration in the income tax laws, operators discovering and developing oil would be encouraged to sell their oil in place rather than to continue in business. It would seem to be in the public interest for tax policy to permit and encourage successful operators to stay in the business rather than to sell their properties to others who may have been less successful in the search for oil.

You raise the question whether the operations of large oil companies do not in effect reduce the risks of this business to those comparable with a life insurance company and suggest that the probability that things will come out somewhat as planned is very great. I am sure you would find that the life insurance companies do not consider their business in any way comparable with that of oil production, else with their large funds they would already have entered this business. A life-insurance company not only knows the risks but also the precise amount of money which it is going to spend and take in. The company engaged in the search for oil has not such assurance. It only knows that if it has average experience more than one out of three wells that it drills will be dry, but it has no way of knowing how much oil its productive wells will develop or what the value of that production will be when the oil is produced over a period of 20 or 40 years. A decline in the price of crude oil, for example, such as occurred between 1926 and 1933, can wipe out the apparent profits anticipated on the basis of cost and price realizations at the time of the investment. Naturally, the investments of the oil companies made during the depression seem very successful, but so do practically all other investments made at the same time. That fact does not provide any assurance against a decline in prices. The big oil companies are definitely taking very substantial risks which may break them as well as make them in the future. The Humble Oil & Refining Co., for example, has spent millions of dollars in Florida and to date established only a very small production. Unless our efforts and luck in that area improve, we stand to lose a very large sum of capital that Humble has risked in the venture. If we do lose our investment, we can deduct it in calculating our income tax payments just as any other business could deduct its losses on an unsuccessful investment, but that does not return to us the capital which Humble has risked. In the year 1949 alone Humble's dry-hole costs were $32,267,000, and even after consideration of the reduction in income taxes due to such loss it is clear that we risked and lost a very substantial sum of money. We can have no hope of realizing a return on that investment. Indeed, the investment itself is wiped out.

One final observation may help to throw additional light on the question of the oil industry's risks and the relation between its costs and deductions. I mentioned in the previous letter that a survey by the Mid-Continent Oil & Gas Association showed a close relation between the expenditures for finding oil and the allowable depletion. In your letter of October 14 you ask about the optional deduction allowed for intangible drilling costs. The same study previously referred to shows that the investment of the companies included in the survey in drilling and equipping productive wells exceeded their expenditures for finding oil. The sum of the expenditures for finding oil and for drilling and equipping productive wells was approximately twice the total allowable depletion of the companies for the period 1925–48. The investment in drilling and equipping productive wells was recovered only once as a deduction of intangible drilling costs and depreciation of tangible drilling costs. I did not mention this fact in my previous letter because percentage depletion relates to the depletion of the oil itself and, therefore, to the expenditures incurred in the search for oil rather than to the tangible and intangible investments in drilling, which are recovered through the option to expense intangible drilling costs and the depreciation of other drilling costs. This evidence is quite significant on the point which you considered a weakness in my previous argument.

In your letter of October 20, 1950, you suggest that we look at the proportion of taxes to net income for three large oil companies on the one hand and three industrial enterprises on the other. The point you are referring to can be illustrated from the comparison of the reports of United States Steel and Humble. In 1948 United States Steel showed a net income before Federal income taxes of $239 million, compared with Humble's net income on the same basis of $240 million, while United States Steel paid Federal income taxes of $109 million and Humble paid $54 million. In 1949 United States Steel paid $126 million in Federal income taxes on a net income before taxes of $292 million, whereas Humble paid Federal income taxes of $18 million on an indicated net income before taxes of $138 million. The explanation of the difference in the effective rate lies, of course, in

[9] Houston Chronicle, Oct. 15, 1950, sec. E.

the fact that a considerable part of Humble's net income really represents capital gain on the sale of its oil, and this capital gain should be taxed at 25 percent rather than at the normal corporate income tax rate, also in the fact that Humble is taking its depreciation on intangible drilling costs as it makes such investment rather than spreading the depreciation over the life of the properties. If Humble were to quit drilling or to reduce its drilling operations, the effective income tax rate would materially increase. Over a period of time the only difference between the effective tax rate on a steel company and an oil-producing company would be because of the percentage depletion, which is thoroughly justified in order to afford fair treatment of the capital gains realized on the sale of oil as it is produced.

I have taken the liberty to write at length on points suggested by your letters because you have shown a genuine interest in an objective inquiry about the facts with respect to the tax provisions on oil production. We find in our own operations that the business of exploration for and development of oil and gas is very complicated and not always fully understood even by some of the operators engaged in this business. It has been my endeavor to set forth information which may help to give you a better picture of the problems of oil production. We believe that the problems and peculiarities of the oil-producing business warrant and require the tax provisions now applicable with respect to percentage depletion and the option to expense intangible drilling costs.

Sincerely yours,

REX G. BAKER.

NOVEMBER 6, 1950.

DEAR MR. BAKER: Please let me thank you for your letter of October 26. I have read it with much interest, and I would like to make certain observations.

In the first place, it seems to me entirely clear that the costs of any oil operations should be fully deductible from income, including subsequent income from other operations, where there is no current income against which the costs may be deducted. Taking as an example the situation given near the beginning of your letter, if a person spent $100,000 on each of five different leases, and established production on only one of the leases, I would allow the full $500,000 to be deducted against income, other current income from any source if there was such income, or against subsequent income from any source. This could be done by a system of carryovers. If the present 5-year limit [10] on carryovers is not enough, I would have no objection to its being extended. I am entirely in favor of taxing no more than the net income of oil operations. I still find it somewhat difficult to see why we should tax less than that net income, which may be, and often is, the result of the 27½ percent depletion allowance, which goes on without limit, and without relation to (a) actual depletion sustained or (b) the aggregate amount invested by the taxpayer in oil production.

The rest of your letter is devoted to what seems to me to be the heart of your argument. In substance, you seem to be saying that all income from oil production should, in effect, be taxed as capital gain, and that this gives an adequate justification for the present depletion allowance. This argument, I must confess, I find very hard to follow.

Is it not clear that income derived from oil production is business income? Is there any other sort of business income which is taxable as capital gain? When the grocer sells you a can of peas, he sells you property, but the gain is taxable as ordinary income, no matter how long he has held the peas. The same is true of a manufacturer, or of a real estate operator. Indeed, the same is true of every other sort of business income. Why should income derived from oil production be treated in any other way? Perhaps the answer is that all income should be treated as capital gain. That would, of course, be attractive, and it would not result in discrimination between different types of business activity, as is the situation now. But it would hardly produce the revenue which, for better or for worse, is necessary under current conditions.

You mention the fact that in the year 1949 alone Humble's dry-hole costs were $32,267,000. But every nickel of that was deducted against other income, and Humble was not taxed on anything in excess of its net income. On the contrary, Humble paid taxes on much less than its economic net income, as can easily be shown by comparing the company's net income, in its reports to stockholders, and the much lower figure for net income which was undoubtedly given on its income tax return as a result of the 27½-percent depletion deduction. It is true that Humble risked and lost a lot of money on dry holes. But it is also true that it made even more money on other activities. And no one suggests that it should be taxed on anything more than its net income, after making full allowance for all the losing ventures. Frankly, I find it very hard to see why the dry-hole costs, fully allowed as tax reductions, have any bearing on the justification of the depletion allowances. There are many other industries which have to risk large sums, without why immediate or current tax deduction. I need to refer only to the steel industry for an illustration. There, large sums must be spent which are capital costs, and not deductible at all, except through carefully measured and limited depreciation deductions. In this respect, it seems to me that the oil industry has a great tax advantage, quite apart from the unlimited depletion deduction.

When all is said and done, your argument seems to boil down to the proposition that income from oil production should be taxed as capital gain. This appears near the end of your letter when you state that the percentage depletion deduction "is thoroughly justified in order to afford fair treatment of the capital gains realized on the sale of oil as it is produced." This argument seems to me to be clearly unsound. I can see no reason why, if valid at all, it would not be equally valid to all other income from production. Take, for example, the income from farms or from manufacturing. The farmer produces property. The manufacturer produces property. Yet no one has ever seriously argued, I believe, that their gains on the sale of this property should be taxed as capital gains, or that they are capital gains. The income from the conduct of the business is clearly business income. Oil production is clearly a business. I can see no reason why the income derived from the business of oil production should not be taxed as ordinary income. I repeat that I refer only to the net income, after full allowance for all costs incurred and for all capital actually invested in the business. But the percentage depletion deduction goes far beyond this. It gives a very large deduction, which bears no relation either to costs or to actual capital investment. I am still puzzled why anyone should think that it has a proper place in a fair and equitable tax system.

I have no hostility to the oil industry. On the contrary, I admire its great achievements, and its great contributions to the country, its economy, and its defense. But there are also many other forms of activity which contribute greatly to the country, its economy, and its defense. Why should they not all be treated the same? Why should the oil industry be the recipient of a tax deduction, enormous in the aggregate, which bears no relation to its costs, or to the capital invested in oil production?

Very truly yours,

ERWIN N. GRISWOLD.

NOVEMBER 8, 1950.

DEAR DEAN GRISWOLD: Your letter reveals the difficulty that even a man of your ability has in understanding the real nature of the oil business and the risks involved in finding and producing oil. After all, the basic principle involved in the depletion allowance is rather simple. The man who explores for oil must invest vast sums of risk capital. He may lose this capital altogether on unsuccessful ventures. He may through luck or skill succeed in finding an oilfield. If he does, he creates new capital. In producing that oil he depletes the corpus, and if the taxing away of his capital is to be avoided he must have a depletion allowance. Only in this way can he, under our existing tax rates, have enough left with which to do further exploratory work with the hope of finding new reserves to replace those depleted by production.

There is no way to compare his real situation with that of the steel manufacturer or the farmer mentioned in your letter. The man who builds a steel mill can depreciate every dollar of his investment in time, and through depreciation get his capital investment back tax-free. The farmer who raises a crop does not deplete the corpus of his farm, for he is able to grow a new crop year after year. Therefore, any sums he may realize from the sale of his crops are ordinary income. Of course, he can charge off depreciation on his tools and equipment because they wear out and must be replaced.

Thus in its essentials depletion does nothing more than afford the oilman an opportunity to replace his capital. This is exactly what is done with the owner of the steel mill who is allowed depreciation on his plant investment. To me this analysis is simplicity itself and I cannot see how its validity can be questioned.

I sincerely hope that you will be able to come to Texas some day. Perhaps you would enjoy a trip to the oilfields and an opportunity to witness the widespread wildcat operations which are taking place in this part of the country. Then I believe you could better understand why the enormous risk capital involved in operations must be regenerated out of the depletion allowance on the oil that is found and produced.

Sincerely yours,

REX G. BAKER.

NOVEMBER 27, 1950.

DEAR MR. BAKER: It seems to me that your position boils down essentially to one matter; namely, that oil producers are entitled to special tax treatment because their income is essentially capital gain.

The argument that the present percentage depletion allowance is necessary to enable you to recover your actual cost will not stand up, particularly as applied to a company like yours. I have made it plain that you, or any other oil producer, should be able to recover all of your actual investment before any tax liability is incurred. As a matter of fact, though, the combination of the deduction of intangible drilling costs plus percentage depletion gives you, and most oil producers, a deduction far in excess of your costs. I have no doubt, for example, that the aggregate of these two deductions taken by Humble in the years since percentage depletion became available is far in excess of the aggregate of Humble's actual costs in those years. There is no other type of business enterprise in this country which receives deductions in excess of costs through depreciation or otherwise.

In the case of certain independent wildcatters, it may be that a succession of dry

[10] Internal Revenue Code, sec. 122.

holes will produce costs which cannot be offset, under present laws, against subsequent income. This should be largely taken care of, however, by the present provision of the law allowing losses to be carried forward for 5 years. If this is not enough, I would have no objection whatever to any change in the law which would make it plain that no oil producer was subject to tax until he had received deductions equal to all of his costs which had not previously been effectively deducted from gross income.

Let us try to test your capital gains argument. Suppose we had a tax, like the English tax or the Canadian tax, in which capital gains are not taxed at all. Could you successfully maintain the position that income from oil production is not subject to tax at all, because it is capital gain? It seems to me that the answer to this is quite plainly "No."

The tax systems which do not tax capital gains all draw the line closely between what they regard as capital gain and profits from trade or business. It is clear that the operations of oil production are a trade or business, within this concept, as well as under our own law.

We do not have to speculate about this. The Canadian income tax is a clear example. Under that law, capital gains are not taxed. But it has never been seriously suggested, as far as I know, that the income from the production of oil and gas in Canada should be wholly exempted from tax on the ground that it is capital gain. On the contrary, it is clear that it is regarded as income from trade or business, and subject to tax as income. It is true that there is special allowance for depletion under the Canadian tax law. This may, however, be a reflection of the special deduction allowed in the United States law.

On the whole it seems to me that the best position you have developed is the capital-gain one. Even on that basis, though, I think you claim too much. Under our law capital gains are taxed, though at a maximum rate of 25 percent. But the percentage depletion deduction is supposed to reflect the old discovery-value allowance. The effect of this was to make the capital gain on the discovery of oil (or other minerals) wholly exempt from tax. In other words, discovery value—and, therefore, percentage depletion, to some extent—clearly goes too far. I think I could understand a provision which said that income from oil and gas production should be taxed as capital gain, and which, accordingly, completely eliminated the percentage-depletion deduction. Trying to get both capital-gain treatment, and the percentage-depletion deduction, as in the recently defeated provision about in-oil payments, is clearly trying to get too much. And if income from oil production was taxable as capital gain, I should feel that, under current conditions, the present 25-percent rate was far too low.

However, it still seems to me that taxing income from oil production as capital gain would be quite wrong. Such income is clearly income from the conduct of a trade or business and is not capital in its nature, even though it arises, in a sense, out of increases in the value of property. After all, the income of any manufacturer or retailer likewise arises out of increases in the value of property; namely, the property which is manufactured or sold. Such income, however, is clearly not capital gain. There is no better reason, as far as I can see, why the business income of oil producers should be taxed as capital gain merely because it is derived by selling the property that they produce.

You suggest at various places in your letters that the oil producer should be able to get tax free the capital he has produced. I do not know any other line of activity in which a person recovers tax free any capital he may have produced. Even in the case of capital gains, the basis for determining gain or loss will be only the amount actually invested in the property. It is only the oil industry which gets a return free of tax in excess of its actual capital investment.

Thus, the percentage depletion allowance turns out to be nothing more than a special subsidy. If that fact were more generally understood, I cannot help wondering whether the present allowance would be continued unmodified.

Very truly yours,

ERWIN N. GRISWOLD.

DECEMBER 12, 1950.

DEAR DEAN GRISWOLD: As I interpret your letter of November 28, you insist that oil producers receive special and unwarranted tax treatment and that all their income should be taxed as ordinary income, despite the fact that in your letter of September 25, you concede that oil producers are entitled to a depletion allowance, merely questioning the advisability of placing it at 27½ percent. Actually, the depletion allowance is applicable to relatively few oil-producing properties. In practice, cost depletion applies to the poorer properties. Furthermore, percentage depletion is limited to 50 percent of net income derived from a producing property. Thus, in general, it is improper to refer to 27½ percent depletion rate as applicable to all oil properties.

The producer of oil receives two different kinds of income. He realizes a capital gain or loss on the sale of an asset held over a long period of time and a normal income on the operation of a producing property. The income-tax law authorizes the taxation of income and not capital. Therefore, any capital gain from the sale of an asset held over a long period of time should not be taxed as normal income. Only the income derived from producing operations can justly be taxed as normal income. Consequently, the depletion allowance, which makes it possible to avoid the taxing away of capital, does not give special treatment to the oil industry and is completely justified. This is proved by the fact that the profit figures for the oil industry clearly follow the same pattern as for other industries.

There is no evidence that the tax provisions have resulted in advantage for oil producers as compared with businesses in general. The fairness of a tax cannot be judged by merely looking at the most successful operators, but must be tested by considering the average results for all operators.

The function of such profits as are realized after taxes is to direct investment capital into different activities in proportion to need. There is no evidence that profits have been so high as to attract any more capital into the oil industry than is needed. While the oil industry has constantly expanded, the expansion has contributed greatly to the maintenance of low prices for fuels, to economic progress, and an expanding economy. If the profit rate on oil production had been reduced by higher taxes, the capital attracted into the industry would have been reduced; additions to oil reserves would have been less. The smaller supply of energy would have retarded economic progress in the United States, and the price of gasoline and other petroleum products to the consuming public would have been materially increased.

Thus, it seems clear that the wisdom of the depletion allowance is more than justified, and experience has demonstrated that the depletion allowance is not excessive but has been only enough to generate new risk capital required in exploring for oil.

Yours sincerely,

REX G. BAKER.

Mr. CLARK. Mr. President, I thank my friend from Illinois.

The hour is late. Most Senators have, quite wisely, gone home long ago, and I shall not detain the staff or the Senate very much longer.

I think it important, however, that a few thoughts about the bill be placed in the RECORD tonight so that they may be read by Senators over the weekend and given due consideration when we come to vote on the bill next week.

I should like to attempt to put the bill in perspective by asking the question, Why do we need more rather than less revenue for the Federal Government? Why can we not afford to pass this bill as it came from the Finance Committee and cut another $750 million out of anticipated Federal receipts?

The reasons are indeed quite clear. The President's budget message estimated a surplus of $4,200 million for fiscal 1961. As a result of actions taken by the Senate and of actions which I am sure every Senator would agree the Senate is going to take, that surplus of $4,200 million would, if the bill were to pass in the form in which it is now before the Senate, be entirely eliminated, and for fiscal 1961 we would have, instead of a surplus of $4,200 million, a deficit of almost $200 million

I ask unanimous consent that there be printed in the RECORD at this point in my remarks a table showing how this figure was arrived at.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

FISCAL 1961

Estimated surplus (spending $79.8; revenue $84)		$4,200,000,000
Less net increases over budget estimate in appropriation bills passed to date		−1,382,873,468
Total		2,817,126,532
Increases:		
Defense, June 16		1,179,997,000
HEW, June 17		465,566,950
Interior, May 13		7,337,300
Total		+1,652,901,250
Decreases:		
Commerce, May 13		69,990,625
Treasury-Post Office		55,939,000
Agriculture		141,165,590
District of Columbia		2,932,567
Total		−270,027,782
Net increase		1,382,873,468
Less cost of Federal employee pay bill, June 17		−746,000,000
Total		2,071,126,532
Less postal pay increase (budgeted but not agreed to)		−554,000,000
Total		1,517,126,532
Less aviation fuel tax increase, etc., (budgeted but not agreed to)		146,000,000
Total		1,371,126,532
Less cost of other bills:		
Education (S. 900; H.R. 325), average	$612,500,000	
Housing	100,000,000	
Aging (McNAMARA)	±300,000,000	
Foreign tax credit (S. 20, H.R. 45) average 32.5		[1]−$1,000,000,000
Total		+371,126,532
Loss of revenue, H.R. 12381, fiscal year 1961		−565,000,000
Deficit		−193,873,468

[1] Estimated.

Mr. CLARK. Mr. President, even this estimated deficit of $194,673,468 is dependent upon revenues coming in at the $84 billion rate the administration estimated last January, and that rate is

based upon a gross national product of $510 billion. That rate, as we end fiscal 1960, has probably not yet been achieved. The prognosis is for a further decline in the rate of production in the steel industry, the bellwether of our economy.

Automobile sales and production are falling off. There are other signs on the horizon which would make a realistic appraiser of our economy's future think several times before he would be willing to admit that we could attain the average gross national product of $510 billion estimated by the Budget Bureau in January.

There is a very real chance that the deficit which I have indicated might be substantially increased.

Mr. President, we need this additional revenue for this short term, not only to keep our fiscal policy solvent and to create at least some small surplus at a time of substantial prosperity, if it unfortunately be substantial unemployment, but also in the long run it seems abundantly clear that we are going to have to have substantial additional Federal revenues to remedy the obsolescence in the public sector of our economy and to make it possible for us to remain secure abroad and prosperous at home.

I will not go into great detail in this regard, except to say that in the field of defense, foreign aid, public health, housing and urban redevelopment, water resources, Federal aid to municipal airports, area redevelopment legislation, increased allowances for public assistance, in view of the increase in the cost of living, and particularly, and most important of all, Federal aid to primary and secondary school education and to higher education, will increasingly require additional Federal revenue.

To this, I suspect, there is no possible rebuttal from anyone who has seriously studied the situation.

Dealing largely with the foreign policy aspects of this question which I have just raised, and ignoring temporarily the domestic problem, I should like to insert in the RECORD a statement by Thomas J. Watson, Jr., president of the International Business Machines Corp., made before the Subcommittee on National Policy Machinery of the Committee on Government Operations, in February of this year, before the distinguished chairman of that committee, the Senator from Washington [Mr. JACKSON].

I ask unanimous consent that a statement from Mr. Watson's testimony be included in the RECORD at this point in my remarks. I call particular attention to one sentence, which summarizes it all, and which I quote:

> One of our first sacrifices must be a willingness to accept higher taxes, if necessary, in order to accomplish our purpose of keeping America ahead of the world on all counts. There are no easy solutions.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF THOMAS J. WATSON, JR., PRESIDENT, INTERNATIONAL BUSINESS MACHINES CORP.

Mr. WATSON. Mr. Chairman and gentlemen, I appreciate the opportunity of appearing before this subcommittee.

The task to which you are addressing yourselves is of paramount importance to the future of our country and if I can be of some small help to you, I will be most happy.

You have heard several distinguished witnesses, men with vast experience in government and in education. Since I am just a businessman, I have been wondering what point of view I am bringing to your hearings. I have concluded that my point of view is that of a citizen who is concerned about the general posture of our country in today's world.

My qualifications for appearing are only those of an interested citizen and a businessman. The IBM Co. has been operating in an increasingly competitive market since World War II and we have had to make major changes in our operations to meet this competition. Therefore, I am sure that many of my reactions about our response to the international competition now being thrust upon our country are based upon my business experience.

Like many Americans, I have been devoting a great deal of thought to the Soviet problem. It interests me for several reasons. First, I visited the Soviet Union in 1937 as a tourist and traveled across Siberia to Manchukuo on the Trans-Siberian Railroad.

Second, I was stationed in Russia for 5 months in 1942 as a U.S. Air Force pilot and saw a great deal of the people and the country. Third, and most important of all, I believe the present challenge of the Soviet Union for world domination is serious—the most serious problem our country has faced in decades. If we meet the problem sensibly, it can certainly be solved and we can continue as a world leader.

My whole thesis today may be summed up in one word—realism. We must be realistic about the Soviets—their strong and their weak points—and we must be realistic about our own accomplishments and shortcomings.

There is a singular lack of realism in our modern United States and it has evolved quite naturally. We have built the finest form of government and the finest way of life in history. We live amid creature comforts and luxuries which are almost unbelievable to most of the rest of the world.

Everything we have is so nearly perfect that increasingly since World War II we have devoted our attentions toward preserving the present way we live—toward preserving the status quo.

No nation bent on preserving the status quo has survived. We cannot remain stagnant. We must rise to the tasks that face us as a Nation, whether or not we like the situation or the tasks, in order to advance steadily and retain the world leadership that we enjoy today.

I believe that the most essential requirement confronting us as a Nation is this: To honestly recognize that we face the challenge of our lives in the Soviet Union. Realism, as I have said, must be a part of every American's outlook. It is a primary requisite for victory over Russia.

It would be nice to think that everything the Russians do is wrong and ineffective. This conclusion tends to make us underestimate the potential of the Soviet Union. This we are doing almost daily.

While we are unrealistic and comfortable in our present way of life, the Russians are completely realistic—realistic to a degree almost inconceivable to Americans—about what it takes to achieve their goal of becoming the most powerful nation on earth. I began to appreciate the realism of the Russians during my stay in their country in 1942.

This last summer I went back to visit the Moscow Fair where an IBM machine was answering questions about American life. Here again I was impressed with their realism. Listening to their questions to our bilingual people convinced me that they believe in communism. They do not strongly object to their low standard of living because they believe that this is necessary to the achievement of their goals.

They have an intense pride in their jet aircraft, their use of atomic energy, their sputniks; in fact in all of their progress. Incidentally, within Russian borders one hears only of peaceful uses of atomic energy, not the military uses.

They are master propagandists. There are displays of missiles throughout the country and they are usually not models, but missiles that have been somewhere and show it by the marks made as they reentered the atmosphere.

It seems to me to be completely unrealistic to hope that the Soviet empire will topple automatically. It seems equally unrealistic to think that if somehow Soviet citizens could be brought to America in large numbers to see how we live that they would then go home and change their system to one of democracy. The Soviet system is well enough accepted by the average citizen so that the possibility of drastic change or revolution can be discounted.

If we can begin to look at the Soviets in these terms, we can begin to achieve a realistic appraisal of our present status and a realistic plan for continuing our world leadership.

Coexistence with the Soviet Union may be possible and may be achieved without sacrifice of pride or dignity, but it can only come about by being prepared for war until an acceptable disarmanent agreement is reached.

We all recognize the ambition of Khrushchev for Soviet success and world control. I spent 3 hours with him in an IBM plant in San Jose last October. Contrary to some of his appearances, he was reserved and polite with us. Underneath his reserve, however, one could feel a formidable personality—a driving ambition—great vitality and leadership ability and a cold realism that was almost physical. He and his people know exactly where they want to go and how they propose to get there.

I believe that the winning of any contest begins with ideas. The creative thinker is the priceless ingredient of progress. We have been famous for nearly 200 years for fostering an atmosphere which has produced the original thinking we have needed to build our Nation. The atmosphere is not as conducive as formerly to the breeding of new ideas.

It is all too easy to criticize new and creative approaches. President Eisenhower's invitation to Mr. Khrushchev was a courageous and imaginative step in seeking a solution. Yet he was criticized. This tendency to reject the new and the creative act is all too prevalent in our country today.

These problems of national attitude are compounded by our confusion about our competitive posture in military and technological areas.

Freedom of speech is basic in a democracy, but we should be ingenious enough to have freedom of speech without confusing the public about our military posture. Perhaps we need a new governmental approach which will provide that all debate on a vital and controversial subject remain behind closed doors until there is some unanimity of opinion, or at least until the majority and minority views are crystallized.

I suspect that I am discussing a question of degree and governmental discretion. These same debates must have arisen in World War II, but rarely did they reach the public. This must have been because emergency had forced us into settling our military and budget differences privately, in order not to confuse the country and give aid and comfort to the enemy.

Perhaps we must realize that a similar emergency exists today. If we did, public

testimony of subordinate military commanders against the official position of their commanding officers would be unheard of. You understand, I am not in favor of suppressing any point of view which could possibly be helpful to the national defense. I am just discussing what is the right place and the right time for such testimony.

In appraising Soviet advances—military and otherwise—one must be able to compare their accomplishments with our own. To do this is extremely difficult, for some say we are in a good competitive position while others say we are hopelessly behind.

The facts probably lie somewhere in between these points of view. Unless the Government can agree to some facts on a nonpartisan basis, it is extremely difficult for the man in the street to be anything but confused.

I believe we would do well to look at each other and admit that the Russians are ahead of us in certain areas. While we announced for months ahead of time that we were going to put up a satellite, the Russians quietly launched sputnik. Then we began to talk of how we were going to get to the moon. To our shock and dismay, lunik was already there—first again.

The next game apparently is to be a man-in-space game. We have been preparing for that by headlining the training activities and personalities of our seven astronauts. While I would not depreciate them for one instant, perhaps it would be better to say less until the mission is completed.

Space accomplishments have captured the imagination of the world and we must recognize that we cannot be second best in space for very long and still command respect and hold world leadership. In a very real sense, we are in a war of scientific development as well as a war of production. We must have firsts, firsts in space and firsts elsewhere, if we are to continue to be leaders.

We may gain comfort and peace of mind by mixing our own doubts about our abilities in rocketry with thoughts of the superiority of our Air Force and other weapons. However, this kind of thinking is not conducive to long-term world leadership.

We have some firsts today and we can be proud of them. The atomic submarine and its trip under the pole are very real firsts, and there are others, but we need more.

In addition to space, military, and other technological challenges, the Soviets now challenge us in the underdeveloped and uncommitted countries of the world. These nations have a population of about a billion people—a third of the world total. They have a great deal in common, despite their different cultures and varying stages of economic development. Radical political, economic, and social change is going on in all of them.

These emerging peoples are susceptible to new governmental philosophies. What their choice will be depends largely on how interested we, in our warm, comfortable America, become in their problems and how well we sell our ways to them. If we do not sell our democratic way successfully, the Soviets will be there seeking to sell their Communist way.

To those not living in the advanced industrial nations, communism, on the surface at least, is easy to describe with appeal. It offers what sounds like a magic road to success, proposing to take from the rich and give to the poor. Couple this magical sounding concept with recent Soviet technological successes and you have a package which cannot help but give the underdeveloped nations pause.

These peoples—this one-third of the world—demand economic development that will keep them from starving, medical attention that will keep their children from dying at an early age, and education and technical assistance to help them help themselves.

If we win these peoples to a way of life compatible with our own, the Western World will be a majority—but if most of them are lost to communism we will be a small minority in the world.

So we must find a way to draw these uncommitted and underdeveloped nations and peoples to us. One important way of doing this is to increase our trade with them. To increase trade, we must continue to reduce our tariff barriers on a reciprocal basis. In this area also we are challenged by the Russians. Mr. Khrushchev has told us that they value trade least for economic reasons and most for political purposes.

We must realize that the Communists are fully committed to the contest for the underdeveloped nations while we, at times, seem uncertain and unwilling to decide whether we are in the race or not. We must decide to enter this race. Once decided, we must adhere to the program year in and year out. We invest abroad to help ourselves and to help underdeveloped nations. Let us not get this investment in our future confused with altruism. It is a sheer necessity.

To meet these challenges of the Communists will require sacrifices. The English author, Barbara Ward, put it this way:

"At no time in history have nations been granted the privilege of defending themselves both successfully and also at a level they think they can afford. There is no reason to suppose that history has obligingly reversed itself for the benefit of the West."

We cannot just go along with a business-as-usual basis and hope to win. We have got to throw our economy into full-scale competition with the Russians, meeting their challenges whenever and wherever they occur. This is not an easy decision because realistically it means a departure from our present way of life.

We want to spend everything that is necessary for all of the programs to strengthen America; we want a balanced budget and we want the same or lowered taxes. These three are incompatible. One of our first sacrifices must be a willingness to accept higher taxes, if necessary, in order to accomplish our purpose of keeping America ahead of the world on all counts. There are no easy solutions.

I do not agree with people who suggest that we must not push our economy to any point necessary to win in competing with the Soviet because we then might lose what has made our country great. If we do not impose the strains necessary to win, it is obvious that at best we will live in a Soviet-dominated world, and at the worst in a Soviet province.

All of us are strongly opposed to greater Government controls, but I would rather have greater control by our Government under our system than to discover one day that "business as usual" had not been sufficient to win the battle.

Of course, there are many places in Government where savings can be made. There is no one—in or out of Government—who would deny this fact. The difficulty is that each of us wants to make the savings in a different area, usually in an area in which we are not vitally concerned.

I hope that a more bipartisan approach to this problem in the future can result in great savings, but I would hate to feel that any of our actions to combat the Soviet challenge would have to wait for these Government savings. Our President has addressed himself to this matter and has made substantial savings. We have the Hoover report on the same subject with attendant improvement.

It would be fine, of course, to make additional economies, but I would hate to have the village burn while the people debated whether to buy a new fire engine.

We must make the changes in order to survive. If we do not make our economy compete effectively with the Soviets, then they, not we, have the superior system, not from the point of view of rights of individuals, but by the very fact that theirs is the system that survives.

Certainly we do not want to spend 1 penny more than necessary, but an error on the low side might place this country in great jeopardy.

With an economy that is producing twice as much as the Soviets, and is producing four times as much for individual consumption per capita, these sacrifices should not really hurt us much. But even if they do, we all will welcome whatever sacrifices are necessary when we realize the alternatives.

When a business is faced with problems due to increased competition, one of the fundamentals of reorganizing to meet this threat is to have a single individual charged with each responsibility within that business. This is done simply so that he can be rewarded if he does well or can be relieved if he does poorly.

It is extremely difficult to get a similar definition of responsibility throughout the Government, and yet I believe we must seek ways to achieve this type of organization if we are going to be able to move fast enough in the future to adequately respond to the Soviet challenge.

With the right organization and the right men, businesses are able to respond adequately. The responsible leaders must have complete authority and responsibility in their areas of interest. They must be able to stop study and discussion at any point where they feel they have enough facts upon which to make a decision.

Study and review beyond a certain point in the decision-making process of a business merely delays the decision and confuses the issue. Business managers must be courageous enough and have top management backing to make the decisions at the right time. The bigger the business, the greater the temptation to delay decisions and have committees study the problem. Thus, without very aggressive management, big businesses often slow down.

When one comes to the problems of managing the biggest business of all—the Government—the task is staggeringly great. Nevertheless, I am persuaded that the business approach offers the greatest chance for success.

This has necessarily been a very general discourse. In conclusion, may I summarize some of the things that I, as an ordinary citizen, believe we must do to bring our country successfully through this difficult time.

Our national goal should be clear superiority over the Soviet Union in all possible areas and we should believe enough in our democracy so that we will not be reluctant to fully enter the contest.

We must be coldly realistic about Soviet successes and our own and balance one against the other to evaluate where we stand.

We are in a crucial contest with the Soviet Union. Therefore, we must be willing to accept any sacrifices necessary to win.

We must cultivate an atmosphere which will foster the type of creative and unorthodox thinking necessary to find effective solutions to the Soviet problem.

We must eliminate or cut back all programs of Government spending which our commonsense tells us cannot be tolerated in an emergency.

We must balance our budget and even strive for debt reduction. To do this may well require more taxes for we must spend more in the areas where the Soviets are ahead or moving up.

Our foreign aid programs must be held at reasonable levels until the underdeveloped nations are economically independent. We must realize that we invest here in our enlightened self-interest and not for charity.

We must somehow avoid the type of public debate that confuses the country.

These are a few of the things we must do. They will begin to be accomplished when information flowing from Government to the people becomes clear enough so that the people can understand the emergency.

Finally, taken out of context, much of what I have said might be construed to be critical of either political party or of the administration. I want to emphasize that our present position is, in my opinion, no more the fault of one party than the other. The events which have brought us to our present status have evolved under at least two administrations, one of each major party.

I believe the Government is the shadow and the measure of the thoughts of the citizenry. Our present dilemma is caused by indecision on the part of most Americans.

The majority of Americans do not feel that the Soviet Union has a real possibility of dominating this Nation in the foreseeable future. When this possibility is fully understood, there will be no reluctance on the part of anyone to undertake the contest and win.

Mr. CLARK. So the question arises, if all of this be true—and I think it is difficult indeed to refute these contentions—where are we going to get the money? The money, I believe, must come first in terms of better tax enforcement. In this regard Congress has taken a step forward, although not as long a step forward as I feel we should have taken, when we gave to the Collector of Internal Revenue two-thirds of the sum he asked for to hire additional tax enforcement personnel.

He asked for 3,000 additional personnel, which would still have left the bureau with 2,000 fewer than had served during President Truman's administration, although the number of tax returns and the number of taxpayers have increased by 10 or 20 percent since that time. At any rate, we granted him funds to hire 2,000 new men, which is not enough, although it is a great deal better than last year.

The next obvious source of additional revenue is the closing of tax loopholes, which has been the subject matter of the debate during most of the day. These tax loopholes are open and notorious.

Proposed legislation necessary to close them was drafted many years ago. It has been refined during the last few years. It is now, I submit, in shape to be passed without any successful contention that the proposed loophole closing legislation has not met either the test of legal draftsmanship or the test of justice and equity.

There have been proposed eight tax loophole-closing amendments, which either have been already offered or will be offered by Senators who will present these amendments before the bill comes up for final action.

I ask unanimous consent that a table I prepared showing the revenue increases to be expected from the adoption of these amendments may be printed in the RECORD at this point in my remarks.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Revenue increases to be expected from amendments

Decrease in oil and gas percentage depletion from 27½ to 15 percent (DOUGLAS)	$400,000,000
Repeal of 4 percent dividend credit (MCCARTHY)	355,000,000
Elimination of depletion to finishing processes (GORE)	600,000,000
Redefinition of capital asset (CLARK (G))	500,000,000
Expense accounts (CLARK (H))	250,000,000
Withholding dividends (PROXMIRE (J))	300,000,000
Withholding interest (PROXMIRE (J))	800,000,000
Repeal of capital gains treatment of stock options (GORE (B))	
Decrease in overall percentage depletion (GORE (A))	200,000,000
Total	3,707,000,000

Mr. CLARK. I note that with respect to one of them, the repeal of stock options, which will be offered by the Senator from Tennessee [Mr. GORE], we have been unable to obtain a meaningful estimate of the increased revenue which we can anticipate if that amendment is adopted. However, it is clear that the revenue will be very substantial indeed.

It may be asked, why can we not wait until next year when the Ways and Means Committee of the House has promised us an overall, comprehensive revision of the Internal Revenue Act will be made? My answer to that must be that we cannot afford to wait, because if there is one thing that we cannot afford to have during fiscal 1961 it is a deficit, when we had been promised by the President a surplus of $4,000,200,000.

I believe it particularly important that we should close these loopholes and obtain the additional revenue which will be used to remedy the obsolescence in the public sector of our economy, and keep us strong abroad in terms of mutual security and of our national defense, so that when the new President moves into the White House next January, be he Republican or Democrat—and I am confident that he will be a Democrat—the President will be able to move forward with a host of programs, both domestic and abroad, which I am confident he will want to go forward with, and his hands will not be tied because there is not adequate revenue to enable him to work his will.

I should dislike to think that the first thing we had to do when we came back next January would be to raise taxes.

I suggest that the way to do that is to close the tax loopholes, so that the President will be able to operate until such time as he can get shaken down in his new job and present to Congress the requirements for a budget which are necessary to keep us, as I said before, strong abroad and prosperous at home.

I should like to turn briefly now to the two amendments which I propose to offer at a later date when the bill comes before the Senate next week for final action. These are two of the eight amendments which I referred to a little earlier.

I ask unanimous consent that my first amendment, which deals with the problem of business expense deductions, and is identified as "6-17-60—H" may be printed in the RECORD at this point in my remarks.

There being no objection, the text of the amendment was ordered to be printed in the RECORD, as follows:

At the appropriate place insert the following section:

"SEC. . DISALLOWANCE AS TRADE OR BUSINESS EXPENSES DEDUCTIONS OF CERTAIN EXPENDITURES FOR ENTERTAINMENT, GIFTS, AND CLUB DUES.

"(a) AMENDMENT OF SECTION 162.—Section 162 of the Internal Revenue Code of 1954 (relating to trade or business expenses) is amended by redesignating subsection (d) as (e) and by inserting after subsection (c) the following new subsection:

"'(d) DEDUCTIONS DENIED IN CASE OF CERTAIN EXPENSES.—No deduction shall be allowed under subsection (a) for any expenses paid or incurred for—

"'(1) entertainment (unless entertainment is the trade or business of the taxpayer and the expenses are paid or incurred to further such trade or business), except that the expenses paid or incurred for food or beverages for the primary purpose of providing an opportunity to advance the trade or business of the taxpayers may be deducted, if such expenses would have been deductible prior to the enactment of this subsection;

"'(2) gifts, except that any gift by the taxpayer in the course of his trade or business to any person may be deducted in an amount not exceeding $10 per person per year, if such expenses would have been deductible prior to the enactment of this subsection; or

"'(3) dues or initiation fees in social, athletic, or sporting clubs or organizations.'

"(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to taxable years beginning after the date of the enactment of this Act."

Mr. CLARK. Mr. President, this amendment proposes to disallow the deduction of certain expenditures for entertainment, gifts, and club dues as ordinary and necessary trade or business expenses under section 162 of the Internal Revenue Code.

First. Entertainment. The first part of the amendment, which would make nondeductible expenditures for entertainment with two exceptions noted below, would end the legalized tax evasion now practiced by America's expense account aristocracy.

It is no secret that the rule permitting the deduction of ordinary and necessary expenses has been stretched to cover some rather extraordinary and unnecessary payments. A doctor has been permitted to deduct the expenses of a cabin cruiser—Richard A. Cutter (21 TC 170). A tavern owner has been permitted to deduct the cost of a Christmas party given for children of the neighborhood to promote good will with their parents—A. D. Miller (TC memorandum, Docket No. 23754). The cost of tickets to hit musicals, shows at the Stork Club, football and baseball games, the Mardi Gras and the Kentucky Derby have all been claimed as part of the ordinary and necessary business expense of entertaining prospective customers or clients—Rothschild and Sobernheim, "Expense Accounts for Executives" (67 Yale Law Journal 1363, July 1958); Carson and

Weiner, "Ordinary and Necessary Expenses" (Ronald Press, 1959).

All of these luxury expenditures by the expense account elite would be disallowed as tax deductions under the language of this amendment preventing deduction of entertainment expenses.

This proposed rule contains two exceptions. First, those taxpayers in the business of entertainment would, of course, be permitted to deduct the expenses of entertainment if the expenses were paid or incurred to further such trade or business.

Secondly, the expenses of buying a dinner or drink for a prospective customer, if deductible under existing law, would continue to be deductible if the expenses were paid or incurred for the primary purpose of providing an opportunity to advance the trade or business of the taxpayer. This language has been drafted to permit, in most cases the deduction of the expenses of wining and dining customers, if the expenditures meet all other tests presently provided under the regulations.

The annual total of expense account spending has been estimated to be between $5 and $10 billion. The deductions claimed from these sums have been computed to result in an annual revenue loss of from $1 to $2 billion. It is impossible to estimate exactly how much of this sum is made up of expenses and deductions for luxury entertainment items, but I would not be surprised if it amounted to 20 percent of the totals which I have mentioned. If so, the revenue saving which would result from the passing of this portion of the amendment alone would amount to many millions of dollars annually.

Second. Gifts. The second part of the amendment prevents the deduction of gifts in excess of $10 in value as ordinary and necessary business expenses.

Printers Ink estimated annual expenditures for business gifts in the United States in 1959 at $300 million—October 23 issue, page 81. The large bulk of this spending is paid for by corporations and the U.S. Treasury bears 50 percent of the ultimate cost.

The business gift-giving custom is resented by most businessmen who feel trapped by the practice. Printers Ink reported that 75 percent of the top executives quoted by the magazine "thoroughly disapproved of the custom of corporate gift giving." The Wall Street Journal News Roundup of December 7, 1959, stated that many companies would welcome the opportunity to snuff out a practice of gift giving they have frowned on for years.

The abuses in this area have been flagrant ones and I cite the case of Olivia de Havilland Goodrich—20 TC 323. In that case the court permitted Miss de Havilland, the movie star, to deduct as ordinary and necessary business expenses the costs of gifts of a $775 oil painting to her agent; a $920 silver tea set and coffee pot to her dialog director; and an $810 gold necklace and gold clips to her dress designer. In each instance Miss de Havilland certified, and the tax authorities found, that the gift was made solely for business purposes, not for personal reasons, although the recipients were all longtime associates and that the value of the gifts was "commensurate with the service rendered." Tax law has reduced the noble art of gift giving to an ignoble plane.

I ask the Senate to consider whether a similar gift by a surgeon to his operating room staff, or by a school principal to the teachers of his school would be held deductible.

Surely the allowance of a $10 gift per person per year will suffice to cover all reasonable expenditures by businessmen.

Charitable contributions, of course, would continue to be deductible as provided in section 170 of the code, which is not affected by the amendment.

Third. Club dues. Finally the amendment would disallow deductions for "dues or initiation fees in social, athletic or sporting clubs or organizations." The practice of many business and professional men of joining country clubs and other social organizations, and charging part or all of their dues and fees as business expense deductions, is a well-known racket. In virtually all instances the personal return to the taxpayer is high and it is impossible for the auditing agents to assign an arbitrary percentage of such fees and dues as proper business expenses. I see no justification for continuing a practice known to be an open invitation to fraud. The term "social, athletic or sporting clubs or organizations" is used in code section 4241 dealing with club dues taxes and there is a history of regulation and case interpretation which will make this an easy provision to administer.

A conservative estimate of total revenue which would be raised by this amendment would be $250 million.

Mr. President, one type of entertainment expense which would be nondeductible under this amendment would be the expenses connected with operating and maintaining yachts, unless yachting were the taxpayer's business. Many corporations now keep yachts for entertainment purposes totally removed from the normal activities of the corporation. I have compiled a list of yachts kept in Florida waters by out-of-State concerns, from Lloyd's Register. Obviously I do not know how these business taxpayers, who do not appear to be in yachting business, treat their yachting expenses for tax purposes. If they now treat them as ordinary and necessary business expenses and claim deductions for them, as other taxpayers have in cases I have referred to, they will no longer be able to do so if my amendment becomes law. I ask unanimous consent that the list be inserted at this point in my remarks.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

REVISED LIST OF CORPORATE YACHTS IN FLORIDA

(Taken from Lloyd's Register of American Yachts, 1958)

1. *Bernie II:* Wood, 44 feet 6 inches, 1952, two gas Chrysler engines, 200 horsepower; owner, Richardson Tractor Co., R. L. Richardson; home port, Fort Lauderdale, Fla.

2. *Bobbie L II:* Wood, 56 feet 10 inches, 1955; two oil engines, GMC, 224 horsepower; owner, the King Zeero Co., J. L. Morrison, president; home port, Fort Lauderdale, Fla.; port of registry, Chicago, Ill.

3. *Calypso:* Steel, 50 feet, 1947; oil engine, GMC; owner, Spring Brook Development Corp., Wm. A. Simons, president; home port, Fort Lauderdale, Fla.; port of registry, St. Louis, Mo.

4. *Cardi-All:* Wood, 57 feet 4 inches, 1930; two oil engines, GMC; owner, Bech-Lev Corp., S. Jay Leney, president; home port, Chicago, Ill.; port of registry, Miami, Fla.

5. *Coronet:* Wood 78 feet, 1926; two GMC oil engines; owner, Welcome Wagon, Inc., Thomas W. Briggs, president; home port and port of registry, St. Augustine, Fla.

6. *Domina II:* Wood, 60 feet 8 inches, 1920; one gas engine; owner, Century American Corp.; home port, Marathon Shores Fla.; port of registry, Chicago, Ill.

7. *Fireball:* Wood, 57 feet 9 inches, 1940; two GMC oil engines, 200 horsepower; owner, Shedd-Brown, Inc.; home port, Miami, Fla.; port of registry, Miami, Fla.

8. *Georgie May:* Wood, 43 feet, 1955; two gas Chrysler engines, 235 horsepower; owner, Critz Buick Co.; Dale Critz, president; home port, West Palos Beach, Fla.; port of registry, Savannah, Ga.

9. *Glass Breaker:* Wood, 56 feet 11 inches, 1944; two GMC oil engines, 160 horsepower; owner, Syndicate Glass, Inc.; home port, Fort Lauderdale, Fla.; port of registry, Miami, Fla.

10. *Hownhel:* Wood, 39 feet 11 inches, 1940; two Gray oil engines; owner, American Carloading Corp.; home port, Fort Lauderdale, Fla.

11. *Jeanie Belle II:* Wood, 48 feet 9 inches, 1939; two GMC oil engines, 216 horsepower; owner, Storer Broadcasting Co.; home port, Miami, Fla.; port of registry, Miami, Fla.

12 *Magna-Mar:* Wood, 61 feet 1 inch, 1941; two GMC oil engines; owner, the Magnavox Co.; home port, West Palm Beach; port of registry, West Palm Beach.

13. *Mary Jane:* Wood, 56 feet, 1936; two GMC oil engines; owner, Southern Sash, Inc.; home port, Fort Lauderdale; port of registry, Pensacola, Fla.

14. *Papyrus II:* Wood, 28 feet 6 inches, 1947; one Chrysler gas engine; owner, Johann First Community Library, Roger Amory, president; home port, Boca Grande; port of registry, Tampa, Fla.

15. *Pegasus:* Wood, 60 feet 5 inches, 1936; two GMC oil engines, 151 horsepower; owner, Intercoastal Dredging Co.; home port, Fort Lauderdale, Fla.

16. *Queenie:* Wood, 55 feet, 1957; two GMC oil engines, 550 horsepower; owner, Queen Knitting Mills, Samuel and Robert Salegman; home port, Miami Beach, Fla.; port of registry, Philadelphia, Pa.

Mr. CLARK. My second amendment deals with the problem of the proper definition of capital gains. It would eliminate preferential capital gains treatment of income from the sale of depreciable personal property and other peripheral items which are not true capital assets.

Mr. President, I ask unanimous consent that the amendment, designated

"6–17–60–G," be printed at this point in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

At the appropriate place insert the following new section:

"SEC. —. (a) section 1231 of the Internal Revenue Code of 1954 (relating to property used in the trade or business and involuntary conversions) is amended to read as follows:

"'SEC. 1231. REAL PROPERTY USED IN THE TRADE OR BUSINESS AND INVOLUNTARY CONVERSIONS

"'If, during the taxable year, the recognized gains on sales or exchanges of real property used in the trade or business and held for more than six months, plus the recognized gains from the compulsory or involuntary conversion (as a result of destruction in whole or in part, theft or seizure, or an exercise of the power of requisition or condemnation or the threat or imminence thereof) of real property used in the trade or business and capital assets held for more than six months into other property or money, exceed the recognized losses from such sales, exchanges, and conversions, such gains and losses shall be considered as gains and losses from sales or exchanges of capital assets held for more than six months. If such gains do not exceed such losses, such gains and losses shall not be considered as gains and losses from sales or exchanges of capital assets. For purposes of this subection—

"'(1) in determining under this subsection whether gains exceed losses, the gains described therein shall be included only if and to the extent taken into account in computing gross income and the losses described therein shall be included only if and to the extent taken into account in computing taxable income, except that section 1211 shall not apply; and

"'(2) losses upon the destruction, in whole or in part, theft or seizure, or requisition or condemnation of real property used in the trade or business or capital assets held for more than six months shall be considered losses from a compulsory or involuntary conversion. In the case of any capital assets held for more than six months and held for the production of income, this subsection shall not apply to any loss, in respect of which the taxpayer is not compensated for by insurance in any amount, arising from fire, storm, shipwreck, or other casualty, or from theft.'

"(b) The amendment made by subsection (a) of this Act shall apply to taxable years beginning after the date of the enactment of this Act."

Mr. CLARK. Mr. President, it has been said, and I concur, that the capital gains subchapter of the code "has become one of the most impressive loopholes in the Federal revenue structure"—joint committee print, "The Federal Revenue System: Facts and Problems, 1959," page 62.

Low capital gains rates are applicable, of course, only to income from transfers of "capital assets." One of the chief reasons why the capital gains subchapter has become a tax-dodge refuge is to be found in the exceptions created by Congress to broaden the code definition of "capital asset."

Section 1221 of the code defines "capital asset" as follows:

The term "capital asset" means property held by the taxpayer (whether or not connected with his trade or business), but does not include (1) stock in trade of the taxpayer or other property of a kind which would properly be included in the inventory of the taxpayer if on hand at the close of the taxable year, or property held by the taxpayer primarly for sale to customers in the ordinary course of his trade or business; (2) property, used in his trade or business, of a character which is subject to the allowance for depreciation provided in section 167, or real property used in his trade or business;

The definition of "capital assets" underwent many legislative changes since Congress introduced the concept into the tax structure in the Revenue Act of 1921. Since the 1930's, however, the definition has been in substantially the same form as indicated above; that is, a sweeping inclusion of "property held by the taxpayer" and broad exclusions of large categories of property from which income is derived which could be regarded as the everyday profits of the business and commercial world.

The purpose of the exclusions and their application to the obvious situations are relatively clear; the normal receipts of the corner grocery store, the big city department store, and of the large manufacturing concerns are ordinary income even though they arise from the sale of "property." But a sale of stock on a stock exchange by the average investor, a sale of a parcel of undeveloped land purchased as an investment, or a sale of residence give rise to capital gain.

Many of the exceptions to the general definition of "capital asset" which have been created over the years by Congress are contained in section 1231 of the code. It is this section which would be amended by this bill to repeal provisions which have stretched the general definition of "capital asset" to include five types of property which were not originally considered to be capital assets.

Perhaps the largest loophole in the entire capital gains area involves the tax treatment as capital gains of depreciable personal property. As noted above, the general definition of capital asset expressly excludes depreciable property used in trade or business, and one would assume that gains realized from sale of such property would be taxed as ordinary income. This was the case until 1942. In the Revenue Act of that year, however, Congress legislated that gains realized from sale of depreciable property held for more than 6 months were to be treated as capital gains, although losses were to continue to be treated as ordinary losses. The justification for this change in the law was that treatment of gains from transfer of depreciable property as ordinary income had "seriously adverse effect on replacement practices"—joint committee print, "The Federal Revenue System: Facts and Problems, 1959," page 47. This provision of the 1942 law is now contained in section 1231 of the 1954 code which asserts that "recognized gains on sales and exchanges of property used in trade or business held for more than 6 months into other property or money, shall be considered as gains from sales or exchanges of capital assets."

The new methods for claiming depreciation approved in the 1954 code, permitting the writeoff of about two-thirds of the cost of the property instead of 50 percent of the cost as previously provided, eliminated the major force of argument advanced earlier for extending capital gains treatment to income from transfer of depreciable personal property to encourage "replacement practices." In other words, replacement of property at low tax cost was given an enormous stimulus by the new liberal methods of claiming depreciation permitted in the 1954 code.

Commerce Department statistics show the spectacular rise in depreciation claims since the 1954 code went into effect. From a record high in 1953 of $11.8 billion, the volume of depreciation deductions almost doubled to reach $31.5 billion in 1958. Whereas depreciation was the source of only 30 percent of the funds spent by corporations for new capital goods and replacements in 1947, it was the source of 67 percent of all capital spending by corporations in 1958. A recent business survey by the McGraw-Hill Co. indicates that depreciation will continue to supply a greater volume of the funds needed for new plants and equipment for at least the next 4 years and that by 1962 the total will total $26 billion and depreciation will be the source of 79 percent of all capital spending.

Thus it can be seen that businessmen have found a reliable source of funds to use in financing replacement of used plant and equipment in fast writeoff depreciation deductions. To put on top of this the added incentive of permitting capital gains treatment of income from sale of depreciable property would no longer seem to be justified.

My amendment would tax such income at ordinary income rates. This should not have an appreciable effect on current replacement practices but it should substantially increase tax receipts.

PERIPHERAL ITEMS

Capital gains treatment has also been extended by Congress in recent years to cover income from a number of peripheral items which cannot properly be considered as "capital assets" in the normal sense of the term.

Thus in the Revenue Act of 1943, capital gains treatment was extended to income from cutting or disposal of timber which had previously been taxed at ordinary income rates.

In the Revenue Act of 1951, the same preferential treatment was permitted for income from sale of livestock held for more than 12 months which had previously been taxed at ordinary income rates.

In the same act, receipts from unharvested crops and coal royalties were held to be capital gains although both types of income had been subject to ordinary income rates until 1951.

My bill would prohibit preferential treatment of income from these peripheral items as capital gains and subject such income to ordinary income tax rates as was the case until these special privilege sections were written into the code.

I realize, Mr. President, that this bill would not completely rationalize the capital asset definition in the code. Ideally, perhaps, preferential treatment under the capital gains provision would

be confined to income realized on the sale or exchange of assets such as corporate securities held over a substantial period of time where depreciation does not enter the picture. Other types of income currently receiving capital gains treatment, such as those representing compensation for personal services—distribution from retirement plans, stock options, patent royalties—anticipation of future income—in oil payments, life interests in estates—as well as gains from transactions involving inventory type assets—which are the subject of this amendment—should perhaps be taxed as ordinary income—Stanley S. Surrey, "Definitional Problems in Capital Gains Taxation," Harvard Law Review, April 1956.

However, the extensive rewriting of the code required to rationalize the capital gains laws to rule out preferred treatment of income from assets which are not true capital assets is obviously beyond the staff capabilities of any one Senator. I commend the capital gains area though, for the careful consideration of both the Treasury and the Mills committee next November when it undertakes a comprehensive review of the entire tax structure.

The regressive nature of the capital gains tax alone should compel a thoroughgoing review of the capital gains provision in the code.

An individual taxpayer may deduct 50 percent of a long-term capital gain so that only one-half of the gain is subject to tax. Further, if the rate of tax applicable to the remaining gain exceeds 50 percent—a point reached at $18,000 of income for a single person and $36,000 for a married person—no further tax is to be paid on the gain. Put differently, the entire capital gain is subject to a maximum rate of 25 percent, regardless of the total income of the taxpayer.

Statistics culled from the IRS publication of "Individual Income Tax Returns for 1956" indicate which taxpayers are benefiting and to what extent from present capital gains laws. More than 80 percent of the returns filed for 1956 showing adjusted gross income in excess of $200,000 reported capital gains and the average amount of tax saved on each of these returns because of claims of reduced capital gains rates was substantially in excess of $100,000. In fact, 81 percent of the returns showing adjusted gross income in excess of a million dollars reported capital gains, and the average tax saved by application of the reduced capital gains rates amount to $1.4 million per return. At the other end of the economic ladder only 2.4 percent of the returns filed for 1956 indicate adjusted gross income of less than $3,000 reported any capital gains and the average amount of tax saved by the reduced capital gains rate on those returns was $81 per return. These figures clearly indicate the need for a comprehensive review of the capital gains laws to bring them more in line with the fundamental theory of Federal taxation. Taxes should be levied according to ability to pay. Persons with equal income should be taxed equally regardless of source of income. I ask unanimous consent that a table showing the statistics be printed at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

The capital gains tax (who benefits—how much—Treasury loss)

Adjusted gross income of taxpayer	Total number of taxable returns filed (excluding information returns)	Percentage of total returns reporting capital gains	Average tax saved on returns reporting capital gains [1]	Revenue loss to Treasury because of capital gains claims
Under $3,000	12,161,320	2.4	$81	$24,042,000
$3,000, under $5,000	14,808,530	3.3	108	52,370,000
$5,000, under $7,000	10,455,601	4.2	127	55,994,000
$7,000, under $10,000	5,723,893	7.6	189	82,269,220
$10,000, under $15,000	1,918,975	17.6	342	115,354,590
$15,000, under $20,000	497,449	30.7	566	86,762,550
$20,000, under $25,000	234,745	37.0	805	69,970,300
$25,000, under $50,000	346,246	46.2	1,843	294,855,440
$50,000, under $100,000	89,095	60.4	8,125	417,371,100
$100,000, under $150,000	14,057	72.6	28,117	287,013,500
$150,000, under $200,000	3,843	77.3	53,571	159,213,860
$200,000, under $500,000	4,031	82.0	122,431	404,513,920
$500,000, under $1,000,000	593	84.1	404,848	202,019,400
$1,000,000 or more	268	81.3	1,453,438	316,849,500
Total				2,568,599,380

[1] NOTE.—Tax savings computed at ½ the bracket rate, to a maximum of 25 percent. Bracket rate assumed to be the rate for the average taxable income per return at that adjusted gross income level, including 90 percent of excluded capital gains.

Source: Statistics of income, 1956—"Individual Income Tax Returns," U.S. Treasury, Internal Revenue Service.

Mr. CLARK. Mr. President, my bill, nevertheless, would take a long step toward capital gains tax reform by amending section 1231 to prevent capital gains treatment of income from five different types of property which cannot be considered as "capital assets" in any true sense of the term.

The extent to which public revenues would be increased by taxing at ordinary income rates the gains from sales of depreciable property and other items of ordinary income now taxed at low capital gains rates has been estimated at $800 million by reputable economists. Since my proposal would accomplish a major part but not all of this reform because of the drafting problems indicated earlier, I estimate that my bill would raise something in excess of $500 million in public revenue annually. Government statistics of individual tax returns for 1956 show that $2.5 billion of public revenue was lost that year by application of reduced capital gains rates to income shown on individual returns. "Statistics of Income 1956 for Corporate Income Tax Returns," prepared by the IRS, indicates an additional revenue loss of $641.7 million for that year because of tax treatment of corporate income from various sources as capital gains rather than ordinary income. Thus a total of $3.2 billion was lost to the Treasury in 1956 because of the capital gains provisions of the code. The $500 million estimated yield from passage of my bill is based on the assumption that approximately one-sixth of the $3.2 billion saved by the capital gains device is accounted for by capital gains treatment of income from sale of depreciable and various peripheral property which would be treated as ordinary income by the terms of my bill. Income from these sources was taxable as ordinary income until special interest legislation was enacted in recent years.

It is high time that we start to rationalize the capital gains tax laws. This bill would do much to achieve such rationalization and raise $500 million in public revenue so badly needed to finance additional public services and debt retirement and to insure a balanced budget.

The Treasury has indicated its approval for narrowing the types of income accorded favored capital gains treatment. On September 2, 1959, the Senator from Minnesota [Mr. MCCARTHY], the Senator from Illinois [Mr. DOUGLAS], the Senator from Wisconsin [Mr. PROXMIRE], and I wrote to the Secretary of the Treasury, urging administration approval of several of the loophole-closing proposals, including the one set forth in the amendment I am now discussing.

Under Secretary of the Treasury Fred C. Scribner, Jr., replied by letter of October 14, 1959. Under Secretary Scribner's letter included the following:

> We believe that there is validity in the criticism directed by many at weaknesses in the provisions of the law taxing capital gains. Several months ago the Treasury suggested that consideration be given to a change in the law which would treat gain from the sale of depreciable personal property used in business as ordinary income to the extent of the depreciation previously taken on the property.

The Under Secretary's letter also advocated "a comprehensive review of the whole capital gains structure," and added that "any review should give careful study to special areas, such as the above-mentioned depreciable property used in business, unharvested crops, certain lump-sum pension settlements, patents, timber and coal, stock options, and the like."

Again I say that this is a complicated subject. It deserves the serious consideration of all Members of the Senate. I am happy to say that it has received such consideration today during a long and, I am sure, quite tiring session, which is about to come to a close.

My own view is that as a result of this debate and of the further debate which will take place next week, it might well be desirable to have the bill recommitted to the Committee on Finance, in order to give that committee and its able staff an

opportunity to select among these loopholes—all of them, I hope—in order to determine which ones they should recommend to the Senate for adoption.

I note again that the total revenue to be raised from closing the loopholes as proposed in the 8 amendments offered to this bill would be $3.7 million. This additional revenue could be raised without doing the slightest injustice to a single taxpayer, merely by removing from the law the outrageous, inequitable evasion possibilities for wealthy individuals and large corporations.

In view of the critical international and domestic situation in which we find ourselves, I am confident that the conscience of the Senate will require it to send back to the House a bill which will not only continue revenues at their present rate, but will also provide substantial additional revenue to help us get started on the problem of keeping America safe, keeping America free, and giving the public sector of our economy that additional financial assistance which it needs if we are to carry on our function and our manifest destiny as the leader of the free world.

I express my deep gratification to the distinguished Senator from Florida [Mr. SMATHERS], the present occupant of the chair, for his willingness to sit through the debate this evening. He and I are now the only Senators in the Chamber. I know he is late for another engagement. I shall perhaps enable him to depart more quickly by moving that, in accordance with the order heretofore entered, the Senate adjourn until 10 o'clock on Monday morning.

I have been asked to withhold the motion for adjournment briefly, and I am only too willing to do so.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SMATHERS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. CLARK in the chair). Without objection, it is so ordered.

NOTICE OF MOTION TO SUSPEND THE RULE—AMENDMENT TO LEGISLATIVE APPROPRIATION BILL

Mr. HAYDEN (for himself, Mr. STENNIS, Mr. MONRONEY, and Mr. ALLOTT) submitted the following notice in writing:

In accordance with rule XL of the Standing Rules of the Senate, I hereby give notice in writing that it is my intention to move on behalf of myself and Senators STENNIS, MONRONEY, and ALLOTT, to suspend paragraph 4 of rule XVI for the purpose of proposing to the bill (H.R. 12232) making appropriations for the Legislative Branch for the fiscal year ending June 30, 1961, and for other purposes the following amendment, namely: On page 34, after line 17, insert:

"SEC. 105. (a) Section 502 (b) of the Mutual Security Act of 1954, as amended, is amended by inserting before the last sentence thereof a new sentence as follows: 'Such consolidated report, in the case of a Senate committee or a joint committee whose funds are disbursed by the Secretary of the Senate, shall show, in addition to the information otherwise required to be included, the total amount expended for each purpose by each member and employee during the calendar year covered by the report, or in the case of the report for the calendar year 1960, during the last 6 months of such year: *Provided*, That for the purposes of any report required by this section, a statement of the total amount of the per diem in lieu of subsistence authorized for any such member or employee in accordance with U.S. Senate Travel Regulations promulgated by the Committee on Rules and Administration of the Senate shall be considered a sufficient itemization of any expenditures made from such allowance.

"(b) Each Senate member of the U.S. group or delegation to the Interparliamentary Union, the NATO Parliamentarian's Conference, the Canada-United States Interparliamentary Group, the Mexico-United States Interparliamentary Group, or any similar interparliamentary group of which the United States is a member, and each employee of the Senate, by whom or on whose behalf expenditures are made from funds appropriated for the expenses of such group or delegation, shall file with the chairman of the Committee on Foreign Relations of the Senate an itemized report showing all such expenditures made by or on behalf of each member or employee together with the purposes of the expenditure, including subsistence, transportation, and other purposes. Within 60 days after the beginning of each regular session of Congress, the chairman of the Committee on Foreign Relations shall prepare consolidated reports showing with respect to each such group or delegation the total amount expended, the purposes of the expenditures, the amount expended for each such purpose, the names of the members or employees by or on behalf of whom the expenditures were made and the amount expended by or on behalf of each member or employee for each such purpose. The consolidated reports prepared by the chairman of the Committee on Foreign Relations shall be filed with the Committee on Appropriations of the Senate. For the purposes of any report required by this section, a statement of the total amount of the per diem in lieu of subsistence authorized for any such member or employee in accordance with the U.S. Senate travel regulations promulgated by the Committee on Rules and Administration of the Senate shall be considered a sufficient itemization of any expenditures made from such allowance. Each such consolidated report shall be printed in the CONGRESSIONAL RECORD within 10 days after receipt by the Committee on Appropriations of the Senate.

"(c) Expenditures, whether from foreign currencies owned by the United States or from dollar appropriations, for expenses of members and employees of committees of the Senate, of joint committees whose funds are disbursed by the Secretary of the Senate, or of the Senate group or delegation of any interparliamentary body, incurred after July 1, 1960, in connection with travel outside the United States, shall be authorized only in accordance with the provisions of the U.S. Senate Travel Regulations promulgated by the Committee on Rules and Administration of the Senate.

"(d) Section 60 of the Revised Statutes (2 U.S.C. 102) is amended by adding at the end thereof a new paragraph as follows:

" 'Reports of the Secretary of the Senate under this section shall be printed as a Senate document and contain an index for all but salary payments.' "

Mr. HAYDEN (for himself, Mr. STENNIS, Mr. MONRONEY, and Mr. ALLOTT) also submitted an amendment intended to be proposed by them, jointly, to House bill 12232, making appropriations for the legislative branch for the fiscal year ending June 30, 1961, and for other purposes, which was ordered to lie on the table and be printed.

(For text of amendment referred to, see the foregoing notice.)

ADJOURNMENT UNTIL 10 A.M. ON MONDAY

Mr. SMATHERS. Mr. President, in accordance with the order previously entered, I move that the Senate adjourn until 10 o'clock on Monday morning.

The motion was agreed to; and (at 7 o'clock and 58 minutes p.m.) the Senate adjourned, in accordance with the order previously entered, until Monday, June 20, 1960, at 10 o'clock a.m.

SENATE

MONDAY, JUNE 20, 1960

The Senate met at 10 o'clock a.m., and was called to order by the President pro tempore.

The Chaplain, Rev. Frederick Brown Harris, D.D., offered the following prayer:

God of our fathers, and the God of their succeeding generations:

Thy love divine hath led us in the past;
In this free land by Thee our lot is cast.
Be thou our Ruler, Guardian, Guide and Stay;
Thy word our law, Thy paths our chosen way.
From war's alarms, from deadly pestilence,
Be Thy strong arm our ever sure defense;
Thy true religion in our hearts increase;
Thy boundless goodness nourish us in peace.
Refresh Thy people on their toilsome way;
Lead us from night to never-ending day;
Fill all our lives with love and grace divine,
And glory, laud and praise be ever Thine.

Amen.

THE JOURNAL

On request of Mr. MANSFIELD, and by unanimous consent, the reading of the Journal of the proceedings of Saturday, June 18, 1960, was dispensed with.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. MANSFIELD. Mr. President, under the rule, there will be the usual morning hour. I ask unanimous consent that statements in connection therewith be limited to 3 minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETING DURING SENATE SESSION

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Foreign Relations Committee be permitted to meet during the session of the Senate today to consider the draft of the report in connection with events leading up to the recent summit conference.

The PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

REPORT PRIOR TO RESTORATION OF BALANCES, FOREIGN CLAIMS SETTLEMENT COMMISSION

A letter from the Chairman, Foreign Claims Settlement Commission of the United States, Washington, D.C., transmitting, pursuant to law, a report prior to restoration of balances for that Commission, as of June 15, 1960 (with an accompanying report); to the Committee on Government Operations.

REPORT ON SAN JUAN-CHAMA PROJECT, COLORADO-NEW MEXICO AND NAVAJO INDIAN IRRIGATION PROJECT, NEW MEXICO

A letter from the Secretary of the Interior, transmitting, pursuant to law, a report on the San Juan-Chama project, Colorado-New Mexico, and the Navajo Indian irrigation project, New Mexico (with accompanying papers); to the Committee on Interior and Insular Affairs.

REQUIREMENT THAT ENTRYMEN OF CERTAIN LANDS IN NEVADA BE RESIDENT CITIZENS OF THAT STATE

A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to repeal the act of October 22, 1919 (41 Stat. 293; 43 U.S.C., secs. 351–355, 357–360), and the act of September 22, 1922 (c. 400, 42 Stat. 1012; 43 U.S.C., sec. 356), and to require that entrymen of lands in Nevada under the Desert Land Act be resident citizens of Nevada (with an accompanying paper); to the Committee on Interior and Insular Affairs.

PETITIONS AND MEMORIALS

Petitions, and so forth, were laid before the Senate, or presented, and referred as indicated:

By the PRESIDENT pro tempore:

A concurrent resolution of the Legislature of the State of Louisiana; to the Committee on Finance:

"SENATE CONCURRENT RESOLUTION 22

"Whereas Louisiana was at one time the No. 1 shrimp producing State in the United States, the shrimp industry being one of the leading revenue producing industries in the State; and

"Whereas the State of Louisiana is gravely concerned about the serious financial difficulties confronting the shrimp industry of the State of Louisiana, which is being caused by the foreign exportation of shrimp into the U.S. market; and

"Whereas at present there are some 54 foreign countries being allowed to export shrimp without restriction into the U.S. market, creating a glutted condition on the shrimp market; and

"Whereas a vast majority of the shrimp fleet of the State of Louisiana is composed of shrimp boats owned by individual shrimp fishermen who have life savings invested in their shrimp boats; and

"Whereas these shrimp fishermen face economic ruin and disaster since they are unable to profitably operate their shrimp boats: Therefore be it

"*Resolved by the Senate of the Legislature of the State of Louisiana (the House of Representatives concurring therein)*, That the Legislature of the State of Louisiana urges the U.S. Congress to recognize and take immediate action by appropriate legislation to institute some type of program to curtail and control the foreign importation of shrimp; and be it further

"*Resolved*, That copies of this resolution be sent to the President of the United States, to the members of the Louisiana delegation in the U.S. Congress, and to Presiding Officers of the House of Representatives and Senate of the Congress of the United States.

"——— ———,

"Lieutenant Governor and President of the Senate.

"——— ———,

"Speaker of the House of Representatives."

A petition signed by Eugene Ivanovsky, and sundry other citizens of Russian descent, of San Francisco, Calif., relative to certain amendments of Public Law 86–90, concerning the Week of Subjugated Nations; to the Committee on the Judiciary.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. CHURCH, from the Committee on Interior and Insular Affairs, with amendments:

H.R. 816. An act to set aside certain lands in Oklahoma for the Cheyenne and Arapaho Indians (Rept. No. 1617).

By Mr. SMATHERS, from the Committee on Interstate and Foreign Commerce, with amendments:

H.R. 5055. An act to change a certain restriction on the use of certain real property heretofore conveyed to the city of St. Augustine, Fla., by the United States (Rept. No. 1618).

By Mr. JOHNSTON of South Carolina, from the Committee on Post Office and Civil Service, with amendments:

S. 2399. A bill to modernize the laws relating to contracts for the transportation of mail, and for other purposes (Rept. No. 1619).

PROFESSIONAL SPORTS ANTITRUST ACT OF 1960—INDIVIDUAL VIEWS (S. REPT. NO. 1620)

Mr. MANSFIELD. Mr. President, on behalf of the Senator from Tennessee [Mr. KEFAUVER], from the Committee on the Judiciary, I report favorably, with amendments, the bill (S. 3483) to make the antitrust laws and the Federal Trade Commission Act applicable to the organized team sport of baseball and to limit the applicability of such laws so as to exempt certain aspects of the organized professional team sports of baseball, football, basketball, and hockey, and for other purposes, and without recommendation, together with individual views of the Senator from Tennessee [Mr. KEFAUVER], and the Senator from Connecticut [Mr. DODD], the Senator from Wyoming [Mr. O'MAHONEY], the Senator from Colorado [Mr. CARROLL], the Senator from Michigan [Mr. HART], the Senator from Wisconsin [Mr. WILEY], the Senator from Illinois [Mr. DIRKSEN], and the Senator from Nebraska [Mr. HRUSKA], and the Senator from New York [Mr. KEATING].

I ask unanimous consent that the report, together with the individual views, be printed.

The PRESIDENT pro tempore. The report will be received, and the bill will be placed on the calendar; and the report will be printed, as requested by the Senator from Montana.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and by unanimous consent, the second time, and referred as follows:

By Mr. COOPER:

S. 3699. A bill for the relief of Naoko Ishiwatari White; to the Committee on the Judiciary.

By Mr. LONG of Hawaii:

S. 3700. A bill to amend the National School Lunch Act in order to provide that the number of meals served to schoolchildren in a State participating in the school lunch program shall be considered a factor in determining the apportionment of funds under such act; to the Committee on Agriculture and Forestry.

(See the remarks of Mr. LONG of Hawaii when he introduced the above bill, which appear under a separate heading.)

By Mr. JACKSON:

S. 3701. A bill to set aside certain lands in Washington for Indians of the Quinaielt Tribe; to the Committee on Interior and Insular Affairs.

By Mr. ROBERTSON:

S. 3702. A bill to amend section 14(b) of the Federal Reserve Act, as amended, to extend for 2 years the authority of Federal Reserve banks to purchase U.S. obligations directly from the Treasury; to the Committee on Banking and Currency.

By Mr. CAPEHART:

S. 3703. A bill for the relief of Roger Naiwhei Lee; to the Committee on the Judiciary.

By Mr. WILLIAMS of New Jersey:

S. 3704. A bill for the relief of Liliana Grazyna Swiatkowska; to the Committee on the Judiciary.

By Mr. KEATING:

S. 3705. A bill to amend title 38, United States Code, to provide certain benefits for members of the Armed Forces killed or wounded in disturbances other than a state of war; to the Committee on Finance.

(See the remarks of Mr. KEATING when he introduced the above bill, which appear under a separate heading.)

By Mr. MCCLELLAN:

S.J. Res. 209. Joint resolution providing for the establishment of an annual National Forest Products Week; to the Committee on the Judiciary.

(See the remarks of Mr. MCCLELLAN when he introduced the above joint resolution, which appear under a separate heading.)

RESOLUTIONS

PRINTING OF CERTAIN PRAYERS BY SENATE CHAPLAIN

Mr. MORSE submitted a resolution (S. Res. 337) to print a certain number of copies of the prayers of the Chaplain of the Senate for the 85th and 86th Congresses, which was referred to the Committee on Rules and Administration.

(See the above resolution printed in full when submitted by Mr. MORSE, which appears under a separate heading.)

TENURE OF OFFICE OF PERSONS APPOINTED TO ADMINISTRATIVE AND POLICYMAKING POSITIONS

Mr. JACKSON (for himself, Mr. HUMPHREY, Mr. MUSKIE, Mr. MUNDT, and Mr. JAVITS) submitted a resolution (S. Res. 338) relative to tenure of office of individuals appointed to administrative and policymaking posts in the Federal Government, which was referred to the Committee on Government Operations.

(See the above resolution printed in full when submitted by Mr. JACKSON, which appears under a separate heading.)

CHANGE OF APPORTIONMENT FORMULA OF NATIONAL SCHOOL LUNCH ACT

Mr. LONG of Hawaii. Mr. President, I introduce, for appropriate reference, a bill to amend the National School Lunch Act so as to change its apportionment formula. The National School Lunch Act, since its enactment in 1946, has proven its worth in providing children across the Nation with a nutritious meal at noontime—sometimes the only good meal which they get throughout the day. Without doubt, this program has made a substantial contribution to the health of our children. Furthermore, since a hungry child is seldom an attentive pupil, the lunch program has directly helped the work of the schools. Cash grants under the program amount to an annual cost of about 50 cents per head of population.

As a former public school superintendent, I am aware of a shortcoming in the formula for apportioning school lunch program funds among the States. The present formula contains two elements—per capita income and the total enrollment within the State of school-age children.

There is no quarrel with using per capita income as one element of the formula. Obviously, States with relatively low incomes need greater assistance. However, there seems little justification for allotting funds according to the number of school-age children. In some States only a small proportion of these children are served meals under the program—either because of lack of demand or because of limited efforts by the State to extend the school lunch program. In other States the proportion of school children receiving lunches goes up to 70 percent.

Under the bill I have just introduced the apportionment formula would be changed to reflect the size of the school lunch program in each State. A State's allocation would be based on the number of meals actually served in the State under the program, as well as per capita income. If enacted into law, this amendment would make a more equitable and effective distribution of funds. The amount of Federal assistance for each meal served would be made more nearly equal. States which have hitherto relied upon an automatic allocation, determined by their school-age population, would be stimulated to examine their programs to see if all children who need nutritious lunches are being served.

The PRESIDING OFFICER (Mr. MUSKIE in the chair). The bill will be received and appropriately referred.

The bill (S. 3700) to amend the National School Lunch Act in order to provide that the number of meals served to school children in a State participating in the school lunch program shall be considered a factor in determining the apportionment of funds under such act, introduced by Mr. LONG of Hawaii, was received, read twice by its title, and referred to the Committee on Agriculture and Forestry.

NATIONAL FOREST PRODUCTS WEEK

Mr. McCLELLAN. Mr. President, I introduce, for appropriate reference, a joint resolution in regard to National Forest Products Week.

The PRESIDING OFFICER. The joint resolution will be received and appropriately referred.

The joint resolution (S.J. Res. 209) providing for the establishment of an annual National Forest Products Week, introduced by Mr. MCCLELLAN, was received, read twice by its title, and referred to the Committee on the Judiciary.

Mr. McCLELLAN. Mr. President, the oldest industry in the United States, the forest products industry, deserves the public recognition of a special week set aside for the observance of a celebration honoring that industry.

It is evident that the forest industry, operating in every State in the Union is highly significant to the well-being of our Nation's citizens and our Nation.

American forests cover 786 million acres and are the Nation's only renewable natural resource.

Ownership of private commercial timberlands is diversified. Of the 4½ million owners, farmers own 34 percent—166 million acres; wood-processing industries own 13 percent—64 million. Schoolteachers, professional people, housewives, factory workers, and other private persons own 127 million acres, or 26 percent of the commercial forests.

The Federal Government owns 21 percent of America's commercial forest lands. The Forest Service of the Department of Agriculture is responsible for the management of the national forests, including selling the timber rights to private companies. Other lands are handled by the Department of Interior. Sales of Government timber for fiscal year 1960 are estimated to total nearly $175 million.

Forest land management has as its primary objective the growing of repeated crops of trees. The forest practices and forest protection necessary to accomplish this objective usually result in many additional benefits, among them watershed protection, preservation of the soil, recreation and maintenance of forage for game and livestock.

The forest products industry, including lumber and wood products, furniture and fixtures, pulp and paper products, provides direct employment in 57,000 operating establishments to 1½ million persons, or 9 percent of all manufacturing employees. Payrolls total more than $6 billion annually and value added by manufacture exceeds $11 billion. Expenditures for new plant and equipment by the forest industry totals $850 million annually.

This country produces 30 percent of the world's lumber, 40 percent of its wood pulp, 43 percent of its paper and paperboard and 51 percent of its plywood.

Through the transportation of forest products during 1959, the Nation's railroads earned more than $1.3 billion in gross freight revenue, representing 15 percent of total railroad freight revenue.

It will be to the best interests of the people of this Nation, including Government, labor and management to have the forest industry called to their attention annually through the proclamation of a National Forest Products Week.

The passage of this joint resolution by the Congress will insure proper and deserved recognition of this vital industry in our national economy.

PRINTING OF CERTAIN PRAYERS BY SENATE CHAPLAIN

Mr. MORSE. Mr. President, I am certain Senators have received many requests for bound copies of the prayers of the Chaplain, requests which we can no longer fill because the supply is exhausted.

I submit for appropriate reference a a resolution for the printing of 5,000 bound copies of the Chaplain's prayers, including the prayers of the Chaplain at national functions sponsored by the Senate, such as at the unveiling of the monument to the late Senator McCarran, and on similar occasions.

The PRESIDING OFFICER. The resolution will be received and appropriately referred.

The resolution (S. Res. 337) was referred to the Committee on Rules and Administration, as follows:

Resolved, That five thousand copies of the prayers offered by the Reverend Frederick Brown Harris, Doctor of Divinity, Chaplain of the Senate, at the opening of the daily sessions of the Senate, during the Eighty-fifth and Eighty-sixth Congresses, inclusive, be printed and bound for the use of the Senate, and that this edition be six inches by nine inches in size, and that they be hard bound and that the volume contain also certain prayers offered by the Chaplain of the Senate at National occasions, sponsored by the Senate.

TENURE OF OFFICE OF PERSONS APPOINTED TO ADMINISTRATIVE AND POLICYMAKING POSITIONS

Mr. JACKSON. Mr. President, on behalf of myself, and my colleagues on the Subcommittee on National Policy Machinery, Senators HUMPHREY, MUSKIE, MUNDT, and JAVITS, I submit, for appropriate reference, a resolution dealing with a problem of critical importance in the effective organization of our Government to cope with the demands of the cold war.

The problem with which this resolution is concerned is that of turnover in key posts in the national security field.

It is now generally recognized that turnover in many of these posts has been at a disturbingly high rate, that the brief tenure of many appointees has had a harmful impact on the effectiveness with which our Government operates.

This problem has not been confined, as the resolution states, to any one administration. It is a national problem, and one we cannot ignore if we are to win this total competition we have not sought, but cannot afford to lose.

The harmful effects of turnover have been compounded, Mr. President, by the growing intricacies of foreign and military policies. As the problems of national security become more complex, it takes an increasingly long time to acquire the knowledge and understanding that permit effective discharge of responsibilities.

The extent and impact of turnover in top policy posts has been fully established by testimony before the Subcommittee on National Policy Machinery over the past few months. This testimony includes comments by Cabinet members, both past and present, by witnesses from Government and private life who are intimately acquainted with the problem of turnover and its effects.

This problem was also recognized in the President's address at Notre Dame earlier this month.

Mr. President, the purpose of this resolution is to put the Senate on record on this subject, to serve notice to the next President, be he Democrat or Republican, that the Senate is deeply concerned by the problem of turnover in top posts in the national security field. The Senate has the constitutional responsibility to pass on Presidential appointments; it is altogether appropriate that the Senate should express its concern on this subject.

Mr. President, I ask unanimous consent that the text of this resolution be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. The resolution will be received and appropriately referred; and, without objection, the resolution will be printed in the RECORD, as requested by the Senator from Washington.

The resolution (S. Res. 338) was referred to the Committee on Government Operations, as follows:

Whereas the unprecedented challenge of the cold war has placed heavy demands on the energies and abilities of high Government officials; and

Whereas the requirements for policy planning and decision making in the national security field have placed a premium on knowledgeable, experienced executives; and

Whereas the complexities and technicalities of national security problems have steadily increased the minimum period of Government experience required before responsibilities can be discharged effectively; and

Whereas brief tenure in office tends to have a harmful impact on the effective formulation and execution of national security policies; and

Whereas the problem of turnover has not been confined in its effects to any one administration: Now, therefore, be it

Resolved, That it is the sense of the Senate that individuals appointed to administrative and policymaking posts should be willing to serve for a period long enough to permit them to contribute effectively in their assigned tasks; and be it further

Resolved, That it is the sense of the Senate that nominees appearing before its committees shall indicate their willingness to serve so long as the President desires.

APPOINTMENT OF ADDITIONAL CIRCUIT AND DISTRICT JUDGES—AMENDMENTS

Mr. BIBLE (for himself and Mr. CANNON) submitted amendments, intended to be proposed by them, jointly, to the bill (S. 2673) to provide for the appointment of additional circuit and district judges, and for other purposes, which were ordered to lie on the table and be printed.

AMENDMENT OF SMALL BUSINESS ACT—ADDITIONAL COSPONSOR OF BILL

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the name of the junior Senator from New Jersey [Mr. WILLIAMS] may be added as an additional cosponsor of the bill (S. 3689) to amend the Small Business Act, and for other purposes, introduced by me on June 16, 1960.

The PRESIDING OFFICER. Without objection, it is so ordered.

REFERENCE OF HOUSE BILL 8289 TO COMMITTEE ON THE DISTRICT OF COLUMBIA

Mr. CLARK. Mr. President, H.R. 8289, Calendar 1328, was reported by the Committee on Post Office and Civil Service a short time ago. Section 3 exempts from the bill employee health organizations from the District of Columbia insurance laws.

Since the bill has some effect on the District of Columbia, and the chairman of the Committee on the District of Columbia wishes to examine the bill, I ask unanimous consent that H.R. 8289 may be taken from the calendar and referred to the Committee on the District of Columbia for its consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

JOINT COMMITTEE ON ARRANGEMENTS FOR INAUGURATION OF PRESIDENT AND VICE-PRESIDENT-ELECT

The PRESIDING OFFICER. On behalf of the Vice President, the Chair announces the appointment, pursuant to Senate Concurrent Resolution 92, of the Senator from New Hampshire [Mr. BRIDGES], the Senator from Alabama [Mr. SPARKMAN], and the Senator from Missouri [Mr. HENNINGS] as the members on the part of the Senate of the Joint Committee on Arrangements for the Inauguration of the President and Vice-President-elect on January 20 next.

NOTICE OF HEARINGS ON CERTAIN BILLS

Mr. ROBERTSON. Mr. President, on behalf of the Committee on Banking and Currency, I give notice that a hearing will be held on Friday, June 24, 1960, at 10 a.m., in room 5302, New Senate Office Building, on the following bills:

S. 3702, a bill which I introduced today, to amend section 14(b) of the Federal Reserve Act, as amended, to extend for 2 years the authority of Federal Reserve banks to purchase U.S. obligations directly from the Treasury.

S. 1177, a bill which I introduced at the request of the Treasury Department, to authorize adjustments in accounts of outstanding old series currency, and for other purposes.

FCC AWARD OF VALUABLE TV CHANNEL TO CONGRESSMEN ON SPECIAL PRIVILEGE GROUNDS IS POLITICAL PAYOLA

Mr. PROXMIRE. Mr. President, it has just been revealed that the Federal Communications Commission has now adopted, as an established and formally announced policy, the view that Members of Congress enjoy an advantageous, privileged position in the award of television licenses.

In my judgment, this is morally as wrong as it can be. It sets up a firm pattern for predictable corruption, for this means, of course, that Congressmen who pass on all the appropriations, including those for the salaries and expenses of members of the Federal Communications Commission, and who determine every aspect of the basic law under which they are given the charter to operate, can enjoy a special compensation when it comes to handing out these enormously valuable television franchises, worth in some cases millions of dollars.

Mr. President, this is political payola at its worst. If Congressmen are to be given this special advantage, on the ground of "civic participation," it would be just as logical to give the advantage to members of the FCC itself. Indeed, the justification for making such awards to FCC members would be even greater, for, after all, they are really close to the industry and they devote their full time to its problems.

If this ridiculous special advantage in television license allocation is allowed to stand, the next logical step would be for the FCC Commissioners to "take the gravy" themselves.

Mr. President, I am referring to the precedent shattering FCC award of channel 10, in Albany, N.Y., to the Capital Cities Television Corp., which in 1959 enjoyed a gross income of more than $6 million, and in which five Congressmen own stock. In making the award, the FCC and its examiner found that "some of the stockholders—of Capital Cities—were Congressmen," and that this gives the corporation a "civic participation" advantage, civic participation being one of the yardsticks the FCC applies.

Mr. President, I suggest that the Congress and the FCC give this matter the promptest and most sober consideration. The decision is seriously improper.

Mr. President, I ask unanimous consent that an article on this matter,

written by David Wise, of the New York Herald Tribune News Service, be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, June 19, 1960]

FIRM WITH FIVE CONGRESSMEN WINS TV NOD—PRECEDENT SET BY FCC RULING IN ALBANY CASE

(By David Wise)

A company with five Congressmen as stockholders has been commended for such "civic participation" and tentatively awarded a valuable Federal license to run a television station.

The Federal Communications Commission in what appeared to be a precedent-shattering decision, acted after the examiner in the case, J. D. Bond, ruled that "it cannot be ignored" that some of the stockholders are Members of "the House of Representatives."

This, we found, gave the firm an edge over a rival applicant in the area of "civic participation," one of the yardsticks used by the FCC in deciding contested cases.

The Commission backed up the examiner and took what it termed a "preliminary" step May 27 toward granting the Capital Cities Television Corp. the right to broadcast on channel 10, Albany, N.Y., it was learned Saturday.

It was believed to be the first time that a regulatory agency had apparently supported the position that an applicant which has Congressmen among its stockholders thereby gains an advantage over its rival.

This should be good news for Congressmen who are in a position to allow or disallow funds for the FCC and who can pass laws affecting the agency's operations. A survey 3 months ago by Broadcasting magazine showed that 30 Representatives and Senators have interests in broadcasting stations directly or through their families.

The five Congressmen who own stock in Capital Cities, which reported a gross income in 1959 of $6,067,424, are Representative DEAN P. TAYLOR, Republican, of Troy, former New York State Republican chairman, former member of the Republican National Committee and former president of the station; Representative LEO W. O'BRIEN, Democrat, of New York, of Albany, a member of the House Interstate and Foreign Commerce Committee, which drafts legislation affecting the FCC; Representative EUGENE J. KEOGH, Democrat, of New York, of Brooklyn; Represenative JAMES J. DELANEY, Democrat, of New York, of Queens; and Representative PETER W. RODINO, Democrat, of New Jersey.

Presidential Press Secretary James C. Hagerty was accused of political intervention in an earlier phase of the Albany TV case, a charge that he flatly denied. The accusation was made in February 1959, in a book by Bernard Schwartz, ousted counsel to a House subcommittee probing the FCC and other regulatory agencies. Mr. Hagerty said his role consisted of a routine referral of a letter to the then FCC Chairman George C. McConnaughey.

Frank U. Fletcher, attorney for the Veterans Broadcasting Co., which was denied the channel in the Examiner's decision and the tentative FCC ruling, said in argument before the Commission May 26:

"Obviously, the number of Members of the Congress of the United States—and there are known to be five—who are stockholders of Capital Cities should not be a factor in awarding a preference to that organization, even though in paragraph 115, the Examiner took that into consideration."

The paragraph referred to in the Examiner's decision weighs the relative strength of the two applicants in the area of "civic participation." Of Capital Cities, the Examiner concludes:

"It cannot be ignored here that some of these individuals have achieved civic and political prominence which denotes in them an ability to discern and be responsive to the interests of the people of their community; to be elected and reelected as a Member of the House of Representatives is such a manifestation. The aggregate civic backgrounds of each applicant are good, but Capital Cities locally acquired familiarity with civic affairs of the Albany area is manifestly superior."

Mr. CLARK. Mr. President, will the Senator from Wisconsin yield?

Mr. PROXMIRE. I yield.

Mr. CLARK. I should like to associate myself with the remarks made just now by the Senator from Wisconsin. With his usual keen eye for things in the body politic which call for reform, he has put his finger on a very important point; and I congratulate him for calling it to the attention of the Senate.

Mr. PROXMIRE. I thank the distinguished senior Senator from Pennsylvania.

RESTON DECLARES LEADERSHIP THE PRIME GAP IN AMERICAN NATIONAL PURPOSE TODAY

Mr. PROXMIRE. Mr. President, James Reston, the chief of the New York Times bureau in the Nation's Capital, has contributed the final article in the Life magazine-New York Times series on the national purpose.

Mr. Reston differs sharply with some of his predecessors in this debate. He disagrees with the more general view that the American purpose is clear and obvious. He also disagrees with the widely held notion that today's Americans are any more selfishly absorbed in their private concerns than previous generations have been; and he tellingly points out John Adams' observation at the time of America's great hour of sacrifice and idealism in the American Revolution, when Adams estimated:

One-third of the population was against the American Revolution, one-third for it, and one-third indifferent. And this is the way it has usually been.

The heart of the Reston diagnosis is that a seeming lack of purpose on the part of the American people is not new. What is new is that the leaders now seem to think they have to follow the Nation instead of leading it.

Mr. Reston contends that while Americans are doing less than they could do, they are doing everything they are asked to do by their President—the one man who can get the attention of the American people. As Mr. Reston points out, this generation of Americans has paid out billions of dollars in taxes in order to restore the economies of Europe, and has accepted military conscription in order to help protect our former enemies.

But Mr. Reston emphasizes that we have not met the fundamental and earth-shaking challenge on which the survival of freedom in the world depends; that is, the challenge of the state-controlled system of communism.

To meet it Mr. Reston calls for:

First. An honest debate on how we can meet the competition of the enormously rapid Soviet economic growth.

Second. A determination to devote far more to developing the highest possible standard of education for our children.

Third. A vast improvement in training and recruiting personnel for foreign-service work. Incidentally, Mr. Reston gives the bill introduced last week by the senior Senator from Minnesota [Mr. HUMPHREY] an enthusiastic, if possibly unconscious, plug when he writes:

If the main war is the battle in the underdeveloped areas, why not offer talented young men of draft age the option of using their brains in a civilian service in Indochina, rather than sentencing them to Army kitchen police in Hoboken?

This is precisely what the Youth Peace Corps advocated by Senator HUMPHREY would provide.

Mr. Reston declares:

Isolation is now gone, but the hangover of the old habits of the days of isolation remain: In our assumptions that we can meet the Soviet challenge with the same school system, the same political patronage system, the same diplomatic system, the same attitudes toward politics and the public service, and the same old chestnut about private interests inevitably serving the public interest.

He then writes as concise and precise a concluding sentence as I have read in a long time:

These golden ages were also periods of great leaders who knew how to bring ideas and politics together, and this seems to me to be the heart of our present problem.

Mr. President, I ask unanimous consent that the Reston article be printed in full at this point in the RECORD:

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, June 20, 1960]

NATIONAL PURPOSE: RESTON'S ANALYSIS—THE NATION NEEDS A PRESIDENT WHO WILL LEAD, NOT FOLLOW, IT

(By James Reston)

If it is true that America needs and lacks a sense of purpose, the history of the Nation suggests a remedy.

For if George Washington had waited for the doubters to develop a sense of purpose in the 18th century, he'd still be crossing the Delaware. In fact, most of the great political crises of the American past have been resolved, not by the zeal and purpose of the people, but usually by the willpower or obstinacy of their leaders.

No doubt the massive thirst of a long-tormented majority brought back 3.2 beer, but the plain fact is that in most other emergencies a resolute minority has usually prevailed over an easygoing or wobbly majority whose primary purpose was to be left alone.

John Adams estimated that one-third of the population was against the American Revolution, one-third for it, and one-third indifferent. And this is the way it has usually been.

Some farsighted character like Thomas Jefferson or Teddy Roosevelt was always buying Louisiana or the Panama Canal when nobody was looking, and writers have always been grumbling, mainly to each other, about the feebleness of the national will.

The main difference between today's lamentations and those of the past is that the language is milder and the pay better. Thomas Paine, roaring about America's mulish indifference in 1775, makes today's orators sound complacent.

And even Ralph Waldo Emerson, who was really a pretty cheery fellow, could wail in 1847:

"Alas for America, the air is loaded with poppy, with imbecility, with dispersion, and sloth. Eager, solicitous, hungry, rabid, busy-bodied America: catch the breath and correct thyself."

CRITICISM IS NOT NEW

Thus, criticism of the American people for lack of purpose is not new. What is new is that leaders now seem to think they must follow the Nation instead of leading it. What is new is that a hostile coalition of nations now has the military power to destroy the Republic. The margin of error granted to us in past wars and crises has vanished. What could be won before with partial effort, late starts, feeble alliances, and mediocre administration can no longer be won in a contest with the Communists.

It is not that they are so efficient but that they are so purposeful. They are all working on the main target and we are not. Life, tyranny, and the pursuit of capitalists is the Russian way of life. They have obliterated the difference between war and peace. They are always at war, all of them, women as well as men, teachers, philosophers, scientists, engineers, lady discus throwers, airmen, and 3 or 4 million foot soldiers.

None of this need trouble us very much except for their national purpose, which is simply to replace our system of individual freedom with their system of state control wherever they can, including regions vital to our security, such as Germany, Japan, and even Cuba.

I must say they have been very frank about it. They have given us timely if not fair warning. They are directing all the energies of all their people to that goal. They are not arguing about the conflict between private interests and the national interest. They have simply eliminated private interest. They have put everybody to work on burying capitalism, and, since our national purpose, among other things, is to avoid being buried, this creates an awkward and even nasty situation.

How then, shall we approach the problem? I was brought up on the Church of Scotland's shorter catechism, the first question of which is:

"What is the chief end of man?"

Accordingly, I am all for self-direction and self-criticism. Nevertheless, I have my doubts about the imminence of any self-induced renaissance or epoch of austerity.

A TALE ABOUT MULES

When I consider attacking the problem through the people, I think of Harry Ashmore's old story about the man who acquired a reputation for training mules with honeyed words and kindness. Hearing about this remarkable achievement the Society for the Prevention of Cruelty to Animals dispatched a lady emissary to present the mule-trainer with a medal.

Upon arrival, she asked for a demonstration. The trainer obligingly trotted out a young mule, reached for a long 2-by-4, and clouted the beast over the head. As the mule struggled back to his feet the good lady exclaimed in horror, "Good heavens, man, I thought you trained these animals with kindness."

"I do, ma'm," he replied, "But first I got to git the critters' attention."

I don't know how just anybody gets the attention of 180 million people these days. They are engaged in the pursuit of happiness, which, incidentally, the Declaration of Independence spells with a capital "H," and to be frank about it, I suspect that public debates on the national purpose give them a pain.

It will not, I think, be wise to underestimate America's current resistance to exhortations from the preachers, professors, columnists, and editorial writers of the Nation. For unless I miss my guess, the Americano, circa 1960, is in no mood to rush off on his own initiative to emancipate the human race, or to set any new records as the greatest benefactor of all time, or engage in any of the other crusades mapped out for him in Cambridge, Mass.

He may do many of these things because he is honest enough to know that he doesn't know all the facts of this dangerous and complicated era, but he is not likely to set out to do them because of his own reflection and reason or the arguments of talkers or writers he seldom sees.

Accordingly, we must, I think, start with the national leadership, partly because this is the engine that has pulled us out of the mud before, and partly because this is an election year, when we will be picking a President, probably for most of the 1960's.

IT'S UP TO PRESIDENT

The President of the United States is the one man who can get the attention of the American people. If he says the Nation is in trouble they will listen to him. If he addresses himself to their doubts and questions, they will hear him out. If he presents programs and legislation to do what he thinks is necessary for the safety of the Republic and explains and keeps explaining why these are essential, he may very well prevail.

All the magazine articles on the national purpose, all the reports by all the foundations on all our manifold weaknesses, all the speeches by Adlai Stevenson, Jack Kennedy, Lyndon Johnson, and Stuart Symington on the wickedness of the Republicans, all the exhortations to return to the faith of our fathers—all are nothing compared to serious programs eloquently expressed and strongly pushed by a determined President of the United States.

"His is the only national voice in affairs," wrote Woodrow Wilson. "Let him once win the admiration and confidence of the country and no other single force can withstand him, no combination of forces will easily overpower him. His position takes the imagination of the country. * * * His is the vital place of action in the system."

Of course, he has to act. He cannot ask for half-measures and run away. But once he expresses the national need, once he decides to try to remove rather than to perpetuate the illusions of the past, then his specific remedies will affect the spirit and direction of the Nation.

I remember when the Marshall plan for Europe was devised in Washington. It was perfectly obvious that the sickness of the European economy was creating a crisis of great magnitude, and the bare bones of a 4-year plan, costing perhaps as much as $20 billion, were worked out and approved by President Truman.

I printed a long story about it one Sunday in the New York Times, and by 10 o'clock that morning, the late Senator Arthur H. Vandenberg of Michigan, then chairman of the Foreign Relations Committee, called me at home and said:

"You must be out of your senses. No administration would dare to come to the Senate with a proposal like that."

Yet once the lead was taken and the need documented, Senator Vandenberg ended up as a key supporter of what almost everybody now agrees was the most farsighted piece of legislation since the war.

THE TASK IS GREAT

I do not underestimate the task. I agree with much that has been said in these essays about the slackness of our society, but I find the present mood understandable, perhaps inevitable, under the circumstances, and not without hope.

At the end of the last war, the American people made a genuine effort to clear the wreckage and understand the new situation.

They went through the biggest geography and history lesson in their history, always with the false optimism that they were dealing with a temporary situation that would eventually go away.

Instead of going away, the problems became larger and more complex: After Europe, it was the Middle East; after the Middle East, the Far East; after the Far East, Africa; after Africa, outer space, and after outer space a lot of inner tensions over U–2, me too, inflation, deflation, rising cost of living, balance of payments, nuclear testing, sputniks, luniks, and a lot of other things that everybody seemed to be differing about.

There was no panic about any of this. The people merely turned from what they did not understand to what they did understand. They turned inward from the world to the community and the family. In the 15 years of the atomic age, they increased the population of the Nation by more than 40 million, which is not the action of a frightened people, and which is interesting when you think that the entire population of the country at the start of the Civil War 100 years ago was only 31 million.

A distinction has to be made, I think, between the facade of America and the other more genuine America. There is, of course, this big obvious clattering America of Hollywood and Madison Avenue and Washington, but there is also the other quieter America, which has either kept its religious faith or at least held on to the morality derived from religious tradition.

I do not wish to glorify the multitude. Much can be said about the dubious effects on the American character of very early marriage, easy credit, cheap booze, cheaper TV, lower education standards, and job security even for sloppy work.

THE GOOD POINTS NOTED

Nevertheless, there is more concern for the outside world, more interest in its problems, more generosity, and more resourcefulness in this society than in any free society I know anything about.

If it is true, as I believe, that this generation of Americans is doing less than it could, it is also true that it has done everything it was asked to do. It may be more concerned about its private interests than about the public interest, but if a man is offered a choice between a Cadillac and a swift kick in the pants, we should not be surprised if he doesn't bend over.

What has it been asked to do that it has not done?

It was asked to restore the broken economy of Europe, and it helped bring that continent within a decade to the highest level of prosperity in history.

It was asked to accept high taxation and military conscription to police the world, and it has done so from the north cape of Norway to Japan and Korea.

It was asked to keep a standing army of a quarter of a million men in Western Europe and it has done so for 15 years with scarcely a murmur of protest from a single American politician.

It was asked to abandon its tradition of isolation, and it took on more responsibilities involving more risks—in Korea and elsewhere—than the British ever did at the height of their imperial power.

These are not the acts of a slack and decadent people. There is nothing in the record of free peoples to compare with it. This is not a static society. The problem is merely that the pace of history has outrun the pace of change. Ideas and policies have lagged behind events, so that by the time policies were formulated, debated and

put in force, the situation they were intended to remedy had changed.

Thus, in a torrent of change, in a revolution of science, a social revolution at home and an unprecedented political revolution in Asia, Africa, and Latin America, it is scarcely surprising that there is a crisis of understanding in the Nation.

This is all the more true because there has been a serious weakening of the ties between the men of ideas and the men of politics in this country during the past decade.

WILSON'S IDEAS RECALLED

"Our slow world," wrote Woodrow Wilson in 1890, "spends its time catching up with the ideas of its best minds. It would seem that in almost every generation men are born who embody the projected consciousness of their time and people.

"Their thought runs forward apace into the regions whither the race is advancing, but where it will not for many a weary day arrive—the new thoughts of one age are the commonplaces of the next.

"The men who act stand nearer to the mass than the men who write; and it is in their hands that new thought gets its translation into the crude language of deeds."

It cannot be said that the men of ideas of the country have not performed in these last few years their traditional tasks. They have observed the convulsions of our time and let their minds run ahead to the logical consequences for the Nation.

I cannot remember a time when there has been more purposeful thought on contemporary problems in the universities and foundations than now. Their reports and conclusions would fill a good-sized library, but the alliance between them and the White House has been feeble, and somehow it must be restored.

What, then, can be done?

We can, at least, look at the world as it is instead of the world as we would like it to be. In the 43 years since the Soviet revolution—of which 20 have been devoted to establishing their regime and fighting the last World War—they have brought their industrial production to about 45 percent of ours.

SOVIET EXPORTS GROW

Since the war, their rate of growth has been between 9 and 10 percent while ours has been in the neighborhood of 3 percent. They are having trouble with their agricultural production, but if they and we both continue at the present rates of growth, the experts figure they will have approximately as much effective industrial production as the United States in 1975.

On the face of it, this may not worry the American people, but it is perfectly obvious that the trend is running against us in this field and that, as former Secretary of State Dean Acheson says, the likelihood is that Moscow will do three things with this new production:

1. Increase their military capabilities.

2. Increase their resources for economic penetration in the underdeveloped nations, and

3. By a combination of these two, demonstrate to the uncommitted countries of the world that the Soviet Union is the country of spectacular growth, and that the Communist system is the way to lift new countries in a short time into the new scientific age.

It is this latter point, rather than the threat of nuclear war against the United States, that concerns most students of this problem.

The Russians have already increased their exports to underdeveloped countries to about $3 billion. They have 5,000 people administering these programs. And they are directing them primarily in six countries of considerable political importance to the U.S.S.R.

It is much harder to understand the threat of this kind of economic penetration than it is to understand the threat of indirect Communist aggression, as, for example, in Korea. But the threat is there just the same.

Since the last war, 1,200 million people have changed their form of government in the world, and 800 million of these have achieved independence for the first time. These new nations are determined to be industrialized, ready or not. Hunger and pestilence are not new in the world, but the 2 billion hungry people are less willing to tolerate hunger and pestilence now that they know something can be done about it.

How these new governments develop, in freedom or by the quicker way of state control, may very well determine, not only the climate of freedom in the world, but the balance of power as well.

Thus the primary problem of foreign affairs may very well be, not the East-West problem we hear so much about, but what Sir Oliver Franks calls the north-south problem: whether the nations of the south, in Africa, Asia, and Latin America, develop along the lines of the free industrialized nations of the north, or the state-controlled methods of the two large Communist northern states of the Soviet Union and China.

We have tended to make several assumptions about this: First, that most nations wanted to develop like the United States, that knowledge cannot develop except in a climate of freedom, and that the Western Powers could deal with the underdeveloped nations without interfering much with present concepts of sovereignty or commercial practice.

All these assumptions are now under challenge. The Soviet Union has shown that spectacular scientific progress can be made in in a closed society. Cuba, to take only one example close at hand, has not only indicated contempt for the American system of free enterprise but is now organizing its whole society under state control.

WHAT THE PROBLEM IS

The problem is not that the Soviet Union produces better engineers than the United States—though it certainly produces more—but that it can direct its engineers into these new countries or anywhere else that helps promote the purpose of the state.

As Dean McGeorge Bundy of Harvard has pointed out:

"It may be that we are at the edge of a time in which authoritarian societies, controlling and using this new investment, the human mind, will be able to produce revolutions in power and in growth as remarkable to us as our own revolution, the industrial and technological revolution of the last 150 years, is remarkable today to the people who inhabit the world of rising expectations.

"To me, this hazardous possibility that centralized control of technology and of science behind it may lead to a new order of growth, of power, and of change in the hands of people with a high degree of political purpose and centralized and ruthless control seems to be the real danger in the growth of Soviet and Chinese power."

My conclusions about all this mysterious sociology and economics are unoriginal, vague, and even modest. All I know about the rate of growth is what happened to three boys of my own in the last 23 years, and even that is a little confusing. It would be pleasant to think, however, that all this concern in the Nation among serious men about the higher rate of growth in the U.S.S.R. was seriously discussed and not dismissed as another left-wing trick to increase the size of Government or elect some Democrat.

First, therefore, an honest debate on the issue might not be a bad idea. Maybe we cannot do everything everywhere. Maybe after 125 years of isolation and a generation of internationalism, somebody should call out once more to America:

"Catch thy breath and correct thyself."

But anyway, a revival of honest plain talk in the country wouldn't do any harm.

Second, in the face of the clear facts, anything less than the highest possible standard of education for the children of America is obviously a disgrace. We cannot punch kids out like cookies and drop them into slots, and wouldn't if we could, but we ought to be able to spend more money on their education than we do on all that sexy advertising.

Third, offhand, I would guess we were kidding ourselves in thinking we could do this job with the kind of people now working on it overseas or that we could do it without far more cooperation and coordination among the Allies.

If the main war is the battle in the underdeveloped areas, why not offer talented young men of draft age the option of using their brains in a civilian service in Indochina rather than sentencing them to Army K.P. in Hoboken?

It is not fair or accurate to say that the voluntary system cannot compete with the directed system in recruiting men for service in the underdeveloped areas, for no really imaginative effort has been made to attract the volunteers.

NEUROTIC FIXATIONS

Thus, wherever you look it is hard to escape the conclusion that our response is unequal to the threat. We are in what Prof. Walt Whitman Rostow of the Massachusetts Institute of Technology calls one of those neurotic fixations of history. There are periods when nations are confronted by radically new situations but hang on to old policies that are increasingly divorced from reality.

This is what George III of England did when confronted by what he called the rebellion of the American Colonies; what Edward VIII did when he hung on to Wally Simpson; what Stanley Baldwin did when he refused to rearm Britain in the face of Hitler's challenge and what the United States did when it clung to isolation after the rise of Nazi Germany.

Isolation is now gone, but the hangover of the old habits of the days of isolation remain: In our assumptions that we can meet the Soviet challenge with the same school system, the same political patronage system, the same diplomatic system, the same attitudes toward politics and the public service, and the same old chestnut about private interests inevitably serving the public interest.

It is not so much that we have lost our way forward but that we have lost our way home. This is the country of freedom, youth, experimentation, and innovation; of pioneers and missionaries and adventurers.

If you ask whether we can meet the Soviet challenge by concentrating on our private interests instead of on the public interest, by losing a great many of our best young brains in poor schools before they ever get to the college level, by not using our intelligent women when the Russians are using theirs, by not making a genuine effort to get our best brains into the most effective jobs to serve the Nation, why I'm bound to say that the answer is "No."

I believe, however, that there is still a lot of spunk and spirit in this country that can be brought by free methods into the service of the Nation, provided Presidential power is used to clarify where the Nation stands.

WHAT WE STAND FOR

The first national purpose is to know who we are and what we stand for, and it would be an impertinence to try to improve on the second paragraph of the Declaration of Independence as a guide to the problem.

"We hold these truths to be self-evident," it says in the first sentence. It thereupon

lists, as if they were the indisputable facts of last Sunday's American League batting averages, a whole catalog of wonderful things that are not only not self-evident in 1960, but are actually in violent dispute among men all over the world, including quite a few in our own country.

"All men are created equal," it says, and of course, this is just the trouble, for you can get an argument on that one anywhere in the Province of Georgia, U.S.S.R., or the State of Georgia, U.S.A.

In the minds of the Founding Fathers, the moral idea came before the political, and the latter was merely an expression of the former. This, too, was apparently the idea Matthew Arnold had in mind when he came to this country before the turn of the century and discussed our national purpose in New York.

He made two points:

"We must hold fast to the austere but true doctrine," he said, "as to what really governs politics, overrides with an inexorable fatality the combinations of so-called politicians, and saves or destroys states.

"Having in mind things true, things elevated, things just, things pure, things amiable, things of good report: having these in mind, studying and loving these, is what saves states."

However, the old gentleman, when writing these exuberant sentences, had no illusion about their being put into force by the majority. These moral concepts would prevail, he said, only as they were upheld by "the remnant" of leaders and thinkers who loved wisdom, for the majority, he insisted, was full of "prosperities, idolatries, oppression, luxury, pleasures and careless women * * * that shall come to nought and pass away."

A TASK OF LEADERSHIP

"The remnant" in America of those who love wisdom and have the ability to compete with any nation in the world is very large. It has greatly increased as the population of the Nation has increased, but it needs to be brought to bear on the great purposes of the Nation more than it is today, and this is obviously one task of Presidential leadership.

Meanwhile there is no cause to despair over the evidence of disorder and menace, for in all the golden ages of history, disorder and hazard have existed alongside vitality and creativeness.

"Surely our age shares many characteristics with the earlier golden times," Caryl P. Haskins, president of the Carnegie Institution of Washington, has written. "There is the wide feeling of insecurity, the deeplying anxiety, the sense of confusion, not unlike the earlier times in general character.

"But there is likewise the same intense concern with new ideas and new concepts, the same eagerness for widened vistas of understanding."

What Mr. Haskins did not say was that these golden ages were also periods of great leaders who knew how to bring ideas and politics together, and this seems to me to be the heart of our present problem.

ABOUT THE AUTHOR OF THIS ARTICLE

James Reston was born in Clydebank, Scotland, in 1909.

His parents brought him to the United States the following year, but he returned to Scotland for some of his early schooling and then came back to this country in 1920. He attended public schools in Dayton, Ohio, and graduated from the University of Illinois in 1932.

After holding a number of news and publicity jobs in the Middle West, he joined the Associated Press in 1934 as a sports writer in New York. Three years later the agency sent him to London where he covered the diplomatic activity preceding the outbreak of World War II. In 1939 he joined the London bureau of the New York Times and spent most of the war years in London and Washington. He became the Washington correspondent of the Times in 1953.

Mr. Reston won the Pulitzer Prize for his news dispatches in 1944 and 1956. He now writes an editorial-page column three times a week in addition to his news reporting.

Mr. CLARK. Mr. President, will the Senator from Wisconsin yield?

Mr. PROXMIRE. I yield.

Mr. CLARK. I congratulate the Senator from Wisconsin on the comments he has made.

I should like to call his attention to two other points made by Mr. Reston in the article; I think they are equally worthy of being called to the attention of our colleagues.

At one point in the article, Mr. Reston wrote:

Second, in the face of the clear facts, anything less than the highest possible standard of education for the children of America is obviously a disgrace. We cannot punch kids out like cookies and drop them into slots, and wouldn't if we could, but we ought to be able to spend more money on their education than we do on all that sexy advertising.

Mr. Reston also wrote:

If you ask whether we can meet the Soviet challenge by concentrating on our private interests instead of on the public interest, by losing a great many of our best young brains in poor schools before they ever get to the college level, by not using our intelligent women when the Russians are using theirs, by not making a genuine effort to get our best brains into the most effective jobs to serve the Nation, why I'm bound to say that the answer is "No."

It occurs to me that these programs are going to cost money.

We now have before us a bill which would cut even further the revenues of the Government. I hope all Members of the Senate will ponder the suggestions made in the article by Mr. Reston, before Senators vote on the pending cut-in-taxes bill.

Mr. PROXMIRE. I agree entirely.

There is no question about the relationship between the challenge and the plea raised by the distinguished head of the New York Times Washington bureau, Mr. Reston, and the bill pending before us today. In terms of immediate responsibility, I think they are very closely connected. Mr. Reston does make the fervent and, I believe, irresistible plea that we meet with firmness and intelligence the Soviet challenge.

MEDICAL CARE INSURANCE BENEFITS CUT OFF WHEN NEEDED MOST

Mr. PROXMIRE. Mr. President, what happens to senior citizens when they are barred from group insurance policies because of retirement? This is the question that plagues millions upon millions of Americans as they approach the retirement years.

Associate Director Frank Van Dyke, of the New York Prepayment Study, when testifying before the Subcommittee on Problems of the Aged and Aging, of the Senate Committee on Labor and Public Welfare, noted that studies reveal that only 22.9 percent of persons covered by group health insurance contracts of life and casualty companies for hospital expense benefits had the right to convert their policies on leaving work.

He added:

The recent effort by insurance companies to provide special policies for persons over 65 is laudable but ineffective. Premiums of $70 to $80 a year for part-payment hospital policies must be considered in relation to the three-fifths of persons 65 years of age and over whose money income is less than $1,000 a year.

There, in simple, cold statistics, is the problem we must face and solve.

Here, in the warm and thoughtful prose of a Wisconsin citizen, is a typical letter posing the same problem; and I ask unanimous consent, Mr. President, that the letter be printed at this point in the RECORD:

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

Many of us are wondering what your action will be in regard to the Forand bill. Everyone seems to agree that something must be done about the frightening expense involved during illness. It seems to me that this bill is the answer.

During a recent illness my expensive and comprehensive insurance policy did not prove to be sufficient. What will happen to us when we are unable to have a group policy because of retirement? How apt the phrase—only the poor and the rich can afford to be ill. I am a registered nurse. Our national organization has gone on record as being in favor of the Forand bill. It should be easy to understand why nurses who are often much closer to the patient's personal life than the doctors feel this way.

Very truly yours,

——— ———.

CHARLES W. ANDERSON, JR., OF LOUISVILLE, KY.

Mr. COOPER. Mr. President, the Honorable Charles W. Anderson, Jr., of Louisville, Ky., was killed on June 14 when his car was struck by a train in Shelby County, Ky. The untimely death of Charles Anderson is a great loss to Louisville, where he was born and where he lived, to the State of Kentucky, and to the Nation.

There is so much to say about Charley Anderson that I could not cover adequately his life and achievements. Charles Anderson was the son of a distinguished physician of Louisville, Ky., Dr. Charles W. Anderson, and his mother, Mrs. Tabitha L. Anderson, was an educational leader of our State and at one time the dean of women at Kentucky State College. Their educational interests inspired their son, and he became a graduate of Kentucky State College, received a bachelor's degree from Wilberforce University, and then his law degree from the Howard University School of Law in Washington, D.C. Pursuing his profession, he quickly became one of the outstanding lawyers of Louisville, and his colleagues in the legal profession recognized his ability by naming him president of the National Negro Bar Association in 1943.

It was only natural that his educational background, fine mind, ability as a speaker, and deep interest in public affairs, should lead him into political life. He was the first Negro to serve in the Kentucky Legislature, in fact the first Negro lawmaker in a Southern State since the Reconstruction era, and he served with distinction for 12 years, never being defeated.

In 1946, he became assistant Commonwealth's attorney for Jefferson County, in which Louisville, the largest city in our State, is located, and again he discharged his duties with ability and with a deep sense of public responsibility.

In 1959, President Eisenhower named Charles Anderson as a member of the U.S. delegation to the 14th General Assembly of the United Nations. Having been a delegate to the United Nations several years ago, I know many who were delegates to the 14th General Assembly, including members of the delegation of the United States, and the representatives of the State Department who are charged with United Nations affairs. Many of these delegates, and others, who knew of Charles Anderson's service in the United Nations have expressed their admiration and respect for his effective and devoted work in that important body, which means so much to the United States and, indeed, to the peace of the world.

I am glad that Mr. Anderson served as a delegate to the United Nations. His appointment by the President was a recognition of his long and distinguished career in public service. It gave him an opportunity for larger service to his country in international affairs, which he fulfilled in a magnificent way. And I know that his service gave him deep satisfaction. Since the close of the 1959 session, he had made speeches before many organizations and groups of people, explaining the work and purposes of the United Nations.

Charles Anderson leaves a devoted wife, the former Victoria McCall, of Detroit, a cousin of the Honorable Ralph Bunche, of the United Nations, and a leader in her own right. He leaves also two children, Charles Anderson III, and Victoria Margretta Anderson, who I am sure will follow in his footsteps.

Charles Anderson was a tireless worker and an eloquent advocate for his people and for their full equality and opportunity. They will miss him, and will not forget his effective and devoted work for their constitutional rights and for their interests.

Charles Anderson was a devoted and patriotic citizen of his State and of his Nation. He was a kindly and tolerant man.

I feel a deep sense of personal loss in his death, for I have known him as a friend for many years. But the great loss will be to his wife, to his family, and to his State and country, which he served so well.

I ask unanimous consent to have printed as a part of my remarks an article about Charles W. Anderson which appeared in the Louisville Courier Journal on June 15, 1960.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Louisville Courier-Journal, June 15, 1960]

C. W. ANDERSON KILLED WHEN TRAIN HITS CAR

Charles W. Anderson, Jr., former State representative and a leading attorney here, was killed about 4 p.m. yesterday when his car was hit by a train in Shelby County.

The 53-year-old attorney was a member of the U.S. delegation to the United Nations.

He was hurled from his car when it was struck at a crossing on the new Christiansburg Road, about a mile northwest of Bagdad. He apparently died instantly.

Anderson, the first Negro to serve in the Kentucky Legislature, had gone to Shelby County to talk with witnesses in an accident case he was handling.

CAR TORN TO PIECES

His northbound car was torn to pieces by the impact with the Ashland bound Chesapeake & Ohio passenger train.

Anderson was thrown from the car at the crossing. His head reportedly struck a nearby track.

The front of the car and its motor went an estimated 1,100 feet and smashed into a small frame building along the tracks.

A large rear section of the automobile was carried about 2,000 feet. Other pieces were scattered over a wide area.

The six-car passenger train left Louisville at 2:50 p.m.

The engineer was identified as Wilbur Faulkner, Lexington.

He reportedly told State Troopers Edgar Estill and Joe Hicks that the train was about 1,400 feet from the crossing when he saw Anderson's car slowly mounting the slight rise that marks it.

Faulkner said he sounded his whistle but was unable to stop in time. He estimated the train was traveling 55 miles an hour. It went an estimated 2,000 feet before stopping.

The troopers said the crossing area is overgrown with high weeds. The tracks on which the train was approaching make a broad curve, they said.

ALONE IN CAR

Anderson was alone in the car. His body was taken to Hall-Taylor Funeral Home, Shelbyville.

The attorney was appointed August 21, 1959, by President Eisenhower, as a member of the U.S. delegation to the 14th General Assembly of the United Nations.

The appointment capped a long and distinguished career in law and public service for Anderson.

In November 1935, Anderson became the first Negro to be elected as a member of the Kentucky Legislature, and the first Negro lawmaker in a Southern State since the Reconstruction era.

ELECTED TO SIX TERMS

He was reelected for six consecutive terms, serving a total of 12 years. He was a tireless worker for racial equality.

Anderson resigned his seat in the legislature in May 1946, to become assistant Commonwealth's attorney for Jefferson County. He was the first member of his race to hold that post.

In 1949, he was nominated on the Republican ticket for third district magistrate. He was defeated in the general election by a narrow margin.

In 1943 Anderson was elected president of the National Negro Bar Association and served 2 terms.

In 1940 he was awarded the Lincoln Institute key for outstanding contributions toward the advancement of Negroes in Kentucky.

In 1945 he was awarded the Howard University Alumni Award for distinction in law and Government. He held an honorary doctor of laws degree, and alumni certificate of honor from Wilberforce University, Xenia, Ohio.

Anderson was born in Louisville, the son of a physician, Dr. Charles W. Anderson, and Mrs. Tabitha L. Anderson. His mother was State supervisor of Negro schools and later dean of women at Kentucky State College.

He was a graduate of Kentucky State College and received a bachelor's degree from Wilberforce University. He received his law degree from Howard University School of Law in Washington.

Anderson lived at 1025 South Western Parkway. His wife, the former Victoria McCall of Detroit, is a cousin of United Nations Under Secretary Ralph Bunche. Two children, Charles Anderson III, and Victoria Margretta Anderson, also survive.

He was a member of the Elks and Masonic lodges and of Alpha Phi Alpha Fraternity and Tau Delta Sigma Legal Fraternity.

He was also a member of Quinn Chapel A.M.E. Church; American Legislators Association; National Academy of Political and Social Science; American Judicature Society, and the executive committee of the Louisville and Jefferson County Republican organization.

He had served on the national legal committee and the board of directors of the National Association for the Advancement of Colored People, and was a national member at large of the Urban League and a member of the executive committee of the National Bar Association.

NATIONAL PURPOSE—NEEDED TAX REVENUES

Mr. CLARK. Mr. President, several days ago the distinguished Senator from Wisconsin [Mr. PROXMIRE] placed in the RECORD an article by Walter Lippmann, which is one of the New York Times-Life magazine articles on our national purpose, which was entitled—"A Nation on Dead Center Needs a Tow."

I desire to comment on that article, although I shall not ask that it be printed in the RECORD again.

Mr. Lippmann pointed out:

We are now waiting to be shown the way into the future. We are waiting for another innovator in the line of the two Roosevelts and Wilson.

Mr. Lippmann states his thesis is that we cannot substitute mere affirmation of our ultimate ends for declaring our purpose and leading the Nation. Just to talk about our national goals and ends is like standing up when the "Star Spangled Banner" is played and then doing nothing further.

Mr. Lippmann continues:

The remedy, then, will not be found in the restatement of our ideals, however resounding the rhetoric. It will be found in the innovation of the political formulae, the concrete measures, the practical programs by which our ideals can be realized in the greatly changed world we now live in * * * it is not the Nation which is old, but only its leaders.

Again Mr. Lippmann states, and I paraphrase:

On our success in achieving military security by arms and by diplomacy depends our existence. Our ability to meet the challenge depends upon our success in learning to use our growing wealth for something

more than just private satisfaction. It depends upon our being willing to use it for imponderable and immaterial ends, like science, education, and the public amenities.

To do that, we must have more revenues in the Federal Treasury. That is why it is so important that we should close some of the tax loopholes, as we will have an opportunity to do.

Mr. Lippmann continues:

But we have also to be able and willing to pay for the things which cannot be consumed privately, such as the education of children, the development of beautiful cities and the advancement of knowledge. We have to be able and willing to pay for what is, to put it briefly, civilization itself.

That is the issue before the Senate on the pending bill.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. CLARK. I am happy to yield to the Senator from Wisconsin.

Mr. PROXMIRE. In view of the article to which the Senator from Pennsylvania has just adverted, I believe I should call attention to the great fight, and successful fight, which the Senator from Pennsylvania began late Friday night, and continued on Saturday, to get the fullest possible expression of what this bill means and the need for fiscal responsibility. I think that is the real substance of what occurred. The conduct of the Senator from Pennsylvania—very lonely conduct, but very, very effective conduct—deserves the highest commendation, because of his fight for fiscal responsibility and for the security of the country. He pointed out that it is necessary to do this in order to meet the Communist challenge.

Mr. CLARK. I thank the Senator for his kind words, which have not been too many lately, so far as the senior Senator from Pennsylvania is concerned.

JAPANESE TREATY

Mr. CLARK. Mr. President, turning to another matter, we shall have before us for ratification the Japanese Security Treaty. In that connection, I think it quite important that the Senate and the country should recognize the very serious setback which we have received in Japan, which, to my way of thinking, makes it all the more important for us to ratify the treaty promptly.

Two exceedingly interesting columns which I believe contribute substantially to a public understanding of just what we are up against in the Far East appeared in the Washington Post this morning, one entitled "Courtesy of N. S. Khrushchev," which appears in Joseph Alsop's "Matter of Fact" column; the other entitled "Grim Tokyo News—Trouble Hasn't Run Its Course," by Roscoe Drummond.

I ask unanimous consent that both these columns may be printed in the RECORD at this point in my remarks.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, June 20, 1960]

COURTESY OF N. S. KHRUSHCHEV

(By Joseph Alsop)

More than a fortnight before the final catastrophe in Tokyo, U.S. Ambassador Douglas MacArthur II was sent to Prime Minister Kishi to suggest that the Japanese Government disinvite President Eisenhower.

Kishi replied with consternation that if he responded to this American initiative by requesting the President not to visit Japan after all, his Government would fall as a result. He added that the new United States-Japanese Security Treaty would fall with the Government. He further pointed out that another probable casualty would be the parliamentary system in Japan. On this basis, the President adhered to his plan to visit Tokyo.

In the end, however, as everyone, alas, knows, the disorders in Tokyo got too far out of hand. Ambassador MacArthur was again instructed to invite the President's disinvitation. This time, Kishi yielded.

These background facts have several important implications, none of them agreeable. They show for instance, that the American Government had at least as big a role in the disinvitation as the Japanese Government. Everyone must be glad, of course, that the President did not run the kind of risk he would certainly have run by refusing to change his plan. Yet there is something contrived, something overly flavored with the arts of Madison Avenue in the Hagerty-style presentation of the change of plan as wholly Japanese in origin.

Above all, moreover, the background facts of the Japanese disinvitation show the underlying fraudulence of the Hagerty-style presentation of all these foreign journeys for which President Eisenhower had acquired such a taste, before the Japanese defeat. The same scene has been repeated in Europe, in India, and in South America. The cheering millions, the smiling President, the trumpeted assurances of the White House public relations staff that "Ike has won new friends for us"—the features are all familiar.

The President himself, apparently, believed these features of his foreign journeys had real meaning. But quite another reality has now been revealed by the ugly events in Tokyo. The truth is that in too many of the countries the President has visited, he got his glittering welcome by courtesy of Nikita Sergeyevich Khrushchev.

It is now clear, for instance, that the happy contrast between President Eisenhower's South American progress and the comparable trip of Vice President NIXON was almost wholly owed to Khrushchev. The magic that made the great difference between cheers and yells of hatred was not Mr. Eisenhower's magic.

The magic was in fact the discipline of the South American Communist Parties, which were ordered to act "in the spirit of Camp David" because Khrushchev was then still hoping to get his way about Berlin at the summit conference.

The realistic policymakers at the State Department in effect recognized these facts, as soon as the explosion at the summit caused a change in the Kremlin's orders to the Japanese Communists. This was the reason why a Japanese disinvitation was first invited by Ambassador MacArthur more than a fortnight ago.

The final disinvitation is the Kremlin's triumph. That cannot be concealed by any amount of Byzantine twaddle about the defeat in Japan being balanced by the success in Manila.

Furthermore, this American defeat in Japan is a far greater triumph for the Kremlin than almost anyone in this country has dared to admit. In Asia, more than in any other part of the world, people judge the direction of the bandwagon of history by rather simple indicators of power and prestige.

The Kremlin's proof that it can force our major Asian ally to disinvite the President of the United States will reverberate through every Asian country for months and years to come; it will do untold damage to American interests. It is a true catastrophe, directly traceable to the original wishful decision to make a journey which could only succeed by Khrushchev's courtesy.

Finally, no prudent person can ignore the contempt for this country which the world Communist leadership is now displaying. The Peking government specifically stated that it was scheduling an extra-heavy bombardment of Quemoy during the President's Taiwan visit, in order to underline its contempt and scorn for him. The orders given the Japanese Communists fit the same pattern. So does the much more disturbing plan for an exchange of visits between Khrushchev and Cuba's Fidel Castro.

Seven years ago, the masters of the Kremlin were showing all sorts of other unpleasant feelings about this country, but not contempt. But 7 years ago, the period of flaccid, comfortable American neglect of the world balance of power was only just beginning. The strong, remember, are never held in contempt.

[From the Washington Post, June 20, 1960]

GRIM TOKYO NEWS—TROUBLE HASN'T RUN ITS COURSE

(By Roscoe Drummond)

Planned violence by which a small minority imposed its will on the elected Government of Japan and forced President Eisenhower to cancel his visit to Tokyo has clearly not run its course.

Having used violence successfully to coerce the Kishi government, the extremist student and labor groups—managed by Communist professionals also—can be expected to continue violence as long as it works.

The immediate consequences are bad enough; what lies ahead could be worse unless the Japanese people and press become aroused in time to say: "Thus far, and no farther."

There should be no minimizing the grave danger which has been done to the authority of the Japanese Parliament and the grave harm which has been done to the prestige of the United States.

When he left Washington intent upon carrying through his trip to Japan, the President warned that demonstrations and threats by minorities must not be allowed to deflect world leaders in their quest for peace.

But minority violence did deflect these leaders from their quest for peace.

As the student disorders and rioting were reaching their peak in Tokyo, Kishi declared that if the Prime Minister yielded to this violence, public confidence in the Government would be destroyed.

Kishi yielded to violence. He conceded one of the demands of the demonstrators—that the invitation to President Eisenhower be withdrawn. It remains to be seen whether public confidence in the Kishi government can be restored.

These are only the first effects of the month-long campaign of the Socialist members of the Diet and the Communist agitators who quickly took charge. The greater dangers are these:

That the elected government of Japan will be brought down, not by an orderly vote in parliament, but by organized violence. That the proclaimed neutralist purposes of the socialist leaders of Japan will then come out into the open whereupon the Japanese people will find they have been saddled with a government which far from being neutral in the Nehru sense, is pro-Communist, pro-Peking, and pro-Moscow.

That the Japanese Socialists, distainful of democracy, are perfectly willing to substitute rule by public violence for rule by Parliament—if that is the only way they can achieve their ends. So far this has been the

only way they could achieve their ends. At no time had they been able to persuade the Japanese voters to follow their leadership. They had lost every postwar election and their parliamentary minority has shrunk at every test.

They have now started to win by force what they were unable to win by votes. This is why the events of the past few days point a gun at the very heart of Japanese democracy.

It remains to be seen whether the worst can be averted. There are some favorable factors. The Japanese people are basically pro-Western in their outlook. The Liberal-Democratic Party, presently headed by Kishi, would undoubtedly be reelected if orderly elections in Japan are still possible.

The most disturbing factor is that through all the political rioting the Japanese press and public seem to have taken a most casual indifferent, plague-on-both-your-houses attitude. As a result the government and the police have felt constrained to give the rioters a nearly free hand.

Unless the Japanese people as a whole are prepared to defend their democracy loyally and alertly, those who are out to subvert it will succeed.

CENTER FOR EAST-WEST CULTURAL AND TECHNICAL INTERCHANGE

Mr. LONG of Hawaii. Mr. President, recent world developments, including those in Japan, underscore the importance of the proposed center for East-West cultural and technical interchange. An editorial in the Honolulu Advertiser of June 18, 1960, makes that very point. point. I ask unanimous consent that the editorial, entitled "The War of Words," be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE WAR OF WORDS

The Communists have stepped up their propaganda war around the world to a frenzied pitch.

Red-led rioters in Tokyo forced Prime Minister Kishi to cancel President Eisenhower's visit, are pressing now for Kishi's resignation and junking of the new United States-Japan Security Treaty.

Communist Chinese rained 32,000 shells on Quemoy on the eve of President Eisenhower's arrival on Formosa, explaining beforehand it was to demonstrate contempt for the United States and its President.

In Geneva, the Soviet spokesman suddenly exploded with a charge that the United States deliberately seeks to prevent disarmament.

In Moscow, it was announced that Cuban Dictator Fidel Castro will pay a state visit.

It's all part of a fast-moving campaign to confuse and divide our allies and to frighten them and us.

The demonstration in Tokyo may have hurt us in Asia. How badly—and for how long—remains to be seen. But meantime, the Communist tactics are unintentionally doing the United States a favor.

Congress is moving to restore a $1 billion cut to the President's foreign aid budget. The United States is taking a hard second look at its policies and programs.

In short, the Communists are forcefully reminding Americans they must remain physically, economically and spiritually strong. This also means continued military and economic aid to such free nations as those in Southeast Asia against which the Communists might move on a limited scale at any time.

It also means the country must recognize, more than ever, the importance of psychological battle. In this connection, the East-West Center at the University of Hawaii, through free interchange of ideas, is precisely the kind of project needed to help counter the false Red propaganda.

This is a war of words and ideas. The truth can prevail—but it must be spoken loudly enough to be heard above the noisy falsehoods of the Communists—and it must be bulwarked by strength.

COMMITTEE MEETINGS DURING SENATE SESSION

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Subcommittee on Irrigation and Reclamation of the Committee on Interior and Insular Affairs be permitted to meet during the session of the Senate today.

The PRESIDING OFFICER (Mr. MUSKIE in the chair). Is there objection? Without objection, it is so ordered.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Internal Security Subcommittee of the Committee on the Judiciary be permitted to meet during the session of the Senate today.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Senate Committee on Labor and Public Welfare be permitted to sit during the session of the Senate today.

Mr. DIRKSEN. Mr. President, to that request I must object, and for a reason.

It was my impression, after discussing the matter with the leadership and with the chairman of the committee, the Senator from Alabama [Mr. HILL], that consideration of the matter would go over and the Senate would meet at noon tomorrow in order to make it possible for certain committees to meet. I thought that was a firm arrangement. Insofar as I know, the Senate will meet at noon tomorrow. This puts me in a slightly awkward position, because of some absentees at the moment with respect to the Committee on Labor and Public Welfare, so to the request I must object.

The PRESIDING OFFICER. Objection is heard.

Mr. JOHNSON of Texas. Mr. President, I was prepared to move that the Senate recess this morning, since I understood the Committee on Labor and Public Welfare desired to meet.

We have a problem in connection with meetings of the committees, and I should like to ask the chairmen of the committees to cooperate during the remainder of the session. It is a very difficult situation, when the Senate meets pursuant to an order entered the previous day, when one finds a number of committee requests the next morning that the committees be permitted to meet.

If I know a certain committee desires to meet the following day, I may ask the Senate to meet at 11 o'clock or 12 o'clock, to permit the committee to meet.

I have asked before that this be done, but I now ask the chairman of any committee which desires to meet on Tuesday to file a request on Monday, or authorize his staff to do so, so that when the Senate recesses or adjourns on Monday we can bear in mind which committees wish to meet on Tuesday, and when they wish to meet, in fixing the time for convening of the Senate. Frequently we recess to meet at 10 o'clock. We meet, and about 10:30 in the morning we get a request that some committee desires to meet.

I am informed that the Committee on Labor and Public Welfare, considering the minimum wage bill, desires to meet tomorrow morning. The committee would like to meet as early as 9 o'clock, if possible. The bill before the committee is important. The committee is anxious to report the bill. I understand Senators are prepared to continue consideration of the bill.

I am going to comply with the request of the chairman of the Committee on Foreign Relations that his committee be permitted to meet tomorrow, and the chairman of the Committee on Labor and Public Welfare, which desires to meet tomorrow. An objection was raised to the Committee on Labor and Public Welfare meeting this morning.

I shall ask that the Senate not meet until 12 o'clock tomorrow, so that those committees, or any other committees which desire to meet and which have important business to arrange and schedule, can meet. I hope that in the future the chairmen will ask their staffs to file one of these little form requests, from which I have read, stating the time and the purpose of the meeting, and I will file the request with the Senate.

The PRESIDING OFFICER. Is there further morning business? If not, morning business is concluded.

ORDER DISPENSING WITH CALL OF THE CALENDAR

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the call of the calendar under the rule be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

PUBLIC DEBT AND TAX RATE EXTENSION ACT OF 1960

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Chair lay before the Senate the unfinished business.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

By unanimous consent, the Senate resumed the consideration of the bill (H.R. 12381) to increase for a 1-year period the public debt limit set forth in section 21 of the Second Liberty Bond Act and to extend for 1 year the existing corporate normal tax rate and certain excise tax rates.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment on page 3 of the bill.

Mr. JOHNSON of Texas. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. JOHNSON of Texas. As I understand the parliamentary situation, the Senate must act upon the committee amendments first. Is that correct?

The PRESIDING OFFICER. That is the general practice.

Mr. JOHNSON of Texas. Mr. President, I am informed that the amendments adopted by the Finance Committee of the Senate, if concurred in and confirmed by the Senate, would have the effect of reducing revenues anticipated under the provisions of the House bill by some $700 million. I have not had an opportunity, over Sunday, to talk to the members of the Committee on Finance who voted for these amendments to the House bill which would reduce the revenues by that amount. I told the distinguished chairman of the Committee on Finance, before we took up the bill for consideration that the leadership had grave doubts about the wisdom of committee amendments which would reduce the revenues provided by the House bill.

I am prepared to support the dividend amendment the Senator from Minnesota [Mr. McCARTHY] is preparing to offer, but I am informed that will increase the revenues to the Treasury rather than decrease them.

I hope we can proceed to an orderly discussion of the committee amendments and arrive at some votes. I expect perhaps we will reject some of the committee amendments which would reduce revenues. We should try to get the bill to conference at the earliest possible moment, so that we will not run into the deadline of not having any bill passed when the excise taxes expire.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield.

Mr. CLARK. I wish to assure the majority leader that, so far as I am concerned, I have no intention of attempting to hold up reasonably prompt action, not only upon the committee amendments but also upon all other amendments which have been presented. I hope very much that we can complete action upon the bill today, but I would not be willing to agree to a unanimous-consent agreement, because some of the amendments are pretty technical, and I am sure those who oppose the amendments will wish to have an opportunity to discuss them. I do not think this means we cannot pass the bill today.

I congratulate the majority leader for the statement he has made.

Mr. JOHNSON of Texas. I thank the Senator.

Mr. President, I am not proposing any unanimous-consent agreement. I would not wish to have one, unless it would expedite action.

I hope the Members of the Senate will be present in the Senate Chamber, and I hope they understand, in the light of the announcement made, that we are likely to have several votes; and they will be very important votes. These are critical times. I do not think there is a Senator who does not advocate fiscal responsibility. At the same time, we wish to defend our country and to provide adequate defenses. It seems to me we must weigh very carefully and very heavily the wisdom of our acts in reducing the revenues provided by the House bill by some $700 million or $800 million. Before I vote for any such action, even though the Democratic members of the committee voted for the amendments, I shall have to have much more persuasive arguments than I have heard up to now, and I so informed the chairman of the Committee on Finance when he reported the bill.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSON of Texas. I express the hope that the attachés of the Senate will ask members of the Finance Committee who care to discuss the committee amendments to come to the Senate floor, because we hope we can consider and vote on them today.

SECRETARY MITCHELL DISCUSSES PERFORMANCE OF WORKERS OVER 40

Mr. KEATING. Mr. President, all of us are well aware of the problems which confront those over 40 who seek to find new jobs. I have received letters from many people over 40 who have experienced the frustration and disappointment involved in looking for suitable employment opportunities commensurate with their ability and previous work experience when, for one reason or another, they have had to change jobs.

It is hard to answer these letters. I sympathize with those who are affected, and know it to be a fact that older workers very often are more able and reliable than those newly entering the labor force. I know also that the Department of Labor under the farsighted guidance of Secretary Mitchell has done everything it can to provide opportunities for older workers and to publicize facts and figures which show that these workers are fully as capable, and often more so, than less experienced and younger workers.

I was delighted to read an article written by Secretary Mitchell, entitled "Myths About the Worker Past 40," which appeared in yesterday's New York Times Magazine. This is an excellent and thoughtful article, and certainly merits our attention. I hope particularly that employers who have qualms about hiring workers over 40 will read Secretary Mitchell's article and will give full cognizance to his views and to the factual material presented here the next time an older worker applies to them for a job.

I ask unanimous consent that Secretary Mitchell's article be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MYTHS ABOUT THE WORKER PAST 40—MORE THAN A MILLION PERSONS IN THIS AGE GROUP ARE SEEKING JOBS—AND IN MANY CASES ARE TURNED DOWN AS TOO OLD—AN EXPERT LOOKS INTO THE FACTS ABOUT THEIR CAPABILITIES

(By James P. Mitchell)

When does an American worker become too old to get a new job or win a promotion? The answer is: at a startlingly early age—40, or sometimes even younger.

Some 28 million members of today's labor force are 45 or older. Of this number, more than a million are seeking jobs.

Each day there arrives on my desk in Washington a letter to two like the recent one from a man I shall call James Haddon. He is 46. For fifteen years he worked as a sales engineer, reaching a salary level of $18,000 to $20,000 a year. He lost his job some months ago when his company, as the result of a merger, moved to a new location and he found himself unable to follow. He didn't worry at first. He was able, experienced, highly recommended by his former employer, and expected a minimum of trouble in finding new work. Until:

"We wish you had come to us 14 years ago, but * * *" The job, with an oil firm, went to a younger man.

"We are looking for a man in your specialty and appreciate the value of your experience, but * * *" That was from an automobile firm.

"Our company does not hire anyone over 40 * * *" A salesman's job. "* * * and you are past 40."

As the replies mounted up, James Haddon began to worry, and worry deeply. He sent me a clipping from the New York Times that reported on recent manpower projections made by the Department of Labor—projections indicating clearly that the Nation cannot afford continued age discrimination in employment.

"All right," Haddon asked, "what is a man to do?"[1]

Haddon and others like him are the victims of a senseless dual image. When employed, they are respected and valued members of the office force, the production line, the executive staff, or the sales team. When seeking work, they suddenly become too old to hire.

Even if hired, however, these workers are sometimes placed in jobs that do not demand their best and do not take full advantage of their often invaluable experience. This sidetracking of valuable abilities because of preconceived notions about age and work is a prevailing practice that endangers our full economic growth.

The projections that Haddon referred to in his letter make sober reading for every businessman, union leader, and family head in America. We anticipate that by 1970 the American economy will be turning out $750 billion worth of goods and services, 50 percent more than today. Even with a rising population this would result in a 25-percent increase in our standard of living.

The number of workers needed to man an economy of that size is estimated at 87 million, 13.5 million more than are in the labor force today. Population increases as-

[1] I could reply only that we in the Department of Labor are doing what we can, and advised him to visit his State employment office. Haddon already had written to the office, on January 29, but he did not go for an interview until mid-April. The office's register listed one job opening, in another part of the State, for which he was qualified. He visited the prospective employer, but was not hired—because of his age, he says. As of this writing. Haddon is still out of work.

sure us of at least that number, but this is a deceptive kind of assurance. When we look carefully at the expected increases of workers in different age groups, we begin to realize that the traditional composition of the labor force, men and women, will be sharply altered in the coming decade:

Workers under 25 years of age will increase 6.4 million by 1970.

Those over 45 will increase by 5.5 million.

Among workers 25 to 34 there will be a relatively small increase of 1.8 million, while there will be an actual decline in the number of workers 35 to 44.

That is all the handwriting on the wall that a company president should need to see that the chief sources of his labor supply in coming years will be the young, inexperienced workers just out of school, and the experienced older workers he may now be turning away or misusing. Those employers who persist in discriminatory policies of any kind are going to find themselves squeezed out as the contest for manpower increases.

Let us examine the prejudices against hiring, and properly utilizing, older people. One prevailing myth is that older workers produce less than younger ones, that they cannot keep up the pace of their prime years. It is thought, too, that older workers are absent a great deal more than their younger colleagues, that they are more prone to serious illnesses and accidents.

Another charge is that older persons are set in their ways and unable to adjust to the rapidly changing conditions of our modern economy. It is argued that an older employee is going to do things his way, failing to take full advantage of efficient modern techniques.

Perhaps the most often stated and most persuasive of the arguments against hiring older applicants is that costs to the employer go up sharply when an older person is enrolled in a pension plan. Rather than pay the higher premiums, the employer will set an arbitrary age limit on new applicants.

The Department of Labor has taken all of the objections to hiring older persons seriously. Why a man or woman should represent one image when employed at a plant or office, and another when arriving for a hiring interview at a similar plant or office down the street, or across the country, is a question that has concerned us greatly, and we began, in 1955, to explore the objections and barriers to hiring older persons.

To the charge that an older employee is less productive, we are now able to cite chapter and verse from our studies that show there is very little difference between the productivity of younger and older workers. A Department of Labor analysis of the job performance of production workers in 26 plants disclosed that the difference in output between the individuals of a selected age group were larger than the differences between age groups themselves.

Another recent study, made of officeworkers in 5 Government agencies and 21 companies in private industry, produced results very similar to those of the factory studies—"relatively little variation in average performance among age groups, but considerable variation among individuals within age groups."

It was significant that a large proportion of the older workers exceeded the performance of the younger, base group average. Even more significant was the fact that the older workers were shown to be more consistent, especially between the ages of 55 and 64, than the younger workers.

The National Association of Manufacturers conducted a study that reported 92.7 percent of the older workers covered were at least equal and frequently superior in productivity to younger men and women. Here again, differences in output within age groups were larger than those between age groups.

Thus, the generalization that younger workers perform better than older ones is hokum. And so is the one stating that older workers are absent more. The reverse is true. The older man is likely to be a family man, a homeowner with community responsibilities that make his presence on the job important to him. He is more settled than his younger colleague; he has, more often than not, put his roots down and is seeking permanent employment and steady work. All of our studies showed that the older worker is less given to absenteeism than the young worker.

The statement that older workers are less flexible is also untrue. It is, no doubt, based on evidence that young people learn faster than older ones—but in this context older learners may be every bit of 20. Psychologists have concluded that, in the working world, a mature individual learns differently from, but as well as, a younger one. He has, from experience, the ability to select, to value and to conserve, and he also has a background that enables him to grasp principles.

A sampling of 160,000 jobseekers showed that the 40-plus worker possesses far better occupational qualifications than the junior. Twice as many were classified as skilled workers.

The question then arises: Aren't many skills going out of date?

The popular conception of the new missile-age industries as a young-people-only world is based on the assumption that, since these fields of work have expanded only in the past few years, skills acquired previously are obsolete. The fact of the matter is that skills are interrelated; a man who can do one job well finds it easier to adapt his skill to a new set of challenges and circumstances. The growing electronics industry of New England, for example, is using the skills of a stable work force previously employed in other industries.

Thus, an individual older worker is probably every bit as flexible as an individual younger one. He may even have a head start from the training already behind him.

The most difficult argument to answer against hiring older workers concerns the added cost to the employers of carrying an older employee on his pension and welfare plan rolls. It is true that, in some cases, the immediate cost to an employer is greater if a relatively older man or woman is added to his pension plan, rather than a younger one. For those to whom immediate cost is a serious consideration, this may be a very real determinant in hiring policies.

But the ultimate cost will not be substantially greater under pension plans covering most workers today. These are plans which relate benefits to length of service or to levels of current or future earnings, or both. Since the older worker entering the plan will have a shorter period of service before retirement, the benefits and the cost will generally be proportionately smaller.

This, in itself, may be an obstacle. Many company presidents may feel that the payment of a small pension, or none at all, is the worst kind of public relations. Today, with improved Federal old-age benefits toward which the employer contributes at the same rate for every employee, the feeling loses some of its validity. Moreover, when the experience, dependability, steady attendance and lower turnover of older workers are taken into account, it becomes apparent that increases in costs are often offset.

Related to the fear of pension-plan difficulties is a prevailing opinion that older workers are more prone to accidents. Here again, cost is the central concern. But workmen's compensation rates are based on a particular company's accident experience and the relative danger of the work performed. Age has no bearing on such rates. This is proper, since our studies have shown that the older worker is no more prone to accidents than the younger one.

From our studies has emerged the important realization that generalizations applied to older workers are simply not true, any more than generalizations applied to younger workers. Neither group is, as a rule, lazy, careless, undependable, subject to illness and accident, stubborn, ill-tempered, disloyal, inefficient, or rigid in attitude. There may be individuals who are some or all of these things—just as there are individuals who are excellent and productive employees—in every age group.

Employment policies in America must be based on the individual, not on any group myth. The Nation must not be deprived of an invaluable resource, the proven ability of its older workers, at a time when we are in a global economic contest.

The prejudice against older workers will not vanish overnight, but the Department of Labor is pushing ahead a nationwide program, through the Federal-State employment services, to help dispel it. Counseling and job placement services for older workers are provided in all 1,800 local offices of the Public Employment Service in the United States. In addition, through money specifically allotted to the program, employment specialists are assigned in all major offices specifically to assist older workers.

We have had some encouraging successes. Even during the business downturn of late 1957 and 1958, when employment was falling off in many major industries, nearly 20 percent of nonagricultural placements made through the Employment Service were of workers over 44. In the heart of the recession, more than 1,100,000 older persons were placed in jobs through our special counseling and placement.

But I do not believe that such a program alone can fully eradicate the prejudice against older workers. Only public opinion, democracy's most powerful weapon, can do that.

That is why the true older-worker story—one of ability and competence—should be brought to the attention of as many people as possible. Until the trend of opinion goes in the direction of helping the older worker, clearing away the false myths that surround him, and opening up new vistas of employment opportunity, the problem will remain with us.

Employers, union leaders, community leaders, civic groups, trade associations—and every interested citizen—can contribute toward opening the way to full opportunity for our older men and women. If this is done, then the recent experience of a firm just outside Washington, D.C., may be repeated everywhere.

The advertisement read: "Over 50—three men wanted now." More than 10 applicants showed up the following morning. The company had originally intended to hire three experienced men to help estimate contract work, but so impressive were the job backgrounds of many of those interviewed that it hired six—three for the estimating department, and three more for production jobs. The manager said to the local employment office representative: "If we win these contracts, I'm going to run another ad, with the same words."

He is sold, as I hope all America will be sold, on my way of looking at the older worker: Ability is ageless.

EDITORIAL SUPPORT FOR OUTER SPACE AGREEMENT

Mr. KEATING. Mr. President, a recent editorial in the Rochester Times-Union contains an incisive discussion of the factors requiring prompt consideration of space law problems. The editorial sagely observes that under present

world conditions, we cannot afford to approach the question of sovereignty in outer space as an "academic matter for political scientists and international lawyers."

The editorial calls upon the U.N. to quickly enter the field. I have been urging action similar to that called for in this editorial for some time. I commend the Rochester Times-Union for centering attention on this momentous issue and for taking a strong stand in favor of a U.N. agreement.

Mr. President, I ask unanimous consent that the editorial be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

WHO OWNS OUTER SPACE? RED THREATS RAISE QUESTION

Under normal world conditions, the question of who controls outer space would be an academic matter for political scientists and international lawyers, like the question of fishing rights on the Grand Banks.

PERILOUS SUBJECT

But world conditions are far from normal, and threats are darting back and forth like intercontinental missiles. Sovereignty is now a dangerous, touchy subject, all the way up to the stars.

It was once agreed, centuries ago, that all nations controlled their territory "to the heavens." In actual fact, however, control was unimportant beyond the upper limits of balloon and later airplane travel. As late as 1954, when all nations reasserted their individual sovereignty over the air in a joint convention, the question of outer space wasn't considered.

But modern satellites and modern weapons now make the subject of critical importance. And since, practically speaking, the question of space sovereignty is as much of a vacuum as space itself, it demands an early solution before the world is plunged accidentally into war while trying to settle things.

Soviet Military Boss Malinovsky now says the orders are out to destroy the foreign base of any plane violating the Soviet Union's air sovereignty.

But suppose the "invader" were a spy satellite, clicking reconnaissance pictures from 100 miles up? Since it would be invulnerable to present antiaircraft weapons, does the Soviet Union propose to destroy the Cape Canaveral base from which it came? And suppose we propose, in retaliation, to do the same with Soviet satellites which whirl in the heavens over our heads?

Things have not yet reached that stage, fortunately. The Russians have largely ignored the satellite question, probably because they're in the space business with both feet too.

But considering present tensions, there's no reason Soviet emphasis couldn't shift as soon as American satellites started taking pictures of things more precise than cloud formations.

Sovereignty from the limits of the atmosphere down is too deep-rooted in ancient national pride to be ignored or abolished. But outer space is something that belongs to all men, or more precisely to none.

U.N. JOB

Here is a field for the United Nations to enter, and quickly. It will not be an easy task—an international conference over the matter of territorial limits in the high seas broke up in disagreement not long ago.

But a worldwide agreement, something like the one made recently to permit unlimited Antarctic exploration, is needed to guarantee space freedom. Space must be kept separate from the battlegrounds of the earth below, which are quite dangerous enough.

GRANDMA MOSES DAY

Mr. KEATING. Mr. President, one of the leading citizens of my State is, in the fullest sense of the word, a citizen who belongs to all the world. She is Anna Mary Robertson Moses of Eagle Bridge, N.Y., better known everywhere as Grandma Moses.

This great lady and artist has brought an inspiring message to people all over the world. Not only has Grandma Moses become a legend in her time; she has also demonstrated to elderly people everywhere that the opportunity for achievement and satisfaction really knows no age. By her example and through her paintings she has projected a wonderful and indelible image of America to the four corners of the globe.

In my view, the message of Grandma Moses and all she stands for could be communicated ideally through the issuance of a commemorative stamp bearing one of her paintings. It would be a fitting tribute on the occasion of her 100th birthday on September 7 of this year. I have made this suggestion to the Postmaster General and I am hopeful an affirmative response will be forthcoming.

In this connection, I was interested to note that Gov. Nelson A. Rockefeller of New York recently issued a proclamation to set aside September 7 as Grandma Moses Day in my State. I ask unanimous consent that the text of the Governor's proclamation be printed in the RECORD.

There being no objection, the proclamation was ordered to be printed in the RECORD, as follows:

PROCLAMATION BY GOV. NELSON ROCKEFELLER OF NEW YORK

A citizen of the Empire State whose personality and accomplishments are quite unique, in this or any other century, is about to celebrate her 100th birthday. Her name, on the register of New York voters, is Anna Mary Robertson Moses. We know her with deep esteem and affection as Grandma Moses.

At an age when most people think only of retirement, Mrs. Moses acquired the ability to paint pictures which are known and sought eagerly by thousands of people throughout the length and breadth of our land.

This she accomplished without benefit of teacher or art school or study. She painted—and today is still painting—for the sheer love of painting. Her success has astonished nobody more than herself.

Our beloved Grandma Moses, born in Greenwich, N.Y., is a highly respected senior citizen of Eagle Bridge, N.Y. But the people of the entire Empire State claim her as a neighbor of whom they are most proud.

Her paintings have endeared her to all who have seen them. Her personality has endeared her to all who have the privilege of knowing her.

Now, therefore, I, Nelson A. Rockefeller, Governor of the State of New York, do hereby proclaim September 7, 1960, as Grandma Moses Day in New York State, in the hope that she may have many more years of health and happiness to continue giving happiness to others.

Given under my hand and the privy seal of the State at the capitol in the city of Albany this 25th day of May in the year of our Lord 1960.

By the Governor:

NELSON A. ROCKEFELLER,
WILLIAM J. RONAN,
Secretary to the Governor.

WE MUST RAISE THE MINIMUM WAGE AND BROADEN ITS COVERAGE

Mr. YOUNG of Ohio. Mr. President, modernization of the wage and hour law should be favorably considered before this session of Congress adjourns. I am glad that we in the Senate shall debate this meritorious legislative proposal within a few days.

The Congress last increased the minimum wage, from 75 cents to $1 an hour, in 1955. Since that time, as we are so painfully reminded every time we make a purchase, the cost of living has steadily soared upward. A new high cost of living record is set practically every month or so.

It is clear that under present circumstances $1 an hour can hardly be considered a satisfactory living wage.

In fairness to underpaid workers who have been helpless to increase their earnings to meet rising living costs, the minimum wage should be raised at least 25 cents an hour to a total of 1 dollar and 25 cents.

Mr. President, equally urgent is a broadening of the coverage of the wage and hour law to include within its provisions millions of workers not now protected.

Originally, this act was applied only to certain workers in the fields of manufacturing, mining, wholesale trade, finance, insurance and transportation.

In the expanding America of the 1960's coverage should be extended to millions of workers who are not now protected.

It should include the half-million migratory farm workers whose poverty and abysmally low standard of living are a blot on the face of 20th century America and make a travesty of our boasts of great prosperity throughout our country.

It should include, too, among many others, those thousands of laundry workers now earning an average and pitiful wage of 53 cents an hour.

Mr. President, one of the great promises of America is the promise that here all persons may live in comfort and dignity. This promise must be fulfilled.

Substandard wages should be eliminated from the American scene. They are a relic of the past and cannot be condoned in the wealthiest nation on earth.

We may boast of our high standard of living and point with pride to our productive economy, but our boast will ring a little hollow and our pride will be a little tarnished as long as there are millions living in unemployment and in poverty in the midst of plenty.

We must help bring more of the fruits of our economy to all Americans by increasing the minimum wage and ex-

panding its coverage. Thereby we shall help bring to millions of American men, women and children just a little more of God's sunshine.

I am hopeful that we in the Senate will do our part in connection with this matter before the end of the present week.

WAIVER OF THE 3-DAY RULE IN CONNECTION WITH THE CONSIDERATION OF APPROPRIATION BILLS

Mr. JOHNSON of Texas. Mr. President, I doubt that we will reach it today, but I would like all Members to be on notice that we hope to proceed to the consideration of appropriations bills with as much dispatch as possible. The independent office appropriation bill, the legislative appropriation bill, and the general Government matters appropriation bill have been reported. I believe that some of them will be taken up today or tomorrow. I ask unanimous consent that it may be possible to take up either of these three bills today, notwithstanding the 3-day rule.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

PEDESTRIAN SAFETY AWARD

Mr. ERVIN. Mr. President, I am greatly pleased with the signal honor that has been earned by Statesville, N.C.

This progressive city of 20,000 population in my State has won the Grand Award of the American Automobile Association for its outstanding efforts to save pedestrian lives in traffic. Statesville won the grand award for cities under 100,000 population; Rochester, N.Y., is the winner of the grand award for cities over 100,000 population.

Statesville won the grand award in 1956, emphasizing a continuing record of safety.

The AAA, in announcing the winners, had this to say about Statesville, N.C.:

> The choice of Statesville, N.C., again focused attention on the seemingly miraculous hand of Police Chief William T. Ivey, who has been directly responsible for winning grand awards four other times, two of them in other cities.
>
> Under Chief Ivey's leadership, Statesville has developed an outstanding overall pedestrian program which, according to the AAA, accounted for the absence of fatalities in the city last year.

On a recent visit to Statesville, I had the opportunity to discuss the pedestrian safety program with Chief Ivey and Mayor J. Garner Bagnal. It is a pleasure for me to note here that through the cooperation of the citizens of Statesville with the city officials that this outstanding recognition has been achieved. I want to commend the American Automobile Association for stimulating interest in pedestrian safety.

In closing, I wish to add that Statesville's great record has been materially assisted by my good friend, Victor Soreno, who has inspired an unsurpassed state of morale among the members of the school safety patrol of that city.

BACKGROUND OF THE PHILOSOPHY OF KARL MARX

Mr. MURRAY. Mr. President, I ask unanimous consent to have printed in the RECORD a lecture on the background of the philosophy of Karl Marx, by the Reverend Francis J. Conklin, S.J.

There being no objection, the lecture was ordered to be printed in the RECORD, as follows:

Many Americans cannot grasp the significant pressures which arise under a union of church and state. We have had no occasion to suffer under the abuse of political power by men in high ecclesiastical position.

For example, when Grenada was captured in 1492, the first man appointed archbishop, Calaveras, made enlightened efforts to convert the Moors. An intelligent and honest ecclesiastic, he practiced the evangelical counsels in his private life. Some solid and sincere conversions among the Moslems resulted from his efforts. Calaveras was succeeded by Cisneros. In 1499 Cisneros became impatient with the initial slow progress of Christianity among the recently subjected Moors and decreed that the Moslems must be converted or face drastic penalties. On one occasion, Cisneros baptized 4,000 semi-willing Moslems by aspersion. This imposition of Christianity bred hatred and created an underground who remained faithful to Moslem practices but were externally Christians. To combat this resistance movement the Inquisition came into existence with all its tragic consequences.

You will recall that at the Diet of Worms the principle, "cuius regio illius religio" was adopted as the only feasible compromise in the European religious conflict. This political-religious division of Europe at the time of the Reformation underlay the fact that 19th century Prussia under Frederick William IV had orthodox Lutheranism as the official state religion.

Julius Von Stahl best expressed the views of orthodox Lutheranism in Hegel's Prussia. Stahl was a militant Protestant converted from Judaism. To understand Stahl's vehemently defended, yet extreme position, we must refer back to Martin Luther.

Let me first reiterate that in speaking of individual thinkers we have time to give only thumbnail sketches. We almost have to oversimplify because we do not have time to qualify each statement with a myriad number of particulars. Substantially, what we say can be defended.

Martin Luther emphasized human weakness to the point of declaring that fallen man is essentially corrupt, and that without grace fallen man can accomplish no good. You will recall from your reading of history and theology, how Luther arrived at these conclusions. The political implication of Luther's theology is that the political power is an external force which will compel essentially vicious and corrupt men to live together in peace.

Had there been no original sin political force would not be required to hold men in check and restrain their vicious tendencies. Expressed more succinctly—in Luther's view the sole purpose of the state is to keep the peace and permit the gospel to be taught.

Julius Von Stahl was obsessed with one problem: how can we know the will of God with certainty? Von Stahl believed that sin demanded law, justice, constraint, and chastisement. The universal dominion of sin and the corrupt viciousness of human nature adequately demonstrate why God cannot entrust chastisement and law to the caprice and vagaries of individual human beings. Consequently, God has entrusted law, justice and punishment to a supra-human organization: the political state.

In Von Stahl's cosmogony the state represents God upon earth. To restrain the corrupt and vicious tendencies of fallen nature the state monopolizes law, justice and chastisement. The political state has a special God-given power over the actions of men. It must force men to submit. Censorship of the press is a good example of the state's power. This censorship is God-inspired, because such external restrictions leave men interiorly free. The interior freedom of the true sons of God remains the only true freedom worth possessing. In the light of eternity and the Gospel, external freedom—like everything tainted by association with this material and corruptible world—will eventally pass away. (Interior freedom has little meaning when the exterior is completely controlled by an almighty and all too human state.)

Schleiermacher comes at the other extreme of the theological spectrum. Here we meet the theologian of romantic feeling. Luther unquestionably placed tremendous emphasis upon the emotional content of religious experience because Lutheran salvation arises only from a near traumatic experience. Lutheran faith means confidence, or as it is frequently called, fiducial faith, i.e., a trust.

Luther states that man is saved by this faith and by this faith alone. In contrast, the Catholic, by faith, means giving intellectual assent to a truth and relying upon the authority of the impeachable God for the certitude of that intellectual assent. Luther deliberately and painstakingly rejected this traditional concept of faith in favor of a fiducial trust or emotional confidence.

The point here is that the excesses of Schleiermacher's religious impressionism, find their natural origin and repose within the Lutheran system.

For Schleiermacher, theology is no longer a pursuit of Truth (fides quaerens intellectum), but a symbolic expression of personal experience and impressions. The objective truth of traditional Christian doctrine finds its validation in the intensity of our feeling. The inflamed will produces acts of certitude.

We had better pause for a moment. Why are we interested in Luther, Lutheran theology, and the Lutheran theologians Von Stahl or Schleiermacher? The answer is complex and subtle. A good part of the reason lies in the influence exerted by Ludwig Feuerbach upon Karl Marx. Part of the reasons consists in our search for the answer to one question: why did Karl Marx deny the existence of God? Finally, in Prussia, while Marx was young, an open and direct verbal attack upon the state was impossible. Orthodox Lutheranism, the state religion, bulwarked the political status quo. Hegel, the philosopher par excellence of monarchical hegemony, had opened the door for shrewd attacks upon one foundation of the Prussian monarch: Orthodox Lutheranism.

After Hegel's death the disciples split. One group correctly regarded Hegel's philosophy as incompatible with Christianity. They saw in the revolutionary implications of Hegel's teaching a tool that could undermine the Prussian political order by first destroying the church which supported that order. These radicals or reformers were the leftwing Hegelians. The right or orthodox wing hoped against hope to reconcile Hegel and their traditional Christian (i.e. Lutheran) heritage.

Next we consider David Straus. In 1835 he published "The Life of Jesus." Straus contended that the Gospels contain what he called contradictions, i.e. discrepancies in the account. Anyone who reads carefully the four Gospels can obviously see there are irreconcilable disagreements in the four accounts, and that the Gospels contain miracles. Straus argues: Since these contradictions exist in the Gospels, the documents do

not record historical events. What, then, are they?

For Straus, the Gospels are the result of the myth-making or poetic tendencies of the early Christian communities. Jesus was a man who has become myth. Jesus is the Christ myth. When we say that Jesus is divine, we mean that Jesus symbolized the divinity of all men. The Christian religion has some basis in history because a man by the name of Jesus did exist. All communities make their own religion, their own myths, which in time become beliefs, symbols and finally dogmatic precepts.

Bruno Bauer continued the attack upon the Prussian state via the Christian religion. Bauer says that Straus is wrong: The Gospels result from the deliberate attempts of the evangelists to deceive. The events recorded in the Gospel never took place. Just as Homer created his gods the evangelists created theirs. Briefly, the Christian religion has no historical justification.

While this theological ferment was shaking Europe, young Karl Marx was beginning to form his philosophical system. In 1841 Marx published a short work called "The Trumpet of the Last Judgment on Hegel." This was written in collaboration with Bauer. Marx contended that Hegel does not support Prussia. Prussia stands upon Lutheranism, i.e. upon a form of the Christian religion and Hegel is an atheistic rationalist. Hegel's Trinity is not the Christian Trinity and Hegel's god, the absolute spirit, will undermine both itself and Prussia.

Two other articles will give you an insight into the early attitudes of Karl Marx. In 1842 Marx published an article attacking Prussian censorship of the press. Marx insists that the King of Prussia is illogical, because the King had ordered his censors to distinguish between the spirit and the letter. However, the censors made no such distinctions and no writing advocating the overthrow of Prussia or the constitution was permissible. What Prussia fears, said Marx, is criticism.

Another short article illustrating Marx's early social viewpoint was an article concerning the Rhineland peasants. From time immemorial these peasants had been permitted to take wood in the forest. Suddenly, by bureaucratic edict, this right was abolished. Marx argues that the Prussian state, as the purported organ of justice, should assist the poor and not cause them further suffering.

Throughout this outline of theology we have had in mind one person who was extremely influential in Marx's life. That person is Ludwig Feuerbach. Feuerbach won distinction as the first great philosopher to successfully attack Hegel. His attack is devastating.

Says Feuerbach: The existence of the absolute idea is an unproved supposition. What Hegel has done is to assume, not prove, the organic totality of the universe. To make this conception of organic totality function, Hegel has neglected, really he has banished the sensible, the concrete, the singular. In a word, Hegel has forgotten about matter. Hegel has neglected, banished, and omitted the very thing that makes things singular.

Because Hegel neglected matter and because Feuerbach came to matter's rescue, Feuerbach has frequently been classified as a materialist. There are certain expressions in his writing that might pass for classic expressions of materialism. But these expressions must be understood. "Man thinks with his brain" means man also thinks with his brain. "Man is what he eats" means: human is what human does.

We must return again to Martin Luther because we have to view Feuerbach in the context of traditional Lutheran dogmas. For Luther, faith does all. Justification comes from faith and faith alone. This faith is fiduciary and fraught with emotional overtones. In a very profound sense, Luther's faith creates its own God.

Luther despised fallible, weak, human reason, so that the Lutheran God, the mighty fortress, stands impregnable and unapproachable by human reason. Luther denied the fundamental premise of Catholic faith: that the certitude of theological faith comes from the authority of God who can neither deceive nor be deceived. Luther's fiducial faith reduces to a combined intellectual leap in the dark, an emotional experience of confidence. In this sense, Lutheran faith creates its own deity.

The other horn of the Lutheran dilemma is this: Luther would have us seek God upon earth, in the man Jesus. In quest of God upon earth Luther permits the predicates of divine majesty to belong to the humanity of Jesus, in the abstract. Thus, the humanity of Jesus becomes one, true, eternal, immense, everywhere, etc.

What has this got to do with Karl Marx? In 1841 Feuerbach published "The Essence of Christianity." Feuerbach argues: Religion is common to people, but not to animals. What distinguishes men from animals is self-consciousness. Consequently, the secret of religion lies somewhere in man's power to be conscious or to reflect. Moreover, religion is a denial of self; a process whereby man attributes to another the unlimited qualities of which he is conscious. Thus, religion, the consciousness of the infinite, is nothing but man's consciousness of his own unlimited nature. Theology becomes anthropology.

Illustrating Feuerbach's doctrine in terms of the Hegelian dialectic we begin with a thesis, the existing self who has infinite attributes, i.e., the power to reason, to will, and to love. These powers are without limit. Opposed to this self is the antithesis: the self-projected, whom we call God; the denial of self. The synthesis unifies the extremes in a new truth when we realize that man is divine. Man refers to no vague humanity but to the social-emotional fraternity of all men.

For the moment let us make an excursion into the individualism of Max Sterner. Sterner regarded Feuerbach's worship of man as superstitious. "Man" is an abstraction, so why should Max Sterner die for humanity, rather than those other abstractions: God and Country? For Max, to serve humanity, means to serve this humanity; namely, me. Feuerbach made man create God to man's image. Sterner creates man in Sterner's own image. In a word, Sterner is his own God.

We mention Max Sterner in passing because Marx will bitterly attack him for his selfish individualistic, social view of life. Marx's Muse inspires a social vision. Marx focuses attention upon the group and upon the social consequences of human action. Marx's social insight is a valuable and valid intuition which remains, at least, partially unassimilated by modern scholasticism.

Before concluding this introduction to the religious currents prevalent at the time of Marx we must mention Marx and the Jewish question. Some authorities seem to delight in underscoring the "Jewish element" in Marxism with particular emphasis upon the Messianic element in the philosophy of communism. Fortunately, such scholarship is becoming less fashionable. The factual history of Marx's early life will not sustain any preconceived concepts of Jewish influence. Marx was a Jew in name only. His father embraced liberal protestantism when Karl was of tender years. And any Messianic elements permeating the current philosophy of communism are more readily explicable as specifically Russian characteristics, as we shall subsequently demonstrate.

Returning to Marx and the Jewish question, we find that the Jews had no civil rights in the Prussian Christian state. Since Jews had no civil rights so long as they chose to remain Jews, Marx's father had abandoned the Jewish religion in favor of a politically acceptable liberal protestantism.

Marx argued that any form of Christian state is a contradiction in terms: It cannot be Christian because, like every state the Christian state must be founded upon secular principles and often condone injustice. It is not a state because its religious character excluded its natural members. Religious privilege irreconcilably opposes the secular basis of a political state.

Bauer sought to solve this dilemma by separating church and state. Marx goes much farther. Marx defines citizenship, i.e. participation in political unity as incompatible with private religion. To suppress public or official religion, does not suppress religion as a source of evil and dissension in the state. True human emancipation can be achieved only by the abolishment of both public and private religion.

We are not yet prepared to discuss the basic philosophy of communism. We are still developing the background, trying to show what problems Marx had in mind. Once we properly create the context the integrated system of dialectical materialism will have real meaning for us.

Today we will concentrate upon some of Marx's early and most philosophical writings. These documents are, for the most part, unavailable in English translation, but they contain the key to understanding what is to follow.

In 1844 Marx wrote: "A Critique of Hegel's Philosophy of the State" and "An Introduction to the Critique of the Hegelian Philosophy of Legal Right." Some of Marx's most valuable philosophical expressions are in the unpublished economic and political manuscripts which Marx compiled in 1844. In 1845, "The Holy Family, a Criticism of Critical Criticism"; and in 1846 "The German Ideology" were published. During the course of this lecture we will briefly outline each of these works.

Most of these writings were produced during Marx's enforced stay in Paris. Marx was no longer in his native Rhineland because the heavy hand of the Holy Alliance (Russia, Austria, Prussia) had fallen upon his insignificant person. Marx justly criticized the reactionary despotism characteristic of Czarist Russia and even went so far as to specify Russia by way of example. Typically tyrannical, the czar would brook no criticism. Through diplomatic channels, in January of 1843, Nicholas I forced Marx from the Rhineland into Parisian exile.

The iron fist of Prussian censorship constrained no one in Paris. Consequently, Marx could now spell out his inmost thoughts. His reflections focused upon the autocratic, reactionary Prussian state. Such a political state was an anachronism, and, therefore, unreal. The revolution in France had more than proved the futility of autocratic and irresponsible monarchy.

Although Hegel had extolled the monarch as the supreme individual, the Prussia in which Hegel lived was more liberal than the Prussia under which Marx suffered. Marx regarded all German political philosophy, especially all so-called Hegelian philosophy (i.e. any attempt to justify or glorify Prussia) as unreal and idealistic. This doesn't mean that Marx repudiated Hegel's comprehensive system. Despite Marx's bitter criticism of the right wing Hegelians, Marx lived and died an Hegelian.

In the economic and political manuscripts which date from 1844, Marx states that Hegel begins with speculative thought, with abstractions. Hegel terminates with "spirit knowing itself," a final resting place just as unreal and abstract as Hegel's starting point. The whole Hegelian system deviates and ab-

stracts completely from the pregnant world of real men. By believing in these abstractions real man tragically frustrates and alienates himself. Hegel has lost contact with the real because he has lost real men.

Hegel's "Logic" becomes spiritual money, which means that this "Logic" contains only abstract or speculative value. Here lies a real abstraction in which all real values vanish and are lost. Religion, the state, art, philosophy—all the things Hegel cherished so greatly—are abstract alienations. The philosopher criticizing these abstractions is himself alienated. Consequently, this alienation, this frustration, and the attempt to suppress it produces more abstract thoughts in the concrete, singular, individual, frustrated, alienated real man ground down and crushed under by the merciless power of the unjust Prussian state.

Therefore, all enrichment in Hegel enriches not men but abstractions. Marx calls it "mystification."

Marx was obsessed with Hegelianism and the social problems of the 19th century. Real men are truly suffering in an inhuman environment. Marx wants to know why. He can see that Hegel offers no solution for man's suffering. Hegel's thought has not relieved man's suffering, nor enriched mankind; rather it enriches the very abstractions which cause the suffering of real men. Hegel does not penetrate to the criticism of real conditions in which men live, so that real man is lost and alienated in Hegel's state, in Hegel's history, and in Hegel's philosophy. In Hegel's system, men are lost in their own creations. Men are condemned eternally to suffer at the hands of the things which they themselves have created: the state, religion, art, and philosophy.

In the "Critique of Hegel's Philosophy of the State and Introduction to the Critique of Hegel's Philosophy of Legal Right," Marx expressed himself thus: Hegel has stated that the state conciliates citizen and private person. In the real world it does not.

The state remains quite external to human society and is an artificial force. Hegel has placed private right and private good in subordination to the state. The state, therefore, is an external or extrinistic necessity in relation to the family and civil society. In other words, the state is necessary to preserve the family and to hold together the general group of people whom we designate as civil society. Yet, says Hegel, the state is the immanent end, the intrinsic purpose of the family and civil society. This means that the family and the group of united people whom we designate as civil society, exist to serve the state.

How can the state be both immanent end and external? How can it be intrinsic and extrinsic at the same time? Hegel's state is abstract, it is ideal, it is something immanent in the sense that all thought is immanent—it remains within the person thinking. Hegel superimposes his immanent creation upon the family, and civil society—i.e. upon the real groups in daily life. Therefore, real men, the family, the group of concrete, singular individuals whom we call civil society are unreal for Hegel. This ideal abstract world alone has reality for Hegel. In a word, real man, the real family, the real civil society are predestined or determined by an abstract notion of the state.

This abstract predetermination constitutes a fundamental alienation, because man is not created by the state, but man creates the state. Thus, the oft repeated phrase: "The struggle between monarchy and democracy" is no struggle between realities, but a struggle of abstractions. Giving sovereignty to any persons, whether it be one or many, violates the rights of real men who create the state. The anarchistic implication which Marx will draw in later life, is that all forms of political power are abstract alienations like religion. True democracy for Marx means no political state but socially integrated real men.

Next we consider Marx's satire against the three Bauer brothers: "The Holy Family, a Critique of Critical Criticism." The Bauer brothers criticized Hegel in an abstract and unreal fashion, and as, a consequence, end up with more dogmas. Bruno Bauer had seemingly attacked other intellectuals for debasing themselves by considering social problems and things requiring practical solutions. Bauer would have everyone devote his time to pure speculation. This limits the criticism of Hegel to the realms of speculative thought.

Marx clearly realizes that Hegel cannot be defeated in the field on abstract speculation. Hegel remains master in his own house. Consequently, these critics have substituted vague abstractions such as "consciousness of self" in place of real men. Their idle speculations have become a religion, so that the Bauer brothers who pretend to be wolves remain sheep in disguise. They think they are going to bring Hegel crashing to the ground. Hegel and the Prussian state which supports Hegel are immune from such puny assaults.

The portion of "The German Ideology" which we want to emphasize at this time is that part which is directed against Max Sterner. Sterner's real name was Johann Caspar Schmidt. Marx refers to him as St. Max.

As a young man Max Sterner lived for ideals, absorbed by the love of God, country, and emperor. He tried to distinguish himself in every field of endeavor—with the age-old results. In later life a cruel cynicism crept into Sterner and the mature man lived as an independent egotist.

Sterner would destroy the Prussian state by annihilating the ideals upon which the Prussian state rests. Marx is more practical. To destroy ideals does not destroy realities. To rationalize the idea of the emperor's power—to show that this power is an alienation of real men—does not destroy the real power of the emperor. Marx again and again insists upon the practical everyday, real order. The world must be understood in its contradictions and revolutionized in its practice.

True change, i.e., change with lasting consequences and benefit can take place only in the real world.

PUBLIC DEBT AND TAX RATE EXTENSION ACT OF 1960

The Senate resumed the consideration of the bill (H.R. 12381) to increase for a 1-year period the public debt limit set forth in section 21 of the Second Liberty Bond Act and to extend for 1 year the existing corporate normal tax rate and certain excise tax rates.

Mr. BYRD of Virginia. Mr. President, enactment of Senate Finance Committee amendments to the pending debt and tax bill—H.R. 12381—would reduce Federal revenue $752 million a year. I oppose the committee amendments because they are obviously unwise.

They are unwise in view of the dangerously volatile world situation which confronts us. They are unwise because the predicted $4.2 billion surplus for fiscal year 1961, beginning next month, is fading into a probable deficit.

Deficit financing not only stimulates inflation at home; it has its effects in arousing fear throughout the free world, for which we are the banker, on confidence in the dollar, on our balance of payments position, and on the drain from our stock of gold.

Committee amendments to this bill would eliminate the emergency excise taxes which have been imposed on local telephone, domestic telegraph, and passenger transportation service since the Korean war.

It is doubtful that elimination of these Federal taxes would ever result in much relief to taxpayers. New York State has already indicated it will reimpose the telephone tax at the State level. These amendments would be a signal for further State action along this line.

There is no more reason to eliminate the Federal emergency taxes set forth in the committee amendment, than there is to eliminate the others on such items as automobiles, automobile parts and accessories, and so forth. To eliminate all of these emergency excise taxes would reduce Federal revenue by $1.6 billion a year.

These taxes were imposed to meet war emergency expenditures. If we have been closer to a war emergency situation since Korea than we are now, I do not know when it was. I can find no justification for elimination of emergency taxes under present conditions.

The summit collapsed while this bill was under consideration. There was near insurrection in Tokyo as the Finance Committee reported it. Communist Chinese opened fire again on Quemoy as the bill was set for floor consideration in the Senate.

These developments and others led the Senate on Thursday to increase military appropriations by more than $1 billion, but today, by elimination of emergency excise taxes, we are asked to reduce revenue needed to pay the bills.

Even before the more recent international developments, Budget Director Maurice Stans said built-in budget expenditure increases could be expected to run Federal spending to $90 billion or more in the next few years.

The President in his January budget message estimated a $4.2 billion surplus in fiscal year 1961. I remind the Senate that this was an estimate made 18 months in advance.

With this reminder, I caution the Senate that cutting taxes on the basis of an estimate made so far ahead may result in increasing an actual deficit. There is reason to expect this is what the committee amendments would do.

A deficit in the new fiscal year, beginning a week from Friday, is a realistic possibility. An official box score on current legislation and budget proposals, in their status through Wednesday, June 15, shows clearly that what is—and what is not—being done in Congress may easily wipe out the estimated $4.2 billion surplus for the coming year.

This boxscore, as kept by the Bureau of the Budget itself, is in three parts: First, failure to adopt budget proposals, such as postal rate increases; second, unbudgeted proposals to reduce revenues, such as repeal of the tax on telegrams; and third, unbudgeted proposals to increase expenditures, such as the pay raise bill.

Excluding trust fund items, the Budget Bureau's boxscore shows that failure to adopt budget proposals, and unbudgeted proposals to reduce revenues, would reduce the estimated $4.2 billion surplus for fiscal year 1961 by upward of $1.6 billion.

The boxscore shows further that the 5-year effect of threats in these two categories could be estimated at $11.8 billion.

Excluding trust fund items, the box score shows that unbudgeted proposals to increase expenditures would reduce the $4.2 billion surplus estimated for fiscal year 1961 by $2.9 billion.

The box score shows further that the 5-year effect of threats in this category could be estimated at $14.2 billion.

These unbudgeted proposals to increase expenditures include such increases over budget estimates for fiscal year 1961 as: $703 million in so-called emergency home ownership bill expenditures; $746 million for Federal employees pay raises; $325 million in the school construction bill; $145 million in veterans direct loans; $296 million in the Health, Education, and Welfare appropriation bill; $300 million under the Defense appropriations bill, and so forth.

These reductions in the $4.2 billion surplus estimated for the coming fiscal year 1961 would total $4.5 billion.

This is to say that what is being done, or not being done, in Congress with respect to current legislation would create a deficit in the coming year of $0.3 billion.

But this is not all there is to be considered. The President's budget estimate of revenue was based on individual income at $402 billion, corporate profits at $51 billion, and gross national product at $510 billion. None of these estimates has been reached in the first 5 months of the year.

Currently, individual income is running $3 billion short, at $399 billion; corporate profits are running around $3 billion short, at about $48 billion; and the gross national product is running approximately $8 billion short, in the magnitude of about $502 billion.

The Federal Government taxes corporate profits at 52 percent. A $3 billion overestimate in these profits could mean a $1.5 billion over-estimate in Federal revenue. Overestimates in the other areas are likewise important.

Summarizing: What have we to consider?

First, we have omissions and commissions in legislation, in its status as of June 15, posing the threat of wiping out an estimated surplus and creating a deficit of $300 million.

Second we have possible overestimates of income posing the threat of $1 to $2 billion overestimate of tax collections.

Third, we have a troublesome, and perhaps expensive, international situation confronting us, and we are increasing domestic-civilian expenditures every year. Yet now it is proposed to reduce taxes.

Under such prospects and circumstances, proposals to reduce emergency excise tax rates simply do not meet the test of prudence or fiscal responsibility.

I am a farmer and a businessman. I have been a member of the Committee on Finance for more than a quarter of a century. I have been its chairman for a long time. No one wants taxes reduced more than I do. But look at our terrible debt; look at our $80 billion spending level; look at the dangerous situation that confronts us. How can anyone conscientiously vote for tax reduction?

Fortunately, at the moment, our economic outlook is relatively good. It was better 2 years ago. But then it changed suddenly, and in a few short months we went on a spending spree which changed estimated surpluses into dangerous deficits running as high as $12.5 billion.

Where is the guarantee against repetition? If there is recurrence, there is a new factor to be considered, one which has not bothered us since before World War II. This is our balance of payments position and our gold supply. The days of the so-called dollar gap, in our favor, have gone.

There is nothing so inflationary as continued deficit spending, and our dollar is now worth about 47 cents on the 1939 index. Nothing is so damaging to a nation's balance of payments position as inflation.

No longer can we ignore the balance-of-payments consequences in the conduct of our fiscal affairs. If we shake confidence in our prudence at home, our gold stock will pay for it. It is now down to $19.5 billion.

In return for unnecessary deficits we will receive growing debt, rising interest costs, more inflation, erosion of the dollar, loss of confidence by our allies, unfavorable balance of payments position, reduction in gold stock, indefinite postponement of constructive tax reduction, prospect for higher taxes, and growing suspicion that the Federal Government has no interest in paying off the present debt.

Mr. President, I make these statements reluctantly today, because the committee of which I have the honor to be the chairman reported them by a substantial vote. I know that the Senators who favor them are conscientious in their belief. I do not believe there is any committee of this body whose members are of a higher caliber or who have more outstanding ability and greater patriotism than the members of the Committee on Finance.

Nevertheless, I regard the pending proposal as untimely and improvident. I believe it is dangerous to reduce emergency excise taxes, considering the volatile world conditions and in view of the attitude of Congress toward excessive nonessential expenditures.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. BYRD of Virginia. I yield.

Mr. CLARK. I congratulate the distinguished Senator from Virginia for the excellent address he has just completed. I regret very much that so few Senators were on the floor to listen to him. However, I am certain that many Senators will be on the floor before the vote is taken on the committee amendments, and I hope the Senator from Virginia will take at least a few minutes at that time to summarize what he has just said.

Speaking for myself, I believe this will be a gravely critical vote, not only from the standpoint of the solvency of our country, but of the future of the Democratic Party. We cannot go into the coming campaign as a party of fiscal irresponsibility. It is my strong belief that not only should we defeat the committee amendments, but that we should raise substantial sums of additional revenue, through the closing of a number of loopholes which have been called to the attention of the Senate by amendments offered by a number of Senators over the weekend. I wish to assure my friend, the Senator from Virginia, of my warm support of his efforts, and of my hope that they will be successful.

Mr. BYRD of Virginia. I thank the Senator from Pennsylvania.

Mr. COOPER. Mr. President, will the Senator from Virginia yield?

Mr. BYRD of Virginia. I yield.

Mr. COOPER. I, too, wish to support the position taken by the distinguished senior Senator from Virginia [Mr. BYRD], the chairman of the Finance Committee.

In doing so, I find it necessary to reverse a position I have taken previously, earlier this year, in letters to constituents. I then believed, and so stated, that it would be equitable to repeal the excise tax on the general telephone service and transportation of persons. I hope that these taxes can be repealed in the future, if the fiscal situation permits.

But, I note, in examining the committee report, that the proposed repeal of the excise tax on the transportation of persons, the excise tax on general telephone service, and the excise tax on general telegraph service would result in a revenue loss of approximately $752 million. And, we know that before the Congress adjourns, large expenditures will be appropriated by the Congress, additional to those proposed by the budget.

Only last week we voted the pay increase for Government employees, including the postal service, which will add several hundred million to annual expenditures, if it becomes law. Perhaps additional expenditures for education and for medical care will be voted before we adjourn.

We voted last week an additional billion dollars for defense—an increase which I believe was absolutely essential for national defense. In view of the exposé of Soviet and Chinese Communist intentions, an almost daily event since May 1, military-defense appropriations are certainly the most critical and important expenditures we have authorized. For if we do not maintain our security and freedom, all else that we do will amount to nothing.

So I wish to say to the distinguished senior Senator from Virginia, in whom every Member of this body has the greatest confidence, that I shall support him in his position to maintain these revenues, essential to the defense and fiscal stability of our country.

Mr. BYRD of Virginia. I thank the Senator from Kentucky.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator from Virginia yield?

Mr. BYRD of Virginia. I yield.

Mr. WILLIAMS of Delaware. I wish to join the Senator from Virginia in urging that the amendments reported by the committee, of which both he and I are members, be rejected.

To reduce the revenue by $750 million at this time would in my opinion be the height of fiscal irresponsibility. We have been hoping to end this fiscal year with a margin of surplus—in the amount of approximately $250 million. Obviously, the only way to provide for an increase in expenditures and cut taxes at the same time would be for us to increase the national debt limit; that is, to borrow the money with which to make the expenditures, but any procedure of that sort would be highly inflationary. I have opposed many of these increased expenditures, but they were adopted. Now we cannot cut the tax rates.

As the Senator from Virginia has pointed out, we are already in a very delicate position in regard to our holdings of gold and our foreign trade deficit. To reduce taxes before we reduce the appropriation bills accordingly would, I believe, touch off a further flow of gold from this country.

So I shall strongly support the Senator from Virginia here on the floor, as I did in the committee, in opposing the proposed revenue reductions at this time.

Mr. BYRD of Virginia. I thank the Senator from Delaware.

Mr. ERVIN. Mr. President, will the Senator from Virginia yield to me?

Mr. BYRD of Virginia. I yield.

Mr. ERVIN. I should like to pay tribute to the Senator from Virginia for the fight he is making on this occasion, and also for the fight he has made for fiscal responsibility on the part of the Government ever since he came to the Senate.

His fight has not been an easy one to make. Of course, it would be much more pleasant to act as if one were perfectly willing to dispense Government funds for all the purposes for which such expenditures were sought. But if the majority of the Members of both the Senate and the House had shown the same courage and the same intelligence the Senator from Virginia has shown on all occasions during his service in the Senate, our Nation would today be practically free from any national debt, our dollar would be stabilized, and we would have the prospect of leaving this Nation to our children and to our children's children free from the greatest national debt in history which now is in prospect as an inheritance which they will receive.

So I wish to congratulate the Senator from Virginia for his steadfast adherence to these sound principles, in the interest of the Nation.

Mr. BYRD of Virginia. I thank the Senator from North Carolina for his kind words.

The PRESIDING OFFICER. The question is on agreeing to the first committee amendment.

Mr. LONG of Louisiana. Mr. President, personally I do not care to discuss the committee amendments; but I think perhaps those who offered the amendments in the committee may wish to discuss them. Perhaps the Senator from Oklahoma or the Senator from Florida may wish to discuss them.

Mr. SMATHERS. Mr. President, will the Senator from Louisiana yield to me?

Mr. LONG of Louisiana. I yield.

Mr. SMATHERS. I suggest that before we proceed to vote on the question of agreeing to the committee amendments, there be a quorum call, so that the able Senator from Oklahoma, who was the protagonist of one of the committee amendments, may be advised and may have an opportunity to be present, to make a statement. I am sure he would wish to make a statement.

So, Mr. President, I would suggest the absence of a quorum.

Mr. LONG of Louisiana. I join in suggesting the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum has been suggested; and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. WILLIAMS of Delaware. Mr. President, I ask unanimous consent that further proceedings under the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KERR. Mr. President, I ask for the yeas and nays on the first amendment in connection with lines 10 and 11 on page 3.

The yeas and nays were ordered.

Mr. WILLIAMS of Delaware. Mr. President, that request will cover the vote on lines 10 and 11, page 3, only. Is that correct? That is the first committee amendment.

The PRESIDING OFFICER. That is correct.

Mr. KERR. Mr. President, if I understand, when we vote on the striking out of lines 10 and 11 on page 3, we are also voting on the approval of the language on pages 5, 6, and 7, being section 203 of the bill.

The PRESIDING OFFICER. That is not the case. The amendments on page 3 are separate amendments, and contain House language.

Mr. KERR. Mr. President, I should like to call to the attention of the committee members and the Senate that, in view of the fact that section 203 affects the elimination of the tax on domestic telegraph service and the retention of tax on long-distance leased wire service, and in view of the fact that it is really part of the pending amendment, I can see no justification for having one vote on the amendment striking out lines 10 and 11 on page 3, and then another vote on whether section 203 shall be adopted.

The PRESIDING OFFICER. The Senator may accomplish his purpose by asking unanimous consent.

Mr. KERR. I was getting ready to do that, but I still think the situation is inherently as I have stated. In view of the fact that the Chair rules otherwise, I ask unanimous consent that the vote on striking lines 10 and 11 on page 3 be considered to apply as a vote of approval of section 203.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD of Virginia. That includes the telephone service, telegraph service, and leased wires?

Mr. KERR. That is correct. Approval of the committee amendment on that part of the bill is involved.

Mr. BYRD of Virginia. It would not include the transportation?

Mr. KERR. It would not include action of the committee in the handling of the tax on transportation of persons.

Mr. BYRD of Virginia. I have no objection to that request.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Oklahoma?

Mr. SMATHERS. Mr. President, reserving the right to object—and I shall not object—I should like to make a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. SMATHERS. Did the order entered a moment ago on the yeas and nays apply only to the amendment with respect to the communications, or did it also apply to a yea-and-nay vote with respect to the repeal of the tax on transportation of persons? I assume it did not.

Mr. KERR. It did not include that part.

The PRESIDING OFFICER. The request for the yeas and nays, which was supported by a sufficient second, related only to the tax on general telephone service.

Mr. JOHNSON of Texas. Mr. President, may we have order in the Chamber? We cannot hear the Presiding Officer.

The PRESIDING OFFICER. The Senate will be in order.

The request for the yeas and nays, which was supported by a sufficient second, related only to lines 10 and 11 on page 3, relating to the termination of the tax on general telephone service.

Mr. JOHNSON of Texas. Mr. President, will the Senator from Oklahoma explain the justification for extending the request previously granted? As I understand, the order for the yeas and nays applied to only one part of the bill, and the Senator would like to have it apply to an additional part of the bill. I see no objection on the surface, but I should like to have a justification for the request.

Mr. KERR. I shall explain the action of the committee, Mr. President, with reference to the excise tax on communications. The House sent us a bill which would extend the excise tax not only upon long-distance toll calls but also upon general telephone service and upon telegraph service. The action of the Senate committee was to strike that provision from the House bill and to insert in the bill in connection therewith a provision which would accomplish several purposes. First, the provision would permit the expiration of the excise tax on telephone service other than leased wires, which is now in the law, to become effective June 30. It would, however,

reimpose the excise tax on leased wire services of telephones; that is, when a user in one community or area has its own leased wire to another area, and does long-distance telephoning over that leased wire, the action of the committee would reimpose the excise tax. It would further terminate the excise tax on telegraph service as of June 30 this year.

In view of the fact that the striking out of lines 10 and 11 on page 3 is a part of that action by the committee which, insofar as the committee was concerned, was a single action, and in view of the fact that the action of the committee is further reflected in section 203 of the bill, my unanimous-consent request was that in voting as to the acceptance or rejection of the amendment on page 3, to strike out lines 10 and 11, we also include the language in section 203 beginning on page 5.

Mr. JOHNSON of Texas. Mr. President, I have no objection to that request, and I think it would be highly desirable to do so.

Mr. WILLIAMS of Delaware. Mr. President, I join the Senator from Oklahoma in making that request. I think it would be a clear-cut vote if we put all of the committee action with reference to telephone and Western Union service under one vote.

Mr. KERR. The committee action with reference to communications.

Mr. WILLIAMS of Delaware. Yes; the committee action with reference to communications should be included in one vote.

Mr. BYRD of Virginia. Mr. President, I have no objection.

Mr. JOHNSON of Texas. Before we agree to the request, let me ask the Senator a question. If we take the provisions of the House bill rather than the bill as amended by the Senate committee, so far as communications are concerned, how much more money would be provided under the House bill, with reference to communications, than would be provided under the provisions of the amendment of the Senate committee to the bill?

Mr. KERR. I shall try to answer the question.

Mr. JOHNSON of Texas. Is it over $400 million?

Mr. KERR. The figure is in the report.

Mr. JOHNSON of Texas. I have a tabulation from the Treasury Department on the matter. I simply wanted to confirm the figure. The Treasury says that the receipts anticipated from general telephone service for a full year are $463 million. I assume that under the request this would be the approximate amount involved.

Mr. WILLIAMS of Delaware. That is the approximate amount.

Mr. KERR. That is the approximate amount. I believe the Senator addressed the question to me.

Mr. WILLIAMS of Delaware. Very well.

Mr. KERR. That is the approximate amount for a full calendar year. I will ask the staff member who is present to direct my attention to the page in the report where there is disclosed the revenue to be affected in fiscal year 1961.

Mr. BYRD of Virginia. I think we ought to deal with the full year.

Mr. KERR. I am going to deal with the full year.

Mr. BYRD of Virginia. It is $462 million.

Mr. KERR. Mr. President, the Senator addressed the question to me.

Mr. TALMADGE. Mr. President, will the Senator yield?

Mr. KERR. I shall be glad to yield to the Senator from Virginia if he wishes to answer the question.

Mr. BYRD of Virginia. I am told by the staff that the amendment, for a calendar year, would reduce revenues for the Treasury $462 million; for the coming fiscal year it would be less.

Mr. TALMADGE. That is covered on page 8 of the report.

Mr. BYRD of Virginia. With the other amendments, if agreed to, the total loss would be about $752 million.

Mr. KERR. Mr. President, the effect for the full year, according to the advice of the Treasury Department, would be a $463 million revenue loss, but for the fiscal year 1961 it would be $350 million.

Mr. JOHNSON of Texas. I thank the Senator.

Mr. McCLELLAN. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield.

Mr. McCLELLAN. Is that the amount of tax revenue which would be lost by reason of striking out the provision on page 3, in lines 10 and 11? Is that the amount of tax revenue to be lost?

Mr. JOHNSON of Texas. As I understand the provisions of the House bill, $463 million more would be raised by virtue of the provisions affecting general telephone service than would be raised under the Senate committee amendment.

Mr. McCLELLAN. In other words, if we agree to the amendment we will lose that much in revenue during the next year, unless we make up for the loss elsewhere?

Mr. JOHNSON of Texas. The Senator is correct.

Mr. KERR. I will say to the Senator in that connection, Mr. President, that the existing law provides for the termination of the excise tax on general telephone service effective June 30. The House action would impose the tax beyond June 30, and the amount of revenue which is being discussed would, in effect, be newly provided revenue rather than revenue under existing law without affirmative action by the Congress.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Oklahoma? The Chair hears none, and the request is agreed to.

Mr. JOHNSON of Texas. Mr. President, is the Senator from Pennsylvania [Mr. CLARK] in the Chamber?

Mr. President, I ask the secretary for the majority to see if he can locate the Senator from Pennsylvania, because I desire to propose a request.

Mr. President, I hope we can get a unanimous-consent agreement to vote on the committee amendment. The Senator from Pennsylvania is now in the Chamber, and I hope he will follow my suggestion. I hope we can get a unanimous-consent agreement to limit debate on the adoption of the Senate committee amendment, which, in effect, would reduce the revenues to be produced by the House bill by $463 million, by virtue of the difference in the provisions with respect to general telephone service. If we could get an agreement for, say, 15 minutes on a side, have a quorum call, notify all Members, then the leadership on both sides of the aisle, the chairman of the committee, the ranking minority member, and others, including the advocates of the amendment, would have an opportunity to have an audience. Then we could have a yea-and-nay vote, which has already been ordered, and have a test of the sentiment of the Senate.

I talked with the chairman of the Finance Committee and the ranking minority member before the bill was taken up. They have very grave doubts about the wisdom in this critical hour of amending the House bill so as to permit a $463 million loss to the Treasury. The Secretary of the Treasury tells me that the administration opposes the reduction as strongly as it can. He hopes the Senate will not take such action, and expresses the hope also that the Senate will pass the House bill as soon as it can do so.

If the bill must go to conference, there will be a problem of time. While we can make corporation taxes retroactive, we cannot make retroactive a tax on something that somebody might buy on July 1 if the tax did not apply at that time.

There is involved $1,500 million in excise taxes, and I am willing to debate the merits of any amendment and debate them at such length as Members may desire. But I do think it is important that we face up to this question as early as we can, because if we do so, we shall take some of the pressure off that might otherwise exist in conference and give Senators in the conference time to debate.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield.

Mr. CLARK. I have no objection to a unanimous-consent agreement on the committee amendments. I must say that I would feel a little more happy and content if we had a half hour on a side, with the thought that we would try to get through quicker and yield back our time. I would like to have 5 minutes myself.

Mr. JOHNSON of Texas. Let us make it 20 minutes. I will yield to the Senator from Pennsylvania from the time of the majority 5 minutes. Each side will have 20 minutes, and there will be 5 minutes for Senators who oppose the committee amendments.

Mr. DIRKSEN. May we agree that there will be a live quorum call before a vote is taken?

Mr. JOHNSON of Texas. Yes.

Mr. SMATHERS. Mr. President, reserving the right to object—and I shall not object—I wonder, in order to facilitate matters, if we may not have the same unanimous-consent agreement apply to the consideration of the committee amendment on the repeal of the transportation tax.

Mr. JOHNSON of Texas. I would like very much to have such an agreement. I believe by doing so we will have a better audience. We will get more done. When Senators hear the condition of the Treasury, how we have increased appropriations, the position of the House on this question, and the position of the Secretary of the Treasury, with whom I have been in conversation over the weekend, and again today, I believe they will be able to resolve the issue according to their own judgment.

I make the request, in accordance with the suggestion of the Senator from Florida [Mr. SMATHERS], that there be incorporated in the unanimous-consent agreement both the general telephone amendment and the transportation amendment of the committee.

Mr. CLARK. I understand that there will be rollcall votes on the two committee amendments, and that 20 minutes will be granted to each side on both amendments; in other words, two 20-minute debates?

Mr. JOHNSON of Texas. Yes.

Mr. CLARK. I have no objection.

Mr. FREAR. I ask the majority leader whether there are not three changes proposed, including the proposed change in telegraph taxes, and does that not require a rollcall vote, also?

Mr. JOHNSON of Texas. The Senator from Oklahoma has incorporated the amendment to which the Senator from Delaware refers in the first rollcall vote.

Mr. FREAR. With the general telephone amendment?

Mr. JOHNSON of Texas. Yes.

Mr. McCARTHY. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield.

Mr. McCARTHY. Would such an agreement as is proposed preclude the possibility of offering amendments to the communication tax amendment and the transportation tax amendment in the event that some Senator wishes to propose to reduce the transportation tax by 50 percent instead of by the entire amount? Would such an amendment be precluded by the proposed amendment?

Mr. JOHNSON of Texas. I should think so. Our hope is that we may vote on the committee amendment as reported by the committee and have a clear-cut issue, with 20 minutes to each side being allowed for debate. If such action fails, then the bill will be open to further amendment.

Mr. McCARTHY. If the committee amendments were agreed to, a subsequent amendment which would reduce the transportation tax by one-half instead of by the whole amount would not be in order?

The PRESIDING OFFICER. The Chair will state that the committee amendment could not be reconsidered without agreement, but separate amendments could be offered.

Mr. McCARTHY. Which would change the effect of the committee amendment.

The PRESIDING OFFICER. The Senator is correct.

Mr. JOHNSON of Texas. Mr. President may we have action on the request?

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas?

Mr. KERR. Mr. President, a parliamentary inquiry. Does the unanimous-consent request with reference to the time limit on the amendment affecting the excise tax on transportation include a request for a yea-and-nay vote on the amendment?

Mr. JOHNSON of Texas. No, but I intend to make such a request.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas? The Chair hears none, and the request is agreed to.

Mr. JOHNSON of Texas. Mr. Chairman, while the request is a little premature, in order that Members may know the intention, I ask for the yeas and nays on the transportation tax amendment.

The yeas and nays were ordered.

Mr. JOHNSON of Texas. Mr. President, I suggest the absence of a quorum, and I ask the attaches to notify all Senators that there will be two rollcalls within 80 minutes.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

[No. 236]

Aiken	Ervin	Monroney
Allott	Frear	Morse
Anderson	Fulbright	Morton
Bartlett	Gore	Moss
Bennett	Gruening	Mundt
Bible	Hart	Murray
Brunsdale	Hartke	Muskie
Bush	Hayden	Pastore
Butler	Holland	Prouty
Byrd, Va.	Hruska	Proxmire
Byrd, W. Va.	Jackson	Randolph
Cannon	Javits	Robertson
Carlson	Johnson, Tex.	Russell
Carroll	Johnston, S.C.	Saltonstall
Case, N.J.	Jordan	Schoeppel
Case, S. Dak.	Keating	Scott
Chavez	Kerr	Smathers
Church	Kuchel	Smith
Clark	Lausche	Stennis
Cooper	Long, Hawaii	Symington
Curtis	Long, La.	Talmadge
Dirksen	Lusk	Thurmond
Dodd	McCarthy	Wiley
Douglas	McClellan	Williams, Del.
Dworshak	McGee	Yarborough
Ellender	Mansfield	Young, N. Dak.
Engle	Martin	Young, Ohio

Mr. MANSFIELD. I announce that the Senator from Idaho [Mr. CHURCH], the Senator from Mississippi [Mr. EASTLAND], the Senator from Rhode Island [Mr. GREEN], the Senator from Washington [Mr. MAGNUSON], the Senator from Alabama [Mr. SPARKMAN], the Senator from Michigan [Mr. MCNAMARA], and the Senator from New Jersey [Mr. WILLIAMS] are absent on official business.

I also announce that the Senator from Missouri [Mr. HENNINGS] is absent because of illness.

I further announce that the Senator from Tennessee [Mr. KEFAUVER] and the Senator from Minnesota [Mr. HUMPHREY] are necessarily absent.

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] and the Senator from Arizona [Mr. GOLDWATER] are necessarily absent.

The Senator from Indiana [Mr. CAPEHART] is absent by leave of the Senate.

The Senator from Maryland [Mr. BEALL] and the Senator from New Hampshire [Mr. COTTON] are detained on official business.

The PRESIDING OFFICER (Mr. MUSKIE in the chair). A quorum is present.

Mr. JOHNSON of Texas. Mr. President, as I understand, the time is limited to 20 minutes on each side, the time to be controlled equally by the majority leader and the minority leader.

The PRESIDING OFFICER. The Senator from Texas is correct.

Mr. JOHNSON of Texas. I yield myself 1 minute.

If we adopt the committee amendment which was written into the bill in the Committee on Finance, $463 million will be taken out of the Federal Treasury. At a time when we are increasing defense expenditures and health expenditures, instead of decreasing revenues we ought to be thinking of where we can increase them in order to provide for these desirable increases in expenditures.

Therefore, I hope Senators will act with responsibility and will realize that a vote for the committee amendment will be a vote to deprive the Treasury of $463 million.

The United States has the finest telephone service in the world. Nevertheless, the largest American taxpayer last year was the American Telephone & Telegraph Co., which paid $1 billion. A company which can pay $1 billion is not in too bad a fiscal condition.

Mr. GRUENING. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield.

Mr. GRUENING. The Senator from Texas just said we should vote for the amendment. In the early part of his speech, he asked us to vote against it. I think he misspoke, or did I misunderstand him?

Mr. JOHNSON of Texas. I said that a vote for the committee amendment is a vote to take out of the Treasury $463 million.

I shall oppose the committee amendment. I hope all Senators who believe in fiscal responsibility will oppose the committee amendment. Senators who do not oppose the amendment should realize that they will deprive the Treasury of $463 million of revenue at a time when that revenue is most needed.

Mr. GRUENING. I thank the majority leader. I am in accord with his view on this amendment.

Mr. LAUSCHE. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield.

Mr. LAUSCHE. I subscribe to the words just spoken by the distinguished majority leader. It is folly to believe that we can increase spending and reduce taxing, when in 25 out of the last 29 years the Government has operated at a deficit.

I should like to vote to reduce the communications and transportation tax. It would be the happiest thing, possibly, that I could do. However, I do not want to tell the people back home in Ohio that it is sound to increase spending in the Department of Defense, on the basis of necessity, and at the same time tell them that I shall vote to reduce their taxes.

Both cannot be done. We may as well recognize that fact.

Mr. JOHNSON of Texas. Mr. President, I yield myself an additional minute.

The amendment is very controversial. I do not believe the House will accept it. We are working against a June 30 deadline. I believe we ought not to adopt the amendment, because the House, I feel certain, will not accept it.

If we should run over the deadline date by 1 day, as a result of a conference or a delay in signature, or anything else, $1,500 million in excise taxes will expire.

Mr. LAUSCHE. I commend the Senator from Texas for his courage and forthrightness. This is not a time to play lightly and in a method of folly with the security of the country.

Mr. McCLELLAN. Mr. President, will the Senator from Texas yield?

Mr. JOHNSON of Texas. I yield.

Mr. McCLELLAN. I thank the Senator. Do I understand that the total amount involved in the committee amendment—the amount of revenues the Government will lose—is $752 million if this amendment is adopted?

Mr. JOHNSON of Texas. In this particular amendment, the amount involved is $463 million.

Mr. McCLELLAN. With the removal of other taxes proposed by the committee amendments, the total will be, as I understand, $752 million. Is that correct? That amount, together with the $800 million by which Federal expenditures will be increased due to the enactment of the salary increase bill, will make a total of $1,500 million.

Mr. JOHNSON of Texas. That is correct.

Mr. McCLELLAN. So $1,500 million will be the potential deficit in the next fiscal year. In other words, by raising salaries of Federal employees by $800 million annually and by eliminating taxes to the tune of $750 million loss in revenues, we will have a further gap of $1,500 million between Federal income and Federal expenditures. Mr. President, I cannot agree to that. I would like to reduce taxes—to eliminate this particular tax. Our fiscal situation will not permit it. It would be imprudent to do it. It would be, in my judgment, a legislative action of fiscal irresponsibility.

Mr. PASTORE. Mr. President, will the Senator from Texas yield?

Mr. JOHNSON of Texas. I yield.

Mr. PASTORE. I compliment and congratulate the distinguished majority leader. I have been inclined to be against the continuation of the taxes which were imposed in a time of war, and which were considered to be luxury taxes. However, since the last time I voted on these measures—I voted to remove them last year—a change has taken place in world conditions. We have seen the President humiliated at the summit conference. We are witnessing hostile demonstrations in the Far East, especially in Japan. We have voted an additional $1 billion for the Defense budget. We have been asked by the President to increase appropriations for mutual security.

Under the circumstances, I feel impelled at this time to vote for the continuation of these taxes. I think they will enhance the security of America and help to keep peace in the world.

Mr. JOHNSON of Texas. I thank the Senator from Rhode Island. I yield to the Senator from Mississippi.

Mr. STENNIS. Mr. President, I have just come to the Chamber and am not certain about all that has been said. However, I know that the pending matter involves the repeal of taxes which none of us like.

I have said before that whenever I thought the budget and fiscal affairs could stand it, I would vote to repeal these taxes. I have not done so yet, because I do not think the Government can stand it. We are increasing the amount of appropriations for the military and are increasing the salaries of Government employees. It is unthinkable to me that we should fail to meet this problem head on and keep taxes where they are now, or, at least, renew them.

I shall certainly vote against any amendments which seek to take away from the Treasury all the money which is necessary for the operation of the Government. I know that at the beginning of the year we were told we would have a balanced budget and a surplus. But I have not seen any real drive made to enact the additional taxes which are necessary to balance the budget and have a surplus, even if we have increased expenditures.

To that extent, I believe it is highly misleading to the American people to have reports issued prematurely. We have not had a sustained drive to increase taxes. Instead, it has been proposed that by this amendment taxes be reduced.

I shall oppose the amendment.

Mr. JOHNSON of Texas. I agree with the distinguished Senator from Mississippi. This is a critical hour for our Nation. The Chinese Communists have been shelling the islands off Formosa. The President of the United States has had to forego his proposed visit to Japan because of the demonstrations which have been made against the Japanese Government.

All of us know the results of the summit conference. We realize that communism has launched an offensive which is disturbing people all over the world.

We must have a defensive shield to protect our Nation. If we are to have a defensive shield, we must spend money. If we are to spend money, we must raise money. I do not think this is a time to repeal taxes to the tune of $750 million.

Mr. BYRD of Virginia. Mr. President——

Mr. JOHNSON of Texas. Mr. President, I shall yield now to the chairman of the Finance Committee; and I yield myself 2 additional minutes.

The PRESIDING OFFICER. The Senator from Texas is recognized for 2 additional minutes.

Mr. JOHNSON of Texas. I now yield to the Senator from Virginia.

Mr. KERR. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Oklahoma will state it.

Mr. KERR. Does the majority leader have control of the time allotted to those who are in favor of the amendment, or does he control the time available to those who oppose the amendment?

Mr. JOHNSON of Texas. The majority leader and the minority leader have control of the time—20 minutes to each side. Twenty minutes will be allotted to Senators who oppose the amendment; 20 minutes will be allotted to Senators who favor the amendment.

If the Senator from Oklahoma desires to control the time available to proponents of the amendment——

Mr. KERR. Not at all; I was simply trying to find out what the arrangement was. Frankly, I was under the impression that the majority leader would control the time available to Senators who favor the amendment, and that the minority leader would control the time available to Senators who are in opposition. If the arrangement is vice versa, that will be quite all right. I was merely seeking information.

Mr. JOHNSON of Texas. We have divided the time between the two leaders, who will allot the time as requested. The proponents will have 20 minutes if they desire to use it.

Mr. President, at this time I yield to the Senator from Virginia [Mr. BYRD], the distinguished chairman of the Finance Committee, who, I believe, in the committee voted against these revenue-reduction amendments.

Mr. BYRD of Virginia. Mr. President, I wish to commend the Senator from Texas for making one of the most courageous speeches I have ever heard on the floor of the Senate.

Mr. PASTORE. Mr. President, I call for order in the Chamber. I am not able to hear the Senator from Virginia.

The PRESIDING OFFICER. The Senate will be in order.

Mr. BYRD of Virginia. Mr. President, I said that I desire to commend the Senator from Texas for making one of the most courageous speeches I have ever heard on the floor of the Senate.

I share the embarrassment of his position in that I was the only Democratic member of the Finance Committee to vote against these proposed revenue reductions. But in view of the day-by-day happenings all over the world, I believe it would be very dangerous on our part to vote to reduce the revenue by $750 million and at the same time vote to increase the expenditures.

The Senator from Texas has taken a most statesmanlike and courageous position; the more I see of him, the more I admire him. He is giving real leadership in the face of the great problems confronting our Republic.

Mr. JOHNSON of Texas. I thank the Senator from Virginia.

Mr. HOLLAND. Mr. President, will the Senator from Texas yield?

Mr. JOHNSON of Texas. I yield.

Mr. HOLLAND. I desire not only to strongly endorse the position taken by the majority leader and by other Senators who have taken the same position, but also to point out that a continuation of the excise tax on telephone and telegraph service will not, after all, jeopardize a continued profit in the business

of the public utilities affected, because each one of them operates under rates set by public utility regulatory bodies which allow rates sufficiently high to enable the companies to meet their tax situations and at the same time operate at a profit, even if their business should be slightly reduced.

All of us would like to see this tax ended. But I thoroughly agree with the position of the Senator from Texas and the Senator from Virginia that this tax should not be ended under present conditions; and if we were to end it at this time, our action would brand us—in contrast with the other body and its action in this situation—as the irresponsible and the radical legislative body, whereas we have always tried to maintain the position of being the conservative body which meets the needs of the public and the Nation as they are shown to exist.

So I thoroughly agree with the Senator from Texas.

Mr. JOHNSON of Texas. I appreciate very much the statement of the Senator from Florida. What he has stated is exactly correct—namely, under the regulations imposed by the various public-utility commissions, the telephone companies are guaranteed reasonable returns on their investments.

I should like to point out that in this instance we are dealing with the company which enjoyed the largest profit made in the Nation, last year. If someone needs relief, certainly it is not a company which has a net income of $2 billion before taxes.

Mr. CLARK. Mr. President, I should like to join in supporting the views of the Senator from Texas. It is not easy for a majority leader to vote for continuing these regressive sales taxes. I disapprove of each and every one of them, and I hope they can shortly be repealed—but not this year, in view of what the Congress has done in the last six months to the President's budget.

Yesterday, when I was at home, I received a telegram from Mr. Bernard Baruch, whom I have never had the pleasure of meeting, much to my regret. I revere him as a great statesman. He was kind enough to compliment me on the stand I have taken in opposing any reduction in revenue in connection with the pending bill, and in supporting the attempt to close some of the tax loopholes, so we can come somewhere near to supporting the budget which was proposed by the President.

I should like to read to the Senate the telegram I received yesterday afternoon.

NEW YORK, N.Y., *June 19, 1960.*

Senator JOSEPH S. CLARK,
Washington, D.C.:

You are right in refusing to support any tax reduction at a time when Congress is voting increasing appropriations with the national debt pressing so heavily against the ceiling and in the face of a deepening world crisis which may require so much more from each of us for our national survival.

BERNARD M. BARUCH.

Mr. President, before we vote, I ask my colleagues to turn to page 13298 of the CONGRESSIONAL RECORD for Saturday, and to note that late Saturday evening I had printed in the RECORD a table showing that the action the Congress has taken and the action I am sure the Congress will fail to take and what the Congress is going to do before it adjourns will reduce the estimated surplus of $4,200 million to a deficit of $193 million if these committee amendments are enacted into law. I consider that to be fiscal irresponsibility of the worst sort; and I, for one—although I voted for those appropriations, and think they are right—am not content to duck my responsibility now by failing to vote to provide sufficient revenues to give us a balanced budget and a surplus with which to make a payment on the national debt.

Mr. JOHNSON of Texas. Mr. President, will the Senator from Pennsylvania yield?

Mr. CLARK. I am happy to yield.

Mr. JOHNSON of Texas. Mr. President, the Senator from Pennsylvania and I may differ on procedure and on other things, but we are in agreement on this point.

Mr. CLARK. I thank my friend, the Senator from Texas, for his generous comments.

Mr. BUSH. Mr. President, will the Senator from Pennsylvania yield?

Mr. CLARK. Mr. President, in view of the fact that the time is very limited, I wish to continue my statement for just a moment, and then I shall yield.

I ask Senators also to examine page 13301 of the CONGRESSIONAL RECORD for Saturday, where they will see a list of the increased revenue which could be obtained if we adopted the loophole-closing amendments which have been submitted, and which will be debated and voted on later today.

Senators will note that those nine amendments would provide additional revenue in the amount of $3,707 million. Thus, as a result of this 1 day's work, if those of us who believe in fiscal responsibility and a balanced budget and in making a payment on the national debt will stick together, no matter how much we may differ on other subjects, we may be able to restore the President's anticipated surplus to somewhere near the amount he estimated in January.

The PRESIDING OFFICER. The time available to the Senator from Pennsylvania has expired.

Mr. CLARK. Mr. President, I ask for 2 more minutes.

Mr. JOHNSON of Texas. Mr. President, I yield 2 additional minutes to the Senator from Pennsylvania.

The PRESIDING OFFICER. The Senator from Pennsylvania is recognized for 2 more minutes.

Mr. CLARK. Mr. President, those revenue estimates were based on a gross national product of $510 billion for the calendar year 1960; but thus far in the calendar year we have not reached $510 billion, and it is now late in June. Steel production is falling off; housing production is falling off; automobile production is falling off; the banks do not seem to have the demand for money which we hoped they would have; and all those situations are bound to have a great effect on the anticipated gross national product for this year of $510 billion.

Therefore, Mr. President, I urge my colleagues to vote against the proposed reductions in revenue, and also to vote to close the tax loopholes.

At this time I am happy to yield to the Senator from Connecticut [Mr. BUSH].

Mr. BUSH. Mr. President, the Senator from Pennsylvania has referred to the table in the CONGRESSIONAL RECORD for Saturday, which makes allowance for the $550 million postal pay increase.

Mr. CLARK. I take the position that that will not be enacted into law. I am sure it will not be.

Mr. BUSH. How about the aviation fuel tax?

Mr. CLARK. I do not think that will be enacted into law, either; I am sure it will not be.

The PRESIDING OFFICER. The time available to the Senator from Connecticut has expired.

Mr. BUSH. Mr. President, will the Senator from Texas yield a few minutes to me?

Mr. JOHNSON of Texas. I should like to do so; but first I desire to yield to the distinguished minority leader.

Mr. BUSH. I should like to have only one more minute, in order to conclude.

Mr. DIRKSEN. Very well; I yield 1 minute to the Senator from Connecticut.

The PRESIDING OFFICER. The Senator from Connecticut is recognized for 1 minute.

Mr. BUSH. Mr. President, in the table the Senator from Pennsylvania placed in the CONGRESSIONAL RECORD last Saturday, under the expected revenues he listed $300 million for withholding dividends and $800 million for withholding interest. Is that correct?

Mr. CLARK. The Senator from Connecticut is now referring to the table dealing with revenue increases to be expected from the amendments.

Mr. BUSH. That is true.

Mr. CLARK. Previously, the Senator from Connecticut referred to the table which shows the estimated surplus and the increases and decreases on the basis of action already taken.

Mr. BUSH. I was endeavoring to point out what we shall have reason to expect.

Mr. CLARK. Let me try to clarify that point: If we pass the pending revenue-repeal bill and if we do not close any tax loopholes, we shall be increasing the deficit, in my judgment, to at least $390 million; and in the judgment of the chairman of the Finance Committee the deficit will be even more.

But if we close the tax loopholes, we shall be able to reconvert the deficit into a surplus.

Mr. JOHNSON of Texas. Mr. President, at this time I yield to the distinguished minority member of the Finance Committee, the Senator from Delaware [Mr. WILLIAMS], who last week made the suggestion that these taxes be continued, and has repeated it on every occasion within my knowledge.

Mr. WILLIAMS of Delaware. I shall take just a couple of minutes to join the Senator from Texas in pleading with the Senate to reject the committee amendment. I think that to adopt this committee amendment and to strike down

the potential receipt in revenues of $463 million for fiscal 1961 in the light of our increased defense needs and the condition of our budget, would be wrong at this time.

I know that one of the arguments used in favor of the committee amendment is that taxes are not being decreased by the adoption of the committee amendment. It has been pointed out that under the existing law the telephone tax is scheduled to expire on July 1, and therefore, they argue that they are not changing existing law.

I might say that is true in connection with all of the $3,900 million which is involved in the bill before us. All of it covers the extension of excise and corporate tax rates which would expire June 30 unless the Senate acted. Therefore, it is a fallacious argument to say revenue is not lost by the adoption of the committee amendment, because the $3,900 million provided are all part of the President's recommendation in his budget. The $463 million in the amendment immediately pending is certainly a part of the President's estimate.

If the committee amendment which would repeal the telephone tax is adopted we would lose the $463 million, and the only way we could finance our operations in light of the existing situation would be by borrowing more money. That is the most inflationary action we could take.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that we be allowed 5 additional minutes.

The PRESIDING OFFICER. Is there objection? The Chair hears none and it is so ordered.

Mr. JOHNSON of Texas. I yield the floor. The Senator from Oklahoma will have 25 minutes and the Senator from Illinois [Mr. DIRKSEN] and I will have 25.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. KERR. Mr. President, I yield myself 5 minutes.

I want to thank the great men of the Senate who have enlightened us thus far on fiscal responsibility. I wish it were possible for me to express my appreciation for the opportunity of associating with men of such distinction and such ability and such generosity in making available their knowledge to us who, in their opinion, do not have the benefit of their great distinction in this regard. It is not only encouraging—it is inspiring.

Of course, I must say a little of the luster is dimmed when I hear speak those who presume to pass upon my fiscal responsibility; it is discounted, and presented either as something which never existed, or which, in the pressure of service here, has been eliminated or destroyed. I say, a little of the luster which has been put upon their knowledge of fiscal responsibility is lost when I hear them talking about this tax in connection with utility rates of telephone companies and profits of the American Telephone & Telegraph Co. I am sure that it is due only to the great stress of debate and their devotion to principle and the maintaining of the posture of fiscal responsibility, whether it is an actuality or a facade, that they once knew, but have forgotten, this tax is not paid by the telephone company. This tax on communications is paid by the users of telephone service. It is paid by the millions of homeowners who have telephones. They pay this excise tax. The telephone company performs the service of collecting the tax from the customer for the collector of internal revenue.

I am sure that these men of esteemed and exalted fiscal responsibility and position do not see their telephone bill. Somebody writes the check, I am sure, and they pay it. The Senator from Oklahoma had to get his the hard way, and he has to look at those bills; and if I had not heard from a single constituent, I would know, from what I see on my telephone bill, that there is an item there of excise tax, in addition to the toll charges and the telephone service charges, and I, as a user of the telephone, pay it.

There has been a bandying here of words about the loss of revenue. Mr. President, this bill, if passed as sent from the House, would result in an increase in revenue. Every item provided for and secured by the bill, whether as brought to the floor out of the Senate Finance Committee, or as brought to the Senate from the House, provides for new revenue in the form of extension of taxes which otherwise will expire on June 30. So this is not a tax on the telephone company, and the telephone company cannot go to a utility regulatory body and secure from it an increase in the rate charged to their customers in an amount to cover taxes which are paid by the customers.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. KERR. Mr. President, I yield myself 5 minutes. I am so humble and so overcome in the presence of these mental giants and pillars of fiscal responsibility that I am a little nervous, and it will take a little longer than ordinarily to get my position over.

The utilities, Mr. President, are regulated and permitted to make a profit on their investment, but are not permitted to secure from their consumers an amount of money to reimburse the utilities for taxes which the customers pay.

I am sorry the able senior Senator from Florida is not here. He is one of the great Members of this body. He was Governor of his State when I was Governor of Oklahoma, and he is thoroughly responsible. But I remind him that somewhere in the course of his devotion to the principle of fiscal responsibility and his dedication to service on that basis he has lost sight of the fact, which I am sure as Governor of his State he learned, and if he would refresh his memory, would still know, that taxes on telephone service are paid by the consumers. It is no part of the rate base in a public utility rate, and is no matter for consideration by a regulatory body in fixing the rate on the use of the telephone or in fixing the amount of money which would permit a utility to recover the amount of taxes which it itself had paid. This tax is not paid by the utility. It is not paid by the telephone company. It is paid by the consumer.

I want to talk about the fiscal responsibility of the U.S. Treasury, and I may say I am greatly impressed by it.

Every time I think of the fact that we are paying $3 billion excess interest each year in the form of increased tax rates, over those in effect when this administration went into power, it increases my respect for its fiscal responsibility. It must be something like that, to justify the inauguration of and the keeping of policies which are penalizing the American taxpayers $3 billion a year in excess taxes, to pay that much more interest on the Federal debt, as compared to what the tax rates in effect when the administration came into power would have required.

Mr. President, when men can perpetrate that kind of a monstrosity and then be given an accolade for fiscal responsibility at one and the same time, that is a feature of the hand being quicker than the eye and Madison Avenue magic new in the annnals of political history and governmental operation.

I shall talk about legislative responsibility, but first I shall say that if Senators will look at the budget report which came to the Congress from the President they will find it sets forth the basis for a prediction of a $4.2 billion surplus in next year, 1961. The reduction in the tax with reference to communications will cost the Government, as compared to what would be produced in revenue under the House tax bill, not the $463 million to which my great friend from Texas referred. I know how the Senator got that figure. He got it from the equally eminent and distinguished senior Senator from Virginia [Mr. BYRD], the chairman of the committee. However, they are talking about one thing, Mr. President, and fiscal year 1961 is another thing.

The difference in revenue, between the bill as brought to the Senate by the Committee on Finance and as sent to the Senate by the House of Representatives, is a difference of $347 million. I know the gentlemen in their dedication to leadership responsibility will verify that statement and tell us that the $462 million—as it really is, instead of $463 million—is a figure which has application to the calendar year 1961, which includes part of fiscal year 1961 and part of fiscal year 1962.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

Mr. KERR. I yield.

Mr. JOHNSON of Texas. The Senator is correct. The figure I used was not $462 million but was $463 million.

The PRESIDING OFFICER. The time of the Senator from Oklahoma has expired.

Mr. KERR. Mr. President, I yield myself 5 minutes.

I did not understand the Senator from Texas.

Mr. JOHNSON of Texas. The figure I used was $463 million for the full year, which is based upon a chart the distinguished Secretary of the Treasury presented to the minority leader and to me within the last hour.

Mr. KERR. I will say to my good friend from Texas that Mr. Colin Stam, the Chief of Staff of the Joint Committee on Internal Revenue Taxation, took the same paper from the Secretary of the Treasury as the basis for his computation, and told the Senator from Oklahoma that the figure for the calendar year would be $462 million, but that the figure for the fiscal year 1961, beginning July 1 of this year and ending June 30 of next year, would be $347 million. That is the fiscal year with respect to which the President and the Director of the Bureau of the Budget tell the Congress we shall have a surplus of $4.2 billion.

Mr. President, I wish to talk a little about legislative responsibility. The Congress of the United States in the year 1959 told the American people that this tax would terminate on June 30, 1960. This effort is not an effort which originated in the minds of men to bring about something now, in this time of stress. I am aware of the time of stress, Mr. President. This is the result of an action taken by the Congress of the United States, signed by the President of the United States.

I remind Senators that action originated in this body, that action originated in the Senate. It was not started by a few wild-haired radicals on the Committee on Finance, Mr. President, engaged in activities which should be condemned on this floor as fiscal irresponsibility, coming from a lack of realization of the seriousness of the world situation. That action was taken by the Congress of the United States and by the President of the United States in 1959. It was taken on the initiative of the Senate. This was the action of the Senate last year. If there is fiscal irresponsibility in it, it is the fiscal irresponsibility of the Senate, of the House of Representatives, and of the President of the United States.

Mr. GORE. Mr. President, will the Senator yield?

Mr. KERR. I yield to the Senator from Tennessee.

Mr. GORE. How would the Senator characterize the responsibility of the Senate and of the Members of the Senate who, 1 year ago, at a time of the largest deficit in the peacetime history of the United States, voted to repeal the excise tax on local telephone use, but now, in a year when the budget is predicted to have a $4 billion surplus, suddenly feel such action would become fiscal irresponsibility?

Mr. KERR. Mr. President, the question answers itself. I cannot deliver an answer to it, because I am not going to brand my colleagues in the Senate as being fiscally irresponsible.

I know, Mr. President, we have heard from the great tall timbers of the Senate, men recognized around the world for their standing in legislative matters and on fiscal policies. Who am I, Mr. President, to stand in their presence and assert they are fiscally irresponsible? The heavens above my head would fall and crush me under them were I to perpetrate such an outrage. I shall not do it, nor shall I convict myself of what I would regard as being legislative irresponsibility by now saying to the American users of the telephones, "Yes, last year we made you a promise. We told you that the tax would terminate June 30, 1960. The President told you we were going to have a $4.2 billion surplus, yet we will come into every household in America and put that tax back on your telephones. We are going to take away what we did for you last year, because otherwise we would be fiscally irresponsible."

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. KERR. Mr. President, I yield 2 minutes to the Senator from Delaware [Mr. FREAR].

Mr. FREAR. Mr. President, the Members of the Senate, as well as the public in general, I think, are pretty well aware of the promises which this administration made in 1952 and 1956, and which I suspect it will make again in 1960, about what it is going to do for the American taxpayers—how it is going to relieve them from taxes, and especially these excise taxes. I know on more than one occasion the administration has committed itself to the elimination of these excise taxes.

In addition, I do not know how many times the administration has promised to balance the budget. If it had not been for the Democrats assisting some of the Republicans, I doubt if the budget would have been balanced as many times in the 8 years of this administration as it has been.

A person gets a little tired and weary of hearing promises made which are not fulfilled. The American taxpayer is not going to forget promises made to him not only by the administration but also by the Senate, and by the Demorcats. I think the Democrats are fully and equally responsible.

We have been told that removing this $347 million of additional revenue will either produce deficit financing or additional money will have to be raised by some other means. That is true. If we expect, as the administration has promised us, a $4.2 billion surplus in the fiscal year 1961, it will not cause any deficit financing and we can still live up to the promises to taxpayers with respect to this particular excise tax. I hope the Senate will remember what we have done in the past, and the promises that we have made. Whether we are responsible fiscally or not, we certainly should be responsible morally.

Mr. KERR. Mr. President, how much time do the proponents have remaining?

The PRESIDING OFFICER. The proponents have 6 minutes remaining and the opponents 8 minutes.

Mr. KERR. Do the opponents wish to use some time? I wish to use 3 minutes additional.

Mr. DIRKSEN. Mr. President, if anyone is weeping for the telephone user today, let me say that a bill in the New York Legislature to levy this identical tax will be ready the minute the Federal tax is repealed. That information came to my office, with the authority of the Secretary of the Treasury, no later than an hour ago, so if any Senator thinks we are weeping for the user, remember that the States are ready to levy the tax.

If Senators think that the tax is a deterrent, I can show areas all over the country where companies are 6 months behind in trying to provide telephones and telephone service.

When the promises were made, they were made on the basis of the condition that existed at the time, but the condition has changed. In fact, it changed last week in a most expansive moment. We voted $1 billion more for housing, $1,250 million in additional appropriations for defense; $500 million in additional appropriation for HEW; $500 million additional appropriation for public works, to which there is objection of one kind or another; and $750 million for Federal pay. Still, with those increases, there was no additional postal revenue provided to go into the general receipts of the Treasury. Now it is proposed by the amendment and the amendment that will follow to cut revenues by $736 million, according to the Treasury.

One begins to wonder whether there is any virtue in the budget process. Months of effort go into preparing a budget, and then it is kicked into the ash can unceremoniously in a single week. Then we propose to add to the deficit by taking away revenue.

The A.T. & T. did have an income of $1 billion last year. Think of it. But if anyone is weeping about the user, let him remember that New York and other States will levy a corresponding tax immediately.

A group of Governors discussed this subject with the Secretary of the Treasury and others in a State-Federal conference and suggested that it not be done because they would be under pressure to put the tax back. By that time, damage to the revenues of the Treasury will have been done.

It is no wonder that there was such an entreaty on the part of a man who agonizes himself to administer the budget and the expenditures of the country and to keep our fiscal affairs on an even keel. He pops out of his office, comes up to the Hill, and enjoins a Senator to make the best kind of answer he knows. Yes, we promised, but the conditions have changed, and it is the Congress that made the promise and that changed the conditions. Oh, how we changed them only last week.

I yield 1 minute to the distinguished Senator from Utah.

Mr. BENNETT. Mr. President, I should like to make two observations. First, when this tax was set to expire in July, it was placed in the same class with a large number of other taxes that expire every year and require a review. Prior to that time it had been a permanent tax.

The other observation is that as a member of the Finance Committee, I endeavored to keep track of all the pressure that was being applied to remove this tax, and all the pressure I have found has been from the telephone company itself or from leaders inspired by the company, which has conducted a very vigorous campaign to remove the tax.

As has been pointed out clearly, though the tax is a nuisance to the company, it does not interfere with its revenue. I hope the Senate will support the position of the majority leader.

Mr. DIRKSEN. I yield 1 minute to the distinguished Senator from Colorado.

Mr. ALLOTT. Mr. President, I shall support the two leaders of the Senate in their endeavor. I must say frankly that when I came here this year it was my intent to vote not to renew this tax. Events of the past 3 weeks, not only world events, but also events which brought about the appropriation of the additional money that we put in the defense budget, plus other money which I think is not as necessary, but which Congress this year has voted, make it incumbent upon me to reverse my thinking on the question, and to vote for the resumption of this tax.

It is a burden upon the telephone company. There is no question about it. The person who pays it is Mr. John Q. Public. We must never forget that. But if we continue to vote large appropriations, many of them over the budgeted amounts, all of which I have resisted except the appropriation for the Department of Defense, then without impugning the motives or the thinking of anyone else, my own personal sense is that I can only vote to continue these taxes.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. KERR. Mr. President, how much time remains?

The PRESIDING OFFICER. The proponents have 4 minutes remaining; the opponents 1 minute.

Mr. KERR. I yield 2 minutes to the Senator from Minnesota [Mr. McCARTHY].

Mr. McCARTHY. Mr. President, I support the committee recommendation. What we are going through today is something we experience every year when the House sends over the corporate profits and excise tax bill just about a week before the terminal date of June 30, and every year they bring up that old bottle of bourbon and say that if we do not collect an excise tax on it, we will never get it. So the Senate is then expected to vote anything that comes over to us, so we can collect the excise tax on the bottle of bourbon.

This is the only bill on which the Senate has an opportunity to enact any kind of substantial legislation each year, and I think we ought to ask the House, if it is concerned about our fiscal responsibility, to send the bill over to us some 6 weeks before the June 30 date, so we can work on it.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

Mr. McCARTHY. I yield.

Mr. JOHNSON of Texas. I agree heartily with the wise suggestion made by my friend and former Member of the House Ways and Means Committee. I would like to enlist his assistance now to make a plea to the chairman of the House Ways and Means Committee and the other members of the committee, who hold the Senator from Minnesota in such high esteem, because I remember that they talked to me about him as he was entering this body. If he could use his wonderful persuasion upon them, perhaps his suggestion could be carried out, and I assure him he will have my full support in his endeavor.

Mr. McCARTHY. I appreciate the remarks of the Senator from Texas. I think the members of the committee were more responsive when I was on the committee. At least, we were not faced with the prospect of passing on H.R. 10, as we are faced with the prospect of passing on it this year.

The bill as reported by the House to the Senate involves $365 million. The House sent the bill to us during the last month. I should like to call attention to one further point, and that is the question of fiscal responsibility. The report which was submitted with the bill shows at page 5 the kind of tax legislation the administration really wants. There are listed on page 5 the programs and items which the Treasury says may affect the budget surplus. They are all excise taxes or sales taxes, with the exception of the little tax on cooperatives. There are listed there the extension of the telephone tax; the extension of the excise tax on transportation of persons; the increase in the postal rates, which is an indirect excise tax; the recision of diversion of automobile taxes; the excise tax on forest and public lands highways. With the exception of the cooperative tax, I do not know of any tax listed there that is not an excise tax or a sales tax. The administration makes no recommendation with regard to closing any loopholes in the present tax law. I think it is about time, from this very day on, to show that we are not concerned only with excise taxes, but with recommending some taxes which will close loopholes. This is the time to start.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

Mr. DIRKSEN. How stands the time?

The PRESIDING OFFICER. The proponents have 2 minutes remaining; the opponents have 1 minute remaining.

Mr. DIRKSEN. What is the pending business before the Senate?

The PRESIDING OFFICER. The question is on agreeing to the committee amendment to strike out lines 10 and 11 on page 3 of the bill and to insert section 203 on page 5 of the bill.

Mr. DIRKSEN. The pending business is the approval of the amendment inserted in the House bill by the Committee on Finance under which the telephone tax would be repealed, losing thereby $360 million, or approximately that, in fiscal year 1961, to the general revenues of the Treasury. Is that correct?

The PRESIDING OFFICER. The Chair cannot pass upon the accuracy of the figures, but the question is correct.

Mr. DIRKSEN. So that a vote of yea would be a vote for the Finance Committee amendment, which would cut this revenue from the Treasury. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. DIRKSEN. And a vote of "nay" would save the revenue for the Treasury.

The PRESIDING OFFICER. The Senator is correct.

Mr. KERR. I yield myself 30 seconds. I dislike to rise to say that the statement by the Presiding Officer is in error. However, the facts compel me to do so. A vote of "yea" is not a vote to repeal the tax on the use of telephones. A "yea" vote is a vote to continue the repeal of the tax on the use of telephones, which Congress repealed last year. That is what a "yea" vote does.

In addition to that, Mr. President, it does repeal the excise tax on telegram charges, and it imposes an excise tax on charges for the use of leased lines of telephone users.

I know that the minority leader is happy to have an accurate statement. With all humility I suggest to the Presiding Officer that that is a correct statement of what is before the Senate.

The PRESIDING OFFICER. The Chair states that a "yea" vote will sustain the committee's position. A "nay" vote will reject the committee's position.

Mr. JOHNSON of Texas. Mr. President, I yield myself 2 minutes.

Mr. President, it is my intention to vote against this amendment.

Like all my colleagues, I realize that this tax is one which represents a burden upon many people. Nevertheless, I feel that this is a period of our history when we must be willing to shoulder our burdens in a responsible, adult manner.

All of us here are aware of the events of the past few weeks and the events which will probably take place in the future. They can be summed up briefly but brief though they may be, they are still stark and compelling.

Premier Nikita Khrushchev broke up the Paris Conference at which the strong nations of the world were supposed to discuss the possibilities of peace.

The break-up of the Paris Conference was followed by an immediate threat to West Berlin—a threat which still hangs over the heads of the free world.

A peaceful visit by the President of the United States to a friendly nation had to be called off because of rioting and the possibilities of violence.

A peaceful visit by the President of the United States to Formosa was greeted by the merciless and indiscriminate shelling of the offshore islands by the Chinese Communists.

Right down the road is the prospect of a visit by Premier Khrushchev to Cuba—a visit to a country right on our doorstep which has unforeseen but menacing implications.

No one can doubt that world communism has launched a massive offensive to humiliate and weaken the United States. It is going to take all of our imagination, our foresight, and our boldness to counter that offensive.

It is also going to take all of our strength—not only military strength but fiscal, economic, and moral strength.

One of our acts this year—an act which I approved fully—was to increase our Nation's defense budget by $1,179 million. I think that this increase was long over-

due but the events of the past few weeks certainly highlighted the necessity.

Another action we have taken was to increase our Labor-HEW appropriation by $464 million—the greater part of which was designed for research into the crippling and killing diseases. Again, I believe this action was justified.

But, Mr. President, in a moment so critical I am not going to vote to increase spending and to decrease taxes. I do not like to pay taxes any more than anyone else in this country. But I like even less than paying taxes the prospect of weakening the Nation.

The amendment before us would cut our tax revenues by almost precisely the amount that we increased spending in the Labor-HEW bill. This is something that I could not justify to my conscience or to my fellow Americans.

Our country is facing great peril. I have every confidence in the capacity of our country to survive that peril. We have the strength, we have the courage, we have the necessary love of freedom.

But this is a world in which only those who are willing to shoulder the responsibilties of freedom will enjoy the blessings of freedom. I think one of the responsibilities of freedom is to maintain a sound fiscal structure even though it may hurt, and therefore, I am going to vote against this amendment.

I ask unanimous consent that a memorandum on the telephone tax be inserted in the RECORD at this point. The figures on telephone company income completely disprove, in my opinion, the contention that this tax has restricted telephone usage.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

MEMORANDUM RE TAX ON GENERAL TELEPHONE SERVICE

This tax on general telephone service was first imposed by the Revenue Act of 1941. The initial rate was 6 percent. The rate was increased in 1942 to 10 percent and in 1943 to 15 percent. Under the provisions of the Excise Tax Reduction Act of 1954 tax was reduced to 10 percent.

In fiscal year 1959, $398 million was realized from this tax. For fiscal year 1960, it is estimated that the tax will be $435 million. For 1961, it is estimated it will be $463 million, which is the loss which will be suffered if the tax is repealed.

This tax, while collected by the telephone companies, is passed on to the users. It is not a tax on the telephone companies themselves.

While it has been contended that the existence of the tax restricts telephone usage, the facts covering income earned by telephone companies in the United States and the increased number of phones installed do not support this contention.

The American Telephone & Telegraph Co. is now the country's largest single taxpayer, paying taxes at the present time of over $1 billion a year. In 1959, the American Telephone & Telegraph Co. had net income before taxes of over $2 billion. The company's net operating income has increased in each of the last 10 years and in 1959 was nearly four times the amount of the earnings in 1959.

Phones in use increased 3½ million from 1958 to 1959 and the increase is continuing.

In addition, since telephone companies are subject to regulation by public utility commissions, while they are limited in the increases that can be put into effect they also have a very effective protection against decreases which would bring them to a point of operating loss.

It is not believed that a removal of the Federal tax would result in a savings to telephone users and New York has already enacted a tax on local telephone service to become effective if the Federal tax is removed. It is believed that other States would follow this lead. The Governor of New Jersey has already in a message indicated that his State might consider a tax in this field.

It has been said that the Treasury Department in connection with meetings of the joint Federal and State Action Committee had indicated a willingness to relinquish this tax. This is not correct. The Federal Government did propose to the Federal and State Action Committee that the States take over some specified functions now carried by the Federal Government. These included vocational education and waste treatment, etc. It was said if the States did take such action, the Federal Government would give up 4 percentage points on the local tax reducing the Federal tax from a tax of 10 percent to 6. It was intended that these 4 points so surrendered would be picked up by the States. However, Governors did not indicate interest in taking back the functions specified as a condition of the Federal Government surrender of the tax.

Mr. JOHNSON of Texas. Mr. President, in summary, the Finance Committee action by adopting amendments reduced the full year receipts under the bill as follows:

	(*In millions*)
Repealed general telephone service tax	−$463
Retained tax on certain wire services	+5
Net reduction	−458
Exempted domestic telegrams	−18
Repealed transportation of persons tax	−260
Total reduction	−736

The figures are based on those in the budget for 1961.

The PRESIDING OFFICER. All time for debate has expired. The clerk will call the roll.

The legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from Mississippi [Mr. EASTLAND], the Senator from Rhode Island [Mr. GREEN], the Senator from Indiana [Mr. HARTKE], the Senator from Washington [Mr. MAGNUSON], the Senator from Michigan [Mr. MCNAMARA], the Senator from Alabama [Mr. SPARKMAN], and the Senator from New Jersey [Mr. WILLIAMS] are absent on official business.

The Senator from Minnesota [Mr. HUMPHREY], the Senator from Tennessee [Mr. KEFAUVER], and the Senator from Massachusetts [Mr. KENNEDY] are necessarily absent.

The Senator from Missouri [Mr. HENNINGS] is absent because of illness.

On the vote, the Senator from Indiana [Mr. HARTKE] is paired with the Senator from Missouri [Mr. HENNINGS]. If present and voting, the Senator from Indiana would vote "yea," and the Senator from Missouri would vote "nay."

The Senator from Massachusetts [Mr. KENNEDY] is paired with the Senator from New Jersey [Mr. WILLIAMS]. If present and voting, the Senator from Massachusetts would vote "nay," and the Senator from New Jersey would vote "yea."

I further announce that if present and voting, the Senator from Washington [Mr. MAGNUSON], the Senator from Michigan [Mr. MCNAMARA], and the Senator from Alabama [Mr. SPARKMAN] would each vote "yea."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] and the Senator from Arizona [Mr. GOLDWATER] are necessarily absent.

The Senator from Indiana [Mr. CAPEHART] is absent by leave of the Senate.

The Senator from Maryland [Mr. BEALL] and the Senator from New Hampshire [Mr. COTTON] are detained on official business. If present and voting, the Senator from Maryland [Mr. BEALL] and the Senator from Arizona [Mr. GOLDWATER] would each vote "yea."

The result was announced—yeas 30, nays 54, as follows:

[No. 237]

YEAS—30

Anderson	Gore	Morse
Bible	Johnston, S.C.	Moss
Brunsdale	Jordan	Mundt

NOT VOTING—16

Beall	Green	McNamara
Bridges	Hartke	Magnuson
Capehart	Hennings	Sparkman
Cotton	Humphrey	Williams, N.J.
Eastland	Kefauver	
Goldwater	Kennedy	

So the committee amendment was rejected.

Mr. DIRKSEN. Mr. President, I move to reconsider the vote by which the committee amendment was rejected.

Mr. JOHNSON of Texas. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. JOHNSON of Texas. Mr. President, I have spoken to the distinguished Senator from Florida [Mr. SMATHERS] concerning the next amendment, in which he is vitally interested. Many Senators are now in the Chamber. I think we can modify our unanimous-consent agreement and allow 10 minutes to a side. The Senator from Florida will have control of 10 minutes and the leadership will control 10 minutes.

I ask unanimous consent that the agreement be so modified, and I ask Senators to remain in the Chamber so that we may vote promptly on the next

amendment. I think the lines have been drawn and the sentiment of the Senate has been expressed.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas? The Chair hears none, and it is so ordered.

The clerk will state the next committee amendment.

The LEGISLATIVE CLERK. On page 3, it is proposed to strike out lines 12 and 13, and on page 7, starting on line 21, to insert "SEC. 204."

Mr. JOHNSON of Texas. Mr. President, I yield 10 minutes to the Senator from Florida.

Mr. SMATHERS. Mr. President, last year the Senate voted the repeal of the excise tax on the transportation of persons by a vote of 79 to 0. At that time a deficit of some $11 billion had been predicted.

Like the Senator from Oklahoma and the Senator from Tennessee, and other Senators, I am somewhat shocked by the cries of fiscal responsibility which we have seen suddenly break out on the part of many Senators.

I hold up the hand of the able chairman of the Finance Committee, the Senator from Virginia [Mr. BYRD], because he always votes in a consistent way.

But it seems to me the question of fiscal responsibility means different things, according to what one believes in. I know that the many Senators who favored enactment of depressed-area bills and aid-to-education bills and Federal housing bills believe those programs are perfectly all right, and believe that fiscal responsibility is shown by Senators who vote for them.

On the other hand, when a bill which calls for a program they do not like comes along, then, somehow or other, Senators on the opposite side become fiscally irresponsible.

Mr. President, so far as I am concerned, I believe that repeal of the tax on the transportation of persons will be completely fiscally responsible. When the time comes that we vote on other large items, such as the foreign aid bill, it may be that I will not agree to vote for all of those proposals; and in voting against some of them I would be voting in favor of having a balanced budget, which would ensue if all Members voted in accordance with my view.

Mr. GORE. Mr. President, will the Senator from Florida yield?

Mr. SMATHERS. I yield.

Mr. GORE. In addition to fiscal responsibility, is there not another yardstick with which the Senate should measure the various revenue proposals—namely, fairness? Was not this tax imposed for the purpose of discouraging travel during World War II?

Mr. SMATHERS. The Senator from Tennessee is absolutely correct.

Mr. President, we have heard a great deal here on the floor today about the new crisis in Japan and about new crises all over the world. We have heard much said about the fact that the summit conference broke down; and it has been said that, therefore, we should go back, the other way.

But, Mr. President, I can tell you that if this country faces a crisis of serious proportions—and it may likely do so—there will be nothing more important to the country than to have an alert, alive, vigorous, and effective national transportation system.

What are some of the statistics today in regard to that system? In the hauling of passengers alone, last year, the railroads lost $543 million. There are less passenger railroad cars today than there have ever been in the history of the United States since the railroad industry grew up, and that was many, many years ago. If that trend continues the way it is going now, there will be no adequate railroad system for the transportation of passengers in the United States. What will happen Mr. President if we do become involved in a crisis? Then, in order, to show responsibility, we would have to appropriate large sums of money, to try to make up for the neglect we have evidenced toward the transportation system today.

In addition, the airline industry has been picking up the bulk of the transportation of persons throughout the country. Last year, in the first 3 months, the airlines showed a net profit of $7½ million. But this year for a comparable period, the airline industry shows a deficit to $13½ million. Then too in this past year more than 30 intercity busline companies have gone out of existence.

Mr. President, we already have on the statute books laws which allow the airlines to be subsidized. Perhaps some persons think we should do that; but I do not, if we continue as we are going. It is evident from the facts I have related that our national transportation system is on the decline. The repeal of this tax will provide an essential economic incentive to strengthen this system vital to us in times of peace and emergency.

But, Mr. President, if we continue this tax which discourages people from riding buses, airplanes, and trains we shall have to eventually revert to subsidy in order to have a strong transportation system in time of emergency.

Mr. President, this situation does not make a great deal of sense—this sudden breaking out of so-called fiscal responsibility in connection with this particular issue.

Mr. ANDERSON. Mr. President——

Mr. CARROLL. Mr. President——

Mr. SMATHERS. Mr. President, I wish to make one other point, and then I shall yield.

Let me say this tax is highly discriminatory in two ways. First of all, if one who lives in Houston, Tex., wishes to take a trip to Europe, this summer, will he ride on American airlines? No, because the 10 percent travel tax will apply as to them. Instead, he will ride on Air France or KLM. Obviously, people want to save all they can.

By retaining this regressive and discriminatory tax we encourage people to avoid using American-owned airlines, and travel on foreign-owned airlines. They even go to Canada, today, in order to travel to the west coast; they decide to ride across Canada, on their way to the west coast, because in that way they can save money, because of the 10-percent tax which applies only to our own domestic transportation system.

Mr. CARROLL. Mr. President, will the Senator from Florida yield to me?

Mr. SMATHERS. I yield.

Mr. CARROLL. I am very much impressed by the able arguments of the distinguished Senator from Florida.

It was with extreme reluctance that I declined to support the proposal to remove the telephone tax. I took this action because I did not think this country could stand the loss of revenue at a time when the climate of world politics has changed so violently placing the security of this Nation in jeopardy.

But for the same reason the able Senator from Florida urges now, and I commend him for it—I intend to vote for—removal of the tax on the transportation of persons. The desperate economic plight of the railroad industry is well known. We need a strong railroad industry in the interest of national security. Furthermore the tax is regressive, inequitable, and antiquated. It should be removed.

Let me ask the Senator from Florida how long ago we removed the tax on the transportation of freight.

Mr. SMATHERS. We removed it 3 years ago.

Mr. CARROLL. It seems to me the time is long overdue to remove the tax on the transportation of persons. This is a World War II emergency tax to discourage travel. We should repeal it in the hope its removal will strengthen our national security by improving the economic health of the railroad industry.

I could not subscribe to the view of the able Senator from Florida on the first amendment on which we voted; but I intend to vote with him on this issue.

Mr. SMATHERS. I thank the Senator from Colorado.

Mr. ANDERSON. Mr. President, will the Senator from Florida yield to me?

Mr. SMATHERS. I yield.

Mr. ANDERSON. I wish to congratulate the Senator for not talking more about fiscal responsibility in connection with the position of the Democratic members of this committee.

In the subcommittee, 10 Democratic Senators voted to remove the telephone tax, and only 1 Democratic Senator voted the other way. Certainly that justifies a rather severe indictment as regards irresponsibility.

If we examine the votes on some of the other measures, we shall find the source of much of the pressure for the enactment of measures for health, welfare, and other programs.

Inside the committee, no member worried enough about this matter even to ask that a vote be taken on it—neither yea-and-nay vote nor any vote at all, inside the committee.

Mr. SMATHERS. I thank the Senator from New Mexico.

Mr. SCHOEPPEL. Mr. President——

Mr. SMATHERS. I yield to the Senator from Kansas.

Mr. SCHOEPPEL. I wish to associate myself with the view of the Senator from Florida [Mr. SMATHERS] with reference to this transportation tax. As he knows, in the long series of hearings which was held we found out the plight of the railroads and the discrimination effected by

the tax on the American transportation systems, especially the airlines.

I can see a very decided distinction between the telephone tax and the tax on the transportation of persons; and on this issue I intend to support the position of the Senator from Florida.

Mr. SMATHERS. I thank the Senator from Kansas.

Mr. President, I reserve the balance of my time.

Mr. JOHNSON of Texas. Mr. President, the distinguished chairman of the committee, the Senator from Virginia [Mr. BYRD], tells me that a vote was taken on this amendment in the committee; and I wish to ask the Senator from Delaware [Mr. WILLIAMS] whether he agrees as to that.

Mr. WILLIAMS of Delaware. Yes; in the committee, a vote was taken; and the result of the vote was 10 to 6, with the 6 votes being against the amendment—that is to say, against the proposal for the repeal of this tax.

Mr. BYRD of Virginia. Yes, Mr. President; we did take a vote in the committee; and the result of the vote was 10 to 6.

Mr. JOHNSON of Texas. Mr. President, I wish to make it clear that I am not referring to any particular group of Senators, either Democratic or Republican.

I am concerned with the people of Houston, Tex., and with their welfare; and I am here to speak for them and to be as helpful to them as I think the circumstances and the facts justify.

But I shall not shed any crocodile tears about a person who can afford to buy a roundtrip ticket from Texas to Europe—although, of course, I do not think such a person would leave Texas without buying a roundtrip ticket. [Laughter.]

This tax was first imposed at a rate of 5 percent back in 1941. The tax on the transportation of persons has been in effect for the last 19 years. It was increased to 10 percent in 1942 and again to 15 percent in 1943. The amount collected was approximately $227 million in fiscal 1959. In fiscal 1961, it is estimated it will be about $260 million. In fiscal 1960 it is estimated that 64½ percent of this tax will come from airline transportation, 16 percent from motor carriers, 19 percent from railroad travel, and one-half of 1 percent from coastal and inland waterways.

I should like to see this tax repealed. I wish the fiscal situation were such that we could repeal it, but I recall a rather classical statement which was made in the Texas Legislature when a member was asked, "Are you against the sales tax?" He said, "Yes; I am against all taxes."

I think all of us vote to levy taxes with strong reservations. But with the situation of the world what it is today, I do not think it is wise or prudent for us to say to the people who are traveling and to the airline people and to the railroad people and the others who do not oppose this repeal that we are going to deprive the Treasury of $260 million.

The major burden of this tax falls on the airlines. I think all of us know it is not restricting airline travel. The number of passengers carried by the airlines is increasing substantially each year. The Federal Government is rather generous with the airlines. We appropriate millions of dollars for safety facilities, communications facilities, and airport facilities that are utilized by the airlines.

I look forward to the day when we can repeal the tax on travel, but the time to repeal it is not when Chinese Communists are bombing Quemoy, when the Communists are disrupting the summit, when the President is confronted with more problems than ever before, when the Congress, in its wisdom, is raising the defense budget. I think the tax should continue for 1 more year. I look forward to the day when we can repeal it but this is not the day.

Mr. President, I yield 1 minute to the Senator from Massachusetts [Mr. SALTONSTALL].

Mr. SALTONSTALL. Mr. President, as one who sits on the Armed Services Committee and on the Defense Subcommittee of the Appropriations Committee, I wish to confirm what the majority leader has said. We are much concerned with our security today. We have increased the defense appropriation by $1,350 million above the President's budget, about $80 million for satellites, and have added about $500 million above the budget for health research and hospitals for our people.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. FREAR. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. Mr. President, we have a limited amount of time. I yield 1 more minute to the Senator from Massachusetts.

Mr. SALTONSTALL. I need just 30 seconds. We have refused to increase postal rates. We must be insistent that we live up to our own responsibilities for our security and for our health. These are two matters that I mention because they concern our security. Let us not, by budget deficits, pass on our own responsibility to our children and our grandchildren. We should do what we ought to do, and we ought to do it for ourselves at the present time.

For these reasons, much as I and all the rest of us would like to reduce our taxes, I am for continuation of the telephone tax and the transportation tax.

Mr. JOHNSON of Texas. Mr. President, I yield 1 minute to the Senator from Ohio [Mr. LAUSCHE].

Mr. LAUSCHE. Mr. President, first, I wish to commend the Senator from Texas for his leadership. The country is asking for leadership. The people will do those things that are needed to secure the future of our Nation. I believe in the last 3 days there have been indications here that we will tell them what is needed.

I merely point out that, with reference to cargo taxes, the railroads claim that unless those cargo taxes are removed, private corporations will continue to develop their own trucking systems. They have said the tax on cargoes is harmful. It was not argued that by relieving the railroads of the passenger tax they could compete better with the airlines. That argument was not made. In my opinion, we shall not be helping the railroads at all by removing that tax.

Mr. JOHNSON of Texas. Mr. President, I yield 2 minutes to the Senator from Delaware [Mr. WILLIAMS].

Mr. WILLIAMS of Delaware. Mr. President, I want to join the leadership and the chairman of the committee in urging the rejection of this amendment.

I should like to make a parliamentary inquiry first in order that we may get clear the effect of the amendment pending. Would the Chair have the clerk state the amendment? The reason I ask the question is this: Does the Senator from Florida intend that we first vote on the repeal of the full 10 percent tax on transportation or just on the repeal of 5 percent?

Mr. SMATHERS. On the 10 percent.

Mr. WILLIAMS of Delaware. That is what I thought you intended, but I do not think the clerk so stated. I wonder if the Chair will have the clerk state the amendment.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. On page 3, lines 12 and 13, strike out all the language.

Mr. WILLIAMS of Delaware. I call to the attention of the Senator from Florida that the amendment which the clerk has just stated covers only 5 percent, which would involve $145 million, whereas section 204 of the bill takes care of the other 5 percent.

The PRESIDING OFFICER. The Chair will state the pending question is on lines 12 and 13 on page 3 of the bill, striking out that portion, and inserting section 204.

Mr. WILLIAMS of Delaware. With that understanding we are voting on the full 10 percent.

The PRESIDING OFFICER. Yes.

Mr. WILLIAMS of Delaware. As I understood the clerk when he stated the first amendment, he did not include the last part.

Mr. DWORSHAK. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DWORSHAK. Can we have a separate vote, a vote first on the 5 percent, and then subsequently on the other.

The PRESIDING OFFICER. The Chair will state that the request was made earlier to combine the two. It was agreed to by the Senate without objection.

Mr. DWORSHAK. When was the request made?

The PRESIDING OFFICER. Earlier this morning, before the vote on the first amendment; and the yeas and nays have been ordered on this combination.

Mr. DWORSHAK. It is a poor way to run a railroad. [Laughter.]

Mr. President, I make a demand for a separation of these two votes. Are we voting only on the 5 percent or on the elimination of the whole thing?

Mr. SMATHERS. Mr. President, we shall be voting on the elimination of the whole thing. If it is defeated, and the Senator wishes to offer an amendment later to make it 5 percent, that will be in order; but the point is, we are voting now

on whether to eliminate the 10 percent tax on the transportation of persons.

Mr. WILLIAMS of Delaware. Mr. President, approval of the pending amendment would result in a $290 million loss in projected revenues for a full year. Five percent of the tax is due to expire June 30 if there is no action by the Senate, and the other 5 percent involves repeal of the 5 percent permanent tax. I certainly hope the Senate will follow its previous action and reject the committee amendment. Let us not deprive the Treasury of $290 million in revenues prior to the time we can balance the budget.

I join other Members of the Senate in hoping that we can soon achieve a real balanced budget so we can cut not only this tax but a lot of other taxes, but we have failed to cut these appropriations. We have not yet closed this fiscal year with a balanced budget. As one Senator, I am not going to vote for any tax cut, no matter how meritorious, until we have by our actions reduced appropriations so that we can have a real balanced budget and not merely an imaginary one.

Mr. JOHNSON of Texas. Mr. President, how much time is left on either side?

The PRESIDING OFFICER. The proponents have 2 minutes remaining, and the opponents 1 minute.

Mr. SMATHERS. Mr. President, I yield one-half minute to the able Senator from New Mexico.

Mr. ANDERSON. Mr. President, I desire to correct the RECORD. I said that there was no rollcall vote. The record of the committee, which has been presented to me, shows there was a rollcall vote. Ten Democrats voted for and one Democrat and five Republicans voted against this proposal. I was in error as to the vote.

Mr. SMATHERS. Mr. President, I wish every Senator who says now he is not going to vote for the repeal of the transportation tax on persons will ask himself how far he will go when the officials of our Government and the people themselves say, "We are in a serious situation and we need some money to revitalize our transportation industry." Then what will Senators vote for?

Mr. President, that day is coming as surely as that we sit here. One of the reasons is that this tax has been a regressive tax. It was regressive in its origin. It was put on the statute books mainly to discourage people from riding on the trains and aircraft. That is what it did and continues to do.

We have the situation at Quemoy today with the bombs falling, as the majority leader said, and crises all around. We cannot run down in a hole and sit until they pass away. We must take affirmative action when the situation calls for such action.

The PRESIDING OFFICER. The time of the Senator from Florida has expired.

Mr. SMATHERS. We must have transportation. This is the kind of proposal which will help to revitalize our transportation system to cope with any emergency situation that may arise. A step in this direction would be the repeal of this discriminatory, arbitrary, and regressive excise tax on the transportation of persons. Its repeal is long overdue.

Mr. DIRKSEN. Mr. President, how much time remains?

The PRESIDING OFFICER. One minute remains for the opposition.

Mr. DIRKSEN. Mr. President, one of Dickens' great characters, Micawber, said:

> Annual income twenty pounds, annual expenditure nineteen nineteen six, result happiness. Annual income twenty pounds, annual expenditure twenty pounds ought and six, result misery.

In the last expansive week there was provided a billion dollars for housing; a half billion dollars over the budget estimate for the Department of Health, Education, and Welfare; $500 million for projects for rivers and harbors; a billion and a quarter dollars extra for defense. We have to have money to operate the Government. On top of it all, to reduce revenues and to deny the Government other revenues will result in a deficit and danger.

Surely there is a reason why the Secretary of the Treasury sat in my office this morning, along with the majority leader, and entreated and pled and hoped that this would not be done to jeopardize the stability and the solvency of our economy. We must consider the terrific financial load he carries, for he must refinance the public debt and keep the budget in some kind of balance. Is the budget process to go out of the window at the hands of the Congress? Are we going to accept responsibility? Everything dictates that the amendment should be defeated in the interest of our country—not for Democrats, not for Republicans but for our country, in a world which is filled with fever.

Mr. President, I hope we can pass the House bill without any amendment whatsoever.

Mr. GRUENING. Mr. President, will the minority leader yield for a question?

Mr. DIRKSEN. I believe my time has expired.

Mr. GRUENING. The Senator is aware that this is the year the President of the United States has designated as "Travel America Year." Do we not wish to do everything we can to help our transportation arteries?

Mr. DIRKSEN. When one can travel abroad I think one can pay the taxes.

The PRESIDING OFFICER. All time for debate has expired.

The question is on agreeing to the committee amendment, relating to the tax on transportation of persons. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from Mississippi [Mr. EASTLAND], the Senator from Rhode Island [Mr. GREEN], the Senator from Indiana [Mr. HARTKE], the Senator from Washington [Mr. MAGNUSON], the Senator from Michigan [Mr. MCNAMARA], the Senator from Alabama [Mr. SPARKMAN], and the Senator from New Jersey [Mr. WILLIAMS] are absent on official business.

The Senator from Minnesota [Mr. HUMPHREY], the Senator from Tennessee [Mr. KEFAUVER], and the Senator from Massachusetts [Mr. KENNEDY] are necessarily absent.

The Senator from Missouri [Mr. HENNINGS] is absent because of illness.

On this vote, the Senator from Mississippi [Mr. EASTLAND] is paired with the Senator from Michigan [Mr. MCNAMARA]. If present and voting, the Senator from Mississippi would vote "nay," and the Senator from Michigan would vote "yea."

The Senator from Massachusetts [Mr. KENNEDY] is paired with the Senator from Washington [Mr. MAGNUSON]. If present and voting, the Senator from Massachusetts would vote "nay," and the Senator from Washington would vote "yea."

I further announce that if present and voting, the Senator from Indiana [Mr. HARTKE], the Senator from Minnesota [Mr HUMPHREY], the Senator from Alabama [Mr. SPARKMAN], and the Senator from New Jersey [Mr. WILLIAMS] would each vote "yea."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] and the Senator from Arizona [Mr. GOLDWATER] are necessarily absent.

The Senator from Indiana [Mr. CAPEHART] is absent by leave of the Senate.

The Senator from Maryland [Mr. BEALL], and the Senator from New Hampshire [Mr. COTTON] are detained on official business. If present and voting, the Senator from Maryland [Mr. BEALL] and the Senator from Arizona [Mr. GOLDWATER] would each vote "yea."

The result was announced—yeas 29, nays 55, as follows:

[No. 238]

YEAS—29

Anderson	Gruening	Moss
Bible	Javits	O'Mahoney
Butler	Johnston, S.C.	Proxmire
Byrd, W. Va.	Kerr	Randolph

So the committee amendment to strike out the language on page 3, lines 10 and 11, and to insert a new section 204, beginning at line 21, page 7, was rejected.

Mr. DIRKSEN. Mr. President, I move that the Senate reconsider the vote by which the amendment was rejected.

Mr. JOHNSON of Texas. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. JOHNSON of Texas. Mr. President, in order that Senators may make their plans accordingly, since there have been two record votes and some very meritorious discussion today, during which time a good attendance of Senators was present, I wonder if it might be agreeable to the Senate to have 30 minutes debate on each side on amendments and 2 hours on the bill. Time could then be yielded on any amendment that ran over the limitation, but that would give us an hour on amendments and 2 hours on the bill, and Senators could remain in the Chamber. We could have a good audience and get some action on the amendments.

The PRESIDING OFFICER. Is there objection?

Mr. LONG of Louisiana. Mr. President, I am not prepared to agree to that request at this time. Therefore, I must object.

Mr. JOHNSON of Texas. Would the Senator agree to a modification of the request in order to accommodate all Senators?

Mr. LONG of Louisiana. I am not prepared to make such agreement at this time. I have no objection to an agreement on any particular amendment.

Mr. JOHNSON of Texas. Will the Senator agree to accept the limitation except as to his amendment, upon which we might reach an arrangement, while Senators are present to hear the discussion?

Mr. LONG of Louisiana. The Senator from Tennessee [Mr. GORE] has an amendment or two to offer. He is entitled to be consulted. Has he agreed to the limitation?

Mr. JOHNSON of Texas. No.

Mr. LONG of Louisiana. I have no objection to an agreement upon a pending amendment or any particular one, but I cannot agree to a general arrangement.

The PRESIDING OFFICER. The bill is open to amendment.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had disagreed to the amendments of the Senate to the bill (H.R. 11998) making appropriations for the Department of Defense for the fiscal year ending June 30, 1961, and for other purposes; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. MAHON, Mr. SHEPPARD, Mr. CANNON, Mr. FORD, and Mr. TABER were appointed managers on the part of the House at the conference.

The message communicated to the Senate the intelligence of the death of Hon. DOUGLAS H. ELLIOTT, late a Representative from the State of Pennsylvania, and transmitted the resolutions of the House thereon.

ENROLLED BILL SIGNED

The message also announced that the Speaker had affixed his signature to the enrolled bill (S. 899) to repeal certain provisions of law requiring the submission of certain reports to Congress, and for other purposes, and it was signed by the President pro tempore.

PUBLIC DEBT AND TAX RATE EXTENSION ACT OF 1960

The Senate resumed the consideration of the bill (H.R. 12381) to increase for a 1-year period the public debt limit set forth in section 21 of the Second Liberty Bond Act and to extend for 1 year the existing corporate normal tax rate and certain excise tax rates.

Mr. McCARTHY. Mr. President, I offer an amendment which I send to the desk and ask to have stated.

The PRESIDING OFFICER. The clerk will state the amendment of the Senator from Minnesota.

The LEGISLATIVE CLERK. At the end of the bill it is proposed to insert the following:

SEC. 6. Repeal of credit against income tax for dividends received by individuals.

(a) REPEAL OF SECTION 34.—Effective with respect to taxable years beginning after December 31, 1960, section 34 of the Internal Revenue Code of 1954 (relating to credit for dividends received by individuals) is repealed.

(b) TECHNICAL AMENDMENTS.—

(1) The table of sections for part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 is amended by striking out "SEC. 34. Dividends received by individuals."

(2) Section 35(b)(1) of such code is amended by striking out "the sum of the credits allowable under sections 33 and 34" and inserting in lieu thereof "the credit allowable under section 33."

(3) Section 37(a) of such code is amended by striking out "section 34 (relating to credit for dividends received by individuals),".

(4) Section 584(c)(2) of such code is amended by striking out "section 34 or".

(5) Section 642(a) of such code is amended by striking out the first sentence, and by striking out "section 34 and" in the second sentence.

(6) Section 702(a)(5) of such code is amended by striking out "a credit under section 34,".

(7) Section 854(a) of such code is amended by striking out "section 34(a) (relating to credit for dividends received by individuals),".

(8) Section 854(b) of such code is amended by striking out "the credit under section 34(a)," in paragraph (1) and by striking out "the credit under section 34," in paragraph (2).

(9) Section 1375(b) of such code is amended by striking out "section 34, section 37, or section 116" and inserting in lieu thereof "section 37 or 116".

(10) Section 6014(a) of such code is amended by striking out "34 or".

(c) EFFECTIVE DATE.—The amendments made by subsection (b) shall apply only with respect to taxable years beginning after December 31, 1960.

Mr. McCARTHY. On this amendment, can we agree on limitation of debate. I shall speak for no more than 5 minutes myself.

Mr. JOHNSON of Texas. Mr. President, in view of the statement of the proponent of the amendment, may we have a unanimous-consent agreement?

I ask unanimous consent that 15 minutes be granted to the proponents of the amendment and 15 minutes to the opponents.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. McCARTHY. Mr. President, this is the same amendment that was offered to the bill last year and adopted in the Senate by a vote of 46 to 31. It is essentially the same amendment which was adopted back in 1954 when the Internal Revenue Act with amendments to the act of 1954 were adopted. This amendment carried in the Senate, on a motion by Senator JOHNSON of Colorado, by a vote of 71 to 13. In the same year in the minority report of the House of Representatives, every Democratic member of that committee, save one, voted against including dividend credit in the amendments adopted in 1954.

Mr. President, the question of fiscal responsibility in providing sufficient revenue to meet the expenditures approved within recent weeks by this Congress has been raised. The action taken by the committee today would prevent the loss by the Senate of approximately $750 million. But this must be set against the fact that the appropriations for the Department of Defense have been raised by approximately $1,200 million, and the pay raise approved for Government employees will result in expenditures of approximately $750 million. The total of both increases is approximately $2 billion. If this amendment is adopted, it will increase Federal revenue by approximately $350 million.

Those who wish to vote for fiscal responsibility will be closer to fulfilling that responsibility by the adopting of this amendment. Those who are not concerned with fiscal responsibility will still have approved a billion dollars of expenditures in excess of revenue.

Most Senators are familiar with the effect of the amendment. It does not affect the $50 deduction. It will provide that the tax paid on salaries and wages will be the same as that paid on income derived from dividends. Under existing law a married man with two dependents who has a $10,000 income from wages or

salaries pays a tax of approximately $1,372. A man with two dependents who has an income of $10,000 from dividends pays a tax of approximately $1,091. That is a difference of approximately $280 in the amount of tax which is paid.

I have distributed to all Senators, by having it placed on their desks, a chart which shows who benefits from the dividend credit provision of the Internal Revenue Code. That chart is based upon 1957 figures. It shows that there are approximately 11½ million tax returns filed by people whose income is under $3,000. Of those 11½ million, only 2 percent make any claim for dividend income. The average tax saved amounted to about $18 for each return.

Persons with incomes of $20,000 to $25,000 file about 250,000 returns. Of these, 54 percent put in a claim for dividends. They saved on the average about $147.

If we move into the $100,000 to $150,000 bracket, we note that 14,000 tax returns were filed and that 89 percent of those filing such returns claimed a dividend credit. The amount saved, on the average, was $1,528 for each return.

If we move into the $500,000 to $1 million income bracket, we note that 578 returns were filed, and that 96 percent of those filing such returns claimed dividend credits, and saved approximately $10,470 on each return.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. McCARTHY. I yield.

Mr. DOUGLAS. I congratulate the Senator from Minnesota for offering the amendment. I should like to ask the Senator if it is not true that at one time income from interest and dividends was taxed at a higher rate than income from wages and salaries.

Mr. McCARTHY. The Senator is correct. An adjustment was made to bring it down to the point where it was taxed at the same rate.

Mr. DOUGLAS. We have moved from a period in which income from wages and salaries was taxed at a lower rate into a period in which income from earnings was taxed at an equal rate. Since 1954, since the Humphrey-Eisenhower bill, income from dividends is taxed at a lower rate than income from wages and salaries. Is that correct?

Mr. McCARTHY. In each Congress they found a new argument in the name of equity. They have moved now to a point at which the tax rate is lower on incomes derived from dividends than from wages and salaries, interest or rent.

Mr. DOUGLAS. Is it not true that this amendment was adopted last year by the Senate?

Mr. McCARTHY. Yes, by a vote of 46 to 31.

Mr. DOUGLAS. It was deleted in conference. Is that correct?

Mr. McCARTHY. That is correct.

Mr. DOUGLAS. Just as it was deleted in conference in 1954.

Mr. McCARTHY. The Senator is correct.

Mr. DOUGLAS. I thank the Senator.

Mr. McCARTHY. One additional point should be made at this time. Studies which were made by the Joint Committee on Internal Revenue Taxation and other reports which have been received by Congress indicate that there is a gap as between the dividends that are actually earned in this country and those which are reported on tax returns. The best estimate indicates that about 90 percent are reported and about 10 percent are not reported. In effect this means that about a billion dollars in dividend income goes unreported. If it were reported, with a tax rate of approximately 20 percent, at least, about 200 million to 250 million dollars in taxes would be collected.

Mr. DOUGLAS. However, the dividends which are reported are paid at a lower rate than wages and salaries which were earned.

Mr. McCARTHY. Yes.

Mr. DOUGLAS. The four percent deduction is not a deduction from taxable income, but from the tax itself.

Mr. McCARTHY. Yes, it is.

Mr. DOUGLAS. It may well reduce the total amount of the tax by more than 4 percent.

Mr. McCARTHY. Quite possibly, yes.

Mr. DOUGLAS. In fact, on the upper income it almost certainly does.

Mr. McCARTHY. A direct tax credit is given.

Mr. DOUGLAS. Against the tax itself, not against taxable income.

Mr. McCARTHY. Yes. It is not a deduction, but a direct tax credit.

Mr. YOUNG of Ohio. Mr. President, will the Senator yield?

Mr. McCARTHY. I yield.

Mr. YOUNG of Ohio. First, I wish to compliment the Senator on the stand he has taken this year and on the identical position he took last year in presenting his amendment to the Senate. I associate myself with the fine argument he had made in behalf of his amendment. Does not the Senator feel that it is even more essential than it was last year that we support his amendment?

Mr. McCARTHY. Yes; especially in view of the action which has been taken by the Senate within the last 2 or 3 weeks.

Mr. YOUNG of Ohio. In addition to that, does not the Senator feel that we are living in a grim period of international anarchy, and that the tensions of the cold war have increased in recent weeks by the failure of the summit conference and by reason of the happenings in Japan? Should not the proposal of the Senator, which will add $350 million to our Treasury, be adopted, because the money can well be used in view of the fact that we shall need to add to our expenditures for our national defense?

Mr. McCARTHY. I certainly agree with the Senator from Ohio, and thank him for the contribution he has made. We should note also that the argument that we should continue the excise taxes because of the emergency situation is not particularly valid. It appears as though we are going to live in a kind of a permanent emergency. Therefore we should establish a fair tax base to carry us over the next 15 or 20 years, if it is necessary to do so. Instead of continuing what is called a temporary wartime excise tax, let us recognize the basic fault in the tax code and eliminate inequities and injustices. My amendment is an important step in eliminating such injustices and inequities.

Mr. YOUNG of Ohio. I should like to ask one further question. Is it not a fact that if the amendment offered by the Senator from Minnesota is adopted it will not cause any real hardship to any taxpayer of this country?

Mr. McCARTHY. It will not cause any hardship to taxpayers who are in any dire need.

Mr. YOUNG of Ohio. That is correct; although I believe the Senator from Minnesota will agree with me that taking these additional feathers will no doubt cause much additional squawking. Is not that correct?

Mr. McCARTHY. I understand the stock exchanges and the brokers have sent out something like 2½ million pieces of some kind of propaganda, and their principal plea concerns the hardship to widows and orphans. Of course, it is good to know that the stock exchanges are concerned with the widows and orphans. Perhaps it would be good to have them win in this particular instance because of this new-found concern of theirs. However, I believe that in the name of equity and justice more widows and orphans will be served by the adoption of this amendment than will be benefited if it is not agreed to.

Mr. YOUNG of Ohio. I again express agreement with the Senator from Minnesota, and compliment him.

Mr. GRUENING. Mr. President, will the Senator yield?

Mr. McCARTHY. I yield.

Mr. GRUENING. I ask the Senator from Minnesota whether, in addition to the desirable objective of bringing $335 million more into the Treasury at a time when we have increased some of the appropriations for important and desirable national needs, and when those of us who believe in fiscal responsibility feel it is necessary to compensate for these increases in various ways, there is not also a basic difference in philosophy between those who espouse this amendment, which has been considered before, and those who oppose it? And if so, whether the Senator from Minnesota would not like to discuss it briefly? I think an important issue is involved. There is perhaps more to it than merely the addition of revenue, however important that may be.

Mr. McCARTHY. The same point was raised by the Senator from Illinois [Mr. DOUGLAS], who pointed out that there is a basic question of tax philosophy, namely, whether earned income is to be taxed at a higher rate than unearned income.

The Senator from Illinois pointed out that the early practice was to tax dividend income at a higher rate than earned income—salaries, wages, interest, and rent.

The case for equity was that a taxpayer should not be taxed at a higher rate on unearned income than on earned income.

Mr. GRUENING. At what point was the philosophy proposed whereby the coupon-cutter and dividend recipient was offered a lower tax rate, a special privilege as against the wage earner?

Mr. McCARTHY. This was enacted in the code of 1954, when this 4 percent differential was incorporated in the act. As a matter of fact, the original recommendation of the Treasury, under Secretary George Humphrey, was that the dividend tax credit should be 10 percent. A compromise was reached when the Senate rejected the idea, and in conference the 4 percent dividend credit was agreed to.

Mr. GRUENING. Then the new philosophy was an Eisenhower-Nixon administration policy; was it not?

Mr. McCARTHY. It was first incorporated into law in the 1954 revision of the Internal Revenue Code. It was initiated by Secretary of the Treasury George Humphrey.

I might note that that tax reduction of some $3,500 million was approved by the administration in 1954 in the face of an anticipated deficit of $2,500 million.

The amendment seeks to accomplish two things. It will really establish justice in the income tax code; and it will demonstrate what has been called, on the floor of the Senate, namely, fiscal responsibility.

Mr. GRUENING. I congratulate the Senator from Minnesota on presenting his case so forcefully in such a good cause.

Mr. McGEE. Mr. President, will the Senator yield?

Mr. McCARTHY. I am glad to yield, so long as I have time to yield.

Mr. McGEE. I have studied the Senator's amendment very carefully and am persuaded that in the light of the activity of the Senate in recent days it is certainly called for; and also that on the broader front of philosophy it is called for.

I am one who voted twice earlier today to reduce taxes in two specific fields. I mentioned that I had a live pair on each of those votes. The live pair was with my conscience. It seems to me that in order to fulfill my obligation to that conscience, it is necessary to find money to put into the Treasury to balance the operations with which we are concerned. I support the pending amendment and shall support one or two of the amendments yet to be proposed today in order to provide the money necessary.

I commend the Senator from Minnesota for proposing this particular amendment.

Mr. McCARTHY. I thank the Senator from Wyoming.

The PRESIDING OFFICER. The time in support of the amendment has expired.

Mr. KUCHEL. Mr. President, from the time in opposition, I yield 3 minutes to the Senator from Utah.

Mr. BENNETT. Mr. President, before we reimpose this burden on the investing public of America, I think the Senate might be interested to know the attitude toward this problem held by countries which are becoming our chief competitors, not only in the world market, but in our own market, as well.

Canada, in 1949, gave its investors a 10-percent tax credit; and in 1954 doubled that credit to 20 percent.

Japan allows a credit of 20 percent. Both of these credits compare with the 4-percent credit which exists in the United States, and which the Senator from Minnesota is seeking to have repealed.

West Germany, which has become very important in international affairs, taxes the undistributed profits of a corporation at 51 percent, which is about the same as our own rate; but if the profits are distributed, the tax drops to 1.5 percent, which is a very husky tax credit.

The United Kingdom has a rather complicated device for calculating tax credits on dividends.

We can go down the line. Australia and France tax income on corporations as though it were income to a partnership, thus completely eliminating the double tax. This is done as to certain corporations in France.

Other countries, including New Zealand and Mexico, completely eliminate dividends from the personal income base.

Because time is limited, I am unable to detail this material; but other countries also grant partial tax credit on dividends. They include Argentina and Finland, as well as Japan and Canada.

At a time when the American people are becoming very conscious of foreign competition, I do not believe we should consider burdening the investors in American business by reducing the very meager tax credit of 4 percent which was established in 1954.

The PRESIDING OFFICER. The time of the Senator from Utah has expired.

Mr. KUCHEL. Mr. President, I yield an additional minute to the Senator from Utah, to enable the distinguished senior Senator from New York to engage in a colloquy with the Senator from Utah.

Mr. JAVITS. Mr. President, will the Senator from Utah yield?

Mr. BENNETT. I am happy to yield.

Mr. JAVITS. I should like to observe that I have supported the dividend tax credit before. I do not believe it is a liberal versus a conservative measure. I shall again support this exemption from taxation, because I think far more is to be gained from interesting our people in security holdings as the real eventuation of our society than can be gained by the feeling, which I believe is very genuine, about any injustice involved in this particular tax.

I simply wanted to say that to the Senator from Utah, because I think it is a very important point for the consideration of Senators during the consideration of the bill.

Mr. BENNETT. I appreciate having that fact brought out by the Senator from New York. It is important to know that since the dividend tax credit became a part of the law, the number of Americans holding securities has approximately doubled. I think this is a very worthwhile provision in the law.

The PRESIDING OFFICER. The time of the Senator from Utah has expired.

Mr. KUCHEL. Mr. President, I yield 5 minutes to the able Senator from Connecticut.

Mr. BUSH. Mr. President, I am looking at the memorandum distributed to Senators by the sponsor of the amendment.

I observe that one of the paragraphs speaks about the equalization of the taxes of citizens who have income from salaries, wages, interest, and rents with those who have income from dividends.

The memorandum purports to show that under existing law, a married man with two dependents, and who has $10,000 of income from wages and salaries, pays a tax of approximately $1,372; whereas a married man with two dependents, and having an equivalent amount of income from dividends, pays a tax of approximately $1,091, a difference of approximately $280.

What about the fellow who does not have any earned income at all, but gets his income from tax-free bonds? If the sponsors of the amendment to close so-called loopholes really want to close one, why do they not propose to tax income from tax-free Government bonds?

Mr. McCARTHY. Mr. President, will the Senator from Connecticut yield?

Mr. BUSH. I do not have the time to yield. Why do they not get busy and close that loophole? It is perfectly clear that the States are all opposed to such taxation. I know that. But after all, this kind of comparison is not valid, when the most inequitable and most unjust differentiation takes place between the person who pays no income tax because he does nothing but buy tax-free bonds.

In the fourth paragraph of the remarks made by my good friend, the Senator from Minnesota, he spoke of one of the principal arguments in support of the dividend credit—namely, that it would encourage people to invest ir. risk capital, rather than in Government bonds.

Today he has said there is need to provide incentive, so as to encourage people to purchase Government bonds. On the other hand, the same group of Senators is opposed to raising the interest rate ceiling on Government bonds—in short, is opposed to having the Congress make it possible for the Government to do what it should do in order to make its bonds attractive investments for those who have money to invest in long-term securities.

So I think the sponsors of this amendment are entirely inconsistent, because they oppose giving the Government the tools it needs in order to do its own financing. Instead, they favor keeping the Government's hands tied behind its back, by means of the interest rate ceiling.

Mr. President, the dividend credit was included in the tax reform bill passed in 1954, and it is now part of our tax system.

The business of suddenly bringing up a tax-reform measure shortly before the end of the session is, it seems to me, very bad practice.

The House Ways and Means Committee is working on a complete reform of our tax system, which is badly needed. I am sure that in connection with that reform, the Ways and Means Committee will consider this item, and I believe it should.

However, the business of selective tax repeal is most unwise; and I feel very sure—and last year we had a very good demonstration of it—that the House Ways and Means Committee would throw out this amendment in conference; and, thus, we run the risk of jeopardizing the receipt of $4 billion of income by means of the taxes we are discussing today. So we are dealing with a highly dangerous business, in this connection; and it could result in penalizing the Government, by keeping it from receiving billions of dollars of revenue which it must receive, revenue which is absolutely necessary for the conduct of the Government and in order to provide for the national defense.

Mr. President, my good friend, the Senator from Utah, has pointed out the fact that since the tax bill which provided this exemption was passed, the number of shareholders in American companies has nearly doubled, and that there are now approximately 13 million shareholders. Mr. President, most of these people are far from rich; I think their average income is estimated to be of the order of $6,900. So the average shareholder in this country is not a great capitalist. Instead, a very large percentage of the shareholders are people of very modest incomes, and many of them indeed get most of their very modest income from dividends and interest.

So, Mr. President, I hope the Senate today will reject the amendment of the Senator from Minnesota.

If he wishes me to yield time to him at this point, I shall be glad to do so.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. McCARTHY. Mr. President, no time remains available to me.

Mr. BUSH. I believe I have 1 additional minute—if the Senator from California will yield it to me.

Mr. KUCHEL. I yield 1 additional minute to the Senator from Connecticut.

The PRESIDING OFFICER. The Senator from Connecticut is recognized for 1 additional minute.

Mr. BUSH. Mr. President, I now now yield to the Senator from Minnesota.

Mr. McCARTHY. Mr. President, the Senator from Connecticut has made his reply to my statement; and I have no reason to press the point any further, except to say that many communities are under severe financial pressure at this time. So, Mr. President, if the Senator from Connecticut wishes to urge that this exemption be repealed, he can make such a recommendation. However, in view of the fiscal problems the communities face at this time, I do not favor repealing it.

Mr. BUSH. Mr. President, I am not one to favor changing the tax structure here on the floor of the Senate, all of a sudden, without having the benefit of hearings. But if the Senator from Minnesota wishes to discuss such a subject, I shall be glad to hear him do so.

Mr. McCARTHY. I do not have the time to proceed further, Mr. President.

Mr. KUCHEL. Mr. President, I yield myself 1 minute.

The PRESIDING OFFICER. The Senator from California is recognized for 1 minute.

Mr. KUCHEL. Mr. President, I do not believe there is any moral justification in having the Government of the United States take two bites out of the same dollar of profit. Nevertheless, if any of us are engaged in activities as a corporation, that is exactly what the tax laws of the United States do. With partnership profits, no. With individual entrepreneur profits, no. But with corporations, yes.

In 1954, a very meager attempt at some slight relief from double taxation on the same dollar of profit was written into the law, so that any of us in the land can have the first $50 of dividend income, and also 4 percent of the balance, exempt from taxation.

What is wrong with that? I believe it would be a disservice for the Senate now to take action which would result in wiping out that small and slight dividend credit which we wrote into the law in 1954.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD an excellent article on this problem, which was published on the financial page of the Los Angeles Examiner of June 9, 1960.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TAX EXEMPTION ON DIVIDENDS AGAIN IN PERIL

(By Ralph Rivet)

Since the 1954 Internal Revenue Act became effective, stockholders have been able to receive $50 in dividends and pay no income tax on it. For a married couple where the dividends are community property the deduction is $100.

This $100 dividend exclusion gives $100 spendable dollars. It will take $125 in salary taxed at the lowest rate of 20 percent to equal that amount. Actually, with other payroll taxes such as social security and disability insurance, and such additional deductions as pension contributions and insurance premiums, the average family has to earn considerably more than $125 to have $100 to spend.

In addition to the $50/$100 dividend exclusion, there is allowed a 4-percent tax credit on dividends above the exemption. For instance, a family which received $500 in dividends can deduct $100 before listing the remaining $400 as taxable income and may deduct another 4 percent, or $16.

Congress provided these credits to encourage people to own shares in American industry. It also was acknowledgement of a basic unfairness of the present income tax laws: the double taxations feature.

Before a corporation can pay a dividend, it must first pay an income tax on its earnings. Then these earnings, already taxed once for income, are taxed a second time when received by the individual.

Last year an attempt was made to remove the dividend credit feature from the income tax law. It is possible a second attempt will be made again this month.

While shareholders of successful companies in this country fight to retain just a little consideration, those in Canada are treated much better. There, a 20 percent dividend credit is authorized, which means double taxation only hits those in the upper income tax brackets.

This is too much to hope for in the United States. Anyone who has dividend income from stock in the United States, however, would do well to write both his Congressman and his Senators and give his views about proposed elimination of the present dividend credit.

There are 12,500,000 stockholders in the United States. This is a large enough bloc of people to make its influence felt strongly in Washington if it would do so.

As we mentioned above, a man has to earn $125 to have $100 to spend for his family. But if he joins with his fellow citizens in a corporation, their investment has to earn something in excess of $250 before he can have $100 to spend, even if the corporation paid out every bit of its earnings.

If the corporation is going to be prudent and save some money for replacing equipment and similar type expenses, it ought to pay no more than half its earnings.

In this event, it will have to earn over $500 for one of its owners to have $100 to spend.

Mr. McCARTHY. Mr. President, will the Senator from California yield briefly to me, to permit me to ask a question?

Mr. KUCHEL. Mr. President, if the Senator from Minnesota will wait a minute, I wish to see whether I have time in which to yield to him.

The Senator from Kansas, who is on my side of this issue, has asked that I yield to him; and I now do so. If time permits, I'll yield briefly a bit later.

Mr. CARLSON. Mr. President, as a member of the Finance Committee, in 1954, when we wrote into the tax laws this credit or exemption in the case of income received from dividends, I felt—at that time—that the exemption would encourage our citizens to invest in corporations.

Since that time, great progress has been made. In 1952, there were 6,490,000 individual shareowners in the United States. In 1956, there were 8,630,000. In 1959, there were 12,490,000; and I assume that at the present time at least 13 million of the American people have share ownership or other ownership in our corporations, which are doing a great deal to provide a strong economy and to provide employment for our workers.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD a table which shows those statistics.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

SHAREOWNERS IN PUBLIC CORPORATIONS

The number of individuals owning stock of publicly held corporations totaled an estimated 12,490,000 in 1959. This was an increase of approximately 3,860,000 or 45 percent since 1956; and nearly double the 1952 total of 6,490,000.

Number of individual shareowners:

1952	6,490,000
1956	8,630,000
1959	12,490,000

Source: New York Stock Exchange Fact Book, 1960.

The median household income of American stockholders has risen to $7,000 from $6,200 in 1956.

The following table, taken from the New York Stock Exchange, "Share Ownership in America: 1959," compares total shareowners of public corporations by income for the years 1959 and 1956. It can be seen that approximately 75 percent of the shareholders of public corporations have incomes less than $10,000.

Reported household income [1]	Individual shareowners				Total population by income, 1959	Percent of each income group who are shareowners	
	1959		1956				
	Number	Percent of total	Number	Percent of total		1959	1956
Under $3,000	1,106,000	9.0	983,000	11.6	43,871,000	2.5	2.1
$3,000 to $5,000	2,469,000	20.1	2,212,000	26.1	44,218,000	5.6	4.5
$5,000 to $7,500	3,145,000	25.6	2,243,000	26.4	50,807,000	6.2	5.6
$7,500 to $10,000	2,776,000	22.6	3,042,000	−35.9	19,769,000	14.0	12.2
$10,000 to $15,000	1,769,000	14.4			11,271,000	15.7	
$15,000 to $25,000	700,000	5.7			2,601,000	26.9	
$25,000 and over	319,000	2.6			867,000	36.8

Housewives and nonemployed adult females	32.0
Nonemployed adult males (including retired persons)	6.7
Total	100.0

[1] Less than ½ of 1 percent.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. KUCHEL. Mr. President, how much time remains available to those who oppose the amendment?

The PRESIDING OFFICER. Three minutes.

Mr. KUCHEL. Mr. President, let me ask whether any Senator desires to speak at this time in opposition to the amendment.

If not, I yield myself 1 minute, which I yield to the Senator from Minnesota so that he may propound a question.

Mr. McCARTHY. The question has to do with the vote the Senator from California cast a few minutes ago in support of the excise tax. Since, in his most recent remarks, he has said he cannot really see any moral justification for double taxation, I am sure he realizes that the tax which is paid as a sales tax is on income on which one has already paid an income tax. So if the pending amendment is said to involve a moral issue, why should not the same be said of the sales tax? Our whole tax system is full of double taxation; and certainly we should not regard one such tax as raising a moral issue, but the other as not a moral issue.

Mr. KUCHEL. Of course, different jurisdictions impose the tax to which the Senator from Minnesota has referred. When a State or local government adopts a sales tax, it cannot be contended that the Federal Government is doing so.

Mr. McCARTHY. But I do not think the Senator from California should attempt to make a moral issue out of it.

Mr. KUCHEL. Mr. President, I agree that we are now dealing with fiscal problems about which, I regret to say, my friend, the Senator from Minnesota, and I have some differences of opinion. But I do not believe there is any justification of any kind for two income tax bites by the Federal Government out of the same dollar of profit.

Mr. McCARTHY. Mr. President——

The PRESIDING OFFICER. No time remains for those who favor the amendment. Only 1 minute remains for those who are in opposition to the amendment.

Mr. KUCHEL. Mr. President, I yield I minute to the able senior Senator from Colorado [Mr. ALLOTT].

The PRESIDING OFFICER. The Senator from Colorado is recognized for 1 minute.

Mr. ALLOTT. Mr. President, for many, many years I have been convinced that the dividend credit is a laudable and just part of our fiscal system. If two people are doing business, alongside one another, one as an individual, and the other as a corporation, the one who receives profits from the corporation by way of dividend payments, pays not only the 52 percent corporate tax, but also an individual income tax on those dividends. All my life I have felt that was an unjust burden.

Last year I was persuaded by some of my friends that the other situation was true, but I have come back to my original position, and shall maintain it; namely, that this is double taxation, and until we find some way of equalizing it, despite what the Supreme Court has said, I shall continue to vote for the dividend tax credit.

The PRESIDING OFFICER. All time on the amendment has expired.

Mr. McCARTHY and Mr. JOHNSON of Texas asked for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Minnesota. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from Mississippi [Mr. EASTLAND], the Senator from Rhode Island [Mr. GREEN], the Senator from Indiana [Mr. HARTKE], the Senator from Arizona [Mr. HAYDEN], the Senator from Oklahoma [Mr. KERR], the Senator from Washington [Mr. MAGNUSON], the Senator from Michigan [Mr. McNAMARA], the Senator from Montana [Mr. MURRAY], the Senator from Georgia [Mr. RUSSELL], the Senator from Alabama [Mr. SPARKMAN] are absent on official business.

The Senator from Minnesota [Mr. HUMPHREY], the Senator from Tennessee [Mr. KEFAUVER], and the Senator from Massachusetts [Mr. KENNEDY] are necessarily absent.

The Senator from Missouri [Mr. HENNINGS] is absent because of illness.

I further announce that if present and voting, the Senator from Indiana [Mr. HARTKE], the Senator from Missouri [Mr. HENNINGS], the Senator from Minnesota [Mr. HUMPHREY], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Washington [Mr. MAGNUSON], the Senator from Michigan [Mr. McNAMARA], the Senator from Montana [Mr. MURRAY], and the Senator from Alabama [Mr. SPARKMAN] would each vote "yea."

I further announce that if present and voting, the Senator from Mississippi [Mr. EASTLAND] would vote "nay."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] and the Senator from Arizona [Mr. GOLDWATER] are necessarily absent.

The Senator from Maryland [Mr. BEALL], is detained on official business.

If present and voting, the Senator from Maryland [Mr. BEALL], and the Senator from Arizona [Mr. GOLDWATER] would each vote "nay."

The result was announced—yeas 42, nays 41, as follows:

[No. 239]

YEAS—42

Anderson	Frear	Mansfield
Bartlett	Fulbright	Monroney
Bible	Gore	Morse
Byrd, W. Va.	Gruening	Moss

Eastland	Humphrey	Murray
Goldwater	Kefauver	Russell
Green	Kennedy	Sparkman
Hartke	Kerr	

So Mr. McCARTHY's amendment was agreed to.

Mr. McCARTHY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GORE. Mr. President, I move to lay that motion on the table.

The PRESIDING OFFICER (Mr. Moss in the chair). The question is on agreeing to the motion to lay on the table the motion to reconsider.

The motion to lay on the table was agreed to.

Mr. JOHNSON of Texas. Mr. President, I am informed that there is likely to be another vote in a very few minutes, and I hope Senators will remain in their seats.

Mr. GORE. Mr. President, I call up for consideration an amendment designated 6-17-60—C, and ask unanimous consent that the Senator from Delaware [Mr. WILLIAMS] be listed as a cosponsor.

The PRESIDING OFFICER. Without objection, that will be the order.

Mr. LAUSCHE. Mr. President, I should like to join in the request to have my name listed as a cosponsor.

The PRESIDING OFFICER. The amendment of the Senator from Tennessee will be stated.

The LEGISLATIVE CLERK. At the end of the bill it is proposed to insert the following new title and sections:

TITLE III—ADDITIONAL PROVISIONS

SEC. 301. Depletion rate for certain clays and treatment processes considered as mining for computing percentage depletion in the case of minerals and ores.

(a) DEPLETION RATE FOR CERTAIN CLAYS.—Subsection (b) of section 613 (relating to percentage depletion rates) is amended as follows:

(1) Paragraph (3) is amended to read as follows:

"(3) 15 percent—

"(A) metal mines (if paragraph (2)(B) does not apply), rock asphalt, and vermiculite; and

"(B) if paragraph (5)(B) does not apply, ball clay, bentonite, china clay, sagger clay, and clay used or sold for use for purposes dependent on its refractory properties."

(2) Paragraph (5) is amended to read as follows:

"(5) 5 percent—

"(A) gravel, mollusk shells (including clam shells and oyster shells), peat, pumice, sand, scoria, shale, and stone, except stone described in paragraph (6);

"(B) clay used, or sold for use, in the manufacture of building or paving brick, drainage and roofing tile, sewer pipe, flower pots, and kindred products; and

"(C) if from brine wells—bromine, calcium chloride, and magnesium chloride."

(3) Paragraph (6) is amended by striking "refractory and fire clay,".

(b) TREATMENT PROCESSES CONSIDERED AS MINING.—Subsection (c) of section 613 (relating to the definition of gross income from property) is amended as follows:

(1) Paragraph (2) is amended to read as follows:

"(2) MINING.—The term 'mining' means the extraction of the ores or minerals from the ground, the treatment processes considered as mining described in paragraphs (3) and (4), and so much of the transportation of ores or minerals (whether or not by common carrier) from the point of extraction from the ground to the plants or mills in which such treatment processes are applied thereto as is not in excess of 50 miles unless the Secretary or his delegate finds that the physical and other requirements are such that the ore or mineral must be transported to a greater distance to such plant or mills."

(2) Paragraph (3) is redesignated paragraph (5).

(3) Paragraph (4) is deleted and the following paragraphs are inserted in lieu thereof:

"(3) TREATMENT PROCESSES CONSIDERED AS MINING.—The following treatment processes where applied by the mine owner or operator with respect to the minerals or ores extracted from the ground by him shall be considered as 'mining':

"(A) In the case of coal—cleaning, breaking, sizing, dust allaying, treating to prevent freezing, and loading for shipment;

"(B) In the case of sulfur recovered by the Frasch process—pumping to vats, cooling, breaking, and loading for shipment;

"(C) In the case of all other minerals or ores—(i) where applied to crude minerals or ores—crushing, grinding, sorting, screening, washing, and drying to remove free moisture; (ii) beneficiation by concentration, and the processes necessary thereto; (iii) beneficiation by cyanidation, leaching, crystallization, or precipitation, and the processes necessary thereto; (iv) any additional process, if necessary, to bring the mineral or ore to form and condition suitable for shipment; and (v) loading for shipment. For purposes of this subparagraph, the term 'beneficiation by concentration' means the application of processes solely for the purpose of eliminating waste, or separating the mineral or ore from other minerals or ores, by gravity, flotation, amalgamation, electrostatic means, magnetic means, or substantially equivalent processes. The processes referred to in (iv) are those processes which are necessary to bring the mineral or ore to the physical form and condition in which it is capable of being transported as distinguished from those processes applied to make the mineral or ore salable. The term 'loading for shipment' shall not include the cost of packaging unless otherwise provided for under (iv), nor shall it include the cost of containers, bags, or any similar items;

"(D) The pulverization of talc, the burning of magnesite, the furnacing of quicksilver ores, and the sintering and nodulizing of phosphate rock.

"(4) TREATMENT PROCESSES NOT CONSIDERED AS MINING.—The following treatment processes shall not be considered as 'mining':

"(A) In the case of all minerals or ores—electrolytic deposition, roasting, calcining, thermal or electric smelting, refining, polishing, fine pulverization, blending with other materials, treatment effecting a chemical change, thermal action, and molding or shaping, unless such processes are otherwise provided for in paragraph (3); and

"(B) Notwithstanding any other provisions of this subsection, any treatment process which follows a process that is not considered as 'mining' will not be considered as mining for the purpose of this subsection."

SEC. 302. Effective date.

The amendment made by section 301 shall be applicable only with respect to taxable years beginning after December 31, 1960.

Mr. MORSE. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. There is a request for the yeas and nays.

Mr. JOHNSON of Texas. Mr. President, I hope that the Senator will not request the yeas and nays. After the Senator from Tennessee has made a brief statement, if it is desired, they can be ordered at that time.

Mr. LONG of Louisiana. Mr. President, I suggest that the yeas and nays be ordered now. A few days ago there was a rollcall vote on a motion to table an amendment on the same subject to which the present amendment refers. The result will be completely misleading. Senators should know and take responsibility for what they are doing. This is one Senator who will not attempt to shirk responsibility. It seems to me Senators ought to be willing to have a rollcall vote. I have never asked not to have a rollcall vote when Senators wished their votes recorded. I ask for the yeas and nays.

The yeas and nays were not ordered.

Mr. GORE. Mr. President, the senior Senator from Ohio [Mr. LAUSCHE] wishes to be recorded as a cosponsor of the amendment. The senior Senator from Illinois [Mr. DOUGLAS] also wishes to be listed as a cosponsor, and I ask unanimous consent that they be so listed.

The PRESIDING OFFICER. Without objection, it is so ordered. Their names will be entered as cosponsors.

Mr. GORE. The junior Senator from Rhode Island [Mr. PASTORE] also wishes to be listed as a cosponsor.

The PRESIDING OFFICER. Without objection, his name will be entered.

Mr. GORE. Mr. President, I imposed upon the time of the Senate Saturday to discuss this very technical subject at great length. Therefore, I shall speak for only one moment, and then, so far as I am concerned, I am prepared to vote.

This amendment is identical with the amendment which I presented on Saturday as an amendment to the committee amendment. A number of Senators, some of whom are now cosponsors of that amendment, did not wish to vote for it as an amendment to the committee amendment, but are prepared to vote for it as an amendment to the bill. Senators can look in the RECORD and read the discussion. Therefore, I have no desire to debate further. I am ready for a vote.

Mr. DOUGLAS. Mr. President, I ask for the yeas and nays.

Mr. JOHNSON of Texas. Mr. President, the Senate can always order the yeas and nays for a particular vote. I suggest that the Senator withdraw his request momentarily. Let us wait until we are about to vote. Other Senators wish to speak on the subject.

Mr. President, on Saturday when this matter was discussed I followed with great interest and attention the argument advanced by the junior Senator from Tennessee. On several previous occasions the distinguished Secretary of the Treasury had in writing and orally explained to me that in his view such an amendment as is proposed would be desirable.

In view of the statement made by the distinguished ranking minority member of the committee and the subsequent ruling of the Chair, namely, that the Gore amendment, if adopted, would restore approximately $50 million in revenues to the bill, but would take out some $700 million, I felt, after discussing the situation with the Senator from Tennessee that the better part of wisdom would be for him to offer his amendment as he is doing today.

I cannot conceive of any substantial opposition to his amendment. As early as 11 o'clock this morning I reviewed this amendment with the Secretary of the Treasury, and he said in effect that unless the Supreme Court dealt with the situation completely in the cases it is now considering, it would be necessary for Congress to act.

I talked with the Senator from Tennessee, and I believe we, together with the minority leader, are in agreement that we should adopt the amendment. If its provisions are adequately covered by the Court's decision, then we have lost nothing. We could improve it or amend it or eliminate it in conference. If the Court does not uphold the Government, then it not only would be very desirable, but also most of those who have studied the subject think it is very essential that language of this type be in the bill.

I hope that the minority leader and the distinguished minority member of the Finance Committee, the ranking member, and the committee chairman will agree with the views I have expressed and will support the admendment.

Mr. DIRKSEN. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield.

Mr. DIRKSEN. Mr. President, I was present at the conference this morning with the Secretary of the Treasury, and I concur in what the majority leader has said. There is some reason to believe that the Supreme Court may this week hand down its decision involving this subject, and therefore I think the conferees ought to be left quite free and their hands should not be tied by a hard and fast vote. Certainly our conferees would not be obdurate. The ranking Republican, the distinguished Senator from Delaware [Mr. WILLIAMS] will be our principal conferee from this side. It has

been his hope that perhaps the amendment could be taken to conference without a yea-or-nay vote. That would improve the situation, for one thing, and leave the conferees in a position to deal with the subject after they have ascertained what the Court will do.

I think there is some merit in the amendment, and for that reason I hope that the Senate will agree to it.

I believe the chairman of the Finance Committee, the distinguished Senator from Virginia [Mr. BYRD] wishes to make some remarks at this time.

Mr. WILLIAMS of Delaware. Mr. President——

The PRESIDING OFFICER. The Senator from Delaware is recognized.

Mr. WILLIAMS of Delaware. I yield to the chairman of the committee.

Mr. BYRD of Virginia. Mr. President, I had hoped that the bill could be passed without amendments by reason of the fact that if it is not enacted by midnight on June 30, the debt will have exceeded the limit fixed by law.

Also a considerable number of excise taxes will have expired. But in view of the peculiar conditions with respect to the pending amendment, I, as chairman of the committee, after consulting with all the members whom I could reach, am willing to take the amendment to conference, and as chairman of the committee and as a conferee I will endeavor to do all I can to induce the House to agree to the amendment.

Mr. JOHNSON of Texas. As I understand, the distinguished chairman of the committee favors the amendment.

Mr. WILLIAMS of Delaware. I am joining the Senator from Tennessee in offering the amendment. I think that this is a most worthwhile amendment, and, as I told him Saturday, I strongly support the position he takes.

We have discussed the amendment with the Treasury Department and the language of the amendment has been recommended to the Congress by the Treasury Department. However, there is a court case pending which conceivably the Government might win in the next few days, in which event the necessity for some of the provisions of the amendment will have been eliminated.

However, if the court decision goes against the Government, or if a decision is not rendered, it will then be imperative that Congress take some action before adjournment, because in the absence of taking any action we could lose millions of dollars. The Treasury has estimated the amount involved to be $400 to $500 million should it lose its court case.

Already the recovery of $50 million is involved in the amendment. I am joining in the offering of the amendment, and I believe it should be approved by the Senate. As one of the conferees I can assure Senators that taking the amendment to conference would not be an idle gesture. Accepting the amendment and sending it to conference is not a gesture merely to get rid of the amendment on the floor. The Senator from Tennessee knows that I have cosponsored similar legislation in the past and that I am strongly in favor of the proposal. I feel very strongly that we must deal with this subject before we adjourn. One glaring example was pointed out by the Senator from Tennessee the other day. That example had to do with tile. Tile is made from clay which costs $1.50 to $2 a ton. The depletion allowance ranges from 5 to 15 percent on the clay. The depletion allowance was intended to be taken on the original clay. However, other interpretations have come up within the last few months. It is now claimed that clay has no resale value and that depletion allowance should be computed on the value of the finished product. That means that if the court decision goes against the Government the depletion allowance will be based on a finished cost of over $20, when the clay does not cost more than $1.50 to start with. As a representative of the Treasury has pointed out, if this interpretation is allowed to stand it will be cheaper for the Government to buy the clay and give it to the companies outright than to grant them a depletion allowance. That is a ridiculous situation. They will then be collecting $4 depletion on a product that cost only $1.50.

It makes no difference to me whether we have a yea and nay vote. The amendment should be overwhelmingly agreed to. The Senate should certainly adopt the amendment and stand by it in conference in the absence of the Government winning a favorable court decision.

Mr. SCOTT. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. SCOTT. When the amendment was considered previously I opposed it because it was joined to another provision and I did not think it should be brought up in that way, in tandem fashion. Now that the amendment appears on its own merits, I should like to have the RECORD show that I am glad to support the amendment.

Mr. WILLIAMS of Delaware. I know that this is the position of the Senator from Pennsylvania, and I agree that we should overwhelmingly adopt the amendment. I voted against the amendment on Saturday for the same reasons that other Senators did; namely, it covered too many other subjects.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. MORSE. I wish to correct the majority leader and the minority leader with regard to the procedural matter involved in the pending amendment. I agree with the Senator from Illinois [Mr. DOUGLAS] and other Senators who are seeking a yea-and-nay vote on the amendment. The other day there existed an entirely different parliamentary situation. This is a matter which has been of great concern to many of us for quite some time. I wish to point out that we are doing very well in the closing days of this session in regard to the matter of unanimous-consent agreements to limit debate.

One of the reasons why some of us hesitate to grant limitations on debate on various matters is that we know that we weaken our parliamentary position by such agreements if the Senate takes the position of denying, for example, the right to a yea-and-nay vote. I hope that in view of the very strong feeling some of us hold with regard to this matter and our desire to have a record vote, we will be accommodated by being allowed to have a yea-and-nay vote on the amendment. If we are to get to the situation where accommodation is going to be a one-way street, we will face up to it in the remaining days of the session.

Mr. KEATING. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. KEATING. I am glad that the ranking minority member of the committee has expressed his support of the amendment. A rather peculiar situation existed on Saturday. I realized that if we passed a standby law with respect to taking off the general telephone tax, I should support the Gore amendment on Saturday. The Senator from Tennessee, in my opinion, has made a very strong and persuasive case. I join him in the hope that it will be adopted by an overwhelming vote, in order that when we go to conference we will be able to sustain our position.

Mr. GORE. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. GORE. I ask unanimous consent that the following Senators may be listed as additional cosponsors of the amendment: Senators AIKEN, MORSE, SMATHERS, CHURCH, and LUSK. I ask unanimous consent that other Senators who may so request within the next hour be also listed as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield.

Mr. WILLIAMS of Delaware. I yield.

Mr. JOHNSON of Texas. First, the matter of a unanimous-consent agreement is not a personal matter so far as the Senator from Texas is concerned. It provides machinery to the Senate whereby Senators are on notice on a vote. I have not the slightest objection to a yea and nay vote if Senators feel that by a rollcall they can be more successful in conference than without one. Third, the chairman has wholeheartedly accepted the amendment, and so has the ranking minority member of the committee, and I believe that feeling is shared by other Senators who will be conferees. I am told that the language may need to be adjusted in accordance with what the Supreme Court may hold while the bill is in conference. If it pleases Senators to have a rollcall vote to send the amendment to conference, and if they feel that with a rollcall vote they can get better action out of the honorable men who compose the conference than without one, I will be the first to ask for the yeas and nays.

I do not agree that that is the way to proceed. I believe we can take the word of the chairman of the Committee on Finance and the word of the ranking minority member and of the other members of the conference committee on the amendment, and that they have the same objective the Senator from Tennessee has. However, if any strategists feel that they would be helped by a yea-and-nay vote, I shall not oppose it. I

wish the RECORD to show that the chairman of the committee and the ranking minority member heartily favor the amendment as now drawn. There was a difference of opinion last Saturday as finally ruled upon by the Parliamentarian, on the effect of the amendment.

Mr. GORE. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. GORE. I wish to take one-half minute to say that things have come to a sad pass in Congress when a committee of the other House reaches a resolution that it will accept no amendment to a bill and then advises the Senate, a coequal House of Congress, of that fact. The Senate is demonstrating its overwhelming sentiment that the bill should be amended. I think it is an insult to the Senate for a committee of the other body to serve notice upon us that they have reached a resolution that they will not accept any amendments. If a Senator wishes to ask for the yeas and nays, I am ready to vote and let the House and the country know the will of the Senate.

Mr. WILLIAMS of Delaware. The amendment should be accepted on its merits. I am hoping that the House will be in a receptive mood when we bring the amendment to conference. I was one who joined the Senator from Tennessee in sponsoring the amendment to the bill today.

Mr. DIRKSEN. Mr. President, insofar as I can ascertain, there is no objection on this side to the amendment. Speaking for myself, it is immaterial whether we have the yeas and nays.

Mr. WILLIAMS of Delaware. I shall be glad to have the yeas and nays.

Mr. DIRKSEN. I am prepared to hold up my hand.

Mr. MORSE. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Tennessee. The yeas and nays have been ordered, and the clerk will call the roll.

The Chief Clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from Mississippi [Mr. EASTLAND], the Senator from Rhode Island [Mr. GREEN], the Senator from Indiana [Mr. HARTKE], the Senator from Washington [Mr. MAGNUSON], the Senator from Michigan [Mr. MCNAMARA], the Senator from Wyoming [Mr. O'MAHONEY], the Senator from Alabama [Mr. SPARKMAN], are absent on official business.

The Senator from Minnesota [Mr. HUMPHREY] and the Senator from Tennessee [Mr. KEFAUVER] are necessarily absent.

The Senator from Missouri [Mr. HENNINGS] is absent because of illness.

I further announce that if present and voting the Senator from Mississippi [Mr. EASTLAND], the Senator from Indiana [Mr. HARTKE], the Senator from Missouri [Mr. HENNINGS], the Senator from Minnesota [Mr. HUMPHREY], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Washington [Mr. MAGNUSON], the Senator from Michigan [Mr. MCNAMARA], the Senator from Wyoming [Mr. O'MAHONEY], the Senator from Alabama [Mr. SPARKMAN] would each vote "yea."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] and the Senator from Arizona [Mr. GOLDWATER] are necessarily absent.

The Senator from Maryland [Mr. BEALL] is detained on official business.

If present and voting, the Senator from Maryland [Mr. BEALL] and the Senator from Arizona [Mr. GOLDWATER] would each vote "yea."

The result was announced—yeas 87, nays 0, as follows:

[No. 240]

So Mr. GORE's amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. CHURCH. Mr. President, I desire to have the RECORD show my reasons for voting against all amendments to the pending bill which would have the effect of reducing revenue to the Government.

During the past week, the Senate has taken actions with respect to appropriations for national defense, for medical research, and for increased government salaries, which would add between $2 and $3 billion to the Government's costs in the coming fiscal year. The consequence of these actions is that the budget will be balanced precariously at best, but only if no action is taken to reduce Federal revenue.

In the past, I have voted against the emergency taxes on telephone service and on the transportation of freight and persons. I think these are an undesirable part of our permanent tax structure, and I shall again vote to eliminate them at the earliest reasonable opportunity. I believe, however, that there is a more urgent need at the present time to maintain the fiscal integrity of the Government. I cannot, in good conscience, vote to reduce government revenue at a time when expenditures are rising to the point where it is reasonable to suppose that a balanced budget is being placed in jeopardy.

Mr. KEATING. Mr. President, on behalf of myself and my colleague from New York [Mr. JAVITS], I offer an amendment and ask that it be read.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. At the end of the bill it is proposed to add the following new section:

SEC. —. Credit against general telephone tax

(a) CREDIT AGAINST TAX.—Subchapter B of chapter 33 of the Internal Revenue Code of 1954 (relating to tax on communications) is amended by adding at the end thereof the following new section:

"SEC. 4255. Credit for certain State and local taxes

"(a) IN GENERAL.—There shall be allowed to the taxpayer, as a credit against the tax imposed by section 4251 on amounts paid for general telephone service rendered during any period, an amount equal to so much of the State or local taxes on general telephone service rendered to such taxpayer during such period as does not exceed an amount equal to 40 percent of the tax imposed by section 4251 for such period (determined without regard to this section).

"(b) REGULATIONS.—The Secretary or his delegate shall prescribe such regulations as may be necessary or appropriate to carry out this section."

(b) TECHNICAL AMENDMENT.—The table of sections for such subchapter B is amended by adding at the end thereof the following new item:

"SEC. 4255. Credit for certain State and local taxes."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply only with respect to amounts paid on or after the first day of the month following the month in which this Act is enacted for services rendered on or after such first day; except that such amendments (1) shall not apply with respect to amounts paid pursuant to bills rendered before such first day, and (2) shall apply in the case of amounts paid pursuant to bills rendered on or after such first day for services rendered prior to such first day for which no previous bill was rendered.

Mr. KEATING. Mr. President, the amendment may sound rather formidable; but the situation is relatively simple, and I shall try to explain it in simple terms.

As has been said, New York State has passed standby legislation which would pick up the general telephone tax on local calls if the Federal Government surrenders it. I believe that one or two other States have done likewise. I know a number of other States have contemplated such action.

This proposal would not effectuate a total surrender of the general telephone tax on local calls. Furthermore, it would be in conformity with the recommendation of the President's Joint Federal-State Action Committee. Let me read certain relevant sections of the committee's report.

The Joint Federal-State Action Committee believes that the local telephone service tax is a logical revenue source for State and local governments. It recommends, therefore, that the Federal tax on local telephone service be changed so as to provide a 40-percent tax credit to those States enacting a 4-percent local telephone tax. This would mean that the Federal liability under the local telephone service tax would be discharged to the extent of 40 percent for any

taxpayer paying this amount of tax to his State government.

The Joint Federal-State Action Committee recommends that—

1. The President request Congress to take necessary action to provide up to a 40-percent Federal tax credit against the Federal local telephone service tax for States enacting or increasing such taxes.

2. The Governors and the legislatures of the several States take necessary steps to avail themselves of this additional revenue source.

The Federal tax on general telephone service is now levied at 10 percent; and this afternoon that action has been sustained by the Senate.

Our amendment would reduce this tax to 6 percent for taxpayers who reside in States or localities which levy on general telephone service a 4 percent tax to be used for State and local purposes.

The list of members of the Federal-State Action Committee which made that recommendation unanimously is most impressive. Twelve of the members are appointed by the President, from the Administration; and that group is headed, as cochairman, by the distinguished Secretary of the Treasury, Robert B. Anderson. The group also includes Secretary of Labor Mitchell; former Secretary of Health, Education, and Welfare, Marion B. Folsom; Percival F. Brundage, the then Director of the Bureau of the Budget; Meyer Kestnbaum, Special Assistant to the President; John S. Bragdon; and Howard Pyle. They had a distinguished group of consultants.

Among the Governors who served on the Federal-State Action Committee were Governor Dwinell, of New Hampshire; Governor Anderson, of Nebraska; Governor Coleman, of Mississippi; Governor Daniel, of Texas; Governor Docking, of Kansas; Governor Leader, of Pennsylvania; Governor McKeldin, of Maryland; Governor Roberts, of Rhode Island; Governor Smylie, of Idaho; and Governor Stratton, of Illinois.

It is true that this proposal pertains to New York's situation. I want to be completely frank about this matter. The Governor of New York has, for months, been advocating that the general telephone tax be levied by the States, for educational purposes. The New York Legislature has passed a law to do this when the Federal tax expires, and of course, this bill has been signed by the Governor.

Mr. President, we must make every effort to reevaluate the functions of the Federal Government and of the various States and localities. On the basis of this reevaluation we must then seek to reallocate to the States and local governments certain functions which should now come within their jurisdiction, but which now are partially completely carried out by the Federal Government.

New York State is not alone in this situation. It would be impossible to have the Congress adopt and enact into law this amendment if it applied only to the State of New York.

I believe that this amendment should appeal to all who feel that problems such as education are primarily the responsibility of the States and localities. Our amendment would enable States and localities, all States and all localities, to more effectively fulfill this very crucial governmental function.

Of course, our amendment would not apply to any State or locality until the appropriate legislative body enacted such legislation. Indeed, in view of the action taken already today by the Senate, it would now be necessary for the New York Legislature to pass new legislation, in order to obtain the benefit of this 40 percent credit toward the general telephone tax.

Under the New York law, these funds have been earmarked specifically for education. It seems to me that is especially significant; and I appeal to other Senators who feel, as I do, that education is primarily a local function, to support this amendment.

A Federal aid-to-education bill may well not be enacted this year. No one can deny that we need better schools, increased teachers' salaries, and more educational facilities.

The pending proposal would give to the States sources of tax revenue which would enable them to do the job themselves.

One final thought, Mr. President. I want to be realistic about the fiscal impact of our amendment. At the very most, if every one of the 50 States enacted legislation such as I have indicated, picking up 4 percent of this revenue—and so far none have, in that form—the revenue loss would be $135.2 million.

Furthermore, if these taxes were levied by the States, the revenues so derived would be used for purposes which would make it unnecessary for the States and the localities to call upon the Federal Government for aid in these fields.

I hope the Senate will seriously consider this amendment. I have discussed it with several members of the Finance Committee. I concede that, however, they are members who supported the proposal to eliminate this tax as a Federal tax completely.

This is not a new proposal. It is one which has been thought about and talked about for quite some time. In the light of the action we have just taken here, I believe it represents a realistic and sensible compromise on the issue which confronts us at the present time; namely, what to do about the general telephone tax on local calls. To my way of thinking, this tax is peculiarly appropriate to be levied by the localities for local purposes. This view was borne out unanimously by the Joint Federal-State Action Committee, which so carefully studied this entire problem.

Mr. BUSH. Mr. President, will the Senator yield?

Mr. KEATING. I yield.

Mr. BUSH. What part of the Federal tax on the telephone service on local charges would revert to the States, under the Senator's amendment?

Mr. KEATING. Forty percent.

Mr. BUSH. Forty percent of the tax?

Mr. KEATING. Forty percent of the tax, if all the States enacted legislation in compliance with the amendment. As of today, it would be zero; and my impression is that its impact in the coming fiscal year would be negligible. It probably would be zero. But it would establish a principle that is borne out by the Commission, which is that the tax on general local telephone service should be levied by the States.

Let me add another word before I yield further to the Senator. I simply gave the figure of $135 million in order to be frank in my statement about the overall possible cost of our amendment. It would have no impact at all at the present time. I cite this figure for the future.

Mr. BUSH. It would require that all of the States enact similar legislation; would it not?

Mr. KEATING. That is right.

Mr. BUSH. Why does the Senator's amendment contain the figure of 40 percent, rather than 30 percent or 50 percent?

Mr. KEATING. That is precisely the figure referred to by the Federal-State action committee. They say, "We recommend that the Federal tax on local telephone service be changed so as to provide a 40-percent tax credit for those States enacting a 4-percent telephone tax."

The committee did not act perfunctorily. As the Senator probably knows, it held long hearings on this problem. It went into the problem very fully. I feel confident that the Commission is able to determine what the appropriate amount should be, probably better than we are.

Mr. PROUTY. Mr. President, will the Senator yield?

Mr. KEATING. I yield.

Mr. PROUTY. If the Senator's amendment should be enacted, what funds out of the $135 million would go to New York State?

Mr. KEATING. It would not go to any State. The $135 million figure is the amount of the Federal telephone tax which would be yielded to all of the States.

Mr. PROUTY. I am assuming that all the States had enacted such legislation and that in total they would receive about $135 million.

Mr. KEATING. The statement that "they would receive" is not quite accurate.

Mr. PROUTY. The Federal Government would lose that amount.

Mr. KEATING. The Federal Government would lose that amount; yes.

Mr. PROUTY. How much of that $135 million would go to New York State?

Mr. KEATING. I am not able to answer the Senator's question. I assume it would depend upon the percentage of telephone users there were in New York as compared with the number in the country, and that figure I do not have at hand.

It would inure to the benefit of any taxpayer in a State which had enacted such legislation. The individual telephone user in Vermont would have the same credit on local calls that the individual telephone user in New York would have.

Mr. PROUTY. I understand that.

Mr. KEATING. I am not able to furnish the total amount.

Mr. President, in light of the fact that this amendment costs no money at all, but simply establishes a principle for the future, to the effect that telephone taxes are an appropriate item for local imposition in the future when the State legislatures enact appropriate legislation, I hope this amendment may appeal to the distinguished chairman of the Finance Committee, whose views regarding fiscal responsibility I admire and respect.

Mr. President, I reserve the remainder of my time.

Mr. BENNETT. Mr. President, is time controlled?

The PRESIDING OFFICER (Mr. McGEE in the chair). No.

Mr. BENNETT. Mr. President, I assume that my colleague from New York is basing his suggestion on the recommendations made by the so-called Action Committee of the Governors' Conference. I should like to point out one or two things that seem to be missing in the Senator's recommendation which were recommended by the Action Committee.

In his January 1958 and January 1959 budget messages, the President requested legislation to allow a tax credit against the Federal tax on local telephone service for telephone taxes paid to the States, and at the same time, without any question of whether they would take it after they got the tax, but as a simultaneous arrangement, to transfer to the States complete responsibility for vocational education and waste treatment construction grants from the Federal Government to the States. These recommendations were not adopted.

The President's telephone tax proposal had its origin in the mission he prescribed for the Joint Federal-State Action Committee in his June 1957 address to the Governors' Conference, which was "To designate functions which the States are ready and willing to assume and finance that are now performed and financed wholly or in part by the Federal Government," and "to recommend the Federal and State revenue adjustment required to enable the States to assume such functions."

In its first progress report of December 1957, the Action Committee recommended that the States take full administrative and financial responsibility for financing the vocational education grant program and the local waste treatment construction program in return for the transfer of 40 percent of the revenues from the Federal tax on local telephone service.

Later, in 1958, because there was some question as to whether the transfer of the portion of the tax would, in fact, supply enough money to take care of the vocational education and waste treatment construction grants, the Action Committee modified its proposal to limit the credit for taxes paid to States to 30 percent of the Federal tax and to apportion through Treasury grants revenue equivalent to an additional 10 percent of the Federal tax. The combined total of these two would have remained 40 percent of the telephone tax revenues, but it would have been required that each State's share of the telephone tax revenue should equal at least 140 percent of its present grants for vocational education and waste treatment construction.

I assume this was done to make sure that the States would be able to take over the responsibility for waste treatment and vocational education and still have some money left from the transfer of the Federal telephone tax money to them.

As I listened to my friend from New York, it seemed to me he suggested that if the telephone tax money were released to the States, the States could use it for education. The Senator talked about the needs for classrooms and the needs for teachers' salaries, but I did not hear him specifically refer to the recommendation of the Action Committee and relate the matter directly to vocational education and waste treatment construction grants. The Senator said nothing, so far as I could tell, about these grants. May I ask the Senator from New York if I correctly understood him?

Mr. KEATING. In part the Senator is correct. New York State has passed a law which provides that if the Federal Government gives up the general telephone tax on local calls the State will pick it up and use it for educational purposes. That standby legislation, so-called, would not now be effective, in the light of the action taken in the Senate.

Any action taken by any State would have to be in accordance with the proposal now made, which might be called in the nature of a compromise; namely, that 40 percent of the general telephone tax be turned over to the States for use. It is not inherent in the amendment that the States must use the money for pollution control or for vocational education. The purpose as to the use of the money by the States is not set forth in the amendment.

Mr. BENNETT. As the Senator from Utah understands it, this is to be a trade of tax revenues for acceptance of responsibilities, and two specific responsibilities are set forth. As I understand the President's proposal, if a State were to receive 40 percent of the Federal tax revenue from the telephone service the State would then give up any claim it had upon the Federal Government for funds to support vocational education or for funds as grants for the construction of waste treatment facilities. The Senator is not proposing to give up for New York any of the funds it now may claim under existing law for these two purposes, is he?

Mr. KEATING. Mr. President, will the Senator yield?

Mr. BENNETT. I yield.

Mr. KEATING. That is correct. However, I would have no objection to having the amendment modified to limit the credit to educational expenses. The legislation passed by the State of New York is in a field in which Federal responsibility exists or in which legislation has been or will shortly be enacted to establish a measure of Federal responsibility. Certainly there should be a quid pro quo.

I invite the Senator's attention to the fact that the New York statute does allocate the funds which would be obtained to a purpose—namely, education—as to which, as the Senator knows, there has been a strong call upon the Federal Government for aid and assistance. If all of the States did what New York has done in the field of education, we not only would not need Federal aid to education at all but, in addition, we would have no problem with respect to the control of education by the Federal Government, which is so troublesome an issue to many of those who wish to have better schools and who wish to pay better salaries to teachers, but who are disturbed by the possibility of Federal control over the processes of education.

Mr. BENNETT. Actually, the proposal would make it possible for New York to continue to receive the grant money for vocational education and for the waste disposal construction and, in addition, to receive 40 percent of the Federal telephone tax money, in exchange for saying to the Federal Government, "You may reduce the amount which the Federal Government might have to give New York in the future if the Government ever adopts a program of Federal aid to education."

I cannot believe, if the bill were passed with this language, that the State of New York would say, "Deduct the money we receive from 40 percent of the Federal telephone tax from our share of Federal aid to education if and when the program is adopted." It would be exchanging a very real value for "pie in the sky."

Mr. KEATING. Mr. President, will the Senator yield?

Mr. BENNETT. I yield.

Mr. KEATING. Because I have cited the case of New York I do not wish to have it understood that this would be limited to the State of New York. As I say, New York would have to pass new legislation in order to receive the benefit of this compromise proposal, as would any other State. Any State which passed such a law would be expected to shoulder some of the responsibilities which are shared with the Federal Government, if the State took the income from 40 percent of the Federal telephone tax.

Mr. BENNETT. Mr. President, the Action Committee on Joint Federal-State relationships recommended a specific relationship. The committee recommended an exchange of 40 percent of the Federal telephone tax in exchange for the assumption of full responsibility for the vocational education and for waste treatment construction grants. It seems to me this was the plain offer. Apparently, it was rejected by the Action Committee, eventually.

I do not think we should adopt a program piecemeal which either would move us into this field or would enable some States to say, "No. We cannot take over these two things because we have already committed the use of this released Federal telephone tax money to some other equally meritorious program."

I think we ought to have a nationwide and very specific exchange of values in

this case. Therefore, lacking the particular exchange, I fear I shall have to oppose the amendment of my friend from New York.

Mr. JAVITS. Mr. President, I join with my colleague from New York in support of the amendment. I think he has done very well to propose it, because I think the reason for his position and the position which I espouse with him is best shown by the fact that people who voted on different sides of the issue in respect to continuing the telephone tax can unite behind this amendment.

We are talking about the overall national security interest, and the question is, Where can this interest be best served? In the State or in the Nation? I do not think we should hearken back to the Kestnbaum report as the only proof to support this amendment. I think rather the national security test, the national interest test, is the proper one, although the Kestnbaum report indicates that this is the kind of tax in which a division between the State and the Federal Government is a logical recommendation.

I say the national security interest for this reason. I voted, for example, to sustain this tax in the hands of the Federal Government because the amount involved, which is estimated in the committee report for the full year of $450 million, and for 1961 $338 million, cannot be dispensed with under existing conditions. But I believe at the same time where responsibilities are carried by States which fit into the concept of the national interest or the national security interest, and the States will actually carry out those responsibilities and actually ask their residents to support those responsibilities, then I think the State has an excellent case for participation in the avails of the tax. In other words, I am not in favor of yielding the tax. It should go for the national security interest. But it should go either on the national or on the State level or a division between them. I think my colleague [Mr. KEATING] has come to a right division between them.

There are no hard, fast, and ironclad rules in respect of these tax matters. Every one of them must stand on its own two feet.

It might have been observed that I voted to eliminate the transportation tax a little while ago, though I voted to sustain the telephone tax. My reason for doing so is that the national security interest requires every effort we can make to fortify the national transportation system, and if this discourages, as it does, a utilization of the national transportation system, I would rather give them this little tax break that amounts to about $150 million for a full year than to vote them more subsidies, if it can be avoided.

I make that statement because I think my colleague [Mr. KEATING] has tried to cut this pie in an equitable and sensible way, especially in view of the experience of our State. It is a fact that the statute passed by the State legislature—which, incidentally, is bill Nos. 5418, 5538, introduced 4678, passed March 27, 1960—purported to be a standby law, providing that if the Federal telephone tax were repealed, the benefit of the tax would be given on a local election basis, as it were, to school districts which sought to take advantage of it for their particular areas.

Though that law would not be applicable to the situation which would prevail should this amendment carry, nevertheless it does show the intention of our State to utilize the telephone tax for a matter of the highest national security interest in the field of education. Therefore I think that the amendment, though it may not suit the law of New York right now, would suit New York, and we would have law to conform to it. It may safely be assumed that ours is one State which would take advantage of it.

In our State we have a tradition of standby law. Perhaps one of the most notable examples of such laws concerned rent control. When the Federal Government removed rent control, New York was among the very few, if not the only State, that had a standby rent control law, to the great satisfaction of its people, a law which Governor Dewey had the foresight to induce the legislature to put upon the books.

So, in the field we are discussing, Governor Rockefeller has induced our State legislature to put a statute upon the books which could be very helpful to New York if the majority of Congress believe that this tax should go off on the Federal level. I do not mean that I would attempt to convince Senators, as I see it, to vote to take it off. It depends upon the judgment of Senators as to whether they believe it ought to stay on or off in terms of the National Establishment.

So although I believe in terms of the National Establishment the tax ought to remain, I believe also that if a State will carry out a function uniquely within its own power, to wit, education, which makes a decisive contribution to the national security interest, the very purpose for which we retain this tax, then that State ought to be permitted to share in the avails of a tax for that purpose.

New York has shown its intention to do so, although its particular law will not actually have that result.

I do not think there can be any doubt about the purpose for which my own State would propose to use its own share of such a tax if it were made available. There is no single domestic reform, with the exception of equal opportunity for all without regard to race, creed or color, more urgent to the national security interest than a fortification of our educational system.

New York, as everybody knows, under Governor Rockefeller, when he first became Governor, imposed upon itself additional taxes, which is pretty unheard of in these days. The imposition of the taxes was an act of political courage, in order to try to do the best New York could do for its educational system.

I think it cannot be said that the people of New York are not first taxing themselves to the hilt before looking to other sources of revenue for this extremely desirable purpose in our national interest.

I think my colleague, the Senator from New York [Mr. KEATING] has done a fair thing in proposing the amendment. I am honored to join with him in it, based upon the findings of the Kestnbaum Commission, as to a fair division between the State and Federal Governments of a tax of this character, and at the same time his proposal carries out the spirit which dictated the findings. I am sure many Senators have feelings of concern in their own hearts as to whether this was exactly the right course to follow, but in any case the majority decided that at a time like this, the national security in their view required a continuation of this tax. I believe my colleague has shown us a way which, having asserted that principle, we could nonetheless make some of these funds available on a fair division basis which I have described for a purpose which is fundamental and essential to the whole national security interest, to wit, the purpose of education.

I do not think that our friend and colleague from Utah [Mr. BENNETT] has made a proper answer to the point made by my colleague, the Senator from New York [Mr. KEATING] by pointing out that in the Kestnbaum Commission's report the specific purpose of national education and pollution were referred to. I say that because I believe the important thing is the question of what conduces to the very purpose for which we are continuing this tax. I think what is in the minds and hearts of the majority here in continuing the tax is the overriding national security interest. I respectfully submit that the educational purpose which New York contemplates, and which we have every right to believe other States will continue, is very much more directly, as of this writing, related to the national security interest than would be even the specific uses referred to in the Kestnbaum report.

So I join with my colleague not only in word but in deed, and with great feeling on the subject, in putting forward this amendment. I hope that it may have the affirmative approval of the Senate.

Mr. ANDERSON. Mr. President, I speak with the authority of the chairman of the committee and ranking minority member of the Finance Committee in urging that the amendment be defeated. This is a serious amendment. If we take 40 percent of the telephone tax and divert it to States, $185 million is involved. Forty percent of various other types of taxes might then be diverted to States also.

The office of the Secretary of the Treasury has sufficient problems already without trying to add to them with this type of legislation. There may be a time when the general telephone tax will be dropped. If and when the general telephone tax is dropped, then the suggestion which was made a while ago of picking it up within the States and using it for certain purposes may then be timely.

I believe the Senator from Utah [Mr. BENNETT] made a very proper point in saying that the recommendations which

were quoted were recommendations made in exchange for something else.

The Treasury Department has responsibilities.

If it is relieved of this source of revenue, then certain other funds can be taken away from the Treasury Department that they have been using to meet those responsibilities. As long as the trade is not made, action cannot be taken unilaterally.

If we were suddenly to say, "We will give 40 percent of the telephone tax to the States ready to receive it," New York State may be the only State which has passed legislation in the field. I think it is not, but if it were the only State, and word went out that 40 percent of the telephone tax was going back to the State of New York, how long would it take legislators of other States to pass bills to receive 40 percent of the Federal taxes in their States, as well?

They could or could not, as they wished, under the amendment now before the Senate, make provision for any type of education. In fact, the amendment does not require them to spend one penny for education. They could use all the money for roads or schools or for the policing of highways, or on anything to which they may wish to devote it. To take 40 percent of the telephone tax and turn it over to the States would be a very difficult thing at the present time.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. ANDERSON. I yield.

Mr. JAVITS. I am grateful to the Senator for yielding, because he suggested to my mind a point I was going to make. I have no doubt that other States would take advantage of the opportunity if it were afforded. New York certainly would not be the only one to do so. The Senator said one other thing which I think is very important, that the law passed by the State of New York is by no means the main one, although it looks now as if we will continue the telephone tax in the national establishment for the overriding reasons which impel a majority of the Senate, including myself. This should be said in fairness, and I am glad the Senator, being on the other side, made the statement.

Mr. ANDERSON. I appreciate what the Senator has said. I agree with what the Senator from Utah has said, however, and I know I also express the feeling of the Senator from Delaware against the amendment, and the feeling also of the chairman of the committee.

Mr. CARLSON. Mr. President, will the Senator yield?

Mr. ANDERSON. I yield.

Mr. CARLSON. I believe that the adoption of the amendment would open a Pandora's box, and I shall certainly oppose it.

Mr. ANDERSON. I appreciate the Senator's statement.

Mr. WILLIAMS of Delaware. Mr. President, I join the Senator from New Mexico in opposing this amendment. It would have the effect of giving a tax reduction to perhaps only two or three States at this time. If we are to revise the tax laws we should revise them affirmatively across the board for taxpayers in all States, not just in certain areas. I hope the amendment will be defeated although I recognize the argument that has been made by the Senators from New York. I appreciate their position, but I cannot agree with them.

Mr. ANDERSON. I believe the conferees on the bill will have enough to do and enough problems to settle before the 30th of June without adding this very complicated amendment.

COLD WAR VICTIMS LEGISLATION

Mr. KEATING. Mr. President, as the legislative machine gets rolling in the fashion to which we sometimes become accustomed, and since this may be my only opportunity to do so, I should like to take a few minutes on a very vital subject.

Few Americans are aware of the number of incidents in which American servicemen have been lost as a result of cold war incidents. The Francis Powers case is a worldwide cause celebre, but there have been a number of other encounters with the Soviet bloc which have attracted no attention at all.

Recently I was furnished a list of 15 known cases in which U.S. planes have been shot down by Soviet bloc forces during the cold war. A total of 87 Air Force crewmen are dead or missing as a result of these incidents.

Instead of reading the list at this time, and taking the time of the Senate under the present circumstances, I ask unanimous consent to have printed in the RECORD at this point the list that I have referred to.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

1. Navy Privateer shot down in the Baltic Sea, April 8, 1950. Ten crew members missing.

2. Navy P–2V shot down by Soviet fighters off Vladivostok, November 6, 1951. Ten crew members missing.

3. USAF C–47 forced down by Soviet fighters near Papa, Hungary, November 18, 1951. Four crew members returned to U.S. custody.

4. USAF B–29 shot down by Soviet fighters off northern Japan, October 7, 1952. Eight crew members missing.

5. Navy P–2V shot down by Chicom AAA off Swatow, January 18, 1953. Seven crew members rescued, six missing.

6. USAF F–84 shot down by Czech MIG fighter near Sasselberg, Germany, March 10, 1953. Pilot returned to U.S. custody uninjured.

7. USAF RB–50 shot down by Soviet fighters off Cape Povorotny, July 29, 1953. One crew member survived, 16 missing.

8. Navy P–2V shot down by Soviet fighters over Sea of Japan, September 4, 1954. One crew member missing, nine rescued.

9. USAF B–29 shot down by Soviet fighters over Hokkaido, Japan, November 7, 1954. One crew member killed, 10 injured.

10. Navy P–2V shot down by Soviet fighters in Bering Strait, June 22, 1955. Aircraft landed in U.S. territory, crew remained in U.S. custody.

11. USA T–6 shot down near Korean demilitarized zone, August 19, 1955. One crew member killed, one injured and returned to U.S. custody.

12. Navy P–4M shot down by Chicom aircraft 32 miles east of Wenchow, August 22, 1956. Sixteen crew members missing.

13. USAF F–86 shot down over demilitarized zone in Korea by NK AAA. Pilot uninjured, returned to U.S. custody.

14. USAF C–118 shot down by Soviet fighters over Armenia, June 27, 1958. All nine crew members, including one injured, returned to U.S. custody.

15. USAF C–130 shot down by Soviet fighters in Soviet territory near Turkish border, September 2, 1958. Bodies of six crew members returned to U.S. custody, 11 others missing.

Mr. KEATING. Mr. President, these are known incidents. In recent months I have had correspondence with a constituent, Mrs. James N. Barker, of Bronxville, N.Y., which indicates that there may have been scores of other encounters of a similar nature in which the facts are not completely verifiable.

On October 2, 1959, Mrs. Barker's husband, 1st Lt. James N. Barker, stationed in Misawa, Japan, was assigned the mission of intercepting and identifying two tracks detected off the coast of Japan by American radar equipment. Within less than an hour, Lieutenant Barker sighted the unknown objects and reported them to be Soviet aircraft. Several other messages were exchanged between Lieutenant Barker and his home base but within a short time, radio and radar contact with him was lost. When communications could not be regained and upon a pickup of a short emergency signal, air rescue aircraft were dispatched to the area of his last known contact. An extensive air and sea search was conducted but no sign of Lieutenant Barker or his plane was ever detected, and he is officially presumed to be dead.

Mrs. Barker is now a widow with three small children. She has been left with practically no means of support for either herself or her little family.

My first concern in looking into this case was in connection with the possible introduction of a private bill for the relief of Lieutenant Barker's family. I know that the American people would be disappointed if they realized that the families of servicemen involved in such hazardous cold war missions were not provided any measure of security by the Government.

I am now convinced that the situation calls for general legislation. In my opinion the members of our Armed Forces involved in such incidents deserve the same treatment as was accorded the participants in World War II and the Korean conflict. These are brave men subject to the same type of risks and dangers as members of the Armed Forces during actual war. The cold war, which shows no sign of terminating in the foreseeable future, has placed many of our troops in the kind of jeopardy which was not anticipated when the special benefit programs for war-time veterans were allowed to lapse following the Korean conflict.

I intend to propose today legislation to deal with this new problem. My bill would extend to veterans who are injured outside the United States by hostile or warlike acts the major benefits now available to veterans of World War II and Korea. It would provide pension benefits for the widows and children of

servicemen injured or killed by such acts identical to those provided to widows and children of hot war veterans. It would extend to such veterans the vocational rehabilitation benefits afforded World War II and Korean conflict veterans. It would likewise extend to the children of such veterans who die of service-connected disabilities the same educational assistance provided children of World War II and Korean conflict veterans. It would provide the same assistance in obtaining an automobile to such veterans as was provided for veterans of World War II and the Korean conflict. Finally, it would make applicable to such veterans the exemption accorded to retired service personnel disabled in combat or during a period of war from the $10,000 limitation on retirement pay which would otherwise be applicable.

Mr. President, we must face up to this new aspect of the current international situation. While we have been technically at peace for several years, it is apparent that many American servicemen have had to engage in activities under warlike conditions. I believe that we have unwittingly neglected to accord these courageous men and their dependents the same benefits and protections which we so willingly bestowed on their comrades who were exposed to similar risks during periods of official war.

Therefore, I introduce for appropriate reference a bill to provide certain benefits for members of the Armed Forces killed or wounded in disturbances other than a state of war. I ask unanimous consent that the text of the bill be printed at the conclusion of my remarks.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 3705) to amend title 38, United States Code, to provide certain benefits for members of the Armed Forces killed or wounded in disturbances other than a state of war, introduced by Mr. KEATING, was received, read twice by its title, referred to the Committee on Finance, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That title 38, United States Code, is amended as follows:

(1) Section 101 is amended by adding the following at the end thereof:

"(28) The term 'apparent hostile act' means an encounter, assault, or other act of a warlike nature committed on or after December 7, 1941, outside the United States involving a member of the active military, naval, or air service in his capacity as a member of the Armed Forces of the United States:

(2) Section 541 is amended—

(A) by inserting the following in subsection (a) before the word "pension": "and to the widow of each veteran who suffered an injury in the line of duty as the result of an apparent hostile act,";

(B) by inserting the following in subsection (e)(1) before the semicolon after the words "Korean conflict veteran": ", or (D) prior to the expiration of ten years after his separation or release from service in the case of a widow of a veteran who suffered an injury in the line of duty as the result of an apparent hostile act"; and

(C) by amending the catchline to read as follows:

"§ 541. Widows of World War I, World War II, or Korean conflict veterans, or of veterans injured by an apparent hostile act".

(3) Section 542 is amended—

(A) by inserting the following in subsection (a) before the words "pension at the monthly rate": "and to the child or children of each deceased veterans who suffered an injury in the line of duty as the result of an apparent hostile act,"; and

(B) by amending the catchline to read as follows:

"§ 542. Children of World War I, World War II, or Korean conflict veterans, or of veterans injured by an apparent hostile act".

(4) The analysis of chapter 15 is amended by striking out the following items:

"541. Widows of World War I, World War II, or Korean conflict veterans.

"542. Children of World War I, World War II, or Korean conflict veterans."

and inserting the following items in place thereof:

"541. Widows of World War I, World War II, or Korean conflict veterans, or of veterans injured by an apparent hostile act.

"542. Children of World War I, World War II, or Korean conflict veterans, or of veterans injured by an apparent hostile act."

(5) The subtitle in subchapter III of chapter 15 preceding section 541 is amended to read as follows:

"WORLD WAR I, WORLD WAR II, KOREAN CONFLICT, AND VETERANS INJURED BY AN APPARENT HOSTILE ACT".

(6) Section 1502 is amended—

(A) by inserting the following in subsection (a) before the words "which is, or": ", and every veteran who has a service-connected disability resulting from an injury incurred in the line of duty as the result of an apparent hostile act,"; (B) by striking out the last sentence of subsection (c)(2) and inserting the following in place thereof:

"(3) Vocational rehabilitation may not be afforded a veteran on account of a service-connected disability resulting from an injury incurred in the line of duty as the result of an apparent hostile act after nine years following his discharge or release from the period of service in which such injury occurred.

"(4) Notwithstanding the provisions of paragraphs (2) and (3) of this subsection, where a veteran is prevented from entering, or having entered, from completing vocational rehabilitation training, because of one of the reasons set forth in subparagraphs (A) through (C) of paragraph (1), such training may be afforded him during a period of not to exceed four years beyond the period otherwise applicable to him.";

(C) paragraph (3) of subsection (c) is redesignated as "(5)" and amended to read as follows:

"(5) Vocational rehabilitation may not be afforded outside of a State to a veteran on account of service subsequent to World War II if the veteran at the time of his service was not a citizen of the United States."; and

(D) by striking out the words "Korean conflict service" in subsection (d) and inserting the words "service subsequent to World War II" in place thereof.

(7) Section 1701(a)(1) and (d) are each amended by inserting the words ", or resulting from an injury incurred in the line of duty as the result of an apparent hostile act" after the words "Korean conflict".

(8) Section 1901(a) is amended by inserting the words ", or resulting from an injury incurred in the line of duty as the result of an apparent hostile act" after the words "Korean conflict".

SEC. 2. Subsection 212(b) of the Act of June 30, 1932, as amended (5 U.S.C. 59a), is amended by striking out the period after the words "chapter 11 of title 38)" and inserting the following in place thereof: ", or (3) as a result of an injury in line of duty because of an apparent hostile act, as defined in section 101(28) of title 38."

SEC. 3. This Act is effective from December 7, 1941. However, no person is entitled to any accrued benefits under this Act for the period between December 7, 1941 and the date of enactment.

Mr. KEATING. Mr. President, I draw the attention of the Senate to the 15 instances to which I just had listed in the RECORD. I have included here the types of aircraft, where they were shot down or brought down and the number of crew members who were missing or known to be dead or rescued in each instance.

I feel that if every Senator had had the opportunity, as I did, as a result of my visit with Mrs. Barker, to examine this problem carefully, there is not one who would not feel as I do that it is incumbent upon us promptly to make provisions for the courageous men who have made great sacrifices for their country in this unusual period in which we now find ourselves.

PUBLIC DEBT AND TAX RATE EXTENSION ACT OF 1960

The Senate resumed the consideration of the bill (H.R. 12381) to increase for a 1-year period the public debt limit set forth in section 21 of the Second Liberty Bond Act and to extend for 1 year the existing corporate normal-tax rate and certain excise-tax rates.

Mr. JAVITS. Mr. President, unless some other Senator wishes to speak on the amendment, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DIRKSEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment of the Senator from New York [Mr. KEATING].

The amendment was rejected.

Mr. PROXMIRE. Mr. President, I call up my amendment designated "6–17–60–J." I ask unanimous consent that the reading of the amendment be dispensed with, but that the amendment may be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows: At the end of the bill it is proposed to add the following:

SECTION 1. AMENDMENT OF 1954 CODE.

Whenever an amendment is expressed in terms of an amendment to a section of other provision, the reference shall be considered

as to be made to a section or other provision of the Internal Revenue Code of 1954.

SEC. 2. WITHHOLDING OF INCOME TAX ON INTEREST AND DIVIDENDS.

(a) IN GENERAL.—Subtitle A (relating to income taxes) is amended by adding at the end thereof the following new chapter:

"CHAPTER 7—COLLECTION OF INCOME TAX AT SOURCE ON INTEREST AND DIVIDENDS

"SUBCHAPTER A. Interest.
"SUBCHAPTER B. Dividends.
"SUBCHAPTER C. General provisions.

Subchapter A—Interest

"Sec. 1601. Income tax collected at source on interest.
"Sec. 1602. Exemptions.

"SEC. 1601. INCOME TAX COLLECTED AT SOURCE ON INTEREST.

"(a) REQUIREMENT OF WITHHOLDING.—Every person (other than an individual) making payment after December 31, 1960, of interest shall deduct and withhold on such interest a tax equal to 20 percent of the amount thereof. If the withholding agent is unable to determine the person to whom the interest is payable, such tax shall be deducted and withheld at the time payment thereof would be made if such person were known.

"(b) INTEREST DEFINED.—For purposes of this chapter, the term 'interest' means—

"(1) interest within the meaning of section 61(a)(4), and

"(2) in the case of an obligation described in section 454 (a) or (b) (relating to non-interest bearing obligations issued at a discount), the amount by which the amount paid on surrender or redemption of such obligation exceeds the price for which such obligation was issued.

"(c) CREDIT FOR TAX WITHHELD.—

"For credit, against income tax of the recipient of the income, of amounts required to be deducted and withheld under this section, see section 39.

"SEC. 1602. EXEMPTIONS.

"(a) IN GENERAL.—The provisions of section 1601 shall not apply to—

"(1) Any interest which, irrespective of the person to whom payable, is wholly exempt from taxation under chapter 1.

"(2) Interest paid to—

"(A) the United States,

"(B) a State, a possession of the United States, a political subdivision of a State or of a possession of the United States, or the District of Columbia.

"(C) a wholly owned instrumentality or agency of any one or more of the foregoing.

"(3) Interest paid to or by—

"(A) a foreign government,

"(B) a political subdivision of a foreign government,

"(C) an international organization,

"(D) a wholly owned instrumentality or agency of any one or more foreign governments, political subdivisions thereof, or international organizations,

"(E) a foreign corporation not engaged in trade or business within the United States,

"(F) a nonresident alien individual, or

"(G) a partnership not engaged in trade or business within the United States and composed in whole or part of nonresident alien individuals.

"(4) Interest paid by a corporation to another corporation if both corporations are members of the same affiliated group which filed a consolidated return under chapter 6 for the preceding taxable year of the payor corporation.

"(b) IDENTIFICATION OF RECIPIENT.—Paragraphs (2) and (3) of subsection (a) shall apply with respect to any payment of interest only if, at the time of payment, the recipient of such interest has been identified to the withholding agent as a government, organization, or person described in such paragraphs.

"Subchapter B—Dividends

"Sec. 1611. Income tax collected at source on dividends.
"Sec. 1612. Exemptions.

"SEC. 1611. INCOME TAX COLLECTED AT SOURCE ON DIVIDENDS.

"(a) REQUIREMENTS OF WITHHOLDING.—Every person making payment after December 31, 1960, of a dividend shall deduct and withhold on such dividend a tax equal to 20 percent of the amount thereof. If the withholding agent is unable to determine the person to whom the dividend is payable, such tax shall be deducted and withheld at the time payment thereof would be made if such person were known.

"(b) DIVIDEND DEFINED.—For purposes of this chapter, the term 'dividend' means—

"(1) any distribution by a corporation which is a dividend (as defined in section 316);

"(2) a payment made by a stockbroker to any person as a substitute for a dividend (as defined in section 316) on which a tax is required to be deducted and withheld under this chapter; and

"(3) a payment (whether or not designated as a dividend) by a mutual savings bank, savings and loan association, building and loan association, cooperative bank, homestead association, credit union, or similar organization, in respect of withdrawable or repurchasable shares, investment certificates, or deposits.

"(c) WITHHOLDING WHERE AMOUNT OF DIVIDEND IS UNKNOWN.—If the withholding agent is unable to determine the portion of a distribution which is a dividend, the tax required to be deducted and withheld under this chapter shall be computed on the entire amount of the distribution.

"(d) CREDIT FOR TAX WITHHELD.—

"For credit, against the income tax of the recipient of the income, of amounts required to be deducted and withheld under this section, see section 39.

"SEC. 1612. EXEMPTIONS.

(a) IN GENERAL.—The provisions of section 1611 shall not apply to—

"(1) a dividend paid in the stock or rights to acquire the stock of the distributing corporation whether or not the recipient of such stock or rights had an option to be paid in money, or other property, in lieu of such stock or rights;

"(2) distributions (other than capital gain dividends described in section 852(b)(3)(C) to shareholders which are treated under chapter 1 as amounts received on the sale or exchange of property, or distributions with respect to which gain or loss is not recognized under chapter 1 to the shareholders;

"(3) any amount which is includible in gross income as a taxable dividend under the provisions of section 302 or 303 (relating to redemptions of stock), section 354(b) (relating to receipt of property on transfer to corporation controlled by the transferor), section 356 (relating to receipt of additional consideration in connection with certain reorganizations), or section 1081(e)(2) (relating to certain distributions pursuant to order of the Securities and Exchange Commission);

"(4) amounts treated under section 1373 as amounts distributed as dividends;

"(5) dividends paid to—

"(A) the United States,

"(B) a State, a possession of the United States, a political subdivision of a State or of a possession of the United States, or the District of Columbia, or

"(C) a wholly owned instrumentality or agency of any one or more of the foregoing;

"(6) Dividends paid to—

"(A) a foreign government,

"(B) a political subdivision of any foreign government,

"(C) an international organization,

"(D) a wholly owned instrumentality or agency of any one or more foreign governments or political subdivisions thereof, or international organizations,

"(E) a foreign corporation not engaged in trade or business within the United States,

"(F) a nonresident alien individual, or

"(G) a partnership not engaged in trade or business within the United States and composed in whole or part of nonresident alien individuals;

"(7) dividends paid by a foreign corporation not engaged in trade or business within the United States;

"(8) dividends paid by a Federal Reserve bank, Federal land bank, Federal home loan bank, central bank for cooperatives, or bank for cooperatives;

"(9) dividends paid by a corporation to another corporation if both corporations are members of the same affiliated group which filed a consolidated return under chapter 6 for the preceding taxable year of the payor corporation.

"(b) IDENTIFICATION OF RECIPIENT.—Paragraphs (5) and (6) of subsection (a) shall apply with respect to any payment of dividends only if, at the time of payment, the recipient of such dividends has been identified to the withholding agent as a government, organization, or person described in such paragraphs.

"Subchapter C—General provisions

"Sec. 1621. Returns and payment.
"Sec. 1622. Refund or credit of tax to tax-exempt organizations.
"Sec. 1623. Refund of tax to individuals not required to file income tax returns.
"Sec. 1624. Credit for regulated investment companies and personal holding companies.
"Sec. 1625. Failure to file returns.
"Sec. 1626. Nondeductibility of tax in computing taxable income.
"Sec. 1627. Definitions.

"SEC. 1621. RETURNS AND PAYMENT.

"(a) GENERAL RULE.—Every person required under this chapter to deduct and withhold any tax shall make a return of such tax and shall pay such tax, at such time, for such period, and in such manner as the Secretary or his delegate may by regulations prescribe, by making a return of the total amount of interest and the total amount of dividends with respect to which tax is required to be deducted and withheld by such person under this chapter for such period and paying a tax, for which such person shall be liable, in an amount equal to 20 percent of each such total.

"(b) GOVERNMENTAL PAYOR.—If the person referred to in subsection (a) is the United States, a State or political subdivision thereof, a possession of the United States or political subdivision thereof, or the District of Columbia, or any agency or instrumentality of any one or more of the foregoing, the return and payment required by subsection (a) shall be made by any officer or employer of the United States, or of such State or political subdivision, of such possession or political subdivision, of the District of Columbia, or of such agency or instrumentality, as the case may be, having control of the payment of the interest or dividend, or appropriately designated for that purpose.

"(c) ADJUSTMENT OF TAX.—If more or less than the correct amount of tax due for any period under subsection (a) is paid with respect to such period, proper adjustments with respect to the tax shall be made, without interest, in such manner and at such times as may be prescribed by regulations made under this chapter.

"(d) INDEMNIFICATION OF WITHHOLDING AGENT.—A withholding agent shall not be liable, except as provided in subsection (a), to any person for the amount of any tax required to be deducted and withheld under this chapter.

"SEC. 1622. REFUND OR CREDIT OF TAX TO TAX-EXEMPT ORGANIZATIONS.

"In the case of a person which is exempt from the tax imposed by chapter 1, if the amount required to be deducted and withheld as tax under this chapter with respect to interest and dividends received by it during any calendar quarter exceeds the credit claimed by and allowed to such person under section 3505 (relating to credit against employment taxes) for such quarter, the excess shall be immediately refunded or credit to such person as an overpayment of the tax imposed by this chapter, but only if claim therefor is filed (or, if no claim is filed, if credit or refund is made) after the close of such calendar quarter and on or before March 15 of the fourth calendar year beginning after the close of such calendar quarter. No interest shall be allowed or paid with respect to any such refund or credit for any period before the date on which claim for such refund or credit is filed or before March 16 of the calendar year succeeding the close of the calendar quarter in respect of which such refund or credit is claimed, whichever date is the later.

"SEC. 1623. REFUND OF TAX TO INDIVIDUALS NOT REQUIRED TO FILE INCOME TAX RETURNS.

"In the case of an individual who certifies (in such form and manner as the Secretary or his delegate prescribes by regulations) with respect to interest and dividends received by him during any calendar quarter that he reasonably believes (at the time of such certification) that—

"(1) he will not, for the taxable year of which such calendar quarter is a part, have a gross income of $600 or more, or

"(2) in the case of an individual who has or will attain the age of 65 before the close of such taxable year, he will not, for such taxable year, have a gross income of $1,200 or more,

the amount required to be deducted and withheld as tax under this chapter with respect to interest and dividends received by him during such calendar quarter shall be immediately refunded to him as an overpayment of the tax imposed by this chapter, but only if claim therefor is filed (or, if no claim is filed, if refund is made) after the close of such calendar quarter and on or before April 15 of the fourth calendar year beginning after the close of such calendar quarter. No interest shall be allowed or paid with respect to any such refund for any period before the date on which claim for such refund is filed or before April 16 of the calendar year succeeding the close of the calendar quarter in respect of which such refund is claimed, whichever date is the later.

"SEC. 1624. CREDIT FOR REGULATED INVESTMENT COMPANIES AND PERSONAL HOLDING COMPANIES.

"In the case of any withholding agent which is a regulated investment company (as defined in section 851) or a personal holding company (as defined in section 542), the amount required to be deducted and withheld as tax under this chapter with respect to interest and dividends received by it during a taxable year shall be allowed, under regulations prescribed by the Secretary or his delegate, as a credit against (but not in excess of) the tax for which such withholding agent is liable under section 1621(a) in respect of dividends paid by it during such year. For purposes of this section, a dividend shall be considered as having been paid within a taxable year—

"(1) in the case of a regulated investment company, if treated as paid during such taxable year under section 855(a), or

"(2) in the case of a personal holding company, to the extent elected under section 563(b), in determining the dividends paid deduction for purposes of the personal holding company tax, in the return for such year.

"SEC. 1625. FAILURE TO FILE RETURNS.

"In case of a failure to make and file any return required under this chapter within the time prescribed by law or prescribed by the Secretary or his delegate in pursuance of law, unless it is shown that such failure is due to reasonable cause and not to willful neglect, the addition to the tax or taxes required to be shown on such return shall not be less than $5.

"SEC. 1626. NONDEDUCTIBILITY OF TAX IN COMPUTING TAXABLE INCOME.

"Any tax deducted and withheld under this chapter shall not be allowed as a deduction in computing taxable income for the purpose of any tax on income imposed by Act of Congress.

"SEC. 1627. DEFINITIONS.

"For purposes of this chapter—

"(1) PERSON.—The term 'person' includes a government, a political subdivision of a government, and an instrumentality or agency of one or more governments or political subdivisions thereof.

"(2) NONRESIDENT ALIEN.—The term 'nonresident alien individual' includes an alien resident of Puerto Rico."

(b) TABLE OF CHAPTER.—The table of chapters for subtitle A is amended by adding at the end thereof:

"CHAPTER 7. Collection of income tax at source on interest and dividends."

SEC. 2. CREDITS AGAINST INCOME TAX FOR TAX WITHHELD.

(a) ALLOWANCE OF CREDIT.—Part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits against tax) is amended by adding at the end thereof the following new section:

"SEC. 39. CREDIT FOR TAX WITHHELD ON INTEREST AND DIVIDENDS.

"(a) GENERAL RULE.—Under regulations prescribed by the Secretary or his delegate, the amount required to be deducted and withheld under section 1601 as tax on interest and under section 1611 as tax on dividends shall be allowed to the recipient of the income as a credit against the tax imposed by this subtitle for the taxable year in which the interest or dividend is received or accrued.

"(b) PARTNERSHIPS, TRUSTS, AND ESTATES.—If the recipient of the interest or dividend is a partnership or a common trust fund, then the credit provided by subsection (a) shall not be allowed to such recipient, but the members of the partnership, or the participants in the common trust fund, as the case may be, shall be allowed their proportionate share of such share. If the recipient is an estate or trust, and if any legatee, heir, or beneficiary subject to the tax imposed by this chapter is required to include a portion of such interest or dividend in computing his taxable income, such legatee, heir, or beneficiary shall be allowed such portion of the credit as is properly allocated to him on the basis of the income allocable to him under subchapter J (sec. 641 and following, relating to estates, trusts, beneficiaries, and decedents) for the taxable year of the estate or trusts, and such portion of the credit shall not be allowed to the estate or trust.

"(c) REGULATED INVESTMENT COMPANIES AND PERSONAL HOLDING COMPANIES.—In the case of a regulated investment company or a personal holding company, the credit provided by subsection (a) shall be reduced by the amount of credit allowed such company under section 1624.

"(d) TAX-EXEMPT ORGANIZATIONS, ETC.—

"(1) IN GENERAL.—The credit provided by subsection (a) shall not be allowed—

"(A) to any recipient which is exempt from the tax imposed by chapter 1; or

"(B) to an individual, with respect to interest and dividends received during any calendar quarter for which he has made a certification under section 1623.

"(2) CROSS REFERENCES.—

"(A) For refund or credit under chapter 7 in case of a recipient which is exempt from income tax, see section 1622.

"(B) For refund under chapter 7 in case of an individual who is not required to file an income tax return, see section 1623."

(b) TABLE OF SECTIONS.—The table of sections for such part IV is amended by adding at the end thereof the following:

"Sec. 39. Credit for tax withheld on interest and dividends."

SEC. 3. CREDIT FOR TAX-EXEMPT ORGANIZATIONS

(a) ALLOWANCE OF CREDIT.—Chapter 25 (relating to general provisions relating to employment taxes) is amended by adding at the end thereof the following new section:

"SEC. 3505. SPECIAL CREDIT IN CASE OF ORGANIZATION EXEMPT FROM INCOME TAX.

"(a) GENERAL RULE.—In the case of any person (including any government or political subdivision, agency, or instrumentality thereof) which is exempt from the tax imposed by chapter 1, the amount required to be deducted and withheld as tax under chapter 7 with respect to interest and dividends received by it during any calendar quarter shall be allowed, under regulations prescribed by the Secretary or his delegate, as a credit against (but not in excess of the amount shown on the return of such person as its liability (after the adjustments, if any, provided for in sections 6205(a) and 6413 (a)) for such quarter in respect of the taxes imposed by chapter 21 (Federal Insurance Contributions Act and by chapter 24 (collection of income tax at source on wages). Such credit shall be allowed only if claim therefor is made, in accordance with such regulations, at the time of the filing of the return with respect to the taxes under chapter 21 and chapter 24 for such quarter.

"(b) CROSS-REFERENCE—

"For refund under chapter 7, see section 1622."

(b) TABLE OF SECTIONS.—The table of sections for chapter 25 is amended by adding at the end thereof the following:

SEC. 4. TECHNICAL AMENDMENTS.

(a) WITHHOLDING OF TAX ON NONRESIDENT ALIEN INDIVIDUALS.—Section 1441(c) (relating to exceptions to the withholding of tax on nonresident alien individuals), is amended by adding at the end thereof the following new paragraph:

"(7) INTEREST AND DIVIDENDS ON WHICH TAX IS WITHHELD UNDER CHAPTER 7.—Where any person is required to deduct and withhold a tax under subsection (a) on an amount on which a tax was required to be deducted and withheld under chapter 7, such person shall deduct and withhold under subsection (a) only the excess of—

"(A) the amount which would be required to be deducted and withheld under subsection (a) but for the application of chapter 7, over

"(B) the amount required to be deducted and withheld under chapter 7."

(b) WITHHOLDING OF TAX ON FOREIGN CORPORATIONS.—Section 1442 (relating to withholding of tax on foreign corporations) is amended by striking out the period at the end thereof and inserting in lieu thereof a comma and the following: "and except that where any person is required under this section to deduct and withhold a tax on an amount on which a tax is required to be deducted and withheld under chapter 7, such person shall deduct and withhold only the excess of—

"(1) the amount which would be required to be deducted and withheld under this section but for the application of chapter 7, over

"(2) the amount required to be deducted and withheld under chapter 7."

(c) TAX COMPUTED BY SECRETARY OR HIS DELEGATE.—Section 6014 (relating to income tax not computed by the taxpayer) is amended—

(1) by striking out in subsection (a) "and whose gross income other than wages, as defined in section 3401(a), does not exceed $100," and by inserting in lieu thereof "and whose gross income (other than wages, as defined in section 3401(a), and other than interest and dividends on which tax is required to be deducted and withheld under chapter 7) does not exceed $100,"; and

(2) by inserting after "other than wages on which the tax has been withheld at the source" in subsection (b) the following: "and other than interest and dividends on which tax is required to be deducted and withheld under chapter 7".

(d) DECLARATION OF ESTIMATED INCOME TAX BY INDIVIDUALS.—Section 6015(a) (relating to declaration of estimated income tax by individuals) is amended—

(1) by striking out so much of paragraph (1) thereof as precedes subparagraph (A) and inserting in lieu thereof the following:

"(1) the gross income for the taxable year can reasonably be expected to consist of wages (as defined in section 3401(a)), and interest (as defined in section 101(b)) and dividends (as defined in section 1611(b)) on which tax is required to be deducted and withheld under chapter 7, and of not more than $100 from sources other than such wages, interest, and dividends, and can reasonably be expected to exceed—"; and

(2) by striking out so much of paragraph (2) thereof as precedes subparagraph (A) and inserting in lieu thereof the following:

"(2) the gross income can reasonably be expected to include more than $100 from sources other than wages (as defined in section 3401(a)) and other than interest (as defined in section 1601(b)) and dividends (as defined in section 1611(b)) on which a tax is required to be deducted and withheld under chapter 7, and can reasonably be expected to exceed the sum of—".

(e) INFORMATION BY CORPORATIONS.—Section 6042(1) (relating to returns regarding corporate dividends, etc.) is amended by adding at the end thereof the following: ", except that if the amount of dividends paid to any shareholder during a calendar year is less than $300 and tax is required to be deducted and withheld under chapter 7 on the entire amount of such dividends, no such return shall be required with respect to such shareholder for such calendar year".

(f) PUBLICATION OF STATISTICS ON TAX WITHHELD.—

(1) REQUIREMENT OF PUBLICATIONS.—Subchapter B of chapter 61 (relating to miscellaneous provisions relating to information and returns) is amended by renumbering section 6109 as 6110, and by inserting after section 6108 the following new section:

"SEC. 6109. PUBLICATION OF STATISTICS ON TAX WITHHELD ON INTEREST AND DIVIDENDS.

"The Secretary or his delegate shall prepare and publish annually statistics reasonably available with respect to the operation of chapter 7 (relating to collection of income tax at source on interest and dividends), including the amount of tax withheld on interest under section 1601 and the total amount of interest paid on which tax was withheld, the amount of tax withheld on dividends under section 1611 and the total amount of dividends paid on which tax was withheld, and any other facts deemed pertinent and valuable."

(2) TABLE OF CONTENTS.—The table of contents for such subchapter is amended by striking out

"Sec. 6109. Cross references."

and inserting in lieu thereof

"Sec. 6109. Publication of statistics on tax withheld on interest and dividends.

"Sec. 6110. Cross references."

"(b) EXCESSIVE WITHHOLDING.—If the amounts allowable as credits under section 31 (relating to credit for tax withheld at source under chapter 24) and section 39 (relating to credit for tax withheld on interest and dividends under chapter 7) exceed the taxes imposed by chapter 1 against which such credits are allowable, the amount of such excess shall be considered an overpayment."

(g) EXCESSIVE WITHHOLDING.—Section 6401(b) (relating to excessive withholding) is amended to read as follows:

(h) SPECIAL PERIOD OF LIMITATIONS FOR SMALL REFUNDS ON TAX WITHHELD AT SOURCE.—Section 6511(d) (relating to special rules for limitations on allowance of credits and refunds) is amended by adding at the end thereof the following new paragraph:

"(4) SPECIAL ROLES RELATING TO TAX ON INTEREST AND DIVIDENDS WITHHELD AT SOURCE.—In the case of an individual filing a claim for credit or refund of an overpayment for a taxable year for which he was not required under section 6012(a) to make a return, to the extent that the overpayment is attributable to the credit allowed under section 39 for tax required to be deducted and withheld under chapter 7 (relating to tax withheld at source on interest and dividends), in lieu of the 3-year period of limitation prescribed in subsection (a), the period shall be 7 years from the date prescribed by law for filing a return for the taxable year with respect to which the claim is made. In the case of such a claim, the amount of credit or refund may exceed the portion of the tax paid within the period provided in subsection (b)(2), to the extent of the amount of the overpayment attributable to such credit allowed under section 39, or to the extent of $2, whichever is the lesser."

(i) PRESUMPTIONS AS TO DATE OF PAYMENT.—Section 6513(b) (relating to time tax considered to be paid) is amended by adding at the end thereof the following new sentence: "For purposes of section 6511 or 6512, any tax required to be deducted and withheld at source during any taxable year of the recipient under chapter 7, shall, in respect of the recipient of the income, be deemed to have been paid by him on the last day prescribed for filing the return under section 6012 for such taxable year (determined without regard to any extension of time for filing such return)."

(j) DEFINITION OF WITHHOLDING AGENT.—Section 7701(a)(16) (defining the term "withholding agent") is amended by striking out "or 1461" and inserting in lieu thereof "1461, 1601, or 1611".

(k) EFFECTIVE DATE.—The amendments made by subsections (a) and (b) shall apply to taxable years beginning after December 31, 1960.

Mr. PROXMIRE. Mr. President, the amendment provides for the withholding of taxes on interest on dividends, and provides for a withholding tax of 20 percent. It would raise $1 billion, on the basis of conservative, competent, authoritative estimates made by economists of very high reputation.

The $1 billion is money which the Government now legally owns. It is money which the U.S. Treasury should be receiving, but which it is unable to collect because of the avoidance of the payment of income tax on interest and dividends.

The amendment has been very carefully prepared, based on the experience of a number of years. It is based, as a matter of fact, on studies which go back more than 40 years. Very few persons realize that when the first income tax law was passed in the United States in 1913, provision was made for a withholding tax on interest. The only reason why there was not a withholding tax on dividends was that dividends were exempt from the income tax. However, for 3 years there was a withholding tax on interest, and it worked.

In 1941 and 1942, when consideration was given to a withholding tax on wages, the House provided for a withholding tax on dividends and interest and sent the measure to the Senate. The Senate killed it.

In 1950, again, the House passed a withholding tax on interest and dividends, after the Committee on Ways and Means had approved it. But when the bill came to the Senate, the Senate killed it.

The same thing happened in 1951.

Mr. ANDERSON. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. ANDERSON. Did I correctly understand the Senator to say that there was a withholding tax on interest which was in effect for 3 years?

Mr. PROXMIRE. It is my understanding that there was a withholding tax on interest from 1913 to 1916.

Mr. ANDERSON. Tax rates were pretty low at that time.

Mr. PROXMIRE. The Senator is correct.

Over the years, there have been a number of objections to this proposal; but I am convinced that all of them have been very carefully and thoroughly ironed out.

After I complete my presentation, I shall be glad to engage in colloquy with Senators who may wish to refer to the series of objections which have been raised in the past.

Mr. AIKEN. Mr. President——

Mr. PROXMIRE. I yield to the Senator from Vermont.

Mr. AIKEN. How would the amendment affect farm cooperatives patronage dividends or refunds, inasmuch as the income cannot possibly be known until the end of the year.

Mr. PROXMIRE. A number of exemptions are made in the amendment.

The amendment does not call for withholding on patronage dividends.

Mr. AIKEN. Or refunds?

Mr. PROXMIRE. Yes, the amendment does not call for withholding on either patronage dividends or refunds.

Mr. AIKEN. The Senator has given a very important answer.

Mr. PROXMIRE. That is correct.

Mr. President, on pages 3 and 4 of the amendment is a series of exemptions affecting withholding of interest; and on pages 6 and 7 is to be found a series of exemptions for witholding of dividends.

One of the great advantages of this measure is that it provides for quick refunds. When this measure was brought

up last year, many objections were made because older people who receive interest and dividends, and cannot get along without any of their income, might have been deprived for some time of that part of their income. This measure provides for quarterly refunds for them.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator from Wisconsin yield?

Mr. PROXMIRE. I am glad to yield.

Mr. WILLIAMS of Delaware. On page 2, in lines 12 and 13, I notice that the amendment would be applicable to "Every person (other than an individual)." What is the definition of the Senator from Wisconsin of that language?

Mr. PROXMIRE. The purpose is to exempt individual persons.

As the Senator from Delaware realizes, the term "persons" is applied indiscriminatory to both corporations and individual persons.

As used in this amendment, the term "person" means individual persons; and the amendment would exempt the individual entity whom the Senator from Delaware and I think of as a person.

Mr. WILLIAMS of Delaware. Then the amendment would be applicable in all instances except to loans made or interest due as between two individuals?

Mr. PROXMIRE. Yes, except as set forth in the exemptions, which begin in line 10 on page 3; and in that connection I refer to the remainder of that page and to page 4, through line 17.

Mr. WILLIAMS of Delaware. Yes, I understand that the exemptions are spelled out in the amendment. But do we understand that other than those the amendment would mean the withholding of all interest except in the case of a transaction between John Smith and Sam Jones as individuals? Is that correct?

Mr. PROXMIRE. Yes.

Mr. WILLIAMS of Delaware. If so, how would the amendment apply if Sam Jones borrowed the money from a bank? The bank is not an individual under this definition. If Sam Jones had a mortgage at the bank and owed $500 interest, when he went to pay the interest to the bank would he have to withhold some of that interest from the bank?

Mr. PROXMIRE. No. On page 2, beginning in line 12, we find the words:

> Every person—other than an individual—making payment—

And so forth. In other words, if the person who makes the payment is an individual person, he will not withhold.

Mr. CLARK. I think that is very clear from the language the Senator has read.

Mr. PROXMIRE. A second objection which has been made to this amendment is that it would handicap tax-exempt organization—for instance, educational institutions.

Mr. ALLOTT. Mr. President, at this point will the Senator from Wisconsin yield?

Mr. PROXMIRE. I am delighted to yield to the Senator from Colorado.

Mr. ALLOTT. The purpose the Senator from Wisconsin has in mind is a very laudable one, and there is no question that much income in this field actually escapes taxation. But to find a workable method, without doing great harm to individuals, is another matter.

As I interpret the amendment on page 2, in line 12, a person who paid interest to a bank would not have to make the withholding. Is that correct?

Mr. PROXMIRE. Yes, a person who paid interest to a bank would not withhold; that is correct. The bank would still be liable to pay a tax, of course; but it would be in the same position as that of an individual who worked for someone under circumstances in which there was no withholding of wages. The bank would still be liable.

Mr. ALLOTT. If the bank paid interest to an individual, there would be withholding, would there?

Mr. PROXMIRE. That is correct.

Mr. WILLIAMS of Delaware. Mr. President, if the Senator from Wisconsin will yield to me at this time——

Mr. PROXMIRE. Certainly.

Mr. WILLIAMS of Delaware. Suppose a small corporation borrowed money from a bank. In that instance neither the corporation nor the bank would be individuals under the definition used in the amendment.

Mr. PROXMIRE. That is correct.

Mr. WILLIAMS of Delaware. If the small corporation borrowed money from a bank, would the corporation have to withhold when it went to pay at the bank?

Mr. PROXMIRE. Yes, if it were not an individual. If it were anything but a person, it would withhold.

Mr. WILLIAMS of Delaware. If a gasoline filling station borrowed money from a bank it would withhold, would it not?

Mr. CLARK. Mr. President, will the Senator from Wisconsin yield to me? I believe I can clarify this point.

Mr. PROXMIRE. I yield.

Mr. CLARK. I ask the Senator from Delaware and the Senator from Colorado to follow my statement. As they know, this is an amendment to the Internal Revenue Code; the amendment does not stand on its own. It would become part of the code.

The code provides that the term "person" would be construed to mean an individual, trust, estate, partnership, association, or corporation. Anyone of those legal entities except an individual would be required to make the deductions called for by this amendment, unless specifically exempted by the terms of the amendment to which the Senator from Wisconsin has referred.

Mr. ALLOTT. That is correct. I was simply trying to bring out one of the individual situations which occurred to me.

One of the things which has always bothered me about this proposal is that I presume a very large percentage of the dividends and interest paid in the United States goes to people of substantial incomes.

Mr. PROXMIRE. The Senator from Colorado is correct.

Mr. ALLOTT. Does the Senator from Wisconsin have any figures in that connection?

Mr. PROXMIRE. Yes, although I do not have them immediately available. But that generalization is absolutely correct.

Mr. ALLOTT. Very well. I am thinking, for example, of Federal savings and loan institutions, private savings and loan institutions, and credit banks; and in my own State there are other types of specialized banks. Those who invest in those banks to a great extent are not people who fall within the generalization I just mentioned.

On the other hand, quite to the contrary, there are people who save $5 a month or perhaps $10 a month from their salaries, and put that money into a savings and loan association or a credit bank of some kind. Then they proceed to draw a little interest on it, and they let the interest ride and compound. That is a method of saving which in this country generally has supplanted the method used at the beginning of the century, when people would put most of their savings into savings accounts in banks.

Since that is the situation, I see that the amendment provides that 20 percent shall be withheld, which is the minimum amount. I am thinking about all of the people who have saved just a little bit of money. I am sure in numbers they far surpass those who have saved substantial amounts. Those who have saved a little bit depend upon the small amount of interest to add to their pensions, whether they be private or Government pensions. I refer to people who are barely living on a subsistence level, who are just getting along. They are the great rank and file of our people. Then all of a sudden we come along with an amendment like this and we take 20 percent out of what income they get from that source, and they have to justify getting it back from the Government.

I am sure the Senator is conscientious and realizes this problem just as much as I do, and probably more, because he was the one who drafted the amendment. What would the Senator say about that matter?

Mr. PROXMIRE. The answer is that those people are in exactly the same position as the wage earner whose wages are small, the person who gets an odd job here and there, works for several weeks or months during the year, and has some of his wages withheld. The fact is that in the case of this bill the interest and dividend refunding is faster than wage and salary refunding. Instead of annual refunding, as in the case of wages, there will be quarterly refunding.

I was discussing this question a little earlier with another Senator who was concerned with the same problem with which the Senator from Colorado is concerned. He concluded that the inconvenience to the people would be only for the first quarter, provided the income was consistent, I should say for the first 3 months at the very most. After that the refund would compensate, and the dividend or interest recipient would be in exactly the same position as before. The inconvenience to the individual would be very slight and transient, and it would be equitable because he would be in the same position the wage earner is in. People with small interest income,

even older people, receive more income from wages earned than from interest or dividends. However, the Senator from Colorado has an excellent point. The interest that older people get does represent a small element of their existence and subsistence.

Mr. ALLOTT. The only difference between the wage earner and the interest or dividend receiver, I may point out to the Senator, since he has used that example—and perhaps he has used it erroneously, although not purposefully so—is that it would affect in the same way only the wage earner who sporadically received wages; but the person who receives wages over a constant period of time, no matter what the level of salary may be, has certain deductions. As a matter of fact, the uniform experience is that, certainly, the average person making a salary of up to $5,000 or $10,000, by using the standard form of deduction which the Government allows him, can get a far bigger deduction than he can if he itemizes his deductions. So as a consequence, most people utilize the deductions. Therefore, the rather small wage earner may or may not have a deduction made, depending upon the size of his family and depending upon the size of his income. A great many of those people actually end up with rebates from the Government at the end of the year.

I am sure the Senator will agree with me that the great majority achieve an actually lower tax payment than they would if they had itemized their deductions.

Mr. PROXMIRE. The Senator is absolutely correct. What he has said indicates that we have at least this kind of transient, personal inequity for the benefit of the Government. Millions of people do receive refunds, and many, of course, with low wage income receive refunds at the end of the year. This represents income which, for the convenience of the Government, has been deferred for a matter of months, up to a year.

Mr. ALLOTT. But in such an instance the tax is deducted upon the basis of the size of the man's family and the size of his salary. In this instance, it gets back to the point which really bothers me. I know that in my own small town many, many people who could never possibly be called people of financial affluence, people who have never done much more than meet their bills month after month, and provide for their families, who have tried to save a little money, will have to wait 3 months now when they want to collect it, because 20 percent of the $400, let us say, is going to be deducted quarter by quarter. It is a real hardship to them when they are thinking of paying doctor bills and medical bills.

Mr. PROXMIRE. I recognize the problem raised by the Senator from Colorado, but I call attention to the fact that it is only temporary. It is only for the first 3 months, until the situation catches up with itself. The interest recipient will be receiving his full income from that period on.

In the second place, he will be getting a refund much more rapidly than a wage earner will, and the amount of inconvenience, therefore, for the interest and dividend recipient, will be comparatively modest and temporary, and the gain of the country to the extent of $1 billion—money really owing to the Government, and which it needs.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. JOHNSON of Texas. Does the Senator have any information as to whether he would be willing to agree to a unanimous consent request to limit time on his amendment, so we can notify Senators?

Mr. PROXMIRE. I shall be very glad to do so.

Mr. JOHNSON of Texas. How much time does the Senator think will be necessary?

Mr. PROXMIRE. Let me say to the Senator from Texas that I would prefer to make my presentation and answer a few questions. Then at the end of that time I think we could have a very brief limitation, after the opposition speaks. Perhaps 10 minutes on a side would suffice.

Mr. WILLIAMS of Delaware. Mr. President, if the Senator will yield, how much longer does the Senator expect to speak?

Mr. PROXMIRE. I think I shall take only 15 or 20 minutes. I shall be glad to yield during the presentation. So far in my presentation I think the opposition has used as much time as I have.

Mr. ALLOTT. Mr. President, if the Senator will yield, I do not know whether the Senator would classify me as the opposition. I am not sure yet.

Mr. PROXMIRE. I am very much encouraged.

Mr. ALLOTT. I am trying to decide.

Mr. PROXMIRE. I did not mean to classify the Senator from Colorado as the opposition. He has been asking excellent and perceptive questions, which might buttress the opposition if we were not able to answer. They have been perfectly proper questions.

Mr. ALLOTT. I refer to page 4 of the amendment, subparagraph (f). May I ask why a nonresident alien individual is exempted?

Mr. PROXMIRE. This is from the payment of interest. I have the exact reference to which the Senator is calling attention. I am having the answer determined now. For the moment I cannot answer, but I shall be glad to do so in the next 3 or 4 minutes.

Mr. LAUSCHE. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield to the Senator from Ohio.

Mr. LAUSCHE. My examination of the part of the bill relating to interest leads me to the conclusion that if interest is paid by one corporation to another corporation, the deduction need not be made. Or must it be made?

Mr. PROXMIRE. It must be made unless the person paying the interest is an individual.

Mr. CLARK. Mr. President, if the Senator will yield——

Mr. LAUSCHE. Let me read the language. I am reading from line 12, page 2:

> Every person (other than an individual) making payment after December 31, 1960, of interest shall deduct and withhold on such interest a tax equal to 20 percent of the amount thereof.

Mr. PROXMIRE. I think the Senator has a different amendment before him. Does the Senator have amendment "6–17–60—J"?

Mr. LAUSCHE. Yes; "6–17–60—J."

Mr. PROXMIRE. To what page does the Senator refer?

Mr. LAUSCHE. Page 2, line 12.

Mr. PROXMIRE. I beg the Senator's pardon.

Mr. LAUSCHE. The language which I read requires a corporation paying interest to a corporation to withhold.

Mr. PROXMIRE. The Senator is correct.

Mr. LAUSCHE. That is, one corporation paying to a bank would have to withhold 20 percent of the interest.

Mr. PROXMIRE. That is correct.

Mr. LAUSCHE. How does the Senator justify that? Does the Senator assume the bank will not pay the tax on the interest when it receives the interest?

Mr. PROXMIRE. No. This is simply a matter of orderly administration. There would be no loss to the bank. There would be no loss to the corporation.

One of the great advantages involved in this proposal is that the burden of withholding is almost nothing. It is a minimum. It is very small. All of the interest payments can be taken into account for the entire period, and the corporation can simply write out one check, put it in an envelope, put a 4-cent stamp on the envelope, and mail it to the Federal Government. That is the only cost. It would be very, very simple. Reporting would be easy. There would be filed no other report of any kind.

Mr. LAUSCHE. I refer the Senator to line 11 on page 3.

Mr. PROXMIRE. The Senator from Colorado [Mr. ALLOTT] raised a point as to nonresident aliens. I have an answer for the Senator. When the Senator returns to the Chamber I shall give him the answer.

Mr. LAUSCHE. I refer the Senator to line 11, on page 3, where it is stated:

> The provisions of section 1601 shall not apply to—

Mr. PROXMIRE. Line 11, page 3.

Mr. LAUSCHE. I now turn to item 4, on page 4.

Mr. PROXMIRE. Line 4?

Mr. LAUSCHE. Item 4, on line 18, page 4.

Mr. PROXMIRE. I see the item.

Mr. LAUSCHE. It states:

> Interest paid by a corporation to another corporation if both corporations are members of the same affiliated group which filed a consolidated return under chapter 6 for the preceding taxable year of the payor corporation.

Mr. PROXMIRE. The Senator is correct. That is to eliminate a nontaxable transaction.

Mr. LAUSCHE. It would mean that a corporation which pays interest to another corporation——

Mr. PROXMIRE. Of the same affiliated group.

Mr. LAUSCHE. No.

Mr. PROXMIRE. Then the Senator is talking about something outside of this exception.

Mr. LAUSCHE. I hope the Senator will permit me to finish. The substance of these provisions I have covered is that a corporation which pays interest to another corporation shall withhold 20 percent of the interest paid, except when the corporation paying the interest and the corporation receiving the interest are members of a consolidated group. Is that correct?

Mr. PROXMIRE. This is correct, provided it is a corporation paying interest to another corporation. Of course, if a corporation should pay interest to some of the other groups in the other exceptions, there would not be withholding, either. The Senator is correct.

Mr. LAUSCHE. I thank the Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I will say to the Senator from Colorado [Mr. ALLOTT] that I have an answer to the question he raised, before I continue with my presentation.

Mr. ALLOTT. The Senator may have the answer, but I do not now have before me a copy of the language.

Mr. PROXMIRE. I can refer to it. It is on page 4, line 14, item (F). One exception is "a nonresident alien individual." It is item (F). The answer is that a nonresident alien individual is already subject to a 30 percent withholding requirement under section 1441 of the Internal Revenue Code.

Mr. ALLOTT. That relates to interest or dividends paid?

Mr. PROXMIRE. A nonresident alien individual is already subject to a requirement which, in our judgment, would cover the situation.

Mr. ALLOTT. I thank the Senator for his answer.

Mr. PROXMIRE. Mr. President, of course tax-exempt organizations heavily depend upon dividends and interest. Universities and charitable institutions, and other organizations of that type, have a principal income from dividends and interest. Obviously it would be difficult for these institutions if they had to defer their income even for a matter of 2 or 3 months on 20 percent of this kind of income. In order to correct this situation, the amendment provides that in such a case these organizations can withhold a compensating proportion of the amount of withholding taxes which they collect from their own employees. This will mean, of course, that an institution which has a million dollar payroll, which withholds $150,000 of the $1 million payroll, which at the same time has interest income withheld to the extent of $50,000, could simply pay to the Government $100,000 instead of the $150,000, and thereby not suffer from even a temporary loss of income.

Mr. President, I think in the case of this amendment there has been the most careful, thorough and thoughtful—and I think expert—analysis it is possible to make of the effect it would have upon the revenues of the United States. It is a more careful analysis, I think, than any other I have seen.

Mr. Daniel Holland, an outstanding statistician at the Massachusetts Institute of Technology, has gone into this proposal in very great detail. He has been checked and double checked by Mr. Joseph Pechman, an outstanding economist for the Committee on Economic Development, as well as by others, and they have all come to the conclusion that without question the amendment, if agreed to, would result in the collection of a billion dollars of taxes. I think everyone agrees that if income remains at the 1960 level the amount which would result from passage of the amendment would be substantially greater than that.

It is also pointed out—which seems to me to be quite interesting, and which indicates the moral necessity for the amendment—that 15 percent of the dividends paid are now unreported and escape taxation, and 57 percent of the interest is not reported and no income tax is paid on the 57 percent.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield to the Senator from Illinois.

Mr. DOUGLAS. Do I correctly understand the Senator from Wisconsin to say that over half of the interest paid is not reported as income?

Mr. PROXMIRE. The Senator from Illinois is absolutely correct.

Mr. DOUGLAS. Of course, the major portion of interest income goes to those persons in the upper income brackets.

Mr. PROXMIRE. That is right.

Mr. DOUGLAS. Not to the impoverished widows and orphans, but to those who have relatively large incomes.

Mr. PROXMIRE. The Senator is correct. The typical "coupon clipper" keeps his bonds in a vault in the bank. There are some people who have modest incomes, as the Senator from Colorado well brought out. But those who have interest income from coupon bonds are by and large the wealthy people.

Mr. DOUGLAS. Yet those people are avoiding or evading taxes on approximately 57 percent of the interest which they receive?

Mr. PROXMIRE. The statistics are absolutely irrefutable. Those statistics have been subject to challenge for some time, and they have not been challenged. They have been presented to the Committee on Ways and Means and accepted by that committee without any challenge whatsoever. There is no question in my mind that it is a fact—it is a very sad fact.

Mr. DOUGLAS. Do I correctly understand that the Senator from Wisconsin is not proposing to levy any new tax?

Mr. PROXMIRE. The Senator is correct.

Mr. DOUGLAS. The Senator from Wisconsin is merely proposing that people should pay the taxes they now owe.

Mr. PROXMIRE. The Senator is correct. The people should not hold the money which is not their own but which belongs to the Federal Government. As a great Governor of Wisconsin, Walter Goodland, said some 20 years ago, this money does not belong to the person who is depriving the Federal Government of it. These people are actually stealing money from the Federal Government by not paying the taxes they owe, on an amount of 57 percent of the interest income received.

Mr. DOUGLAS. Has the Senator from Wisconsin noticed there is any real enthusiasm on the part of the administration for his proposal?

Mr. PROXMIRE. I am not aware of any, though I was told the administration is studying this kind of approach. The administration was studying it last year. The administration admitted there was great merit in it.

It has been conceded that the amendment, if agreed to, would result in collection of an enormous amount of money, without raising the tax rate for any taxpayer a nickel. We certainly have not seen any proposal from the administration in this regard, nor even any encouragement.

Mr. DOUGLAS. Is it not true that a study frequently is used as an excuse for inaction?

Mr. PROXMIRE. It is, indeed. As a matter of fact, I recall well that last year the defenders of the administration stated on the floor of the Senate, "Give us a little more time. We are close to a solution of the problem. If we have a little more study of the problem, we can solve it."

We have had that study. We have had a year of the study by very, very competent people who agree that there is no question this proposal will work and will work well. If one will look over the appearances of these economists, before the Committee on Ways and Means, it seems to me one can only come to the conclusion the Ways and Means Committee must have been persuaded to reach. I am astonished it was not recommended. They did not so recommend, but it seems to me, since this is a coequal branch of the Government, as is said, we can proceed upon the basis of our own intelligence and our own understanding of the measure, which is a relatively simple proposal.

Mr. DOUGLAS. Is the Senator from Wisconsin aware of the fact that I presented his amendment in the Finance Committee during the hearings on the bill?

Mr. PROXMIRE. Yes, I am aware. I know that the Senator from Illinois was a real champion for the amendment.

Mr. DOUGLAS. Is the Senator aware that it met with delaying tactics on the part of the administration?

Mr. PROXMIRE. The Senator was not aware of that.

Mr. DOUGLAS. That is the truth. While the administration talks about fiscal responsibility, still here is $1 billion of unpaid taxes with respect to which it refuses to move. The $1 billion of unpaid taxes is in the main taxes which would be imposed on wealthy groups in the community who finance the political party of the administration; is that not true?

Mr. PROXMIRE. I think that is a very effective argument, and while it may be a little partisan, I think it is well justified and very true.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. MANSFIELD. Would the Senator from Wisconsin be receptive at this time to a limitation of time—say, instead of 10 minutes to a side, 15 minutes to a side—with the proviso that in addition we have a quorum call so that more Senators can hear the argument?

Mr. PROXMIRE. I shall be delighted to do so if the Senator will bear with me for a few minutes longer.

Mr. MANSFIELD. Will the Senator give me an indication when he is prepared to do so?

Mr. PROXMIRE. I will be happy to do that.

Mr. MANSFIELD. I thank the Senator.

Mr. PROXMIRE. I wish to thank the Senator from Illinois for his helpful colloquy. There is no question in my mind, however, that we can save $1 billion. This is money owned by the United States of America. It is owned by the Treasury. It is owned by all the taxpayers. If we do not collect this $1 billion, it means a great burden upon the taxpayers of the United States. I concede that most of this sum is not paid because of carelessness. If we persist in not providing for the collection of this money, we put a premium on dishonesty and ignorance and a penalty on honesty to go with it.

I wish to conclude by pointing out that in hearings before the Ways and Means Committee, the answer was given, it seems to me, to the argument on whether or not this proposed legislation could be administered. Back in 1941 and 1942 the principal argument against the withholding proposal was that it would be very, very difficult for the Treasury Department to administer it. That was one of the big arguments against the proposal. In the Ways and Means Committee, the chairman of the committee, Chairman Mills, asked Mr. Harrington, of the Treasury Department, about the administration of the present withholding act, and the answer was this:

> I think the total tax collected from individuals would be this year about $42 billion and my recollection is that the amount received by the Treasury on the withholding would be in the neighborhood of $28 to $29 billion.
>
> The CHAIRMAN. It will run around 70 percent, will it not?
>
> Mr. HARRINGTON. That is right.
>
> The CHAIRMAN. Seventy-one percent?
>
> Mr. HARRINGTON. That is right.
>
> The CHAIRMAN. Is that which is involved in withholding much of a problem for the Internal Revenue Service from the point of view of compliance and enforcement?
>
> Mr. HARRINGTON. No.
>
> The CHAIRMAN. Is most of your problem in that area with respect to the income that develops outside of the withholding?
>
> Mr. HARRINGTON. Yes; that is true.
>
> The CHAIRMAN. That is around 30 percent of the total individual income?
>
> Mr. HARRINGTON. Yes.

In other words, on the basis of 18 years of experience the Treasury is now convinced that withholding is working far better, is saving a great deal of money; and the number of employees now in the Federal service, to the surprise of the chairman of the Ways and Means Committee, was less than it was at that time. One of the reasons for these changes is that the Department can function much more efficiently because we now have a withholding system.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. PROXMIRE. I am happy to yield to the Senator from Pennsylvania.

Mr. CLARK. The Senator will recall that some of us, including, I believe, the Senator from Illinois [Mr. DOUGLAS] and the Senator from Wisconsin [Mr. PROXMIRE] made quite a fight to support the request of the Treasury Department for additional employees this year in order to permit them to get after some of the tax dodgers. The administration requested 3,000 additional employees, which would still leave the staff 2,000 less than the Internal Revenue Service had during President Truman's last year in office. I regret that the House failed to go along with any part of that request, but the Senate granted the Department the whole request, and in conference compromised on two-thirds. So we shall have 2,000 more employees.

I am sure that my friend is aware of the fact that they have stated they believe the proposed plan would put many thousands of additional employees on the payroll in order to get at the tax dodgers. The place where they would go after the tax dodgers is among the 30 percent whose taxes are not withheld. If we could adopt the amendment so that dividends and interest would be withheld, my guess is that the necessity for putting some of the extra employees which are presently needed would be eliminated.

Mr. PROXMIRE. The Senator from Pennsylvania is absolutely correct. I point out that the figures really shocked me.

They shocked one of the best informed men in the country in the tax field, the chairman of the Ways and Means Committee, WILBUR MILLS. Let me read this colloquy:

> The CHAIRMAN. Mr. Harrington, I did not mean to get into the question of reorganization. What I was thinking about is this: You have $12 or $13 billion of income to the Government from individuals that comes from other than withholding. It used to be that we had all of our individual income payments coming to the Treasury without any withholding tax.
>
> We have this $12 or $13 billion of revenue from individuals outside of the withholding. Before we put in the withholding system we probably had that much revenue from individuals in total in some years. Now, we have a lot more people employed in the Internal Revenue Service than we had at that time, I assume, field and all.
>
> Mr. HARRINGTON. I believe the Revenue Service has 9,000 less employees now than it had in 1948 or 1949, Mr. MILLS.
>
> The CHAIRMAN. It does have?
>
> Mr. HARRINGTON. Yes, sir.
>
> The CHAIRMAN. I did not realize that.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. AIKEN. I wish to clarify the matter of patronage refunds and patronage dividends on the part of cooperatives. I noticed on page 5, there appear the words "dividend defined"—

> (1) Any distribution by a corporation which is a dividend (as defined in section 316.)

What is a dividend as defined by section 316?

Mr. PROXMIRE. We are checking it this minute.

Mr. DOUGLAS. May I say to my good friend from Vermont that I am sure he would not wish to harm members of the cooperatives, who have separate problems.

Mr. AIKEN. I know he would not wish to do any harm to anyone, but I want to be sure he does not.

Mr. DOUGLAS. Does he not want members of cooperatives to pay their taxes? I am sure my good friend from Vermont would not want cooperatives given tax advantages.

Mr. AIKEN. Members of cooperatives certainly pay taxes and plenty of taxes, but when they make an overpayment on a piece of equipment, they do not want that overpayment mulcted into on the way back to them, and when they get only part of a payment on a commodity sold, and when they get the rest of it at the end of the year, they do not want somebody to take a big bite out of it.

Mr. DOUGLAS. I am sure my good friend from Vermont would not like to have the patronage dividends received by individual members of cooperatives evaded, because the Senator from Vermont and the Senator from Illinois have argued that such earnings should not be taxed at the cooperative level but that they should be taxed as individual income when received.

Mr. AIKEN. That is correct.

Mr. DOUGLAS. I hope my good friend from Vermont is not saying that we should permit members of cooperatives to evade payment of the patronage dividends which they receive as income. I would not like to see my friend do that.

Mr. AIKEN. They certainly would not be evading taxes, but if they paid $100 for an article that cost only $80, they would like to get back the $20 that belongs to them.

If they sold a cow, we will say, and got $200 for the cow, and later the cooperative resold it was $250, they would like to get the other $50 back without having part of it taken out. That is why I was asking a definition of "corporation" as defined in section 316, because practically all of our cooperatives are incorporated.

Mr. PROXMIRE. I agree with the position of the Senator from Vermont 100 percent.

Mr. AIKEN. I know the Senator from Wisconsin does.

Mr. PROXMIRE. These are nontaxable income items and should be exempt. It would be inefficient as well as improper if it were not. It is exempt, I am sure. I have consulted with people who have worked hard and long on the

problem. They are working out the documentation. I wish to be accurate before I put it in the RECORD.

Mr. AIKEN. I know the position of the Senator from Wisconsin with regard to farm cooperatives. I believe his State and mine have the largest number of cooperatives per farmer of any States in the Union.

Mr. PROXMIRE. The Senator is correct, and I am very proud of it.

Mr. AIKEN. I would not want him to do any harm to legitimate organizations of that kind.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. CLARK. Mr. President, while we are getting the necessary documentation, I wonder if my friend from Wisconsin would not agree that the way the amendment is drafted it would require a withholding only on taxable dividends. So far as the suggestion made by the Senator from Vermont is concerned, about selling the cow, it must be clear now that that is not a taxable dividend under present law. If it is not under present law, it would not become so under the amendment.

Mr. AIKEN. I was thinking particularly about an overpayment.

Mr. CLARK. I used to be a cornfield lawyer. I do not see how it could be treated as a dividend.

Mr. AIKEN. This refers to any distribution by a corporation as defined in section 316. Knowing that most of our cooperatives are legal corporations in the States where they are organized, I wished to make sure that they would not be affected.

Mr. CLARK. Of course, I agree with the Senator from Vermont. I am quite sure we will find that the kind of return which the Senator from Vermont has been speaking about could not conceivably be considered a dividend or the kind of distribution which would be classified a dividend.

Mr. PROXMIRE. I believe the answer is in section 316, subsection (a) of the act, which defines a dividend, as follows:

> The term "dividend" means any distribution of property made by a corporation to its shareholders (1) out of its earnings and profits accumulated after February 28, 1913.

As I understand, the definition has been reconciled so far as cooperatives are concerned, and excludes them.

Mr. AIKEN. I was concerned with whether it would apply to the stock dividend I have in mind.

Mr. PROXMIRE. It is not a stock dividend.

Mr. AIKEN. In a case where, instead of cash being paid, a person receives another share of stock, how would the tax on that be withheld?

Mr. PROXMIRE. Stock dividends are exempt. They are not included. They are specifically excluded.

Mr. CLARK. Mr. President, will the Senator yield for a question?

Mr. PROXMIRE. I yield.

Mr. CLARK. Going back to my dim past, this does not envision stock dividends. It envisions a payment made by a stockbroker to a person as a substitute for a dividend. It involves a situation in which a person has a running account with a stockbroker and the broker collects all the dividends. The broker will send his check to the customer for the amount of dividends, but it will not actually be a dividend from a corporation as such.

Mr. AIKEN. I thank the Senator from Pennsylvania and the Senator from Wisconsin. My experience in this field has been negligible. Therefore, I welcome the explanations which they have given.

Mr. PROXMIRE. The Senator from Vermont has been very helpful in this discussion. After some trouble and investigation we presented facts which should have been presented after a thorough investigation. We now have the facts in the RECORD, thanks to the Senator from Vermont.

Mr. AIKEN. The Senator from Vermont has had something to do with cooperatives, but not with the kind of dividends referred to by the Senator from Pennsylvania.

Mr. PROXMIRE. On the basis of the hearings, the burden will be minimal. The burden on the withholding agency, the corporation, will be even slighter. I read from page 826 of the panel discussion, in which Mr. Pechman has this to say:

> This new withholding system will cost 16 cents per year, plus the time it takes to multiply the withholding rate times the number of deposits. There is absolutely no more burden on the withholding agent. If there is nothing else I have established today, I hope I can convince the committee that that is all there is. As I have said in my previous testimony, this is a system which was devised by the staffs of the Treasury and the Joint Committee at the request of this committee in 1951 specifically to eliminate the cost on the withholding agent.

Therefore, I think it is clear, on the basis of the colloquy before the committee, that the withholding agency is virtually free of any burden, except as Mr. Pechman said. This is a 16-cent amendment. A.T. & T., with hundreds of thousands of stockholders, would have to pay only 16 cents per year to comply with the law. All they have to do is to put a stamp four times a year on the letter and mail the check to the Federal Government.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. WILLIAMS of Delaware. How would this withholding tax work on a coupon bond?

Mr. PROXMIRE. It would work as follows: If the corporation has a coupon bond that has, for example, a value of $60, the individual would take the coupon to his bank. Of course, it is a negotiable instrument, and he could go anywhere. He could take it to a grocery store, or anywhere else where he could cash it. He would present the coupon bond, and he would receive $60 minus 20 percent.

Mr. WILLIAMS of Delaware. I am speaking about the interest, not the bond.

Mr. PROXMIRE. He would take the interest-bearing coupon to any place where it could be cashed, and he would cash the coupon and receive $60, minus 20 percent, or $48. The grocery store, where he had cashed the coupon, would deposit the coupon at the bank. The bank would credit the grocery store with $48. The bank would send the coupon to the corporation, and the corporation would then send the bank $48. The corporation would send the remaining $12 to the Federal Government as interest payment. The whole transaction would then be completed.

Mr. WILLIAMS of Delaware. The U.S. Government itself has billions of dollars of these bonds outstanding, as well as do the corporations. They are not registered bonds. The coupons are marked as being payable to the bearer. They can be cashed anywhere. Suppose there were a bond due on June 16 for $100. Does the Senator mean that he would reduce the cash value of that coupon by 20 percent?

Mr. PROXMIRE. That is correct.

Mr. WILLIAMS of Delaware. How would we get that information out to the multitude of people who hold these bonds? They can cash these bonds at filling stations, grocery stores, or anywhere. They are negotiable the same as a check. I am not trying to confuse the issue, but I am concerned as to the application of the amendment of the Senator from Wisconsin.

Mr. PROXMIRE. I understand. This is a very crucial point. I believe the answer is that this word must be gotten out. Only a small number of agencies actually cash coupon bonds. The overwhelming majority would be cashed in banks. People do not keep these bonds under the bed or in their mattresses. They keep them in bank vaults. Naturally they would cash them at the bank. There may be a filling station occasionally which may cash one for a good friend. Most grocery stores do not want to cash even a personal check. A coupon would be an exotic thing to most of them, and it would be unusual to ask the owner of a grocery store to cash one of these coupons. If he did it and an error was made, there would be legal recourse, of course.

Mr. WILLIAMS of Delaware. But no endorsement is required on a coupon. They are payable to the bearer.

Mr. PROXMIRE. In the event that through ignorance such a coupon were cashed at the face value, without withholding 20 percent, and in addition if it were cashed for an individual who was not identified or whose identity was not certain, then conceivably there might be a loss. Perhaps the proposal could be amended so that it would not affect coupon bonds presently outstanding. It would be better to apply it to everyone across the board. The actual loss would be only occasional and very limited. It would occur only in cases in which the individual is not identified or where his identity is not retained by the agency cashing the coupon.

Mr. WILLIAMS of Delaware. I am not quarreling with the objective of the Senator. We have had this subject under discussion in committee for a number of weeks, and it is a problem for which the committee could not ob-

tain a satisfactory answer. There are billions of dollars' worth of these coupon bonds outstanding.

Mr. PROXMIRE. Yes.

Mr. WILLIAMS of Delaware. They are not registered, and they bear no names but are merely payable to the bearer.

Mr. PROXMIRE. While interest may be paid to small depositors of savings and loan associations, by and large the bondholders who own these Treasury bonds, and those who own corporation coupon bonds, are not the most poverty stricken and financially ignorant people in our society. They are usually people of some substance, and are not the type who would cash their coupons in some grocery store. They would do it at the bank.

Mr. WILLIAMS of Delaware. Of course we do not have any ignorant people in Delaware.

Mr. PROXMIRE. We have none at all in Wisconsin.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. DOUGLAS. Is it not somewhat captious to demand a perfect system of withholding on interest and dividends when we do not have a perfect system of withholding on wages and salaries?

Consider, for instance, casual laborers—persons who work at mowing lawns, and so forth. There is not a general 20-percent withholding tax on them. A certain amount of evasion takes place. Nevertheless, that would not warrant our eliminating the existing withholding tax on wages and salaries.

Mr. PROXMIRE. The Senator from Illinois is absolutely correct. As a matter of fact, I recall that a number of small corporations or companies have withheld the tax on wages from their employees but have failed to pay the tax withheld to the Treasury; they have absconded with it. Those things are known; it is common knowledge.

No one has said that the withholding tax on wages and salaries is a 100-percent success. However, it is one of the most efficent, effective ways of collecting taxes, not only from the standpoint of the Government but also from the standpoint of the taxpayer. It is a great convenience. Instead of the taxpayer having to borow at the end of the year and go into debt to pay taxes, this method will afford him the greatest assistance. As a matter of fact, it will be one of wonderful advantage and convenience to the taxpayer.

Mr. DOUGLAS. The Senator from Wisconsin is not saying that the proposal will work perfectly; that every dollar of taxes on interest and dividends which is now evaded will be collected. He is simply saying that the method will greatly diminish the extent of evasion.

Mr. PROXMIRE. That is correct. It is my understanding that the withholding tax on wages has reduced evasion to a tiny proportion—to 1 or 2 percent; perhaps even less than that. It seems to me that there is a terrific inequity when the evasion of the payment of taxes by wage earners is only 1 or 2 percent and the evasion of the payment of taxes on interest is 57 percent.

Mr. DOUGLAS. Is it not easy to think in terms of minor details and still miss the main point?

Mr. PROXMIRE. I agree that on the main point that is correct; however, I think most of the questions which have been asked have been useful, helpful, and sincere.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. AIKEN. My office has called my attention to the fact that we have received a great many letters from persons who live on income from dividends, and whose total of such dividends amounts to less than $2,000 per family. They protest very strenuously against having 20 percent of that income withheld and having to wait until the end of the year to have it returned.

Mr. PROXMIRE. They will not have to wait until the end of the year. They will have to wait, at the very most, only 3 months, or perhaps a matter of weeks, because the refund will be made quarterly.

Mr. AIKEN. One person in his letter said his income was $2,000 a year; that every dollar of it was from investments; and that that was all the income he had. He said he did not know what he would do if he had to wait to collect the $400 which would be withheld.

Mr. PROXMIRE. The Senator from Vermont might compare that situation with the situation of some wage earners in the same position. Many wage earners earn $2,000 a year. Also, a person may take a casual job and work for a short period of time, but his tax is withheld for only a limited period of time. It is only for the first 3 months. After that they will be caught up. They will get their refund on an equitable basis from that time on.

The majority leader and the assistant majority leader have been very patient with me. I shall yield once or twice more before I yield the floor.

Mr. CLARK. Mr. President, will the Senator from Wisconsin yield?

Mr. PROXMIRE. I yield.

Mr. CLARK. I ask the Senator from Vermont to listen to this statement. I suggest to the Senator from Vermont that the case he has made conceivably could result in some disadvantage to the persons he has mentioned, as the Senator from Wisconsin has said, for weeks or months; but it would happen only once; it would not happen more than once. The next time, the persons would receive the amount which was due.

Mr. PROXMIRE. After that time, their refunds would be made regularly, so they would suffer no diminution in income at all. The only diminution would be the very first time.

Mr. President, I have established, in the first place, that the administration of this proposal by the Treasury would be simple. As a matter of fact, it would undoubtedly reduce the number of persons who are now required to enforce the income tax law, at a direct and substantial savings to the Government.

Second, there would be virtually no burden on the withholding agent. Third, older persons, or persons having modest incomes, whose incomes are entirely from dividends and interest, would have a very minimal and transient inconvenience, because a quick refund would be provided. The advantages would be numerous as compared with the inconvenience. The inconvenience would last only for a period of weeks—at most a few months. Then those persons would be through with any inconvenience. All the rest of the time they would have a constant income.

I conclude by pointing out that this proposal involves a matter of a billion dollars—$1 billion of income. It is a billion dollars which would more than compensate—or at least would compensate almost entirely—for the cost of the increase in the defense appropriation bill. We provided $1 billion more in that bill. This proposal would make up for that increase right away.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. JOHNSON of Texas. Is the $1 billion a Treasury estimate, or the Senator's estimate, or whose estimate?

Mr. PROXMIRE. This is an estimate made by Dr. Daniel Holland, of the Massachusetts Institute of Technology, and by Dr. Joseph Pechman, of the CED. They appeared before the Committee on Ways and Means and gave their estimates. Their estimates have never been challenged by anyone. They have been widely accepted.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. CLARK. The Commissioner of Internal Revenue states that something like $25 billion of taxable income was not being returned for taxation, of which about $4 billion was on interest payments on Government bonds. I think the Treasury has indicated that the estimates which the Senator from Wisconsin has placed in the RECORD are quite conservative.

Mr. JOHNSON of Texas. That was a statement by the Commissioner of Internal Revenue?

Mr. CLARK. Yes.

Mr. BENNETT. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. BENNETT. It is the estimate of the Treasury that a withholding tax on dividends would yield about $83 million, and that a withholding tax on interest would yield about $235 million. That is a long way short of a billion dollars.

Mr. PROXMIRE. Will the Senator from Utah provide the basis for his figure on the withholding tax on interest? We have tried very hard to get the Treasury to give us an estimate on the interest. They have given us an estimate on dividends, which we think is low, but they have never given us a figure on interest.

Mr. BENNETT. The Treasury says that with a rate of 20 percent withholding rate on interest, the amount which could be collected would be $225 million.

Mr. PROXMIRE. What is the basis for that statement?

Mr. BENNETT. I simply have the word of the Assistant Secretary of the Treasury who is responsible for this matter. I do not have a figure in written form.

Mr. PROXMIRE. I am very much shocked by that statement, because the estimates we have were made by very competent economists. They are not persons who have no knowledge of what they are talking about. Dr. Holland and Dr. Pechman probably know more about this subject than anybody else in America. That makes me feel that if the Treasury is going to come in at the 59th second of the 59th minute of the 11th hour, so to speak, and make this kind of assertion, it is very, very shocking. The fact is that when they went before the Committee on Ways and Means, the Treasury was represented by Mr. Harrington. The estimates of Dr. Holland and Dr. Pechman were never challenged by the Treasury or by Mr. Harrington. It seems to me that on that basis, the estimate of the Treasury must certainly be evaluated in that light.

I do not question for a moment the veracity of the Senator from Utah. I think he is a man of complete integrity. However, I would appreciate it if I could see the document to which he has referred and place it in the RECORD at this point, because I think it is pertinent.

Mr. BENNETT. I said the figures are not in a document. These are notes which I have made; and the figure of $225 million came to me verbally from the Assistant Secretary of the Treasury.

I have some material to confirm the $83 million estimate on dividend tax withholding; and when I have a chance to get the floor, after all these hours, I shall be glad to spell out that point.

Mr. PROXMIRE. Mr. President, I have concluded my presentation.

Mr. JOHNSON of Texas. Mr. President, would it be agreeable to allow the opposition 20 minutes and the proponents 10 minutes, and then to have a yea-and-nay vote?

Mr. DOUGLAS. Mr. President, I am sure the Senator from Wisconsin would permit me to ask a final question.

Mr. PROXMIRE. Certainly.

Mr. DOUGLAS. Do I understand that the figures indicate that 57 percent of the interest received does not have taxes paid upon it?

Mr. PROXMIRE. That is correct.

Mr. DOUGLAS. And 10 percent of the dividends do not.

Mr. PROXMIRE. Fifteen percent.

Mr. DOUGLAS. So these sums really run into the hundreds of millions of dollars, as the estimates show.

Mr. PROXMIRE. They run into the billions of dollars.

Mr. DOUGLAS. Is it not fiscally irresponsible to oppose such an amendment, which would bring in such large amounts of much needed revenue without increasing the tax rates?

Mr. PROXMIRE. Yes, it is the height of fiscal irresponsibility to oppose this amendment; and it is the height of fiscal responsibility to support this amendment, because, as the Senator from Illinois has pointed out, it will bring in a great deal of revenue.

The Senator from Utah said it would bring in only $325 million, in the aggregate. We say the amendment will bring in $1 billion; and I call the attention of the Senator from Utah to the 30 pages of very, very careful documentation which I put in the RECORD, Saturday night.

At the last minute the Treasury has brought in another estimate, although the experts on this matter testified in a well-publicized hearing before the Ways and Means Committee; and the Treasury was represented there, but its representatives did not take advantage of that opportunity to challenge that testimony, when they could have.

Mr. DOUGLAS. Then are not these opposition moves the height of irresponsibility?

Mr. PROXMIRE. That is correct.

Mr. JOHNSON of Texas. Mr. President, will the Senator from Wisconsin yield?

Mr. PROXMIRE. I yield.

Mr. JOHNSON of Texas. I ask unanimous consent that beginning at this time, the proponents of the pending amendment may have 10 minutes, and the opponents of the amendment may have 20 minutes, after which there be a quorum call; that the quorum call be begun 15 minutes before the taking of the vote on the amendment, and that the time available for the quorum call be charged equally to both sides.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BENNETT. Mr. President, let me ask just what this agreement means.

Mr. JOHNSON of Texas. It means that the proponents will have 10 minutes more, inasmuch as they have already taken considerable time to state their case; and the opponents will have 20 minutes; and 15 minutes before the vote is taken, there will be a quorum call, so Senators will have an opportunity to be present.

Mr. BENNETT. I am attenmpting to determine just how that arrangement will operate.

Mr. JOHNSON of Texas. The Senator from Utah and other Senators who are in opposition to the amendment will have 20 minutes, from which 7½ minutes must be deducted, leaving them 12½ minutes; and the proponents of the amendment will have 10 minutes, from which 7½ minutes must be deducted, leaving 2½ minutes.

Mr. BENNETT. So those of us who oppose the amendment now have 12½ minutes; is that correct?

Mr. JOHNSON of Texas. Yes.

Mr. President, I wonder whether we can obtain an order for the yeas and nays on the question of agreeing to the pending amendment.

On the question of agreeing to the amendment of the Senator from Wisconsin [Mr. PROXMIRE], I now ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wisconsin.

Mr. BENNETT. Mr. President, I should like to ask the chairman of the committee whether he wishes to make a statement in opposition to the amendment. If so, I shall be happy to defer to him.

Mr. BYRD of Virginia. Mr. President, I am glad to have the Senator from Utah proceed.

Mr. BENNETT. Mr. President, one of the points I should like to make in regard to this proposal is to remind my colleagues that our neighbors to the north of us—Canada—tried this arrangement between 1941 and 1947, but abandoned it because they discovered it would not work. It cost much more to collect and operate than the revenue they received from it, despite the fact that they were attempting to withhold only 7 percent of the amount of the dividends.

The Bureau of Internal Revenue has estimated that approximately $1 billion of dividends is paid but not reported by taxpayers. In that amount must be included the amount of dividends which a taxpayer is not required to report because he is allowed the $50 exclusion. The Treasury assumes that of this amount, approximately $830 million would be taxable. That is not the amount of taxes owed; it is the total amount of dividends which would be taxable.

Now we face the problem of what kind of a withholding rate to apply to these dividends. If we apply a 20-percent withholding rate—as this amendment requires—already we overwithhold 2 percent, which is 10 percent of the 20 percent, because the ordinary taxpayer has the privilege of a 10 percent charitable deduction. So we are going to withhold 2 percent more of the dividends than he owes the taxes on.

The joint committee staff has checked out this matter, and figures that the amount which could safely be withheld is somewhere between 10 percent and 15 percent, in order to have a minimum of overwithholding.

At 10 percent of $830 million, $83 million might be withheld. At 15 percent, $125 million might be withheld.

As has already been indicated, overwithholding is a serious problem in this situation, which is different from the situation in which men's wages are withheld or are overwithheld. We know that those who earn wages will have to account for them; but in the United States there are many millions of persons who are living on interest or on the income from investments, in the form of dividends; and many of those people—because people over 65 years of age have a $2,400 joint exemption, for man and wife—owe no taxes. So to impose a straight 20 percent deduction, and reduce their income by 20 percent, would force them—persons who have retired, persons who are unused to dealing with the Government—into a position of constantly having to file applications and requests for refunds, and would impose a serious burden on them, in my opinion.

The situation with respect to the withholding of dividends then involves the

following problem: For the prospect of increasing the pressure sufficiently to collect by withholding between $83 million and $125 million, we would put all these burdens on the place where most of the dividends, I believe, are not being reported, and where they do not have to be reported; and that could be a very serious burden.

In the face of that situation, it is interesting to observe that the Treasury, in a voluntary program in relation to corporations which pay dividends, has been trying to educate those who owe taxes on dividends, so as to persuade them to report them; and the Treasury has had very substantial success during the last year when this plan has been in operation.

My friend, the Senator from Wisconsin, pointed out that this amendment would not cost anything to those who pay dividends; he said it would cost them only four stamps—or one stamp four times a year. But I am sure he must realize that when a taxpayer received a dividend notice, but also received a check which was 20 percent short, he would immediately write to the corporation and would inquire about the difference; and I can visualize a tremendous increase in the amount of clerical work involved, as well as a tremendous disappointment.

The position of the Department on that matter has been that it should be given the opportunity to find out how far this educational program can be carried successfully, and that an opportunity should be given to reduce to a minimum the unreported dividends before we load both the Department and the payers of dividends with the responsibility of reporting or refunding, which can be extremely expensive, and which, after all, was the reason why Canada decided to drop this arrangement.

During the discussion before the time limitation, it was made perfectly clear to me that the proponents of this measure realize that when we move over into the field of interest and withholding of interest, we are in an area where it is practically impossible to be completely sure that any withholding system will work.

We heard the discussion of the difficulties which arise from the cashing of coupons of bearer bonds. We have the whole problem of interest owed between individuals. I know the proposal is that we shall limit this proposal entirely to interest paid to corporations and the Federal Government, but when that is done, the estimate of undeclared interest is greatly reduced.

The estimates being used for the amount of interest taken into consideration include all interest, both that paid by private citizens and that paid by corporations and the Government. I think the passage of money between people and between corporations and people as interest is so complicated and there is so much of it that it would be completely impossible to develop a system by which interest could be withheld on an equitable basis. Yes, some of it could be withheld under certain circumstances, but I do not think enough of it could be caught to justify the burden which would be placed on the taxpayers.

I have in my hand a schedule of the estimated revenue yield of withholding on dividends and interest. The Treasury estimates, on the basis of 1956 data, that the gap on dividends is $1,064 million, and the gap on interest is $3,270 million. That is a total of $4,300 million.

If an additional $1 billion in taxes is to be collected, we must assume that all the dividends and interest not now being reported will yield an average of more than 30 percent.

Of the $1 billion in dividends, $120 million is attributable to nontaxable returns, $60 million to exclusions on taxable returns, leaving the amount attributable to taxable returns $885 million.

If the withholding tax were applied at 20 percent, the yield from the withholding tax would be $168 million. If it were 10 percent, the yield would be $89 million.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. BENNETT. I am on limited time.

Mr. PROXMIRE. The Senator does not have to yield if he does not want to.

Mr. BENNETT. I would rather continue.

Turning to the schedule of interest, the estimated gap, again based on 1956 data, is $3,270 million, of which almost $1 billion is attributable to nontaxable returns, and the amount attributable to taxable returns is $2,290 million. It is assumed $1,500 million would be subject to withholding, assuming interest was withheld only on interest paid on corporate payments and Federal Government bonds. If it were withheld on the basis of 20 percent, the yield would be $285 million. I said $225 million earlier. I am happy to have that statement corrected. If it were withheld at 10 percent, which is the probable and more equitable figure, we could expect $150 million.

So the $1 billion in revenue that it was stated would be saved really shrinks when all the other actual factors are taken into consideration.

These figures, of course, are based on the use of withholding alone, and can be whittled down on the basis of better enforcement. The better the enforcement and the better the compliance, the lower these figures will go.

Mr. President, I think I have used as much time as I had allotted to me.

The PRESIDING OFFICER. The time of the Senator from Utah has expired. The Senator from Wisconsin [Mr. PROXMIRE] has 2½ minutes.

Mr. PROXMIRE. Mr. President, I understand I have 7½ minutes after the quorum call. Is that correct?

The PRESIDING OFFICER. That is correct. Each side has 7½ minutes after the quorum call. The Senator from Wisconsin has 2½ minutes before the quorum call.

Mr. PROXMIRE. Mr. President, the Senator from Utah has still not given us any documentation of his claim that we are overestimating the amount of money the Treasury can pick up by this amendment. I have in my hand a letter from the Assistant Secretary of the Treasury. The letter is dated May 24. This is not a call on the phone. This is not notes. It is a letter. It is signed by Jay W. Glasmann, assistant to the Secretary. Mr. Glasmann estimates the withholding tax on dividends will raise $200 million as the Senator from Utah said. He says it in black and white.

Mr. President, I ask unanimous consent that the letter be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

OFFICE OF THE SECRETARY
OF THE TREASURY,
Washington, D.C., May 24, 1960.

Hon. JOSEPH S. CLARK,
U.S. Senate,
Washington, D.C.

MY DEAR SENATOR CLARK: Thank you for your letter of April 21 to the Secretary regarding the Treasury's position with respect to proposals to withhold tax on dividends at source.

At the request of the Senate Finance Committee, the Treasury staff is cooperating with congressional staffs in an examination of alternative methods which might be used in withholding on dividends.

As you know, however, the Treasury Department has not proposed withholding on dividends. In his letter of October 14, 1959, to you, Under Secretary Scribner suggested that every effort should be made to work out effective voluntary means of securing more complete reporting of dividends before legislation is enacted which would provide for withholding on dividends. While I am sure you are familiar with our program for improving voluntary compliance, I am enclosing a copy of our interim report which sets forth the various steps which have been taken by the Service and dividend payers in recent months. We believe that these efforts have resulted in improved reporting of both dividends and interest in the returns filed for the income year 1959. In this regard, it is perhaps significant to note that the April 15 income tax collections from individuals, other than withheld taxes, have been considerably higher than predicted, although the March 15 corporate tax collections were below expectations.

Incidentally, the estimate from the Prentice-Hall statement that withholding would provide the Government an additional $400 million in revenue seems to be far too high. Assuming that the gap between dividends received by individuals required to file tax returns and dividends they actually report for income tax purposes is of the general magnitude of $1 billion, the amount of additional revenue collected as a direct result of withholding would be only about $200 million if the withholding rate were the 20-percent first bracket rate. If the withholding rate were lowered to 14 percent, for example, to take account of the standard deduction and the 4-percent dividend received credit and thus reduce the extent of overwithholding, the additional revenue from withholding would be $140 million.

Sincerely yours,

JAY W. GLASMANN,
Assistant to the Secretary.

Mr. PROXMIRE. Mr. President, the computation on how much this would save is very simple. It would save, on the basis of the Treasury's experience over a period of years, 15 percent of the dividends that are now paid to individual American taxpayers. All one has to do is to take the dividends paid this year and compute 15 percent of them, and he will be able to tell the amount that escapes. Then we apply a factor

which represents the amount below withholding. We have applied the generous factor of $450 million. On the basis of exhaustive tables I put in the RECORD on Saturday, we come up with the figures I have given.

On interest, it showed 57 to 60 percent interest that was not paid. Again, we made a generous allowance that would go to people whose incomes would be below the minimum requirements for filing, and we came up with a figure which, in the aggregate, would be something like $1.4 billion on the amount of interest that is paid this year and the amount of dividends that are paid this year. That should be paid in taxes but that is now lost.

We want to be conservative. On the basis of this computation, while we will not get all that is lost, on the basis of our very good experience with withholding of taxes from wages, we compute that we should be able to get 95 to 99 percent compliance. On the basis of those estimates, we would get well over $1 billion.

This estimate is made on the basis of studies by reputable economists, who have made not a casual study of it on the basis of a few days, but who have devoted their lives to the subject. They consistently estimate that this amendment will raise $1 billion.

The PRESIDING OFFICER. The time of the Senator has expired.

By unanimous consent, a quorum call has been requested, and the clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

[No. 241]

Aiken	Fong	Lusk
Anderson	Frear	McCarthy
Bartlett	Fulbright	McClellan
Bennett	Gore	McGee
Bible	Gruening	McNamara
Brunsdale	Hart	Martin
Bush	Hickenlooper	Moss
Byrd, Va.	Hill	Muskie
Cannon	Holland	Pastore
Carroll	Javits	Prouty
Chavez	Johnson, Tex.	Proxmire
Clark	Johnston, S.C.	Randolph
Cotton	Jordan	Scott
Dirksen	Keating	Stennis
Dodd	Kuchel	Talmadge
Douglas	Lausche	Wiley
Engle	Long, Hawaii	Williams, Del.
Ervin	Long, La.	Young, Ohio

The PRESIDING OFFICER. A quorum is present.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent to make a brief statement without the time being charged to either side.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSON of Texas. Mr. President, I understand that the Senator from Pennsylvania [Mr. CLARK] has two amendments and the Senator from Illinois [Mr. DOUGLAS] has one amendment, a total of three amendments which they expect to offer. I should like to ask unanimous consent that there be allotted 30 minutes on each of those amendments, the time to be equally divided between the proponents of the amendment and the leadership, and that 10 minutes before a vote on any amendment there be a quorum call. I shall be prepared to join the proponents of the amendments in asking for the yeas and nays.

The PRESIDING OFFICER. Is there objection?

Mr. MONRONEY. Mr. President, I do not intend to object; however, I have a minor amendment with respect to jet airplanes upon which I shall need only about 10 minutes. It is a simple amendment.

Mr. JOHNSON of Texas. I ask unanimous consent that debate on the Monroney amendment be limited to 10 minutes to a side.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GORE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Texas yield to the Senator from Tennessee?

Mr. JOHNSON of Texas. I yield.

Mr. GORE. As I understand, the Senator from Texas did not include in his statement amendments which I have at the desk.

Mr. JOHNSON of Texas. No; I did not. I included only the two Clark amendments and the one Douglas amendment.

Mr. GORE. I would be willing to have an amendment that I may wish to offer as a substitute for the amendment to be proposed by the Senator from Illinois [Mr. DOUGLAS] included, with an additional 30 minutes being given to such amendment.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that, in the event the Senator from Tennessee offers the amendment to which he refers, that is, an amendment to the amendment of the Senator from Illinois, he be allowed 30 minutes, to be equally divided.

Mr. GORE. I shall not at this time agree to any limitation of time on the amendments to the bill which I expect to offer.

Mr. JOHNSON of Texas. I understand that.

Mr. GORE. I wish to say specifically it is not my purpose, intention, or desire to delay action on the bill, but on the technical matters before us questions can sometimes arise which one cannot answer in 10 minutes.

Mr. JOHNSON of Texas. I understand.

The PRESIDING OFFICER. Without objection, the request of the Senator from Texas is agreed to.

Mr. JOHNSON of Texas. I wish to express my appreciation to the authors of the amendments. I know this is an exacting, trying sacrifice for all of us, but we are in the last 2 weeks of the session. We have many important bills, appropriation and other bills, which are backed up.

UNITED STATES-JAPAN SECURITY TREATY

Mr. President, in addition, I think I should inform the Senate that I have received a call from the Secretary of State, and he has confirmed that call with a letter saying:

This is just to confirm my telephone conversation with you a few moments ago that the Department of State feels very strongly that action on the ratification of the United States-Japan Security Treaty should be taken as expeditiously as possible.

I should anticipate that if we can conclude consideration of the bill now before the Senate at a reasonable hour this evening, we shall proceed to executive session to consider the treaty, with no final action on it today, but certainly we shall go into executive session for the purpose of considering it.

Mr. CHAVEZ. Mr. President, may I ask if it is proposed that any other appropriation bills will be considered later this evening?

Mr. JOHNSON of Texas. If we can take up legislative matters in which there is no controversy, I should like to do so in order to get them to conference as soon as possible. But if the legislation involves any debate, we should proceed to consider the United States-Japan Security Treaty, in view of the request of the distinguished chairman of the Committee on Foreign Relations and the Secretary of State.

We will ask for yea-and-nay votes on the two Clark amendments and the one Douglas amendment.

Does any Senator, other than the Senator from Tennessee, have any amendments to offer?

Mr. CLARK. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield.

Mr. CLARK. I have been advised by the junior Senator from Louisiana [Mr. LONG] that he had an amendment.

Mr. JOHNSON of Texas. We will not include any amendment which he proposes to make in the request for limitation of time.

Mr. CLARK. He may decide not to make it.

Mr. DIRKSEN. Mr. President, before the majority leader turns to other matters, may I ask whether it is proposed to have a vote on the treaty tonight?

Mr. JOHNSON of Texas. No.

Mr. DIRKSEN. There will be no vote on the treaty tonight.

Mr. JOHNSON of Texas. With all the amendments pending, I doubt whether we shall get that far, but if Senators desire to proceed with consideration of the treaty, I would not preclude a vote tonight. There will be several votes. There will be three votes, two on the Clark amendments and one on the Douglas amendment. There will probably be some additional votes on the amendments which the Senator from Tennessee [Mr. GORE] has submitted. I do not think there will be much time left for the consideration of any other subject. I do not think we shall be finished in time to do so, but if we do, I want to be free, if I desire, to proceed with legislation with respect to which there is no controversy.

Does the Senator from Illinois desire to inquire further?

Mr. DIRKSEN. It means being here late.

Mr. JOHNSON of Texas. Yes; I expect that we will be here late, and on Saturdays from now until adjournment; 20 or 30 substantial pieces of legislation have yet to clear the Senate and go to

conference. If we talk all day, we shall have to vote all night.

Mr. DIRKSEN. Mr. President, in view of the very substantial calendar to which my distinguished friend, the majority leader, alludes, I am wondering whether he has in mind at least a tentative date for the adjournment of the Congress.

Mr. JOHNSON of Texas. I am very desirous of concluding our deliberations at as early a date as possible. I think we ought to stay here until we do our job. We were elected to come here and do the work of the Senate, which is of the utmost importance. We may have to delay some work for a few days to take up some other matters, such as convention matters. But I hope we can conclude all our work before the conventions. If we cannot do so, I know of no reason why we should not come back after the conventions to get the job done. That is my opinion in the matter.

I think every Senator ought to arrange the matter of club or other engagements that he may have, dinner or otherwise, and be prepared to sit here until late in the evening and come in, generally speaking, early in the morning.

We are not coming in until noon tomorrow because the distinguished chairman of the Committee on Foreign Relations pleaded with us to give him a morning to report important bills. The chairman of the Subcommittee on Labor wants to proceed with the consideration of the minimum wage bill tomorrow. I want to make that possible. Other committees want to meet. We cannot close down the committee system.

Generally speaking I believe we will be coming in early in the morning and staying until late in the evening. We can expect rollcall votes all during that period, because practically everything before us will be controversial. We have established a sort of courtesy arrangement in the Senate, so that whenever any Senator wants a yea-and-nay vote he generally gets it, even if it does not get more than 10 or 12 votes, and even though it usually takes more than 10 minutes of the Senate's time.

I would prefer, if there is no serious question involved in an amendment, to have a standing vote or a voice vote on such an amendment. It seems, however, that hardly any author of an amendment is willing to have that kind of vote, and feels he must have a rollcall vote, because not to get a rollcall vote may be considered as downgrading his amendment and may affect his standing as the author of an amendment, even though it does nothing more than demonstrate his ineffectiveness.

Mr. DIRKSEN. I have one other observation. The Committee on Labor and Public Welfare proposes to meet at 8 o'clock tomorrow morning.

Mr. JOHNSON of Texas. I was informed they would meet at 9 o'clock.

Mr. DIRKSEN. It has since been changed to 8 o'clock. If perchance today's session should run until midnight or 1 o'clock, I can only say that I may be a little obfuscated at such an early hour in the morning in coming to grips with a technical amendment at 8 o'clock, knowing of no way to absent myself and embrace Morpheus now and then in orrer to regain vitality and energy, and therefore this schedule may be a little difficult.

I would say, in the nature of an entreaty, that committees should not start meeting at 6 o'clock or 7 o'clock, even though I do get up to work at that hour. A sustained 18- or 20-hour day might cause a little physical rebellion.

Mr. JOHNSON of Texas. All I can say in that regard, is I imagine the Senator from Illinois has more influence with the Internal Security Subcommittee than I have. If he wishes me to join him in any request that a committee postpone its meeting in the morning and meet during the session of the Senate in the afternoon, or whatever request he has to make, because he is always so accommodating to me and because I believe in the doctrine of reciprocity, I will try to perform the best I can to meet his desires.

Mr. DIRKSEN. My difficulty is that my influence wanes insofar as the Labor Committee is concerned, with particular reference to the minimum wage bill. That is my problem. So the problem of how to be in 2 places at one time and how to perform my public responsibilities both in committee and on the floor of the Senate may offer some difficulty.

Mr. JOHNSON of Texas. If the Senator could work out a schedule under which he could meet with the Labor Committee once or twice, perhaps he would not have to attend meetings of that committee regularly after that.

Mr. DIRKSEN. There are a number of amendments that need to be discussed and disposed of before the matter has been thoroughly presented.

Mr. JOHNSON of Texas. I wonder, while we are in this good humor, if we could get a unanimous consent agreement on the Clark amendment.

I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. PROXMIRE. Mr. President, have the yeas and nays been ordered on my amendment?

The PRESIDING OFFICER. The yeas and nays have been ordered on the Senator's amendment.

Mr. PROXMIRE. Mr. President, how much time have I remaining?

The PRESIDING OFFICER. On the Proxmire amendment 15 minutes remain, and the time is equally divided.

Mr. PROXMIRE. I yield myself 3½ minutes. I have already spoken on the amendment. However, there were very few Members of the Senate present at the time, and I shall repeat some of what I have said.

The amendment would withhold the tax on dividends and interest. It would raise, on the basis of what I think are competent, conservative estimates, $1 billion. In the course of the debate the opposition to the amendment has challenged this figure and has claimed that it would raise only $445 million.

I refer Senators who are skeptical to the CONGRESSIONAL RECORD of yesterday at page 13265. There is established the basis on which I made my computations. Very simply, the amount of interest which now escapes taxation is approximately 58 percent, and the amount of dividends is 15 percent. That has been applied on the basis of returns on dividends made by the Internal Revenue Service and the Department of Commerce. The returns on interest made by these two agencies have been computed in a very simple mathematical manner. I am sure that any Senator who wants to confirm it can get all kinds of confirmation there.

I wish to point out that my proposal is not a new or radical proposal. It was a part of the law of the land on interest from 1913 to 1916. Taxes were withheld on interest from 1913 to 1916.

In 1942, when the proposal was made to withhold taxes on wages, the House passed the proposal to withhold taxes not only on wages and salaries, but also on dividends and interest. The Senate rejected it. In 1950 and 1951 the same proposal was made.

There have been objections, and very sincere and proper objections, to this kind of proposal on the ground that it would be hard to administer and would impose a hard burden on the withholding agent, and would result in hardship for charitable organizations and individuals.

At the present time all these objections have been eliminated. The fact is that the withholding provision on wages has greatly eased the burden on the Internal Revenue Service. It is almost no burden on the withholding agent. All he has to do is deduct 20 percent of interest and dividends paid and mail it to the Government in each quarter. So far as the individual is concerned, the burden has been greatly reduced, because he can do it quickly in every quarter.

As a matter of fact, the wage earner has to wait a year. We have provided that the interest and dividend recipient may make his application for refund at the end of each quarter. Furthermore, the loss would be only in the first quarter. After that, he will receive his refund regularly. His income, therefore, would be compensated for the withholding tax from that period on.

It seems to me the basic argument for this amendment is a moral argument. The amendment provides that funds now owing to the Federal Government, now not paid to the Federal Government would be paid to the Federal Government. The fact is that the funds not paid to the Federal Government on dividend and interest income are not really the property of the taxpayer who possesses them and defrauds the Federal Government of them. They are the property of the Federal Government itself. On that basis alone the Senate should adopt the amendment.

I did not bring out this point at length during my initial presentation, but this proposal would be a convenience for the taxpayer. It would make it far easier for the taxpayer to know how much in dividends and how much in interest he had to report.

The PRESIDING OFFICER. The time of the Senator from Wisconsin has expired.

Mr. WILLIAMS of Delaware. Mr. President, I yield myself 4 minutes in opposition to the amendment.

The PRESIDING OFFICER. The Chair understands that the Senator from Utah is in control of the time of the opposition.

Mr. WILLIAMS of Delaware. He is not present.

Mr. DIRKSEN. Mr. President, I yield 4 minutes to the Senator from Delaware [Mr. WILLIAMS].

Mr. WILLIAMS of Delaware. Mr. President, I oppose the amendment of the Senator from Wisconsin. I do not quarrel with the objectives of the Senator from Wisconsin; I merely think his amendment will not work.

I point out that on page 2 of his amendment it states that the amendment is applicable to "every person (other than an individual)."

If one examines the Code, he will find the following definition of "person":

> The term "person" shall be construed to mean and include an individual, a trust, estate, partnership, association, company, or corporation.

In other words, if a partnership is operating a filling station or a small grain store and is borrowing money from a bank, under this amendment when it pays the bank interest it would withhold, according to the amendment of the Senator from Wisconsin, 20 percent of the interest owed the bank.

Any Senator who has had experience borrowing money knows how far he will get when he tells the bank that he is withholding 20 percent of the interest he owes the bank.

Likewise, if a company, partnership, or a corporation is financing its trucks through a finance company, a part of that is interest. The company, under this amendment, would withhold, as it made its financing payment, 20 percent of that which is due as interest to the finance company. Just how he would know what this amounts to, no one knows.

Likewise, the amendment makes no exception for coupon bonds. The chairman of the committee and I have been working for many months to reach a workable solution of this problem because we believe there is merit to the idea if a solution can be found for some of the difficulties, but thus far our committee has not found it.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. CURTIS. I support the Senator from Delaware in opposition to the amendment. Many problems are involved. Many recipients of interest and dividends are not in a tax bracket at all. Perhaps an educational or a charitable fund which receives interest or dividends—perhaps an elderly person having a double exemption—pays no tax. Refunds quarterly would be very costly and complicated.

While the proposal may have merit if some of the problems can be solved, it certainly is not workable today.

Mr. WILLIAMS of Delaware. I thank the Senator from Nebraska.

Neither our committee nor the Treasury has been able to find any solution which we think will work.

Another example is the coupon bonds. The Treasury Department itself has outstanding billions of dollars in unregistered coupon bonds. They were sold to the American people in good faith. They have maturity dates of 25, 30, and 40 years from now. Those bonds carry negotiable coupons to be cashed anywhere. They are payable to the bearer and are subject to being cashed at filling stations or grocery stores at face value at any time after the due date. No place is even provided on the back of the coupon for endorsement.

If the amendment of the Senator from Wisconsin is adopted it will mean that the value of all coupons will be reduced by 20 percent. A filling station operator cannot know in what tax bracket the person cashing the coupon is. Are we by legislation going to devalue all of these negotiable coupons?

The bill provides that a $600 exemption may be claimed if one files a certification that his taxable income will not exceed $600, but suppose his income is $610; then the bill provides that 20 percent of his income be withheld. This is not fair.

Mr. President, this proposal would represent a severe hardship on some persons. Canada tried to solve the problem. It passed a similar withholding tax on interest and dividends. The result was that it became so complicated and caused such confusion that they had to repeal the law. I know of no instance in which any country has been successful in imposing such a withholding tax. It has not been possible to devise a method to administer a withholding tax on interest and coupons without imposing a severe hardship on both the companies involved and the taxpayers.

It may be possible to withhold a portion of the interest at banks. That may be the solution of this problem, but the difficulties must first be ironed out.

The PRESIDING OFFICER. The time of the Senator from Delaware has expired.

Mr. WILLIAMS of Delaware. I yield myself 1 more minute. I conclude by saying that at this time I do not believe that the proposal as before us is in a workable form. It needs more careful committee study.

I point out one further misunderstanding. In the colloquy with the Senator from Vermont [Mr. AIKEN], the Senator from Wisconsin said that his amendment did not require a withholding tax on cooperatives. As I understand his amendment it would.

I call attention to the language on page 8, beginning on line 13 and continuing through line 15, under exemptions for the withholding of dividends:

> Dividends paid by a Federal Reserve Bank, Federal land bank, Federal home loan bank, central bank for cooperatives, or bank for cooperatives.

I fail to find any exemption for the cooperatives themselves.

The amendment in the form in which it is now before the Senate should be rejected.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, how much time have I remaining?

The PRESIDING OFFICER. The Senator from Wisconsin has 4 minutes remaining.

Mr. PROXMIRE. In view of the fact that I am the mover of the amendment, I would appreciate it if the opposition would complete its remarks. Then I will take the 4 minutes I have remaining and will then take my seat.

Mr. WILLIAMS of Delaware. If the Senator from Wisconsin has nothing further to say, I will yield back the remainder of my time, if he will yield back the remainder of his time.

Mr. PROXMIRE. I have plenty to say.

The Senator from Wisconsin will speak, but after the opposition has used its remaining time.

Mr. WILLIAMS of Delaware. I suggest that the vote be had now.

Mr. PROXMIRE. Does the opposition yield back the remainder of its time?

Mr. WILLIAMS of Delaware. No.

The PRESIDING OFFICER. The Senator from Utah is in charge of the time of the opposition. In the absence of the Senator from Utah, the Chair rules that the acting minority leader is in charge of the time of the opposition.

Mr. WILLIAMS of Delaware. There is nothing in the rules, as I understand them, which requires that we yield back our time.

Mr. PROXMIRE. As I understood in what I considered a personal agreement with the Senator from Delaware, he was waiting for me to use part of my time. I shall use a small portion of it now to sum up my argument.

Mr. WILLIAMS of Delaware. That is perfectly satisfactory.

Mr. PROXMIRE. Mr. President, the burden of the opposition, as developed by the Senator from Delaware—and I think he made as good a case as anyone could—is that the proposal needs study; that many problems have not been solved.

In the first place, he objected to the assertion that the amendment applies to a person. I think we cleared that up very emphatically during the course of the initial presentation; and the Senator from Delaware, when he stated the definition of "person," pointed out that a person is exempt. So indeed, an individual, a sole proprietor, is exempt; he does not have to withhold taxes. The bill is clear. It says so.

The Senator from Delaware raised the point about coupon bonds. He argued that they are payable to the bearer and are negotiable instruments.

The provision is clear that if a person has a coupon which has a $60 face value, when he goes in, he gets $48, or 20 percent less than the face value. If it is a grocery store or filling station which cashes the bond, it simply sends the coupon to the bank; the bank sends $48 to the filling station; the bank sends the coupon to the corporation; the corporation sends

the bank $48; and the corporation then sends the difference to the Government.

I do not know how this could be simpler. The Senator has raised a complication without real meaning, because the overwhelming majority of people cash their bonds or coupons in banks, not filling stations or grocery stores.

As to educational institutions, the persons who drafted the amendment were ingenious. Incidentally I did not do it. They provided that an educational institution could retain a part of the withholding tax on its employees. It is a tax which the institutions have to withhold from its employees anyway.

This could compensate them for the overwithholding of the interest and dividends due them. On the basis of very careful study, we found that, therefore, this amendment would result in practically no inconvenience to any educational or charitable foundation or any church, because in almost every case they have employees.

The Senator from Delaware talked about the shape this amendment is in. It is the result of years and years and years of work by extremely competent people. And beginning in 1942, they met objection after objection. Last year, the Senator stated that it needed more study; and very careful study has been given to it since that time.

We should particularly remember that the amendment will not increase taxes, but merely will enable the Government to collect more of the taxes which already are due it.

Mr. President, how much time remains available to me?

The PRESIDING OFFICER. One minute.

Mr. PROXMIRE. Does the opposition wish to use some of its time at this point?

The PRESIDING OFFICER. The Senator from Utah has 2½ minutes remaining.

Mr. BENNETT. Mr. President, is this a matter of jockeying between the two groups?

How much time remains available to me, Mr. President.

The PRESIDING OFFICER. Two and one-half minutes.

Mr. BENNETT. I shall now use 1½ minutes of it.

Mr. PROXMIRE. In view of the fact that I am the mover of the amendment, I shall appreciate it if the Senator from Utah will permit me to have 1 minute at the conclusion—just 60 seconds.

Mr. BENNETT. I shall be happy to do so.

Mr. PROXMIRE. I thank the Senator from Utah.

Mr. BENNETT. Mr. President, it should be borne in mind that the Treasury has embarked on a very effective program; and if it can be worked out, it will be infinitely less costly than the program proposed by means of the pending amendment.

It is hard to estimate the costs and the complexity of the pending amendment to those who pay interest and dividends, for the amendment would not only require them to set up machinery to withhold, but would also require that they be prepared at all times to explain to those from whom they withhold why they withheld and what the reasons were.

One who withholds wages from an employee is dealing with a man in a shop who can be met face to face. But one who withholds dividends and interest has to deal with people across the country, by mail.

The hardship of overwithholding cannot be stressed too much—the difficulty of refunding and determining the proper amount of refunds due, and the difficulties faced by those who receive the interest and the dividends, in connection with filing applications and going through all the refunding process.

Finally, the Senator from Wisconsin and the Treasury and the Senator from Utah, who is on the Treasury's side, are in complete disagreement as to the amount of money involved.

The PRESIDING OFFICER. The time available to the Senator from Utah has expired.

Mr. PROXMIRE. Mr. President, the Senator from Utah said the Treasury is conducting a very effective voluntary program or system of informing people that they have to pay taxes on dividends and interest. I call attention to the table which appears on page 13265 of Saturday's RECORD, which shows that since 1949 the percentage of adjusted payments and the estimated gap have been substantially increasing, in the case of dividends paid and the amounts accounted for on income-tax returns; and as regards the estimated gap between the interest paid and the amounts accounted for on income-tax returns, the gap is a shocking 58 percent. So no program such as that now being conducted by the Treasury will do away with that gap. Furthermore, that program is extremely expensive—to notify every dividend or interest recipient what he should receive will cost millions. One mailing to A.T. & T. stockholders in postage alone will cost more than $64,000.

Mr. President, it seems to me that this amendment will be most effective. It will bring in a cool billion of dollars of additional revenue each year, without increasing taxes one nickel.

By means of the pending amendment, all groups, wage earners and stockholders, will be treated exactly in the same way, without any discrimination.

Mr. BUTLER. Mr. President, I ask unanimous consent to have printed in the RECORD, at this point, a statement I have prepared in opposition to the amendment.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR BUTLER REGARDING WITHHOLDING OF INCOME TAX ON DIVIDEND AND INTEREST PAYMENT AT SOURCE

The proposed amendment to withhold income tax on dividend and interest payments should not, in my opinion, be enacted into law at this time or at any other time without first having complete hearings on every aspect of the problem. The junior Senator from Wisconsin has argued that the amendment as drafted at the present time thoroughly meets all of the arguments that have been made against such legislation in the past. With this statement I do not agree.

Withholding income tax on dividends and interest at source is an extremely complex and complicated problem. It affects many individuals and organizations aside from the corporation making the withholding. To say that all the paying corporation has to do is to deduct a straight 20 percent of the total dividend payment and then submit that amount quarterly to the Treasury at a total cost of 16 cents—a 4-cent stamp per quarter—is neither realistic nor consistent with its effect on the many taxpayers, both corporate and individual, that would be affected.

The contemplated action would substantially increase the amount of expense of clerical work for the corporations, paying agents, fiduciaries, stockbrokers, and others. This burden will be in addition to the tremendous administrative burden already placed upon them, of necessity, if they are to comply with existing tax laws.

The Bank & Trust Company Tax Association at Philadelphia, Pa., recently conducted a survey of the larger trust companies in its association (those with trust assets exceeding $1 billion). That survey revealed that the present recording of several hundred thousand dividend items would be doubled in volume and expense, should a withholding on dividend law be enacted. These companies estimate an additional annual expenditure of over $100,000 with not a cent of additional return. In fact, the expenditure will be made in the face of decreased deposits since a large number of its depositors will receive 20 percent less in dividends, much of which usually finds its way into the depositors' accounts.

A trust company in my own jurisdiction—the Mercantile Safe Deposit & Trust Co. of Baltimore, Md.—estimates that additional expenditures in its case would be in excess of $70,000. These estimates are based on many intangibles. In this connection I include a list of the many additional administrative activities and costs that will be incurred by trust companies if this amendment is passed:

SPECIFIC APPLICATIONS OF THE INCREASED ADMINISTRATIVE ACTIVITIES AND COSTS FOR TRUST COMPANIES

Specific details on units affected

1. Dividend collection, bookkeeping, and tabulating units:

(a) Doubling of posting entries and of time involved in the process.

(b) Doubling of I.B.M. card supplies.

(c) Substantial increase in ledger files and space.

(d) Doubling of storage space.

(e) Additional bookkeeping and/or I.B.M. equipment needed.

(f) Difficulty of allocating tax withheld in all "Nominee" registration accounts.

(g) Increase (doubling) in number of "Holding" cards. (I.B.M.)

(h) Substantial increase in personnel and overtime costs for all of the above.

2. Income distribution units:

(a) Letters of notification and instruction will be required by reason of reduction in distributable income to beneficiaries.

(b) Added expense of redetermining amounts of income available for periodic distribution—in all accounts holding dividend-paying stocks (every account to be analyzed to determine this).

3. Statement units:

(a) Doubling of number of entries as to dividends.

(b) Substantial increase in statement paper supplies and cost thereof.

(c) Increased costs of microfilming statements.

(d) Need for additional equipment and storage space requirements.

4. Investment department:

(a) Every account will have to be reviewed for possible changes in investments.

(b) An increase in the workload will result in administering all accounts invested in common trust funds for computing distributions to the participating trusts.

5. Tax division unit:

(a) Notifications will be required to all parties in interest re changes in reporting of taxable income, at increased costs.

(b) Tax information letter forms will require reprinting with its attending increase in costs.

(c) It is anticipated that the volume of Individual Form 1040 returns now prepared for our customers and trust beneficiaries will double—which returns are done within the Tax Division. (Returns heretofore not required will now have to be filed to obtain refund.)

(d) In trusts whose instruments require guaranteed annuity payments each year—if the tax is withheld, it is foreseen that this will result in a long line of litigation through the courts now already burdened with unsettled cases.

(e) An increase in the work volume will result in recovering the tax and distributing the refund in all "nontaxable" accounts.

(f) Will create additional delays in filing all tax returns involving dividend income.

(g) Result in increasing the complexity of preparing fiduciary income tax returns (forms 1041) at considerable delay and expense—by reason of making extra computations on the returns.

6. Banking departments:

(a) Reduction in deposits and corresponding loss of earnings (since net dividends after tax withheld will be deposited instead of present gross).

(b) The assistance program to correspondent banks will have to be expanded at considerable additional expense.

7. All departmental units:

(a) Loss of time at executive and administrative supervisory levels in "study" on any radical change in the tax law such as is being proposed—instead of applying this time to increase earnings.

(b) Increased correspondence and telephone inquiry time will result.

(c) Increased need for additional space and storage.

(d) Increase in personnel.

(e) Increased need for additional bookkeeping equipment.

Additionally, many legal problems would be encountered. A question would necessarily arise as to whether an annuitant under a trust instrument would receive the amount specified in the instrument or a reduced amount adjusted by the tax paid. This would undoubtedly result in lengthy and costly litigation by many annuitants who can ill afford the additional expense.

For some reason the proponents of this type of legislation always equate dividend withholding with withholding taxes levied on wages. The endless problems which can be foreseen with the former, as well as the inequities inherent therein, simply do not exist with the latter.

Withholding on wages is made in conformance with the tax situation of the individual taxpayer. Withholding on dividend income, as presently contemplated, ignores the individual. The necessary result is that those who owe no taxes or are tax exempt will have taxes unjustly withheld.

I have been supplied with a simple illustration which shows the effect of the proposed provision in contrast with the existing provision as to retention of income tax on wages and salaries. This illustration, which I will submit for the RECORD, is based on an 18-percent tax, but the effect will be the same with a 20-percent tax. The only reason for using this table is that it was computed some time ago and I haven't had time to recompute it on the basis of a 20-percent withholding. The computation is based on annual income of $2,400 from dividends and a supposed annual wage of like amount.

	Number of exemptions			
	1	2	3	4
On an income of $2,400. If this is all salary, income tax withheld by employer will be	$314.00	$194.00	$74.00	0
	316.80	196.80	76.80	0
Making overpayment of	2.80	2.80	2.80	0
If income was all from dividends, tax would be	314.00	194.00	74.00	0
Less 4 percent dividend credit	62.40	38.40	14.40	0
	251.60	155.60	59.60	0
18 percent withheld would be	432.00	432.00	432.00	$432
Making an overpayment of	180.40	276.40	372.40	432
As compared with above overpayment	2.80	2.80	2.80	0
The difference between similar taxpayers being	177.60	273.60	369.60	432

According to the 1954 revised optional tax tables, the amount of tax payable by the recipient under both cases is the same, however, the table shows that an individual with four dependents receiving investment income of $2,400 per year at the end of the year would have an overpayment of $432 because the withholding on dividends is in no way based upon his individual tax situation. The wage earner, on the other hand, with the same income would have no overpayment because there would have been no taxes withheld since his exemptions would have been taken into consideration by his employer in computing his withholding tax. A similar disparity results, though in different amounts, in the case of taxpayers with one, two, or three dependents.

Proponents of the measure say this argument has been eliminated by a quick refund provision. It is my understanding, however, that that provision is available only where the dividend or interest recipient has gross income less than the statutory filing requirements of $600 per year, or $1,200 in the case of a person over 65. Clearly, this provision would not even be available to the person of limited income illustrated in the aforementioned table. Quick refund provisions applicable to everyone would be impractical because of the possibility that earned wages in one or more quarters would throw out of balance refunds which may have been made for previous quarters.

Those not covered by a quick refund provision, and this would be many, would be making a perpetual interest-free loan to the Government of a considerable portion of needed income.

The additional administrative burden on the Treasury Department of such a system would be tremendous. Treasury today complains that it is understaffed and yearly asks for additional funds for personnel. That problem would be magnified tenfold if this legislation is passed.

Proponents of this legislation persist in pushing for enactment this year, notwithstanding that just 1 year ago a cooperative program was undertaken by Treasury and industry to educate stockholders and other investors concerning their obligation to report this investment income in their tax returns. I submit for the record examples of these notices:

MASSACHUSETTS INVESTORS TRUST,
Boston, Mass.

INCOME TAX INFORMATION

Status of 1959 distributions for Federal income tax purposes

The following table shows the tax status for Federal income tax purposes of each payment made by the trust during the year 1959. Whether paid to you or credited to your account such payments must be included in your Federal income tax return. This table is designed to assist you in computing the amounts you should report.

If you owned shares on these dates	The Trust paid to you on these dates	These amounts per share		Shares owned as of dates in first column	Making dollar total of	Which are taxable Federally as
Mar. 31, 1959	Apr. 27, 1959	$0.10	×	—		Dividend income.
June 30, 1959	July 27, 1959	0.10	×	—		Dividend income.
Sept. 30, 1959	Oct. 26, 1959	0.09	×	—		Dividend income.
Nov. 30, 1959	Dec. 24, 1959	0.11	×	—		Dividend income.
		TOTAL		—		
Dec. 31, 1958	Feb. 16, 1959	$0.12	×	—		Capital gain.

Under provisions of the Internal Revenue Code, an individual shareholder may (a) exclude from gross income a maximum of $50 of dividends received from qualifying domestic (U.S.) corporations and (b) credit against his tax 4 percent of the amount of such dividends which are not excluded as part of the $50 exclusion. The credit under (b) may not exceed 4 percent of taxable income. All of the dividends described above as "Dividend income" are designated by the trust pursuant to section 34 and 116 of the code as fully qualifying under the aforementioned exclusion provision (a) and the credit provision (b).

For corporations which are shareholders, the trust also hereby designates all of the above "Dividend income" under section 243 of the code as fully qualifying for the 85 percent dividends received deduction.

CAPITAL GAIN DISTRIBUTION

The special capital gain distribution of $0.12 per share paid February 16, 1959, is designated as, and should be reported as, long-term capital gain for Federal income tax purposes, regardless of whether payment was received in shares (tax cost basis, $13.38 per share) with a balance check, or entirely in cash. Under the code this distribution is not considered a dividend for purposes of the exclusion, the credit, or the dividend received deduction referred to above.

STATE TAXATION OF 1959 CAPITAL GAIN DISTRIBUTION

The National Association of Investment Companies in 1959 received rulings from the tax authorities of the various States concerning the taxable status of a capital gain distribution paid by an investment company to individuals. For further information, we suggest that you consult an attorney, a certified public accountant or a tax official in your State.

[1] Cost basis of shares previously held must be adjusted.
[2] Constitutes "investment income," the first $500 of which is taxed at 3 percent, and the balance at 5 percent. "Ordinary income" is taxed at a 3 percent rate. These rates apply to taxable years beginning on or after Jan. 1, 1958.
[3] Michigan has an intangibles tax, and capital gain distributions received in cash form part of the income base. Capital gain distributions received in additional shares do not form part of the income base.
[4] Ohio shareholders who receive distributions in shares of stock, and hold those shares on the following tax listing date, may be subject to an intangibles tax on those shares.

THE DREYFUS FUND INC.

January 25, 1960.

DEAR SHAREHOLDER: The following cash dividend was declared January 6, 1960 payable on January 29 to stockholders of record on January 19: A dividend of $0.08 per share from investment income; a distribution of $0.53 per share from net realized securities profits.

Shareholders who have filed reinvestment orders or are in the Dreyfus voluntary plan will shortly receive a statement with respect to the reinvestment of their dividends. Other shareholders will receive a check under separate cover. After the end of this year we shall advise you of the proper tax treatment with respect to all dividends and distributions paid in 1960.

TAX STATUS OF DIVIDENDS AND DISTRIBUTIONS PAID IN 1959

The following tax worksheet is designed to assist you in computing amounts which should be reported in your Federal income tax return. It may be attached to the duplicate copy of your tax return:

Payment Date	Record Date	No. of Shares (Enter Number Owned by You On Record Date)	Per Share Amounts Reportable As*		Amounts To Be Reported As	
			Dividend Income	Long Term Capital Gain	Dividend Income	Long Terms Gains

TOTAL	----------	XXXXX	$.30	$.30	----------	----------

*All dividends and distributions should be reported whether received in cash or reinvested in additional shares.

The total of column 6 should be reported on schedule A, line 1, of your Federal income tax return; this amount qualifies for the dividend-received exclusion.

The total of column 7 should be reported on schedule D, line 5, of your Federal income tax return. This amount is treated the same as profits realized from the sale of securities held for more than 6 months.

Tax consequences imposed on capital gains distributions by the various States in which shareholders reside differ substantially from one another. It is suggested that you consult your own tax advisors with respect to the tax consequences imposed by your State of residence.

THE DREYFUS CORP.

WELLINGTON EQUITY FUND, INC.—TAX INFORMATION ON 1959 DISTRIBUTIONS

Federal income tax allocations for dividends paid to you or credited to your account is indicated in the boxes shown below. Include in line 1—Schedule A—page 3 of your Federal individual income tax return the amount of dividends shown in line 1. Include on separate Schedule D of your tax returns the amount of long-term capital gains shown in line 1.

1. Dividend increase: $——.
2. Long-term capital gains: $——.

Please retain this card for your 1959 tax return.

Your Wellington Equity Fund income dividends are eligible for tax credits under the Internal Revenue Code, as explained on the reverse side.

SPECIAL TAX PROVISIONS

Under the present Federal tax law, you may exclude from your taxable income each year the first $50 of your total dividend income. The exclusion is increased to $100 in a joint return of husband and wife who receive at least $100 from jointly owned stock or $50 each from stock owned individually.

In addition, you may reduce your Federal income tax by 4 percent of total dividends (in excess of the above exclusion) received during the year. This reduction, however, may not exceed 4 percent of your net taxable income.

These benefits apply only to dividend income, and not to capital gains distributions. Long-term capital gains distributions are taxed at only about one-half the tax rate of ordinary income.

THE CORPORATION TRUST CO.,

Agent.

In this respect the Commissioner of Internal Revenue testified as follows on March 9, 1960, before the House Subcommittee on Appropriations:

"So the program in which the Treasury itself in particular has taken great interest is what we might term 'an educational program.' The banks and corporations of America, including trade organizations—if you want to include the New York Stock Exchange as such an organization—have cooperated. What they have done is various things. For example, they are notifying their stockholders when they receive dividends that the income is taxable. The same thing is true with the banks, who are notifying all of their savings account holders.

I might add the problem is particularly difficult in the interest area. I am not now talking about large amounts of interest paid on corporate bonds, or mortgages. The real problem is in the savings accounts area because in many such cases the interest, as you know, is not credited to the account until after the close of the year when the individual happens to have his book in there for a new deposit. They lose track of the amount and they forget because most people in the low brackets, as you know, maintain no books of account whatever.

"We feel that we are receiving very satisfactory cooperation from these institutions who pay these sums, and we will watch

very carefully the results this year. We will not know until about next year the effect that program may have."

I think we should await until the results of that program have been determined before enacting drastic legislation of the type proposed. To do otherwise would be to change horses in midstream.

We should keep in mind, as well, that the present situation is not as black as some people would make it out to be. The degree of compliance at the present time on a completely voluntary basis with respect to payment of income tax on individual dividend income is 90 percent. This demonstrates that the recipients of dividend income in general have a high degree of respect for the law. Wage withholding, after 17 years of experience, has produced only 97 percent compliance. The educational program will undoubtedly increase the 90 percent figure materially. It is true that there is a larger percentage of noncompliance as to interest recipients, but that figure also should be materially increased as a result of the educational program. We should at least wait for the results of a program undertaken at great expense to many businesses and the Treasury Department before we undertake another program.

A straight 20-percent deduction in interest payment would impose a considerable burden on savings banks which would have to calculate each depositors interest separately in order to credit the proper amount to the depositor's account.

An additional aspect of withholding on savings deposits—one which in spite of its relatively small volume nevertheless presents an extremely serious operational problem to banks—is the necessity of withholding taxes on school savings deposits.

These accounts are maintained in the schools by many banks, often at considerable expense, as a means of encouraging sound thrift habits among school children. Under the proposed regulations, it will be necessary to withhold taxes on such deposits—minute taxes, in most cases, which would be wholly refundable.

The advocates of this legislation contend that it is necessary to enable the Treasury to collect all the taxes to which it is entitled. They rely on the questionable estimates that approximately $400 million annually in taxes on dividends are not being paid in addition to considerable amounts due on interest payments.

This argument ignores the fact that the Treasury Department today has in its files information forms from corporations listing every dollar of dividend paid and to whom it was paid. This information can and should be utilized to discover who the evaders are. Until such time as it is utilized, I see no need to tax dividends at source.

In considering this matter, it is important to recognize that the Treasury Department does not favor the legislation both upon the basis of its inequitable effect on many taxpayers and because of the administrative burden it would place upon the Treasury Department. In recent testimony, the Commissioner stated as follows: "We hope that withholding will not be necessary because of the impact upon the taxpayers and the inequity in many, many cases, and also because of the refunding administrative burden which it would impose upon the service."

I think that to pass this legislation at this time without the benefit of extensive hearings and without information as to the effect the present educational program will have, would be disastrous.

I feel that the inequities and injustices that would be heaped on a great number of citizens and organizations by such legislation, in addition to the added cost to the Treasury Department and the refunding burden entailed, far outweigh the benefit the Government would receive.

In short, such legislation would impose a penalty on the innocent in order to catch the guilty.

The PRESIDING OFFICER. All time available on the amendment has expired.

The question is on agreeing to the amendment of the Senator from Wisconsin [Mr. PROXMIRE]. On this question, the yeas and nays have been ordered; and the clerk will call the roll.

The Chief Clerk called the roll.

Mr. MANSFIELD: I announce that the Senator from Idaho [Mr. CHURCH], the Senator from Mississippi [Mr. EASTLAND], the Senator from Rhode Island [Mr. GREEN], the Senator from Indiana [Mr. HARTKE], the Senator from Oregon [Mr. LUSK], the Senator from Washington [Mr. MAGNUSON], the Senator from Montana [Mr. MURRAY], the Senator from Alabama [Mr. SPARKMAN], and the Senator from Arizona [Mr. HAYDEN] are absent on official business.

I also announce that the Senator from Missouri [Mr. HENNINGS] is absent because of illness.

I further announce that the Senator from Minnesota [Mr. HUMPHREY], the Senator from Tennessee [Mr. KEFAUVER], and the Senator from Wyoming [Mr. O'MAHONEY] are necessarily absent.

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] and the Senator from Arizona [Mr. GOLDWATER] are necessarily absent.

If present and voting, the Senator from Arizona [Mr. GOLDWATER] would vote "nay."

The result was announced—yeas 24, nays 62, as follows:

[No. 242]

YEAS—24

Bartlett	Hart	Monroney
Byrd, W. Va.	Javits	Morse
Carroll	Keating	Moss
Clark	Kennedy	Pastore
Dodd	Lusk	Proxmire
Douglas	McGee	Williams, N.J.
Gore	McNamara	Yarborough
Gruening	Mansfield	Young, Ohio

NAYS—62

Aiken	Ellender	Martin
Allott	Engle	Morton
Anderson	Ervin	Mundt
Beall	Fong	Muskie
Bennett	Frear	Prouty
Bible	Fulbright	Randolph
Brunsdale	Hickenlooper	Robertson
Bush	Hill	Russell
Butler	Holland	Saltonstall
Byrd, Va.	Hruska	Schoeppel
Cannon	Jackson	Scott
Capehart	Johnson, Tex.	Smathers
Carlson	Johnston, S. C.	Smith
Case, N.J.	Jordan	Stennis
Case, S. Dak.	Kerr	Symington
Chavez	Kuchel	Talmadge
Cooper	Lausche	Thurmond
Cotton	Long, Hawaii	Wiley
Curtis	Long, La.	Williams, Del.
Dirksen	McCarthy	Young, N. Dak.
Dworshak	McClellan	

NOT VOTING—14

Bridges	Hartke	Magnuson
Church	Hayden	Murray
Eastland	Hennings	O'Mahoney
Goldwater	Humphrey	Sparkman
Green	Kefauver	

So Mr. PROXMIRE's amendment was rejected.

Mr. JOHNSON of Texas. Mr. President, I move to reconsider the vote by which the amendment was defeated.

Mr. DIRKSEN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THE LEADERSHIP OF LYNDON JOHNSON

Mr. MANSFIELD. Mr. President, on last September 15, when the Presiding Officer was the distinguished Senator from Maine, MARGARET CHASE SMITH, I addressed the Senate on the subject of the leadership of LYNDON JOHNSON. What I said then holds just as true today, and I ask unanimous consent that my remarks on that occasion be reincorporated in the RECORD at this point, including an article entitled "Leadership—An Interview With Senate Leader LYNDON JOHNSON," which appears in U.S. News & World Report of June 27, 1960.

There being no objection, the statement and interview were ordered to be printed in the RECORD, as follows:

[From the CONGRESSIONAL RECORD, Sept. 15, 1959]

THE LEADERSHIP OF LYNDON JOHNSON

Mr. MANSFIELD. Madam President, as we come toward the end of the session we, of course, express our good wishes to those with whom we have had the honor and privilege of working over the previous months. That applies to the members of the staff, to the reporters, as have been mentioned, and it also applies to the leadership of both sides of the aisle. In my dealings with every Senator in this body I can only say that I have always been treated with courtesy and consideration. They have all been tolerant and understanding, and I am proud to have their friendship and grateful to them for the many favors they have done me.

At this time I wish to pay special tribute to the Republican whip, the senior Senator from California [Mr. KUCHEL] for the cooperation, kindness, and courtesy he has shown through the past several months. He has, indeed, been a tower of strength to his party and our country.

I also wish to pay my respects to the distinguished minority leader, the Senator from Illinois [Mr. DIRKSEN] who I think has done an outstanding job in guiding the Republican minority since he took over control in January of this year, and who I think is to be commended for the sterling qualities he has shown. As a friend of many years in both the House and Senate I have always admired his sense of understanding, his tolerance, and his fine sense of balance. He is, indeed, a good and solid public servant.

Madam President, I also want to commend the Senators' Senator, the President pro tempore, the senior Senator from Arizona [Mr. HAYDEN] whose council I value highly and whose understanding I appreciate more than I can say.

We are close to the hour of adjournment. Before the hour strikes, I wish to record certain personal sentiments. If I may have the indulgence of the Senate, I shall try to be brief.

Last January, each of us came into this Congress with certain high expectations. We hoped—each of us—that certain actions would be pursued by this Government. Perhaps, too, we hoped—each of us—that certain actions would not be pursued. The record is now almost complete. Looking back over it, I am sure that few Members will be fully satisfied with the results in terms of January's expectations. Some actions were taken of which some of us do not approve. Other Members will feel shortchanged because the Congress failed to act as they did approve.

It is easy enough in these circumstances to hold the leadership responsible for disappointments. And may I say that it is right and proper to hold the leadership responsible.

Leadership, after all, has its duties and risks. In this Government it is the servant, not the master.

But what we need to ask ourselves in this respect is this question. What part of the leadership of this Government are we holding responsible for our disappointments? Leadership in this Government, as Senators know, is a divided and diffused function. It lies, first of all, in the Presidency. It lies, too, in the majority and minority leaders in both Houses of Congress. It lies in the committees and their chairmen in both Houses of Congress. It lies in individual Members.

The structure of leadership in this Nation has evolved over a century and a half of our history and I do not propose to debate its efficacy in the closing hours of the first session of the 86th Congress. I stress its divided and diffused nature, however, because that is relevant, highly relevant to what I am about to say. I stress it because I am trying to put into perspective the dedicated work of the leader of the Senate majority party, the Senator from Texas [Mr. JOHNSON].

The distinguished majority leader did not create the system of leadership under which we function in this Government. He did not give the Presidency its enormous prestige and influence with Members of Congress or its veto power over the acts of Congress. The majority leader did not create the committee structure of the Senate nor the procedures of the Congress under which we legislate. He did not create the powers of individual Members of the Senate. All of these are elements, highly significant elements, in the structure of leadership in this Government.

The scope which falls to the majority leader of the Senate is proscribed and limited by these other segments of leadership. The limits, I may add, are especially sharp when the administration is controlled by the opposite party.

It is easy to carp at the leadership of any man. But I know of no man who is less deserving of carping criticism than the Senator from Texas. He is fairminded and he is large minded. He has led his party and the Senate, within the limits of the possible, in a responsible and progressive fashion. He has been reasonable with this administration at all times and particularly when the overriding interests of the Nation have been involved. It will be well, Madam President, if all of us—Democrats and Republicans alike—ask ourselves, Have we done as well with our committee and individual responsibilities of leadership? It will be well, too, for the administration to ask itself the same question.

One may regard the record of the actions of this Government during the past 9 months—and, I repeat, it is a record for which the administration and the Congress bear joint responsibility—one may regard it as good, bad, or indifferent, depending largely on one's predisposition. As far as the Senator from Montana is concerned, he is satisfied that it is a far better record from the point of view of the people of the United States because of the participation of the distinguished majority leader in making it.

The proof of constructive leadership, Madam President, does not lie in vetoes sustained or vetoes overridden. Much less does it lie in volume of legislation. I know of only one way to measure the quality of leadership in this Government. There is one yardstick and it applies to all sources of leadership—in the administration as well as in the Congress. How effectively are entrusted powers used by an elected official within the scope of his functions to preserve the basic unity of the Nation and to advance the common welfare? Against that yardstick, the work of LYNDON JOHNSON in the first session measures high, Madam President, very high. He has helped this Government to achieve much and he has laid the groundwork for greater achievements in the future. His work is in the finest traditions of the Nation, as regards dedicated and responsible leadership. As a Democrat and an American, I am thankful that the party and the Nation is served by a man of his caliber. He has given a great deal of himself for the Nation and I did not want this session to close without this acknowledgment of his contribution.

[From U.S. News & World Report, June 27, 1960]

LEADERSHIP—AN INTERVIEW WITH SENATE LEADER LYNDON JOHNSON

Question. Senator JOHNSON, as you see it, what is the most important work that a majority leader does?

Answer. I think that the majority leader is more than the leader of the majority. He is actually the leader of the Senate. As chairman of the policy committee, perhaps his most important function is programing the bills that come out of committee and ultimately become law.

The majority leader has no real power except the power of recognition. Unlike the Speaker of the House, he has no power to make appointments or to designate committees and things of that kind.

The majority leader, through his power of recognition and through the persuasion that he must exert, quickly determines whether he can lead the Senate. And no leader of any party can necessarily lead the Senate, because the Senate doesn't vote on party lines, as you would expect in an ordinary parliamentary body.

Question. What do you mean, exactly, by "power of recognition"?

Answer. I mean the Vice President always recognizes the majority leader first. Once you are recognized, you have an opportunity to express your viewpoint, to outline your program, to explain your reasons. But the only real power available to the leader is the power of persuasion. There is no patronage; no power to discipline; no authority to fire Senators like a President can fire his members of Cabinet.

Question. But you can decide what piece of legislation the Senate is going to discuss on a given day——

Answer. You can recommend, and then there is a majority vote.

Question. Basically, isn't your work conferring with your colleagues?

Answer. It's persuasion with colleagues on both sides of the aisle. Anything the Senate may do requires a majority vote. About all the leader can do is recommend.

Question. Don't you have to know more, really, about the different bills and pieces of legislation than almost any other man in the Senate?

Answer. A good leader should not only know more about the workings of the committee and how the members arrived at the content of the bill as finally recommended, but he must also know the problems of each individual State and the temperament of each individual Senator.

Question. In other words, you have to be familiar with the whole process of lawmaking——

Answer. That's right. You do not have a unicameral system. You have to understand what actuated the House when it sends over the bills that it must originate, such as appropriations and tax bills. You must understand the reasoning behind their reductions or their increases.

You must understand why the committee took certain action and why certain judgments were formed.

And then you have to take those factors and fit them into the entire machinery of the Senate—100 Members—and see how you think they would be accepted.

Question. Where do you get most of your information, your familiarity with these things? From conversations, or by reading documents or reports of committees?

Answer. From both.

Question. Do you do a lot of studying, then?

Answer. Quite a lot. For each bill that is reported, we have a written report to analyze.

The first thing the report states is the purpose of the bill, then how the bill achieves that purpose, and, finally, the committee's recommendations as to the bill and its purposes. You take the report and you study it and analyze it thoroughly. Then you start talking to the members of the committee that reported it—the chairman of the Committee on Appropriations or Finance or Armed Services or Foreign Relations—"Why do you recommend this treaty? Here's what your report says. What are the problems involved? What do you think about this?"

And then you talk to the ranking men down the line, even to the most junior member. You attempt to determine how the committee's views are going to fit in with those of a hundred Senators, and a committee recommendation is not necessarily accepted by the 100 because all Senators have their own views. The committees are the experts, and sometimes you can get so close to the forest you can't see it for the trees.

Question. We often hear the word "compromise" used. You have differences within your party, for instance, and then you have differences outside your party. Does the word "compromise" correctly express the agreement on these questions?

Answer. No. I always seek the best and do the possible. There are different viewpoints and different emphases on nearly every matter. There are 50 different States with different backgrounds, different environments, different geographical and economic interests.

In my party we have HARRY BYRD and WAYNE MORSE, DICK RUSSELL and HUBERT HUMPHREY, JIM EASTLAND and PAUL DOUGLAS, BILL PROXMIRE and STROM THURMOND—all of them Democrats, all of them sent by sovereign States to speak for their States. Now, those men don't always see everything alike.

I have one yardstick that I try to measure things by: Is this in the national interest? Is this what I believe is the best for my country? And, if it is, then we outline it to the fellows of various complexions—and that includes Republicans, DIRKSEN and JAVITS, Senator CASE of New Jersey and Senator DWORSHAK of Idaho. They have their differences.

The thing you must understand is that no man comes to the Senate on a platform of doing what is wrong. They will come determined to do what is right. The difficulty is finding an area of agreement where the viewpoint of a DWORSHAK of Idaho can be blended with a CASE of New Jersey—because the commuter problem in New Jersey is quite different from what it is in Idaho—or the problem of THURMOND of South Carolina and the problem of DOUGLAS of Illinois can be brought to some accord.

Question. Would you say your work is that of a mediator, then, as between opposing points of view?

Answer. No. I think, first, you must have a purpose and an objective and the vision to try to outline what the national interest requires, what the national need is. Then you lay that on the table, and are as reasonably patient and as effective as you can be, from a persuasive standpoint.

THE REPUBLICAN ROLE

Question. Are these bills often rewritten and amended and changed to conform to the results of conferences such as you have just described?

Answer. Well, not so much from conferences as from actual discussion out on the

floor. I move that we take up a bill. A majority vote is required to do that, so a majority has to agree. It happens that before that motion is made it is usually discussed with my counterpart—the Republican leader.

Senator Taft said to me one time when the division was close. "I want you to quit using the words 'majority' and 'minority' leaders of the Senate. Let us say 'coleaders of the Senate.'" And that is really what you do if you are effective—you are a coleader.

You work with the minority leader and say, "Here's what my viewpoint is," and if he has a different one, he expresses it. And then you find an area of agreement and try to carry it out, so you don't spend all your time fighting.

Question. What is your daily relationship with Senator DIRKSEN, the minority leader, for example?

Answer. Well, after I evaluate the bills on the calendar I ask him to make his recommendations. When I walk into the Chamber every morning, he puts on my desk a memorandum stating what he thinks about each bill and what his policy group thinks and what his colleagues think—"This will be trouble," "This will be long debate." "This will have relatively little opposition," and so forth. And he marks the bills on the calendar in blue pencil. I evaluate mine and mark my calendar in red pencil. Then we exchange calendars.

We have every bill that has been introduced and been considered by a committee evaluated in red and blue, and he knows my opinion and I know his opinions. I would say we spend a third or a fourth of every hour during the legislative day talking to each other and either trying to reach an agreement or to ascertain the points upon which agreement is not possible.

Question. How has it all worked out?

Answer. We've had 8 years of this administration, 6 of which have been under conditions of divided government—a Democratic Congress and a Republican Executive. Now, it's very easy to keep government from functioning at all. You could have no confirmations, you could have no treaties, you could pass no laws, you could cut down on all appropriations—you could do all these things to tie the hands of the Executive. But you would win an argument and lose a country.

So what we've tried to do is determine what the leadership thinks is possible and desirable, and present it to the group and hope they will agree. And I would say that 80 percent of the Senators vote the same way. That's largely because of the thorough, careful attention that is given to seeking the best—that's the key to it.

What is in the national interest? What do the people need and desire? What position should be take on the summit conference that Khrushchev torpedoed? What does our national interest require? What would we have done if we had been in the same circumstances as the President?

Then, once you find out what you think is best, you may have to change it some because everybody doesn't agree as to what is best.

We do not have a dictatorship. The thing that most people do not understand is that the majority leader has no power, really, except the power of recognition. He can't name a man to committee. He's one of 18 that participate in making committee assignments—one of 18. He can't order a Senator's bill considered—he can try it, but he has to have a majority supporting him.

Majority rule at all times. A man comes to the Senate for a 6-year term. It's not 5 years and 11 months or 6 years and 1 month—it's 6 years. And he reports only to his constituency.

I sometimes think that the Senate has 98 leaders and 2 followers—that's Senator DIRKSEN and I—we're the followers. We have to be guided by what these groups will support.

Question. In order to accomplish this, do you have to understand all the details involved?

Answer. It's an 18-to-20-hour-a-day job. Each morning my staff puts on my desk the important recommendations made by committees. They must be evaluated. And that's just the first step—studying the actual draftsmanship. The important thing is the feeling and the sectional interest and the national interest that went into a particular bill. A bill for roads may come to the floor and some Senator will say: "Now, wait a minute—that's not fair to the smaller States—and you've overlooked this point." Well, you had better not overlook it, because, if you do, your bill will be killed.

First, you must know what is in the bill. Second, you must understand how it is related to the various States and the various personalities in the Senate. And, third, you have to be sure that it will command the respect of the majority.

Now, all of that is judgment. A very famous man said to me one time: "I would rather be remembered for my judgment than for my sense." One of the problems of leadership is that sometimes we make mistakes of judgment. But the bill must be understood first, or else you can't determine whether it's in the national interest.

That involves much detail work. That involves pondering many pages of testimony. That may involve hearing many witnesses.

On the reorganization of the Space Act alone, the President has held two conferences with us already. We will hear the experts in this field—the head of the Space Agency and Dr. von Braun (Army missiles expert) and others—and we'll go on down the line. It may require a thousand pages of testimony to settle on one paragraph of law.

Question. Majority leaders are elected every 2 years?

Answer. Every 2 years, the majority of your colleagues select the man they want for leader. I've been chosen unanimously.

Question. How many times now have you been elected?

Answer. One time as deputy leader and four times as majority leader.

Question. What about your method of working, with the leadership of the House?

Answer. I think that's a very important question. First of all, you must bear in mind that Speaker RAYBURN has worked with or has trained, so to speak, 46 of the 100 Senators. The only think that keeps him from getting a majority of the Senate soon is that we have added two additional States. He says that he's going to have to stay here until he gets a complete majority.

Now, I've worked with him very closely, because he and my father were in the legislature together and he and Mr. Garner have both been very good to me and given me the benefit of their judgment. I try to go over to the House every afternoon at 5:30 or 6 and have an hour with the Speaker. Sometimes it's 2 o'clock, sometimes it's breakfast, but, when I'm in Washington and he's in Washington, I try to be in his vicinity at least once a day. On one day I talked to him about housing, about education, about the farm bill, about adjournment and the convention and a variety of subjects.

With Mr. MCCORMACK (House majority leader) and Mr. HALLECK (House minority leader), we try to anticipate what the Senate will do and what the House will do. We're very jealous of the prerogatives of each body and we recognize always that I'm not leader of the House, I'm leader of the Senate; he's leader of the House. Each branch has to stand on its own feet, and neither is responsible to the Executive.

That's one reason that the Speaker wouldn't sit in the Cabinet with President Truman. President Truman asked him the night he was sworn in to come and sit in the Cabinet, and he said: "No; I can't do that and be the Speaker of the House of Representatives. The Constitution says 'separate and independent,' and if I get down here and we make a policy, then I'm going to try to carry it out up there, and I don't want to be bound that way." That's why he said, "Well, if I can't serve in the Cabinet, I'm certainly not going to serve on the advisory committee of the Democratic Party, because if I go down there and make policy, I would be binding people up there. So if I wouldn't serve in the Cabinet, I wouldn't serve there." It wasn't just because he didn't like the advisory committee—it was just a matter of principle. He felt very deeply about it.

So, we try in our informal way to meet each day and to understand the problems of each other and to work together.

Question. Do you believe much in labels—"liberal," "conservative," "radical"?

Answer. No.

Question. If you had to characterize the Congress of the United States, would you be able to find a label for it?

Answer. No. I think that most people want what you would call a "prudent progressivism." They want you to march forward, constantly going ahead, but never getting both feet off the ground at the same time. Our people are prudent people. They don't want to go off the deep end. They're afraid of inexperience and impulsiveness, yet they're not willing to accept laissez-faire government.

I'm a rancher and I'm a banker and public employee and a father, and I'm not as young as I once was and I'm older than I'd like to be. I hope I'm progressive without being radical. I want to be prudent without being reactionary. And I think the average Member of the Senate accepts that philosophy, and I think that accounts for the unanimity with which the Senate has functioned. It debates a bill, and sometimes when you walk in the Chamber you'd think that Senators were going to punch each others' eyes out, but the final result is a well-reasoned document. The President may not necessarily approve it, but it's amazing that he approves as many bills as he does, considering the divisions between us.

Question. You have spoken of the importance of the Presidency. Do you think that the Vice Presidency is going to be more and more important in the future?

Answer. Yes, the Vice President must understand the executive department and what is going on, and be kept up to date. He must be prepared for any eventuality because he is in the line of succession. He must also have a knowledge of the legislative branch of the Government because he is constitutionally the Presiding Officer of the Senate and he may be called upon to break tie votes.

Question. Why is it that there is such a belittling of the position so that so many men say they don't want the Vice Presidency and wouldn't be a candidate?

Answer. I think that most men feel that you don't run for Vice President. Many people feel you shouldn't be out running for President, but should let the people select the man instead of the man selecting the job. But I guess a lot of people feel that the Vice President's job is narrowed in scope to presiding over the Senate. I look upon it as much more than that.

Question. When foreign dignitaries come to the Capitol, Senator JOHNSON, do they ever talk about your position as majority leader in the Senate and its analogy to their system where the leader of the parliament is the Prime Minister?

Answer. Yes; and I think that they attribute to us more importance and more power than we really claim for ourselves.

After talking to the President, they always are very interested in talking to the congressional leaders about conditions in the world.

I have had four or five conversations with Chancellor Adenauer of, I guess, 45 minutes or an hour in duration—about his concern with developments in the world. The same thing with Prime Minister Macmillan; the same thing with Mr. Khrushchev.

Question. In a parliamentary system, these Prime Ministers are chosen by their colleagues, aren't they?

Answer. Yes.

Question. But then they became the head of the nation after they are chosen by their colleagues. Is the legislative experience of their leadership over there very much like yours?

Answer. Yes; I think so. I think the daily work is very much alike, and I would say that actually the results that flow from their efforts are very much alike. You can't spend a dime in this country without the Congress. You can't commit the United States to any kind of agreement that's worth a scrap of paper without the Congress.

Now, we had a strong reaction to Mr. Khrushchev telling our President that he might want to break up the summit and resume negotiations a little later, for reasons of his own. So I talked to the Speaker and to the chairman of the Foreign Relations Committee and to Governor Stevenson, who was our nominee in 1952 and 1956. We immediately dispatched a cable to Mr. Khrushchev saying that we wanted peace and that we wanted disarmament and that we wanted to do everything we could to bring peace to the world, but that he would be mistaken if he thought that he could do any better business in January than he could in May. We wanted him to know that the loyal opposition in this country stood behind the President.

Under our system, we didn't communicate directly with him. We did it through our President. We said to President Eisenhower: "Will you please convey the sentiments of the opposition party in your country to Mr. Khrushchev?"

CONFERRING WITH IKE

Question. You've had many conferences with the President while you have been majority leader, haven't you?

Answer. Frequently.

Question. How many would you say you've had in the course of your period with him?

Answer. Oh, I would say 50 to 100.

Question. And in those conferences, have you had intimate discussions about legislation and public policy?

Answer. Yes.

Question. Do you believe the majority leader has an extraordinary opportunity to find out what is going on in the Government?

Answer. Yes, he has. Before the President goes on a trip he talks to us, and after he comes back he talks with us first. Every time visitors such as Chancellor Adenauer or Prime Minister Macmillan or General de Gaulle or Mr. Khrushchev or Mr. Mikoyan come to America, the President invites them to the White House and he has the congressional leadership present. We talk just as we're talking here.

Subsequently, we invite them to the Foreign Relations Committee, and if they are heads of state they address a joint session of Congress. If they are heads of government, like Mr. Macmillan, we'll have them before the Senate.

The Executive—if he's going to make divided government work at all—must have liaison with the leadership of Congress on both sides of the aisle.

When I was a young man, in 1931—I came here in the Hoover administration—I was elected speaker of the "little Congress," an organization of secretaries. Mr. Garner, who was then Speaker of the House, said to me: "Always remember, watch both sides of that aisle. No leader is worth his salt who doesn't have a following and respect on both sides of the aisle, because this Government is too big for one party to run."

HANDICAPS FOR LEADERS

Question. Why do you think the public in the United States doesn't know more about the work of a majority leader than they do? For instance, throughout history it has been rare that the majority leader has been nationally considered for candidacy to high office——

Answer. I think, first of all, that tenure has been very brief. Most of the leaders in the last 100 years have served only 2 years—maybe 4 years. When they have served longer than that—long enough to get acquainted, long enough for the people to know them—it has been in exceptional cases. Robinson and Barkley are the only two that I know who served at any length [Joseph T. Robinson, of Arkansas, and Alben W. Barkley, of Kentucky, both Democrats].

For instance, as I said a moment ago, I've served in the leadership since 1950 and I've served with six or seven leaders of the other party. The only three men who have had any length of tenure as leaders of the Senate are Robinson, Barkley, and myself.

I think also that the Executive has centered on him the press media, and people look to him to outline policies and to lead the Nation.

Leadership in Congress is divided between the majority and the minority leaders in the Senate, and between the Speaker and the majority and minority leaders in the House. It's diffused and the spotlight is not on any one individual. So the people don't become acquainted with a Senate leader, first, because he's not in his post long enough, and, second, because the Presidency "outshines" him, so to speak—for the same reason that the public doesn't remember all the names of the Supreme Court members.

Question. Speaking impersonally and looking to the critical times ahead, do you think that the American people are going to have to choose men who have had experience in government rather than people who haven't had experience?

Answer. I think the most important thing for our country in the days ahead is the selection of a leader who has judgment and who has leadership qualities and who can unite not only the people of this Nation but the people of the free world.

No man's judgment on any subject is any better than his information and his experience. I think that he not only must understand the needs and the wants, but the fears and the hopes of 50 States in this Union. In addition, he must have a working knowledge of how our allies feel about us, what the British approach is, what the Germans think, what the French will do under certain circumstances, what the aspirations of the newborn nations are. That cannot come, as I see it, from administering a job in some city or even from being executive of some State. That can come only, as I see it, from contact, discussion, and exchange of viewpoints with all the representatives of the 50 States and with the representatives of the world.

Question. Isn't it surprising that Government succeeds as well as it does, with so many diverse individuals and viewpoints?

Answer. Yes, it certainly is. But I think that our people sense that we probably have fewer friends in the world now than we've had at other comparable periods in our history. I think they sense the uprising that is taking place and the dangers that are present. They can see the Communist moves here and there and yonder coming all together at a focal point. And they know that this is a time for strong men and for knowledgeable men and for patriotic men—men who are willing to put the national interest first.

Question. But, particularly with respect to the conflicts on the domestic scene, and so many diverse viewpoints in the different States—isn't it surprising that you get so much done in the Congress?

Answer. It is amazing and it's a great tribute to the understanding and patience and quality of the Senators and the Congressmen that the people themselves have selected from both parties.

Question. Do you think, then, on the whole, our system is functioning despite all the cynicism we hear expressed about it?

Answer. I'm very proud of it. There's not a system in the world that can be compared with it. Even though at times we are a little slow and at times we have our problems, there's not one that measures up to ours.

We don't have a dictatorship. Mr. Khrushchev doesn't have to bother with a Senate. Mr. Eisenhower does have to bother with the Senate, but I think it's a very good thing that he does, because it gives us safety, it gives us deliberation, it gives us wisdom—collective wisdom.

AVOIDING BITTER DEBATE

Question. In your handling of the leadership, you don't seem to engage in any acrimonious debate—any personalities. What is your philosophy about that?

Answer. I accept every man as being as patriotic as I am. I think most of them have had experience and judgment, or the people wouldn't have selected them to come here. I know I can be wrong. I think what I do is right or I wouldn't do it. But the other fellow's viewpoint must be considered, too.

I try to be patient and understanding; to express myself; to listen to others and seek the best and do the possible. Sometimes it involves an acceptance of a suggestion by someone else and incorporating it in my proposal because there are 100 men sent to legislate—not just 1. And I'm proud to say that we've called the roll on the appropriations bills—we have about 17 or 18—and the highest vote against any bill last year was 10 votes. Most of them were 80 to 1 or 82 to 4 or 87 to 3, and the highest was 10. That shows the painstaking effort that has been taken to try to reason together.

I am a great believer in the philosophy of the prophet Isaiah, "Come now, and let us reason together."

Khrushchev doesn't have to reason with the people; he can shoot them. Hitler didn't have to reason with people; he could march them. But our system is a government of reason, or judgment, where men have dignity and where each can express himself.

The Supreme Court can pass on what the Congress does, and the President can pass on what the Congress does, and the Congress can pass on what both of them do. It's three separate, independent branches of government—each with respect for each other. And it has resulted in our having a government with the maximum freedom. Sometimes it is a little tardy. We have some delays. It's expensive, and we have some inefficiency. But it works, and we have freedom and the highest standard of living the world has ever known—far higher than in the supposedly efficient dictatorships.

You never accomplish anything by talking about personalities. The first thing I said to my caucus when I was elected was: "If the President is right as I see it, I'm going to support him. I do not believe it's the duty of the opposition just to oppose. I think it's the duty of the opposition to do what's in the national interest. If the opposition cannot agree that the recommendations of the President are good, it should

suggest a constructive alternative. But, it should do so with decency and dignity, never spending time talking about a man's family and his dogs and his private life and his personal habits."

"MOST BURDENSOME JOB"

Question. You don't object to his playing golf, then?

Answer. Not a bit. I'm glad he does, and I want him to have all the rest that he can get. We expect perfection from our President, and when there's some imperfection, as there must be with every individual, we are pretty rough on him.

The Presidency is the most burdensome job in the world. When I fly over cities and I think of all the people in their homes looking to the President to make decisions that are wise and just so far as the economics are concerned, involving their job and their earnings, and their boys and the future of their households and whether the lights will burn there tomorrow night or whether there will be a nuclear blast that will wipe them all out, it's terrifying. Even the responsibility I have as majority leader is heavy.

It is hard to understand how the President can carry the burden that he does carry. I don't want to make him any weaker. I want to make him stronger, because, after all, we've got just one President. It's not the President that gets in trouble when things go wrong. It's the country that gets in trouble. It's not the President or the Secretary of State that gets in a jam. It's the whole Nation in trouble—the whole free world.

So I think that, if we make mistakes, as we do, we ought to coolly and calmly assess the situation and say: "We don't want to repeat this mistake. Let's build ourselves into a stronger country. The next conference we go to we'll be stronger." If we only complain, that is what Khrushchev wants us to do—divide the country.

I'm convinced that at the summit Khrushchev had two objectives: He wanted to divide us from our allies, and he wanted to divide us among ourselves. He thought the Democrats would jump on the Republicans from now until November, and he thought the allies would be quarreling with us because of the U–2 incident.

I don't think he accomplished either. I think he brought our allies closer to us, and I think he was disillusioned when he saw that the opposition party of the United States was not going to do Mr. Khrushchev's work for him. Now, he's got a job laid out for him—trying to divide America.

VISIT U.S.A. YEAR—VISIT BY SENOR DEL GIUDICE, OF NAPLES, ITALY

Mr. JAVITS. Mr. President, there is critical need for improving our ties with peoples from all parts of the world, and one way to do this is by encouraging more visits to the United States. It is extremely important to have citizens of other nations meet Americans from many walks of life to observe our ways and to appraise at first hand our attitudes and intentions. It must also be recognized that a substantial increase in the number of visitors from abroad will result in an expenditure in the United States of sufficient significance to help reduce the annual deficit in our balance of trade payments.

I have been actively engaged for some years in the effort to promote international travel, and some of my proposals are incorporated in S. 3102, a bill to establish an Office of International Travel and Tourism, which I cosponsored with the Senator from Washington [Mr. MAGNUSON] and which was adopted by the Senate on June 7, 1960.

Numerous legal barriers, however, confront potential visitors to the United States. More than 30 provisions under which nonimmigrant visitors can be kept out of this country are listed in our immigration laws, and while many of them can be waived, they nevertheless cannot be regarded as encouraging to the foreign tourist. Visas are required. No other country requires fingerprinting of alien visitors. While in most cases the United States waives this provision of the law, the visa officer may require fingerprinting of an individual to make a security check if he feels it necessary. A visa may be withheld if the officer has reason to believe that the applicant is a person whose presence will be prejudicial to the public interest—itself a value judgment.

Once the tourist passes all these barriers and arrives in this country, he is required to register with the Immigration and Naturalization Service on arrival, giving the address where he will be located and informing the Immigration and Naturalization Service within 10 days of any change of his address.

What this means in terms of its effect on tourist travel to the United States is brilliantly illustrated in a letter which came to my office from Naples, Italy. The writer is Sr. Antonio Del Giudice, commanding officer of the motorized section of the police force in that city. His letter graphically describes the problems which he faced when he tried to visit the United States and provides an object lesson of telling clarity.

His story has a happy ending because recently arrangements were completed to bring him here on a 2-week tour around the United States of America and Pan American Airways gave him passage over. On June 25 Sr. Del Giudice will arrive at Idlewild Airport via Pan American jet clipper for a 2-weeks tour of the United States to study traffic control problems in some of our larger cities. Cooperating with Pan American in these arrangements are the American Express Co., Reader's Digest, the Society of American Travel Writers, and the Travel Writers Association.

I ask unanimous consent that Sr. Del Giudice's letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

[Translation (Italian)]

NAPLES, *January 25, 1960.*

DEAR SENATOR: In the Italian edition of Reader's Digest for February 1960 I read an article by Harmon Tupper, condensed for the Rotarian, entitled "Benvenuti negli Stati Uniti" [Welcome to the U.S.A.]. I don't know why I am writing you, but I felt the need for congratulating myself as well as you because of the intelligent as well as friendly motion of sponsoring of extensive legislation designed to facilitate international tourist travel ["tourism"] and because of the most fortunate phrasing of the title.

I told you, in fact, that no matter how many speeches may be addressed to us on the subject of the United States, nothing can surpass the old rule: "Seeing is believing."

Dear Senator, the undersigned is an official in the Naples metropolitan police force. As a matter of fact, I am the commanding officer of the motorized section of the "corpo dei vigili urbani" [police force] of my city.

In 1953, by drawing out some of my savings, I managed to get $1,300 together, which I wanted to use for a visit to your great country. I had been all over Europe and in some other countries of Africa and the Middle East. In the rosary of my travels the most interesting and most desirable pearl was missing—the United States, which I had reserved for my last trip so that I might have a more vivid memory of the journey of my dreams. Thus it was that I started my climb up to the big enterprise.

Yes, indeed, dear Senator; in 1953, anyone wanting to spend a few weeks in the United States had to have the courage and persistence of a patient hero.

After I had made my first contacts with the American Consulate in Naples, I had to take over and over again time out of my few free hours in order to go to that office almost every day. In the morning, I had to sit down on a kind of bench, such as is used in the schools; then I was given a number, and when my turn came, I had to tell the clerk why I wanted to spend my vacations in America. Many days later they sent me to another office in the Consulate, where I was again given a number which would permit me to explain for the umpteenth time why I wanted to spend my vacations in the United States, instead of in Patagonia, Russia, or what have you.

After having produced an infinite number of documents, I had to wait for a letter by which some relatives would guarantee my maintenance during my stay in America; then I had to wait for reports about myself, and then, for still other information, and, finally, in April 1954, I was permitted to be interviewed by the consul who, after submitting me to a lengthy, though courteous, interrogation, gave authorization for my fingerprints to be taken, as though this were a case of a person arrested whose personal dossier was to be compiled.

After some months of constant coming and going, I had on my passport the so-anxiously awaited visa entitling me to go to the United States for 1 month. Unfortunately for me, when it seemed that nothing further could possibly stand in the way of my departure, my father had a cardiac infarct with which he was laid up for a long time and from which he finally died. When I wanted to reexamine the possibility of realizing my project, at that time postponed because of my father's death, I found that my funds were no longer sufficient, and therefore I had to give up for all time what had been my great aspiration.

Dear Senator, when I started this letter I did not know why I was writing to you; now, however, I know the reason. America is a big and generous country; to facilitate the influx of visitors into the United States means to strengthen the bonds of friendship between its own and the other part of the world which is not yet well enough known; it also means to give those something to think about whose minds have been filled by their rulers with false theories and deceitful propaganda directed against the truest democracy of the world. You, Senator, have done well, and the great President Eisenhower has done well, to encourage the influx of tourists into the United States; the other people who do not have the privilege of being native-born Americans will be much more inclined to look upon your great country as the most suitable instrument for safeguarding the peace of the world, to be regarded as a model for ever greater social development.

I am fortunate in that I now have among the officials and officers of the United States many friends from whom I try to find out,

through what they have to say, what North America really stands for.

Through my specific knowledge I collaborated in the compilation of the new Code on Lines of Communication [roads, highways, streets] for the Allied Forces in Italy. I am in constant touch with them, and I have placed at their disposal everything that I know in view of my professional experience as police officer. Today, to be sure, my dreams for taking a study trip to America are gone. The system valid in previous years fortunately has now been changed, I am told; but likewise changed have the chances for anyone to be able to afford a return trip to the United States. I let myself be consoled by the fact that my more fortunate fellow citizens will now be able to get to know your country without being subjected to degrading and absolutely unnecessary methods when they only want to see the most important of all countries, the United States of America.

I believe that this is the merit of yourself, dear Senator, and of your President.

If it were possible for you to let me have some magazine or pamphlet dealing with the rules and regulations of the police force of New York [City] and environs, I would be very grateful to you. Who knows, maybe some day I will have a chance to meet you in person, and I congratulate you as well as myself upon your intelligent piece of work in the matter of doing away with the outdated methods applied in connection with temporary immigration [residence in the United States of America] for the purpose of study or pleasure.

Meanwhile, with best regards and expressions of my admiration.

ANTONIO DEL GIUDICE,
Commanding Officer of the Motorized Section of the Naples Police Force
Viale Campi Flegrei 7A, Naples, Italy.

THE 21ST NATIONAL PEDESTRIAN PROGRAM APPRAISAL

Mr. CASE of New Jersey. Mr. President, yesterday the American Automobile Association announced the winners of its 21st National Pedestrian Program Appraisal.

Since this program began in 1937, increased attention to enforcement, public information and accident records has cut pedestrian deaths by 50 percent. School officials, traffic engineers, and police throughout the Nation certainly deserve credit for this achievement, a remarkable one when one considers the greatly increased number of pedestrians and vehicles on the road today.

Mr. President, I was also pleased to see that four New Jersey municipalities were cited for their records in this program. Bloomfield won an award for not having any pedestrian deaths during the past year and West Orange received recognition for improvement of its program activities. Among cities under 10,000 Scotch Plains Township won an honorable mention and Pompton Lakes a special citation for its pedestrian program activities.

PUBLIC DEBT AND TAX RATE EXTENSION ACT OF 1960

The Senate resumed the consideration of the bill (H.R. 12381) to increase for a 1-year period the public debt limit set forth in section 21 of the Second Liberty Bond Act and to extend for 1 year the existing corporate normal-tax rate and certain excise-tax rates.

Mr. CLARK. Mr. President, I call up my amendment 6–17–60—H, and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated for the information of the Senate.

The CHIEF CLERK. At the appropriate place it is proposed to insert the following section:

SEC. . DISALLOWANCE AS TRADE OR BUSINESS EXPENSES DEDUCTIONS OF CERTAIN EXPENDITURES FOR ENTERTAINMENT, GIFTS, AND CLUB DUES.

(a) AMENDMENT OF SECTION 162.—Section 162 of the Internal Revenue Code of 1954 (relating to trade or business expenses) is amended by redesignating subsection (d) as (e) and by inserting after subsection (c) the following new subsection:

"(d) DEDUCTIONS DENIED IN CASE OF CERTAIN EXPENSES.—No deduction shall be allowed under subsection (a) for any expenses paid or incurred for—

"(1) entertainment (unless entertainment is the trade or business of the taxpayer and the expenses are paid or incurred to further such trade or business), except that the expenses paid or incurred for food or beverages for the primary purpose of providing an opportunity to advance the trade or business of the taxpayers may be deducted, if such expenses would have been deductible prior to the enactment of this subsection;

"(2) gifts, except that any gift by the taxpayer in the course of his trade or business to any person may be deducted in an amount not exceeding $10 per person per year, if such expenses would have been deductible prior to the enactment of this subsection; or

"(3) dues or initiation fees in social, athletic, or sporting clubs or organizations."

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to taxable years beginning after the date of the enactment of this Act.

Mr. CLARK. Mr. President, I yield myself such time as I may require, within the limitation imposed by the agreement.

Mr. President, the amendment is quite different from the amendment which I offered last year, which was accepted by the chairman of the Committee on Finance and which was to be taken to the conference. Later, for reasons of a slight disagreement between the chairman and myself, this did not occur.

The amendment would stop certain tax abuses practiced by taxpayers with expense accounts, or "swindle sheets" as they are sometimes called.

I think this year's version of the amendment meets all the objections which were raised in the Senate when the amendment was offered last year.

The amendment would do three things. First, it provides that a taxpayer, whether an individual or a corporation, is not entitled to any deduction for entertainment expenses except for food and liquor. This would mean a person could buy all the "booze" he wanted to to help entertain individuals who are doing business with him, or could buy all the fillet mignons he wanted to while doing business and he could take tax deductions for the expenses if they met all the present requirements of the Code. But he could not take a customer to "My Fair Lady," to the Johansson-Patterson fight, on a yachting trip off Florida, or to a hunting lodge in Texas, and claim deduction for such entertainment expenses. He could provide food and drink—could wine and dine his customers—and deduct such expenses if they were "ordinary and necessary," but the expenses of any other kind of "entertainment" would not be tax deductible.

The second thing the amendment provides is that one cannot give a gift to any customer and charge it off as a business expense if the cost of the gift is more than $10. If the cost is less than $10 the gift would be deductible, if it met the tests of existing law.

This would mean that Olivia DeHavilland and her Hollywood friends, as well as others, could no longer give expensive paintings, silver tea sets, Cadillacs, and other large gifts to their business acquaintances and have Uncle Sam pick up most of the tab. If anyone wished to give a ballpoint pen, a calendar, or a pocket memorandum book, that would be all right. That would be provided for in the new amendment.

Mr. BYRD of Virginia. How about a box of apples?

Mr. CLARK. I could not hear my friend.

Mr. BYRD of Virginia. How about a box of apples?

Mr. CLARK. If the box of apples cost more than $10, I regret to tell my good friend from Virginia—and I know how good his apples are—the gift would not be tax-deductible, but the Senator could give an apple a day, to keep the doctor away, and that would be all right. [Laughter.]

The third thing the amendment prohibits is the paying of club dues, country club dues or Army-Navy Club dues, or Metropolitan Club dues, and charging the expenses off on the returns to Uncle Sam, or charging them off to the corporation for which the person works. If a person wants to join a social, athletic, or sporting club he will have to pay the expenses himself. If the corporation thinks its executive should join the club in order to help out the corporation, the corporation could not consider it a business expense.

The amendment provides that there will be no more "swindle sheet" on entertainment, no more "swindle sheets" on gifts, and no more "swindle sheet" on dues, initiation fees, and so on for social, athletic, or sporting clubs. However, a person could wine and dine his customers to his heart's content, and deduct the costs if they met the tests in existing law.

Mr. President, I reserve the remainder of my time.

Mr. BENNETT. Mr. President, does the opposition to the amendment have 15 minutes?

The PRESIDING OFFICER. The opposition has 15 minutes.

Mr. BENNETT. Under the lead of my colleague, I shall yield myself such time as I may require. It will not be much.

Mr. President, entertainment expenses and the use of expense accounts for personal living have presented troublesome enforcement problems. The Service is making every effort to curtail abuses in this area and has recently announced the various steps that it is taking. Since

1958 much of the responsibility for properly policing employee expense accounts has been placed on employers, to whom employees are required to account for their expenses if they do not submit detailed information regarding these items on their tax returns.

For 1960, the Internal Revenue Service has announced that in the auditing of tax returns of employers, a careful review will be made of the adequacy of the employers' requirements as to accounting by employees for travel, entertainment, and other business expenses and where these requirements are inadequate the returns of employees will be examined. In addition, businesses will be required to give more detailed information on their income tax returns regarding expense account allowances and reimbursements of expenses of top employees. Also for 1960 all businesses will be asked on their returns for information regarding their expenditures for such items as hunting and fishing lodges, hotel suites, yachts, travel expenses of employees and their families.

In the recent hearings before the Ways and Means Committee on broadening the tax base, consideration was given to possible changes in the tax treatment of business expense accounts. The consensus among the panelists and the members of the committee was that questions of what are ordinary and necessary business expenses should be handled through improved enforcement measures rather than by legislation. We believe we are making progress and for the present we believe the matter should continue to be handled through regulations, rulings, and auditing procedures. However, if it is concluded that legislation is necessary, we will work with the congressional tax committees in developing appropriate solutions. Such a major change in the tax law should be undertaken only after full consideration of the problems involved, with opportunity accorded to interested parties to comment on the proposal.

The Senator from Utah would like to make one very personal observation with respect to the comments made by the distinguished Senator from Pennsylvania. He said that the businessman can spend all the money he wishes for booze. The Senator from Utah does not drink, and I am sure that there are many men in business like him. This means that a businessman in a competitive situation, finding a customer who does not drink, or one who does drink when he himself does not, cannot provide what we might call equal treatment to his customer because he cannot take him to "My Fair Lady," or even to a movie, while his customer could ply him with liquor until he is completely obfuscated, and there would be no particular question.

This merely illustrates the difficulty of trying to write in specific language any legislative limitations to the money that can be properly spent in this natural relationship between buyer and seller.

If the Senate wishes to forbid all expenditures of all kinds, though I do not think we can get away with that even though we might try, that would be one approach. But when we start by legislation to say, "This is legal, but this is not," we will have a great deal of trouble. I am reminded of an old gentleman who worked for us in the paint business. We called him a buyer. He entertained many salesmen, and he listened patiently to the many salesmen who called on him, most of whom he had turned down, of course, but he loved to say he never missed a meal or paid a cent, because eventually the last man in in the morning invited him to lunch.

Of course, lunch is possible under this proposed program, but if there is a buyer who has a counterpart, he could also provide him with liquor. I assume from the limitation he could not buy him a cigar because that is not specifically listed. I assume he could not offer to pay his taxi fare because that is not specifically listed.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. BENNETT. I yield.

Mr. CLARK. The cigar would come under the $10 gift exemption.

Mr. BENNETT. That is only $10 per year per man. I do not know how many cigars could be bought with that limitation.

Mr. CLARK. Ten dollars per recipient per year.

Mr. BENNETT. That is what I meant.

Mr. CLARK. So the fellow could buy 25 cigars.

Mr. BUSH. Mr. President, will the Senator yield?

Mr. BENNETT. I am glad to yield.

Mr. BUSH. Will the Senator inform us whether the committee has any reliable information as to the total that the proposed amendment would save the Government or recover in taxes? Is there any testimony on that point?

Mr. BENNETT. The committee has no testimony and, so far as I know, no information because it is almost impossible at this point to figure out how many gifts have been made that were worth only $10 as contrasted with those that might have been worth $10.05 or more.

Mr. President, at this point I ask unanimous consent to insert at this point in the RECORD two technical information releases of the Treasury Department, one dated April 4, 1960, and the other dated December 29, 1959, setting forth the Treasury's program for more adequate enforcement of the existing regulations.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

TECHNICAL INFORMATION RELEASE—TIR–221

Commissioner Dana Latham today announced the rules which the Internal Revenue Service will follow in dealing with entertainment and employee expense accounts.

The Commissioner said these rules were adopted after a thorough study of comments and suggestions submitted by the public with respect to the tentative rules outlined in TIR–198 issued December 29, 1959. A number of these suggestions have been adopted.

Questions in TIR–198 covering the use of resort facilities, yachts, and expense-paid vacations, etc., have been revised in these rules, but the Commissioner stated that the wording of these questions may be modified somewhat in the applicable tax forms yet to be drafted for 1960.

Commissioner Latham assured taxpayers, however, that no additional questions dealing with entertainment and employee expense accounts will be added in these tax forms and that any changes in the language of the questions referred to in the preceding paragraph will not require additional record-keeping.

This TIR with its attachment supersedes that portion of the attachment to TIR–198 entitled "Enforcement Program of the Service."

Revenue ruling No. 60–120, also attached, will assist employees in determining whether they are accounting to their employers in accordance with existing income tax regulations, the Commissioner said.

Mr. Latham expressed his warm appreciation to all those who assisted the Internal Revenue Service in this program.

ENTERTAINMENT EXPENSES AND EMPLOYEES' EXPENSE ACCOUNTS—ATTACHMENT TO TECHNICAL INFORMATION RELEASE NO. 221

ENFORCEMENT PROGRAM OF THE SERVICE

1. Information on expense account allowances

(a) Corporation tax return forms: The 1960 forms 1120, 1120L, 1120M, and 1120S are being expanded to include sections dealing with expense account allowances paid to or on behalf of officers and claimed as deductions in determining taxable income. Information will be required to be submitted with respect to the 25 officers with the highest total compensation determined for this purpose by aggregating salaries and all allowances, including expense account allowances. Information will not be required, however, in the case of any officer whose total compensation determined in this manner is less than $10,000.

The information will be required to be submitted by each member of an affiliated group which files a consolidated return.

The Service has no special definition of the term "officer" for this purpose, but uses the generally accepted meaning of that term. An officer is a person who is elected or appointed to office or who is designated as such in the corporation's charter or bylaws.

(b) Partnership return of income: The 1960 form 1065 will be expanded to secure information dealing with expense account allowances paid to or on behalf of partners, including limited partners. To determine the partners with respect to whom the information will be required, there shall be added: the partner's expense allowances, his salary or other compensation, and his share of the ordinary income of the partnership. Information will be required with respect to the 25 partners with the highest individual totals. However, no information will be required with respect to any partner whose individual total is less than $10,000.

(c) Individual income tax returns: For 1960 schedules C of forms 1040 and 1040B are being expanded to secure information dealing with expense account allowances paid to the five highest paid employees, as well as those attributable to the individual proprietor. In determining the highest paid employees, all expense account allowances shall be added to salaries and other compensation. In determining whether information will be required of the individual proprietor, his net profit from his business or profession will be treated as compensation. This additional information will not be required with respect to the proprietor or with respect to any employee if the total compensation determined in the above manner is less than $10,000.

(d) For the purposes of (a), (b), and (c) above, the term "expense account allowances," means: (1) Amounts, other than compensation, received as advances or reimbursements; and (2) amounts paid by or for the corporation, partnership, or proprietor for expenses incurred by or on behalf of an

officer, partner, employee, or proprietor, including all amounts charged through any type of credit card.

However, this term does not include amounts paid for—

(a) The purchase of goods for resale or use in the employer's business.

(b) Incidental expenses, such as the purchase of office supplies for the employer or local transportation in connection with an errand.

(c) Such fringe benefits as hospitalization insurance, approved pension trust funds and unemployment insurance.

(d) In the case of persons supplying legal, accounting, engineering, or other professional services, the expenses which will be billed directly to the client. However, these persons should maintain records reasonably sufficient to establish the business purpose for the expenditure.

2. Information on certain other expenditures

Corporation, partnership, and individual business returns for years beginning after December 31, 1959, will contain, in appropriate places, the following questions:

Did you claim a deduction for expenses connected with—

(If answer to any question is yes, check applicable boxes within that question.)

1. A hunting lodge ☐, working ranch or farm ☐, fishing camp ☐, resort property ☐, pleasure boat or yacht ☐, or other similar facility ☐? (Other than where the operation of the facility was your principal business.) ☐ Yes. ☐ No.

2. The leasing, renting or ownership of a hotel room or suite ☐, apartment ☐, or other dwelling ☐, which was used by customers or officers or employees including members of their families? (Other than use by officers or employees while in business travel status.) ☐ Yes. ☐ No.

3. The attendance of members of families of officers or employees at conventions or business meetings? ☐ Yes. ☐ No.

4. Vacations for officers or employees, or members of their families? (Other than vacation pay reported on Form W–2.) ☐ Yes. ☐ No.

An affirmative answer to any of these questions does not necessarily mean that the deductions claimed for any of these items will be questioned or disallowed. Nor does the absence of a question relating to other similar expenses mean that such expenses will not receive consideration upon examination.

3. Examinations to determine adequacy of employers' business practice in connection with accounting by employees of business expenses

A program is being initiated whereby, during the course of every examination of a return of a taxpayer who pays for travel, entertainment and other business expenses of his employees, the examining officer will ascertain whether the taxpayer uses acceptable business practices in requiring an accounting of business expenses incurred by his employees. Where the taxpayer's method is found to be inadequate, the examining officer will make a list of the employees who received the expense allowances or reimbursements, and the amounts thereof. The Service will then decide, based upon the facts determined in connection with the examination, the extent to which the returns of the individual employees will be examined.

4. Instructions to field offices

(a) All field offices have been instructed to place increased emphasis on the examination of returns involving entertainment, travel, and expenses of a similar nature. They were informed that particular attention must be given to deductions claimed for expenses in connection with yachts, hunting lodges, club dues, as well as the cost of purported business trips which are, in fact, vacations.

(b) As an integral part of our enforcement program, all field offices have been told to continue to apply the Cohan rule cautiously in those cases in which the taxpayer cannot adequately substantiate deductions claimed for entertainment and similar business expenses.

(c) The field offices have also been advised to pay particular attention to the examination of returns in which the deductions claimed for entertainment and similar expenses appear to be disproportionate in relationship to the income and business activities of the taxpayer. In such examinations, large or unusual expenditures for entertainment expenses will be closely examined to determine whether they are ordinary and necessary business expenses.

(d) All field offices have been told that our longstanding policy of reasonableness will continue to be applied with respect to verification of items relatively small in amount. This applies, in particular, to deductions for such business expenses as taxi-cab fares, tips, and other items relatively small in amount that are not readily susceptible to substantiation.

REVENUE RULING TO BE PUBLISHED IN INTERNAL REVENUE BULLETIN APRIL 4, 1960, REV. RUL. 60–120

Advice has been requested as to the type of information required to be furnished by an employee to his employer for purposes of section 1.162–17(b)(4) of the income tax regulations and the type of accounting procedure used by the employer for the reporting and substantiation of expenses by employees which the Internal Revenue Service will consider as being adequate.

Section 1.162–17(b)(4) of the income tax regulations provides in part that to "account" to his employer as used in that section means to submit an expense account or other required written statement to the employer showing the business nature and the amount of all the employee's expenses (including those charged directly or indirectly to the employer through credit cards or otherwise) broken down into such broad categories as transportation, meals and lodging while away from home overnight, entertainment expenses, and other business expenses.

For purposes of this section the employee must submit such detailed information to his employer as will enable the employer to determine whether the expenses claimed constitute ordinary and necessary business expenses incurred in connection with the performance of services as an employee.

In the case of traveling expenses it is contemplated that the employee will be required by his employer to submit with his expense account or other required statement detailed information such as: (1) The date and place of travel; (2) cost of transportation; (3) number of days away from home overnight; (4) an itemized statement showing total costs incurred for meals, lodging, and miscellaneous business expenses, such as cab fare, telephone, etc.; and in connection with large or exceptional expenditures supporting documents, such as receipts. This detailed information should be furnished the employer in respect of cash expenditures as well as amounts charged directly or indirectly to the employer through credit cards or otherwise. For example, assume that a salesman made a trip from New York to Chicago for business purposes and was away from home overnight for 10 days. For purposes of section 1.162–17(b)(4) of the income tax regulations, it is contemplated that the employer will require the employee to submit, in addition to information establishing the business nature of the travel, the following information with his expense account:

Date and place of travel: April 1, 1960, to Chicago.

Number of days away from home: 10.

Expenses:

Meals	$60
Hotel	90
Cab fares	8
Telephone and wire expenses	5
Transportation cost (rail)	75
Total expenses	238

In the case of entertainment expense, it is contemplated that the employer will require the employee to submit detailed information as will sufficiently identify the persons entertained (by name or title or otherwise) to establish the business nature of the expense, and will show the place, the nature and cost of the entertainment, and the reasons why it was necessary to incur the entertainment expense.

Section 1.162–17(d) provides, in part, that an employee who is required to and does account to his employer for his business expenses ordinarily will not be called upon to substantiate expense account information except in cases where it is determined that the accounting procedures used by the employer for the reporting and substantiation of the expenses are not adequate.

The Service will determine whether the employer's accounting procedures are adequate by considering the facts and circumstances of each case taking into account the controls the employer maintains to insure that his employees are paid (through advances, reimbursements, or otherwise) for only those expenses which are ordinary and necessary business expenses incurred in connection with their employment. For example, one important control is present if the employer requires that an expense account must be examined and approved by a person responsible directly or indirectly to him for a proper audit of the account except that the person incurring the expense should not audit his own account.

TECHNICAL INFORMATION RELEASE—TIR No. 198

Commissioner Dana Latham today outlined the steps that U.S. Internal Revenue Service is taking to deal with tax abuses in entertainment and employee expense accounts.

The Commissioner said he believes these steps are reasonable and will not require expensive or burdensome compliance by anyone.

"We are not asking anything new of employees," the Commissioner said, "but more detailed reporting will be required on the income tax returns for taxable years beginning after December 31, 1959, of employers such as corporations, partnerships, and sole proprietors."

He said, however, that anyone desiring to submit written comments on the new reporting requirements may do so. Comments should be addressed to Commissioner of Internal Revenue, Washington 25, D.C., and should be submitted prior to February 15, 1960.

As soon as written comments submitted have been considered, Commissioner Latham said, any revisions warranted in the contemplated new reporting requirements will be made. In any event a further announcement will be made as soon as possible after February 15, 1960.

Even though the final requirements might be amended somewhat on the basis of comments received, the Commissioner suggested that employers gear their recordkeeping beginning January 1, 1960, so as to enable them to report in their income tax returns for years beginning after December 31, 1959, the type of information presently contemplated.

The attached statement contains an outline of the principal problems of the Service

in connection with entertainment and employee expense accounts, as well as the contemplated reporting requirements referred to above, and the other enforcement steps being taken.

The Commissioner stated that the Internal Revenue Service has neither the authority nor the desire to tell businessmen how they should spend their money. It does, however, have a responsibility to enforce the tax laws; and it intends to do so in this area, as in all others. If this cannot be done within existing laws, the Service will propose such changes in the laws as it thinks necessary to permit adequate and equitable enforcement. Under no circumstances does the Internal Revenue Service intend to allow taxpayers, whether they be few or many in number, influential or unknown, petty chiselers or large-scale evaders, to escape their just taxes.

ENTERTAINMENT EXPENSES AND EMPLOYEES' EXPENSE ACCOUNTS

The following is an outline of the principal problems of the Service in the administration of the tax laws relating to entertainment expenses and employees' expense accounts and the steps that have been or will be taken to resolve these problems:

PROBLEMS RELATING TO ENTERTAINMENT EXPENSE AND EMPLOYEES' EXPENSE ACCOUNTS

1. Personal expenses claimed as business deductions

There is a growing trend for corporations, partnerships and sole proprietorships to assume the cost of personal expenses of officers, employees, partners, proprietors, and others, and to deduct such costs on their tax returns as ordinary and necessary business expenses. This problem has been greatly magnified due to the increased use of credit cards in recent years for purchasing goods and services of a personal nature. In these cases the officer or employee makes no accounting in his own tax return for the benefits received.

(a) Country club and athletic club dues and charges.

(b) Travel expenses of wives, children, and relatives who accompany an officer, employee, partner, or proprietor on a business trip.

(c) Travel expense of a personal nature, coupled with or independent of a business trip, particularly when visits are made to resort or vacation areas or to homes of friends or relatives.

(d) Maintenance, operation, or rental of automobiles, yachts, hunting lodges, fishing camps, resort properties, houses, apartments, hotel suites, etc.

2. Failure by employees to report as gross income expense account allowances or reimbursements received from employers which have not been accounted for to their employers

(a) Reporting requirements: To simplify tax reporting requirements, Internal Revenue regulations relating to employees' business expenses (sec. 1.162–17) provide that an employee who is required to and does account to his employer for his business expenses need not report on his tax return the amount of such expenses or the reimbursements, allowances, or charges made to his employer therefor, unless he wishes to claim a deduction for expenses in excess of the reimbursements, allowances and charges.

However, where the employee is not required to account to his employer for his business expenses, he must report on his return such expenses and the reimbursements, allowances, or charges made to his employer therefor. Despite the great amount of publicity given to this matter, a large number of employees who are required to report expense allowances and reimbursements on their returns do not do so and do not properly answer the questions relating to these expense accounts on their individual income tax returns.

(b) Accounting practices of employers: In many cases amounts paid as additional compensation are identified or classified by the employer as allowances or payments for other expenses. These accounting practices of some employers make identification of such compensation difficult. For example, some employers pay for the personal expenses of their employees or for members of employees' families. Also, some employers give certain of their employees fixed expense account allowances far in excess of their actual or expected expenses. In these cases, the payments of personal expenses and the excessive amounts of the expense account allowances are intended as additional compensation, but are not included on forms W–2, since the employer does not classify these payments as wages or compensation.

(c) Commission salesmen: Many salesmen paid on a straight commission basis have an arrangement whereby they submit expense accounts to their employers and have their employers designate part of their commissions as reimbursement of expenses. Since such amounts actually represent compensation for services, they should be reported as such.

Furthermore, it is clear that in these cases there is no true accounting to the employer because the employer, having no adverse interest, is not concerned whether the amounts reported to him are accurate. However, these salesmen profess to believe that by adopting this procedure they have accounted to their employer for business expenses within the meaning of the regulations and, therefore, are relieved of the burden of reporting that part of their commissions as income.

3. Deductions based on estimates or inadequate records

A large number of taxpayers do not keep adequate records and supporting documents on travel and entertainment expenses. In the case of employees, this is particularly true of those who are not required to and do not account to their employer for these expenses. Many taxpayers receive an advantage, taxwise, as a result of their poor record-keeping, by claiming deductions for travel and entertainment expenses based on estimates in excess of the amounts actually expended for business purposes. The only procedure available to the Service for determining the correct tax liability in such instances is a reconstruction of expenses under the Cohan rule.

In the Cohan case, the court held that a taxpayer who incurred such expenditures but did not keep adequate records of them should be allowed as close an approximation as possible. (It should be noted, however, that the court emphasized that the burden of proof should bear heavily upon the taxpayer whose inexactitude is of his own making. In those cases the taxpayer often loses deductions to which he would have been entitled had he maintained adequate records.)

ENFORCEMENT PROGRAM OF THE SERVICE

1. Information on expense account allowances

(a) Corporation form: Schedule E of form 1120 (corporations)—1960, "Compensation of Officers" is being expanded to include a section dealing with expense items. This schedule will require information, in addition to the payments designated as compensation, with respect to expense account allowances paid to or on behalf of the officers and claimed as a deduction in determining net income. This information will be required of all corporate officers, except if there are more than 25 officers, then only with respect to the 25 highest paid officers based on the aggregate of compensation plus expense account allowances.

(b) Partnership form: Form 1065 (partnerships) will require similar information concerning all partners, including limited partners.

(c) Individual form: Schedule C of form 1040 (individual proprietorship) will require similar information with respect to the proprietor and the five highest paid employees (based on the aggregate of compensation plus expense account allowances), but it shall not be required that such information be submitted with respect to employees who receive in the aggregate less than $10,000.

Definition: The term "expense account allowances" as used above means:

1. Amounts, other than compensation, received as advances or reimbursements.

2. Amounts paid by or for the corporation, partnership or proprietor for expenses incurred by or on behalf of an officer, partner, employee or proprietor, including all amounts charged through any type of credit card.

This additional information will be helpful in disclosing cases in which payments which really constitute compensation are reported as expense account allowances or reimbursements.

2. Information on certain other expenditures

Form 1120 (corporations)—1960 will contain questions along the following lines:

Did the corporation claim a deduction for expenses connected with—

(If answer to any question is yes, check applicable boxes within that question.)

1. A hunting lodge ☐, working ranch or farm ☐, fishing camp ☐, resort property ☐, or other similar facility ☐? Yes. ☐ No. ☐.

2. The leasing, renting of ownership of a hotel room or suite ☐, apartment ☐, or other dwelling ☐ which was used by customers or officers or employees including members of their families? (Other than use by officers or employees while in travel status.) Yes ☐. No ☐.

3. The attendance of family members of officers or employees at conventions or business meetings? Yes ☐. No. ☐.

4. Vacations for officers or employees, or members of their families? (Other than vacation pay reported on form W–2. Yes ☐. No ☐.

5. The use (in whole or in part) of a yacht or boat for: the entertainment of customers ☐, the personal use of officers, employees, or their families ☐? Yes ☐. No ☐.

Similar questions, as appropriate, will also be added to the partnership return, form 1065, and the business schedule of the individual income tax return, schedule C (form 1040).

An affirmative answer to any of these questions does not necessarily mean that the deductions claimed for any of these items will be questioned or disallowed.

3. Examinations to determine adequacy of employers' business practices in connection with accounting by employees of business expenses

A program is being initiated whereby, during the course of every examination of a return of a taxpayer who pays for travel, entertainment and other business expenses of his employees, the examining officer will ascertain whether the taxpayer uses acceptable business practices in requiring an accounting of business expenses incurred by his employees. Where the taxpayer's method is found to be inadequate, the examining officer will make a list of the employees who received the expense allowances or reimbursements, and the amounts thereof, and the returns of those employees will be examined unless the employee has included the expense account allowances in income on his return.

4. Instructions to field offices

(a) All field offices have recently been instructed to place increased emphasis on the examination of returns involving entertainment, travel, and expenses of a similar

nature. They were informed that particular attention must be given to deductions claimed for expenses in connection with yachts, hunting lodges, club dues as well as the cost of purported business trips which are in fact vacations.

(b) As an integral part of our enforcement program, all field offices have been told to continue to apply the Cohan rule cautiously in those cases in which the taxpayer cannot adequately substantiate deductions claimed for entertainment and similar business expenses.

(c) The field offices have also been advised to pay particular attention to the examination of returns in which the deductions claimed for entertainment and similar expenses appear to be disproportionate in relationship to the income and business activities of the taxpayer. In such examinations large or unusual expenditures for entertainment expenses will be closely examined to determine whether they are ordinary and necessary business expenses.

(d) All field offices have been told that our longstanding policy of reasonableness will continue to be applied with respect to requiring substantiation of items relatively small in amount. This applies in particular to deductions for such business expenses as taxicab fares, tips, and other items relatively small in amount that are not readily susceptible to substantiation.

Mr. CLARK. Mr. President, I wonder if the Senator from Utah knows of any other Senator in opposition who desires to speak?

Mr. BENNETT. I think most Senators are in opposition, but I do not know that there are any others who would like to speak.

Mr. CLARK. Mr. President, I should like to take about 3 more minutes.

In effect, all my friend from Utah has said is that the Treasury is prepared to do by administration what this amendment would require them to do by law. He points out the advice given by a number of panelists at a meeting of the Committee on Ways and Means. But it happens to be a fact that those panelists were tax advisers for business clients and admitted as much. So their testimony was hardly objective.

In fact, they all admitted there were abuses in this area and felt that something should be done to cure them. In my judgment, the way to cure them is to pass a more stringent law than we now have.

Let me give the Senate two or three of the typical abuses which have been held legal in accordance with existing law. A doctor was permitted to deduct the expenses of a cabin cruiser. A tavern owner was permitted to deduct the cost of a Christmas party given for children of the neighborhood to promote the goodwill of their parents toward the tavern; others were allowed to deduct the cost of tickets to hit musicals; football and baseball tickets; the Mardi Gras; the Kentucky Derby.

These expenses have all been claimed and allowed as part of the necessary and ordinary business expense of entertaining prospective customers or clients. These luxury expenses would be disallowed as tax deductions under the language of the amendment which I have offered.

With respect to the amount that the proposed amendment would save, the annual total of expense account spending has been estimated to be between $5 billion and $10 billion. The deductions claimed from these sums have been computed to result in an annual revenue loss of from $1 billion to $2 billion. It is impossible to estimate exactly how much of this sum is made up of expenses and deductions for luxury entertainment items, but I would not be surprised if it amounted to 20 percent of the totals which I have mentioned.

I have therefore included $250 million as a conservative estimate of the amount of additional revenue which this amendment would bring into the Treasury.

I point out with respect to gifts that Printers' Ink estimated expenditures for business gifts in the United States in 1959 at $300 million. The large bulk of this spending is paid for by corporations, and the U.S. Treasury bears 52 percent of the ultimate cost.

The business gift-giving custom is resented by most businessmen who feel trapped by the practice. Printers' Ink reported that 75 percent of the top executives quoted by the magazine thoroughly disapproved of the custom of corporate gift giving, but felt they had to do it because their competitors were doing it, too.

Mr. President, I suggest that this is a clear case in which the question can be determined whether the Senate wishes to help balance the budget or whether it does not. We have removed $2,150 million from the present surplus in the past 10 days, and I say we have an obligation to put some of it back. We could put it back, in part, by adopting the amendment, which does no more than to restore some kind of morality to the business expense deduction situation.

I am happy to yield to my friend from Florida.

Mr. HOLLAND. Is there any limitation under the Senator's amendment on the amount to be spent for a meal or for beverage per person?

Mr. CLARK. No; we changed that from the provision that we had last year. I would also like to say that last year the other Senator from Florida [Mr. SMATHERS] objected because we had certain foreign travel expense deductions forbidden by the amendment then proposed. We took it out this year. One now can go to South America or the Caribbean as often as he wants on any kind of business or convention and deduct the expenses if permitted by existing law, and this amendment would not change the situation.

Mr. HOLLAND. Do I understand that there is or is not a limit on the cost of a meal or the cost of a beverage?

Mr. CLARK. There is no limit so long as it is within the present law, which requires that it be an "ordinary and necessary" business expense. The existing law remains as to that. I assume that even under the present law the agents would have some limit on the amount of food and beverage expenses to be deducted.

Mr. President, I am prepared to yield back the remainder of my time.

Mr. BENNETT. Mr. President, I should like to make some observations and then I will be prepared to yield back the remainder of my time. The Senator from Utah is good at having second thoughts. The amendment would allow the taxpayer to spend money for food and liquor but not for entertainment. That would mean that a man could not take a client to a night club where there was a floor show, even though what he actually paid was the check from the cafe. I assume that a businessman could not even take a customer into a hotel dining room where there was an orchestra. In fact, I am beginning to wonder now whether he could even tell the customer a joke.

Mr. CLARK. Let me say to my good friend from Utah that he can take that client anywhere he wants to take him in order to put a sale over, but Uncle Sam would not pay half the tab.

Mr. BENNETT. I yield back the remainder of my time.

Mr. CLARK. I yield the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back. The clerk will call the roll.

The legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from Idaho [Mr. CHURCH], the Senator from Mississippi [Mr. EASTLAND], the Senator from Rhode Island [Mr. GREEN], the Senator from Indiana [Mr. HARTKE], the Senator from Arizona [Mr. HAYDEN], the Senator from Oregon [Mr. LUSK], the Senator from Washington [Mr. MAGNUSON], the Senator from Montana [Mr. MURRAY], the Senator from Wyoming [Mr. O'MAHONEY], and the Senator from Alabama [Mr. SPARKMAN], are absent on official business.

I also announce that the Senator from Missouri [Mr. HENNINGS] is absent because of illness.

I further announce that the Senator from Minnesota [Mr. HUMPHREY] and the Senator from Tennessee [Mr. KEFAUVER] are necessarily absent.

I further announce that, if present and voting, the Senator from Indiana [Mr. HARTKE], the Senator from Missouri [Mr. HENNINGS], the Senator from Oregon [Mr. LUSK], the Senator from Washington [Mr. MAGNUSON], the Senator from Montana [Mr. MURRAY], and the Senator from Wyoming [Mr. O'MAHONEY], would each vote "yea."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] and the Senator from Arizona [Mr. GOLDWATER] are necessarily absent.

The Senator from North Dakota [Mr. BRUNSDALE] is detained on official business. If present and voting, the Senator from Arizona [Mr. GOLDWATER] would vote "nay."

The result was announced—yeas 45, nays 39, as follows:

So Mr. CLARK's amendment was agreed to.

Mr. CLARK. Mr. President, I move that the Senate reconsider the vote by which the amendment was agreed to.

Mr. DOUGLAS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CLARK. Mr. President, I call up my amendment designated "6-17-60—G," I ask that the amendment not be read, but that it be printed in the RECORD.

The PRESIDING OFFICER. Without objection, the amendment will be printed in the RECORD.

The amendment is as follows: At the appropriate place it is proposed to insert the following new section:

SEC. —. (a) section 1231 of the Internal Revenue Code of 1954 (relating to property used in the trade or business and involuntary conversions) is amended to read as follows:

"SEC. 1231. REAL PROPERTY USED IN THE TRADE OR BUSINESS AND INVOLUNTARY CONVERSIONS

"If, during the taxable year, the recognized gains on sales or exchanges of real property used in the trade or business and held for more than six months, plus the recognized gains from the compulsory or involuntary conversion (as a result of destruction in whole or in part, theft or seizure, or an exercise of the power of requisition or condemnation or the threat or imminence thereof) of real property used in the trade or business and capital assets held for more than six months into other property or money, exceed the recognized losses from such sales, exchanges, and conversions, such gains and losses shall be considered as gains and losses from sales or exchanges of capital assets held for more than six months. If such gains do not exceed such losses, such gains and losses shall not be considered as gains and losses from sales or exchanges of capital assets. For purposes of this subsection—

"(1) in determining under this subsection whether gains exceed losses, the gains described therein shall be included only if and to the extent taken into account in computing gross income and the losses described therein shall be included only if and to the extent taken into account in computing taxable income, except that section 1211 shall not apply; and

"(2) losses upon the destruction, in whole or in part, theft or seizure, or requisition or condemnation of real property used in the trade or business or capital assets held for more than six months shall be considered losses from a compulsory or involuntary conversion. In the case of any capital assets held for more than six months and held for the production of income, this subsection shall not apply to any loss, in respect of which the taxpayer is not compensated for by insurance in any amount, arising from fire, storm, shipwreck, or other casualty, or from theft."

(b) The amendment made by subsection (a) of this Act shall apply to taxable years beginning after the date of the enactment of this Act.

Mr. CLARK. Mr. President, I yield myself as much time as I may require.

This amendment, I must admit, is one which it is difficult to explain clearly, because it deals with a very complicated situation, as a result of which hundreds of millions of dollars are slipping through the hands of the Treasury every year.

The amendment would narrow the types of income which would be accorded favored capital gains treatment.

Until 1942 gains from the sale of depreciable property used in a trade or business were taxed at ordinary income tax rates. The idea was that gains from the sale of that kind of depreciable property—mostly personal property—machinery, equipment, and the like—could not be treated as ordinary income because depreciation deductions were already being taken on it, with consequent tax savings.

However, in 1942, Congress legislated in the Revenue Act that gains realized from the sale of depreciable property held for more than 6 months were to be treated as capital gains, although losses were to be treated as ordinary losses. This was done because the business community was of the opinion that the then existing law was making it difficult to replace depreciated equipment. It was thought that if gains from sales of this kind of equipment could be treated as a capital gain and only a 25 percent tax paid on it, then corporations would more readily replace their equipment and material which was no longer usable or which had been superseded by some more modern type of equipment.

This rationale was correct because in those days—and I see the Senator from Missouri [Mr. SYMINGTON] in the Chamber—one could deduct only straight-line depreciation and writeoff depreciation costs on an item of depreciable personal property in an equal amount each year. Therefore, there was a good reason for making this exception back in 1942.

But this reason no longer held true after the enactment of the notorious Revenue Act of 1954. Instead of having simply straight-line depreciation, one was allowed to have 3 or 4 different kinds of accelerated depreciation.

I shall not take the time to discuss the subject in detail, but each method made it possible to deduct, in the earlier years, a much larger amount of depreciation than before. Let us assume that for the first 5 years of the life of a depreciable property, which might have a life of, perhaps, 15 years, one could take much more than one-third, and in that way gather together the cash from the depreciation account, which would enable the replacement of the property at, say, the end of 5, 6, or 7 years, if something better had come on the market.

That, in other words, put on top of the definition of "capital asset," which had been put into the Revenue Act of 1942, another and additional allowance for depreciation, so that the need for the original one was no longer obvious, or was no longer even justifiable.

Thus, since 1954, business taxpayers have been permitted to deduct depreciation at an accelerated rate and, in addition, they have been permitted to claim favored capital gains rates on gains from sales of the property on which they have claimed fast depreciation writeoffs. They get both the privileged capital gains treatment under the act of 1942 and also the accelerated depreciation deductions involved in the act of 1954.

I point out that statistics compiled by the Department of Commerce show that from a record high in 1953 of $11,800 million for depreciation, the sum almost trebled by 1958, to reach $31,500 million.

Whereas depreciation was the source of only 30 percent of the funds spent by corporations for new capital goods and replacements in 1947, it was the source of 67 percent of all capital spending by corporations in 1958.

In addition it appears, according to a 1959 survey by the McGraw-Hill Co., that depreciation will continue to supply a greater volume of the funds needed for new plants and equipment for at least the next 4 years, and that by 1962 the total will amount to $26 billion, and depreciation will be the source of 79 percent of all capital spending.

Thus it can be seen that businessmen have found a reliable source of funds to use in financing replacement of used plant and equipment in fast writeoff depreciation deductions. To put on top of this the added incentive of permitting capital gains treatment of income from sale of depreciable property would no longer seem to be justified.

My amendment would tax such income at ordinary income rates.

In other words, accelerated depreciation will continue to be allowed; but when one sells the depreciated property, the gains will be treated as ordinary income.

Mr. SYMINGTON. Mr. President, will the Senator from Pennsylvania yield?

The PRESIDING OFFICER (Mr. MUSKIE in the chair). Does the Senator from Pennsylvania yield to the Senator from Missouri?

Mr. CLARK. I yield.

Mr. SYMINGTON. Then there would be normal depreciation; and then accelerated amortization; and then the question of capital gains, which is allowed after a 6-month period of holding, for example. So the three are tied in to private personal property, are they? Is that what the Senator's amendment would do?

Mr. CLARK. That is substantially correct. In other words, if one were going to have depreciable property, ordinarily he would say that it would be treated, after depreciation, as ordinary income, just like inventory. But because there was such a protest from the business community, that was changed in 1942; and in 1954 they changed the

method of computing depreciation, so that in addition to straight line, there will be the double declining balance method and the sum of the year's digit method.

Mr. SYMINGTON. That is very clear to me. [Laughter.]

Mr. CLARK. I have no doubt that my friend the Senator from Missouri had to call in the accountants, when he was successfully running several big companies, and they told him, "You can build a nest egg out of the double declining balance method of depreciation in the 1954 act."

I want them to continue to have accelerated depreciation, but to change the definition of capital assets to what it was before the 1942 enactment.

Mr. SYMINGTON. So the residual will be on the basis of income, not on the basis of capital gains?

Mr. CLARK. That is correct.

The Treasury approves of this; and the Treasury has stated it believes this should be done.

I now wish to read to the Senate a letter I received from a good friend, Fred C. Scribner, dated October 14, 1959:

> We believe that there is validity in the criticism directed by many at weaknesses in the provisions of the law taxing capital gains. Several months ago the Treasury suggested that consideration be given to a change in the law which would treat gain from the sale of depreciable personal property used in business as ordinary income to the extent of the depreciation previously taken on the property.

And that is just what this amendment does.

In addition the amendment would effect two or three other changes in the code, and these have to do——

Mr. CASE of South Dakota. Mr. President, will the Senator from Pennsylvania yield?

Mr. CLARK. Unfortunately, my time is very limited. I am almost through my remarks. If I have any time left when I conclude my remarks, I shall be glad to yield.

In the Revenue Act of 1943, capital gains treatment was extended to income from the cutting or disposal of timber which had previously been taxed at ordinary income rates.

This amendment would put that back on an ordinary income basis.

In the Revenue Act of 1951, the same preferential treatment was permitted for income from the sale of livestock held more than 12 months; which previously had been taxed at ordinary income rates. In the same act, receipts from unharvested crops and coal royalties were held to be capital gains, although both types of income had been subject to ordinary income rates until 1951.

My bill would prohibit preferential treatment of income from those peripheral items as capital gains, and would subject such income to ordinary income-tax rates, as was the case until these special privilege sections were written into the code.

Mr. President, how much time do I have left?

The PRESIDING OFFICER. Six minutes.

Mr. LONG of Louisiana. Mr. President, will the Senator from Pennsylvania yield?

Mr. CLARK. I wonder whether I can get some time from the opposition, if the opposition wishes to ask me questions. Would the Senator from South Dakota be willing to engage me in colloquy in the time available to the opposition?

Mr. CASE of South Dakota. I am perfectly willing to do so. [Laughter.]

Mr. BENNETT. But the opposition has not used any time thus far. So I do not think the proponents should be allowed to dish out the time available to the opposition.

Mr. CASE of South Dakota. Mr. President, will the Senator from Utah yield to me 1 minute from the time available to the opposition?

Mr. BENNETT. I am happy to do so, Mr. President.

Mr. CASE of South Dakota. The Senator from Pennsylvania has referred to the increase in the amount of values, after the 1954 act, which was obtained from the accelerated depreciation. Is it not a fact that most of the property which was given the accelerated appreciation treatment was personal property?

Mr. CLARK. I think almost all of it was.

Mr. CASE of South Dakota. Is the Senator's amendment limited to real property?

Mr. CLARK. No, although I can understand the reason why the Senator has asked that question.

This is a technical problem under section 1231 of the code. My amendment would strike out the present exceptions, and therefore would leave only the general rule in regard to dealing with real estate. I realize the text of the amendment is very technical. It must be considered in terms of what it proposes to delete from section 1231 of the code.

Mr. CASE of South Dakota. That illustrates the statement the Senator made at the beginning of his remarks—namely, that this is a very technical field of tax writing and difficult to handle by amendments on the Senate floor without benefit of comparative language.

The PRESIDING OFFICER. The time yielded to the Senator from South Dakota has expired.

Mr. BENNETT. I yield 1 additional minute to the Senator from South Dakota.

The PRESIDING OFFICER. The Senator from South Dakota is recognized for 1 more minute.

Mr. CASE of South Dakota. It is my understanding that the House Ways and Means Committee expects to begin, in November, hearings upon a revision of the Internal Revenue Code. Amendments which are clear in their application and in their import can, I think, be dealt with on the floor of the Senate. But it is very difficult to deal with these technical amendments, which are so confusing that, on their face, they seem to apply to one thing, whereas they really apply to something entirely different.

As one Member of the Senate, at least, I find it very difficult to vote on such amendments.

Personally, I prefer to see such an amendment referred to the detailed review and study which can be given at hearings such as those the Ways and Means Committee proposes to conduct in November.

Mr. CLARK. That is a good point. But how can we balance the budget?

Mr. CASE of South Dakota. Some of the amendments offered for that purpose this afternoon had clear import and I voted for them, but where the effect is uncertain or possibly of mixed results, one cannot vote with assurance.

The PRESIDING OFFICER. The time yielded to the Senator from South Dakota has expired.

Mr. CLARK. Mr. President, I yield myself 2 additional minutes, if it is agreeable to the Senator from Utah to have me use them at this time.

Mr. BENNETT. Certainly.

Mr. CLARK. I read now from the President's budget message:

> If gain from the sale of depreciable personal property were treated as ordinary income, the advantage in claiming excessive depreciation deductions would be materially reduced, and the taxpayer's judgment as to the useful life of his property could be more readily accepted. Accordingly, I recommend that consideration be given to a change in the law which would treat such gains as ordinary income to the extent of the depreciation deduction previously taken on the property.

So I hope all Eisenhower Republicans will support the President on this amendment.

Mr. LONG of Louisiana. Mr. President, will the Senator from Pennsylvania yield?

Mr. CLARK. I yield.

Mr. LONG of Louisiana. Is denial of the capital gains treatment to the sale of timber, and matters of that sort, also recommended by the administration?

Mr. CLARK. It recommends study of these peripheral matters.

Mr. President, I reserve to myself the remainder of the time available to me.

Mr. BENNETT. Mr. President, the Senator from Pennsylvania is correct: In the President's budget a proposal was made that this problem be handled. The problem is recognized. The Ways and Means Committee held specific hearings on the proposal to develop a solution for this problem. But at the end of the hearings, the Ways and Means Committee took no action. This matter was never referred to the Senate Finance Committee.

So here on the floor of the Senate we are now asked to consider a proposal on which the Senate Finance Committee has never been given an opportunity to make a study or hold a hearing.

Frankly, I assume that if this amendment were added to the bill, the House would be justified in saying that the study by its Ways and Means Committee was incomplete, and that the Senate Finance Committee had made no study, and that this is no time to enact such a measure.

Earlier, Mr. President, the Senator from Pennsylvania referred to "the infamous 1954 tax code which allowed more rapid rates of depreciation."

One of my interesting memories is of the debate I had with the Senator from Oklahoma, which established the fact that the first change in the law which permitted the declining balance rate of depreciation was passed in the 1940's by the Democrats, and was not originated in the 1954 code. It is true that the 1954 code extended it; but the principle was not established in "the infamous 1954 code."

I should like to ask the Senator from Pennsylvania a question: Under his amendment, gains from the ability of a merchant to sell at a profit an asset other than real estate used in the business would be treated as ordinary income. Would losses from the sale of that kind of material be treated as ordinary losses, under this proposal?

Mr. CLARK. They already are. Let me say, however, that I do not think it is quite correct—and I will take this from my time—to talk about a merchant selling inventory——

Mr. BENNETT. I did not intend to talk about it. He is selling machinery and other assets used in his business, which are depreciable.

Mr. CLARK. Yes; machine tools and that kind of equipment.

Mr. BENNETT. I am sure the Senator from Pennsylvania has not stopped to realize that, under the rules of the Internal Revenue Code, a farmer's dairy herd is a depreciable asset. So the Senator would impose ordinary income rates on the farmer who sells his stock out of his basic herd. The Senator would impose these rates on a farmer who sells anything except the actual produce of his farm.

Mr. CLARK. Will the Senator yield to me on my time?

Mr. BENNETT. Yes.

Mr. CLARK. I do not think most farmers have a high enough income so that the 25 percent capital gains limitation would do them much good. It would be just the big farm operators who would benefit.

Mr. BENNETT. I am sure the farmers will be interested to learn that the Senator has changed the rule affecting them without giving them a chance to be heard.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. BENNETT. Yes.

Mr. WILLIAMS of Delaware. The Senator from Pennsylvania maintains that the capital gains provision does not help any farmers or small businessmen. Does it not work this way? Under capital gains rules one-half of the income is taxable at whatever rate is applicable to the taxpayer, not to exceed 50 percent? If he is in the 20-percent bracket he would pay the 20-percent rate on one-half of his income.

Mr. BENNETT. That is right. The Treasury feels this is a problem which should be studied. The Ways and Means Committee of the House has had no opportunity to study it. It is so complex a situation that it is obvious many Members of the Senate, including the senior Senator from Utah, do not completely understand what are the ramifications of this proposal, and I do not think it should be added to the bill.

Mr. CAPEHART. Mr. President, will the Senator yield 3 or 4 or 5 minutes so that I may speak in opposition to the amendment?

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Indiana?

Mr. BENNETT. How much time does the Senator from Utah have?

The PRESIDING OFFICER. The Senator from Utah has 11 minutes remaining.

Mr. BENNETT. How much time does the Senator from Indiana want?

Mr. CAPEHART. Three or 4 minutes.

Mr. BENNETT. I yield 3 minutes to the Senator from Indiana.

Mr. CAPEHART. Mr. President, I have introduced bills in Congress for many years to permit a businessman to depreciate his capital assets 100 percent the first year, if he wished to do so. He could depreciate those assets 100 percent only once. When he did so, the assets would be completely depreciated.

All in the world that happens as a result of strangling business on depreciation of capital assets is a decrease of employment in America, because trade and business are diminished. What we ought to be doing is encouraging the manufacturer and the businessman to dispose of his obsolete equipment, or to dispose of it even before it is obsolete, and buy new equipment, in order to create jobs.

Why do people who claim to be so liberal and claim to be for the underdog and the laboring man want to introduce bills that would deliberately reduce the number of jobs available? The businessman may be hit in a slight way. He may be hurt a little. But, after all is said and done, in America a job can be obtained only from two sources—thank God. One is from the Government, and the other is from private industry. We have too many Government workers now, and we ought to start to do things that will create jobs in private industry.

When legislation such as this is enacted, all it does is result in less buying of machine tools and less buying of capital equipment. Therefore, jobs in America are diminished.

One of the reasons why we have had so much prosperity and one of the reasons why the great majority of the working men of this country have had jobs at such high wages has been due to the law such as the one we are talking about. Why do we not leave it alone? If Senators want to do anything to increase the prosperity of this country, if they want to do something to create more jobs at higher wages, and more all around employment, then they should be advocating a 100-percent depreciation allowance, so that the businessman will sell his old, obsolete equipment, or any other kind of equipment, because it has been depreciated 100 percent, and let him treat it as a capital loss. As a result, more prosperity and more jobs would be created, instead of depressing the market and eliminating jobs. The purchase of new equipment would lead to the general prosperity of America, and particularly of the laboring man.

Why is it that those who always talk about being liberal want to smack a businessman when they can, which will only result in not creating jobs and prosperity? Why do they want to do it? That is something I would like to have somebody answer some day.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. CLARK. Mr. President, how much time have I remaining?

The PRESIDING OFFICER. Three minutes.

Mr. CLARK. Mr. President, I desire to modify my amendment. I send to the desk a modification, and ask that it be stated by title. The purpose of the modification is to take out all the peripheral items, such as timber, livestock, and coal, and to confine the amendment to the redefinition of capital assets with respect to depreciable property which is within the recommendation of the President of the United States in his budget message.

I ask unanimous consent that we may have a quorum call, to be charged to neither side, and that at the end of the quorum call each side will have 3 minutes to sum up, and that we then vote.

Mr. BENNETT. Mr. President, how much time do the opponents have?

The PRESIDING OFFICER. Seven minutes.

Mr. BENNETT. This is not a case where the opponents are squeezed down. I shall, therefore, be most happy to agree to a quorum call after I am satisfied that Senators on this side who wish to speak have had an opportunity to be heard, after which I shall be satisfied to have 3 minutes, the same as the other side.

The PRESIDING OFFICER. The modification proposed by the Senator from Pennsylvania will be stated.

The LEGISLATIVE CLERK. It is proposed, at the appropriate place, to insert the following new section:

SEC. —. (a) Subsection (b) of section 1231 of the Internal Revenue Code (relating to property used in the trade or business and involuntary conversions) is amended to read as follows:

"(b) DEFINITION OF PROPERTY USED IN THE TRADE OR BUSINESS.—For purposes of this section—

"(1) GENERAL RULE.—The term 'property used in the trade or business' means real property used in the trade or business, held for more than 6 months, which is not—

"(A) property of a kind which would properly be includible in the inventory of the taxpayer if on hand at the close of the taxable year,

"(B) property held by the taxpayer primarily for sale to customers in the ordinary course of his trade or business, or

"(2) TIMBER OR COAL.—Such term includes timber and coal with respect to which section 631 applies.

"(3) LIVESTOCK.—Such term also includes livestock, regardless of age, held by the taxpayer for draft, breeding, or dairy purposes, and held by him for 12 months or more from the date of acquisition. Such term does not include poultry.

"(4) UNHARVESTED CROP.—In the case of an unharvested crop on land used in the trade or business and held for more than 6 months, if the crop and the land are sold or exchanged (or compulsorily or involuntarily

converted) at the same time and to the same person, the crop shall be considered as 'property used in the trade or business.'" (b) The amendment made by subsection (a) of this amendment shall apply to taxable years beginning after the date of the enactment of this amendment.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Pennsylvania?

Mr. CAPEHART. Mr. President, reserving the right to object, what is the request of the Senator from Pennsylvania?

The PRESIDING OFFICER. Will the Senator restate his request?

Mr. CLARK. Mr. President, I ask unanimous consent that there may be a quorum call without the time necessary for the call of the roll being charged to either side, that after the quorum call the Senator from Utah may use his remaining 7 minutes, and that thereafter each side may have 3 minutes, at the conclusion of which time there shall be a vote. Is that a correct statement?

Mr. BENNETT. It was my understanding that the Senator from Utah had 7 minutes remaining and the Senator from Pennsylvania had 3 minutes remaining.

Mr. CLARK. I do not think I have any time remaining.

The PRESIDING OFFICER. The Senator from Pennsylvania had 3 minutes remaining until he presented his modified amendment.

Mr. BENNETT. Mr. President, the Senator from Utah is very happy to use as much of the 7 minutes as is required, and to agree that there may be 3 additional minutes for each side after the quorum call, but the Senator from Utah would like to use some time before the quorum call, so that after the quorum call the time may be equally divided.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Pennsylvania? The Chair hears none, and it is so ordered.

Mr. CAPEHART. Mr. President, will the Senator from Utah yield me 2 minutes?

Mr. BENNETT. Mr. President, I am happy to yield 2 minutes to the Senator from Indiana.

Mr. CAPEHART. Mr. President, the fact that the Senator is modifying his amendment on the floor, to take care of dairy herds and other farm animals, is the best proof in the world that the amendment ought to be rejected. I am here tonight representing the laboring man, the man who works and the man who wants a job. Senators who are interested in full employment, who are interested in providing jobs at good wages in order to accelerate business, will vote against the amendment, because the more liberal we can be with regard to depreciation and with regard to the taxes which relate to capital assets, the quicker the businessmen are going to change their machine tools and equipment, which cost billions of dollars, and which are used in business as capital assets. That is the way to create jobs. It is simply foolish for any Senator to talk out of the side of his mouth and say in one breath, "I am a liberal and I am in favor of the laboring man," and to turn around and vote so as to cause the laboring man to lose his job.

Mr. BENNETT. Mr. President, unless some other Senator desires to speak in opposition, I yield back the remainder of the time which came to me under the original agreement, and I suggest the absence of a quorum.

Mr. CLARK. Mr. President, it is the understanding that the time necessary for the call of the roll will not be charged to either side.

Mr. BENNETT. The time will not be charged to either side, and at the end of the quorum call each side will have 3 minutes remaining.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BENNETT. Mr. President, I ask unanimous consent that further proceedings under the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CLARK. Mr. President, I ask for the yeas and nays on the amendment.

Mr. BENNETT. Mr. President, it is my understanding that the yeas and nays have already been ordered.

Mr. CLARK. That is incorrect. I thought so, too, but it is incorrect.

The yeas and nays were ordered.

Mr. BENNETT. Mr. President, I understand the opposition to the amendment has 3 minutes. I yield that time to the distinguished Senator from Delaware [Mr. WILLIAMS].

Mr. WILLIAMS of Delaware. Mr. President, I yield myself 1 minute, and I reserve the rest of the time.

I shall not even attempt to discuss the merits or demerits of the amendment. The first amendment was submitted by the Senator from Pennsylvania a couple of days ago, and then in the last 5 minutes or so it has been completely revised.

I have conferred with several members of the Committee on Finance in an effort to find out what the effect of this last amendment would be. I do not think a single member of the Committee on Finance understands what is in the amendment now pending. I shall go further to say that I do not think any Member of the U.S. Senate present in the Chamber understands what the effect of the amendment would be. The amendment should be rejected until such time as it has gone to the Committee on Finance and we can understand the proposal upon which we are asked to vote. The Senator from Pennsylvania may understand it, but I doubt that anyone else does.

Mr. CLARK. Mr. President, I am a little bit startled at what my good friend from Delaware has just said, because I read from the message of the President of the United States:

> If gain from the sale of depreciable personal property were treated as ordinary income, the advantage gained in claiming excessive depreciation deductions would be materially reduced and the taxpayer's judgment as to the useful life of this property could more readily be accepted. Accordingly, I recommend that consideration be given to a change in the law which would treat such gain as ordinary income to the extent of the depreciation deduction previously taken on the property.

That is the President of the United States speaking. Let me now read from the letter of the Under Secretary, Mr. Fred C. Scribner, Jr., dated October 14, 1959:

> We believe that there is validity in the criticism directed by many at weaknesses in the provisions of the law taxing capital gains. Several months ago the Treasury suggested that consideration be given to a change in the law which would treat gain from the sale of depreciable personal property used in business as ordinary income to the extent of the depreciation previously taken on the property.

That was the Secretary of the Treasury. In addition, the panel of which my friend from Utah spoke with such praise before the Ways and Means Committee recommended unanimously that the amendment be adopted.

So to my friends across the aisle I can only say that this may be called the Clark amendment, but it is actually the Dwight D. Eisenhower amendment. I am afraid I have lost some Senators on this side of the aisle for saying that.

I yield back the remainder of my time.

Mr. WILLIAMS of Delaware. Mr. President, I ask unanimous consent that a copy of the first version of the amendment as presented by the Senator from Pennsylvania, followed by a copy of his amendment as modified about 5 minutes ago, be printed in the RECORD at this point.

There being no objection, the amendments were ordered to be printed in the RECORD, as follows:

> SEC. —. (a) section of 1231 of the Internal Revenue Code of 1954 (relating to property used in the trade or business and involuntary conversions) is amended to read as follows:
>
> "SEC. 1231. REAL PROPERTY USED IN THE TRADE OR BUSINESS AND INVOLUNTARY CONVERSIONS
>
> "If, during the taxable year, the recognized gains on sales or exchanges of real property used in the trade or business and held for more than six months, plus the recognized gains from the compulsory or involuntary conversion (as a result of destruction in whole or in part, theft or seizure, or an exercise of the power of requisition or condemnation or the threat or imminence thereof) of real property used in the trade or business and capital assets held for more than six months into other property or money, exceed the recognized losses from such sales, exchanges, and conversions, such gains and losses shall be considered as gains and losses from sales or exchanges of capital assets held for more than six months. If such gains do not exceed such losses, such gains and losses shall not be considered as gains and losses from sales or exchange of capital assets. For purposes of this subsection—
>
> "(1) in determining under this subsection whether gains exceed losses, the gains described therein shall be included only if and to the extent taken into account in computing gross income and the losses described therein shall be included only if and to the extent taken into account in computing taxable income, except that section 1211 shall not apply; and
>
> "(2) losses upon the destruction, in whole or in part, theft or seizure, or requisition or condemnation of real property used in the

trade or business or capital assets held for more than six months shall be considered losses from a compulsory or involuntary conversion. In the case of any capital assets held for more than six months and held for the production of income, this subsection shall not apply to any loss, in respect of which the taxpayer is not compensated for by insurance in any amount, arising from fire, storm, shipwreck, or other casualty, or from theft."

(b) The amendment made by subsection (a) of this Act shall apply to taxable years beginning after the date of the enactment of this Act.

At the appropriate place insert the following new section:

SEC. —. (a) Subsection (b) of section 1231 of the Internal Revenue Code (relating to property used in the trade or business and involuntary conversions) is amended to read as follows:

"(b) DEFINITION OF PROPERTY USED IN THE TRADE OR BUSINESS.—For purposes of this section—

"(1) GENERAL RULE.—The term 'property used in the trade or business' means real property used in the trade or business, held for more than 6 months, which is not—

"(A) property of a kind which would properly be includible in the inventory of the taxpayer if on hand at the close of the taxable year,

"(B) property held by the taxpayer primarily for sale to customers in the ordinary course of his trade or business, or

"(2) TIMBER OR COAL.—Such term includes timber and coal with respect to which section 631 applies.

"(3) LIVESTOCK.—Such term also includes livestock, regardless of age, held by the taxpayer for draft, breeding, or dairy purposes, and held by him for 12 months or more from the date of acquisition. Such term does not include poultry.

"(4) UNHARVESTED CROP.—In the case of an unharvested crop on land used in the trade or business and held for more than 6 months, if the crop and the land are sold or exchanged (or compulsorily or involuntarily converted) at the same time and to the same person, the crop shall be considered as 'property used in the trade or business.'"

(b) The amendment made by subsection (a) of this amendment shall apply to taxable years beginning after the date of the enactment of this amendment.

Mr. WILLIAMS of Delaware. Anyone can readily see the difference between these two amendments. I repeat, if the first amendment were to carry out the objectives sought to be achieved by the Senator from Pennsylvania, certainly the last one does not do so because it is a complete rewrite of his original amendment. It is not a minor modification but a complete substitution. It appears that the effect of the proposed amendment would be to handicap the right of the small businessman and the American farmer to depreciate his property at an accelerated rate. I am surprised that the Senator from Pennsylvania would want to do this. I doubt if that is his objective. This amendment should go to the Finance Committee and be studied before being offered on the floor of the Senate.

I repeat, I do not believe any Member of the Senate is familiar enough with the tax code to amend it on the floor of the Senate on 5 minutes' notice.

Mr. CLARK. All I can say in reply to the Senator from Delaware is that I quite agree that my friend from Delaware does not understand the amendment, but I think I do. I yield back the remainder of my time.

Mr. WILLIAMS of Delaware. I yield back the remainder of my time.

The PRESIDING OFFICER. All time is yielded back.

The question is on agreeing to the amendment of the Senator from Pennsylvania [Mr. CLARK]. On this question the yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from Idaho [Mr. CHURCH], the Senator from Mississippi [Mr. EASTLAND], the Senator from Rhode Island [Mr. GREEN], the Senator from Alaska [Mr. GRUENING], the Senator from Indiana [Mr. HARTKE], the Senator from Oregon [Mr. LUSK], the Senator from Washington [Mr. MAGNUSON], the Senator from Montana [Mr. QUINN], and the Senator from Alabama [Mr. SPARKMAN], are absent on official business.

I also announce that the Senator from Missouri [Mr. HENNINGS], is absent because of illness.

I further announce that the Senator from Minnesota [Mr. HUMPHREY], the Senator from Tennessee [Mr. KEFAUVER], and the Senator from Wyoming [Mr. O'MAHONEY], are necessarily absent.

I further announce that, if present and voting, the Senator from Missouri [Mr. HENNINGS] would vote "yea."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] and the Senator from Arizona [Mr. GOLDWATER] are necessarily absent.

If present and voting, the Senator from Arizona [Mr. GOLDWATER] would vote "nay."

The result was announced—yeas 16, nays 69, as follows:

[No. 244]

YEAS—16

Carroll	Kennedy	Moss
Clark	Long, La.	Proxmire
Douglas	McGee	Symington
Gore	McNamara	Williams, N.J.
Hart	Monroney	
Jackson	Morse	

NAYS—69

NOT VOTING—15

Bridges	Gruening	Lusk
Church	Hartke	Magnuson
Eastland	Hennings	Murray
Goldwater	Humphrey	O'Mahoney
Green	Kefauver	Sparkman

So Mr. CLARK's amendment was rejected.

Mr. JOHNSON of Texas. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. DIRKSEN. Mr. President, I move to lay that motion on the table.

The motion to table was agreed to.

Mr. DOUGLAS. Mr. President, I call up my amendment identified "6–17–60–F. I ask that the amendment be not read, but printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The LEGISLATIVE CLERK. At the end of the bill it is proposed to insert the following:

SEC. 7. PERCENTAGE DEPLETION FOR OIL AND GAS WELLS.

(a) Section 613 of the Internal Revenue Code of 1954 (relating to percentage depletion) is amended—

(1) by striking out, in subsection (a), "specified in subsection (b)" and inserting in lieu thereof "specified in subsection (b) and (d)";

(2) by striking out paragraph (1) of subsection (b) and inserting in lieu thereof the following:

"(1) Oil and gas wells.—The percentage applicable under subsection (d)(1).";" and

(3) by redesignating subsection (d) as (e), and by inserting after subsection (c) the following new subsection:

"(d) OIL AND GAS WELLS.—

"(1) PERCENTAGE DEPLETION RATES.—In the case of oil and gas wells, the percentage referred to in subsection (a) is as follows:

"(A) 27½ PERCENT—to the extent that, for the taxable year, the taxpayer's gross income from the oil and gas well, when added to (i) the taxpayer's gross income from all other oil and gas wells, and (ii) the gross income from oil and gas wells of any taxpayer which controls the taxpayer and of all taxpayers controlled by or under common control with the taxpayer, does not exceed $1,000,000;

"(B) 21 PERCENT—to the extent that, for the taxable year, the taxpayer's gross income from the oil and gas well, when added to (i) the taxpayer's gross income from all other oil and gas wells, and (ii) the gross income from oil and gas wells of any taxpayer which controls the taxpayer and of all taxpayers controlled by or under common control with the taxpayer, exceeds $1,000,000 but does not exceed $5,000,000; and

"(C) 15 PERCENT.—To the extent that, for the taxable year, the taxpayer's gross income from the oil and gas well, when added to (i) the taxpayer's gross income from all other oil and gas wells, and (ii) the gross income from oil and gas wells of any taxpayer which controls the taxpayer and of all taxpayers controlled by or under common control with the taxpayer, exceeds $5,000,000.

"(2) CONTROL DEFINED.—For purposes of paragraph (1), the term 'control' means—

"(A) with respect to any corporation, the ownership, directly or indirectly, of stock possessing more than 50 percent of the total combined voting power of all classes of stock entitled to vote, or the power (from whatever source derived and by whatever means exercised) to elect a majority of the board of directors, and

"(B) with respect to any taxpayer, the power (from whatever source derived and by whatever means exercised) to select the management or determine the business policies of the taxpayer.

"(3) CONSTRUCTIVE OWNERSHIP OF STOCK.—The provisions of section 318(a) (relating to constructive ownership of stock) shall apply in determining the ownership of stock for purposes of paragraph (2).

"(4) APPLICATION UNDER REGULATIONS.—This subsection shall be applied under regu-

lations prescribed by the Secretary or his delegate."

(b) The amendments made by subsection (a) shall apply only with respect to taxable years beginning after the date of the enactment of this Act.

Mr. DOUGLAS. Mr. President, while many Senators are in the Chamber, I ask for the yeas and nays on the amendment.

The yeas and nays were ordered.

Mr. GORE. Mr. President, will the Senator yield?

Mr. DOUGLAS. I am on limited time. I have only 15 minutes. I would not like to yield on my time. I ask unanimous consent that any colloquy which may now follow will not be charged to my time.

The PRESIDING OFFICER. The Senate will be in order.

Mr. GORE. Mr. President, a parliamentary inquiry.

Mr. DIRKSEN. Mr. President, what is the request?

Mr. DOUGLAS. I understand that the Senator from Tennessee will offer an amendment to my amendment. I have been recognized. I will be glad to yield to the Senator from Tennessee, provided it is understood that this time is not charged to my time, and that such time as the Senator from Tennessee actually takes will either be without limit or be subject to such a unanimous consent request as may be later agreed upon.

Mr. GORE. Mr. President, reserving the right to object, as I understood the unanimous consent agreement, it was that in the event I offered an amendment in the nature of a substitute for the amendment of the Senator from Illinois I would have 30 minutes pro and con in my own right with respect to that amendment.

Mr. JOHNSON of Texas. That is correct.

The PRESIDING OFFICER. That is correct.

Mr. GORE. That being correct, I should like now, if it is agreeable to the Senator from Illinois, to offer my amendment and take my time now.

Mr. DOUGLAS. It is perfectly agreeable to me provided that the time which has already been consumed should not be deducted from the time which has been allotted to me.

The PRESIDING OFFICER. Under the practice of the Senate, the Senator from Tennessee will have to defer the offering of his amendment until the Senator from Illinois has used his time.

Mr. GORE. That is not true if the Senator from Illinois yields for this purpose.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Senator from Tennessee may offer his amendment.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. DIRKSEN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Illinois will state it.

Mr. DIRKSEN. The amendment in the nature of a substitute and the amendment of the senior Senator from Illinois would take, certainly, 30 minutes on a side.

Mr. GORE. That is correct.

Mr. DIRKSEN. Does the Senator propose to request the yeas and nays?

Mr. GORE. I do not.

Mr. DIRKSEN. Is it proposed to use all the time allotted?

Mr. GORE. I hope to finish in 20 minutes.

The PRESIDING OFFICER. The Senator from Illinois [Mr. DOUGLAS] made an inquiry of the Chair. The Chair will respond by saying that the interpretation of the Senator from Illinois is correct. One hour is available, 30 minutes on each side, the time to be equally divided.

Mr. HICKENLOOPER. Mr. President, I should like to address a parliamentary inquiry without having the time for the inquiry charged to either side.

The PRESIDING OFFICER. Without objection, the Senator from Iowa will propound his inquiry.

Mr. HICKENLOOPER. In case the amendment of the Senator from Tennessee, which is in the nature of a substitute, as I understand, is adopted, that certainly would eliminate the further consideration of the main amendment of the Senator from Illinois. However, as I understand, under the agreement there is a total of 1 hour on both of them. I think we would have to wait until action was taken on the amendment of the Senator from Tennessee before we would know what the situation was.

Mr. GORE. Mr. President, I should like to be heard on the parliamentary inquiry of the Senator from Iowa. Should my amendment in the nature of a substitute be adopted, the question would recur on the Douglas amendment as amended by my amendment; and the Senator from Illinois would still have his time.

The PRESIDING OFFICER. The Senator from Tennessee is correct.

Mr. GORE. Mr. President, may I be recognized to offer my amendment?

The PRESIDING OFFICER. How much time does the Senator yield himself?

Mr. GORE. Ten minutes. First, I ask that the amendment be stated.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. At the end of the bill, it is proposed to insert the following new title and section:

TITLE III—ADDITIONAL PROVISIONS

SEC. 301. PERCENTAGE DEPLETION.

Section 613(a) of the International Revenue Code of 1954 is amended by deleting "50 per centum" and inserting "33⅓ per centum."

Mr. GORE. Mr. President, the real limiting factor in the amount of tax reduction permitted by the percentage-depletion formula is the 50 percent of taxable income limitation in the law. The 27½ percent of gross with respect to a large number of taxpayers entitled to percentage depletion is quite unrealistic.

I should like to take a few minutes to put this question in perspective. I feel that my amendment represents a far more realistic and practical way of limiting the percentage-depletion tax reduction than the amendment of the Senator from Illinois.

Mr. SCOTT. Mr. President, will the Senator yield? I should like some clarification.

Mr. GORE. I yield.

Mr. SCOTT. Does the Senator's amendment also apply to the 10-percent depletion allowance for coal?

Mr. GORE. It applies to the limitation on taxable income with respect to percentage depletion for all minerals and oil and gas.

Mr. SCOTT. I thank the Senator.

Mr. GORE. As the Senator knows, the percentage depletion allowed ranges from a high of 27½ percent for oil down to 5 percent for several other products. Some allowances are 15 percent, some 10 percent, some 12 percent, some 5 percent; but the limiting factor which applies equally to all is that no percentage depletion deduction may exceed 50 percent of taxable income computed without regard to depletion.

Mr. SCOTT. I thank the Senator. I asked him the question because in my State of Pennsylvania many people are out of work because a large number of mines have gone out of business. There is great distress in the mining regions. I was curious to know whether the amendment applied to coal, as well.

Mr. GORE. I may say that the present formula does not deal nearly so favorably with the coal industry as it does with certain others.

Mr. SCOTT. I thank the Senator.

Mr. CASE of South Dakota. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I yield.

Mr. CASE of South Dakota. The Senator from Tennessee is aware, is he not, of the discrimination in the present depletion rate as applied to the gold-mining industry? The 23-percent rate is permitted for many of the hard minerals which are similar to gold, so far as mining processes are concerned. Yet gold mining today is allowed a 15 percent depletion, whereas silver and other hard metals get 23 percent. Gold mining is probably the most depressed metal industry in the country. I am fearful that if the Senator changes the 50 percent to 33⅓ percent, the result will be even more severe against the gold mining industry than the present law is. His amendment will be particularly severe upon low profit and marginal operations. High profit industries might survive but industries with small profits would lose what little cushion for reserves, replacement of equipment, development or dividends the depletion allowance may provide.

Mr. GORE. What I propose is that no taxpayer be allowed to deduct more than one-third of his net profits. As the law is presently written, taxpayers may obtain a deduction of 50 percent of their net profits. This is the real limiting factor for many taxpayers.

Mr. CASE of South Dakota. But if they do not have a fair depletion rate, and if the product has a fixed price, as

the gold mining industry does, and if there has been an increase in the cost or production since 1934 in powder, in steel, and in wages, the amendment of the Senator from Tennessee could condemn the gold-mining industry in the United States to extinction.

Mr. GORE. In that case, the industry does not realize nearly enough net profit to take advantage of the percentage depletion allowed them. My amendment will, I hope, serve to illustrate the lack of uniformity, the unequal application, of percentage depletion.

As the able Senator from South Dakota knows, percentage depletion is not related to the exhaustion or depletion of the property or the natural resource. It is nothing more and nothing less than a formula for tax reduction. This formula applies, as the Senator from South Dakota illustrated, quite unevenly and quite inequitably as among various taxpayers. That would be so even though the percentage depletion rate permitted were the same. But, as I understand, in an overwhelming number of cases the limitation is not 27½ percent or 15 percent of gross, but 50 percent of the net.

Mr. PASTORE. Mr. President, will the Senator from Tennessee yield for a question?

The PRESIDING OFFICER (Mr. BARTLETT in the chair). Does the Senator from Tennessee yield to the Senator from Rhode Island?

Mr. GORE. I yield.

Mr. PASTORE. What would be the situation in a case in which there was no profit? How much could be deducted then, under the Senator's amendment?

Mr. GORE. Nothing at all.

Mr. PASTORE. In other words, the depreciation formula, which exists today would then apply, would it?

Mr. GORE. Yes.

Mr. PASTORE. All that the amendment of the Senator from Tennessee would allow, as regards depreciation, would be to up to one-third, rather than one-half, of the profits, would it?

Mr. GORE. Exactly.

Mr. PASTORE. Regardless of what the product or article happened to be?

Mr. GORE. That is right; and it would affect only a taxpayer whose depletion allowance in the future proved to be in excess of one-third of his net profits.

Mr. PASTORE. So here we are not dealing with an industry which may be depressed. Instead, we are dealing with the extent to which one may take the allowance, insofar as profits are concerned; is that correct?

Mr. GORE. That is right.

Mr. PASTORE. No matter whether the present formula is 10 percent, 15 percent, 25 percent, or whatnot, the amendment of the Senator from Tennessee would provide that no matter what the depreciation formula happened to be, the amount deducted could not exceed one-third of the profits, rather than one-half.

Mr. GORE. That is it.

Mr. PASTORE. So in the case of an industry that was depressed or in the case of a concern which had lost money, the amendment would not make any change at all, would it?

Mr. GORE. That is correct. My amendment is only directed toward those whose net profits exceed this figure.

Mr. PROXMIRE. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I yield.

Mr. PROXMIRE. Profits are after intangible drilling costs are deducted, for example; is not that true?

Mr. GORE. Yes, and also exploration costs. That is why I used the term, in the beginning, "net taxable income."

Mr. PROXMIRE. So after the oil companies have been able to deduct all the other special concessions they now have, including intangible drilling costs, an allowance which is of enormous value to them; and I understand that most of the experts in this field claim that it is much more valuable than the depletion allowance—they could still deplete up to one-third of their income, if the Senator's amendment were enacted.

Mr. GORE. Under the amendment, the limitation is one-third of taxable income. The intangible drilling costs, the costs of doing business, the costs of exploration—these legal deductions—would be deducted before my amendment would take effect. Indeed, they now are, before the 50-percent limitation takes effect.

Mr. President, my amendment would affect only those who are in a profitable position. I repeat that the amendment would lower the ceiling, the limitation, from a deduction of 50 percent of taxable income to 33⅓ percent of taxable income; and I am persuaded that no concern ought to be allowed to deduct more than one-third of its profits, tax-free.

I say that because—I repeat—percentage depletion is not related to the exhaustion or depletion of the property or the resources; it is merely a formula for tax reduction.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. GORE. Mr. President, I yield myself 5 minutes from the additional 5 minutes available to me.

Mr. CARROLL. Mr. President, will the Senator from Tennessee yield to me, to permit me to ask a series of questions?

The PRESIDING OFFICER. Under the unanimous-consent agreement, a quorum call is to be had 10 minutes before the vote. Under that arrangement, the Senator from Tennessee may have 5 minutes following the quorum call, and before the vote.

Mr. GORE. Mr. President, I did not think the unanimous-consent agreement applied to an amendment to an amendment.

The PRESIDING OFFICER. It does apply.

Mr. GORE. Mr. President, I suggest that the fact that I have not yet read the first sentence of the speech I have carefully prepared illustrates how difficult it is, under the time limitation arrangements into which we enter by unanimous consent, to discuss these technical subjects. It also illustrates the inadvisability of having the Senate or the House of Representatives wait until the last few nights before adjournment to deal with tax matters.

Here is an important subject. Obviously I cannot adequately deal with it in the few minutes which remain to me.

If the Senator from Colorado will ask me a brief question——

Mr. CARROLL. I am very much concerned——

The PRESIDING OFFICER. The Chair must advise the Senator from Tennessee that, under the agreement, he is required to wait until the quorum call is had, following which he may have 5 minutes.

Mr. GORE. Then I shall take my seat.

The PRESIDING OFFICER. The Senator from Virginia [Mr. BYRD] is recognized for 10 minutes.

Mr. CARROLL. Mr. President, will the Senator from Virginia yield some time to me?

Mr. BYRD of Virginia. I yield 2 minutes to the Senator from Colorado.

Mr. CARROLL. Mr. President, I come from an area where mining is important. I understand that the amendment of the Senator from Tennessee would apply straight across the board, on the basis of the distinction between 50 percent and 33⅓ percent. I am in sympathy with the amendment; and for many years I have espoused the cause of modification of the depletion allowance with reference to gas and oil.

The able Senator from South Dakota stated the point; namely, that price control has almost destroyed gold mining in my State. There still may be a profit from gold mining there; but it is so small—and the same is true of the mining of lead or zinc—that if we were to reduce the existing small profit, that would further depress the mining industry, which already has almost been destroyed.

On the other hand, I favor reasonable depletion allowance for industries which are making tremendously large profits.

Has the Senator from Tennessee considered that aspect of the matter?

Mr. GORE. Yes. As I said to the Senator from South Dakota, this amendment would have no effect at all on an unprofitable industry or business. My amendment would only limit the deduction from otherwise taxable income to 33⅓ percent of net; and unless a company or business were making profits, neither the 50 percent nor the 33⅓ percent limitation would have any effect.

Mr. CARROLL. Let me say that we on the Committee on Interior and Insular Affairs have been working for 2 or 3 years in an effort to assist the administration—which has been helpful; this is not a partisan quarrel—to set up, for minerals and mineral mining, a program along the line of the wool program or the sugar plan, I may say, because the mining industry of the country is in very serious condition. It may make a small profit; but the question really is, how much profit? We cannot compare mining in the United States with Aramco, in Arabia. We cannot compare the little profit made from gold or other mining industry with the tremendous profits made by the gas and oil industry.

That is why I make this clarifying statement in the limited time we have left for debate. It is true that there is

a depreciation allowance for various minerals, but, as I think the Senator from Illinois has said on several occasions, we are comparing a stew of horses with a stew of rabbits. We have, on the one hand, hundreds of millions of dollars of special tax privilege, which we seek to limit, for the benefit of the taxpayers, by closing a loophole, as against an industry which will die unless we continue to help it.

Because of the tremendous economic significance of this amendment to the whole West, I point out to the Senator from Tennessee, one must understand the mining problems of the West. The mining industry is dying on the vine. Mines are being closed because of economic pricing conditions. There is a fixed price for gold in this Nation which does not correspond to the price of gold on the world market, and that is true of lead, zinc, and other basic metal prices of this Nation. Some years ago my State was the leading producer of gold in this country. Now that is no longer true. Now our lead and zinc mines are closing.

I hope the Senator from Tennessee will reconsider, by withdrawing his amendment for further study. Our first task is to plug the great loophole which is draining hundreds of millions of dollars of revenues away from the Nation, at a critical period in American history.

Mr. GORE. Mr. President, will the Senator yield?

Mr. CARROLL. Yes.

Mr. GORE. I am trying to get at the horses of big profit.

Mr. CARROLL. But it is not the mining industry.

Mr. GORE. The rabbits of little or no profit will certainly not be affected by my amendment. My amendment would reduce only the limitation which, under the law, is 50 percent of net taxable income, which to most people means net profit, down to 33⅓ percent.

I appreciate the able Senator's request that this subject be gone into more fully. There is certainly a point to his plea.

Mr. CASE of South Dakota. Mr. President, will the Senator yield?

Mr. GORE. I do not have the time.

Mr. CARROLL. I shall be glad to yield in a moment. May I say, first, to the Senator from Tennessee that I wholeheartedly support the integrity and the purpose of his amendment, and I wish it might have been done across the board. Some 10 years ago I served on the House Ways and Means Committee, and I first learned of the way that our people were being taken advantage of by this special privilege concept of depletion allowance. This problem confronted Franklin Roosevelt in 1940 and 1941. We had the same experience with Harry Truman when he was President of the United States. He also recommended that the depletion allowance be modified, especially with reference to gas and oil.

We have to face the fact today that one of the most powerful industries in this Nation is the gas and oil industry, which has its influence in every department, executive and legislative, in this Government. We have a loophole that runs into half a billion dollars a year in revenue loss to the people, to the benefit of one of the most powerful groups in this Nation.

I hope the able Senator from Tennessee will not confuse the issue. If I understand the Douglas amendment, this is an issue which we must meet by frontal assault. Let us find the answer by a record vote. This attempt has been made many times before. We are not going to win. Year after year after year, we make this fight. Year after year after year after year, we go to the American people and tell them that we should close the loophole. But we have never succeeded.

I say to the able Senator from Tennessee, let us not further confuse the issue.

I apologize to the Senator from South Dakota for not being able to yield to him, unless the Senator from Virginia will permit me two minutes I am unable to yield to the Senator from South Dakota.

The PRESIDING OFFICER. Under the unanimous consent agreement, a quorum call is now in order, at the conclusion of which there will be 5 minutes on each side.

Mr. ANDERSON. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. ANDERSON. How did the Senator from Virginia lose 10 minutes by yielding 5?

The PRESIDING OFFICER. He yielded.

Mr. ANDERSON. He yielded 5 minutes. How did he lose 10 minutes?

The PRESIDING OFFICER. The Chair is informed that he yielded 10 minutes.

The clerk will call the role.

The legislative clerk proceeded to call the roll.

Mr. BYRD of Virginia. Mr. President, I ask unanimous consent to suspend further proceedings under the quorum call.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CASE of South Dakota. Mr. President, will the Senator yield me some time?

Mr. BYRD of Virginia. Mr. President, I yield 1 minute to the Senator from South Dakota.

Mr. CASE of South Dakota. Mr. President, I merely wish to point out that I for one do not accept the proposition that the limitation of 50 percent, or 33⅓ percent, is merely a formula for tax relief. That is not true when one is dealing with a low profit industry. It might be true with a high profit industry, but it certainly is not true with a low profit industry.

Some persons may think that the hard metal mining industry of this country is expendable. Some persons may think gold mining is an expendable industry. We certainly have destroyed most of that industry in this country. There are only a very few gold mines still in operation.

This amendment furnishes the means for extinction of gold mining. Within the last couple of years we have lost at least $3 billion of our gold reserves in this country. We ought to do something to keep gold mining alive.

The proposal in the amendment would destroy the possibility of gold mines being dividend-paying. I hope the amendment will be rejected.

The PRESIDING OFFICER. The time of the Senator from South Dakota has expired.

Mr. MONRONEY. Mr. President, will the Senator yield me 3 minutes?

Mr. BYRD of Virginia. I have only 4 minutes.

Mr. MONRONEY. Will the Senator yield me 2 minutes?

Mr. BYRD of Virginia. I yield 2 minutes to the Senator from Oklahoma.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized for 2 minutes.

Mr. MONRONEY. I wish to ask the distinguished junior Senator from Tennessee about the amendment. I thought I knew a great deal about depletion, and particularly percentage depletion, but this is a new angle which I do not believe has been sufficiently explored. Certainly I have never learned of it in the many years I have had the privilege of representing an important oil State, the State of Oklahoma.

It seems to me at first glance that the greater the net profit of a corporation the greater would be its opportunity to write off the 27½ percent depletion. For instance, a huge corporation having a net profit of $10 million would have a base of $3.3 million for its depletion allowance, yet in respect to the new growth in the industry, the man who has one or two, or perhaps three, wells in a shallow area, the net income is very low. An income of $12,000 a year would be pretty high for a wildcatter of that sort. He would have a base of only $4,000 on which to compute the 27½ percent depletion, but he would be the person who would need the depletion allowance, so that he could continue with exploration.

Because of the effect of the amendment upon other minerals, as well as upon oil and gas, I hope the distinguished Senator will ask the committee to give the amendment at least the advantage of hearings, so that we can listen to all types of producers who will come before the committee to give us examples of what the amendment would do to the development of oil in the various sizes and categories of this highly important industry.

I ask the Senator to reply.

Mr. GORE. Mr. President, will the Senator yield?

Mr. MONRONEY. I yield.

The PRESIDING OFFICER. The time of the Senator from Oklahoma has expired.

Mr. GORE. Mr. President, I yield myself 2 minutes of my time.

The PRESIDING OFFICER. The Senator from Tennessee is recognized for 2 minutes.

Mr. GORE. Mr. President, I ask unanimous consent to have my statement printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR GORE

The amendment which I now offer is a simple one in concept. It concerns the

maximum deductions which a taxpayer can take on account of percentage depletion.

Existing law provides for percentage depletion according to differing percentages as set out in the code. These percentages run from 27½ percent in the case of oil and gas on down to 5 percent in the case of brick and tile clay, sand, stone, etc.

There is, however, an overall limitation. The code also provides that the allowance for depletion shall not exceed 50 percent of the taxpayer's taxable income from the property involved, computed without regard to the depletion allowance. My amendment would reduce this 50 percent limitation to 33⅓ percent.

A great deal has been said, over the years, about percentage depletion. It has been attacked vigorously. It has been defended with equal vigor.

There are two principles of taxation involved in our laws and regulations respecting percentage depletion. These two principles have been somewhat intermixed and intermingled and a great deal of confusion has resulted.

One principle of taxation which has always been recognized since we have had a Federal income tax, is that the return of capital should not be taxed. An investor in any enterprise has always been entitled to a tax-free return of the capital he has invested in that enterprise.

Accordingly, we have various schedules for depreciation and cost depletion. On the sale or conversion of a property, cost is recovered before any tax is computed on the gain realized. This principle has been grossly abused from time to time.

Another principle which is generally recognized, although here there is some disagreement, is that a government may legitimately use tax policy as a means of promoting, or dampening down, various activities because of their economic, social or other effects. Accordingly, we have from time to time, by means of tax incentives, encouraged activities which were deemed desirable or beneficial to the Nation as a whole. Under this principle, the Government has, especially in times of emergency, provided for accelerated depreciation, higher depletion rates and special deductions for emergency development or exploration.

Let me say, in passing, that a tax incentive is not necessarily the best way to subsidize or encourage a given activity. An outright subsidy to exploration in the extractive industries, for example, might prove to be more forthright, equitable and efficacious. After all, a tax reduction does not help the small "wildcatter" or coal miner who is losing money.

Percentage depletion has been defended on both of the principles I have briefly mentioned. Most spokesmen, however, are more prone to emphasize the fact that percentage depletion, admittedly far more generous than cost depletion, is justified, and even required, in the national interest. It is claimed that only through such generous treatment can the ordinarily prudent man be induced to undergo the great "risks" involved. Although the gusher is the picture ordinarily painted of oil extraction, these people would have us believe that the more appropriate picture is a succession of dry holes, stretching in unnumbered succession across the horizons of the world's waste lands.

In my opinion, percentage depletion is erroneous in principle, allowing the cost of an operation to be recovered many times over. In practice, it has been greatly abused, resulting in the enrichment of a few at the expense of the many taxpayers not so favorably treated by the tax laws.

I think it might be helpful to review briefly just how our depletion tax practices have developed. The development of depletion laws and regulations is an interesting example of the foot-in-the-door type of loophole creating.

Depletion has been recognized in one form or another from the very beginning of our Federal income tax laws in 1913. The Revenue Act of 1913 provided for a "reasonable allowance for the exhaustion, wear, and tear of property arising out of its use or employment in the business"; that is, an allowance was to be made for the return, untaxed, of capital.

The Revenue Act of 1916 spelled out depletion allowances a little more definitely, and provided that "when the allowance authorized * * * shall equal the capital originally invested, or in case of purchase made prior to March 1, 1913, the fair market value as of that date, no further allowance shall be made." In other words, depletion was allowed for the purpose of seeing to it that an owner of a mine or well recovered his investment tax free.

In 1918 a new idea was enacted into law, discovery depletion. In explaining this new idea on the floor of the Senate, Senator Penrose, the ranking Republican member of the Finance Committee, stated that the committee had changed the language of the provisions of law dealing with depletion so as to provide "for a more liberal allowance than heretofore permitted in the case of newly discovered mines, or oil or gas wells, permitting the deduction to be based on the fair-market value of property discovered instead of its cost."

Senator La Follette opposed the provision, stating that depletion allowance might permit taxpayers to take depletion deductions far in excess of cost.

Representative KITCHIN, chairman of the Ways and Means Committee, opposed the changes in the law, stating that they were relief provisions and that he could not subscribe to them. He regarded them as "pieces of special favoritism."

It would appear from the Finance Committee report, although it is not specifically stated, that this change was made in order to encourage exploration and discovery of new resources.

At this particular point in the legislative history of depletion, and associated deductions and allowances, the two general principles of taxation to which I have alluded became somewhat fused. They have remained confused ever since. Discovery depletion then, seemed to allow the return of capital untaxed, but in addition, it also gave an extra reward to the wildcatter. Furthermore, since the two principles were incorporated into one tax deduction, the extra reward which theoretically encouraged wildcatting was available to those who operated only in proven fields and had no intention or desire to move into unexplored territory.

In 1926 a gross distortion was written into law. In the Revenue Act for that year, discovery depletion was changed to percentage depletion for oil and gas.

The conference report on the Revenue Act of 1926, in discussing this change for oil and gas, stated that the administration of the discovery depletion provision "has been very difficult" and that the change to percentage depletion was being made "in the interest of simplicity and certainty in administration."

I realize that proper administration must be kept in mind when tax bills are drawn up. Indeed, if we eliminated all of the loopholes and reduced applicable rates, administration would certainly be much improved. To violate a proper principle of taxation and introduce gross inequities into the tax structure in the name of ease of administration, however, is something else altogether. Ease of administration has been invoked many times to masquerade a tax favor.

At least some, however, recognized at the time just what this change was, in fact, intended to accomplish. Senator Couzens stated on the floor of the Senate that "Congress first intended to * * * allow the deduction to the little 'wildcatter' * * *. That was the intent of Congress * * *. That idea has now been entirely abandoned, and this is so profitable and advantageous to the oil industry that it is proposed to extend it so that not only the little wildcatter but the whole industry will get the benefit."

Here, then, we see clearly the result of an attempt on the part of the Congress to incorporate two principles of taxation into one tax law. First, there is the attempt to provide for the return of capital tax free, second, there is the attempt to supply an incentive for additional exploration and discovery, by means of tax concessions, in order to accomplish the social and economic goal of providing the country with an ample supply of oil and gas. The confusion thus introduced is still with us, and subsequent technological and tax developments have compounded the confusion, with wide flow of tax benefits but with only hit or miss promotion of national economic objectives and needs.

Of course, once oil and gas crossed over the Jordan into the promised land, other mineral, mining and extractive interests were not far behind.

In addition to percentage depletion, oil and gas companies also receive deductions for intangible drilling costs, while other mineral and mining interests receive special deductions for exploration and developmental costs. These costs, along with all others, are then recovered a second time by allowing all these operators to take percentage depletion.

The arguments in favor of this special treatment all boil down to one. It is necessary to spur new exploration. It is necessary as an inducement for high-risk operations. It is necessary if the economy is to have the advantages which accrue as a result of having an abundance of energy sources and minerals.

These arguments will not stand close scrutiny.

In the first place, despite the distortions which have been brought about by monopoly, oligopoly, and arbitrary price fixing, our national economy is still basically price regulated. If a commodity is in short supply and in strong demand, the prices generally go up. When that happens, wildcatting, exploration, and development, as well as production from existing sources, and imports, will be increased. Prices do not necessarily come down when conditions are reversed, but that is a different subject altogether.

Granting tax concessions which give the most benefit to large, established producers may not bring about increased production.

Proved, recoverable oil and gas reserves amounted to more at the end of 1959 than they did at the end of 1958. These proved reserves of oil amounted to more than 38 billion barrels, while production last year was only about 2.8 billion barrels.

We have had much testimony on this point over the years. I hope the next administration will support determined efforts to correct percentage depletion abuses.

In 1942, Secretary Morgenthau testified before the Senate Finance Committee on the subject of depletion and related items. He stated then that it was doubtful that percentage depletion encouraged "exploration and drilling for oil. There is grave doubt that it has substantial effect on oil discovery." So far as cost is concerned, Secretary Morgenthau went on to say, "It would have cost the Federal Government about one-third as much to have paid all the cost of every wildcat well that was drilled in 1941 as to have allowed percentage depletion and the associated intangible drilling expenses."

I find it most distressing to hear so many of my collegagues, on both sides of the aisle, speak the old shibboleths about free enterprise when they want to justify a giveaway

by offering tax cuts to the large, well entrenched, and wealthy. It never seems to occur to some that there are ways to stimulate activity other than through tax cuts.

If additional exploration for oil and minerals is needed, for example, the Government, as the agent of the whole society, may follow any number of courses.

In 1942, when the Senate was considering an amendment to broaden percentage depletion, Senator La Follette said, "In my opinion this percentage depletion is one of the worst features of the bill, and now it is being extended. We are vesting interests which will come back to plague us." How right he was.

Senator Taft, during the same debate, stated that "the percentage depletion is to a large extent a gift. It is to a large extent a special privilege beyond what anyone else can get."

Let me give an example of the way these tax loopholes may be used.

Earlier this year, the president of the Sunset International Petroleum Co. put out a publicity sheet for the press which explained in some detail how that company expected to realize a large profit during the next few years, tax free, and, furthermore, on a project wholly unrelated to oil production.

Here is the scheme. The company has purchased a large tract of land in San Diego. It plans to develop out of this land some 50,000 building lots. On this real estate venture the company expects to make a net profit by 1968 of $25 million. At the same time, the company could schedule its drilling operations so that the double deductions of intangible drilling costs and percentage depletion would offset the profit each year on the real estate venture.

This is a neat trick, and perhaps it can be accomplished. Most companies of this sort do not wildcat. They drill in fields that are already proven. The number of dry holes can be very closely estimated.

I would like to hear a defense of this practice. Such a defense surely could not be made on grounds of equity. Such a defense could surely not be made on grounds of national economic necessity. Would anyone advance arguments on grounds of expediency?

Let me emphasize the ordinary treatment for tax purposes of these expenditures I am discussing. When one acquires a property in land which he desires to mine or drill, he then proceeds to explore or wildcat. These costs represent an addition to his capital investment. Ordinarily, the comparable costs in any other profitmaking venture would be so handled. If one purchases real estate, erects a building, purchases machinery for manufacturing purposes, all these costs become a part of his capital investment, to be recovered by depreciation or some other appropriate means.

In the case of mining or oil and gas extraction, costs of this type should be added to other capital investments, and the whole capital investment then recovered tax free by a proper schedule of cost depletion. When the cost is recovered, the tax deduction should cease.

As the law now stands, when an owner recovers his exploration, development and intangible drilling costs, and then at the same time takes percentage depletion which is designed to allow quick recovery of his entire capital investment, that owner is in reality allowed a double deduction.

Of course, even after he recovers all his costs, percentage depletion continues, allowing recovery of costs many times over. This deduction, I believe, violates every rule of equity, accounting and taxation.

Now, I realize that there is little chance of removing the provisions of our tax laws relating to percentage depletion during this Congress. I would hope, eventually, that this could be done so that the extractive industries would be on cost depletion, which more nearly corresponds to the type of depreciation which are applicable to other industries.

What we can do now, both in the interest of equity and increased revenue, is to reduce slightly the tax advantages which percentage depletion gives to certain taxpayers.

As I said, my amendment would not alter the percentage depletion rates applicable to various extractive industries. Some taxpayers would be affected, of course. For the oil industry as a whole, depletion allowances now amounts to approximately 45 percent of net taxable income. My amendment would reduce somewhat the advantage which many companies could take of the 27½-percent allowance.

Other extractive industries would also find this tax advantage reduced somewhat. Here again, the effect would differ from industry to industry and from operator to operator.

No precise figures have been worked out to show the revenue effects of this amendment. The figures involved, however, are appreciable. It was estimated in 1958 that the elimination of percentage depletion for oil and gas alone would result in increased revenues totaling almost $1 billion. At the same time, it was estimated that a reduction from the current 27½ percent to a 15 percent depletion rate would increase revenues by $420 million.

The revenue effect of my amendment would be considerably less than either of the above figures. A Treasury spokesman has estimated that the revenue effect of my amendment, taking into account minerals as well as oil and gas, would be to increase revenues by approximately $250 million. I believe this figure to be conservative.

Mr. GORE. Mr. President, I find the pleas of my friend from Oklahoma [Mr. MONRONEY] and my friend from Colorado [Mr. CARROLL] quite persuasive. Therefore, I shall withdraw the amendment in a moment.

The discussion has served to illustrate several things. It illustrates the inadvisability and impracticality of waiting until the closing days of a session of Congress to deal with a tax bill. It also illustrates the inability of a Senator to discuss adequately a complicated and technical provision of the Internal Revenue Code in a few minutes.

My amendment also serves to illustrate the fact that the limiting factor on the big profit earners, those who benefit most from percentage depletion, is the limitation of 50 percent of net taxable income.

Mr. CASE of South Dakota. Mr. President, before the Senator withdraws his amendment, I hope he will permit me to express my appreciation to him for withdrawing the amendment and to say that the illustration of the Senator from Oklahoma exactly fits the point I sought to make. The limitation could bear most heavily upon the low-income operator.

Mr. GORE. I think the Senator's point of view has some validity. To offset it is the fact that this provision would rest most heavily upon those who have the greatest profits.

Mr. CASE of South Dakota. It might. If the Senator had a graduated proposal, that might be something else.

Mr. GORE. The 27½ percent of gross may be quite different from 50 percent of net.

Mr. CASE of South Dakota. Gold mining does not get the 27½ percent, which was my point.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. GORE. Mr. President, I yield myself 1 additional minute.

I thank my friend from South Dakota.

Mr. CARROLL. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. CARROLL. I thank my friend from Tennessee for withdrawing his amendment. This is a subject which needs the most serious consideration and study. More than 30 years ago the depletion allowance was enacted. The time has come for a complete reappraisal.

The Senator from Tennessee has highlighted this most important issue and I heartily commend him for it. I thank the Senator for withdrawing his amendment until we can study it more fully.

Mr. MONRONEY. Mr. President, I wish to express my appreciation to the Senator from Tennessee. In his usual fairminded way the Senator has decided to withdraw his amendment, so that we can study the effect it would have upon the tax laws. The Senator did a great service with respect to the original depletion amendment, which was agreed to almost unanimously. A little more study of this proposal will help a great deal.

Mr. GORE. I thank my friend from Oklahoma.

Mr. President, I withdraw the amendment. I express the hope that this will serve to illustrate the problem. I hope that early next year the Senate will start work, on closing loopholes in our tax laws, and on provisions constituting tax favoritism.

I shall now listen to the senior Senator from Illinois with the greatest of interest.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Illinois. How much time does the Senator from Illinois yield?

Mr. DOUGLAS. Mr. President, I believe I am entitled to 15 minutes.

The PRESIDING OFFICER. The Senator is correct.

Mr. DOUGLAS. Mr. President, my amendment, of which a copy is on the desk of each Senator, was printed in the RECORD for last Saturday. It is a very moderate attempt to reduce the greatest tax racket in the entire American revenue system.

The gas and oil industry is the most favored of all industries in this country. It is largely favored because of the depletion allowance system.

My amendment is directed only at the gas and oil industry, and not at the other mineral industries.

In gas and oil, there can, of course, be deducted from gross income the operating costs. This is very proper. The drilling and development costs can also be deducted. Seventy-five to ninety percent of these costs can, as a matter of fact, be written off in the first year of operation of a well. In other words, the fastest rate of acceleration of depletion of all industries is given to gas and oil. There is also a provision that the cost of drilling the dry holes may be deducted

from the income from successful drillings.

There are two other favors applying to income derived from foreign holdings of American companies, into which I shall not go at this time.

In addition to the full and accelerated provision for depreciation, there is also the depletion allowance. This amounts to 27½ percent of gross revenue, and up to 50 percent of net revenue. All forms of depletion allowances, according to the statistics on income, resulted in deductions in 1957 of $3.3 billion. Over 70 percent of this was for gas and oil, so that the depletion allowance for gas and oil amounted to approximately $2.3 billion.

In the 3 years since 1957 there has undoubtedly been an increase in the depletion allowances because these were previously growing at the rate of about $250 million a year. So it is probably safe to say that the depletion allowances given to the gas and oil industry now amount to well over $2.5 billion a year. This is a favor which no other industry has to the same degree. It is one which is enjoyed primarily by the big companies.

The Internal Revenue Service in its statistics for 1957 shows that 69 percent of all the corporate depletion deductions were obtained by corporations with assets of over $100 million; that 7 percent were obtained by corporations with assets of from $50 million to $100 million; and 11 percent were obtained by corporations with assets from $10 million to $50 million.

So this is a favor which is given to the giant corporations; it is not much of a favor to the small driller. It is a favor to the big corporations, and under it the oil industry pays approximately only one-third the rate of taxation of other corporations in this country. The average tax which corporations pay is 51 percent of the net income. The last figures which I saw for the oil and gas industry show that the average tax rate by the oil and gas companies ranged between 17 and 21 percent, so that they are not bearing their share of the load.

I have put into the RECORD time and time again the records of 28 oil companies—which I do not name, and which I identify only by letter, but which I could name—that shows that there was 1 company which in 5 years had net profits of $65 million, and not only paid no taxes, but received $145,000 back from the Government.

There are many other corporations which have a similar favored record.

My proposal is a modest one. I do not propose to abolish the depletion allowance. I do not propose to reduce it across the board. I merely propose to introduce a moderate, graduated reduction. On the first $1 million of gross revenue there would be no reduction whatsoever. That would remain at 27½ percent. On gross income from $1 million to $5 million the depletion allowance would be 21 percent. On gross income in excess of $5 million the depletion allowance would be 15 percent. This is a very moderate proposal.

No farmer would lose a cent in royalties. No small driller would suffer the reduction of a cent in income. But the readjustment would take place entirely in the case of giant companies that are already powerful, already rich, already receiving huge incomes, and already receiving gross tax favoritism. It is a very moderate proposal.

Mr. President, this issue has faced the Senate and the Nation for at least a decade. It is now before us again. We must make our decision as to what we shall do. It is time that we put our fiscal system in order. In our fiscal system some people pay too much because others pay too little.

The time has come when we should deal with this issue. The depletion allowance can continue without any time limit. It occurs after depreciation has been allowed and fully taken account of. As long as the oil and the gas run, the depletion allowance can continue to be taken. There are cases in which the amount of the depletion is many, many times the total original cost which bear in mind has already been deducted under the depreciation practice.

I think Senators are aware of the issues at stake.

I wish to say to the gas and oil industry, which has been fighting this amendment for years, that if they are once again successful in beating this amendment, as they may well be, there is likely to arise in the country a storm of indignation which will not stop with the amendment which I offer, but which will go on to more rigid requirements such as those which were proposed, for example, by my good friend the Senator from Tennessee [Mr. GORE].

The PRESIDING OFFICER. The 10 minutes of the Senator from Illinois has expired.

Mr. DOUGLAS. I will be very glad to yield the floor.

The PRESIDING OFFICER. The Senator from Texas has control of the time in opposition.

Mr. JOHNSON of Texas. Mr. President, I yield to the Senator from Oklahoma [Mr. MONRONEY] such time as he wishes to use.

Mr. MONRONEY. Mr. President, as the distinguished Senator from Illinois has said, this is not a strange matter to the Senate or the House. In my memory of various attacks which have been made upon the historic oil and gas depletion allowance, I do not know of any amendment that has been more thoroughly or more ably discussed by both the House and the Senate than the one which has been offered by my distinguished friend and colleague, the senior Senator from Illinois.
